EGRET Observations of Active Galactic Nuclei: 0836+710, 0454−234, 0804+499, 0906+430, 1510−089, and 2356+196. *D. J. Thompson, D. L. Bertsch, B. L. Dingus, C. E. Fichtel, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, E. J. Schneid, & P. Sreekumar.* 415, L13, 191-F13 (1993)

Diffuse Gamma-Ray Emission in the Galactic Plane from Cosmic-Ray, Matter, and Photon Interactions. *D. L. Bertsch, T. M. Dame, C. E. Fichtel, S. D. Hunter, P. Sreekumar, J. G. Stacy, & P. Thaddeus.* 416, 587, 210-F6 (1993)

SMM Observations of Gamma-Ray Transients. I. A Search for Variable Emission at MeV Energies from Five Galactic and Extragalactic Sources. *M. J. Harris, G. H. Share, M. D. Leising, & J. E. Grove.* 416, 601, 210-G8 (1993)

EGRET Limits on High-Energy Gamma-Ray Emission from X-Ray– and Low-Energy Gamma-Ray–selected Seyfert Galaxies. *Y. C. Lin, D. L. Bertsch, B. L. Dingus, C. E. Fichtel, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, E. Schneid, P. Sreekumar, & D. J. Thompson.* 416, L53, 216-B11 (1993)

OSSE Observations of the Bright Seyfert 1 Galaxy IC 4329A. *A. C. Fabian, K. Nandra, A. Celotti, M. J. Rees, J. E. Grove, & W. N. Johnson.* 416, L57, 216-C1 (1993)

Gamma-Ray Escape in Type Ia Supernovae: The 847 keV–m_B Diagram. *P. Ruiz-Lapuente, G. G. Lichti, R. Lehoucq, R. Canal, & M. Cassé.* 417, 547, 226-B5 (1993)

Gamma-Ray and Radio Observations of PSR B1509−58. *M. P. Ulmer, S. M. Matz, R. B. Wilson, M. J. Finger, K. S. Hagedon, D. A. Grabelsky, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, W. R. Purcell, M. S. Strickman, V. M. Kaspi, S. Johnston, R. N. Manchester, A. G. Lyne, & N. D'Amico.* 417, 738, 228-E8 (1993)

A Northern Sky Survey for Astrophysical Point Sources of 100 TeV Gamma Radiation. *T. A. McKay, A. Borione, M. Catanese, C. E. Covault, J. W. Cronin, B. E. Fick, K. G. Gibbs, K. D. Green, S. Hauptfeld, D. Kieda, H. A. Krimm, N. M. Mascarenhas, J. Matthews, B. J. Newport, D. Nitz, R. A. Ong, L. J. Rosenberg, D. Sinclair, & J. C. van der Velde.* 417, 742, 228-F1 (1993)

Search for Emission of Ultra–High-Energy Radiation from Active Galactic Nuclei. *D. E. Alexandreas, G. E. Allen, D. Berley, S. Biller, R. L. Burman, M. Cavalli-Sforza, C. Y. Chang, M. L. Chen, P. Chumney, D. Coyne, C. Dion, G. M. Dion, D. Dorfan, R. W. Ellsworth, J. A. Goodman, T. J. Haines, C. M. Hoffman, L. Kelley, S. Klein, D. E. Nagle, S. C. Schaller, R. Schnee, A. Shoup, C. Sinnis, M. J. Stark, D. D. Weeks, D. A. Williams, J.-P. Wu, T. Yang, G. B. Yodh, & W. Zhang (The CYGNUS Collaboration).* 418, 832, 242-G11 (1993)

TeV Gamma-Ray Observations of *Compton Gamma-Ray Observatory* Pulsars: Evidence against Inverse-Compton Controlled Outer Gaps. *H. I. Nel, O. C. de Jager, B. C. Raubenheimer, C. Brink, P. J. Meintjes, & A. R. North.* 418, 836, 243-A3 (1993)

Ultraviolet Observations of the Gamma-Ray Blazar 3C 279 following the Gamma-Ray Flare of 1991 June. *Jerry T. Bonnell, W. Thomas Vestrand, & J. Gregory Stacy.* 420, 545, 9-D3 (1994)

SMM Observations of Gamma-Ray Transients. II. A Search for Gamma-Ray Lines between 400 and 600 keV from the Crab Nebula. *Michael J. Harris, Gerald H. Share, & Mark D. Leising.* 420, 649, 10-G1 (1994)

Search for Gamma-Ray Emission Lines from SS 433. II. 1980–1989. *B. J. Geldzahler & H. A. Geller.* 420, 655, 10-G9 (1994)

High-Energy Gamma Radiation from Geminga Observed by EGRET. *H. A. Mayer-Hasselwander, D. L. Bertsch, K. T. S. Brazier, J. Chiang, C. E. Fichtel, J. M. Fierro, R. C. Hartman, S. D. Hunter, G. Kanbach, P. W. Kwok, D. A. Kniffen, Y. C. Lin, J. R. Mattox, P. F. Michelson, P. L. Nolan, K. Pinkau, H. Rothermel, E. J. Schneid, M. Sommer, P. Sreekumar, D. J. Thompson, & C. von Montigny.* 421, 276, 19-D6 (1994)

Spectral Evolution of Gamma-Ray Bursts Detected by the SIGNE Experiment. I. Correlation between Intensity and Spectral Hardness. *Vincent E. Kargatis, Edison P. Liang, Kevin C. Hurley, C. Barat, E. Eveno, & M. Niel.* 422, 260, 33-C12 (1994)

High-Energy Gamma Rays from the Intense 1993 January 31 Gamma-Ray Burst. *M. Sommer, D. L. Bertsch, B. L. Dingus, C. E. Fichtel, G. J. Fishman, A. K. Harding, R. C. Hartman, S. D. Hunter, K. Hurley, G. Kanbach, D. A. Kniffen, C. Kouveliotou, Y. C. Lin, J. R. Matiox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, E. Schneid, P. Sreekumar, & D. J. Thompson.* 422, L63, 45-A1 (1994)

Gamma-Ray Observations of Pulsars. *M. P. Ulmer.* 90, 789, 13-E6 (1994)

Gamma Rays from the Geminga Pulsar: Variations with Time and Phase. *I. A. Grenier, K. Bennett, R. Buccheri, M. Gros, R. N. Henriksen, W. Hermsen, G. Kanbach, & B. Sacco.* 90, 813, 13-G6 (1994)

Pulsar Studies with COMPTEL. *K. Bennett, M. Busetta, A. Carramiñana, R. Diehl, G. Lichti, V. Schönfelder, A. Strong, W. Hermsen, L. Kuiper, A. Connors, J. Ryan, & R. Buccheri.* 90, 823, 14-A5 (1994)

The Status of Ultra–High-Energy Gamma-Ray Observations. *R. J. Protheroe.* 90, 883, 14-F10 (1994)

High-Energy Gamma-Ray Observations of Active Galaxies. *Carl E. Fichtel.* 90, 917, 15-B12 (1994)

SIGMA Hard X-Ray Observations of the Burst Source MXB 1728−34. *A. Claret, A. Goldwurm, B. Cordier, J. Paul, J.-P. Roques, L. Bouchet, M.-C. Schmitz-Fraysse, P. Mandrou, E. Churazov, M. Gilfanov, R. Sunyaev, N. Khavenson, A. Diachkov, B. Novikov, R. Kremnev, & V. Kovtunenko.* 423, 436, 51-E5 (1994)

Very High Energy Gamma Rays from Active Galactic Nuclei: Cascading on the Cosmic Background Radiation Fields and the Formation of Pair Halos. *F. A. Aharonian, P. S. Coppi, & H. J. Völk.* 423, L5, 53-B7 (1994)

Gamma-Ray Limits on Galactic ^{60}Fe and ^{44}Ti Nucleosynthesis. *Mark D. Leising & Gerald H. Share.* 424, 200, 64-D7 (1994)

Observations of Cygnus X-1 by COMPTEL during 1991. *M. McConnell, D. Forrest, J. Ryan, W. Collmar, V. Schönfelder, H. Steinle, A. Strong, R. van Dijk, W. Hermsen, & K. Bennett.* 424, 933, 76-D1 (1994)

A Search for Nonburst Emission from the Positions of Well-localized Gamma-Ray Bursts. *John M. Horack & A. Gordon Emslie.* 425, 776, 91-D7 (1994)

Evidence for Intense Coronal Prompt Gamma-Ray Line Emission from a Solar Flare. *C. Barat, G. Trottet, N. Vilmer, J.-P. Dezalay, R. Talon, R. Sunyaev, O. Terekhov, & A. Kuznetsov.* 425, L109, 94-G10 (1994)

A Study of M31, M87, NGC 253, and M82 in High-Energy Gamma Rays. *P. Sreekumar, D. L. Bertsch, B. L. Dingus, J. A. Esposito, C. E. Fichtel, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, E. J. Schneid, & D. J. Thompson.* 426, 105, 97-D1 (1994)

Search for Ultra–High-Energy Radiation from Gamma-Ray Bursts. *D. E. Alexandreas, G. E. Allen, D. Berley, S. Biller, R. L. Burman, M. Cavalli-Sforza, C. Y. Chang, M. L. Chen, P. Chumney, D. Coyne, C. Dion, G. M. Dion, D. Dorfan, R. W. Ellsworth, J. A. Goodman, T. J. Haines, M. Harmon, C. M. Hoffman, L. Kelley, S. Klein, D. E. Nagle, S. C. Schaller, D. M. Schmidt, R. Schnee, A. Shoup, C. Sinnis, M. J. Stark, D. D. Weeks, D. A. Williams, J.-P. Wu, T. Yang, G. B. Yodh, & W. Zhang (The CYGNUS Collaboration).* 426, L1, 103-A8 (1994)

π^0 Decay around Black Hole Candidates: A Spectral Component above 200 keV. *E. Jourdain & J. P. Roques.* 426, L11, 103-B6 (1994)

On the Optical Counterparts, Long-Term Variabilities, Radio Jets, and Accretion Sources in 1E 1740.7−2942 and GRS 1758−258. *Wan Chen, Neil Gehrels, & Marvin Leventhal.* 426, 586, 105-F6 (1994)

GRIS Background Reduction Results Using Isotopically Enriched Ge. *S. D. Barthelmy, L. M. Bartlett, N. Gehrels, M. Leventhal, B. J. Teegarden, J. Tueller, S. Belyaev, V. Lebedev, & H. V. Klapdor-Kleingrothaus.* 427, 519, 116-D6 (1994)

Observation of Pulsed Hard X-Rays/γ-Rays from PSR 1509−58. *S. Gunji, M. Hirayama, T. Kamae, S. Miyazaki, Y. Sekimoto, T. Takahashi, T. Tamura, M. Tanaka, N. Yamasaki, T. Yamagami, M. Nomachi, H. Murakami, J. Braga, & J. A. Neri.* 428, 284, 131-F7 (1994)

TeV Gamma-Ray Properties of Vela X-1. *B. C. Raubenheimer, A. R. North, O. C. de Jager, P. J. Meintjes, & H. I. Nel.* 428, 777, 140-A1 (1994)

Foreword. *Th. Courvoisier & Ph. Durouchoux.* 92, 325, 36-B6 (1994)

INTEGRAL: Overview and Mission Concept. *Christoph Winkler.* 92, 327, 36-B9 (1994)

Review of 3 Years of Observations with the Low-Energy Gamma-Ray Telescope SIGMA Onboard *Granat*. *P. Mandrou, J. P. Roques, L. Bouchet, M. Niel, J. Paul, J. P. Leray, F. Lebrun, J. Ballet, E. Churazov, M. Gilfanov, R. Sunyaev, B. Novikov, N. Khavenson, N. Kuleshova, A. Sheikhet, & I. Tserenin.* 92, 343, 36-D5 (1994)

A Review of Recent Results in Gamma-Ray Astronomy Obtained from High-Altitude Balloons. *B. J. Teegarden.* 92, 363, 36-F3 (1994)

Multiwavelength Approach to Gamma-Ray Sources in the Galactic Center Region. *I. F. Mirabel.* 92, 369, 36-F12 (1994)

Is the Galactic Center Annihilator 1E 1740.7−2942 a Source of MeV Gamma-Ray Continuum Emission? *Philippe Laurent & Jacques Paul.* 92, 375, 36-G5 (1994)

Review of *GRANAT*/SIGMA Observations of the Galactic Center Region. *E. Churazov, M. Gilfanov, R. Sunyaev, N. Khavenson, B. Novikov, A. Dyachkov, R. Kremnev, K. Sukhanov, B. Cordier, J. Paul, P. Laurent, A. Claret, L. Bouchet, J. P. Roques, P. Mandrou, & G. Vedrenne.* 92, 381, 36-G12 (1994)

HEAO 3 Observations of the Galactic Center 511 keV Line. *W. A. Mahoney, J. C. Ling, & Wm. A. Wheaton.* 92, 387, 37-A5 (1994)

Galactic 0.511 MeV Line Emission. *R. Ramaty, J. G. Skibo, & R. E. Lingenfelter.* 92, 393, 37-A12 (1994)

Long-Term Temporal Behavior of 1E 1740.7−2942. *Bertrand Cordier, Jacques Paul, & Jean-Marie Hameury.* 92, 401, 37-B8 (1994)

Annihilation and Backscattered Lines in the Galactic Center Region. *Ph. Durouchoux, P. Wallyn, & C. Chapuis.* 92, 405, 37-B13 (1994)

Observation of Transient High-Energy Emission Features in the Spectra of Black Hole Candidates and the Crab Nebula by *GRANAT*/SIGMA. *M. Gilfanov, E. Churazov, R. Sunyaev, N. Khavenson, B. Novikov, A. Dyachkov, I. Tserenin, K. Sukhanov, L. Bouchet, M. Denis, M. C. Schmitz-Fraysse, P. Mandrou, J. Paul, B. Cordier, A. Goldwurm, & F. Lebrun.* 92, 411, 37-C6 (1994)

COMPTEL Imaging of the Galactic Disk and the Separation of Diffuse Emission and Point Sources. *H. Bloemen, W. Hermsen, B. N. Swanenburg, C. P. de Vries, R. Diehl, V. Schönfelder, H. Steinle, A. W. Strong, A. Connors, M. McConnell, D. Morris, G. Stacy, K. Bennett, & C. Winkler.* 92, 419, 37-D2 (1994)

Diffuse Galactic Continuum Emission Measured by COMPTEL and the Cosmic-Ray Electron Spectrum. *A. W. Strong, R. Diehl, V. Schönfelder, M. Varendorff, G. Youssefi, H. Bloemen, W. Hermsen, C. de Vries, D. Morris, J. G. Stacy, & K. Bennett.* 92, 425, 37-D9 (1994)

COMPTEL Observations of the 1.809 MeV Gamma-Ray Line from Galactic ^{26}Al. *R. Diehl, C. Dupraz, K. Bennett, H. Bloemen, H. de Boer, W. Hermsen, G. G. Lichti, M. McConnell, D. Morris, J. Ryan, V. Schönfelder, H. Steinle, A. W. Strong, B. N. Swanenburg, M. Varendorff, & C. Winkler.* 92, 429, 37-E1 (1994)

Implications of ^{26}Al Emission at 1.8 MeV from the Vela Region. *U. Oberlack, R. Diehl, T. Montmerle, N. Prantzos, & P. von Ballmoos.* 92, 433, 37-E7 (1994)

Observation of the 1.8 MeV Emission Line from ^{26}Al and the Chemical Evolution of the Galaxy. *Georges Meynet.* 92, 441, 37-F2 (1994)

SIGMA Observations of the Bright X-Ray Transient Nova Persei: A New Black Hole Candidate? *J. P. Roques, L. Bouchet, E. Jourdain, P. Mandrou, A. Goldwurm, J. Ballet, A. Claret, F. Lebrun, A. Finoguenov, E. Churazov, M. Gilfanov, R. Sunyaev, B. Novikov, I. Chulkov, N. Kuleshova, & I. Tserenin.* 92, 451, 37-G2 (1994)

Fast Optical Variability of GRO J0422+32. *C. Bartolini, A. Guarnieri, A. Piccioni, G. M. Beskin, & S. I. Neizvestny.* 92, 455, 37-G8 (1994)

Noise Variability of the Hard X-Ray Transient Nova Persei. *M. Denis, J.-F. Olive, P. Mandrou, J. P. Roques, J. Ballet, A. Goldwurm, Ph. Laurent, B. Cordier, A. Vikhlinin, E. Churazov, M. Gilfanov, R. Sunyaev, A. Dyachkov, N. Khavenson, R. Kremnev, & V. Kovtunenko.* 92, 459, 38-A1 (1994)

Hard X-Ray Emission from Weakly Magnetized Neutron Stars. *Didier Barret & Gilbert Vedrenne.* 92, 505, 38-E7 (1994)

Gamma-Ray Pulsar Studies with COMPTEL. *W. Hermsen, L. Kuiper, R. Diehl, G. Lichti, V. Schönfelder, A. W. Strong, A. Connors, J. Ryan, K. Bennett, M. Busetta, A. Carramiñana, R. Buccheri, & I. A. Grenier.* 92, 559, 39-C7 (1994)

Gamma-Ray Properties of Active Galactic Nuclei. *V. Schönfelder.* 92, 593, 39-F8 (1994)

Gamma-Ray Bright Quasars and BL Lacertae Objects: EGRET Data. *Jonathan Schachter & Martin Elvis.* 92, 623, 40-B9 (1994)

Spectral Characteristics of Gamma-Ray Bursts Observed by the Anticoincidence Shield of the SIGMA Telescope aboard *GRANAT*. *François Pelaez, Laurent Bouchet, Elisabeth Jourdain, Michel Niel, Arnaud Claret, Philippe Laurent, François Lebrun, Jacques Paul, O. Terekhov, R. Sunyaev, A. Kuznetsov, D. Denisenko, M. Gilfanov, E. Churazov, N. Khavenson, & A. Diachkov.* 92, 651, 40-E4 (1994)

A 3 × 3 CsI(Tl) Array as an Example of a Segmented Detector. *J. A. Ruiz, J. L. Ferrero, G. Bernabeu, V. Reglero, & F. Sanchez.* 92, 659, 40-F1 (1994)

A Positron Annihilation Radiation Telescope Using Laue Diffraction in a Crystal Lens. *Peter von Ballmoos & Robert K. Smither.* 92, 663, 40-F7 (1994)

A New Telescope for Wide-Band Gamma-Ray Astronomy: The Silicon Compton Recoil Telescope (SCRT). *O. Tümay Tümer, Farid Ait-Ouamer, Scott C. Blair, Gary L. Case, Brendan P. O'Neill, Terrence J. O'Neill, R. Stephen White, & Allen D. Zych.* 92, 671, 40-G2 (1994)

Cylindrical Gamma-Ray Montitor (CYGAM) Concept. *N. G. Leikov & G. S. Bisnovatyi-Kogan.* 92, 679, 41-A1 (1994)

Spallation Products Induced in CsI(Tl) by High-Energy Protons. *J. A. Ruiz, E. Porras, J. L. Ferrero, V. Reglero, F. Sanchez, F. Lei, A. J. Bird, T. Carter, & A. J. Dean.* 92, 683, 41-A6 (1994)

Gamma-Ray Astronomy—A Status Report. *Stephen S. Holt.* 92, 693, 41-B5 (1994)

Evidence of Additional Production of High-Energy Neutrons during the Solar Flare on 1991 June 4. *A. Struminsky, M. Matsuoka, & K. Takahashi.* 429, 400, 149-A13 (1994)

Search for 10 TeV Gamma-Ray Emission from Active Galactic Nuclei with the Tibet Air Shower Array. *M. Amenomori, Z. Cao, B. Z. Dai, L. K. Ding, Y. X. Feng, Z. Y. Feng, K. Hibino, N. Hotta, Q. Huang, A. X. Huo, H. Y. Jia, G. Z. Jiang, S. Q. Jiao, F. Kajino, K. Kasahara, Labaciren, S. M. Liu, D. M. Mei, L. Meng, X. R. Meng, Mimaciren, K. Mizutani, J. Mu, H. Nanjo, M. Nishizawa, A. Oguro, M. Ohnishi, I. Ohta, T. Ouchi, J. R. Ren, To. Saito, M. Sakata, Z. Z. Shi, M. Shibata, T. Shirai, H. Sugimoto, X. X. Sun, K. Taira, Y. H. Tan, N. Tateyama, S. Torii, H. Wang, C. Z. Wen, Y. Yamamoto, G. C. Yu, P. Yuan, T. Yuda, C. S. Zhang, H. M. Zhang, L. Zhang, Zhasang, Zhaxiciren, & W. D. Zhou (The Tibet AS*γ* *Collaboration).* 429, 634, 153-E11 (1994)

Observation of 7 TeV Gamma Rays from the Crab Using the Large Zenith Angle Air Čerenkov Imaging Technique. *T. Tanimori, T. Tsukagoshi, T. Kifune, P. G. Edwards, M. Fujimoto, T. Hara, N. Hayashida, Y. Matsubara, Y. Mizumoto, Y. Muraki, S. Ogio, J. R. Patterson, M. D. Roberts, G. Rowell, T. Suda, T. Tamura, M. Teshima, G. J. Thornton, T. Watase, & T. Yoshikoshi.* 429, L61, 158-A5 (1994)

The Optical–Ultraviolet–Gamma-Ray Spectrum of 3C 279. *Hagai Netzer, D. Kazanas, Beverley J. Wills, D. Wills, Mingsheng Han, M. S. Brotherton, J. A. Baldwin, G. J. Ferland, & I. W. A. Browne.* 430, 191, 161-D10 (1994)

Detection of a Flaring Low-Energy Gamma-Ray Source. *Dipen Bhattacharya & Alan Owens.* 430, 371, 163-G2 (1994)

Hard X-Rays from SN 1993J. *M. D. Leising, J. D. Kurfess, D. D. Clayton, D. A. Grabelsky, J. E. Grove, W. N. Johnson, G. V. Jung, R. L. Kinzer, R. A. Kroeger, W. R. Purcell, M. S. Strickman, L.-S. The, & M. P. Ulmer.* 431, L95, 191-F1 (1994)

Radio and X-Ray Observations of the Gamma-Ray Bright Quasar PKS 0528+134. *Yun Fei Zhang, Alan P. Marscher, Hugh D. Aller, Margo F. Aller, Harri Teräsranta, & Esko Valtaoja.* 432, 91, 194-D1 (1994)

OSSE Observations of the Crab Pulsar. *M. P. Ulmer, S. Lomatch, S. M. Matz, D. A. Grabelsky, W. R. Purcell, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, R. A. Cameron, & G. V. Jung.* 432, 228, 196-A12 (1994)

SMM Observations of Gamma-Ray Transients. III. A Search for a Broadened, Redshifted Positron Annihilation Line from the Direction of the Galactic Center. *Michael J. Harris, Gerald H. Share, & Mark D. Leising.* 433, 87, 209-C13 (1994)

Gamma-Ray Observations in the Galactic Center Region with an Imaging Detector. *Jalal Samimi & Robert L. Kinzer.* 434, 136, 227-A8 (1994)

The Pulsed Hard X-Ray Spectrum of PSR B1509−58. *S. M. Matz, M. P. Ulmer, D. A. Grabelsky, W. R. Purcell, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, & G. V. Jung.* 434, 288, 229-D7 (1994)

Simultaneous Optical and TeV Gamma-Ray Observations of the Cataclysmic Variable AE Aquarii. *P. J. Meintjes, O. C. de Jager, B. C. Raubenheimer, H. I. Nel, A. R. North, D. A. H. Buckley, & C. Koen.* 434, 292, 229-E1 (1994)

The First Energetic Gamma-Ray Experiment Telescope (EGRET) Source Catalog. *C. E. Fichtel, D. L. Bertsch, J. Chiang, B. L. Dingus, J. A. Esposito, J. M. Fierro, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, P. W. Kwok, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, L. McDonald, P. F. Michelson, C. von Montigny, P. L. Nolan, K. Pinkau, H.-D. Radecke, H. Rothermel, P. Sreekumar, M. Sommer, E. J. Schneid, D. J. Thompson, & T. Willis.* 94, 551, 59-E1 (1994)

OSSE Observations of NGC 1275 in the 0.05–10.0 MeV Range. *C. Y. Osako, M. P. Ulmer, D. A. Grabelsky, W. R. Purcell, M. S. Strickman, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, & G. V. Jung.* 435, 181, 245-G1 (1994)

EGRET Upper Limits to the High-Energy Gamma-Ray Emission from the Millisecond Pulsars in Nearby Globular Clusters. *P. F. Michelson, D. L. Bertsch, K. Brazier, J. Chiang, B. L. Dingus, C. E. Fichtel, J. Fierro, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, C. von Montigny, P. L. Nolan, E. Schneid, P. Sreekumar, & D. J. Thompson.* 435, 218, 246-C12 (1994)

Search for Low-Energy Neutrinos from Galactic Gamma-Ray Sources. *Y. Fukuda, T. Hayakawa, K. Inoue, T. Ishida, T. Kajita, Y. Koshio, M. Nakahata, K. Nakamura, A. Sakai, M. Shiozawa, J. Suzuki, Y. Suzuki, Y. Totsuka, M. Mori, K. S. Hirata, K. Kihara, Y. Oyama, A. Suzuki, M. Yamada, M. Koshiba, K. Nishijima, T. Kajimura, T. Suda, A. T. Suzuki, H. Takei, M. Koga, K. Miyano, H. Miyata, T. Hara, N. Kishi, Y. Nagashima, M. Takita, A. Yoshimoto, K. Kaneyuki, Y. Takeuchi, T. Tanimori, S. Tasaka, K. Nishikawa, E. W. Beier, E. D. Frank, W. Frati, S. B. Kim, A. K. Mann, F. M. Newcomer, R. Van Berg, & W. Zhang.* 435, 225, 246-D9 (1994)

The Statistics of Gamma-Ray Burst Lensing. *Scott A. Grossman & Michael A. Nowak.* 435, 548, 253-F6 (1994)

The 1993 Multiwavelength Campaign on 3C 279: The Radio to Gamma-Ray Energy Distribution in Low State. *L. Maraschi, P. Grandi, C. M. Urry, A. E. Wehrle, G. M. Madejski, H. H. Fink, G. Ghisellini, R. C. Hartman, A. P. Koratkar, C. von Montigny, E. Pian, H. C. Thomas, A. Treves, M. F. Aller, H. D. Aller, C. D. Bailyn, T. J. Balonek, H. Bock, W. Collmar, I. S. Glass, S. J. Litchfield, I. M. McHardy, R. Méndez, J. Pesce, H. P. Reuter, E. I. Robson, H. Steppe, J. A. Stevens, H. Teräsranta, & S. J. Wagner.* 435, L91, 259-D8 (1994)

Gamma-Ray Observations of Ophiuchus with EGRET: The Diffuse Emission and Point Sources. *S. D. Hunter, S. W. Digel, E. J. de Geus, & G. Kanbach.* 436, 216, 264-B12 (1994)

EGRET High-Energy Gamma-Ray Pulsar Studies. I. Young Spin-powered Pulsars. *D. J. Thompson, Z. Arzoumanian, D. L. Bertsch, K. T. S. Brazier, J. Chiang, N. D'Amico, B. L. Dingus, J. A. Esposito, J. M. Fierro, C. E. Fichtel, R. C. Hartman, S. D. Hunter, S. Johnston, G. Kanbach, V. M. Kaspi, D. A. Kniffen, Y. C. Lin, A. G. Lyne, R. N. Manchester, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, H. I. Nel, D. J. Nice, P. L. Nolan, P. V. Ramanamurthy, S. L. Shemar, E. J. Schneid, P. Sreekumar, & J. H. Taylor.* 436, 229, 264-D1 (1994)

On the Determination of the Cosmic Infrared Background Radiation from the High-Energy Spectrum of Extragalactic Gamma-Ray Sources. *Eli Dwek & Jonathan Slavin.* 436, 696, 275-B1 (1994)

Models of Pair Annihilation in 1E 1740.7−2942 and the *HEAO 1* A-4 Annihilation Source. *Andrzej Maciołek-Niedźwiecki & Andrzej A. Zdziarski.* 436, 762, 276-A6 (1994)

Gamma-Ray Observations of NGC 253 and M82 with OSSE. *D. Bhattacharya, L.-S. The, J. D. Kurfess, D. D. Clayton, N. Gehrels, M. D. Leising, D. A. Grabelsky, W. N. Johnson, G. V. Jung, R. L. Kinzer, W. R. Purcell, M. S. Strickman, & M. P. Ulmer.* 437, 173, 285-E6 (1994)

The Soft Gamma-Ray Spectrum of A0535+26: Detection of an Absorption Feature at 110 keV by OSSE. *J. E. Grove, M. S. Strickman, W. N. Johnson, J. D. Kurfess, R. L. Kinzer, C. H. Starr, G. V. Jung, E. Kendziorra, P. Kretschmar, M. Maisack, & R. Staubert.* 438, L25, 10-A9 (1995)

EGRET Detection of the Blazar PKS 0420−014. *H.-D. Radecke, D. L. Bertsch, B. L. Dingus, C. E. Fichtel, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, E. Schneid, & D. J. Thompson.* 438, 659, 13-C2 (1995)

Joint *ROSAT*–*Compton GRO* Observations of the X-Ray–bright Seyfert Galaxy IC 4329A. *G. M. Madejski, A. A. Zdziarski, T. J. Turner, C. Done, R. F. Mushotzky, R. C. Hartman, N. Gehrels, A. Connors, A. C. Fabian, K. Nandra, A. Celotti, M. J. Rees, W. N. Johnson, J. E. Grove, & C. H. Starr.* 438, 672, 13-D7 (1995)

Outburst of TeV Photons from Markarian 421. *A. D. Kerrick, C. W. Akerlof, S. D. Biller, J. H. Buckley, M. F. Cawley, M. Chantell, V. Connaughton, D. J. Fegan, S. Fennell, J. A. Gaidos, A. M. Hillas, R. C. Lamb, D. A. Lewis, D. I. Meyer, J. McEnery, G. Mohanty, J. Quinn, A. C. Rovero, H. J. Rose, M. S. Schubnell, G. Sembroski, M. Urban, A. A. Watson, T. C. Weekes, M. West, C. Wilson, & J. Zweerink.* 438, L59, 19-C4 (1995)

The Average X-Ray/Gamma-Ray Spectra of Seyfert Galaxies from *Ginga* and OSSE and the Origin of the Cosmic X-Ray Background. *Andrzej A. Zdziarski, W. Neil Johnson, Chris Done, David Smith, & Kellie McNaron-Brown.* 438, L63, 19-C11 (1995)

Very High Energy Gamma Rays from PSR 1706−44. *T. Kifune, T. Tanimori, S. Ogio, T. Tamura, H. Fujii, M. Fujimoto, T. Hara, N. Hayashida, S. Kabe, F. Kakimoto, Y. Matsubara, Y. Mizumoto, Y. Muraki, T. Suda, M. Teshima, T. Tsukagoshi, Y. Watase, T. Yoshikoshi, P. G. Edwards, J. R. Patterson, M. D. Roberts, G. P. Rowell, & G. J. Thornton.* 438, L91, 20-A1 (1995)

Gamma-Ray Emission from Cataclysmic Variables. I. The *Compton* EGRET Survey. *Eric M. Schlegel, Paul E. Barrett, O. C. De Jager, G. Chanmugam, S. Hunter, & J. Mattox.* 439, 322, 25-E10 (1995)

Balloon-borne Measurements of the SN 1987A Hard X-Ray Continuum. *Geoffrey N. Pendleton, William S. Paciesas, Gerald J. Fishman, Charles A. Meegan, & Robert B. Wilson.* 439, 963, 37-G13 (1995)

High-Energy Gamma-Ray Emission from Active Galaxies: EGRET Observations and Their Implications. *C. von Montigny, D. L. Bertsch, J. Chiang, B. L. Dingus, J. A. Esposito, C. E. Fichtel, J. M. Fierro, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, P. L. Nolan, H. D. Radecke, E. Schneid, P. Sreekumar, D. J. Thompson, & T. Willis.* 440, 525, 50-E4 (1995)

EGRET Observations of Gamma-Ray Emission from the Interstellar Gas in Orion. *S. W. Digel, S. D. Hunter, & R. Mukherjee.* 441, 270, 63-A11 (1995)

OSSE Observations of GX 339−4. *D. A. Grabelsky, S. M. Matz, W. R. Purcell, M. P. Ulmer, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, & G. V. Jung.* 441, 800, 73-A6 (1995)

On the Nature of the Unidentified EGRET Sources: Are They Geminga-like Pulsars? *R. Mukherjee, D. L. Bertsch, B. L. Dingus, G. Kanbach, D. A. Kniffen, P. Sreekumar, & D. J. Thompson.* 441, L61, 75-F13 (1995)

EGRET Observations of the BL Lacertae Objects 0716+714 and 0521−365. *Y. C. Lin, D. L. Bertsch, B. L. Dingus, J. A. Esposito, C. E. Fichtel, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, R. Mukherjee, P. L. Nolan, E. Schneid, P. Sreekumar, & D. J. Thompson.* 442, 96, 78-E7 (1995)

Images of HCO^+ (1–0) Emission in a Molecular Cloud near 1E 1740.7−2942. *J. A. Phillips & T. Joseph W. Lazio.* 442, L37, 85-B7 (1995)

Search for Compton-backscattered Annihilation Radiation from the Galactic Center with the OSSE. *D. M. Smith, M. Leventhal, N. Gehrels, J. Tueller, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, D. A. Grabelsky, W. R. Purcell, M. P. Ulmer, & G. V. Jung.* 443, 117, 96-G1 (1995)

SIGMA Observations of the Galactic Center at 511 keV. *I. Malet, J. P. Roques, L. Bouchet, G. Vedrenne, J. Paul, B. Cordier, J. Ballet, F. Lebrun, R. Sunyaev, E. Churazov, M. Gilfanov, N. Khavenson, A. Dyachkov, N. Kuleshova, A. Sheikhet, & I. Tzerenin.* 444, 222, 116-D13 (1995)

CGRO/OSSE Observations of the Cassiopeia A Supernova Remnant. *L.-S. The, M. D. Leising, D. D. Clayton, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, G. V. Jung, D. A. Grabelsky, W. R. Purcell, & M. P. Ulmer.* 444, 244, 116-G4 (1995)

Search for TeV γ-Ray Emission from Binary Radio Pulsars. *B. C. Raubenheimer, C. Brink, O. C. De Jager, & H. I. Nel.* 444, 419, 119-C12 (1995)

Detection of Soft Gamma-Ray Emission from the Seyfert 2 Galaxy NGC 4507 by the OSSE Telescope. *L. Bassani, G. Malaguti, E. Jourdain, J. P. Roques, & W. N. Johnson.* 444, L73, 130-C8 (1995)

OSSE Observations of 3C 273. *W. N. Johnson, C. D. Dermer, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, K. McNaron-Brown, E. Jourdain, G. V. Jung, D. A. Grabelsky, W. R. Purcell, & M. P. Ulmer.* 445, 182, 135-A6 (1995)

EGRET Gamma-Ray Sources: GRO J0744+54 and GRO J0957+65 (= BL Lacertae Object 0954+658). *R. Mukherjee, H. D. Aller, M. F. Aller, D. L. Bertsch, W. Collmar, S. W. Digel, B. L. Dingus, J. A. Esposito, C. E. Fichtel, R. C. Hartman, S. D. Hunter, W. N. Johnson, G. Kanbach, D. A. Kniffen, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, P. V. Ramanamurthy, E. Schneid, P. Sreekumar, H. Teräsranta, D. J. Thompson, & S. J. Wagner.* 445, 189, 135-B3 (1995)

A Search for Fast Gamma-Ray Pulsars with OSSE. *P. Hertz, J. E. Grove, D. A. Grabelsky, & S. M. Matz.* 445, 351, 137-D1 (1995)

A Localized Excess of Diffuse Gamma Radiation. *A. Chen, J. Dwyer, & P. Kaaret.* 445, L109, 151-A9 (1995)

Two Classes of Gamma-Ray–emitting Active Galactic Nuclei. *Charles D. Dermer & Neil Gehrels.* 447, 103, 173-E7 (1995)

EGRET High-Energy γ-Ray Pulsar Studies. II. Individual Millisecond Pulsars. *J. M. Fierro, Z. Arzoumanian, M. Bailes, J. F. Bell, D. L. Bertsch, K. T. S. Brazier, J. Chiang, N. D'Amico, B. L. Dingus, J. A. Esposito, C. E. Fichtel, R. C. Hartman, S. D. Hunter, S. Johnston, G. Kanbach, V. M. Kaspi, D. A. Kniffen, Y. C. Lin, A. G. Lyne, R. N. Manchester, J. R Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, H. I. Nel, D. Nice, P. L. Nolan, E. J. Schneid, S. K. Shriver, P. Sreekumar, J. H. Taylor, D. J. Thompson, & T. D. Willis.* 447, 807, 187-B2 (1995)

EGRET Detection of Pulsed Gamma Radiation from PSR B1951+32. *P. V. Ramanamurthy, D. L. Bertsch, B. L. Dingus, J. A. Esposito, J. M. Fierro, C. E. Fichtel, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, A. G. Lyne, J. R. Mattox, H. A. Mayer-Hasselwander, M. Merck, P. F. Michelson, C. von Montigny, R. Mukherjee, P. L. Nolan, & D. J. Thompson.* 447, L109, 191-A8 (1995)

Evidence for Shock Acceleration in the Binary Pulsar System PSR B1259−63. *J. E. Grove, M. Tavani, W. R. Purcell, W. N. Johnson, J. D. Kurfess, M. S. Strickman, & J. Arons.* 447, L113, 191-B1 (1995)

Limits on Galactic Gamma-Ray Lines at 4.44 MeV and 6.13 MeV from Nuclear De-Excitation. *Michael J. Harris, Gerald H. Share, & Daniel C. Messina.* 448, 157, 194-C8 (1995)

Compton Gamma-Ray Observatory Observations of the Crab Pulsar. *M. P. Ulmer, S. M. Matz, D. A. Grabelsky, J. E. Grove, M. S. Strickman, R. Much, M. C. Busetta, A. Strong, L. Kuiper, D. J. Thompson, D. Bertsch, J. M. Fierro, & P. L. Nolan.* 448, 356, 197-B1 (1995)

A Search for Ultra–High-Energy Gamma-Ray Emission from Five Supernova Remnants. *G. E. Allen, D. Berley, S. Biller, R. L. Burman, M. Cavalli-Sforza, C. Y. Chang, M. L. Chen, P. Chumney, D. Coyne, C. L. Dion, D. Dorfan, R. W. Ellsworth, J. A. Goodman, T. J. Haines, C. M. Hoffman, L. Kelley, S. Klein, D. M. Schmidt, R. Schnee, A. Shoup, C. Sinnis, M. J. Stark, D. A. Williams, J.-P. Wu, T. Yang, & G. B. Yodh.* 448, L25, 199-E10 (1995)

OSSE Observations of Gamma-Ray Emission from Centaurus A. *R. L. Kinzer, W. N. Johnson, C. D. Dermer, J. D. Kurfess, M. S. Strickman, J. E. Grove, R. A. Kroeger, D. A. Grabelsky, W. R. Purcell, M. P. Ulmer, G. V. Jung, & K. McNaron-Brown.* 449, 105, 211-F1 (1995)

High-Energy Gamma Rays from Polars. *P. Barrett, E. Schlegel, O. C. de Jager, & G. Chanmugam.* 450, 334, 232-E6 (1995)

OSSE Upper Limits to Pulsar Gamma-Ray Emission. *P. C. Schroeder, M. P. Ulmer, S. M. Matz, D. A. Grabelsky, W. R. Purcell, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, & G. V. Jung.* 450, 784, 241-E1 (1995)

A Long-Term Study of High-Energy Gamma-Ray Emission from the Vela, Geminga, and Crab Pulsars. *P. V. Ramanamurthy, D. L. Bertsch, C. E. Fichtel, G. Kanbach, D. A. Kniffen, H. A. Mayer-Hasselwander, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 450, 791, 241-E11 (1995)

Compton Gamma Ray Observatory OSSE Observations of SN 1991T. *M. D. Leising, W. N. Johnson, J. D. Kurfess, D. D. Clayton, D. A. Grabelsky, G. V. Jung, R. L. Kinzer, W. R. Purcell, M. S. Strickman, L.-S. The, & M. P. Ulmer.* 450, 805, 241-G1 (1995)

OSSE Observations of Blazars. *K. McNaron-Brown, W. N. Johnson, G. V. Jung, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, C. D. Dermer, D. A. Grabelsky, W. R. Purcell, M. P. Ulmer, M. Kafatos, P. A. Becker, R. Staubert, & M. Maisack.* 451, 575, 255-B11 (1995)

Hot-Plasma Ejections Associated with Compact-Loop Solar Flares. *K. Shibata, S. Masuda, M. Shimojo, H. Hara, T. Yokoyama, S. Tsuneta, T. Kosugi, & Y. Ogawara.* 451, L83, 261-B2 (1995)

The Evolution of Gamma-Ray–loud Active Galactic Nuclei. *J. Chiang, C. E. Fichtel, C. von Montigny, P. L. Nolan, & V. Petrosian.* 452, 156, 264-B12 (1995)

Upper Limits on TeV Gamma-Ray Emission from Active Galactic Nuclei. *A. D. Kerrick, C. W. Akerlof, S. Biller, J. Buckley, D. A. Carter-Lewis, M. F. Cawley, M. Chantell, V. Connaughton, D. J. Fegan, S. Fennell, J. Gaidos, A. M. Hillas, P. W. Kwok, R. C. Lamb, T. Lappin, R. Lessard, J. McEnery, D. I. Meyer, G. Mohanty, J. Quinn, H. J. Rose, A. C. Rovero, G. Sembroski, M. S. Schubnell, M. Punch, T. C. Weekes, M. West, C. Wilson, & J. Zweerink.* 452, 588, 272-F10 (1995)

A Millisecond Pulsar in a 6 Hour Orbit: PSR J0751+1807. *S. C. Lundgren, A. F. Zepka, & J. M. Cordes.* 453, 419, 286-G10 (1995)

Giant Pulses from the Crab Pulsar: A Joint Radio and Gamma-Ray Study. *S. C. Lundgren, J. M. Cordes, M. Ulmer, S. M. Matz, S. Lomatch, R. S. Foster, & T. Hankins.* 453, 433, 287-A13 (1995)

Determination of the Galactic ^{26}Al Source Distribution with a Novel Imaging Telescope. *E. Aprile, E. L. Chupp, A. Bolotnikov, & P. P. Dunphy.* 453, 685, 293-C5 (1995)

ASCA and *GRO* Observations of GX 301−2. *Steven H. Pravdo, Charles S. R. Day, Lorella Angelini, B. Alan Harmon, A. Yoshida, & P. Saraswat.* 454, 872, 313-G6 (1995)

High-Energy Gamma Rays from the BL Lacertae Object PKS 2155−304. *W. Thomas Vestrand, J. Gregory Stacy, & P. Sreekumar.* 454, L93, 315-E11 (1995)

High-Energy Gamma Rays from PKS 1406−076 and the Observation of Correlated Gamma-Ray and Optical Emission. *Stefan J. Wagner, John R. Mattox, Ulrich Hopp, H. Bock, J. Heidt, D. L. Bertsch, B. L. Dingus, C. E. Fichtel, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 454, L97, 315-F4 (1995)

The Second EGRET Catalog of High-Energy Gamma-Ray Sources. *D. J. Thompson, D. L. Bertsch, B. L. Dingus, J. A. Esposito, A. Etienne, C. E. Fichtel, D. P. Friedlander, R. C. Hartman, S. D. Hunter, D. J. Kendig, J. R. Mattox, L. M. McDonald, C. von Montigny, R. Mukherjee, P. V. Ramanamurthy, P. Sreekumar, J. M. Fierro, Y. C. Lin, P. F. Michelson, P. L. Nolan, S. K. Shriver, T. D. Willis, G. Kanbach, H. A. Mayer-Hasselwander, M. Merck, H.-D. Radecke, D. A. Kniffen, & E. J. Schneid.* 101, 259, 57-B11 (1995)

GAMMA RAYS: THEORY

The Fate of Accreted CNO Elements in Neutron Star Atmospheres: X-Ray Bursts and Gamma-Ray Lines. *Lars Bildsten, Edwin E. Salpeter, & Ira Wasserman.* 384, 143, 2-G1 (1992)

π^0-Decay Gamma-Ray Emission from Winds of Massive Stars. *Richard L. White & Wan Chen.* 387, L81, 48-D6 (1992)

Proton Acceleration in Neutron Star Magnetospheres. *I. A. Smith, J. I. Katz, & P. H. Diamond.* 388, 148, 50-G7 (1992)

On the 440 keV Line in the Crab Nebula Pulsar. *W. Bednarek, O. Cremonesi, & A. Treves.* 390, 489, 81-D5 (1992)

Gamma-Ray Deposition and Nonthermal Excitation in Supernovae. *Cecilia Kozma & Claes Fransson.* 390, 602, 82-G1 (1992)

TeV Gamma Rays from 3C 279: A Possible Probe of Origin and Intergalactic Infrared Radiation Fields. *F. W. Stecker, O. C. De Jager, & M. H. Salamon.* 390, L49, 84-D7 (1992)

The Collapse of White Dwarfs to Neutron Stars. *S. E. Woosley & E. Baron.* 391, 228, 88-G1 (1992)

On the Origin of Variable 511 keV Line Emission from the Galactic Center Region. *R. Ramaty, M. Leventhal, K. W. Chan, & R. E. Lingenfelter.* 392, L63, 113-C5 (1992)

The Diffuse Gamma-Ray Background, Light Element Abundances, and Signatures of Early Massive Star Formation. *Joseph Silk & David N. Schramm.* 393, L9, 120-B7 (1992)

The Expected High-Energy to Ultra–High-Energy Gamma-Ray Spectrum of the Crab Nebula. *O. C. de Jager & A. K. Harding.* 396, 161, 157-B6 (1992)

Diffuse 0.511 MeV Line Emission and the Distribution of Positron Annihilation in the Galaxy. *J. G. Skibo, R. Ramaty, & M. Leventhal.* 397, 135, 169-F3 (1992)

A Jet Model for the Gamma-Ray–emitting Blazar 3C 279. *L. Maraschi, G. Ghisellini, & A. Celotti.* 397, L5, 173-B4 (1992)

Light Element Nucleosynthesis: A False Clue? *N. Yu. Gnedin & J. P. Ostriker.* 400, 1, 209-A13 (1992)

Gamma Radiation from Pulsar Magnetospheric Gaps. *James Chiang & Roger W. Romani.* 400, 629, 218-C1 (1992)

Gravitational Microlensing of Gamma-Ray Bursts. *Shude Mao.* 402, 382, 7-D1 (1993)

On the Gamma-Ray Emission from 3C 279. *W. Bednarek.* 402, L29, 12-C1 (1993)

The Cosmic Gamma-Ray Background from Type Ia Supernovae. *Lih-Sin The, Mark D. Leising, & Donald D. Clayton.* 403, 32, 14-D12 (1993)

High-Energy Emission from the Eclipsing Millisecond Pulsar PSR 1957+20. *Jonathan Arons & Marco Tavani.* 403, 249, 17-A8 (1993)

An Interpretation of the Narrow Positron Annihilation Feature from X-Ray Nova Muscae 1991. *Wan Chen, Neil Gehrels, & F. H. Cheng.* 403, L71, 27-D7 (1993)

Positron Annihilation Radiation from X-Ray Binary Systems. *Mei Wu, Chun-sheng Zhang, & Ti-pei Li.* 404, 276, 31-C11 (1993)

Microsecond Flares in Gamma-Ray Bursts. *Bradley E. Schaefer, Justin Cohen, Bonnard J. Teegarden, Thomas L. Cline, Gerald J. Fishman, Charles A. Meegan, Robert B. Wilson, William S. Paciesas, Geoffrey N. Pendleton, James L. Matteson, David L. Band, & John P. Lestrade.* 404, 673, 37-C11 (1993)

Gamma-Ray Emission of Active Galactic Nuclei as a Signature of Relativistic Electron-Positron Beams. *G. Henri, G. Pelletier, & J. Roland.* 404, L41, 40-B10 (1993)

Positrons from Supernovae. *Kai-wing Chan & Richard E. Lingenfelter.* 405, 614, 50-G1 (1993)

Radioactive ^{26}Al from Massive Stars: Production and Distribution in the Galaxy. *N. Prantzos.* 405, L55, 54-C1 (1993)

Gamma Rays from Globular Clusters. *Marco Tavani.* 407, 135, 70-F11 (1993)

η Carinae: A New Model. *J. M. Borgwald & M. W. Friedlander.* 408, 230, 86-A3 (1993)

Diffuse Gamma-Ray Emission from Pulsars in the Large Magellanic Cloud. *Dieter H. Hartmann, Lawrence E. Brown, & Neil Schnepf.* 408, L13, 88-F8 (1993)

TeV Gamma Rays from Millisecond Pulsars and the Detectability of Globular Clusters. *I. A. Smith.* 408, 468, 91-A7 (1993)

Helium Destruction and Gamma-Ray Line Emission in Accreting Neutron Stars. *Lars Bildsten, Edwin E. Salpeter, & Ira Wasserman.* 408, 615, 92-G9 (1993)

Compton Scattering and the Gamma-Ray Power-Law Spectrum in Markarian 421. *Andrzej A. Zdziarski & Julian H. Krolik.* 409, L33, 111-B1 (1993)

High-Frequency Emission of X-Ray Pulsar 1E 2259+586. *V. V. Usov.* 410, 761, 123-C1 (1993)

The High-Energy Diffuse Cosmic Gamma-Ray Background Radiation from Blazars. *F. W. Stecker, M. H. Salamon, & M. A. Malkan.* 410, L71, 125-F5 (1993)

High-Energy Spectrum of Cygnus X-1 Revisited. *F. Haardt, C. Done, G. Matt, & A. C. Fabian.* 411, L95, 142-F5 (1993)

A Model of Unpulsed Gamma Rays from the Crab Pulsar. *W. M. Cheung & K. S. Cheng.* 413, 694, 165-B1 (1993)

On ^{26}Al and Other Short-lived Interstellar Radioactivity. *Donald D. Clayton, Dieter H. Hartmann, & Mark D. Leising.* 415, L25, 192-A1 (1993)

New Upper Limits on Intergalactic Infrared Radiation from High-Energy Astrophysics. *F. W. Stecker & O. C. De Jager.* 415, L71, 199-E1 (1993)

Compton Backscattered Annihilation Radiation and the Mass of Nova Muscae. *Xin-Min Hua & Richard E. Lingenfelter.* 416, L17, 207-C11 (1993)

Model for the High-Energy Emission from Blazars. *Charles D. Dermer & Reinhard Schlickeiser.* 416, 458, 209-A11 (1993)

OSSE Observations of the Bright Seyfert 1 Galaxy IC 4329A. *A. C. Fabian, K. Nandra, A. Celotti, M. J. Rees, J. E. Grove, & W. N. Johnson.* 416, L57, 216-C1 (1993)

Gamma-Ray Escape in Type Ia Supernovae: The 847 keV–m_B Diagram. *P. Ruiz-Lapuente, G. G. Lichti, R. Lehoucq, R. Canal, & M. Cassé.* 417, 547, 226-B5 (1993)

Gamma-Ray Bursts: Multiwaveband Spectral Predictions for Blast Wave Models. *P. Mészáros & M. J. Rees.* 418, L59, 245-B7 (1993)

On the Energetics and Number of Gamma-Ray Pulsars. *Charles D. Dermer & Steven J. Sturner.* 420, L75, 15-D11 (1994)

On the Spectra and Pulse Profiles of Gamma-Ray Pulsars. *Steven J. Sturner & Charles D. Dermer.* 420, L79, 15-E3 (1994)

Comptonization of Diffuse Ambient Radiation by a Relativistic Jet: The Source of Gamma Rays from Blazars? *Marek Sikora, Mitchell C. Begelman, & Martin J. Rees.* 421, 153, 18-A1 (1994)

Unpulsed High-Energy Radiation from the Crab Pulsar and Nebula. *W. M. Cheung & K. S. Cheng.* 90, 827, 14-A11 (1994)

Disk-Accreting Magnetic Neutron Stars as High-Energy Particle Accelerators. *Russell J. Hamilton, Frederick K. Lamb, & M. Coleman Miller.* 90, 837, 14-B9 (1994)

Evolution of Supernova Remnants with Cosmic Rays and Radiative Cooling. *E. A. Dorfi.* 90, 841, 14-B14 (1994)

Polarized One-Quantum Annihilation in Strong Magnetic Fields as a Process for Particle Deceleration in Neutron Star Atmospheres. *D. Berg, M. Mentzel, & G. Wunner.* 90, 905, 15-A10 (1994)

On the Location of the Acceleration and Emission Sites in Gamma-Ray Blazars. *Charles D. Dermer & Reinhard Schlickeiser.* 90, 945, 15-E7 (1994)

Particle Acceleration and Nonthermal Energy Release as an Effect of Magnetoactive Disk Accretion onto Gravitating Center. *N. R. Ikhsanov & L. A. Pustil'nik.* 90, 959, 15-F12 (1994)

A New Method for Determining the Hubble Constant from Sub-TeV Gamma-Ray Observations. *M. H. Salamon, F. W. Stecker, & O. C. de Jager.* 423, L1, 53-B1 (1994)

General Relativistic Corrections in the Gamma-Ray Emission from Pulsars. *P. L. Gonthier & A. K. Harding.* 425, 767, 91-C10 (1994)

On the New Theory of Ultra–High-Energy Gamma-Ray Production in Cygnus X-3. *Abhas Mitra.* 425, 782, 91-E1 (1994)

π^0 Decay around Black Hole Candidates: A Spectral Component above 200 keV. *E. Jourdain & J. P. Roques.* 426, L11, 103-B6 (1994)

Is the High-Energy Emission from Centaurus A Compton-scattered Jet Radiation? *J. G. Skibo, C. D. Dermer, & R. L. Kinzer.* 426, L23, 103-C11 (1994)

X-Ray and Gamma-Ray Emission of Sagittarius A* as a Wind-accreting Black Hole. *A. Mastichiadis & L. M. Ozernoy.* 426, 599, 105-G7 (1994)

Foreword. *Th. Courvoisier & Ph. Durouchoux.* 92, 325, 36-B6 (1994)

Observation of the 1.8 MeV Emission Line from ^{26}Al and the Chemical Evolution of the Galaxy. *Georges Meynet.* 92, 441, 37-F2 (1994)

Gamma Rays from Point Galactic Sources. *S. Karakula, G. Kociolek, I. V. Moskalenko, & W. Tkaczyk.* 92, 481, 38-C5 (1994)

Gamma-Ray Light Curves and Spectra of Models for Type Ia Supernovae. *P. Höflich, A. Khokhlov, & E. Müller.* 92, 501, 38-E1 (1994)

Multifrequency Emission from Hot Ion Disks. *Michael Maisack, Peter A. Becker, & Menas Kafatos.* 92, 533, 38-G13 (1994)

INTEGRAL, SNOBs, and Baryonic Dark Matter. *Gerard Gilmore.* 92, 539, 39-A8 (1994)

Hot Plasmas and the Generation of Gamma Rays. *A. C. Fabian.* 92, 555, 39-C1 (1994)

Light Curves of Close Binaries in TeV Energy Region. *I. V. Moskalenko & S. Karakula.* 92, 567, 39-D3 (1994)

Cosmic Rays and Gamma Rays in Early Galaxian Phases and the Cosmic Gamma-Ray Background. *N. Prantzos & M. Casse.* 92, 575, 39-D12 (1994)

Interaction of Ultraviolet and X-Ray Radiation with Gamma Rays Produced by a Jet in Active Galactic Nuclei. *Magda Zbyszewska.* 92, 615, 40-A12 (1994)

The Gamma-Ray Signature of the Disruption of a Neutron Star by a Black Hole. *M. Hernanz, J. Isern, X. Martin, & R. Mochkovitch.* 92, 627, 40-C1 (1994)

The Polarization Sensitivity of the Liquid Xenon Imaging Telescope. *E. Aprile, A. Bolotnikov, D. Chen, R. Mukherjee, & F. Xu.* 92, 689, 41-A13 (1994)

Gamma-Ray Astronomy—A Status Report. *Stephen S. Holt.* 92, 693, 41-B5 (1994)

Polar Cap Models of Gamma-Ray Pulsars: Emission from Single Poles of Nearly Aligned Rotators. *Joseph K. Daugherty & Alice K. Harding.* 429, 325, 148-B1 (1994)

On Thermal Comptonization in $e^{\pm}$ Pair Plasmas. *Gabriele Ghisellini & Francesco Haardt.* 429, L53, 157-G7 (1994)

Energetic and Radiative Constraints on Highly Relativistic Jets. *Mitchell C. Begelman, Martin J. Rees, & Marek Sikora.* 429, L57, 157-G13 (1994)

Theoretical Light Curve of a Type IIp Supernova. *Ronald G. Eastman, S. E. Woosley, Thomas A. Weaver, & Philip A. Pinto.* 430, 300, 162-G8 (1994)

The Blazar Gamma-Ray Luminosity Function and the Diffuse Extragalactic Gamma-Ray Background. *M. H. Salamon & F. W. Stecker.* 430, L21, 165-D1 (1994)

Unsteady Outflow Models for Cosmological Gamma-Ray Bursts. *M. J. Rees & P. Mészáros.* 430, L93, 174-D13 (1994)

Compton Scattering in Jets: A Mechanism for ~0.4 and $\leq$ 0.2 MeV Line Production. *J. G. Skibo, C. D. Dermer, & R. Ramaty.* 431, L39, 182-G5 (1994)

Pulsed Gamma-Ray Emission from Short-Period Pulsars. *K. S. Cheng & Winnis K. Y. Ding.* 431, 724, 187-E7 (1994)

Postburst Nebular Emission of Soft Gamma-Ray Repeaters. *Marco Tavani.* 431, L83, 191-D10 (1994)

Energy Deposition and K-Shell Ionization of Supernovae. *Lih-Sin The, William T. Bridgman, & Donald D. Clayton.* 93, 531, 50-C3 (1994)

An Iron Absorption Model of Gamma-Ray Burst Spectra. *Edison P. Liang & Vincent E. Kargatis.* 432, L111, 207-A3 (1994)

Regimes of High-Energy Shock Emission from the Be Star/Pulsar System PSR 1259−63. *Marco Tavani, Jonathan Arons, & Victoria M. Kaspi.* 433, L37, 215-B1 (1994)

Generalized Comptonization Models and Application to the Recent High-Energy Observations. *Lev Titarchuk.* 434, 570, 235-F7 (1994)

On Periodicity Tests and Flux Limit Calculations for Gamma-Ray Pulsars. *O. C. de Jager.* 436, 239, 264-E1 (1994)

An Outer Gap Model of High-Energy Emission from Rotation-powered Pulsars. *James Chiang & Roger W. Romani.* 436, 754, 275-G9 (1994)

Models of Pair Annihilation in 1E 1740.7−2942 and the *HEAO 1* A-4 Annihilation Source. *Andrzej Maciołek-Niedźwiecki & Andrzej A. Zdziarski.* 436, 762, 276-A6 (1994)

Gamma-Ray Pulsars: Emission Zones and Viewing Geometries. *Roger W. Romani & I.-A. Yadigaroglu.* 438, 314, 5-G3 (1995)

Gamma-Ray Lines from the Orion Complex. *Reuven Ramaty, Benzion Kozlovsky, & Richard E. Lingenfelter.* 438, L21, 10-A1 (1995)

A Helical Jet in the Orthogonally Misaligned BL Lacertae Object Markarian 501 (B1652+398). *J. E. Conway & J. M. Wrobel.* 439, 98, 22-E3 (1995)

Pure Scattered Emission as an Explanation for the Hard X-Ray Spectra of Active Galactic Nuclei. *E. Jourdain & J. P. Roques.* 440, 128, 43-A2 (1995)

Understanding COMPTEL ^{26}Al 1.8 MeV Map Features. *Wan Chen, Neil Gehrels, & Roland Diehl.* 440, L57, 57-E4 (1995)

Photon-Splitting Limits to the Hardness of Emission in Strongly Magnetized Soft Gamma Repeaters. *Matthew G. Baring.* 440, L69, 57-G1 (1995)

A Unified Picture for High-Energy Emission in Spin-powered Pulsars. *T. Kamae & Y. Sekimoto.* 443, 780, 108-E7 (1995)

Compton X-Ray Emission from NGC 253. *Oleg Goldshmidt & Yoel Rephaeli.* 444, 113, 114-G8 (1995)

New Superluminal Quasar 1633+382 and the Blazar–Gamma-Ray Connection. *P. D. Barthel, J. E. Conway, S. T. Myers, T. J. Pearson, & A. C. S. Readhead.* 444, L21, 121-D8 (1995)

The Implications of Gamma-Ray Lines Observed from the Orion Complex. *Ramanath Cowsik & Michael W. Friedlander.* 444, L29, 121-E8 (1995)

Magnetic Compton-induced Pair Cascade Model for Gamma-Ray Pulsars. *Steven J. Sturner, Charles D. Dermer, & F. Curtis Michel.* 445, 736, 145-D1 (1995)

Gamma-Ray Transfer and Energy Deposition in Supernovae. *Douglas A. Swartz, Peter G. Sutherland, & Robert P. Harkness.* 446, 766, 166-F1 (1995)

On the Beaming Statistics of Gamma-Ray Sources. *Charles D. Dermer.* 446, L63, 170-E8 (1995)

Massive Supernovae, Orion Gamma Rays, and the Formation of the Solar System. *A. G. W. Cameron, P. Höflich, P. C. Myers, & D. D. Clayton.* 447, L53, 181-D7 (1995)

Were There Significant Starburst Episodes near the Galactic Center? *Dieter H. Hartmann.* 447, 646, 185-A11 (1995)

The Synchrotron Self-Compton Model for X-Ray and γ-Ray Emission from Pulsars. *K. S. Cheng & D. M. Wei.* 448, 281, 196-B1 (1995)

Pair Cascades in Extragalactic Jets. II. The Beamed X-Ray Spectrum. *Amir Levinson & Roger Blandford.* 449, 86, 211-D2 (1995)

Comptonization Models and Spectroscopy of X-Ray and Gamma-Ray Sources: A Combined Study by Monte Carlo and Analytical Methods. *Xin-Min Hua & Lev Titarchuk.* 449, 188, 212-F13 (1995)

^{26}Al and ^{60}Fe from Supernova Explosions. *F. X. Timmes, S. E. Woosley, D. H. Hartmann, R. D. Hoffman, T. A. Weaver, & F. Matteucci.* 449, 204, 213-A4 (1995)

Gamma-Ray Pulsars: Beaming Evolution, Statistics, and Unidentified EGRET Sources. *I.-A. Yadigaroglu & Roger W. Romani.* 449, 211, 213-B1 (1995)

On the Geometry of the X-Ray–Emitting Region in Seyfert Galaxies. *Boris E. Stern, Juri Poutanen, Roland Svensson, Marek Sikora, & Mitchell C. Begelman.* 449, L13, 216-B9 (1995)

Spectral Variability of the X-Ray–bright BL Lacertae Object PKS 2005−489. *Rita M. Sambruna, C. Megan Urry, Gabriele Ghisellini, & Laura Maraschi.* 449, 567, 220-E12 (1995)

Compton Heating and Superthermal Electrons in Gamma-loud Active Galactic Nuclei. *Andrei M. Beloborodov & Andrei F. Illarionov.* 450, 64, 229-A3 (1995)

Gamma Rays, Cosmic Rays, and Extinct Radioactivity in Molecular Clouds. *Donald D. Clayton & Liping Jin.* 451, 681, 256-E10 (1995)

Electromagnetic Cascade in the Early Universe and Its Application to the Big Bang Nucleosynthesis. *M. Kawasaki & T. Moroi.* 452, 506, 271-F3 (1995)

Implications of Gamma-Ray Transparency Constraints in Blazars: Minimum Distances and Gamma-Ray Collimation. *Peter A. Becker & Menas Kafatos.* 453, 83, 282-C12 (1995)

Disk-Corona Model of Active Galactic Nuclei with Nonthermal Pairs. *Sachiko Tsuruta & Michael Kellen.* 453, L9, 289-C7 (1995)

The Nonthermal Radio, X-Ray, and TeV Gamma-Ray Spectra of MSH 15−52. *I. du Plessis, O. C. de Jager, S. Buchner, H. I. Nel, A. R. North, B. C. Raubenheimer, & D. J. van der Walt.* 453, 746, 294-B6 (1995)

The Gamma-Ray Galactic Diffuse Radiation and Cerenkov Telescopes. *P. Chardonnet, P. Salati, J. Silk, I. Grenier, & G. Smoot.* 454, 774, 312-D5 (1995)

High-Energy Gamma Rays from PKS 1406−076 and the Observation of Correlated Gamma-Ray and Optical Emission. *Stefan J. Wagner, John R. Mattox, Ulrich Hopp, H. Bock, J. Heidt, D. L. Bertsch, B. L. Dingus, C. E. Fichtel, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 454, L97, 315-F4 (1995)

A Gamma-Ray Monte Carlo Study of the Clumpy Debris of SN 1987A. *Adam Burrows & Kenneth A. Van Riper.* 455, 215, 321-B3 (1995)

Extragalactic Magnetic Field and the Highest Energy Cosmic Rays. *Sangjin Lee, Angela V. Olinto, & Günter Sigl.* 455, L21, 324-E8 (1995)

Photon Splitting in Strongly Magnetized Cosmic Objects—Revisited. *Günter Wunner, Robert Sang, & Dagmar Berg.* 455, L51, 325-B8 (1995)

GRAVITATION

On the [O/Fe] versus [Fe/H] Relationship and the Progenitors of Type I Supernovae. *C. Abia, R. Canal, & J. Isern.* 366, 198, 3-E1 (1991)

On the Orbital Period Change of the Binary Pulsar PSR 1913+16. *Thibault Damour & J. H. Taylor.* 366, 501, 9-C1 (1991)

Criticism of Lake's Analysis of the Rotation Curves of Dwarf Spirals. *Mordehai Milgrom.* 367, 490, 19-D11 (1991)

Constraints on Weyl Gravity on Subgalactic Distance Scales. *Kent S. Wood & Robert J. Nemiroff.* 369, 54, 36-F3 (1991)

Gravity in One Dimension: A Correction for Ensemble Averaging. *Charles J. Reidl, Jr., & Bruce N. Miller.* 371, 260, 63-D1 (1991)

White Dwarf and Neutron Star Interior Solutions in the Nonsymmetric Gravitational Theory. *L. M. Campbell, J. W. Moffat, & P. Savaria.* 372, 241, 77-A1 (1991)

Gravitational Clustering in the Expanding Universe: Controlled High-Resolution Studies in Two Dimensions. *John Francis Beacom, Kurt G. Dominik, Adrian L. Melott, Sam P. Perkins, & Sergei F. Shandarin.* 372, 351, 80-B7 (1991)

Coincidence Probabilities for Spacecraft Gravitational Wave Experiments: Massive Coalescing Binaries. *Massimo Tinto & J. W. Armstrong.* 372, 545, 82-E1 (1991)

Voyager 2 Test of the Radar Time-Delay Effect. *Timothy P. Krisher, John D. Anderson, & Anthony H. Taylor.* 373, 665, 96-C1 (1991)

General Structure of the Gravitational Equations of Motion in Conformal Weyl Gravity. *Demosthenes Kazanas & Philip D. Mannheim.* 76, 431, 31-B1 (1991)

Perturbations of the Robertson-Walker Space: Multicomponent Sources and Generalized Gravity. *Jai-chan Hwang.* 375, 443, 118-C7 (1991)

Gravitational Redshift Determinations for White Dwarfs in Common Proper-Motion Binaries. *Gary Wegner & I. Neill Reid.* 375, 674, 121-B1 (1991)
Gravitational Redshift for the Pleiad White Dwarf LB 1497. *Gary Wegner, I. Neill Reid, & Robert K. McMahan, Jr.* 376, 186, 127-C6 (1991)
Solar Gravitational Redshift from the Infrared Oxygen Triplet. *James C. LoPresto, Charles Schrader, & A. Keith Pierce.* 376, 757, 135-F11 (1991)
A New Gravitational Interaction of Cosmological Importance. *David F. Crawford.* 377, 1, 138-B1 (1991)
Li Depletion in F Stars by Internal Gravity Waves. *Ramón J. García López & Hendrik C. Spruit.* 377, 268, 141-C7 (1991)
Fluctuations of the Microwave Background Radiation on Large and Intermediate Angular Scales. *F. Atrio-Barandela, A. G. Doroshkevich, & A. A. Klypin.* 378, 1, 151-A11 (1991)
Neutron Star and Black Hole Binaries in the Galaxy. *Ramesh Narayan, Tsvi Piran, & Amotz Shemi.* 379, L17, 169-B11 (1991)
The Rate of Neutron Star Binary Mergers in the Universe: Minimal Predictions for Gravity Wave Detectors. *E. S. Phinney.* 380, L17, 181-C6 (1991)
The Scale Dependence of Galaxy Distribution Functions. *William C. Saslaw & Philippe Crane.* 380, 315, 182-C1 (1991)
The Secular Instability of Axisymmetric Collisionless Star Clusters. *Henry E. Kandrup.* 380, 511, 184-E9 (1991)
Gravitational Radiation from Dual Neutron Star Elliptical Binaries. *Dieter Hils.* 381, 484, 196-F5 (1991)
Gravitational Effects of Light Scalar Particles. *Thomas Helbig.* 382, 223, 203-A7 (1991)
Precollapse Scale Invariance in Gravitational Instability. *F. Moutarde, J.-M. Alimi, F. R. Bouchet, R. Pellat, & A. Ramani.* 382, 377, 206-C5 (1991)
Microwave Background Anisotropies Implied by Large-Scale Galaxy Correlations: The Minimum of $C(0)$ and Cosmological Parameters. *A. Kashlinsky.* 383, L1, 219-A7 (1991)
Gravitational Clustering of Galaxies: Comparison between Thermodynamic Theory and N-Body Simulations. III. Velocity Distributions for Different Mass Components. *Shogo Inagaki, Makoto Itoh, & William C. Saslaw.* 386, 9, 24-B10 (1992)
The Coherence Length of the Peculiar Velocity Field in the Universe and the Large-Scale Galaxy Correlation Data. *A. Kashlinsky.* 386, L37, 36-B6 (1992)
Constraints on the Power Spectrum of the Primordial Density Field from Large-Scale Data: Microwave Background and Predictions of Inflation. *A. Kashlinsky.* 387, L1, 43-A8 (1992)
Astrophysical Jets and Theories of Gravitation. *Mario Livio & Nathan Rosen.* 387, 458, 44-D5 (1992)
The Great Wall in the CfA Survey: Its Origin and Imprint on the Microwave Background Radiation. *F. Atrio-Barandela & A. Kashlinsky.* 390, 322, 79-C1 (1992)
PSR 0655+64: An Astrophysical Laboratory for Testing Relativistic Gravity Theories. *Itzhak Goldman.* 390, 494, 81-D11 (1992)
The Rate of Gravitational Galaxy Clustering. *William C. Saslaw.* 391, 423, 93-B4 (1992)
Tracing Large-Scale Fluctuations Back in Time. *Adi Nusser & Avishai Dekel.* 391, 443, 93-D4 (1992)
Neutron Stars and Gravitational Scalars. *Helmut W. Zaglauer.* 393, 685, 124-D1 (1992)
Does Faint Galaxy Clustering Contradict Gravitational Instability? *Adrian L. Melott.* 393, L45, 127-B1 (1992)
Is Momentum Conserved? A Test in the Binary System PSR 1913+16. *Clifford M. Will.* 393, L59, 127-C7 (1992)
Weakly Nonlinear Gravitational Instability for Arbitrary Ω. *F. R. Bouchet, R. Juszkiewicz, S. Colombi, & R. Pellat.* 394, L5, 133-B1 (1992)
Cosmological Density Perturbations with Modified Gravity. *Redouane Fakir, Salman Habib, & William Unruh.* 394, 396, 134-C1 (1992)
Gamma-Ray Bursts as the Death Throes of Massive Binary Stars. *Ramesh Narayan, Bohdan Paczyński, & Tsvi Piran.* 395, L83, 153-G10 (1992)
Dwarf Spheroidal Galaxies and Non-Newtonian Gravity. *Ortwin E. Gerhard & David N. Spergel.* 397, 38, 168-E1 (1992)
Gravitational Lensing and the Variability of *G*. *Lawrence M. Krauss & Martin White.* 397, 357, 175-B4 (1992)
Generalized Newtonian Force Law and Hidden Mass. *Richard L. Liboff.* 397, L71, 180-G1 (1992)
Statistical Mechanics of Violent Relaxation. *David N. Spergel & Lars Hernquist.* 397, L75, 180-G7 (1992)
Excitation of Gravity Waves in Common Envelopes. *Noam Soker.* 399, 185, 197-E3 (1992)
M31: A Unique Laboratory for Gravitational Microlensing. *Arlin P. S. Crotts.* 399, L43, 200-D11 (1992)
Decrease of Gravitational Mass Due to Neutrino Emission and Shock Revival in Supernovae. *Itzhak Goldman & Shmuel Nussinov.* 403, 706, 24-D13 (1993)
Three-Point Correlation Functions and the Hierarchical Clustering *Ansatz* in Low-Density Cold Dark Matter Universes. *Yasushi Suto.* 404, L1, 33-C7 (1993)
Second Post-Newtonian Order Renormalization of First Post-Newtonian Order Gravity in the Solar System. *Ken Nordtvedt.* 407, 758, 80-A1 (1993)
Clusters and Groups of Galaxies as Cosmological Probes. *Haruhiko Ueda, Makoto Itoh, & Yasushi Suto.* 408, 3, 83-B5 (1993)
Nonlinear Properties and Time Evolution of Gravitational Galaxy Clustering. *William C. Saslaw & Ravi K. Sheth.* 409, 504, 105-B13 (1993)
Features of the Fluorescent Iron Line from Highly Inclined Disks: Some Possible Examples for NGC 6814. *G. Bao.* 409, L41, 111-C1 (1993)
A Generalized Zel'dovich Approximation to Gravitational Instability. *M. Giavalisco, B. Mancinelli, P. J. Mancinelli, & A. Yahil.* 411, 9, 127-B12 (1993)
Gravitational Radiation, Inspiraling Binaries, and Cosmology. *David F. Chernoff & Lee Samuel Finn.* 411, L5, 133-D8 (1993)
Improving the Reconstruction of the Velocity Potential and Primordial Density Fluctuations by Choice of Smoothing Windows. *Adrian L. Melott.* 414, L73, 185-D8 (1993)
The Einsteinian Gravitational Field of the Rigidly Rotating Disk of Dust. *G. Neugebauer & R. Meinel.* 414, L97, 185-G5 (1993)
Null Geodesics in Perturbed Spacetimes. *Ted Pyne & Mark Birkinshaw.* 415, 459, 193-E7 (1993)
Gravitational Waves and γ-Ray Bursts. *Christopher S. Kochanek & Tsvi Piran.* 417, L17, 222-G11 (1993)
Gravitational Wave Detection: A Nonmechanical Effect. *Redouane Fakir.* 418, 202, 233-E4 (1993)
Ω from Velocities in Voids. *Avishai Dekel & Martin J. Rees.* 422, L1, 36-B1 (1994)
Imaging of 16 Distant EMSS Clusters with $z \geq 0.2$ and $L_{X,44} \geq 4$: New Arcs and First Consequences. *O. Le Fèvre, F. Hammer, M. C. Angonin, I. M. Gioia, & G. A. Luppino.* 422, L5, 36-B7 (1994)
Gravitational Collapse of an Inhomogeneous Dust Sphere in Higher Dimensional Spacetime. *A. Banerjee, A. Sil, & S. Chatterjee.* 422, 681, 40-C12 (1994)
Applying the Zel'dovich Approximation to General Relativity. *K. M. Croudace, J. Parry, D. S. Salopek, & J. M. Stewart.* 423, 22, 46-D1 (1994)
Self-similar Evolution of Magnetized Plasmas. II. Nonequilibrium Solutions and Hubble's Expansion. *Wei-Hong Yang.* 425, 439, 87-B10 (1994)
Gravity Wave Watching. *Redouane Fakir.* 426, 74, 97-A5 (1994)
Excitation of Neutron Star Normal Modes during Binary Inspiral. *Andreas Reisenegger & Peter Goldreich.* 426, 688, 107-A6 (1994)
Contribution of Peculiar Shear Motions to Large-Scale Structure. *Hans-Reinhard Müller & Rudolf A. Treumann.* 427, L5, 117-B1 (1994)
Study of the Matching of Solutions of the Einstein Equations according to Darmois. *Armando Bernui & Edwin Portocarrero.* 427, 947, 124-D5 (1994)
The Post-Keplerian Orbital Representations of the Relativistic Two-Body Problem. *S. A. Klioner & S. M. Kopeikin.* 427, 951, 124-D10 (1994)
Can Conformal Weyl Gravity Be Considered a Viable Cosmological Theory? *D. Elizondo & G. Yepes.* 428, 17, 128-D5 (1994)
Nonlinear Approximations to Gravitational Instability: A Comparison in Second-Order Perturbation Theory. *Dipak Munshi & Alexei A. Starobinsky.* 428, 433, 135-E6 (1994)
High-Precision Timing of Millisecond Pulsars. III. Long-Term Monitoring of PSRs B1855+09 and B1937+21. *V. M. Kaspi, J. H. Taylor, & M. F. Ryba.* 428, 713, 139-B9 (1994)
Gravitional Lenses and Unconventional Gravity Theories. *Jacob D. Bekenstein & Robert H. Sanders.* 429, 480, 151-F6 (1994)
Lensing in Alternative Gravity. *Mark A. Walker.* 430, 463, 167-D10 (1994)
Multipole Moments of Stellar Oscillation Modes. *Andreas Reisenegger.* 432, 296, 196-G6 (1994)
Gravitomagnetics in Stationary Media. *E. Woyk.* 433, 357, 212-F11 (1994)
Analytic Expression of the Genus in a Weakly Non-Gaussian Field Induced by Gravity. *Takahiko Matsubara.* 434, L43, 241-C8 (1994)

Supplementary Parameters in the Parameterized Post-Keplerian Formalism. *S. M. Kopeikin.* 434, L67, 241-F9 (1994)
A Three-dimensional Hydrodynamics Code for Modeling Sources of Gravitational Radiation. *Scott C. Smith, Joan M. Centrella, & Sean P. Clancy.* 94, 789, 62-G3 (1994)
Lagrangian Evolution of the Weyl Tensor. *Edmund Bertschinger & A. J. S. Hamilton.* 435, 1, 243-C1 (1994)
The Sun as a Probe of Varying *G*. *P. Demarque, Lawrence M. Krauss, D. B. Guenther, & David Nydam.* 437, 870, 297-E10 (1994)
The Classical Tests in Kaluza-Klein Gravity. *D. Kalligas, P. S. Wesson, & C. W. F. Everitt.* 439, 548, 31-G9 (1995)
Gravity Waves in the Lower Solar Corona. *Yu-Qing Lou.* 442, 401, 82-E1 (1995)
Does Gravitational Radiation Limit the Angular Velocities of Superfluid Neutron Stars? *Lee Lindblom & Gregory Mendell.* 444, 804, 127-E6 (1995)
Masses of DA White Dwarfs with Gravitational Redshift Determinations. *P. Bergeron, James Liebert, & M. S. Fulbright.* 444, 810, 127-F1 (1995)
Sensitivity of Solar *g*-Modes to Varying *G* Cosmologies. *D. B. Guenther, Ken Sills, Pierre Demarque, & Lawrence M. Krauss.* 445, 148, 134-D4 (1995)
Gradual Approach to Coalescence for Compact Stars Orbiting Massive Black Holes. *Dieter Hils & Peter L. Bender.* 445, L7, 140-B10 (1995)
Nonlinear Evolution of Internal Gravity Waves in Cluster Cooling Flows. *Eric A. Lufkin, Steven A. Balbus, & John F. Hawley.* 446, 529, 163-D5 (1995)
Time and Its Evolution in an Inhomogeneous Universe. *Martin Harwit.* 447, 482, 182-D10 (1995)
Matching Exterior to Interior Solutions in Weyl Gravity: Comment on "Exact Vacuum Solution to Conformal Weyl Gravity and Galactic Rotation Curves." *Volker Perlick & Chongming Xu.* 449, 47, 210-G7 (1995)
The Rotation Curves of the Polar Ring Galaxy NGC 4650A under Modified Newtonian Dynamics. *Takahiro Morishima & Hideyuki Saio.* 450, 70, 229-A12 (1995)
Gravitational Radiation from Rotational Collapse of a Supernova Core. *Shoichi Yamada & Katsuhiko Sato.* 450, 245, 231-D4 (1995)
Millisecond Pulsars: Detectable Sources of Continuous Gravitational Waves? *Kimberly C. B. New, G. Chanmugam, Warren W. Johnson, & Joel E. Tohline.* 450, 757, 241-B9 (1995)
Local Nonlinear Approximations to the Growth of Cosmic Structures. *Paul J. Mancinelli & Amos Yahil.* 452, 75, 263-B8 (1995)
Cosmological Perturbation Theory in the Synchronous and Conformal Newtonian Gauges. *Chung-Pei Ma & Edmund Bertschinger.* 455, 7, 318-C10 (1995)
Einstein's Radiation Formula and Modifications to the Einstein Equation. *C. Y. Lo.* 455, 421, 327-F4 (1995)

GRAVITATIONAL LENSES

Cosmic X-Ray Background from Hot Gas. *R. D. Rogers & G. B. Field.* 366, 22, 1-C13 (1991)
A Straight Gravitational Image in Abell 2390: A Striking Case of Lensing by a Cluster of Galaxies. *Roser Pelló, Jean-François Le Borgne, Geneviève Soucail, Yannick Mellier, & Blai Sanahuja.* 366, 405, 7-G9 (1991)
Galactic Microlensing as a Method of Detecting Massive Compact Halo Objects. *Kim Griest.* 366, 412, 8-A5 (1991)
A Technique for Using Radio Jets as Extended Gravitational Lensing Probes. *Philipp P. Kronberg, Charles C. Dyer, E. Margaret Burbidge, & Vesa T. Junkkarinen.* 367, L1, 17-B1 (1991)
First Results from the Faint Object Camera: Images of the Gravitational Lens System G2237+0305. *P. Crane, R. Albrecht, C. Barbieri, J. C. Blades, A. Bokensenberg, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, & W. B. Sparks.* 369, L59, 46-A7 (1991)
Gravitational Lensing by Clusters of Galaxies: Constraining the Mass Distribution. *Jordi Miralda-Escudé.* 370, 1, 47-B1 (1991)
Correlation Function of Gravitational Deflection Angles of Light Paths. *Kazuya Watanabe & Kenji Tomita.* 370, 481, 54-D1 (1991)
Gravitational Microlensing of the Galactic Bulge Stars. *B. Paczyński.* 371, L63, 73-C4 (1991)
New Model for the 0957+561 Gravitational Lens System: Bounds on Masses of a Possible Black Hole and Dark Matter and Prospects for Estimation of H_0. *E. E. Falco, M. V. Gorenstein, & I. I. Shapiro.* 372, 364, 80-D1 (1991)
Gravitational Microlensing as a Method of Detecting Disk Dark Matter and Faint Disk Stars. *Kim Griest, Charles Alcock, Timothy S. Axelrod, David P. Bennett, Kem H. Cook, Kenneth C. Freeman, Hye-Sook Park, Saul Perlmutter, Bruce A. Peterson, Peter J. Quinn, Alexander W. Rodgers, & Christopher W. Stubbs (The MACHO Collaboration).* 372, L79, 85-D5 (1991)
The Implications of Lenses for Galaxy Structure. *Christopher S. Kochanek.* 373, 354, 92-D7 (1991)
Gravitational Microlensing of High-Redshift Supernovae by Compact Objects. *Kevin P. Rauch.* 374, 83, 99-A11 (1991)
Gravitational Lens Interference. *J. B. Peterson & Toby Falk.* 374, L5, 103-C1 (1991)
The Complete Sample of 1 Jansky BL Lacertae Objects. I. Summary Properties. *M. Stickel, P. Padovani, C. M. Urry, J. W. Fried, & H. Kühr.* 374, 431, 104-E1 (1991)
Gravitational Microlensing by Double Stars and Planetary Systems. *Shude Mao & Bohdan Paczyński.* 374, L37, 110-B11 (1991)
Formation and Distortion of Optical Rings around Rich Cluster Galaxies. *Christopher S. Kochanek & Roger D. Blandford.* 375, 492, 118-G11 (1991)
Gravitational Lensing and the Lyman-Alpha Forest. *Satoru Ikeuchi & Edwin L. Turner.* 375, 499, 119-A5 (1991)
Evidence for a Massive, Dark Gravitational Lensing Object in Q2345+007. *Robert C. Duncan.* 375, L41, 124-B1 (1991)
Bounds on the Enhancement of Quasar Counts by Lenses. *Israel Kovner.* 376, 70, 125-G8 (1991)
Infrared and Visible Photometry of the Gravitational Lens System 2237+030. *Daniel Nadeau, H. K. C. Yee, W. J. Forrest, J. D. Garnett, Z. Ninkov, & J. L. Pipher.* 376, 430, 131-G1 (1991)
A New Approach to Gravitational Microlensing: Time Delays and the Galactic Mass Distribution. *Lawrence M. Krauss & Todd A. Small.* 378, 22, 151-C8 (1991)
Gravitational Lensing, Time Delay, and Angular Diameter Distance. *Ramesh Narayan.* 378, L5, 157-B1 (1991)
First- and Second-Epoch VLBI Observations of the Gravitational Lens System 2016+112. *M. B. Heflin, M. V. Gorenstein, C. R. Lawrence, & B. F. Burke.* 378, 519, 158-G9 (1991)
The Magnification of Stars Crossing a Caustic. I. Lenses with Smooth Potentials. *Jordi Miralda-Escudé.* 379, 94, 164-B7 (1991)
Selection Effects in Optical Surveys for Gravitational Lenses. *Christopher S. Kochanek.* 379, 517, 171-B1 (1991)
The Correlation Function of Galaxy Ellipticities Produced by Gravitational Lensing. *Jordi Miralda-Escudé.* 380, 1, 176-B1 (1991)
Statistics of Gravitational Lenses: The Uncertainties. *Shude Mao.* 380, 9, 176-B9 (1991)
Spectroscopy of the Gravitational Arcs in Cl 2244−02, A370 (Arclet A5), and Cl 0024+1654. *Yannick Mellier, Bernard Fort, Geneviève Soucail, Guy Mathez, & Mireille Cailloux.* 380, 334, 182-D10 (1991)
Bounds on Intergalactic Compact Objects from Observations of Compact Radio Sources. *Aggeliki Kassiola, Israel Kovner, & Roger D. Blandford.* 381, 6, 189-B4 (1991)
Spatially Resolved Spectroscopy of Lyman-Alpha and C IV in the Gravitational Lens 2237+030. *H. K. C. Yee & M. M. De Robertis.* 381, 386, 195-E1 (1991)
Microlensing and the Structure of Active Galactic Nucleus Accretion Disks. *Kevin P. Rauch & Roger D. Blandford.* 381, L39, 199-B1 (1991)
Systematic Effects in Lens Inversions: $\aleph_1$ Exact Models for 0957+561. *Christopher S. Kochanek.* 382, 58, 200-G1 (1991)
Are Quasar Redshifts Cosmological? *Arnon Dar.* 382, L1, 205-A7 (1991)
Thin and Giant Luminous Arcs: A Strong Test of the Lensing Cluster Mass Distribution. *F. Hammer.* 383, 66, 212-G8 (1991)

HIGH-LATITUDE OBJECTS

CO $J = 3 \rightarrow 2$ Observations of Translucent and High-Latitude Molecular Clouds. *Ewine F. van Dishoeck, John H. Black, T. G. Phillips, & R. Gredel.* 366, 141, 2-G1 (1991)
IUE Observations of Early-Type Stars at High Galactic Latitudes. *D. A. Quin, P. J. F. Brown, E. S. Conlon, P. L. Dufton, & F. P. Keenan.* 375, 342, 115-B7 (1991)
An Infrared/Optical Investigation of 100 Micron "Cirrus." *Elizabeth S. Paley, Frank J. Low, John T. McGraw, Roc M. Cutri, & Hans-Walter Rix.* 376, 335, 129-A13 (1991)

Metallicity and Velocity Distribution of Giants toward the Galactic Poles. *Kavan U. Ratnatunga & Kenneth M. Yoss.* 377, 442, 145-C3 (1991)

HISTORY AND PHILOSOPHY OF ASTRONOMY

Founded in 1895 by George E. Hale and James E. Keeler: The *Astrophysical Journal* Centennial. *Donald E. Osterbrock.* 438, 1, 1-C1 (1995)

Centennial Challenge Essay: Quo Vadis, Astronomia? *George W. Collins II.* 449, 399, 218-C1 (1995)

A Century of Galaxy Spectroscopy. *Vera C. Rubin.* 451, 419, 253-B1 (1995)

The *Astrophysical Journal*: A New Journal for a New Science. *R. S. Brashear.* 455, 403, 327-D1 (1995)

Some Statistical Highlights of the *Astrophysical Journal*. *Helmut A. Abt.* 455, 407, 327-D8 (1995)

HYDRODYNAMICS

Nonaxisymmetric Instabilities in Rotating Shear Flows: Internal Gravity Modes in Stratified Media and Analogies with Plane Flows. *P. Ghosh & M. A. Abramowicz.* 366, 221, 3-F13 (1991)

Coronal Loop Heating by Wave-Particle Interactions. *Altair S. de Assis & King H. Tsui.* 366, 324, 5-B1 (1991)

Instabilities and Clumping in SN 1987A. I. Early Evolution in Two Dimensions. *Bruce Fryxell, Ewald Müller, & David Arnett.* 367, 619, 21-A5 (1991)

Hydrodynamic Constraints on the Radial Structure of Late-Type Galaxy Disks. *Curtis Struck-Marcell.* 368, 348, 29-D5 (1991)

The Dynamic Instability of Adiabatic Blast Waves. *Dongsu Ryu & Ethan T. Vishniac.* 368, 411, 30-B12 (1991)

The Effect of Viscosity on Steady Transonic Flow with a Nodal Solution Topology. *S. P. Owocki & G. P. Zank.* 368, 491, 31-C1 (1991)

Rayleigh-Taylor Instabilities and Mixing in the Helium Star Models for Type Ib/Ic Supernovae. *Izumi Hachisu, Takuya Matsuda, Ken'ichi Nomoto, & Toshikazu Shigeyama.* 368, L27, 35-B4 (1991)

Star Formation and the Nature of Bipolar Outflows. *Frank H. Shu, Steven P. Ruden, Charles J. Lada, & Susana Lizano.* 370, L31, 53-E1 (1991)

Two-Temperature Accretion Disks with Winds in a Fluid Approximation. *Masaaki Kusunose.* 370, 505, 54-F1 (1991)

A Polytropic Model of an Accretion Disk, a Boundary Layer, and a Star. *Bohdan Paczyński.* 370, 597, 55-G11 (1991)

On the Thermal Stability of Slabs, Cylinders, and Spheres. *Miguel H. Ibáñez S., & Florencio P. Plachco M.* 370, 743, 57-F1 (1991)

Hydrodynamical Instabilities and Mixing in SN 1987A: Two-dimensional Simulations of the First 3 Months. *Marc Herant & Willy Benz.* 370, L81, 59-D6 (1991)

The Deflection of Cosmic Jets. *David S. De Young.* 371, 69, 61-A1 (1991)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. I. The Issues, Formulation of the Problem, and Method of Solution. *Telemachos Ch. Mouschovias & Scott A. Morton.* 371, 296, 63-G1 (1991)

Enhanced Winds and Tidal Streams in Massive X-Ray Binaries. *John M. Blondin, Ian R. Stevens, & Timothy R. Kallman.* 371, 684, 70-B1 (1991)

Accretion in Wind-driven X-Ray Sources. *Ronald E. Taam, Albert Fu, & B. A. Fryxell.* 371, 696, 70-C1 (1991)

Near-critical Spherical Accretion by Neutron Stars: General Relativistic Treatment. *Myeong-Gu Park & Guy S. Miller.* 371, 708, 70-D1 (1991)

On Magnetothermal Instability in Cluster Cooling Flows. *Steven A. Balbus.* 372, 25, 74-C13 (1991)

Supernova Remnant 1987A. *Ding Luo & Richard McCray.* 372, 194, 76-D1 (1991)

Nonlinear Evolution of Accretion Disks Induced by Radiative Feedback Processes. *K. R. Bell, D. N. C. Lin, & Steven P. Ruden.* 372, 633, 83-E7 (1991)

The Oscillations of Rapidly Rotating Newtonian Stellar Models. II. Dissipative Effects. *James R. Ipser & Lee Lindblom.* 373, 213, 88-E12 (1991)

Mechanics and Energetics of Vortex Unpinning in Neutron Stars. *Bennett K. Link & Richard I. Epstein.* 373, 592, 95-C11 (1991)

The Hydrodynamics of Relict Cosmological H II Regions and the Formation of Objects at High Redshift. *Piero Madau & Avery Meiksin.* 374, 6, 98-B7 (1991)

Model Light Curves of Linear Type II Supernovae. *Douglas A. Swartz, J. Craig Wheeler, & Robert P. Harkness.* 374, 266, 101-D7 (1991)

The Collapse of Cylindrical Isothermal and Polytropic Clouds with Rotation. *Ian Bonnell & Pierre Bastien.* 374, 610, 106-F5 (1991)

Hydrodynamic Pulsation Models of Yellow Supergiant Stars in the Post-Asymptotic Giant Branch. *Toshiki Aikawa.* 374, 700, 107-F13 (1991)

A Simulation of the Collapse and Fragmentation of Cooling Molecular Clouds. *Joe J. Monaghan & John C. Lattanzio.* 375, 177, 113-C1 (1991)

The Influence of the Interface between the Heliosphere and the Local Interstellar Medium on the Penetration of the H Atoms to the Solar System. *V. B. Baranov, M. G. Lebedev, & Yu. G. Malama.* 375, 347, 115-C1 (1991)

Noise-driven Radiative Shocks: A New Model for the Optical Quasi-periodic Oscillations of the AM Herculis Objects. *Michael T. Wolff, Kent S. Wood, & James N. Imamura.* 375, L31, 117-D6 (1991)

The Dynamical Evolution of the Protosolar Nebula. *Steven P. Ruden & James B. Pollack.* 375, 740, 121-G11 (1991)

A Powerful Local Shear Instability in Weakly Magnetized Disks. I. Linear Analysis. *Steven A. Balbus & John F. Hawley.* 376, 214, 127-E11 (1991)

Luminosity Limit for Alpha-Viscosity Accretion Disks. *Edison P. Liang & Amri Wandel.* 376, 746, 135-E8 (1991)

Nonlinear Instability of the Accretion Line. *Noam Soker.* 376, 750, 135-F1 (1991)

The Fragmentation of "Pancakes" in a Dark Matter–dominated Universe. *Wenbo Yuan, Joan M. Centrella, & Michael L. Norman.* 376, L29, 137-A11 (1991)

Dissipational Galaxy Formation. I. Effects of Gasdynamics. *Neal Katz & James E. Gunn.* 377, 365, 144-D1 (1991)

Fragmentation of Elongated Cylindrical Clouds. III. Formation of Binary and Multiple Systems. *Ian Bonnell, Hugo Martel, Pierre Bastien, Jean-Pierre Arcoragi, & Willy Benz.* 377, 553, 146-E5 (1991)

Collisions of Giant Stars with Compact Objects: Hydrodynamical Calculations. *Frederic A. Rasio & Stuart L. Shapiro.* 377, 559, 146-F1 (1991)

A Determination of Relativistic Shock Jump Conditions Using Monte Carlo Techniques. *Donald C. Ellison & Stephen P. Reynolds.* 378, 214, 153-F1 (1991)

Fragmentation of Elongated Cylindrical Clouds. I. Isothermal Clouds. *Pierre Bastien, Jean-Pierre Arcoragi, Willy Benz, Ian Bonnell, & Hugo Martel.* 378, 255, 154-B5 (1991)

Alfvén Wave Trapping, Network Microflaring, and Heating in Solar Coronal Holes. *R. L. Moore, Z. E. Musielak, S. T. Suess, & C.-H. An.* 378, 347, 155-C5 (1991)

Hydrodynamics of Collisions between Binary Stars. *Jeremy Goodman & Lars Hernquist.* 378, 637, 160-C11 (1991)

Diskoseismology: Probing Accretion Disks. I. Trapped Adiabatic Oscillations. *Michael A. Nowak & Robert V. Wagoner.* 378, 656, 160-E9 (1991)

Heavy, Overpressured Jets and the Radio Source Hercules A. *David L. Meier, Alberto C. Sadun, & Kevin R. Lind.* 379, 141, 164-F9 (1991)

On the Adiabatic Pulsations of Accretion Disks and Rotating Stars. *James R. Ipser & Lee Lindblom.* 379, 285, 166-E7 (1991)

The Late-Time Light Curve of SN 1984L. *Douglas A. Swartz & J. Craig Wheeler.* 379, L13, 169-B7 (1991)

The Circumstellar Shell of SN 1987A. *Ding Luo & Richard McCray.* 379, 659, 172-G9 (1991)

The Collimation of a Time-dependent Stellar Wind. *S.-H. Kim & A. C. Raga.* 379, 689, 173-C4 (1991)

Periodic Stellar Pulsations: Stability Analysis and Amplitude Equations. *J. Robert Buchler, Pawel Moskalik, & Géza Kovács.* 380, 185, 178-D1 (1991)

Dynamical Buoyancy of Hydrodynamic Eddies. *E. N. Parker.* 380, 251, 179-B5 (1991)

Fragmentation of Elongated Cylindrical Clouds. II. Polytropic Clouds. *Jean-Pierre Arcoragi, Ian Bonnell, Hugo Martel, Willy Benz, & Pierre Bastien.* 380, 476, 184-B7 (1991)

Superfluid Hydrodynamics in Rotating Neutron Stars. I. Nondissipative Equations. *Gregory Mendell.* 380, 515, 184-F1 (1991)

Superfluid Hydrodynamics in Rotating Neutron Stars. II. Dissipative Effects. *Gregory Mendell.* 380, 530, 184-G3 (1991)

Three-dimensional Compressible Hydrodynamic Convection in the Sun and Stars. *Murshed Hossain & D. J. Mullan.* 380, 631, 186-A10 (1991)

Numerical Simulations of Flares on M Dwarf Stars. I. Hydrodynamics and Coronal X-Ray Emission. *Chung-Chieh Cheng & Roberto Pallavicini.* 381, 234, 191-G12 (1991)

A Model for Tidally Driven Eccentric Instabilities in Fluid Disks. *Stephen H. Lubow.* 381, 259, 192-B12 (1991)

Neutralized and Unneutralized Current Patterns in the Solar Corona. *D. B. Melrose.* 381, 306, 192-F13 (1991)

Outflow Hydrodynamics in the Eclipsing Millisecond Pulsar Binaries PSR 1957+20 and PSR 1744−24A. *Marco Tavani & Leigh Brookshaw.* 381, L21, 194-C13 (1991)

Three-dimensional Simulations of Black Hole Tori. *John F. Hawley.* 381, 496, 196-G9 (1991)

Two-dimensional Hydrodynamic Calculations of the Nonlinear Development of the Goldreich-Schubert-Fricke Instability in a Rotating Annulus. *D. G. Korycansky.* 381, 515, 197-B1 (1991)

Outflows Driven by Cosmic-Ray Pressure in Broad Absorption Line QSOs. *Mitchell C. Begelman, Martijn de Kool, & Marek Sikora.* 382, 416, 206-F9 (1991)

Rayleigh-Taylor Instability in the Asymmetric Supernova Explosion. *Shoichi Yamada & Katsuhiko Sato.* 382, 594, 208-G12 (1991)

A Hydrodynamic Approach to Cosmology: Texture-seeded Cold Dark Matter and Hot Dark Matter Cosmogonies. *R. Y. Cen, J. P. Ostriker, D. N. Spergel, & N. Turok.* 383, 1, 212-B1 (1991)

Spherical Accretion onto Black Holes: A Complete Analysis of Stationary Solutions. *Luciano Nobili, Roberto Turolla, & Luca Zampieri.* 383, 250, 215-C9 (1991)

The Formation and Role of Water Dimers in a Cometary Atmosphere, with Application to Comet P/Halley. *J. F. Crifo & Z. Slanina.* 383, 351, 216-F1 (1991)

Gravitational Instabilities in a Proto–Planetary Disk. *Hyerim Noh, Ethan T. Vishniac, & William D. Cochran.* 383, 372, 217-A1 (1991)

Gravitational Fragmentation: A Comparison with W49A. *Eric R. Keto, John C. Lattanzio, & Joe J. Monaghan.* 383, 639, 222-B12 (1991)

The Formation of Coronal Regions in Accretion Disks. *Stephen D. Murray & Douglas N. C. Lin.* 384, 177, 3-B9 (1992)

Spherically Symmetric, Polytropic Flow. *T. Theuns & M. David.* 384, 587, 9-D9 (1992)

Numerical Simulations of Hydrodynamical Jets Crossing a Galactic Halo/Intracluster Medium Interface. *Paul J. Wiita & Michael L. Norman.* 385, 478, 19-B7 (1992)

Toward a Resolution of the Bump and Beat Cepheid Mass Discrepancies. *Paweł Moskalik, J. Robert Buchler, & Ariel Marom.* 385, 685, 21-E13 (1992)

Radiative Shocks and Hydrogen Molecules in Pregalactic Gas: The Effects of Postshock Radiation. *Hyesung Kang & Paul R. Shapiro.* 386, 432, 30-F13 (1992)

Numerical Models for the Collapse and Fragmentation of Centrally Condensed Molecular Cloud Cores. *Elizabeth A. Myhill & William M. Kaula.* 386, 578, 32-E4 (1992)

A Hydrodynamic Approach to Cosmology: Methodology. *Renyue Cen.* 78, 341, 7-B1 (1992)

Instabilities in Astrophysical Jets. I. Linear Analysis of Body and Surface Waves. *Jun-Hui Zhao, Jack O. Burns, Philip E. Hardee, & Michael L. Norman.* 387, 69, 37-G7 (1992)

Instabilities in Astrophysical Jets. II. Numerical Simulations of Slab Jets. *Jun-Hui Zhao, Jack O. Burns, Michael L. Norman, & Martin E. Sulkanen.* 387, 83, 38-B1 (1992)

Postexplosion Hydrodynamics of SN 1987A. *Marc Herant & Willy Benz.* 387, 294, 40-E9 (1992)

Astrophysical Jets and Theories of Gravitation. *Mario Livio & Nathan Rosen.* 387, 458, 44-D5 (1992)

Asymmetric Morphology of the Propagating Jet. II. The Effect of Atmospheric Gradients. *Philip E. Hardee, Raymond E. White III, Michael L. Norman, Michael A. Cooper, & David A. Clarke.* 387, 460, 44-D8 (1992)

Dynamics of Wind Bubbles and Superbubbles. I. Slow Winds and Fast Winds. *Bon-Chul Koo & Christopher F. McKee.* 388, 93, 50-C1 (1992)

Dynamics of Wind Bubbles and Superbubbles. II. Analytic Theory. *Bon-Chul Koo & Christopher F. McKee.* 388, 103, 50-C12 (1992)

Self-similar Solutions and the Stability of Collapsing Isothermal Filaments. *Shu-ichiro Inutsuka & Shoken M. Miyama.* 388, 392, 55-C1 (1992)

A Test Suite for Magnetohydrodynamical Simulations. *James M. Stone, John F. Hawley, Charles R. Evans, & Michael L. Norman.* 388, 415, 55-E1 (1992)

Convective Instability in Differentially Rotating Disks. *Dongsu Ryu & Jeremy Goodman.* 388, 438, 55-F12 (1992)

The Stability of Accretion Tori. IV. Fission and Fragmentation of Slender, Self-gravitating Annuli. *Dimitris M. Christodoulou & Ramesh Narayan.* 388, 451, 56-A1 (1992)

Dynamics of Ultraharmonic Resonances in Spiral Galaxies. *Paweł Artymowicz & Stephen H. Lubow.* 389, 129, 61-F1 (1992)

On the Interior Structure of Contact Binaries and the Light-Curve Paradox. *Jean-Louis Tassoul.* 389, 375, 64-E9 (1992)

Three-dimensional Hydrodynamical Simulations of Colliding Stars. III. Collisions and Tidal Captures of Unequal-Mass Main-Sequence Stars. *W. Benz & J. G. Hills.* 389, 546, 68-C8 (1992)

Cooling and the Longevity of Polar Rings. *Neal Katz & Hans-Walter Rix.* 389, L55, 73-C3 (1992)

Downflows and Entropy Gradient Reversal in Deep Convection. *Kwing L. Chan & Detlef Gigas.* 389, L87, 73-F3 (1992)

Mixing in Ejecta of Supernovae. I. General Properties of Two-dimensional Rayleigh-Taylor Instabilities and Mixing Width in Ejecta of Supernovae. *Izumi Hachisu, Takuya Matsuda, Ken'ichi Nomoto, & Toshikazu Shigeyama.* 390, 230, 76-G7 (1992)

The Three-dimensional Interaction of a Supernova Remnant with an Interstellar Cloud. *James M. Stone & Michael L. Norman.* 390, L17, 78-C11 (1992)

Postglitch Behavior of the Crab Pulsar: Evidence for External Torque Variations. *Bennett Link, Richard I. Epstein, & Gordon Baym.* 390, L21, 78-D5 (1992)

Modeling Structures of Knots in Jet Flows with the Burgers Equation. *Lev Kofman & A. C. Raga.* 390, 359, 79-F5 (1992)

Swing Amplification of Nonaxisymmetric Perturbations in Stars and Gas in a Sheared Galactic Disk. *Chanda J. Jog.* 390, 378, 80-B1 (1992)

Formation of a Giant Galactic Gaseous Halo: Metal Absorption Lines and High-Velocity Clouds. *Fan Li & Satoru Ikeuchi.* 390, 405, 80-D7 (1992)

Spiral Shocks and Subday Variability in SS 433. *Sandip K. Chakrabarti & T. Matsuda.* 390, 639, 83-C1 (1992)

Collision and Tidal Interaction between Planetesimals. *Sei-ichiro Watanabe & Shoken M. Miyama.* 391, 318, 89-G11 (1992)

Dissipational Galaxy Formation. II. Effects of Star Formation. *Neal Katz.* 391, 502, 94-B7 (1992)

Application of the Phase-Integral Method to the Trapping of Acoustic Waves in a Gravitating Fluid. I. Planar Polytrope and Turning-Point Behavior. *Gary H. Price.* 391, 845, 98-D10 (1992)

Ram-Pressure Confinement of a Hypersonic Jet. *Chris Loken, Jack O. Burns, David A. Clarke, & Michael L. Norman.* 392, 54, 101-F1 (1992)

Dynamics of Fronts in Thermally Bistable Fluids. *Christian Elphick, Oded Regev, & Nir Shaviv.* 392, 106, 102-C9 (1992)

Hydrodynamic Instabilities in Supernova Remnants: Self-similar Driven Waves. *Roger A. Chevalier, John M. Blondin, & Robert T. Emmering.* 392, 118, 102-D9 (1992)

The Evolution of Cocoons Surrounding Light, Extragalactic Jets. *Denis F. Cioffi & John M. Blondin.* 392, 458, 108-A7 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. I. The Hydrodynamic Algorithms and Tests. *James M. Stone & Michael L. Norman.* 80, 753, 33-G3 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. II. The Magnetohydrodynamic Algorithms and Tests. *James M. Stone & Michael L. Norman.* 80, 791, 34-C5 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. III. The Radiation Hydrodynamic Algorithms and Tests. *James M. Stone, Dimitri Mihalas, & Michael L. Norman.* 80, 819, 34-E11 (1992)

A Hydrodynamic Treatment of the Cold Dark Matter Cosmological Scenario. *Renyue Cen & Jeremiah Ostriker.* 393, 22, 114-C12 (1992)

Gauge-invariant Cosmological Perturbations in Two Gravitationally Coupled Perfect Fluids. *W. Zimdahl.* 393, 471, 121-F9 (1992)

Shock Breakout in SN 1987A. *Lisa Ensman & Adam Burrows.* 393, 742, 125-A10 (1992)

Supersonic Infall and Causality in Accretion Disk Boundary Layers. *Robert Popham & Ramesh Narayan.* 394, 255, 131-B10 (1992)

A Flux-limited Model of Particle Diffusion and Viscosity. *Ramesh Narayan.* 394, 261, 131-C3 (1992)

Thermonuclear Runaways in Nova Outbursts. *Anurag Shankar, David Arnett, & Bruce A. Fryxell.* 394, L13, 133-C1 (1992)

Bow Shock Models for the Velocity Structure of Ultracompact H II Regions. *Dave Van Buren & Mordecai-Mark Mac Low.* 394, 534, 136-A7 (1992)

Statistics of the Cosmic Mach Number from Numerical Simulations of a Cold Dark Matter Universe. *Yasushi Suto, Renyue Cen, & Jeremiah P. Ostriker.* 395, 1, 140-B1 (1992)

Cosmological Perturbations and the Physical Meaning of Gauge-invariant Variables. *Marco Bruni, Peter K. S. Dunsby, & George F. R. Ellis.* 395, 34, 140-E7 (1992)

Covariant Perturbations in a Multifluid Cosmological Medium. *Peter K. S. Dunsby, Marco Bruni, & George F. R. Ellis.* 395, 54, 140-G1 (1992)

Dynamical Evolution of Highly Inclined Rings. *Dimitris M. Christodoulou, Neal Katz, Hans-Walter Rix, & Asao Habe.* 395, 113, 141-E1 (1992)

A Comparative Study of Synchronization and Circularization in Close Binaries. *Jean-Louis Tassoul & Monique Tassoul.* 395, 259, 143-D1 (1992)

Hydrodynamics of the Hot Component of the Galactic Halo. II. Radiative and Dynamical Instabilities. *A. Ferrara & G. Einaudi.* 395, 475, 148-D9 (1992)

On the Efficiency of Ekman Pumping for Synchronization in Close Binaries. *Monique Tassoul & Jean-Louis Tassoul.* 395, 604, 150-E5 (1992)

Postcollapse Hydrodynamics of SN 1987A: Two-dimensional Simulations of the Early Evolution. *Marc Herant, Willy Benz, & Stirling Colgate.* 395, 642, 151-B13 (1992)

Cosmic-Ray–modified Supernova Remnant Shocks. *T. W. Jones & Hyesung Kang.* 396, 575, 164-E9 (1992)

Propagation of Sound and Thermal Waves in a Plasma with Solar Abundances. *Miguel H. Ibáñez S., & Néstor M. Sánchez D.* 396, 717, 166-C1 (1992)

Properties of Quasi-periodic Oscillations in Accreting Magnetic White Dwarfs. *Kinwah Wu, G. Chanmugam, & G. Shaviv.* 397, 232, 170-G6 (1992)

Non-LTE Radiating Acoustic Shocks and Ca II K2V Bright Points. *Mats Carlsson & Robert F. Stein.* 397, L59, 173-G11 (1992)

Two-dimensional Viscous Accretion Disk Models. I. On Meridional Circulations in Radiative Regions. *W. Kley & D. N. C. Lin.* 397, 600, 178-D13 (1992)

On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. I. General Results. *Miguel H. Ibáñez S., Antonio Parravano, & César A. Mendoza B.* 398, 177, 184-B1 (1992)

An Off-Center Point Explosion in a Radially Stratified Medium: Kompaneets Approximation. *D. G. Korycansky.* 398, 184, 184-B9 (1992)

Flux-limited Diffusion in Hydrodynamics. *J. Cooperstein & E. Baron.* 398, 531, 190-F11 (1992)

Growth and Decay of Disturbances in Stratified Shear Flow in a Rotating Frame. *D. G. Korycansky.* 399, 176, 197-D3 (1992)

A Comparison of Models for Supernova Remnants Including Cosmic Rays. *Hyesung Kang & L. O'C. Drury.* 399, 182, 197-D11 (1992)

Near-resonant Excitation and Propagation of Eccentric Density Waves by External Forcing. *Eve C. Ostriker, Frank H. Shu, & Fred C. Adams.* 399, 192, 197-E13 (1992)

A Three-dimensional Hydrodynamic Treatment of the Hot Dark Matter Cosmological Scenario. *Renyue Cen & Jeremiah P. Ostriker.* 399, 331, 202-B1 (1992)

Pressure-confined Lyα Clouds: Simulation Results versus Observations. *Gerard M. Williger & Arif Babul.* 399, 385, 202-G1 (1992)

On the Virial Theorem for Turbulent Molecular Clouds. *Christopher F. McKee & Ellen G. Zweibel.* 399, 551, 204-F7 (1992)

Galaxies and Gas in a Cold Dark Matter Universe. *Neal Katz, Lars Hernquist, & David H. Weinberg.* 399, L109, 207-F1 (1992)

Galaxy Formation and Physical Bias. *Renyue Cen & Jeremiah P. Ostriker.* 399, L113, 207-F7 (1992)

Shock Wave Emergence at the Stellar Surface and the Subsequent Gas Expansion into a Vacuum: The Sphericity Involvement. *Ya. M. Kazhdan & Marina Murzina.* 400, 192, 211-C9 (1992)

Dynamics of Kepler's Supernova Remnant. *Kazimierz J. Borkowski, John M. Blondin, & Craig L. Sarazin.* 400, 222, 211-F5 (1992)

Nonlinear Dynamics of a Three-dimensional Jet. *Philip E. Hardee & David A. Clarke.* 400, L9, 214-B6 (1992)

Starbursts Triggered by Central Overpressure in Interacting Galaxies. *Chanda J. Jog & Mousumi Das.* 400, 476, 216-C1 (1992)

Fragmentation of Elongated Cylindrical Clouds. IV. Clouds with Solid-Body Rotation about an Arbitrary Axis. *Ian Bonnell, Jean-Pierre Arcoragi, Hugo Martel, & Pierre Bastien.* 400, 579, 217-E8 (1992)

Radiation-viscous Boundary Layers. *Nahum Arav & Mitchell C. Begelman.* 401, 125, 222-E7 (1992)

The Dynamics of Molecular Cloud Envelopes in a Varying Ultraviolet Radiation Field. *C. Bréart de Boisanger, J.-P. Chièze, & B. Meltz.* 401, 182, 223-D1 (1992)

Hydrodynamical Evolution of Coalescing Binary Neutron Stars. *Frederic A. Rasio & Stuart L. Shapiro.* 401, 226, 223-G9 (1992)

Stellar Encounters Involving Neutron Stars in Globular Cluster Cores. *M. B. Davies, W. Benz, & J. G. Hills.* 401, 246, 224-B1 (1992)

Fragmentation of Elongated Cylindrical Clouds. V. Dependence of Mass Ratios on Initial Conditions. *Ian Bonnell & Pierre Bastien.* 401, 654, 230-F1 (1992)

Protostellar Hydrodynamics: Constructing and Testing a Spatially and Temporally Second-Order–accurate Method. I. Spherical Coordinates. *Alan P. Boss & Elizabeth A. Myhill.* 83, 311, 62-B13 (1992)

Equilibrium Slab Models of Lyman-Alpha Clouds. *Jane C. Charlton, Edwin E. Salpeter, & Craig J. Hogan.* 402, 493, 8-F8 (1993)

Cosmic-Ray Acceleration during the Impact of Shocks on Dense Clouds. *T. W. Jones & Hyesung Kang.* 402, 560, 9-E1 (1993)

Stripping of a Planetary Nebula from the Globular Cluster M22. *Kazimierz J. Borkowski, Zlatan Tsvetanov, & J. Patrick Harrington.* 402, L57, 12-F9 (1993)

Dynamical Evolution of Gaseous Disks in Halo Potentials. I. Massless Rings in Static, Spheroidal Halos. *Dimitris M. Christodoulou & Joel E. Tohline.* 403, 110, 15-D5 (1993)

Evolution of Planetesimals. I. Dynamics: Relaxation in a Thin Disk. *P. L. Palmer, D. N. C. Lin, & S. J. Aarseth.* 403, 336, 18-A12 (1993)

Gravitational Clustering of Galaxies: Comparison between Thermodynamic Theory and *N*-Body Simulations. IV. The Effects of Continuous Mass Spectra. *Makoto Itoh, Shogo Inagaki, & William C. Saslaw.* 403, 476, 21-E1 (1993)

The Kelvin-Helmholtz Instability in Photospheric Flows: Effects on Coronal Heating and Structure. *Judith T. Karpen, Spiro K. Antiochos, Russell B. Dahlburg, & Daniel S. Spicer.* 403, 769, 25-C13 (1993)

Multiple Equilibria and Free Energy for Rotating, Self-gravitating Fluid Bodies. *Elizabeth A. Praton & Jennie Traschen.* 404, 63, 28-G1 (1993)

Astrophysical Gasdynamics Confronts Reality: The Shaping of Planetary Nebuale. *Adam Frank, Bruce Balick, Vincent Icke, & Garrelt Mellema.* 404, L25, 33-F7 (1993)

A Flux-limited Treatment for the Conductive Evaporation of Spherical Interstellar Gas Clouds. *William W. Dalton & Steven A. Balbus.* 404, 625, 36-F11 (1993)

Smoothed Particle Hydrodynamics near a Black Hole. *Pablo Laguna, Warner A. Miller, & Wojciech H. Zurek.* 404, 678, 37-D3 (1993)

Numerical Simulations of Two-dimensional and Three-dimensional Wind Accretion Flows of an Isothermal Gas. *Takanori Ishii, Takuya Matsuda, Eiji Shima, Mario Livio, Ulrich Anzer, & Gerhard Börner.* 404, 706, 37-F9 (1993)

Some Cautionary Remarks about Smoothed Particle Hydrodynamics. *Lars Hernquist.* 404, 717, 37-G7 (1993)

The Stability of Cosmic-Ray–dominated Shocks: A Secondary Instability. *Dongsu Ryu, Hyesung Kang, & T. W. Jones.* 405, 199, 43-E7 (1993)

Formation of the Circumstellar Shell around SN 1987A. *John M. Blondin & Peter Lundqvist.* 405, 337, 45-C13 (1993)

Large-Eddy Simulations of Compressible Convection on Massively Parallel Computers. *Xin Xie & Juri Toomre.* 405, 747, 52-D1 (1993)

Three-dimensional Hydrodynamical Calculations on the Fragmentation of Pancakes and Galaxy Formation. *Masayuki Umemura.* 406, 361, 62-B5 (1993)

Shock Propagation in a Turbulent Cloud. *Toshiya Kimura & Makoto Tosa.* 406, 512, 64-B10 (1993)

A Local Instability of Tidally Distorted Accretion Disks. *Jeremy Goodman.* 406, 596, 65-C8 (1993)

Fragmentation of Elongated Cylindrical Clouds. VI. Comparison with Observations. *Ian Bonnell & Pierre Bastien.* 406, 614, 65-E1 (1993)

Hydrodynamical Simulations of Rotating Stars. I. A Model for Subgrid-Scale Flow. *Maurice J. Clement.* 406, 651, 66-A3 (1993)

Hydrodynamic Instability and Coalescence of Close Binary Systems. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 406, L63, 68-D3 (1993)

The Impact of Supernova Fragments on the Evolution of Multisupernova Remnants. *J. Franco, A. Ferrara, M. Różyczka, G. Tenorio-Tagle, & D. P. Cox.* 407, 100, 70-C11 (1993)

Nonlinear Growth of Dynamical Overstabilities in Blast Waves. *Mordecai-Mark Mac Low & Michael L. Norman.* 407, 207, 71-E11 (1993)

A Theory of Nonlocal Mixing-Length Convection. I. The Moment Formalism. *Scott A. Grossman, Ramesh Narayan, & David Arnett.* 407, 284, 72-F1 (1993)

On the Solar Differential Rotation: Meridional Motions Associated with a Slowly Varying Angular Velocity. *Bernard R. Durney.* 407, 367, 73-E11 (1993)

Dynamical Instabilities in Two-Phase Media and the Minimum Masses of Stellar Systems. *Stephen D. Murray, Simon D. M. White, John M. Blondin, & Douglas N. C. Lin.* 407, 588, 77-G11 (1993)

When Clusters Collide: A Numerical Hydro/N-Body Simulation of Merging Galaxy Clusters. *Kurt Roettiger, Jack Burns, & Chris Loken.* 407, L53, 82-C1 (1993)

A Two-dimensional Relativistic (Γ = 3.25) Jet Simulation. *Maurice H. P. M. van Putten.* 408, L21, 88-G8 (1993)

Ionization Effects in Three-dimensional Solar Granulation Simulations. *Mark P. Rast, Åke Nordlund, Robert F. Stein, & Juri Toomre.* 408, L53, 89-D11 (1993)

Local Hydrodynamic Instability of Rotating Stars. *Alexander Lifschitz & Norman Lebovitz.* 408, 603, 92-F9 (1993)

The Injection and Acceleration of Particles in Oblique Shocks: A Unified Monte Carlo Description. *Matthew G. Baring, Donald C. Ellison, & Frank C. Jones.* 409, 327, 101-B8 (1993)

The Formation and Evolution of Shocks in Stellar Jets from a Variable Wind. *Patrick Hartigan & John Raymond.* 409, 705, 107-G5 (1993)

Two-dimensional Viscous Accretion Disk Models. II. On Viscous Overstability. *W. Kley, J. C. B. Papaloizou, & D. N. C. Lin.* 409, 739, 108-C6 (1993)

Collapse and Fragmentation of Molecular Cloud Cores. I. Moderately Centrally Condensed Cores. *Alan P. Boss.* 410, 157, 114-B1 (1993)

Hydrodynamics of Winds from Irradiated Companion Stars in Low-Mass X-Ray Binaries. *Marco Tavani & Richard London.* 410, 281, 115-E8 (1993)

Three-dimensional Simulations of Protostellar Jets. *Elisabete M. de Gouveia Dal Pino & Willy Benz.* 410, 686, 122-B13 (1993)

Stellar Core Collapse: A Boltzmann Treatment of Neutrino-Electron Scattering. *Anthony Mezzacappa & Stephen W. Bruenn.* 410, 740, 123-A7 (1993)

Tidal Disruptions by Supermassive Black Holes: Hydrodynamic Evolution of Stars on a Schwarzschild Background. *Pablo Laguna, Warner A. Miller, Wojciech H. Zurek, & Melvyn B. Davies.* 410, L83, 125-G9 (1993)

Hydrodynamic Models of the Cartwheel Ring Galaxy. *Curtis Struck-Marcell & James L. Higdon.* 411, 108, 128-D7 (1993)

The Formation of Protostellar Disks. I. 1 $M_{\odot}$. *Harold W. Yorke, Peter Bodenheimer, & Gregory Laughlin.* 411, 274, 130-E13 (1993)

Encounters between Binaries and Neutron Stars. *M. B. Davies, W. Benz, & J. G. Hills.* 411, 285, 130-F13 (1993)

Mg II and Lyα Fluxes in M Dwarfs: Evaluation of an Acoustic Model. *D. J. Mullan & Q. Q. Cheng.* 412, 312, 146-A9 (1993)

Collisions and Close Encounters between Massive Main-Sequence Stars. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 412, 593, 151-B7 (1993)

On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. II. Application to the Interstellar Medium. *Antonio Parravano, Miguel H. Ibáñez S., & César A. Mendoza B.* 412, 625, 151-E6 (1993)

An Implicit Method for Two-dimensional Hydrodynamics. *Eli Livne.* 412, 634, 151-F4 (1993)

Radio Emission from Young Supernova Remnants. II. Evolution and Dependence on Characteristics of the Progenitor and the External Medium. *John R. Dickel, Jean A. Eilek, & Eric M. Jones.* 412, 648, 151-G7 (1993)

On the Dynamical Buoyancy of Vortices. *Steve Arendt.* 412, 664, 152-A12 (1993)

The Stability of Accretion Tori. V. Unstable Modes and Avoided Crossings in Extended, Self-gravitating Annuli. *Dimitris M. Christodoulou.* 412, 696, 152-D13 (1993)

The Effects of Zonal Atmospheric Currents on the Spectra of Rotating Early-Type Stars. *Steven R. Cranmer & George W. Collins II.* 412, 720, 152-F12 (1993)

Hydrodynamical Simulations of Star-Gas Interactions in the Interstellar Medium with an External Gravitational Potential. *Alexander Rosen, Joel N. Bregman, & Michael L. Norman.* 413, 137, 157-G5 (1993)

Numerical Simulations of Protostellar Jets with Nonequilibrium Cooling. I. Method and Two-dimensional Results. *James M. Stone & Michael L. Norman.* 413, 198, 158-E6 (1993)

Numerical Simulations of Protostellar Jets with Nonequilibrium Cooling. II. Models of Pulsed Jets. *James M. Stone & Michael L. Norman.* 413, 210, 158-F13 (1993)

Anomalous Energy and Momentum Transfer of Intense Neutrinos in Supernova Explosions. *Tzihong Chiueh.* 413, L35, 162-E11 (1993)

Alfvén Wave Transport Effects in the Time Evolution of Parallel Cosmic-Ray–modified Shocks. *T. W. Jones.* 413, 619, 164-C1 (1993)

Interaction of a Jet with a Radiation Pressure–dominated Atmosphere: The Case of SS 433. *Nahum Arav & Mitchell C. Begelman.* 413, 700, 165-B8 (1993)

A Cosmological Hydrodynamic Code Based on the Total Variation Diminishing Scheme. *Dongsu Ryu, Jeremiah P. Ostriker, Hyesung Kang, & Renyue Cen.* 414, 1, 170-B1 (1993)

A Hydrodynamic Treatment of the Tilted Cold Dark Matter Cosmological Scenario. *Renyue Cen & Jeremiah P. Ostriker.* 414, 407, 176-C1 (1993)

Effects of Gas on the Global Stability of Galactic Disks: Radial Flows. *Isaac Shlosman & Masafumi Noguchi.* 414, 474, 177-B2 (1993)

Continuum Hydrodynamical Equations for Multiphase Astrophysical Flows. *S. Pistinner & G. Shaviv.* 414, 612, 178-G5 (1993)

A Hydrodynamical Model for the Explosion of a Neutron Star Just below the Minimum Mass. *Monica Colpi, Stuart L. Shapiro, & Saul A. Teukolsky.* 414, 717, 180-B10 (1993)

Equidistribution of Energy and Other Quantities in Oscillating Systems. *Charles L. Wolff.* 414, 892, 182-D4 (1993)

Gasdynamics of Relativistically Expanding Gamma-Ray Burst Sources: Kinematics, Energetics, Magnetic Fields, and Efficiency. *P. Mészáros, P. Laguna, & M. J. Rees.* 415, 181, 187-C7 (1993)

Convection above the Neutrinosphere in Type II Supernovae. *D. S. Miller, J. R. Wilson, & R. W. Mayle.* 415, 278, 188-D12 (1993)

Ellipsoidal Figures of Equilibrium: Compressible Models. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 88, 205, 43-A1 (1993)

A Hydrodynamic Approach to Cosmology: The Primeval Baryon Isocurvature Model. *Renyue Cen, Jeremiah P. Ostriker, & P. J. E. Peebles.* 415, 423, 193-B5 (1993)

Gravitational Collapse of an Isothermal Sphere. *Prudence N. Foster & Roger A. Chevalier.* 416, 303, 204-G8 (1993)

A Hydrodynamic Approach to Cosmology: Nonlinear Effects on Cosmic Backgrounds in the Cold Dark Matter Model. *Roberto Scaramella, Renyue Cen, & Jeremiah P. Ostriker.* 416, 399, 208-B9 (1993)

Structure and Circulation of Self-gravitating Toroids. *Yoshiharu Eriguchi & Ewald Müller.* 416, 666, 211-F6 (1993)

On the Angular Momentum Transport Associated with Convective Eddies in Accretion Disks. *W. Kley, J. C. B. Papaloizou, & D. N. C. Lin.* 416, 679, 211-G7 (1993)

On the Nonaxisymmetric Convective Instabilities in Accretion Disks. *D. N. C. Lin, J. C. B. Papaloizou, & W. Kley.* 416, 689, 212-A4 (1993)

Gravitational Radiation from Nonaxisymmetric Collisions of Neutron Stars. *Joan M. Centrella & Stephen L. W. McMillan.* 416, 719, 212-C10 (1993)

Simulation of Compressible Convection: A Comparative Study of Boundary Conditions. *Murshed Hossain & D. J. Mullan.* 416, 733, 212-E1 (1993)

A Theory of Supernova Explosions. *Adam Burrows & John Goshy.* 416, L75, 216-E1 (1993)

The Piecewise-Linear Predictor-Corrector Code: A Lagrangian-Remap Method for Astrophysical Flows. *Eric A. Lufkin & John F. Hawley.* 88, 569, 47-F9 (1993)

The Piecewise-Parabolic Method in Curvilinear Coordinates. *John M. Blondin & Eric A. Lufkin.* 88, 589, 48-A3 (1993)

Hydrodynamic Collimation of Precessing Jets. *W. Peter & D. Eichler.* 417, 170, 219-E3 (1993)

Evolution of the Solar Nebula. II. Thermal Structure during Nebula Formation. *Alan P. Boss.* 417, 351, 222-A1 (1993)

A Hydrodynamic Treatment of the Cold Dark Matter Cosmological Scenario with a Cosmological Constant. *Renyue Cen, Nickolay Y. Gnedin, & Jeremiah P. Ostriker.* 417, 387, 224-B5 (1993)

Cold Dark Matter Cosmogony with Hydrodynamics and Galaxy Formation: Galaxy Properties at Redshift Zero. *Renyue Cen & Jeremiah P. Ostriker.* 417, 415, 224-E1 (1993)

Propagation and Stability Properties of Radio Jets in Cluster Cooling Flow Atmospheres. *Chris Loken, Jack O. Burns, Michael L. Norman, & David A. Clarke.* 417, 515, 225-F9 (1993)

Smoothed Particle Hydrodynamics Confronts Theory: Formation of Standing Shocks in Accretion Disks and Winds around Black Holes. *Sandip K. Chakrabarti & Diego Molteni.* 417, 671, 227-F7 (1993)

A Single-Fluid, Self-consistent Formulation of Fluid Dynamics and Particle Transport. *L. L. Williams & J. R. Jokipii.* 417, 725, 228-D5 (1993)

Weak Tidal Encounters of a Star with a Massive Black Hole. *A. Khokhlov, I. D. Novikov, & C. J. Pethick.* 418, 163, 233-B1 (1993)

Strong Effects during Close Encounters of a Star with a Massive Black Hole. *A. Khokhlov, I. D. Novikov, & C. J. Pethick.* 418, 181, 233-C7 (1993)

A Convective Trigger for Supernova Explosions. *Adam Burrows & Burce A. Fryxell.* 418, L33, 238-D11 (1993)

On the Wave Excitation and a Generalized Torque Formula for Lindblad Resonances Excited by External Potential. *Paweł Artymowicz.* 419, 155, 248-B1 (1993)

Disk-Satellite Interaction via Density Waves and the Eccentricity Evolution of Bodies Embedded in Disks. *Paweł Artymowicz.* 419, 166, 248-C1 (1993)

Stability of Detonations in Supernovae. *A. M. Khokhlov.* 419, 200, 248-F5 (1993)

Compressible Convection with Ionization. I. Stability, Flow Asymmetries, and Energy Transport. *Mark P. Rast & Juri Toomre.* 419, 224, 249-A6 (1993)

Compressible Convection with Ionization. II. Thermal Boundary-Layer Instability. *Mark P. Rast & Juri Toomre.* 419, 240, 249-B10 (1993)

A Morphology-Cosmology Connection for X-Ray Clusters. *August E. Evrard, Joseph J. Mohr, Daniel G. Fabricant, & Margaret J. Geller.* 419, L9, 252-B13 (1993)

Steadily Rotating Perfect-Fluid Gravitating Prolate Spheroids in Newtonian Theory. *P. S. Florides & N. K. Spyrou.* 419, 541, 254-E1 (1993)

The Secondary Outburst Maximum of T Coronae Borealis: Hydrodynamic Simulations of the Blob and Accretion Disk. *Maximilian Ruffert, John K. Cannizzo, & Scott J. Kenyon.* 419, 780, 257-D1 (1993)

Flame Modeling in Supernovae. *A. Khokhlov.* 419, L77, 259-E1 (1993)

Protostellar Hydrodynamics: Constructing and Testing a Spatially and Temporally Second-Order Accurate Method. II. Cartesian Coordinates. *Elizabeth A. Myhill & Alan P. Boss.* 89, 345, 54-C12 (1993)

A Theory of Nonlocal Mixing-Length Convection. II. Generalized Smoothed Particle Hydrodynamics Simulations. *Scott A. Grossman & Ramesh Narayan.* 89, 361, 54-E1 (1993)

Mass Stripping of Lyman-Alpha Clouds by Ram Pressure under the Minihalo Model. *Izumi Murakami & Satoru Ikeuchi.* 420, 68, 1-G8 (1994)

Higher Order Godunov Schemes for Isothermal Hydrodynamics. *Dinshaw S. Balsara.* 420, 197, 3-D1 (1994)

On the Hydrodynamic Interaction of Shock Waves with Interstellar Clouds. I. Nonradiative Shocks in Small Clouds. *Richard I. Klein, Christopher F. McKee, & Philip Colella.* 420, 213, 3-E5 (1994)

Numerical Simulations of Protostellar Jets with Nonequilibrium Cooling. III. Three-dimensional Results. *James M. Stone & Michael L. Norman.* 420, 237, 3-G4 (1994)

Hydrodynamic Instability and Coalescence of Binary Neutron Stars. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 420, 811, 13-A10 (1994)

Penetration below a Convection Zone. *Neal E. Hurlburt, Juri Toomre, Josep M. Massaguer, & Jean-Paul Zahn.* 421, 245, 19-A12 (1994)

Slender Elliptical Jets. *Michael D. Smith.* 421, 400, 23-B11 (1994)

Formation, Early Evolution, and Gravitational Stability of Protoplanetary Disks. *Taishi Nakamoto & Yoshitsugu Nakagawa.* 421, 640, 26-C1 (1994)

Two-Fluid Simulations of Galaxy Formation. *August E. Evrard, F. J. Summers, & Marc Davis.* 422, 11, 30-B14 (1994)

Nonlinear Evolution of Tidally Distorted Accretion Disks: Two-dimensional Simulations. *Dongsu Ryu & Jeremy Goodman.* 422, 269, 33-D10 (1994)

The Aftermath of Tidal Disruption: The Dynamics of Thin Gas Streams. *Christopher S. Kochanek.* 422, 508, 38-B11 (1994)

Forces on Magnetic Flux Tubes Moving in Inhomogeneous Flows. *F. Moreno-Insertis, A. Ferriz-Mas, & M. Schüssler.* 422, 652, 40-A5 (1994)

A New Radiation Hydrodynamics Code and Application to the Calculation of Type Ia Supernovae Light Curves and Continuum Spectra. *Xiao-he Zhang & Peter Sutherland.* 422, 719, 40-G1 (1994)

Double-Core Evolution. V. Three-dimensional Effects in the Merger of a Red Giant with a Dwarf Companion. *James L. Terman, Ronald E. Taam, & Lars Hernquist.* 422, 729, 40-G13 (1994)

Vortex Rings and the Solar Granulation. *Steve Arendt.* 422, 862, 42-E9 (1994)

The Evolution of Nonlinear Subhorizon-Scale Entropy Fluctuations in the Early Universe. *Karsten Jedamzik & George M. Fuller.* 423, 33, 46-E2 (1994)

Inhomogeneous Primordial Nucleosynthesis: Coupled Nuclear Reactions and Hydrodynamic Dissipation Processes. *Karsten Jedamzik, George M. Fuller, & Grant J. Mathews.* 423, 50, 46-F9 (1994)

Long-Term Hydrodynamical Simulations of Extragalactic Radio Jets. *Jagbir S. Hooda, Arun V. Mangalam, & Paul J. Wiita.* 423, 116, 47-E5 (1994)

Equilibrium, Stability, and Orbital Evolution of Close Binary Systems. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 423, 344, 50-D9 (1994)

X-Ray Emission from a Simulated Cluster of Galaxies. *John C. Tsai, Neal Katz, & Edmund Bertschinger.* 423, 553, 55-D4 (1994)

Hierarchical Structure in Nearly Pressureless Flows as a Consequence of Self-similar Statistics. *Enrique Vázquez-Semadeni.* 423, 681, 57-A12 (1994)

A Numerical Study of Viscous Flows in Axisymmetric α-Accretion Disks. *Michał Różyczka, Peter Bodenheimer, & K. R. Bell.* 423, 736, 57-F10 (1994)

On the Acceleration of Nuclear Flame Fronts in White Dwarfs. *F. X. Timmes.* 423, L131, 61-B5 (1994)

Fueling Nuclear Activity in Disk Galaxies: Starbursts and Monsters. *Clayton H. Heller & Isaac Shlosman.* 424, 84, 63-B1 (1994)

On Jet Response to a Driving Frequency and the Jets in 3C 449. *Philip E. Hardee, Michael A. Cooper, & David A. Clarke.* 424, 126, 63-E7 (1994)

Time-dependent Evolution of Cosmic-Ray–modified Shock Structure: Transition to Steady State. *D. J. Donohue, G. P. Zank, & G. M. Webb.* 424, 263, 65-B9 (1994)

Test Problems for Radiation and Radiation-Hydrodynamics Codes. *Lisa Ensman.* 424, 275, 65-C9 (1994)

On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. III. Molecular Gas. *Miguel H. Ibáñez S., & Antonio Parravano.* 424, 763, 74-C8 (1994)

Close Encounters of the Third-Body Kind. *M. B. Davies, W. Benz, & J. G. Hills.* 424, 870, 75-E8 (1994)

Two-dimensional Hydrodynamical Simulations of Wind-compressed Disks around Rapidly Rotating B Stars. *Stanley P. Owocki, Steven R. Cranmer, & John M. Blondin.* 424, 887, 75-G2 (1994)

Analysis of the Early Spectra and Light Curve of SN 1987A. *Peter H. Hauschildt & Lisa M. Ensman.* 424, 905, 76-A10 (1994)

X-Ray Enhancement of SN 1987A Due to Interaction with Its Ringlike Nebula. *Kuniaki Masai & Ken'ichi Nomoto.* 424, 924, 76-C3 (1994)

Supernovae Deflagrations in Three Dimensions. *A. Khokhlov.* 424, L115, 79-D1 (1994)

Simulation of Thick Accretion Disks with Standing Shocks by Smoothed Particle Hydrodynamics. *Diego Molteni, Giuseppe Lanzafame, & Sandip K. Chakrabarti.* 425, 161, 82-B13 (1994)

Nickel Bubble Instability and Mixing in SN 1987A. *Mikhail Basko.* 425, 264, 83-E5 (1994)

Differential Rotation and Turbulent Convection: A New Reynolds Stress Model and Comparison with Solar Data. *V. M. Canuto, F. O. Minotti, & O. Schilling.* 425, 303, 84-A9 (1994)

Postexplosion Hydrodynamics of Supernovae in Red Supergiants. *Marc Herant & S. E. Woosley.* 425, 814, 91-G12 (1994)

Evidence for Supersonic Downflows in the Photosphere of a Delta Sunspot. *V. Martínez Pillet, B. W. Lites, A. Skumanich, & D. Degenhardt.* 425, L113, 95-A1 (1994)

Momentum Transfer by Astrophysical Jets. *Lawrence Chernin, Colin Masson, Elisabete M. de Gouveia Dal Pino, & Willy Benz.* 426, 204, 98-F2 (1994)

Structure of Steady State Accretion Shocks with Several Cooling Functions: Closed Integral-Form Solution. *Kinwah Wu, G. Chanmugan, & G. Shaviv.* 426, 664, 106-F5 (1994)

Evolution of Solitary Density Waves in Stellar Winds of Early-Type Stars: A Simple Explanation of Discrete Absorption Component Behavior. *Wayne L. Waldron, Larry Klein, & Bruce Altner.* 426, 725, 107-D10 (1994)

The Delayed-Detonation Model of Type Ia Supernovae I. The Deflagration Phase. *David Arnett & Eli Livne.* 427, 314, 113-G4 (1994)

The Delayed-Detonation Model of Type Ia Supernovae. II. The Detonation Phase. *David Arnett & Eli Livne.* 427, 330, 114-A7 (1994)

Three-dimensional Hydrodynamic Bondi-Hoyle Accretion. I. Code Validation and Stationary Accretors. *Maximilian Ruffert.* 427, 342, 114-B7 (1994)

Three-dimensional Hydrodynamic Bondi-Hoyle Accretion. II. Homogeneous Medium at Mach 3 with $\gamma = 5/3$. *Maximilian Ruffert & David Arnett.* 427, 351, 114-C3 (1994)

On the Existence of a Surface Boundary Layer in a Slowly Rotating, Early-Type Star. *Monique Tassoul.* 427, 388, 114-F3 (1994)

The Role of Radiative Acceleration in Outflows from Broad Absorption Line QSOs. I. Comparison with O Star Winds. *Nahum Arav & Zhi-Yun Li.* 427, 700, 121-D7 (1994)

Oxygen-burning Hydrodynamics. I. Steady Shell Burning. *David Arnett.* 427, 932, 124-C2 (1994)

The Coma Cluster after Lunch: Has a Galaxy Group Passed through the Cluster Core? *Jack O. Burns, Kurt Roettiger, Michael Ledlow, & Anatoly Klypin.* 427, L87, 127-A5 (1994)

Hot Gas in the Cold Dark Matter Scenario: X-Ray Clusters from a High-Resolution Numerical Simulation. *Hyesung Kang, Renyue Cen, Jeremiah P. Ostriker, & Dongsu Ryu.* 428, 1, 128-C1 (1994)

Nonlinear Instabilities in Shock-bounded Slabs. *Ethan T. Vishniac.* 428, 186, 130-E1 (1994)

Advection-dominated Accretion: A Self-similar Solution. *Ramesh Narayan & Insu Yi.* 428, L13, 134-C5 (1994)

X-Ray Clusters from a High-Resolution Hydrodynamic PPM Simulation of the Cold Dark Matter Universe. *Greg L. Bryan, Renyue Cen, Michael L. Norman, Jeremiah P. Ostriker, & James M. Stone.* 428, 405, 135-C1 (1994)

Flat Rotation Curves: A Result of the Helical Inverse Cascade in Turbulent Media? *R. D. Prabhu & V. Krishan.* 428, 483, 136-B13 (1994)

X-Ray Clusters in a Cold Dark Matter + Λ Universe: A Direct, Large-Scale, High-Resolution, Hydrodynamic Simulation. *Renyue Cen & Jeremiah P. Ostriker.* 429, 4, 144-C6 (1994)

Nonlinear Hydrodynamics of Cosmological Sheets. I. Numerical Techniques and Tests. *Wenbo Y. Anninos & Michael L. Norman.* 429, 434, 151-B10 (1994)

On the X-Ray Spectrum of Kepler's Supernova Remnant. *Kazimierz J. Borkowski, Craig L. Sarazin, & John M. Blondin.* 429, 710, 154-E1 (1994)

A General Class of Self-similar Self-gravitating Fluids. *Ue-Li Pen.* 429, 759, 155-B2 (1994)

A Comparison of Cosmological Hydrodynamic Codes. *Hyesung Kang, Jeremiah P. Ostriker, Renyue Cen, Dongsu Ryu, Lars Hernquist, August E. Evrard, Greg L. Bryan, & Michael L. Norman.* 430, 83, 160-A12 (1994)

The Radiation Gasdynamics of Planetary Nebulae. IV. From the Owl to the Eskimo. *Adam Frank & Garrelt Mellema.* 430, 800, 171-G5 (1994)

The Structure and Evolution of Lyman-Alpha Forest Clouds in the Minihalo Model. *Avery Meiksin.* 431, 109, 177-E3 (1994)

Double Core Evolution. VI. Effects of Gravitational Torques. *Ronald E. Taam, Peter Bodenheimer, & Michał Różyczka.* 431, 247, 179-B13 (1994)

Causality in Strong Shear Flows. *Ramesh Narayan, Abraham Loeb, & Pawan Kumar.* 431, 359, 180-E4 (1994)

A Hydrodynamic Approach to Cosmology: The Mixed Dark Matter Cosmological Scenario. *Renyue Cen & Jeremiah P. Ostriker.* 431, 451, 184-C1 (1994)

The Effect of Dissipation on the Shapes of Dark Halos. *John Dubinski.* 431, 617, 186-C3 (1994)

Merging Neutron Stars. I. Initial Results for Coalescence of Noncorotating Systems. *M. B. Davies, W. Benz, T. Piran, & F. K. Thielemann.* 431, 742, 187-G1 (1994)

Smoothed Particle Hydrodynamics: Physical Viscosity and the Simulation of Accretion Disks. *O. Flebbe, S. Münzel, H. Herold, H. Riffert, & H. Ruder.* 431, 754, 188-A1 (1994)

Collapse of Primordial Gas Clouds and the Formation of Quasar Black Holes. *Abraham Loeb & Frederic A. Rasio.* 432, 52, 193-G8 (1994)

Cosmic Bullets as Particle Accelerators and Radio Sources. *T. W. Jones, Hyesung Kang, & I. L. Tregillis.* 432, 194, 195-E11 (1994)

Hydrodynamics of Binary Coalescence. I. Polytropes with Stiff Equations of State. *Frederic A. Rasio & Stuart L. Shapiro.* 432, 242, 196-C2 (1994)

On the Thermochemical Stability of the Pregalactic Gas. I. The Equilibrium States. *Patricia Rosenzweig, Antonio Parravano, Miguel H. Ibáñez S., & Yu. I. Izotov.* 432, 485, 202-A7 (1994)

Causally Limited Viscosity and the Stability Properties of Isothermal Accretion Disks. *Xue-Bing Wu & Lan-Tian Yang.* 432, 672, 204-D3 (1994)

Relativistic Tidal Interaction of a White Dwarf with a Massive Black Hole. *V. P. Frolov, A. M. Khokhlov, I. D. Novikov, & C. J. Pethick.* 432, 680, 204-D13 (1994)

Chromospheric Heating and Metal Deficiency in Cool Giants: Theoretical Results versus Observations. *M. Cuntz, W. Rammacher, & P. Ulmschneider.* 432, 690, 204-E12 (1994)

Thermonuclear Runaways in Nova Outbursts. II. Effect of Strong, Instantaneous, Local Fluctuations. *Anurag Shankar & David Arnett.* 433, 216, 211-A8 (1994)

Winds from Neutron Stars and Strong Type I X-Ray Bursts. *Luciano Nobili, Roberto Turolla, & Iosif Lapidus.* 433, 276, 211-F11 (1994)

Convection, Nucleosynthesis, and Core Collapse. *Grant Bazan & David Arnett.* 433, L41, 215-B9 (1994)

Generation of Spatial Structures by Nonlinear Mass-Exchange Processes in a Multicomponent Rotating Disk. *V. I. Korchagin & A. D. Ryabtsev.* 433, 520, 217-D9 (1994)

Shock Interactions with Magnetized Interstellar Clouds. I. Steady Shocks Hitting Nonradiative Clouds. *Mordecai-Mark Mac Low, Christopher F. McKee, Richard I. Klein, James M. Stone, & Michael L. Norman.* 433, 757, 220-E2 (1994)

Stability of Fireballs and Gamma-Ray Bursts. *Eli Waxman & Tsvi Piran.* 433, L85, 224-A9 (1994)

A Numerical Simulation of a Variable Velocity Jet. *S. Biro & A. C. Raga.* 434, 221, 228-D11 (1994)

Radiative Shock Overstability of Finite-sized Objects. *Ruth Dgani & Noam Soker.* 434, 262, 229-A11 (1994)

A Three-dimensional Hydrodynamics Code for Modeling Sources of Gravitational Radiation. *Scott C. Smith, Joan M. Centrella, & Sean P. Clancy.* 94, 789, 62-G3 (1994)

Pseudomoment Stellar Dynamics. I. Spheroidal Galactic Equilibria. *Peter Amendt & Phil Cuddeford.* 435, 93, 244-E12 (1994)

Multiple Outflow Episodes from Protostars: Three-dimensional Models of Intermittent Jets. *Elisabete M. de Gouveia Dal Pino & Willy Benz.* 435, 261, 246-G11 (1994)

Inside the Supernova: A Powerful Convective Engine. *Marc Herant, Willy Benz, W. Raphael Hix, Chris L. Fryer, & Stirling A. Colgate.* 435, 339, 248-B3 (1994)

The Shadow Wind in High-Mass X-Ray Binaries. *John M. Blondin.* 435, 756, 256-D13 (1994)

Low-Frequency Modes and Nonbarotropic Effects in Pseudo-Newtonian Accretion Disks. *James R. Ipser.* 435, 767, 256-E13 (1994)

Dripping Handrails and the Quasi-periodic Oscillations of the AM Herculis Objects. *Thomas Y. Steiman-Cameron, Karl Young, Jeffrey D. Scargle, James P. Crutchfield, James N. Imamura, Michael T. Wolff, & Kent S. Wood.* 435, 775, 256-F10 (1994)

Polar Plumes and the Solar Wind. *Y.-M. Wang.* 435, L153, 260-E4 (1994)

Hierarchical Numerical Cosmology with Hydrodynamics: Methods and Code Tests. *Peter Anninos, Michael L. Norman, & David A. Clarke.* 436, 11, 261-D3 (1994)

Simulation of Interactions of an Orbiting Compact Star with an Accretion Disk by Smoothed Particle Hydrodynamics. *Diego Molteni, G. Gerardi, & Sandip K. Chakrabarti.* 436, 249, 264-F1 (1994)

On the Effects of Tidal Interaction on Thin Accretion Disks: An Analytic Study. *R. Dgani, M. Livio, & O. Regev.* 436, 270, 265-A6 (1994)

Nonaxisymmetric Evolution in Protostellar Disks. *Gregory Laughlin & Peter Bodenheimer.* 436, 335, 265-G13 (1994)

Synthesized Spectra of Turbulent Clouds. *E. Falgarone, D. C. Lis, T. G. Phillips, A. Pouquet, D. H. Porter, & P. R. Woodward.* 436, 728, 275-E1 (1994)

Simulations of Relativistic Extragalactic Jets. *G. Comer Duncan & Philip A. Hughes.* 436, L119, 280-G1 (1994)

The Evolution of X-Ray Clusters in a Cold Plus Hot Dark Matter Universe. *Greg L. Bryan, Anatoly Klypin, Chris Loken, Michael L. Norman, & Jack O. Burns.* 437, L5, 291-B8 (1994)

Gravitational Collapse of Small-Scale Structure as the Origin of the Lyman-Alpha Forest. *Renyue Cen, Jordi Miralda-Escudé, Jeremiah P. Ostriker, & Michael Rauch.* 437, L9, 291-C1 (1994)

Two Types of Slow Solar Wind. *Y.-M. Wang.* 437, L67, 292-D1 (1994)

Star-forming Galaxy Models: Blending Star Formation into TREESPH. *J. Christopher Mihos & Lars Hernquist.* 437, 611, 294-B9 (1994)

Hydrodynamics of Rotating Stars and Close Binary Interactions: Compressible Ellipsoid Models. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 437, 742, 295-G13 (1994)

Rotating Cooling Flows. *Wilhelm Kley & William G. Mathews.* 438, 100, 2-F4 (1995)

Inertial Confinement of Astrophysical Jets. *W. Peter & D. Eichler.* 438, 244, 4-F11 (1995)

Critical Angular Velocities of Rotating Neutron Stars. *Lee Lindblom.* 438, 265, 5-B4 (1995)

Jeans Mass for Anisotropic Matter. *L. Herrera & N. O. Santos.* 438, 308, 5-F7 (1995)

Galactic Cosmic-Ray Mediation of a Spherical Solar Wind Flow. I. The Steady State Cold Gas Hydrodynamical Approximation. *J. A. le Roux & V. S. Ptuskin.* 438, 427, 7-D2 (1995)

On the Dynamics of Warped Accretion Disks. *J. C. B. Papaloizou & D. N. C. Lin.* 438, 841, 15-G2 (1995)

Hydrodynamics of Binary Coalescence. II. Polytropes with Γ = 5/3. *Frederic A. Rasio & Stuart L. Shapiro.* 438, 887, 16-D1 (1995)

X-Ray Emission from Giant H II Regions in M101. *Rosa Murphy Williams & You-Hua Chu.* 439, 132, 23-A9 (1995)

Collapse and Fragmentation of Molecular Cloud Cores. II. Collapse Induced by Stellar Shock Waves. *Alan P. Boss.* 439, 224, 24-C7 (1995)

Interstellar Clouds in High-Speed, Supersonic Flows: Two-dimensional Simulations. *A. V. R. Schiano, Wayne A. Christiansen, & Jeffrey M. Knerr.* 439, 237, 24-D9 (1995)

Equipartition of Energy for Turbulent Astrophysical Fluids: Accounting for the Unseen Energy in Molecular Clouds. *Ellen G. Zweibel & Christopher F. McKee.* 439, 779, 35-C13 (1995)

Smoothed Particle Interpolation. *Pablo Laguna.* 439, 814, 35-G2 (1995)

A Method of Smoothed Particle Hydrodynamics Using Spheroidal Kernels. *Michael S. Fulbright, Willy Benz, & Melvyn B. Davies.* 440, 254, 44-F4 (1995)

Does a Nonmagnetic Solar Chromosphere Exist? *Mats Carlsson & Robert F. Stein.* 440, L29, 48-E8 (1995)

Global Models of the Interstellar Medium in Disk Galaxies. *Alexander Rosen & Joel N. Bregman.* 440, 634, 52-A2 (1995)

Oscillatory Modes in Near-critical Accretion Flows. *Guy S. Miller & Myeong-Gu Park.* 440, 771, 53-F11 (1995)

Meridional Circulation in Rotating Stars. XI. Single-Cell Pattern versus Double-Cell Pattern. *Monique Tassoul & Jean-Louis Tassoul.* 440, 789, 54-A4 (1995)

Convergence Properties of Finite-Difference Hydrodynamics Schemes in the Presence of Shocks. *Paul A. Kimoto & David F. Chernoff.* 96, 627, 10-D9 (1995)

Simulation of the Instability of Mach 2 and Mach 4 Gaseous Jets in Two and Three Dimensions. *Gene M. Bassett & Paul R. Woodward.* 441, 582, 70-B1 (1995)

The Stability and Collimation of Three-dimensional Jets. *Philip E. Hardee, David A. Clarke, & D. Andrew Howell.* 441, 644, 71-A1 (1995)

The Homunculus of η Carinae: An Interacting Stellar Winds Paradigm. *Adam Frank, Bruce Balick, & Kris Davidson.* 441, L77, 76-B2 (1995)

Hot Gas in Superclusters and Microwave Background Distortions. *Fred M. Persi, David N. Spergel, Renyue Cen, & J. P. Ostriker.* 442, 1, 77-C1 (1995)

Gravitational Radiation from Rapidly Rotating Nascent Neutron Stars. *Dong Lai & Stuart L. Shapiro.* 442, 259, 80-F11 (1995)

Gravity Waves in the Lower Solar Corona. *Yu-Qing Lou.* 442, 401, 82-E1 (1995)

Hydrodynamic Simulations of Galaxy Formation. I. Dissipation and the Maximum Mass of Galaxies. *Anne A. Thoul & David H. Weinberg.* 442, 480, 86-E5 (1995)

The Radial-azimuthal Instability of Accretion Disks. I. Radiation Pressure Domination. *Xue-Bing Wu, Qi-Bin Li, Yong-Heng Zhao, & Lan-Tian Yang.* 442, 736, 90-C10 (1995)

The Radial-azimuthal Instability of Accretion Disks. II. Gas Pressure Domination. *Xue-Bing Wu, Qi-Bin Li, Yong-Heng Zhao, & Lan-Tian Yang.* 442, 743, 90-D7 (1995)

Contact and Pressure Balance Structures in Two-Fluid Cosmic-Ray Hydrodynamics. *G. M. Webb, M. Brio, G. P. Zank, & T. Story.* 442, 822, 91-E2 (1995)

Analysis of the Type Ia Supernova SN 1994D. *P. Höflich.* 443, 89, 96-D9 (1995)

The Formation of Protostellar Disks. II. Disks around Intermediate-Mass Stars. *Harold W. Yorke, Peter Bodenheimer, & Gregory Laughlin.* 443, 199, 97-G7 (1995)

Oscillation-Convection Coupling: Cause of Supergranulation? *Charles L. Wolff.* 443, 423, 100-G12 (1995)

A New Criterion for Bar-forming Instability in Rapidly Rotating Gaseous and Stellar Systems. I. Axisymmetric Form. *Dimitris M. Christodoulou, Isaac Shlosman, & Joel E. Tohline.* 443, 551, 105-D8 (1995)

A New Criterion for Bar-forming Instability in Rapidly Rotating Gaseous and Stellar Systems. II. Nonaxisymmetric Form. *Dimitris M. Christodoulou, Isaac Shlosman, & Joel E. Tohline.* 443, 563, 105-E10 (1995)

Hydrodynamics of Coalescing Binary Neutron Stars: Ellipsoidal Treatment. *Dong Lai & Stuart L. Shapiro.* 443, 705, 107-E12 (1995)

Computing Supernova Collapse to Neutron Stars and Black Holes. *Thomas W. Baumgarte, Stuart L. Shapiro, & Saul A. Teukolsky.* 443, 717, 107-F13 (1995)

The Striking Near-Infrared Morphology of the Inner Region in M100. *J. H. Knapen, J. E. Beckman, I. Shlosman, R. F. Peletier, C. H. Heller, & R. S. de Jong.* 443, L73, 111-G3 (1995)

Softened Lagrangian Hydrodynamics for Cosmology. *Nickolay Y. Gnedin.* 97, 231, 15-B1 (1995)

Advection-dominated Accretion: Self-Similarity and Bipolar Outflows. *Ramesh Narayan & Insu Yi.* 444, 231, 116-F1 (1995)

Hydrodynamic Instabilities in Supernova Remnants: Early Radiative Cooling. *Roger A. Chevalier & John M. Blondin.* 444, 312, 117-F11 (1995)

Hydrodynamics of Semiconvection. *William J. Merryfield.* 444, 318, 117-G7 (1995)

On Orbital Circularization in Late-Type Close Binaries. *Jean-Louis Tassoul.* 444, 338, 118-B8 (1995)

The Minimum Mass Ratio of W Ursae Majoris Binaries. *Frederic A. Rasio.* 444, L41, 121-G1 (1995)

Does Gravitational Radiation Limit the Angular Velocities of Superfluid Neutron Stars? *Lee Lindblom & Gregory Mendell.* 444, 804, 127-E6 (1995)

Delayed Detonation Models for Normal and Subluminous Type Ia Supernovae: Absolute Brightness, Light Curves, and Molecule Formation. *P. Höflich, A. M. Khokhlov, & J. C. Wheeler.* 444, 831, 128-A1 (1995)

Radio Jet Propagation and Wide-Angle Tailed Radio Sources in Merging Galaxy Cluster Environments. *Chris Loken, Kurt Roettiger, Jack O. Burns, & Michael Norman.* 445, 80, 133-D11 (1995)

Double Core Evolution. VII. The Infall of a Neutron Star through the Envelope of Its Massive Star Companion. *James L. Terman, Ronald E. Taam, & Lars Hernquist.* 445, 367, 137-E9 (1995)

A General Physicochemical Model of the Inner Coma of Active Comets. I. Implications of Spatially Distributed Gas and Dust Production. *J. F. Crifo.* 445, 470, 139-A12 (1995)

Numerical Simulations of Stratified Compressible Convection with Internal Heating and Disklike Variable Gravity. *W. Cabot, K. W. Thompson, & J. B. Pollack.* 98, 315, 26-C4 (1995)

Implicit General Relativistic Hydrodynamic Methods for Modeling the Late-Time Explosion Mechanism in Core Collapse Supernovae. *F. Douglas Swesty.* 445, 811, 146-D4 (1995)

Wind Dynamics in SMC X-1. I. Hydrodynamic Simulation. *John M. Blondin & Jonathan W. Woo.* 445, 889, 147-D13 (1995)

Hydrodynamic Simulations of the Mass Transfer in Algol. *John M. Blondin, Mercedes T. Richards, & Michael L. Malinowski.* 445, 939, 148-B13 (1995)

On Blue Straggler Formation by Direct Collisions of Main-Sequence Stars. *James C. Lombardi, Jr., Frederic A. Rasio, & Stuart L. Shapiro.* 445, L117, 151-C1 (1995)

Phase-Transition Theory of Instabilities. I. Second-Harmonic Instability and Bifurcation Points. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 472, 162-E12 (1995)

Phase-Transition Theory of Instabilities. III. The Third-Harmonic Bifurcation on the Jacobi Sequence and the Fission Problem. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 500, 163-A8 (1995)

Phase-Transition Theory of Instabilities. IV. Critical Points on the Maclaurin Sequence and Nonlinear Fission Processes. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 510, 163-B7 (1995)

The Weakening of the Termination Shocks of Isothermal Winds by Mass Loading. *R. J. R. Williams, T. W. Hartquist, & J. E. Dyson.* 446, 759, 166-E4 (1995)

The Origin of the Rings around SN 1987A: An Evaluation of the Interacting-Winds Model. *Crystal L. Martin & David Arnett.* 447, 378, 177-E11 (1995)

Vorticity and Divergence in the Solar Photosphere. *Yi Wang, Robert W. Noyes, Theodore D. Tarbell, & Alan M. Title.* 447, 419, 178-C1 (1995)

Destabilization of Compressible Convection by Radiation: Quantitative Evaluation. *Q. Q. Cheng, Murshed Hossain, & D. J. Mullan.* 447, 789, 186-G6 (1995)

The Dynamics of Two-dimensional Local and Finite Perturbations in Envelopes of Rotating White Dwarfs. I. *Patrick Godon & Giora Shaviv.* 447, 797, 187-A3 (1995)

Diffusive Shock Acceleration Simulations: Comparison with Particle Methods and Bow Shock Measurements. *Hyesung Kang & T. W. Jones.* 447, 944, 188-G13 (1995)

On the Origin of the Observed Knots in Novae. *Shlomi Pistinner & Giora Shaviv.* 448, L37, 199-G8 (1995)

Protostellar Collapse with a Shock. *John C. Tsai & Juliana J. L. Hsu.* 448, 774, 205-D8 (1995)

Hydrodynamic Studies of Accretion onto Massive White Dwarfs: ONeMg-enriched Nova Outbursts. I. Dependence on White Dwarf Mass. *M. Politano, S. Starrfield, J. W. Truran, A. Weiss, & W. M. Sparks.* 448, 807, 206-A11 (1995)

Numerical Techniques for Three-dimensional Smoothed Particle Hydrodynamics Simulations: Applications to Accretion Disks. *James C. Simpson.* 448, 822, 206-C1 (1995)

Magnetic Buoyancy, Vorticity, and Three-dimensional Flux-Tube Formation. *P. C. Matthews, D. W. Hughes, & M. R. E. Proctor.* 448, 938, 207-G11 (1995)

Morphology and Dynamics of Highly Supersonic Relativistic Jets. *J. M^a. Martí, E. Müller, J. A. Font, & J. M^a. Ibá nez.* 448, L105, 209-D1 (1995)

The First Second of a Type II Supernova: Convection, Accretion, and Shock Propagation. *H.-Thomas Janka & Ewald Müller.* 448, L109, 209-D9 (1995)

Destabilization of Strongly Magnetized Jets. *Philip E. Hardee & David A. Clarke.* 449, 119, 211-G4 (1995)

Parsec-Scale Synchrotron Emission from Hydrodynamic Relativistic Jets in Active Galactic Nuclei. *J. L. Gómez, J. M^a. Martí, A. P. Marscher, J. M^a. Ibáñez, & J. M. Marcaide.* 449, L19, 216-C3 (1995)

Numerical Analysis of the Dynamic Stability of Radiative Shocks. *Russell Strickland & John M. Blondin.* 449, 727, 222-G5 (1995)

Structure of a Fluid Disk around a Magnetized Compact Object in the Presence of a Self-consistent Toroidal Magnetic Field. *D. Banerjee, J. R. Bhatt, A. C. Das, & A. R. Prasanna.* 449, 789, 223-E12 (1995)

Nonlinear Hydrodynamics of Cosmological Sheets. II. Fragmentation and the Gravitational, Cooling, and Thin-Shell Instabilities. *Wenbo Y. Anninos, Michael L. Norman, & Peter Anninos.* 450, 1, 228-B1 (1995)

Smooth Particle Hydronamics Simulations of Deflagrations in Supernovae. *E. Bravo & D. García-Senz.* 450, L17, 234-E12 (1995)

Photoevaporation of Dusty Clouds near Active Galactic Nuclei. *Edward A. Pier & G. Mark Voit.* 450, 628, 239-D13 (1995)

The Disruption of Molecular Cloud Cores by Photoionization. *J. A. Rodríguez-Gaspar, G. Tenorio-Tagle, & J. Franco.* 451, 210, 248-G10 (1995)

Collapse and Fragmentation of Molecular Cloud Cores. III. Initial Differential Rotation. *Alan P. Boss & Elizabeth A. Myhill.* 451, 218, 249-A6 (1995)

Double Core Evolution. VIII. The Spiral-in of a Main-Sequence Star through the Envelope of an Asymptotic Giant Branch Companion. *Harold W. Yorke, Peter Bodenheimer, & Ronald E. Taam.* 451, 308, 250-B8 (1995)

Vortices in Circumstellar Disks. *Fred C. Adams & Richard Watkins.* 451, 314, 250-C3 (1995)

Long-Period Cepheids: Models and Observations. *Norman R. Simon & Shashi M. Kanbur.* 451, 703, 256-G10 (1995)

Thermal Instability and Pulsations of the Flame Front in White Dwarfs. *Vitaliy V. Bychkov & Michael A. Liberman.* 451, 711, 257-A7 (1995)

Seismology of the Solar *f*-Mode. I. Basic Signatures of Shearing Velocity Fields. *Pranab Ghosh, H. M. Antia, & S. M. Chitre.* 451, 851, 259-A1 (1995)

Explosions of Sub–Chandrasekhar Mass White Dwarfs in Two Dimensions. *Eli Livne & David Arnett.* 452, 62, 263-A6 (1995)

Stable and Unstable Accretion Flows with Angular Momentum near a Point Mass. *Dongsu Ryu, Garry L. Brown, Jeremiah P. Ostriker, & Abraham Loeb.* 452, 364, 267-B7 (1995)

On Thermal Hydrodynamical Models of Solar Flares with a High Initial Coronal Density. *W. Q. Gan, C. C. Cheng, & C. Fang.* 452, 445, 268-B11 (1995)

Microscopic Instabilities of Nuclear Flames in Type Ia Supernovae. *J. C. Niemeyer & W. Hillebrandt.* 452, 779, 275-C12 (1995)

Hydra: An Adaptive-Mesh Implementation of P^{3}M-SPH. *H. M. P. Couchman, P. A. Thomas, & F. R. Pearce.* 452, 797, 275-E11 (1995)

On the Hot Gas Fraction in Supernova Remnants. *Uffe Hellsten & Jesper Sommer-Larsen.* 453, 264, 284-F10 (1995)

The Solution Topology of Radiation-driven Winds. I. The X-Type Nature of the CAK Critical Point. *J. E. Bjorkman.* 453, 369, 286-B13 (1995)

On the Origin of Temperature Substructure within Merging Clusters of Galaxies: Abell 2256. *Kurt Roettiger, Jack O. Burns, & Jason Pinkney.* 453, 634, 292-E11 (1995)

On the Global Stability of Magnetized Accretion Disks. II. Vertical and Azimuthal Magnetic Fields. *Charles Curry & Ralph E. Pudritz.* 453, 697, 293-D6 (1995)

Heat Flux and Viscosity of Protons in the Collisionless Solar Wind. *L. L. Williams.* 453, 953, 297-B6 (1995)

A Multispecies Model for Hydrogen and Helium Absorbers in Lyman-Alpha Forest Clouds. *Yu Zhang, Peter Anninos, & Michael L. Norman.* 453, L57, 298-A6 (1995)

The Hydrodynamics of Shock-Cloud Interactions in Three Dimensions. *Jianjun Xu & James M. Stone.* 454, 172, 301-E12 (1995)

The Evolution and Explosion of Massive Stars. II. Explosive Hydrodynamics and Nucleosynthesis. *S. E. Woosley & Thomas A. Weaver.* 101, 181, 55-B1 (1995)

Wolf-Rayet Bubbles. II. Gasdynamical Situations. *Guillermo García-Segura & Mordecai-Mark Mac Low.* 455, 160, 320-D3 (1995)

X-Ray Emission from Magnetic Cataclysmic Variables and White Dwarf Mass Estimates. *Kinwah Wu, G. Chanmugam, & G. Shaviv.* 455, 260, 321-F8 (1995)

A Turbulent Model for the Interstellar Medium. II. Magnetic Fields and Rotation. *Thierry Passot, Enrique Vázquez-Semadeni, & Annick Pouquet.* 455, 536, 329-D1 (1995)

Hydrodynamic Timescales and Temporal Structure of Gamma-Ray Bursts. *Re'em Sari & Tsvi Piran.* 455, L143, 334-A11 (1995)

Are Blue Stragglers Mixed during Collisions? *Alison Procter Sills, Charles D. Bailyn, & Pierre Demarque.* 455, L163, 334-D6 (1995)

HYDROMAGNETICS

Neutron Star Crustal Plate Tectonics. I. Magnetic Dipole Evolution in Millisecond Pulsars and Low-Mass X-Ray Binaries. *M. Ruderman.* 366, 261, 4-C5 (1991)

Magnetoatmospheric Oscillations in Sunspot Umbrae. *S. S. Hasan.* 366, 328, 5-B7 (1991)

Reversing the Axisymmetric ($m = 0$) Magnetic Fields in the Milky Way. *J. P. Vallée.* 366, 450, 8-D9 (1991)

Three-dimensional Kinematic Reconnection of Plasmoids. *Yun-Tung Lau & John M. Finn.* 366, 577, 10-B11 (1991)

Rotation of the Sun's Outer White-Light Corona Determined from Solwind Data. *Ana G. Nash.* 366, 592, 10-D1 (1991)

A Twisted Flux-Tube Model for Solar Prominences. III. Magnetic Support. *C. Ridgway, E. R. Priest, & T. Amari.* 367, 321, 16-A10 (1991)

On the Radial Structure of Saturn's B Ring. *Lin-Hua Shan & C. K. Goertz.* 367, 350, 16-D1 (1991)

On the Subadiabatic Magnetohydrodynamic Overstability in Background Polytropes. *Yu-Qing Lou.* 367, 367, 16-E9 (1991)

Universal Particle Acceleration. *J. I. Katz.* 367, 407, 18-E1 (1991)

Scattering of Acoustic Waves from a Magnetic Flux Tube Embedded in a Radiating Fluid. *T. J. Bogdan & M. Knölker.* 369, 219, 38-F1 (1991)

Numerical Simulations of a Restarting Jet. *David A. Clarke & Jack O. Burns.* 369, 308, 41-E4 (1991)

The Finite-Amplitude Behavior of the Joule Mode under Astrophysical Conditions. *G. Bodo, S. Massaglia, R. Rosner, & A. Ferrari.* 370, 398, 52-C1 (1991)

Three-dimensional Structures of Magnetostatic Atmospheres. III. A General Formulation. *B. C. Low.* 370, 427, 52-E8 (1991)

Implications of Solar *p*-Mode Frequency Shifts. *Peter Goldreich, Norman Murray, Gregory Willette, & Pawan Kumar.* 370, 752, 57-F12 (1991)

Magnetic Focusing of Precessing Jets. *Christopher S. Kochanek.* 371, 289, 63-F7 (1991)

The Sensitivity of Chromospherically Induced *p*- and *f*-Mode Frequency Shifts to the Height of the Magnetic Canopy. *David J. Evans & B. Roberts.* 371, 387, 64-G9 (1991)

Dynamic Magnetic Reconnection at an X-Type Neutral Point. *I. J. D. Craig & A. N. McClymont.* 371, L41, 66-F1 (1991)

Viscosity and Inertia in Cosmic-Ray Transport: Effects of an Average Magnetic Field. *L. L. Williams & J. R. Jokipii.* 371, 639, 69-E3 (1991)

The Resonant Absorption of *p*-Modes by Sunspots with Twisted Magnetic Fields. *S. M. Chitre & Joseph M. Davila.* 371, 785, 71-C10 (1991)

Current Sheet Formation and Rapid Reconnection in the Solar Corona. *A. Bhattacharjee & Xiogang Wang.* 372, 321, 78-A1 (1991)

Why Fast Solar Wind Originates from Slowly Expanding Coronal Flux Tubes. *Y.-M. Wang & N. R. Sheeley, Jr.* 372, L45, 79-F1 (1991)

Magnetically Dominated Accretion onto Black Holes. *Brian Punsly.* 372, 424, 81-B1 (1991)

Latitudinal Dynamics of Steady Solar Wind Flows. *W.-H. Yang & R. W. Schunk.* 372, 703, 84-D5 (1991)

Atmospheric Gradients and the Stability of Expanding Jets. *Philip E. Hardee, Michael L. Norman, Theodoros Koupelis, & David A. Clarke.* 373, 8, 86-B10 (1991)

Magnetic Braking, Ambipolar Diffusion, Cloud Cores, and Star Formation: Natural Length Scales and Protostellar Masses. *Telemachos Ch. Mouschovias.* 373, 169, 88-B3 (1991)

Stationary Accelerators around Keplerian Disks of Aligned Magnetized Collapsed Objects: Pair Production and Gamma-Ray Emission. *K. S. Cheng & M. Ruderman.* 373, 187, 88-C9 (1991)

A Catastrophe Mechanism for Coronal Mass Ejections. *T. G. Forbes & P. A. Isenberg.* 373, 294, 89-F1 (1991)

A Slingshot Model for Solar Flares. *Gregory Benford.* 373, 671, 96-C9 (1991)

Inefficient Accretion by the DA2 White Dwarf in V471 Tauri. *D. J. Mullan, H. L. Shipman, E. M. Sion, & J. MacDonald.* 374, 707, 107-G8 (1991)

Expansion of a Superbubble in a Uniform Magnetic Field. *Katia M. Ferrière, Mordecai-Mark Mac Low, & Ellen G. Zweibel.* 375, 239, 114-A4 (1991)

Force-free Magnetic Fields: Generating Functions and Footpoint Displacements. *Richard Wolfson & Ritu Verma.* 375, 254, 114-B7 (1991)

Siphon Flows in Isolated Magnetic Flux Tubes. IV. Critical Flows with Standing Tube Shocks. *John H. Thomas & Benjamin Montesinos.* 375, 404, 115-G11 (1991)

How Much Energy Can Be Stored in a Three-dimensional Force-free Magnetic Field? *J. J. Aly.* 375, L61, 124-C11 (1991)

The Equilibria and Evolutions of Magnetized, Rotating, Isothermal Clouds. V. The Effect of the Toroidal Field. *Kohji Tomisaka.* 376, 190, 127-C11 (1991)

On Turbulent Diffusion of Magnetic Fields and the Loss of Magnetic Flux from Stars. *Samuel I. Vainshtein & Robert Rosner.* 376, 199, 127-D7 (1991)

A Powerful Local Shear Instability in Weakly Magnetized Disks. I. Linear Analysis. *Steven A. Balbus & John F. Hawley.* 376, 214, 127-E11 (1991)

A Powerful Local Shear Instability in Weakly Magnetized Disks. II. Nonlinear Evolution. *John F. Hawley & Steven A. Balbus.* 376, 223, 127-F8 (1991)

Magnetohydrodynamic Turbulence Dissipation and Stochastic Proton Acceleration in Solar Flares. *James A. Miller.* 376, 342, 129-B11 (1991)

Suppression of Turbulent Transport by a Weak Magnetic Field. *Fausto Cattaneo & Samuel I. Vainshtein.* 376, L21, 130-C6 (1991)

The Dissipation of Magnetohydrodynamic Turbulence Responsible for Interstellar Scintillation and the Heating of the Interstellar Medium. *Steven R. Spangler.* 376, 540, 133-B5 (1991)

Evolution to Nonequilibrium in Simple Models of Prominence Filaments. *Ellen G. Zweibel.* 376, 761, 135-G1 (1991)

Parametric Study of the Formation of Magnetohydrodynamic Shocks. I. Model. *Y. C. Whang.* 377, 250, 141-B1 (1991)

Parametric Study of the Formation of Magnetohydrodynamic Shocks. II. Slow Shocks. *Y. C. Whang.* 377, 255, 141-B7 (1991)

Cosmic-Ray Heating of Cooling Flows: A Critical Analysis. *Michael Loewenstein, Ellen G. Zweibel, & Mitchell C. Begelman.* 377, 392, 144-F4 (1991)

Asymptotic Structure of Hydromagnetically Driven Relativistic Winds. *Tzihong Chiueh, Zhi-yun Li, & Mitchell C. Begelman.* 377, 462, 145-D11 (1991)

Magnetohydrodynamics of an Impulsively Heated, Hard X-Ray Emitting Filament. *George Roumeliotis & A. Gordon Emslie.* 377, 685, 148-B9 (1991)

Numerical Study of Compressible Solar Magnetoconvection with an Open Transitional Boundary. *H. Hanami & T. Tajima.* 377, 694, 148-C6 (1991)

Cloud Formation by Combined Instabilities in Galactic Gas Layers: Evidence for a *Q* Threshold in the Fragmentation of Shearing Wavelets. *Bruce G. Elmegreen.* 378, 139, 152-F11 (1991)

Magnetosphere of the Rotation-powered Pulsar: A DC Circuit Model. *Shinpei Shibata.* 378, 239, 154-A1 (1991)

A Model for the Formation of Solar Prominences. *S. K. Antiochos & J. A. Klimchuk.* 378, 372, 155-E6 (1991)

The Effect of the Mihalas, Hummer, and Däppen Equation of State and the Molecular Opacity on the Standard Solar Model. *Y.-C. Kim, P. Demarque, & D. B. Guenther.* 378, 407, 156-A10 (1991)

Prominence Sheets Supported by Constant-Current Force-free Fields. I. Imposition of Normal Magnetic Field Components at the Current Sheet and the Photosphere. *C. Ridgway, T. Amari, & E. R. Priest.* 378, 773, 162-A1 (1991)

Dynamo Magnetic Field Modes in Thin Astrophysical Disks: An Adiabatic Computational Approximation. *T. F. Stepinski & E. H. Levy.* 379, 343, 167-C9 (1991)

Joule Heating as an Explanation for the Differential Emission Measure Structure and Systematic Redshifts in the Sun's Lower Transition Region. *George Roumeliotis.* 379, 392, 167-G9 (1991)

Magnetically Driven Jets and Winds. *R. V. E. Lovelace, H. L. Berk, & J. Contopoulos.* 379, 696, 173-D1 (1991)

Multiple Scattering of Acoustic Waves by a Pair of Uniformly Magnetized Flux Tubes. *Thomas J. Bogdan & David C. Fox.* 379, 758, 174-B10 (1991)

Magnetic Field–aligned Electric Potentials in Nonideal Plasma Flows. *K. Schindler, M. Hesse, & J. Birn.* 380, 293, 179-G9 (1991)

Magnetohydrodynamic Cosmologies. *R. Portugal & I. Damião Soares.* 380, 330, 182-D5 (1991)

Maximum Energy of Semi-infinite Magnetic Field Configurations. *P. A. Sturrock.* 380, 655, 186-C8 (1991)

On the Spontaneous Formation of Electric Current Sheets above a Flexible Solar Photosphere. *B. C. Low.* 381, 295, 192-F1 (1991)

Three-dimensional Driven Reconnection in an Axially Bounded Magnetic Field. *H. R. Strauss.* 381, 508, 197-A8 (1991)

Parametric Study of the Formation of Magnetohydrodynamic Shocks. III. Fast and Slow Shocks. *Y. C. Whang.* 381, 559, 197-E10 (1991)

Electron Acceleration in a Nonlinear Shock Model with Applications to Supernova Remnants. *Donald C. Ellison & Stephen P. Reynolds.* 382, 242, 203-C1 (1991)

Coronal Current-Sheet Formation: The Effect of Asymmetric and Symmetric Shears. *Judith T. Karpen, Spiro K. Antiochos, & C. Richard DeVore.* 382, 327, 204-C4 (1991)

Coronal Evolution Due to Shear Motion. *R. S. Steinolfson.* 382, 677, 210-A13 (1991)

Dynamics of Solar Coronal Magnetic Fields. *R. B. Dahlburg, S. K. Antiochos, & T. A. Zang.* 383, 420, 217-E1 (1991)

A New Solar Cycle Model Including Meridional Circulation. *Y.-M. Wang, N. R. Sheeley, Jr., & A. G. Nash.* 383, 431, 217-F1 (1991)

Magnetized Supernova Remnants with Cosmic Rays. *Katia M. Ferrière & Ellen G. Zweibel.* 383, 602, 221-F11 (1991)

Formation of Dense Charged Bunches in Vacuum Gaps. *F. Curtis Michel.* 383, 808, 224-C6 (1991)

Compressible Magnetic Convection: Formulation and Two-dimensional Models. *Peter A. Fox, Michael L. Theobald, & Sabatino Sofia.* 383, 860, 225-A1 (1991)

Effects of Magnetic Fields and Rotation on the Fragmentation of Filamentary Molecular Clouds: Comparison of the Theory with the Orion A Cloud. *Tomoyuki Hanawa, Fumitaka Nakamura, Tomoaki Matsumoto, Takenori Nakano, Ken'ichi Tatematsu, Tomofumi Umemoto, Osamu Kameya, Naomi Hirano, Tetsuo Hasegawa, Norio Kaifu, & Satoshi Yamamoto.* 404, L83, 40-G1 (1993)

Coronal Proton Acceleration by Magnetohydrodynamic Waves and Related Proton Transport. *D. F. Smith & S. H. Brecht.* 406, 298, 58-F10 (1993)

Flux-Tube Divergence, Coronal Heating, and the Solar Wind. *Y.-M. Wang.* 410, L123, 126-D13 (1993)

Numerical Magnetohydrodynamics in Astrophysics: Algorithm and Tests for One-dimensional Flow. *Dongsu Ryu & T. W. Jones.* 442, 228, 80-C5 (1995)

HYPERFINE STRUCTURE

The Interstellar D_1 Line at High Resolution. *L. M. Hobbs & D. E. Welty.* 368, 426, 30-D1 (1991)

IMAGE PROCESSING

The Imaging Performance of the *Hubble Space Telescope*. *Christopher J. Burrows, Jon A. Holtzman, S. M. Faber, Pierre Y. Bely, Hashima Hasan, C. R. Lynds, & Daniel Schroeder.* 369, L21, 45-C1 (1991)

Stellar Photometry with the *Hubble Space Telescope* Wide-Field/Planetary Camera: A Progress Report. *Jon A. Holtzman, Edward J. Groth, Robert M. Light, S. M. Faber, Deidre Hunter, Earl J. O'Neil, Jr., Edward J. Shaya, William A. Baum, Bel Campbell, Arthur Code, Douglas G. Currie, S. P. Ewald, J. Jeff Hester, T. Kelsall, Tod R. Lauer, Roger Lynds, Donald P. Schneider, P. Kenneth Seidelmann, & James A. Westphal.* 369, L35, 45-E1 (1991)

Hubble Space Telescope Wide-Field/Planetary Camera Images of Saturn. *James A. Westphal, William A. Baum, Tod R. Lauer, G. Edward Danielson, Douglas G. Currie, S. P. Ewald, S. M. Faber, Edward J. Groth, J. Jeff Hester, Robert M. Light, Roger Lynds, Earl J. O'Neil, Jr., P. Kenneth Seidelmann, Edward J. Shaya, & Bradford A. Smith.* 369, L51, 45-G1 (1991)

INFRARED: GALAXIES

A Redshift Survey of *IRAS* Galaxies. IV. The Galaxy Distribution and the Inferred Density Field. *Michael A. Strauss, Marc Davis, Amos Yahil, & John P. Huchra.* 385, 421, 18-D11 (1992)

Origin of Far-Infrared Emission in Seyfert and Starburst Galaxies. *Hideaki Mouri & Yoshiaki Taniguchi.* 386, 68, 25-A1 (1992)

A Triggering Mechanism for Enhanced Star Formation in Colliding Galaxies. *Chanda J. Jog & P. M. Solomon.* 387, 152, 38-G6 (1992)

Dense Molecular Gas and Starbursts in Ultraluminous Galaxies. *P. M. Solomon, D. Downes, & S. J. E. Radford.* 387, L55, 48-B1 (1992)

X-Ray Properties of Bright Far-Infrared Galaxies. *L. P. David, C. Jones, & W. Forman.* 388, 82, 50-B4 (1992)

The Density Evolution of *IRAS* Galaxies. *Karl B. Fisher, Michael A. Strauss, Marc Davis, Amos Yahil, & John P. Huchra.* 389, 188, 62-C11 (1992)

Near-Infrared Spectra and Classification Diagnostics of Seyfert Galaxies. *Donald E. Osterbrock, Hien D. Tran, & Sylvain Veilleux.* 389, 196, 62-D7 (1992)

Subarcsecond Mid-Infrared Imaging of the Nuclei of the Infrared Bright Galaxies NGC 1614 and NGC 7469. *Eric Keto, Roger Ball, John Arens, Garrett Jernigan, & Margaret Meixner.* 389, 223, 62-F9 (1992)

Far-Infrared Luminosity Functions of Normal Galaxies. *Takashi Isobe & Eric D. Feigelson.* 79, 197, 16-F3 (1992)

A Near-Infrared Imaging Survey of Interacting Galaxies: The Small Angular-Size Arp Systems. *Howard A. Bushouse & S. Adam Stanford.* 79, 213, 16-G11 (1992)

Star Formation and the Distribution of H I and Infrared Emission in M51. *Richard J. Rand, Shrinivas R. Kulkarni, & W. Rice.* 390, 66, 74-G9 (1992)

Ultraluminous *IRAS* Galaxies: Formation of Elliptical Galaxies by Merger-induced Dissipative Collapse. *John Kormendy & David B. Sanders.* 390, L53, 84-E1 (1992)

The Infrared Properties of Quasars and Radio Galaxies: Testing the Unification Schemes. *Timothy M. Heckman, Kenneth C. Chambers, & Marc Postman.* 391, 39, 86-E3 (1992)

Far-Infrared Observations of NGC 4945 and the Circinus Galaxy. *S. K. Ghosh, R. S. Bisht, K. V. K. Iyengar, T. N. Rengarajan, S. N. Tandon, & R. P. Verma.* 391, 111, 87-D1 (1992)

The Unusual *K*-Band Characteristics of the Gravitational Lens System MG 1131+0456. *James Annis.* 391, L17, 92-A7 (1992)

Lyα Emission from Cooling Flows and Measures of the Dust Content of Rich Clusters of Galaxies. *Esther M. Hu.* 391, 608, 95-E7 (1992)

The Relation of Dust and Atomic Gas Properties of Galaxies. *John G. Spitzak & Stephen E. Schneider.* 393, 126, 115-F1 (1992)

Near-Infrared Images of the Nuclear Region of NGC 5128. *Paula C. Turner, William J. Forrest, Judith L. Pipher, & Mark A. Shure.* 393, 648, 123-G7 (1992)

Higher Order Correlations of *IRAS* Galaxies. *Avery Meiksin, Istvan Szapudi, & Alexander Szalay.* 394, 87, 129-B6 (1992)

The Structure of NGC 4565 at 100, 160, and 200 Microns: Continuum Dust Emission in a Quiescent Sb Galaxy. *G. Engargiola & D. A. Harper.* 394, 104, 129-C13 (1992)

A 2.18 to 2.28 Micron Study of the Stellar Population in the Nucleus of M82. *Niall I. Gaffney & Dan F. Lester.* 394, 139, 129-F9 (1992)

Radio and Infrared Emission from Markarian Starburst Galaxies. *Peter C. Stine.* 81, 49, 35-F9 (1992)

Near-Infrared Broad-Line Profiles in Low-Redshift QSOs. *Keith L. Thompson.* 395, 403, 147-C13 (1992)

High-Resolution 12.4 Micron Images of the Starburst Region in M82. *C. M. Telesco & D. Y. Gezari.* 395, 461, 148-B11 (1992)

Infrared Emission in Seyfert 2 Galaxies: Reprocessed Radiation from a Dusty Torus? *Thaisa Storchi-Bergmann, John S. Mulchaey, & Andrew S. Wilson.* 395, L73, 153-F12 (1992)

On the Use of Far-Infrared Luminosity as a Star Formation Indicator in Galaxies. *Marc Sauvage & Trinh X. Thuan.* 396, L69, 167-A9 (1992)

The He I λ2.06 Microns/Brγ Ratio in Starburst Galaxies—An Objective Constraint on the Upper Mass Limit to the Initial Mass Function. *René Doyon, P. J. Puxley, & R. D. Joseph.* 397, 117, 169-D9 (1992)

IRAS F10214+4724: An Extended CO Emission Source at $z = 2.2867$. *Robert L. Brown & Paul A. Vanden Bout.* 397, L19, 173-C6 (1992)

Aperture Synthesis CO ($J = 3$–2) Observations of a Protogalaxy Candidate IRAS F10214+4724. *R. Kawabe, K. Sakamoto, S. Ishizuki, & M. Ishiguro.* 397, L23, 173-C12 (1992)

Molecular Gas Distribution in a Protogalaxy Candidate IRAS F10214+4724: A Dense Compact Nucleus and Nondetected Extra Components. *Kazushi Sakamoto, Sumio Ishizuki, Ryohei Kawabe, & Masato Ishiguro.* 397, L27, 173-D4 (1992)

A Redshift Survey of *IRAS* Galaxies. V. The Acceleration on the Local Group. *Michael A. Strauss, Amos Yahil, Marc Davis, John P. Huchra, & Karl Fisher.* 397, 395, 175-E11 (1992)

The Optical Properties of IR-selected and Mg II Broad Absorption Line Quasars. *Todd A. Boroson & Karie A. Meyers.* 397, 442, 176-B13 (1992)

The Determination of Dust Mass in Galaxies. *John Kwan & Shuding Xie.* 398, 105, 183-C7 (1992)

Submillimeter Spectrum and Dust Mass of the Primeval Galaxy IRAS 10214+4724. *D. Downes, S. J. E. Radford, A. Greve, C. Thum, P. M. Solomon, & J. E. Wink.* 398, L25, 187-D7 (1992)

Warm Molecular Gas in the Primeval Galaxy IRAS 10214+4724. *P. M. Solomon, D. Downes, & S. J. E. Radford.* 398, L29, 187-E1 (1992)

The Compactness of Far-Infrared Bright Galaxies. *Zhong Wang & George Helou.* 398, L33, 187-E7 (1992)

Infrared Emission and Mass Loss from Evolved Stars in Elliptical Galaxies. *G. R. Knapp, J. E. Gunn, & C. G. Wynn-Williams.* 399, 76, 196-B3 (1992)

Infrared Fine-Structure Line Diagnostics of Shrouded Active Galactic Nuclei. *G. Mark Voit.* 399, 495, 204-B1 (1992)

Infrared Line Diagnostics of Active Galactic Nuclei. *Luigi Spinoglio & Matthew A. Malkan.* 399, 504, 204-B11 (1992)

A Redshift Survey of *IRAS* Galaxies. VII. The Infrared and Redshift Data for the 1.936 Jansky Sample. *Michael A. Strauss, John P. Huchra, Marc Davis, Amos Yahil, Karl B. Fisher, & John Tonry.* 83, 29, 57-D3 (1992)

Dust Reverberation: A Model for the Infrared Variations of Fairall 9. *Richard Barvainis.* 400, 502, 216-E5 (1992)

New Results on the Radio–Far-Infrared Relation for Galaxies. *Rob Price & Nebojsa Duric.* 401, 81, 222-A11 (1992)

Infrared Lines from Active Galactic Nuclei: A Theoretical Approach. *Marcella Contini & Sueli M. Viegas.* 401, 481, 228-F3 (1992)

12 and 20 Micron Imaging of the Starburst Galaxy NGC 253. *R. K. Piña, B. Jones, R. C. Puetter, & W. A. Stein.* 401, L75, 233-A5 (1992)

The Power Spectrum of *IRAS* Galaxies. *Karl B. Fisher, Marc Davis, Michael A. Strauss, Amos Yahil, & John P. Huchra.* 402, 42, 1-E8 (1993)

Subarcsecond Near-Infrared Imaging of Ultraluminous *IRAS* Galaxies. *S. R. Majewski, M. Hereld, D. C. Koo, G. D. Illingworth, & T. M. Heckman.* 402, 125, 2-E13 (1993)

Effect of Malmquist Bias on Correlation Studies with the *IRAS* Data Base. *Frances Verter.* 402, 141, 2-G5 (1993)

The Ultraviolet-to-Near-Infrared Spectral Flux Distribution of Four BL Lacertae Objects. *R. Falomo, A. Treves, L. Chiappetti, L. Maraschi, E. Pian, & E. G. Tanzi.* 402, 532, 9-B7 (1993)

Infrared Polarimetry of Galaxies. III. Global Comparisons. *Terry Jay Jones.* 403, 135, 15-F5 (1993)

NGC 4945: A Postburst Infrared Galaxy. *Jan Koornneef.* 403, 581, 22-G8 (1993)

An Infrared Study of Hot Dust in Quasars Using Prism Spectrophotometry. *Yukiyasu Kobayashi, Shuji Sato, Takuya Yamashita, Hisashi Shiba, & Hideki Takami.* 404, 94, 29-B11 (1993)

Far-Infrared Emission from the Intracluster Medium. *Michael W. Wise, Robert W. O'Connell, Joel N. Bregman, & Morton S. Roberts.* 405, 94, 42-B13 (1993)

High-Resolution Study of Luminous Infrared Galaxies. I. The Composite Nature of the Seyfert 1 Galaxy IRAS 20044−6114 (NGC 6860). *Sebastian Lípari, Zlatan Tsvetanov, & F. Macchetto.* 405, 186, 43-D3 (1993)

The Starburst-AGN Connection: A Sensitive VLBI Survey of Luminous *IRAS* Galaxies. *Colin J. Lonsdale, Harding E. Smith, & Carol J. Lonsdale.* 405, L9, 47-C1 (1993)

Near-Infrared Line Imaging of NGC 6240: Collision Shock and Nuclear Starburst. *Paul P. van der Werf, R. Genzel, A. Krabbe, M. Blietz, D. Lutz, S. Drapatz, Martin J. Ward, & Duncan A. Forbes.* 405, 522, 49-E7 (1993)

The Power Spectra of *IRAS* Galaxies and of Abell Clusters. *Y. P. Jing & R. Valdarnini.* 406, 6, 55-B7 (1993)

The Excitation Mechanism of [Fe II] 1.644 Micron Emission in Seyfert and Starburst Galaxies Revisited. *Hideaki Mouri, Kimiaki Kawara, & Yoshiaki Taniguchi.* 406, 52, 55-F5 (1993)

The Low-Mass Stellar Content of Galaxies: Constraints through Hybrid Population Synthesis near 1 Micron. *Jean Couture & Eduardo Hardy.* 406, 142, 56-G11 (1993)

High-Resolution Imaging of [Fe II 1.64 Microns, Brackett-γ, and H_2 1–0 $S(1)$ Emission in the Starburst Galaxy NGC 253. *Duncan A. Forbes, Martin J. Ward, V. Rotaciuc, M. Blietz, R. Genzel, S. Drapatz, Paul P. van der Werf, & A. Krabbe.* 406, L11, 60-F1 (1993)

Extreme Optical Fe II Emission in Luminous *IRAS* Active Galactic Nuclei. *Sebastian Lípari, Roberto Terlevich, & F. Macchetto.* 406, 451, 63-C12 (1993)

Optical Photometry and Polarimetry and Infrared Photometry of 3C 345 in Outburst. *Mark R. Kidger, José Antonio de Diego, Leo O. Takalo, Aimo Sillanpää, & Masami Okyudo.* 407, L1, 75-A7 (1993)

158 Micron [C II] Mapping of NGC 6946: Probing the Atomic Medium. *S. C. Madden, N. Geis, R. Genzel, F. Herrmann, J. Jackson, A. Poglitsch, G. J. Stacey, & C. H. Townes.* 407, 579, 77-F12 (1993)

Infrared Imaging of MG 0414+0534: The Red Gravitational Lens Systems as Lensed Radio Galaxies. *James Annis & Gerard A. Luppino.* 407, L69, 82-D6 (1993)

Multifrequency Observations of the Optically Active Radio-quiet Quasar GQ Comae. II. Ultraviolet, Optical, and Infrared Continuum Variability. *Michael L. Sitko, Annamaria K. Sitko, Aneta Siemiginowska, & R. Szczerba.* 409, 139, 98-F5 (1993)

Imaging of Luminous Infrared Galaxies at 3.4 Microns. *Shudong Zhou, C. G. Wynn-Williams, & D. B. Sanders.* 409, 149, 98-G1 (1993)

Molecular Gas in Powerful Radio Galaxies Detected by *IRAS*. *J. M. Mazzarella, J. R. Graham, D. B. Sanders, & S. Djorgovski.* 409, 170, 99-A13 (1993)

High-Resolution Mid-Infrared Imaging and Astrometry of the Nucleus of the Seyfert Galaxy NGC 1068. *J. A. Braatz, A. S. Wilson, D. Y. Gezari, F. Varosi, & C. A. Beichman.* 409, L5, 104-B1 (1993)

Infrared Surface Brightness Fluctuations: K'-Band Observations of M31, M32, and the Distance to Maffei 1. *Gerard A. Luppino & John L. Tonry.* 410, 81, 113-B3 (1993)

Near-Infrared Spectroscopy of the Peculiar Giant Elliptical NGC 1275. *Kimiaki Kawara & Yoshiaki Taniguchi.* 410, L19, 117-G13 (1993)

Searching for a Far-Infrared Enhancement in Compact Groups of Galaxies. *Jack W. Sulentic & Duilia F. De Mello Rabaça.* 410, 520, 120-B8 (1993)

High-Resolution Infrared Maps from *IRAS* Observations of Large Galaxies. I. *S. K. Ghosh, R. P. Verma, T. N. Rengarajan, B. Das, & H. T. Saraiya.* 86, 401, 19-G9 (1993)

Infrared Spectroscopy of 11 Radio Galaxies at $2 < z < 4$: Evidence That Some High-Redshift Radio Galaxies May Be Protogalaxies. *Stephen A. Eales & Steve Rawlings.* 411, 67, 127-G13 (1993)

A Deep I-Band Selected Galaxy Sample: Implications for Galaxy Evolution. *Simon J. Lilly.* 411, 501, 135-G6 (1993)

[Fe II] 1.64 Micron Emission in High-Luminosity and Ultraluminous *IRAS* Galaxies. *Luis Colina.* 411, 565, 136-F3 (1993)

M82: The Saga Continues. *K. K. McLeod, G. H. Rieke, M. J. Rieke, & D. M. Kelly.* 412, 111, 143-D10 (1993)

The Nature of Unidentified Far-Infrared Point Sources. *William T. Reach, Carl Heiles, & Bon-Chul Koo.* 412, 127, 143-F1 (1993)

Luminous Infrared Galaxies: Sizes at 10–32 Microns. *C. G. Wynn-Williams & E. E. Becklin.* 412, 535, 150-C13 (1993)

The Warped Disk of Centaurus A in the Near-Infrared. *A. C. Quillen, James R. Graham, & Jay A. Frogel.* 412, 550, 150-E7 (1993)

The Mid-Infrared Radio Correlation at High Angular Resolution: NGC 253. *Eric Keto, Roger Ball, John Arens, Garrett Jernigan, Margaret Meixner, Christopher Skinner, & James Graham.* 413, L23, 162-D7 (1993)

The Genesis of Starbursts and Infrared Emission in the Centers of Galaxies. *C. M. Telesco, L. L. Dressel, & R. D. Wolstencroft.* 414, 120, 171-E3 (1993)

Optical Lines in High-Redshift Quasi-stellar Objects: Balmer Lines, [O III], and Fe II. *Gary J. Hill, Keith L. Thompson, & Richard Elston.* 414, L1, 175-C1 (1993)

Molecular Gas Mass and Far-Infrared Emission from Distant Luminous Galaxies. *D. Downes, P. M. Solomon, & S. J. E. Radford.* 414, L13, 175-D6 (1993)

Strong [Fe II] Emission from NGC 1275. *Richard J. Rudy, Ross D. Cohen, George S. Rossano, Peter Erwin, R. C. Puetter, Matthew A. Greenhouse, & Charles E. Woodward.* 414, 527, 177-F13 (1993)

Millimeter and Submillimeter Continuum Emission from Early-Type Galaxies. *Michel Fich & Paul Hodge.* 415, 75, 186-A1 (1993)

A Physical Model of the Infrared-to-Radio Correlation in Galaxies. *G. Helou & M. D. Bicay.* 415, 93, 186-B9 (1993)

Galaxy Number Counts from $K = 10$ to $K = 23$. *J. P. Gardner, L. L. Cowie, & R. J. Wainscoat.* 415, L9, 191-F7 (1993)

Infrared Coronal Emission Lines and the Possibility of Their Laser Emission in Seyfert Nuclei. *Matthew A. Greenhouse, Uri Feldman, Howard A. Smith, Marcel Klapisch, Anand K. Bhatia, & Avi Bar-Shalom.* 88, 23, 40-C11 (1993)

A Masing [Fe XI] Line. *G. J. Ferland.* 88, 49, 40-F13 (1993)

The Extended 12 Micron Galaxy Sample. *Brian Rush, Matthew A. Malkan, & Luigi Spinoglio.* 89, 1, 49-B1 (1993)

A Search for *IRAS* Galaxies behind the Southern Milky Way. *Toru Yamada, Tadafumi Takata, Thomas Djamaluddin, Akihiko Tomita, Kentaro Aoki, Aki Takeda, & Mamoru Saitō.* 89, 57, 49-F5 (1993)

The Infrared Tully-Fisher Relation in the Ursa Major Cluster. *R. F. Peletier & S. P. Willner.* 418, 626, 240-C3 (1993)

Infrared Spectra of Obscuring Dust Tori around Active Galactic Nuclei. II. Comparison with Observations. *Edward A. Pier & Julian H. Krolik.* 418, 673, 240-G10 (1993)

Subarcsecond Mid-Infrared Imaging of Warm Dust in the Narrow-Line Region of NGC 1068. *Murray Cameron, John W. V. Storey, Valentin Rotaciuc, Reinhard Genzel, Laurent Verstraete, Siegfried Drapatz, Ralf Siebenmorgen, & Terry J. Lee.* 419, 136, 247-G5 (1993)

Near-Infrared Imaging of Low-Redshift Quasar Host Galaxies. *K. K. McLeod & G. H. Rieke.* 420, 58, 1-F10 (1994)

High-Resolution Continuum and Brγ Imaging Observations of M82. *J. E. Larkin, J. R. Graham, K. Matthews, B. T. Soifer, S. Beckwith, T. M. Herbst, & A. C. Quillen.* 420, 159, 3-A1 (1994)

Near-Infrared Imaging of FSC 10214+4724 with the W. M. Keck Telescope. *K. Matthews, B. T. Soifer, J. Nelson, H. Boesgaard, J. R. Graham, W. Harrison, W. Irace, G. Jernigan, J. E. Larkin, H. Lewis, S. Lin, G. Neugebauer, M. Sirota, G. Smith, & C. Ziomkowski.* 420, L13, 7-C5 (1994)

The Nature of Distant Galaxies Producing Multiple C IV Absorption Lines in the Spectra of High-Redshift Quasars. *A. Aragón-Salamanca, R. S. Ellis, J.-M. Schwartzenberg, & J. A. Bergeron.* 421, 27, 16-D5 (1994)

Near-Infrared Spectroscopic Imaging of the Circumnuclear Environment of NGC 1068. *M. Blietz, M. Cameron, S. Drapatz, R. Genzel, A. Krabbe, P. van der Werf, A. Sternberg, & M. Ward.* 421, 92, 17-B13 (1994)

A Near-Infrared Spectroscopic Study of the Luminous Merger NGC 3256. I. Constraints on the Initial Mass Function of the Starburst. *René Doyon, R. D. Joseph, & G. S. Wright.* 421, 101, 17-C10 (1994)

3.3 Micron Emission Feature in Infrared Galaxies. *Kohei Mizutani, Hiroshi Suto, & Toshinori Maihara.* 421, 475, 24-B1 (1994)

Models for the Evolution of the Spectral Energy Distribution of Elliptical Galaxies for Ultraviolet to Far-Infrared Wavelengths. *P. Mazzei, G. De Zotti, & C. Xu.* 422, 81, 31-A13 (1994)

Infrared Spectroscopy of Seyfert 2 Galaxies: A Look through the Obscuring Torus? *Robert W. Goodrich, Sylvain Veilleux, & Gary J. Hill.* 422, 521, 38-C12 (1994)

The Interstellar Medium in the Starburst Regions of NGC 253 and NGC 3256. *P. Carral, D. J. Hollenbach, S. D. Lord, S. W. J. Colgan, Michael R. Haas, R. H. Rubin, & E. F. Erickson.* 423, 223, 48-G7 (1994)

New Infrared Observations of Seyfert 2 Galaxies and Unification Theories. *M. Ruiz, G. H. Rieke, & G. D. Schmidt.* 423, 608, 56-A11 (1994)

Simulations of Deep Galaxy Fields. I. Monte Carlo Simulations of Optical and Near-Infrared Counts. *Arati Chokshi, Carol J. Lonsdale, Paola Mazzei, & Gianfranco De Zotti.* 424, 578, 71-G9 (1994)

IRAS F15307+3252: A Hyperluminous Infrared Galaxy at $z = 0.93$. *Roc M. Cutri, John P. Huchra, Frank J. Low, Robert L. Brown, & Paul A. Vanden Bout.* 424, L65, 78-E1 (1994)

Near-Infrared Spectral Imaging of NGC 1808: Probing the Starburst. *A. Krabbe, A. Sternberg, & R. Genzel.* 425, 72, 81-B2 (1994)

Far-Infrared Emission from the Bulges of Early-Type Spirals: KAO Observations of NGC 4736 (M94) and NGC 3627 (M66). *Beverly J. Smith, P. M. Harvey, C. Colomé, C. Y. Zhang, J. DiFrancesco, & R. W. Pogge.* 425, 91, 81-C9 (1994)

High-Resolution Mid-Infrared Observations of NGC 7469. *J. W. Miles, J. R. Houck, & T. L. Hayward.* 425, L37, 85-E13 (1994)

COBE Diffuse Background Experiment Observations of the Galactic Bulge. *J. L. Weiland, R. G. Arendt, G. B. Berriman, E. Dwek, H. T. Freudenreich, M. G. Hauser, T. Kelsall, C. M. Lisse, M. Mitra, S. H. Moseley, N. P. Odegard, R. F. Silverberg, T. J. Sodroski, W. J. Spiesman, & S. W. Stemwedel.* 425, L81, 94-D6 (1994)

Power-Spectrum Analysis of Three-dimensional Redshift Surveys. *Hume A. Feldman, Nick Kaiser, & John A. Peacock.* 426, 23, 96-D2 (1994)

Far-Infrared Properties of Early-Type Galaxies. *P. Mazzei & G. De Zotti.* 426, 97, 97-C5 (1994)

Luminosity Evolution and Dust Effects in Distant Galaxies: Implications for the Observability of the Early Evolutionary Phases. *Alberto Franceschini, Paola Mazzei, Gianfranco De Zotti, & Luigi Danese.* 427, 140, 111-F4 (1994)

Galaxies with Extreme Infrared and Fe II Emission. I. Markarian 231: The Signature of a Young Infrared QSO. *Sebastian Lípari, Luis Colina, & F. Macchetto.* 427, 174, 112-B12 (1994)

The Nuclear 10 Micron Emission of Spiral Galaxies. *Giuliano Giuricin, Laura Tamburini, Fabio Mardirossian, Marino Mezzetti, & Pierluigi Monaco.* 427, 202, 112-E1 (1994)

K'-Band Observations of the Evil Eye Galaxy: Are the Optical and Near-Infrared Dust Albedos Identical? *Adolf N. Witt, Rebecca S. Lindell, David L. Block, & Rhodri Evans.* 427, 227, 112-G1 (1994)

The Distribution of *IRAS* Galaxies on Linear and Nonlinear Scales. *Ravi K. Sheth, H. J. Mo, & William C. Saslaw.* 427, 562, 119-F11 (1994)

Obscuration, Orientation, and the Infrared Properties of Radio-loud Active Galaxies. *Timothy M. Heckman, Christopher P. O'Dea, Stefi A. Baum, & Eija Laurikainen.* 428, 65, 129-A11 (1994)

A Diagnosis of Dust in Active Galactic Nuclei through Analysis of the Infrared Bump. *S. M. Viegas & M. Contini.* 428, 113, 129-E9 (1994)

Probing Radial Age/Metallicity Degeneracy in Early-Type Galaxies. *David R. Silva & Richard Elston.* 428, 511, 136-E7 (1994)

CO Absorption in Luminous Infrared Galaxies. *Susan E. Ridgway, C. G. Wynn-Williams, & E. E. Becklin.* 428, 609, 137-G1 (1994)

Multiwavelength Analysis of Quasars, Seyfert Galaxies, and Starbursts. *J. Miguel Mas-Hesse, Pedro M. Rodríguez-Pascual, Lourdes Sanz Fernández de Córdoba, & I. Félix Mirabel.* 92, 599, 39-G4 (1994)

The Far-Infrared Properties of the CfA Galaxy Sample. II. Gas, Dust, and Star Formation along the Hubble Sequence. *Marc Sauvage & Trinh X. Thuan.* 429, 153, 146-A9 (1994)

Extended Infrared Line Emission Excited by Starburst and Seyfert Activity in NGC 3256 and NGC 4945. *A. F. M. Moorwood & E. Oliva.* 429, 602, 153-B9 (1994)

The Byurakan Classification and the Far-Infrared Radiation of Spiral Galaxies. *H. M. Tovmassian.* 430, 139, 160-G3 (1994)

The True Nucleus of NGC 253 Revealed by High-Resolution Near-Infrared Imaging. *Bruce J. Sams III, R. Genzel, A. Eckart, L. Tacconi-Garman, & R. Hofmann.* 430 L33, 165-E5 (1994)

A Survey of the Large Magellanic Cloud in the [C II] 158 Micron Line. *Kenji Mochizuki, Takao Nakagawa, Yasuo Doi, Yukari Y. Yui, Haruyuki Okuda, Hiroshi Shibai, Masao Yui, Tetsuo Nishimura, & Frank J. Low.* 430, L37, 165-E13 (1994)

Near-Infrared Imaging of Low-Redshift Quasar Host Galaxies. II. High-Luminosity Quasars. *K. K. McLeod & G. H. Rieke.* 431, 137, 177-G8 (1994)

Spatially Resolved Optical and Near-Infrared Spectroscopy of the Low-Metallicity Galaxy UGC 4483. *Evan D. Skillman, Roberto J. Terlevich, Robert C. Kennicutt, Jr., Donald R. Garnett, & Elena Terlevich.* 431, 172, 178-C9 (1994)

Stellar Kinematics in the Nucleus of NGC 6240: A Massive Galaxy Revealed. *Dan F. Lester & Niall I. Gaffney.* 431, L13, 182-D7 (1994)

Infrared Imaging of Spiral Galaxies: Colors and Luminosity Profiles. *Donald M. Terndrup, Roger L. Davies, Jay A. Frogel, D. L. DePoy, & Lisa A. Wells.* 432, 518, 202-D5 (1994)

The Near-Infrared–Optical–Ultraviolet Emission of BL Lacertae Objects. *E. Pian, R. Falomo, R. Scarpa, & A. Treves.* 432, 547, 202-F11 (1994)

NGC 7552: A Galaxy with a Dormant Active Nucleus? *Duncan A. Forbes, Jari K. Kotilainen, & A. F. M. Moorwood.* 433, L13, 214-E10 (1994)

Infrared Observations of the Dark Matter Lens Candidate Q2345+007. *Brian McLeod, Marcia Rieke, & Daniel Weedman.* 433, 528, 217-E5 (1994)

Spectral Energy Distributions of the Brightest Palomar-Green Quasars at Intermediate Redshifts. *Todd M. Tripp, Jill Bechtold, & Richard F. Green.* 433, 533, 217-E12 (1994)

The Dispersion in the Near-Infrared Surface Brightness Fluctuations in the Virgo Cluster. *Michael A. Pahre & Jeremy R. Mould.* 433, 567, 218-A9 (1994)

Near-Infrared Observations of FSC 15307+3252. *B. T. Soifer, G. Neugebauer, K. Matthews, & L. Armus.* 433, L69, 223-F5 (1994)

The Hawaii K-Band Galaxy Survey. I. Deep K-Band Imaging. *L. L. Cowie, J. P. Gardner, E. M. Hu, A. Songaila, K.-W. Hodapp, & R. J. Wainscoat.* 434, 114, 226-F6 (1994)

The Cosmic X-Ray Background–*IRAS* Galaxy Correlation and the Local X-Ray Volume Emissivity. *Takamitsu Miyaji, Ofer Lahav, Keith Jahoda, & Elihu Boldt.* 434, 424, 233-E9 (1994)

The Near-Infrared Structure of M33. *Michael W. Regan & Stuart N. Vogel.* 434, 536, 235-B8 (1994)

The Hawaii K-Band Galaxy Survey. III. Spectroscopy of $K < 20$ Galaxies. *A. Songaila, L. L. Cowie, E. M. Hu, & J. P. Gardner.* 94, 461, 58-C1 (1994)

Multiwavelength Tests of the Dusty Torus Model for Seyfert Galaxies. *John S. Mulchaey, Anuradha Koratkar, Martin J. Ward, Andrew S. Wilson, Mark Whittle, Robert R. J. Antonucci, Anne L. Kinney, & Todd Hurt.* 436, 586, 273-E10 (1994)

The Gravitational Potential of the Bar in NGC 4314. *A. C. Quillen, Jay A. Frogel, & Rosa A. González.* 437, 162, 285-D6 (1994)

Multiwavelength Monitoring of the BL Lacertae Object PKS 2155−304. IV. Multiwavelength Analysis. *R. Edelson, J. Krolik, G. Madejski, L. Maraschi, G. Pike, C. M. Urry, W. Brinkmann, T. J.-L. Courvoisier, J. Ellithorpe, K. Horne, A. Treves, S. Wagner, W. Wamsteker, R. Warwick, H. D. Aller, M. F. Aller, M. Ashley, A. Blecha, P. Bouchet, P. Bratschi, J. N. Bregman, M. Carini, A. Celotti, M. Donahue, E. Feigelson, A. V. Filippenko, H. Fink, I. George, I. Glass, J. Heidt, J. Hewitt, P. Hughes, R. Kollgaard, Y. Kondo, A. Koratkar, K. Leighly, A. Marscher, P. G. Martin, T. Matheson, H. R. Miller, J. C. Noble, P. O'Brien, E. Pian, G. Reichert, J. M. Saken, J. M. Shull, M. Sitko, P. S. Smith, W.-H. Sun, & G. Tagliaferri.* 438, 120, 3-A4 (1995)

Ultraluminous Infrared Galaxies and the Radio-optical Correlation for Quasars. *Carol J. Lonsdale, Harding E. Smith, & Colin J. Lonsdale.* 438, 632, 12-G8 (1995)

Far-Infrared Thermal Emission from the Inner Cooling Flow Region of NGC 1275. *D. F. Lester, E. C. Zink, G. W. Doppmann, N. I. Gaffney, P. M. Harvey, B. J. Smith, & M. Malkan.* 439, 185, 23-G1 (1995)

K-Band Galaxy Counts. *B. A. McLeod, G. M. Bernstein, M. J. Rieke, E. V. Tollestrup, & G. G. Fazio.* 96, 117, 3-B13 (1995)

Recalibration of the $H_{-0.5}$ Magnitudes of Spiral Galaxies. *Giuseppe Tormen & David Burstein.* 96, 123, 3-C7 (1995)

Imaging the Host Galaxies of High-Redshift Radio-quiet QSOs. *James D. Lowenthal, Timothy M. Heckman, Matthew D. Lehnert, & J. H. Elias.* 439, 588, 32-D11 (1995)

The Luminous Starburst Galaxy UGC 8387. *Denise A. Smith, Terry Herter, Martha P. Haynes, C. A. Beichman, & T. N. Gautier III.* 439, 623, 33-A4 (1995)

Near-Infrared [Fe II] and Paβ Imaging and Spectroscopy of Arp 220. *L. Armus, D. L. Shupe, K. Matthews, B. T. Soifer, & G. Neugebauer.* 440, 200, 44-A3 (1995)

Near-Infrared Imaging of CfA Seyfert Galaxies. *K. K. McLeod & G. H. Rieke.* 441, 96, 60-F4 (1995)

An Estimate of the Gas Inflow Rate along the Bar in NGC 7479. *A. C. Quillen, Jay A. Frogel, Jeffrey D. P. Kenney, R. W. Pogge, & D. L. DePoy.* 441, 549, 69-E8 (1995)

Infrared Line Emission from High-Redshift Galaxies. I. Calculations. *Filippo Mannucci & Steven V. W. Beckwith.* 442, 569, 87-F8 (1995)

The Distribution of Far-Infrared Light in the "Dusty Hand" Galaxy NGC 2146. *Beverly J. Smith, P. M. Harvey, & D. F. Lester.* 442, 610, 88-C10 (1995)

The Heating of Dust in Starburst Galaxies: The Contribution of the Nonionizing Radiation. *Daniela Calzetti, Ralph C. Bohlin, Anne L. Kinney, Thaisa Storchi-Bergmann, & Timothy M. Heckman.* 443, 136, 97-A12 (1995)

Interpretation of the Faint Galaxy Number Counts in the *K* Band. *Yuzuru Yoshii & Bruce A. Peterson.* 444, 15, 113-D5 (1995)

The Tully-Fisher Relation of the *IRAS* Minisurvey Galaxies. *W. van Driel, A. C. van den Broek, & W. A. Baan.* 444, 80, 114-D4 (1995)

Spectroscopy of Luminous Infrared Galaxies at 2 Microns. I. The Ultraluminous Galaxies ($L_{IR} \geq 10^{12}\ L_{\odot}$). *Jeffrey D. Goldader, R. D. Joseph, René Doyon, & D. B. Sanders.* 444, 97, 114-F2 (1995)

Infrared Imaging and Spectroscopy of NGC 7469. *R. Genzel, L. Weitzel, L. E. Tacconi-Garman, M. Blietz, M. Cameron, A. Krabbe, D. Lutz, & A. Sternberg.* 444, 129, 115-B3 (1995)

Ultraviolet to Near-Infrared Spectral Distributions of Star-forming and Seyfert 2 Galaxies. *Thaisa Storchi-Bergmann, Anne L. Kinney, & Peter Challis.* 98, 103, 22-C2 (1995)

Optical Spectroscopy of Luminous Infrared Galaxies. I. Nuclear Data. *D.-C. Kim, D. B. Sanders, S. Veilleux, J. M. Mazzarella, & B. T. Soifer.* 98, 129, 22-E5 (1995)

Optical Spectroscopy of Luminous Infrared Galaxies. II. Analysis of the Nuclear and Long-Slit Data. *S. Veilleux, D.-C. Kim, D. B. Sanders, J. M. Mazzarella, & B. T. Soifer.* 98, 171, 23-A8 (1995)

The Spatial Variation of the Infrared-to-Radio Ratio in Spiral Galaxies. *K. A. Marsh & G. Helou.* 445, 599, 143-C9 (1995)

High-Resolution Near-Infrared Spectra of NGC 4151: Line and Continuum Analysis. *Rodger I. Thompson.* 445, 700, 144-G5 (1995)

A Mid-Infrared Test of the "Obscuring Torus" Model for Seyfert Nuclei. *Timothy M. Heckman.* 446, 101, 154-E10 (1995)

The 10 Micron Emission of Seyfert Nuclei. *Giuliano Giuricin, Fabio Mardirossian, & Marino Mezzetti.* 446, 550, 163-F7 (1995)

New Constraints on the Unified Model of Seyfert Galaxies. *R. Maiolino, M. Ruiz, G. H. Rieke, & L. D. Keller.* 446, 561, 163-G7 (1995)

A Multifrequency Radio Continuum and *IRAS* Faint Source Survey of Markarian Galaxies. *M. D. Bicay, G. Kojoian, J. Seal, D. F. Dickinson, & M. A. Malkan.* 98, 369, 28-B1 (1995)

A Near-Infrared Faint Galaxy Survey: The Catalog. *J. P. Gardner.* 98, 441, 29-B6 (1995)

Nonaxisymmetric Structures in the Stellar Disks of Galaxies. *Hans-Walter Rix & Dennis Zaritsky.* 447, 82, 173-C9 (1995)

The Nuclear Energy Sources Powering Bright Infrared-selected Galaxies. *M. L. N. Ashby, J. R. Houck, & K. Matthews.* 447, 545, 183-C9 (1995)

Interstellar Grains in Elliptical Galaxies: Grain Evolution. *John C. Tsai & William G. Mathews.* 448, 84, 193-C12 (1995)

An Emission-Line Protogalaxy Candidate at $z = 2.5$. *M. Malkan, H. Teplitz, & I. McLean.* 448, L5, 199-B9 (1995)

High Spatial Resolution Fabry-Perot Imaging of M82: Near-Infrared Recombination Line Observations. *Shobita Satyapal, Dan M. Watson, Judith L. Pipher, William J. Forrest, Diana Coppenbarger, S. Nicholas Raines, Scott Libonate, François Piché, Matthew A. Greenhouse, Howard A. Smith, Keith L. Thompson, Jacqueline Fischer, Charles E. Woodward, & Tracy Hodge.* 448, 611, 203-B10 (1995)

High-Resolution Infrared Imaging of FSC 10214+4724: Evidence for Gravitational Lensing. *James R. Graham & Michael C. Liu.* 449, L29, 216-D7 (1995)

Evidence for Gaussian Initial Fluctuations from the 1.2 Jansky *IRAS* Survey. *Adi Nusser, Avishai Dekel, & Amos Yahil.* 449, 439, 218-G11 (1995)

Dust and Molecular Gas in the Barred Spiral Galaxy NGC 1530. *Michael W. Regan, Stuart N. Vogel, & Peter J. Teuben.* 449, 576, 220-F10 (1995)

Extended Infrared Emission in the Galaxy Cluster 1E 1111.9−3754: No Evidence for a Low-Mass Accretion Population. *Marshall Joy, Andrea H. Prestwich, Michael Burton, & Stephen Guimond.* 449, L113, 226-G10 (1995)

Far-Infrared Emission from Abell Clusters. *Caroline V. Cox, Joel N. Bregman, & James M. Schombert.* 99, 405, 40-F6 (1995)

Near-Infrared Imaging and Spectroscopy of the Bright *IRAS* Galaxy VV 114. *René Doyon, Daniel Nadeau, R. D. Joseph, J. D. Goldader, D. B. Sanders, & Neil Rowlands.* 450, 111, 229-E8 (1995)

The Buried QSO in IRAS F15307+3252 and the Nature of Hyperluminous Infrared Galaxies. *Dean C. Hines, Gary D. Schmidt, Paul S. Smith, Roc M. Cutri, & Frank J. Low.* 450, L1, 235-D1 (1995)

Spectrophotometric Properties of Merging Galaxies. *Charles T. Liu & Robert C. Kennicutt, Jr.* 450, 547, 238-C9 (1995)

The Central Regions of NGC 4691: A Remarkable Structure with a Fast Outflow near the Nucleus. *J. A. García-Barreto, J. Franco, J. Guichard, & R. Carrillo.* 451, 156, 248-B13 (1995)

The Broadband Spectral Energy Distributions of the Cloverleaf Quasar and IRAS F10214+4724. *Richard Barvainis, Robert Antonucci, Todd Hurt, Paul Coleman, & H.-P. Reuter.* 451, L9, 252-B11 (1995)

The *IRAS* 1.2 Jy Survey: Redshift Data. *Karl B. Fisher, John P. Huchra, Michael A. Strauss, Marc Davis, Amos Yahil, & David Schlegel.* 100, 69, 46-G5 (1995)

Spectroscopic and Morphological Evidence That IRAS FSC 10214+4724 Is a Gravitational Lens. *Laird M. Close, Patrick B. Hall, Charles T. Liu, & E. Keith Hege.* 452, L9, 269-D1 (1995)

A Near-Infrared Faint Galaxy Survey. *J. P. Gardner.* 452, 538, 272-B2 (1995)

Near-Infrared Spectroscopy of the Arp 220 Nuclei: Measuring the Nuclear Rotation. *J. E. Larkin, L. Armus, R. A. Knop, K. Matthews, & B. T. Soifer.* 452, 599, 272-G11 (1995)

A Spectrophotometric Survey of Merging Galaxies. *Charles T. Liu & Robert C. Kennicutt, Jr.* 100, 325, 50-E8 (1995)

The Near-Infrared Fundamental Plane of Elliptical Galaxies. *Michael A. Pahre, S. G. Djorgovski, & R. R. de Carvalho.* 453, L17, 289-D8 (1995)

Multiwavelength Energy Distributions and Bolometric Luminosities of the 12 Micron Galaxy Sample. *Luigi Spinoglio, Matthew A. Malkan, Brian Rush, Luis Carrasco, & Elsa Recillas-Cruz.* 453, 616, 292-D4 (1995)

Evidence for an Obscured Quasar in the Giant Radio Galaxy PKS 0634−205. *Chris Simpson, M. J. Ward, & A. S. Wilson.* 454, 683, 311-B1 (1995)

Luminous Quasars in Luminous Early-Type Host Galaxies. *K. K. McLeod & G. H. Rieke.* 454, L77, 315-C9 (1995)

Hard X-Ray Emission from Extragalactic *IRAS* 12 Micron Sources: Constraints on the Unified Active Galactic Nucleus Model and the Synthesis of the X-Ray Background. *Xavier Barcons, Alberto Franceschini, Gianfranco De Zotti, Luigi Danese, & Takamitsu Miyaji.* 455, 480, 328-E7 (1995)

Near-Infrared Observations of Extended Emission around PG 1545+210. *G. Neugebauer, K. Matthews, & L. Armus.* 455, L123, 333-F4 (1995)

INFRARED: GENERAL

A Search for Circumstellar Dust around HR 10, a Proposed β Pictoris Star. *Kwang-Ping Cheng, C. A. Grady, & Frederick C. Bruhweiler.* 366, L87, 11-E7 (1991)

Submillimeter Solar Limb Profiles Determined from Observations of the Total Solar Eclipse of 1988 March 18. *T. L. Roellig, E. E. Becklin, J. T. Jefferies, G. A. Kopp, C. A. Lindsey, F. Q. Orrall, & M. W. Werner.* 381, 288, 192-E5 (1991)

A Model for the Infrared Emission from an OB Star Cluster Environment. *D. Leisawitz.* 77, 451, 51-B1 (1991)

The Inverse Planckian Transform and Temperature Spectra. *Luis Salas.* 385, 288, 15-D12 (1992)

Unusual 3 Micron Emission Features in Three Proto–Planetary Nebulae. *T. R. Geballe, A. G. G. M. Tielens, S. Kwok, & B. J. Hrivnak.* 387, L89, 48-E1 (1992)

Dust and Gas Contributions to the Energy Output of SN 1987A on Day 1153. *E. Dwek, S. H. Moseley, W. Glaccum, J. R. Graham, R. F. Loewenstein, R. F. Silverberg, & R. K. Smith.* 389, L21, 66-C11 (1992)

First Results of an On-Line Adaptive Optics System with Atmospheric Wavefront Sensing by an Artificial Neural Network. *M. Lloyd-Hart, P. Wizinowich, B. McLeod, D. Wittman, D. Colucci, R. Dekany, D. McCarthy, J. R. P. Angel, & D. Sandler.* 390, L41, 78-F8 (1992)

TeV Gamma Rays from 3C 279: A Possible Probe of Origin and Intergalactic Infrared Radiation Fields. *F. W. Stecker, O. C. De Jager, & M. H. Salamon.* 390, L49, 84-D7 (1992)

Rocket Observation of the Near-Infrared Spectrum of the Sky. *M. Noda, V. V. Christov, H. Matsuhara, T. Matsumoto, S. Matsuura, K. Noguchi, S. Sato, & H. Murakami.* 391, 456, 93-E9 (1992)

The Optical Emission-Line Background and Accompanying Emissions at Ultraviolet, Infrared, and Millimeter Wavelengths. *R. J. Reynolds.* 392, L35, 106-E1 (1992)

Near-Infrared Observations of AFGL 618. II. The Atomic Spectrum. *Douglas M. Kelly, William B. Latter, & G. H. Rieke.* 395, 174, 142-D1 (1992)

Extended Infrared Emission around IRAS 21282+5050. *Jesse D. Bregman, John Booth, D. Kirk Gilmore, Laura Kay, & David Rank.* 396, 120, 156-E12 (1992)

Mid-Infrared Imaging of Orion BN/KL: Astrometry of IRc2 and the SiO Maser. *Daniel Y. Gezari.* 396, L43, 160-G8 (1992)

Limb Observations of the 12.32 Micron Solar Emission Line during the 1991 July Total Eclipse. *Drake Deming, Donald E. Jennings, George McCabe, Robert Noyes, Gunter Wiedemann, & Fred Espenak.* 396, L53, 161-A6 (1992)

A Model of the 8–25 Micron Point Source Infrared Sky. *Richard J. Wainscoat, Martin Cohen, Kevin Volk, Helen J. Walker, & Deborah E. Schwartz.* 83, 111, 58-D11 (1992)

New Excitation Rates and Line Ratios for [Fe II]. *Anil K. Pradhan & Hong Lin Zhang.* 409, L77, 111-G8 (1993)

New Upper Limits on Intergalactic Infrared Radiation from High-Energy Astrophysics. *F. W. Stecker & O. C. De Jager.* 415, L71, 199-E1 (1993)

A New Method for Determining the Hubble Constant from Sub-TeV Gamma-Ray Observations. *M. H. Salamon, F. W. Stecker, & O. C. de Jager.* 423, L1, 53-B1 (1994)

A Laboratory Approach to the Interstellar Sulfide Dust Problem. *B. Begemann, J. Dorschner, T. Henning, H. Mutschke, & E. Thamm.* 423, L71, 54-C1 (1994)

Spectropolarimetry of Five Objects toward the Galactic Center from 1.4 to 4.2 Microns. *Tetsuya Nagata, Naoto Kobayashi, & Shuji Sato.* 423, L113, 60-F11 (1994)

The Infrared Telescope in Space (IRTS). *H. Murakami, J. Bock, M. M. Freund, H. Guo, T. Hirao, A. E. Lange, H. Matsuhara, T. Matsumoto, S. Matsuura, T. J. McMahon, M. Murakami, T. Nakagawa, M. Noda, K. Noguchi, H. Okuda, K. Okumura, T. Onaka, T. L. Roellig, S. Sato, H. Shibai, T. Tanabé, T. Watabe, T. Yagi, N. Yajima, & M. Yui.* 428, 354, 132-E8 (1994)

Near-Infrared Spectrometer on the Infrared Telescope in Space. *Manabu Noda, Toshio Matsumoto, Shuji Matsuura, Kunio Noguchi, Masahiro Tanaka, Mark A. Lim, & Hiroshi Murakami.* 428, 363, 132-F5 (1994)

The Mid-Infrared Spectrometer on the Infrared Telescope in Space (IRTS) Mission. *Thomas L. Roellig, Takashi Onaka, Thomas J. McMahon, & T. Tanabé.* 428, 370, 132-G1 (1994)

Far-Infrared Line Mapper (FILM) on the Infrared Telescope in Space. *Hiroshi Shibai, Masao Yui, Hideo Matsuhara, Norihisa Hiromoto, Takao Nakagawa, & Haruyuki Okuda.* 428, 377, 132-G11 (1994)

The Far-Infrared Photometer on the Infrared Telescope in Space. *A. E. Lange, M. M. Freund, S. Sato, T. Hirao, T. Matsumoto, & T. Watabe.* 428, 384, 133-A6 (1994)

Arcminute Sky Fluctuations at 1.25 Millimeters. *Paola Andreani.* 428, 447, 135-F11 (1994)

Infrared Spectra of Crystalline Phase Ices Condensed on Silicate Smokes at $T < 20$ K. *Marla H. Moore, Robert F. Ferrante, Reggie L. Hudson, Joseph A. Nuth III, & Bertram Donn.* 428, L81, 143-A7 (1994)

Imaging Spectroscopy of the Solar CO Lines at 4.67 Microns. *Han Uitenbroek, R. W. Noyes, & Douglas Rabin.* 432, L67, 200-B5 (1994)

Laser Action in Far-Infrared Astrophysical Sources. *Jianfang Peng & Anil K. Pradhan.* 432, L123, 207-B7 (1994)

Stellar Velocity Dispersion in Arp 220 and NGC 6240: Elliptical Galaxies in Formation. *René Doyon, M. Wells, G. S. Wright, R. D. Joseph, D. Nadeau, & P. A. James.* 437, L23, 291-D13 (1994)

Polarization of Thermal Emission from Aspherical Dust Grains in an Anisotropic Radiation Field. *Takashi Onaka.* 439, L21, 30-A10 (1995)

An Upper Limit to the Infrared Background from Observations of TeV Gamma Rays. *S. D. Biller, C. W. Akerlof, J. Buckley, M. F. Cawley, M. Chantell, D. J. Fegan, S. Fennell, J. A. Gaidos, A. M. Hillas, A. D. Kerrick, R. C. Lamb, D. A. Lewis, D. I. Meyer, G. Mohanty, K. S. O'Flaherty, M. Punch, P. T. Reynolds, H. J. Rose, A. C. Rovero, M. S. Schubnell, G. Sembroski, T. C. Weekes, & C. Wilson.* 445, 227, 135-F1 (1995)

A New 3.25 Micron Absorption Feature Toward Monoceros R2/IRS 3. *K. Sellgren, T. Y. Brooke, R. G. Smith, & T. R. Geballe.* 449, L69, 217-B8 (1995)

INFRARED: INTERSTELLAR: CONTINUUM

The Spectra of IC 418 and IC 5117 from 1.5 to 1.75 Microns. *C. Y. Zhang & Sun Kwok.* 385, 255, 15-B1 (1992)

Dust and Extinction in the Planetary Nebula NGC 7027. *Charles E. Woodward, Judith L. Pipher, W. J. Forrest, Andrea Moneti, & Mark A. Shure.* 385, 567, 20-B12 (1992)

Extended Red Emission from Dust in Planetary Nebulae. *D. G. Furton & A. N. Witt.* 386, 587, 32-F1 (1992)

Galactic Structure from the Spacelab Infrared Telescope. I. 2.4 Micron Map. *S. M. Kent, D. Mink, G. Fazio, D. Koch, G. Melnick, A. Tardiff, & C. Maxson.* 78, 403, 8-A9 (1992)

The Luminosity of the Galactic Center. *J. A. Davidson, M. W. Werner, X. Wu, D. F. Lester, P. M. Harvey, M. Joy, & M. Morris.* 387, 189, 39-C8 (1992)

The Sharpless 187 Gas Complex: A Multifrequency Study. *G. Joncas, D. Durand, & R. S. Roger.* 387, 591, 46-A9 (1992)

Near-Infrared Observations of the Proto–Planetary Nebula AFGL 618. *William B. Latter, Philip R. Maloney, Douglas M. Kelly, John H. Black, G. H. Rieke, & M. J. Rieke.* 389, 347, 64-C3 (1992)

The Juggler: A Three-lobed Near-Infrared Reflection Nebula toward CRL 2136 = OH 17.6+0.2. *Joel H. Kastner, David A. Weintraub, & C. Aspin.* 389, 357, 64-D1 (1992)

Thermal Dust Imaging: The Onset of Asymmetry in the Ultracompact H II Region G5.89−0.39. *Roger Ball, John F. Arens, J. Garrett Jernigan, Eric Keto, & Margaret M. Meixner.* 389, 616, 69-B1 (1992)

Far-Infrared Observations of M17SW: The Clumpy Structure of the Photodissociation Region. *Margaret Meixner, Michael R. Haas, A. G. G. M. Tielens, E. F. Erickson, & M. Werner.* 390, 499, 81-E3 (1992)

Near-Infrared Observations of Young Stellar Objects in the ρ Ophiuchi Dark Cloud. *Thomas P. Greene & Erick T. Young.* 395, 516, 149-B5 (1992)

An Infrared Supershell Surrounding the Cygnus OB1 Association. *Jon M. Saken, J. Michael Shull, Catharine D. Garmany, Joy Nichols-Bohlin, & Robert A. Fesen.* 397, 537, 177-E10 (1992)

IRAS Observations and the Stellar Content of H II Regions in the Large Magellanic Cloud. *Kathleen DeGioia-Eastwood.* 397, 542, 177-F7 (1992)

Polarization of the Far-Infrared Emission from the Thermal Filaments of the Galactic Center Arc. *M. Morris, J. A. Davidson, M. Werner, J. Dotson, D. F. Figer, R. Hildebrand, G. Novak, & S. Platt.* 399, L63, 200-G6 (1992)

Scattering of Infrared Radiation by Dust in NGC 7023 and NGC 2023. *K. Sellgren, M. W. Werner, & H. L. Dinerstein.* 400, 238, 211-G9 (1992)

Infrared Emission from X-Ray and Optically Emitting Regions in the Cygnus Loop Supernova Remnant. *Richard G. Arendt, Eli Dwek, & David Leisawitz.* 400, 562, 217-D1 (1992)

The Environments of Young Stars: Mid-Infrared and Molecular Line Imaging. *Eric Keto, Deanne Proctor, Roger Ball, John Arens, & Garrett Jernigan.* 401, L113, 233-E11 (1992)

Magnetic Field in a Low-Mass Protostar Disk: Millimeter Polarimetry of IRAS 16293−2422. *Motohide Tamura, Saeko S. Hayashi, Takuya Yamashita, William D. Duncan, & James H. Hough.* 404, L21, 33-F1 (1993)

Models of Clumpy Photodissociation Regions. *M. Meixner & A. G. G. M. Tielens.* 405, 216, 43-G2 (1993)

A Multiwavelength Study of the Eridanus Soft X-Ray Enhancement. *D. N. Burrows, K. P. Singh, J. A. Nousek, G. P. Garmire, & J. Good.* 406, 97, 56-C7 (1993)

Near-Infrared Imaging of the Becklin-Neugebauer–IRc2 Region in Orion with Subarcsecond Resolution. *C. Dougados, P. Léna, S. T. Ridgway, J. C. Christou, & R. G. Probst.* 406, 112, 56-E5 (1993)

Interstellar Extinction in the Infrared: The Molecular Cloud toward HD 62542. *D. C. B. Whittet, P. G. Martin, E. L. Fitzpatrick, & D. Massa.* 408, 573, 92-C11 (1993)

Photometry and Imaging of the Peculiar Planetary Nebula IRAS 21282+5050. *Sun Kwok, Bruce J. Hrivnak, & Philip P. Langill.* 408, 586, 92-E3 (1993)

Interstellar Matter near the Pleiades. IV. The Wake of the Pleiades through the Interstellar Medium in Taurus. *Richard E. White & John Bally.* 409, 234, 99-G13 (1993)

Spatially Resolved Spectra of the Unidentified Infrared Features around HD 44179 (The Red Rectangle). *G. C. Sloan, G. L. Grasdalen, & Paul D. LeVan.* 409, 412, 102-B3 (1993)

2–12.5 Micron Imaging of IRAS 21282+5050: The Structure of a Young Planetary Nebula. *M. Meixner, C. J. Skinner, P. Temi, D. Rank, Jesse Bregman, J. R. Ball, E. Keto, J. F. Arens, & J. G. Jernigan.* 411, 266, 130-E3 (1993)

3.3 and 11.3 Micron Images of HD 44179: Evidence for an Optically Thick Polycyclic Aromatic Hydrocarbon Disk. *Jesse D. Bregman, David Rank, Pasquale Temi, Doug Hudgins, & Laura Kay.* 411, 794, 139-F1 (1993)

The Nature of Unidentified Far-Infrared Point Sources. *William T. Reach, Carl Heiles, & Bon-Chul Koo.* 412, 127, 143-F1 (1993)

Detection of the [N II] 122 and 205 Micron Lines: Densities in G333.6−0.2. *Sean W. J. Colgan, Michael R. Haas, Edwin F. Erickson, Robert H. Rubin, Janet P. Simpson, & R. W. Russell.* 413, 237, 159-B13 (1993)

An *IRAS* Sample from Co-added Images of L1641. *H. Chen, A. T. Tokunaga, & Y. Fukui.* 416, 235, 204-A4 (1993)

Polarization of the Thermal Emission from the Dust Ring at the Center of the Galaxy. *R. H. Hildebrand, J. A. Davidson, J. Dotson, D. F. Figer, G. Novak, S. R. Platt, & L. Tao.* 417, 565, 226-D1 (1993)

J H K L Imaging and *K* Polarimetry of the Bipolar Outflow NGC 2071. *D. M. Walther, E. I. Robson, C. Aspin, & W. R. F. Dent.* 418, 310, 234-G9 (1993)

The L1448 Molecular Jet. *John Bally, Elizabeth A. Lada, & Adair P. Lane.* 418, 322, 235-A10 (1993)

Luminous Radio-quiet Sources in W3(Main). *E. F. Ladd, J. R. Deane, D. B. Sanders, & C. G. Wynn-Williams.* 419, 186, 248-D11 (1993)

INFRARED: INTERSTELLAR: LINES

The Molecular Hydrogen Emission around L1551 IRS 5: Shock- Heated Molecular Gas at the Base of the Molecular Outflow. *Takuya Yamashita & Motohide Tamura.* 387, L93, 48-E5 (1992)

Infrared Emission Spectra of Benzene and Naphthalene: Implications for the Interstellar Polycyclic Aromatic Hydrocarbon Hypothesis. *Jerrell D. Brenner & John R. Barker.* 388, L39, 52-D6 (1992)

Near-Infrared Observations of the Proto–Planetary Nebula AFGL 618. *William B. Latter, Philip R. Maloney, Douglas M. Kelly, John H. Black, G. H. Rieke, & M. J. Rieke.* 389, 347, 64-C3 (1992)

Far-Infrared Observations of M17SW: The Clumpy Structure of the Photodissociation Region. *Margaret Meixner, Michael R. Haas, A. G. G. M. Tielens, E. F. Erickson, & M. Werner.* 390, 499, 81-E3 (1992)

The High-Excitation Region of NGC 7027. *N. Rowlands, J. R. Houck, T. L. Hayward, & J. W. Miles.* 390, L93, 85-C1 (1992)

The 8–13 Micron Spectrum of the Young Stellar Object WL 16. *M. S. Hanner, A. T. Tokunaga, & T. R. Geballe.* 395, L111, 154-C12 (1992)

Raman and Infrared Spectra of Polycyclic Aromatic Hydrocarbon Molecules of Possible Astrophysical Interest. *L. Colangeli, V. Mennella, G. A. Baratta, E. Bussoletti, & G. Strazzulla.* 396, 369, 159-F5 (1992)

Submillimeter Detection of Extragalactic C I Emission: IC 342. *Thomas H. Büttgenbach, Jocelyn Keene, T. G. Phillips, & Christopher K. Walker.* 397, L15, 173-C1 (1992)

Detection of [Fe II] Emission in the Galactic Center. *D. L. DePoy.* 398, 512, 190-E1 (1992)

^{13}CO and HCO^+ Observations of *IRAS* Sources in L1641. *Hua Chen, Yasuo Fukui, & Ji Yang.* 398, 544, 190-G12 (1992)

Infrared Spectroscopy of Dense Clouds in the C−H Stretch Region: Methanol and "Diamonds." *L. J. Allamandola, S. A. Sandford, A. G. G. M. Tielens, & T. M. Herbst.* 399, 134, 196-G7 (1992)

Mid-Infrared Rotational Line Emission from Interstellar Molecular Hydrogen. *Michael G. Burton, D. J. Hollenbach, & A. G. G. M. Tielens.* 399, 563, 204-G7 (1992)

Neutral Gas in the Central 2 Parsecs of the Galaxy. *J. M. Jackson, N. Geis, R. Genzel, A. I. Harris, S. Madden, A. Poglitsch, G. J. Stacey, & C. H. Townes.* 402, 173, 3-C1 (1993)

Spectroscopic Constraints on the Properties of Dust in Active Galactic Nuclei. *Ari Laor & Bruce T. Draine.* 402, 441, 8-B5 (1993)

The $^{12}C/^{13}C$ Abundance Ratio in NGC 2264. *George F. Mitchell & Jean-Pierre Maillard.* 404, L79, 40-F8 (1993)

A Search for the Rotational Transitions of H_2D^+ at 1370 GHz and H_3O^+ at 985 GHz. *R. T. Boreiko & A. L. Betz.* 405, L39, 47-F11 (1993)

H_2 in Interstellar and Extragalactic Ices: Infrared Characteristics, Ultraviolet Production, and Implications. *Scott A. Sandford & Louis J. Allamandola.* 409, L65, 111-F1 (1993)

The Ratio of Optical-to-Infrared Emission Line Strengths in Ar III as Electron Density Diagnostics for Planetary Nebulae. *F. P. Keenan & E. S. Conlon.* 410, 426, 117-C12 (1993)

Spectral Imaging of the 3.3 and 11.3 Micron Emission Bands in NGC 1333: Discovery of Spatially Separate Band Emissions. *Jesse Bregman, David Rank, Scott A. Sandford, & Pasquale Temi.* 410, 668, 122-A5 (1993)

Observation of [C II] 158 Micron Emission from the Diffuse Interstellar Medium at High Galactic Latitude. *J. Bock, V. V. Hristov, M. Kawada, H. Matsuhara, T. Matsumoto, S. Matsuura, P. D. Mauskopf, P. L. Richards, M. Tanaka, & A. E. Lange.* 410, L115, 126-D1 (1993)

Detection of the 2165 Inverse Centimeter (4.619 Micron) XCN Band in the Spectrum of L1551 IRS 5. *Stephen C. Tegler, David A. Weintraub, Louis J. Allamandola, Scott A. Sandford, Terrence W. Rettig, & Humberto Campins.* 411, 260, 130-D9 (1993)

Detection of the [N II] 122 and 205 Micron Lines: Densities in G333.6−0.2. *Sean W. J. Colgan, Michael R. Haas, Edwin F. Erickson, Robert H. Rubin, Janet P. Simpson, & R. W. Russell.* 413, 237, 159-B13 (1993)

Cometary Globules in the Southeast Quadrant of the Rosette Nebula. *Nimesh A. Patel, Taoling Xie, & Paul F. Goldsmith.* 413, 593, 163-G7 (1993)

Infrared Frequencies and Intensities for Astrophysically Important Polycyclic Aromatic Hydrocarbon Cations. *Jan Szczepanski & Martin Vala.* 414, 646, 179-C4 (1993)

Rotational Frequencies of Transition Metal Hydrides for Astrophysical Searches in the Far-Infrared. *John M. Brown, Stuart P. Beaton, & Kenneth M. Evenson.* 414, L125, 186-C6 (1993)

Theoretical Modeling of the Infrared Fluorescence from Interstellar Polycyclic Aromatic Hydrocarbons. *W. A. Schutte, A. G. G. M. Tielens, & L. J. Allamandola.* 415, 397, 189-G12 (1993)

Excitation of the [Fe III] Bubble Surrounding the Galactic Center "Mini-Cavity." *D. Lutz, A. Krabbe, & R. Genzel.* 418, 244, 234-B1 (1993)

Molecular Hydrogen in the IRAS 03282+3035 Stellar Jet. *John Baliy, David Devine, Mark Hereld, & Bernard J. Rauscher.* 418, L75, 245-D7 (1993)

The He I 2.06 Micron to Brackett γ Ratio as a Nebular Diagnostic. *Joseph C. Shields.* 419, 181, 248-D4 (1993)

The [C II] 158 Micron Emission from the Horsehead Nebula. *S. Zhou, D. T. Jaffe, J. E. Howe, N. Geis, F. Herrmann, S. C. Madden, A. Poglitsch, & G. J. Stacey.* 419, 190, 248-E3 (1993)

A [C II] 158 Micron Line Map of the ρ Ophiuchi Cloud. *Yukari Yamashita Yui, Takao Nakagawa, Yasuo Doi, Haruyuki Okuda, Hiroshi Shibai, Tetsuo Nishimura, & Frank J. Low.* 419, L37, 252-F3 (1993)

INFRARED: ISM: CONTINUUM

High-Resolution 6450–24500 $\AA$ Spectra of η Carinae. *Fred Hamann, D. L. DePoy, Sveneric Johansson, & Jay Elias.* 422, 626, 39-F1 (1994)

Spectral Imaging of the Orion Bar at 3.3, 8.4, and 11.3 Microns: Comparison with a Fluorescent Polycyclic Aromatic Hydrocarbon Model. *Jesse Bregman, Kristen Larson, David Rank, & Pasquale Temi.* 423, 326, 50-B10 (1994)

High-Resolution Far-Infrared Observations of the Ring Nebula. *C. Y. Zhang, P. M. Harvey, Beverly J. Smith, C. Colomé, & J. DiFrancesco.* 425, 687, 90-B13 (1994)

A Near-Infrared Study of the Monoceros R2 Star Formation Region. *Eric M. Howard, Judith L. Pipher, & William J. Forrest.* 425, 707, 90-D12 (1994)

IRAS Colors within M31: Evidence for Deficiency of Very Small Grains? *Cong Xu & George Helou.* 426, 109, 97-D7 (1994)

Radio Continuum, Ammonia, and Water Maser Observations of Bright, Unassociated *IRAS* Point Sources. *Mari Paz Miralles, Luis F. Rodríguez, & Eugenio Scalise.* 92, 173, 33-F3 (1994)

Day 640 Infrared Line and Continuum Measurements: Dust Formation in SN 1987A. *Sean W. J. Colgan, Michael R. Haas, Edwin F. Erickson, Steven D. Lord, & David J. Hollenbach.* 427, 874, 123-E3 (1994)

Large-Scale Characteristics of Interstellar Dust from *COBE* DIRBE Observations. *T. J. Sodroski, C. Bennett, N. Boggess, E. Dwek, B. A. Franz, M. G. Hauser, T. Kelsall, S. H. Moseley, N. Odegard, R. F. Silverberg, & J. L. Weiland.* 428, 638, 138-C1 (1994)

High-Resolution Images of the Dust and Ionized Gas Distribution in the Carina Nebula. *Jonathan B. Z. Whiteoak.* 429, 225, 146-G7 (1994)

A Multiwavelength Study of IRAS 19550+3248: A Protostar Possibly Formed by a Cloud-Cloud Collision. *Bon-Chul Koo, Youngung Lee, G. A. Fuller, Myung Gyoon Lee, Suk-Minn Kwon, & Jae-Hoon Jung.* 429, 233, 147-A7 (1994)

Spectral Imaging of the Ney-Allen Nebula at 10 and 20 Microns. *T. L. Hayward.* 429, 726, 154-F5 (1994)

Thermal Infrared Imaging of Subarcsecond Structure in the Trapezium Nebula. *T. L. Hayward, J. R. Houck, & J. W. Miles.* 433, 157, 210-C1 (1994)

G5.89−0.39: A Compact H II Region with a Very Dense Circumstellar Dust Torus. *Paul M. Harvey, Daniel F. Lester, Cecilia Colomé, Beverly Smith, Jean-Louis Monin, & Isabelle Vauglin.* 433, 187, 210-F1 (1994)

A K' Imaging Survey of Molecular Outflow Sources. *Klaus-Werner Hodapp.* 94, 615, 60-D12 (1994)

A Quantitative Analysis of *IRAS* Maps of Molecular Clouds. *Jennifer J. Wiseman & Fred C. Adams.* 435, 708, 255-G3 (1994)

Ultraviolet-illuminated Molecular Cloud Boundaries: Extended [C II] 158 Micron Emission toward L1630. *D. T. Jaffe, S. Zhou, J. E. Howe,*

F. Herrmann, S. C. Madden, A. Poglitsch, P. P. van der Werf, & G. J. Stacey. 436, 203, 264-A10 (1994)

Discovery of a Molecular Hydrogen Jet near IC 348. *Mark J. McCaughrean, John T. Rayner, & Hans Zinnecker.* 436, L189, 282-C9 (1994)

The Near-Infrared Structure and Spectra of the Bipolar Nebulae M2-9 and AFGL 2688: The Role of Ultraviolet Pumping and Shocks in Molecular Hydrogen Excitation. *Joseph L. Hora & William B. Latter.* 437, 281, 287-A8 (1994)

IRAS Images of Nearby Dark Clouds. *Douglas O. S. Wood, Philip C. Myers, & Debra A. Daugherty.* 95, 457, 70-E3 (1994)

Spatially Resolved Submillimeter Continuum Emission toward L1551 IRS 5. *E. F. Ladd, G. A. Fuller, R. Padman, P. C. Myers, & Fred C. Adams.* 439, 771, 35-C2 (1995)

Millimeter Observations of a Complete Sample of *IRAS* Galaxies: Dust Emission and Absorption in Spirals. *Alberto Franceschini & Paola Andreani.* 440, L5, 48-B8 (1995)

Adaptive Optics Imaging of Proto–Planetary Nebulae: Frosty Leo and the Red Rectangle. *F. Roddier, C. Roddier, J. E. Graves, & M. J. Northcott.* 443, 249, 98-E7 (1995)

High-Resolution Far-Infrared Observations of DR 21. *Cecilia Colomé, Paul M. Harvey, Daniel F. Lester, Murray F. Campbell, & Harold M. Butner.* 447, 236, 175-E5 (1995)

Infrared Emission from Globular Clusters: Limits on Stellar Mass Loss and Interstellar Dust. *G. R. Knapp, J. E. Gunn, & A. J. Connolly.* 448, 195, 194-G4 (1995)

Does Near-Infrared Polarimetry Reveal the Magnetic Field in Cold Dark Clouds? *Alyssa A. Goodman, Terry J. Jones, Elizabeth A. Lada, & Philip C. Myers.* 448, 748, 205-B4 (1995)

The Distribution of Warm Dust in the Star-forming Region Cepheus A: Infrared Constraints. *Cecilia Colomé & Paul M. Harvey.* 449, 656, 221-F8 (1995)

The Shapes and Alignment Properties of Interstellar Dust Grains. *Roger H. Hildebrand & Mark Dragovan.* 450, 663, 239-G13 (1995)

Far-Infrared Spectral Observations of the Galaxy by *COBE*. *W. T. Reach, E. Dwek, D. J. Fixsen, T. Hewagama, J. C. Mather, R. A. Shafer, A. J. Banday, C. L. Bennett, E. S. Cheng, R. E. Eplee, Jr., D. Leisawitz, P. M. Lubin, S. M. Read, L. P. Rosen, F. G. D. Shuman, G. F. Smoot, T. J. Sodroski, & E. L. Wright.* 451, 188, 248-E10 (1995)

Investigating the Near-Infrared Properties of Planetary Nebulae. I. Narrowband Images. *William B. Latter, Douglas M. Kelly, Joseph L. Hora, & Lynne K. Deutsch.* 100, 159, 48-A8 (1995)

High-Resolution Far-Infrared Mapping of the Star-forming Region RCW 122C. *C. Y. Zhang, P. M. Harvey, Beverly J. Smith, C. Colomé, & J. DiFrancesco.* 452, 308, 266-D1 (1995)

Discovery of an Extended Nebula around AFGL 2343 (HD 179821) at 10 Microns. *G. W. Hawkins, C. J. Skinner, M. M. Meixner, J. G. Jernigan, J. F. Arens, E. Keto, & J. R. Graham.* 452, 314, 266-D10 (1995)

The Nebular Extinction in the Orion Nebula. *Manuel A. Bautista, Richard W. Pogge, & D. L. DePoy.* 452, 685, 274-B7 (1995)

IRAS LRS Spectra of the Sharpless H II Regions. *P. S. Chen, H. Gao, & G. Z. Xiong.* 100, 389, 51-D13 (1995)

X-Ray Morphology, Kinematics, and Geometry of the Eridanus Soft X-Ray Enhancement. *Z. Guo, D. N. Burrows, W. T. Sanders, S. L. Snowden, & B. E. Penprase.* 453, 256, 284-E7 (1995)

The Infrared Nebula and Outflow in Lynds 483. *G. A. Fuller, E. A. Lada, C. R. Masson, & P. C. Myers.* 453, 754, 294-C3 (1995)

Moderate-Density Regions in the Lynds 134 Cloud Complex. *R. J. Laureijs, Y. Fukui, G. Helou, A. Mizuno, K. Imaoka, & F. O. Clark.* 101, 87, 54-A10 (1995)

High-Resolution Far-Infrared Observations and Radiative-Transfer Models of W3 IRS 4 and IRS 5. *M. F. Campbell, H. M. Butner, P. M. Harvey, N. J. Evans II, M. B. Campbell, & C. N. Sabbey.* 454, 831, 313-C6 (1995)

INFRARED: ISM: LINES AND BANDS

Nebular Properties from Far-Infrared Spectroscopy. *Robert H. Rubin, Janet P. Simpson, Steven D. Lord, Sean W. J. Colgan, Edwin F. Erickson, & Michael R. Haas.* 420, 772, 12-E1 (1994)

Near-Infrared Spectroscopy of Proto–Planetary Nebulae. *Bruce J. Hrivnak, Sun Kwok, & T. R. Geballe.* 420, 783, 12-F1 (1994)

The Bipolar Symmetry of Ring-like Planetary Nebulae: Molecular Hydrogen Emission from Halos. *Joel H. Kastner, Ian Gatley, K. M. Merrill, R. Probst, & David A. Weintraub.* 421, 600, 25-F2 (1994)

Starburst Models of Merging Galaxies. *A. H. Prestwich, R. D. Joseph, & Gillian S. Wright.* 422, 73, 31-A3 (1994)

The He I 2.06 Micron to Brγ Ratio in 12 Planetary Nebulae. *D. L. DePoy & Joseph C. Shields.* 422, 187, 32-D7 (1994)

High-Resolution 6450–24500 Å Spectra of η Carinae. *Fred Hamann, D. L. DePoy, Sveneric Johansson, & Jay Elias.* 422, 626, 39-F1 (1994)

Laboratory Measurements of Rotational Transitions of Lithium Hydride in the Far-Infrared. *M. Bellini, P. de Natale, M. Inguscio, E. Fink, D. Galli, & F. Palla.* 424, 507, 68-B4 (1994)

A Near-Infrared Study of the Monoceros R2 Star Formation Region. *Eric M. Howard, Judith L. Pipher, & William J. Forrest.* 425, 707, 90-D12 (1994)

[C II] 158 Micron and [O I] 63 Micron Observations of the Galactic Center Region. *Kohei Mizutani, Toshinori Maihara, Hideo Matsuhara, Takao Nakagawa, Hiroshi Shibai, Haruyuki Okuda, Yukiyasu Kobayashi, Norihisa Hiromoto, Tetsuo Nishimura, & Frank J. Low.* 91, 613, 27-G5 (1994)

Solid Carbon Monoxide in the Serpens Dark Cloud. *J. E. Chiar, A. J. Adamson, T. H. Kerr, & D. C. B. Whittet.* 426, 240, 99-B2 (1994)

Probing the Galactic Disk and Halo. I. The NGC 3783 Sight Line. *Limin Lu, Blair D. Savage, & Kenneth R. Sembach.* 426, 563, 105-D7 (1994)

0.95–1.3 Micron Spectrophotometry of Two Bright Filaments of the Crab Nebula. *Richard J. Rudy, George S. Rossano, & R. C. Puetter.* 426, 646, 106-D10 (1994)

Radio Continuum, Ammonia, and Water Maser Observations of Bright, Unassociated *IRAS* Point Sources. *Mari Paz Miralles, Luis F. Rodríguez, & Eugenio Scalise.* 92, 173, 33-F3 (1994)

The Highly Ionized Regions of NGC 6302 and NGC 6537. *N. Rowlands, J. R. Houck, & T. Herter.* 427, 867, 123-D8 (1994)

Day 640 Infrared Line and Continuum Measurements: Dust Formation in SN 1987A. *Sean W. J. Colgan, Michael R. Haas, Edwin F. Erickson, Steven D. Lord, & David J. Hollenbach.* 427, 874, 123-E3 (1994)

The S140 Core: Aperture Synthesis HCO^+ and SO Observations. *D. J. Wilner & W. J. Welch.* 427, 898, 123-G3 (1994)

Carbon Recombination Lines as a Diagnostic of Photodissociation Regions. *A. Natta, C. M. Walmsley, & A. G. G. M. Tielens.* 428, 209, 130-F12 (1994)

Detection of Absorption by H_2 in Molecular Clouds: A Direct Measurement of the H_2:CO Ratio. *J. H. Lacy, R. Knacke, T. R. Geballe, & A. T. Tokunaga.* 428, L69, 142-G1 (1994)

Overtone Emission from Interstellar Polycyclic Aromatic Hydrocarbons. *W. W. Duley.* 429, L91, 158-D11 (1994)

Nebular Properties and the Ionizing Radiation Field in the Galactic Center. *Joseph C. Shields & Gary J. Ferland.* 430, 236, 162-A9 (1994)

A Survey of the Large Magellanic Cloud in the [C II] 158 Micron Line. *Kenji Mochizuki, Takao Nakagawa, Yasuo Doi, Yukari Y. Yui, Haruyuki Okuda, Hiroshi Shibai, Masao Yui, Tetsuo Nishimura, & Frank J. Low.* 430, L37, 165-E13 (1994)

The Nature of CO and H_2O Ices in the Corona Australis Molecular Cloud. *Masuo Tanaka, Tetsuya Nagata, Shuji Sato, & Tetsuo Yamamoto.* 430, 779, 171-E8 (1994)

Shocked Pure-rotational Emission from H_2 in Orion. *Parvinder S. Parmar, John H. Lacy, & Jeffrey M. Achtermann.* 430, 786, 171-F3 (1994)

Infrared Absorption Due to Hydrogenated Amorphous Carbon in the Diffuse Interstellar Medium. *W. W. Duley.* 430, L133, 175-B5 (1994)

Interpretation of the 4141 Inverse Centimeters (2.415 Microns) Interstellar Infrared Absorption Feature. *V. Buch & J. P. Devlin.* 431, L135, 192-C11 (1994)

Near-Infrared Observations of W51. *Jeffrey D. Goldader & C. G. Wynn-Williams.* 433, 164, 210-D1 (1994)

The 3.2–3.6 Micron Spectra of Monoceros R2/IRS-3 and Elias 16. *K. Sellgren, R. G. Smith, & T. Y. Brooke.* 433, 179, 210-E5 (1994)

Two Micron Spectrophotometry of the Orion Nebula and the Detection of Significant [Fe III] Emission. *D. L. DePoy & Richard W. Pogge.* 433, 725, 220-B1 (1994)

Vibrational Excitation in the Products of Electron-Ion Recombination: A Test of Theory for Ions of Interstellar Significance. *Nigel G. Adams & Lucia M. Babcock.* 434, 184, 228-A1 (1994)

Detection of the Overtone of the 3.3 Micron Emission Feature in IRAS 21282+5050. *T. R. Geballe, C. Joblin, L. B. d'Hendecourt, M. Jourdain de Muizon, A. G. G. M. Tielens, & A. Léger.* 434, L15, 232-C8 (1994)

Relative Emission-Line Strengths for the 146 and 63 Micron Transitions in O I and a Comparison with Far-Infrared Observations of Photodissociation

Regions. *F. P. Keenan, E. S. Conlon, & R. H. Rubin.* 434, 811, 239-B3 (1994)

On the Origin of the Diffuse C^+ 158 Micron Line Emission. *Carl Heiles.* 436, 720, 275-D3 (1994)

H_2 Emission as a Tracer of Molecular Hydrogen: Large-Scale Observations of Orion. *M. L. Luhman, D. T. Jaffe, L. D. Keller, & Soojong Pak.* 436, L185, 282-C1 (1994)

Discovery of a Molecular Hydrogen Jet near IC 348. *Mark J. McCaughrean, John T. Rayner, & Hans Zinnecker.* 436, L189, 282-C9 (1994)

Photon-dominated Regions around Cool Stars: The Effects of the Color Temperature of the Radiation Field. *Marco Spaans, A. G. G. M. Tielens, Ewine F. van Dishoeck, & E. L. O. Bakes.* 437, 270, 286-G7 (1994)

Near-Infrared Absorption Spectroscopy of Interstellar Hydrocarbon Grains. *Y. J. Pendleton, S. A. Sandford, L. J. Allamandola, A. G. G. M. Tielens, & K. Sellgren.* 437, 683, 295-B9 (1994)

The Galactic Distribution of Aliphatic Hydrocarbons in the Diffuse Interstellar Medium. *Scott A. Sandford, Yvonne J. Pendleton, & Louis J. Allamandola.* 440, 697, 52-G2 (1995)

A Comparison of Near-Infrared Spectra of the Galactic Center Compact He I Emission-Line Sources and Early-Type Mass-losing Stars. *R. D. Blum, D. L. DePoy, & K. Sellgren.* 441, 603, 70-D7 (1995)

3.4 Micron Emission from Ultraviolet Excitation of Alkanes. *G. P. Pinho & W. W. Duley.* 442, L41, 85-C1 (1995)

Laboratory Studies of 3.3 Micron Emission from Naphthalene Induced by 193 and 248 Nanometer Excitation. *Richard M. Williams & Stephen R. Leone.* 443, 675, 107-B13 (1995)

Diamond, Aromatic, and Aliphatic Components of Interstellar Dust Grains: Random Covalent Networks in Carbonaceous Grains. *W. W. Duley.* 445, 240, 135-G7 (1995)

Patterns of High-Velocity Molecular Gas near Sagittarius A*. *H. S. Liszt & W. B. Burton.* 98, 679, 32-F4 (1995)

High Spatial Resolution Fabry-Perot Imaging of M82: Near-Infrared Recombination Line Observations. *Shobita Satyapal, Dan M. Watson, Judith L. Pipher, William J. Forrest, Diana Coppenbarger, S. Nicholas Raines, Scott Libonate, François Piché, Matthew A. Greenhouse, Howard A. Smith, Keith L. Thompson, Jacqueline Fischer, Charles E. Woodward, & Tracy Hodge.* 448, 611, 203-B10 (1995)

Negative Search for a Counterpart to the Gamma-Ray Repeater Source 0525−66. *John R. Dickel, You-Hua Chu, Christopher Gelino, Ross Beyer, Michael G. Burton, D. K. Milne, Jason Spyromilio, David A. Green, Christopher Wilkinson, & Norbert Junkes.* 448, 623, 203-D1 (1995)

Infrared Diagnostics of the Formation of H_2 on Interstellar Dust. *J. Le Bourlot, G. Pineau des Forêts, E. Roueff, A. Dalgarno, & R. Gredel.* 449, 178, 212-E11 (1995)

Detection of Pure Rotational H_2 Emission from the Supernova Remnant IC 443: Further Evidence for a Partially Dissociating J-Shock. *Matthew J. Richter, James. R. Graham, Gillian S. Wright, Douglas M. Kelly, & John H. Lacy.* 449, L83, 217-D2 (1995)

Solid Carbonyl Sulphide (OCS) in W33A. *M. E. Palumbo, A. G. G. M. Tielens, & A. T. Tokunaga.* 449, 674, 222-A10 (1995)

Observation of Infrared and Radio Lines of Molecules toward GL 2591 and Comparison to Physical and Chemical Models. *John S. Carr, Neal J. Evans II, J. H. Lacy, & Shudong Zhou.* 450, 667, 240-A7 (1995)

Infrared Imaging and Spectroscopy of the Molecular Shock in IC 443. *Matthew J. Richter, James R. Graham, & Gillian S. Wright.* 454, 277, 303-B1 (1995)

A Multiwavelength Study of 30 Doradus: The Interstellar Medium in a Low-Metallicity Galaxy. *A. Poglitsch, A. Krabbe, S. C. Madden, T. Nikola, N. Geis, L. E. B. Johansson, G. J. Stacey, & A. Sternberg.* 454, 293, 303-C8 (1995)

Ionized Carbon in NGC 6334. *R. T. Boreiko & A. L. Betz.* 454, 307, 303-E3 (1995)

Organic Compounds Produced by Photolysis of Realistic Interstellar and Cometary Ice Analogs Containing Methanol. *Max P. Bernstein, Scott A. Sandford, Louis J. Allamandola, Sherwood Chang, & Maureen A. Scharberg.* 454, 327, 303-G1 (1995)

Twin Herbig-Haro Jets and Molecular Outflows in L1228. *John Bally, David Devine, Robert A. Fesen, & Adair P. Lane.* 454, 345, 304-A9 (1995)

Discovery of Herbig-Haro Objects and Molecular Hydrogen Jets near Bok Globule CB 34. *Miguel C. Moreira & João L. Yun.* 454, 850, 313-E1 (1995)

Accurate Wavenumbers for Mid-Infrared Fine-Structure Lines. *Douglas M. Kelly & John H. Lacy.* 454, L161, 317-A1 (1995)

Time-dependent Photodissociation Regions. *David Hollenbach & Antonella Natta.* 455, 133, 320-A12 (1995)

High-Resolution Studies of Solid CO in the Taurus Dark Cloud: Characterizing the Ices in Quiescent Clouds. *J. E. Chiar, A. J. Adamson, T. H. Kerr, & D. C. B. Whittet.* 455, 234, 321-C14 (1995)

High-Density Amorphous Ice, the Frost on Interstellar Grains. *P. Jenniskens, D. F. Blake, M. A. Wilson, & A. Pohorille.* 455, 389, 323-D10 (1995)

Deficit of Far-Infrared [C II] Line Emission toward the Galactic Center. *Takao Nakagawa, Yasuo Doi, Yukari Yamashita Yui, Haruyuki Okuda, Kenji Mochizuki, Hiroshi Shibai, Tetsuo Nishimura, & Frank J. Low.* 455, L35, 324-G3 (1995)

Approaching the Interstellar Grain Organic Refractory Component. *J. Mayo Greenberg, Aigen Li, Celia X. Mendoza-Gómez, Willem A. Schutte, Perry A. Gerakines, & Menno de Groot.* 455, L177, 334-F1 (1995)

INFRARED: SOLAR SYSTEM

Occurrence of Global-Scale Emissions on Jupiter: Proposed Identification of Jovian Dimer H_2 Emission. *L. M. Trafton & J. K. G. Watson.* 385, 320, 15-G8 (1992)

Submillimeter Spectrum of Low-Temperature Hydrogen: The Pure Translational Band of H_2 and the $R(0)$ Line of HD. *E. H. Wishnow, I. Ozier, & H. P. Gush.* 392, L43, 106-F1 (1992)

Line-resolved Spectroscopy of the Jovian H_3^+ Auroral Emission at 3.5 Micrometers. *Pierre Drossart, Jean-Pierre Maillard, John Caldwell, & Jan Rosenqvist.* 402, L25, 6-E1 (1993)

Detection of H_3^+ from Uranus. *L. M. Trafton, T. R. Geballe, S. Miller, J. Tennyson, & G. E. Ballester.* 405, 761, 52-E1 (1993)

Detection of H_3^+ Infrared Emission Lines in Saturn. *T. R. Geballe, M.-F. Jagod, & T. Oka.* 408, L109, 95-F7 (1993)

Solar Magnetic Field Studies Using the 12 Micron Emission Lines. II. Stokes Profiles and Vector Field Samples in Sunspots. *Tilak Hewagama, Drake Deming, Donald E. Jennings, Vladimir Osherovich, Gunter Wiedemann, David Zipoy, Donald L. Mickey, & Howard Garcia.* 86, 313, 18-B7 (1993)

A Non-LTE Model for the Jovian Methane Infrared Emissions at High Spectral Resolution. *Rangasayi N. Halthore, J. E. Allen, Jr., & Philip L. DeCola.* 424, L61, 70-A4 (1994)

The 8–13 Micron Spectra of Comets and the Composition of Silicate Grains. *Martha S. Hanner, David K. Lynch, & Ray W. Russell.* 425, 274, 83-F3 (1994)

Line Strength and Self-broadening Coefficient of the Pure Rotational $S(1)$ Quadrupole Line in H_2. *Dennis C. Reuter & J. Marcos Sirota.* 428, L77, 143-A1 (1994)

COBE DIRBE Near-Infrared Polarimetry of the Zodiacal Light: Initial Results. *G. B. Berriman, N. W. Boggess, M. G. Hauser, T. Kelsall, C. M. Lisse, S. H. Moseley, W. T. Reach, & R. F. Silverberg.* 431, L63, 183-C1 (1994)

Infrared Observations of Comet Austin (1990 V) by the *COBE*/Diffuse Infrared Background Experiment. *C. M. Lisse, H. T. Freudenreich, M. G. Hauser, T. Kelsall, S. H. Moseley, W. T. Reach, & R. F. Silverberg.* 432, L71, 200-B13 (1994)

Near- and Far-Infrared Observations of Interplanetary Dust Bands from the *COBE* Diffuse Infrared Background Experiment. *William J. Spiesman, Michael G. Hauser, Thomas Kelsall, Carey M. Lisse, S. Harvey Moseley, Jr., William T. Reach, Robert F. Silverberg, Sally W. Stemwedel, & Janet L. Weiland.* 442, 662, 89-B8 (1995)

Detection of $H_2{}^{18}O$ in Jupiter. *Keith S. Noll, T. R. Geballe, & Roger F. Knacke.* 453, L49, 290-A11 (1995)

IRAS Measurements of Diffuse Solar System Radiation: Annual Sky Brightness Variation and Geometry of the Interplanetary Dust Cloud. *J. M. Vrtilek & M. G. Hauser.* 455, 677, 331-C6 (1995)

INFRARED: SOURCES

An Infrared Jet in Centaurus A: A Link to the Extranuclear Activity in Distant Radio Galaxies? *Marshall Joy, P. M. Harvey, E. V. Tollestrup, K. Sellgren, P. J. McGregor, & A. R. Hyland.* 366, 82, 2-A13 (1991)

Far-Infrared Observations and the Structure of Wolf-Rayet Ring Nebulae. *A. P. Marston.* 366, 181, 3-C9 (1991)

Far-Infrared and Submillimeter-Wavelength Observations of Star-forming Dense Cores. I. Spectra. *E. F. Ladd, Fred C. Adams, S. Casey, J. A. Davidson, G. A. Fuller, D. A. Harper, P. C. Myers, & R. Padman.* 366, 203, 3-E7 (1991)

The Circumstellar Disks of β Pictoris Analogs. *C. A. Grady, Frederick C. Bruhweiler, K. P. Cheng, W. A. Chiu, & Y. Kondo.* 367, 296, 15-F9 (1991)

Distribution of Dust about o Ceti and α Orionis Based on 11 Micron Spatial Interferometry. *M. Bester, W. C. Danchi, C. G. Degiacomi, C. H. Townes, & T. R. Geballe.* 367, L27, 17-E1 (1991)

The Number Counts and Infrared Backgrounds from Infrared-bright Galaxies. *P. B. Hacking & B. T. Soifer.* 367, L49, 22-B7 (1991)

Search for Vega-like Nearby Stars with 12 Micron Excess. *Hartmut H. Aumann & Ronald G. Probst.* 368, 264, 26-D1 (1991)

CO Excitation and H_2 Masses of Infrared-luminous Galaxies. *Simon J. E. Radford, P. M. Solomon, & D. Downes.* 368, L15, 28-C7 (1991)

An Infrared Analysis of Puppis A. *Richard G. Arendt, Eli Dwek, & Robert Petre.* 368, 474, 31-A7 (1991)

Dust Properties around Evolved Stars from Far-Infrared Size Limits. *Paul M. Harvey, Daniel F. Lester, David Brock, & Marshall Joy.* 368, 558, 32-A8 (1991)

On the Possible Bipolar Nature of 21 Micron *IRAS* Sources. *Bruce J. Hrivnak & S. Kwok.* 368, 564, 32-B1 (1991)

Young Stellar Objects Detected by *IRAS*. *Frank O. Clark.* 75, 611, 9-B5 (1991)

Infrared Polarimetry of Quasars. *Michael L. Sitko & Yudong Zhu.* 369, 106, 37-C5 (1991)

Zodiacal Emission. II. Dust near the Ecliptic. *William T. Reach.* 369, 529, 44-C13 (1991)

The Joint Far-Infrared–Optical Luminosity Function for Spiral Galaxies and Data for the Abell 400 and Cancer Clusters. *Edvige Corbelli, Edwin E. Salpeter, & John M. Dickey.* 370, 49, 47-F4 (1991)

The Effect of Inclination-dependent Selection on *IRAS* Galaxy Detection Rates. *A. J. Connolly, R. D. Joseph, & P. A. James.* 370, 140, 48-G6 (1991)

Molecular Gas in Luminous Infrared Galaxies. *D. B. Sanders, N. Z. Scoville, & B. T. Soifer.* 370, 158, 49-B1 (1991)

High-Resolution CO Observations of Luminous Infrared Galaxies with Large L_{ir}/L_B Ratios: IRAS 10173+0828, Zw 049.057, IRAS 17208−0014. *P. Planesas, I. F. Mirabel, & D. B. Sanders.* 370, 172, 49-C5 (1991)

Far-Infrared Counterpart to the Optical and H I Plume in the Leo Triplet of Galaxies: NGC 3623, NGC 3627, and NGC 3628. *D. H. Hughes, P. N. Appleton, & J. M. Schombert.* 370, 176, 49-C11 (1991)

IRAS 23545+6508, a Dissociating Star: Prototype for a New Observational Class? *P. E. Dewdney, R. S. Roger, C. R. Purton, & W. H. McCutcheon.* 370, 243, 50-C1 (1991)

A Search for Embedded Young Stellar Objects in and near the IC 1396 Complex. *Richard D. Schwartz, Armen L. Gyulbudaghian, & Bruce A. Wilking.* 370, 263, 50-D9 (1991)

What *COBE* Might See: The Far-Infrared Cosmological Background. *C. A. Beichman & G. Helou.* 370, L1, 53-B1 (1991)

Interstellar Matter in Early-Type Galaxies. I. The Catalog. *Morton S. Roberts, David E. Hogg, Joel N. Bregman, William R. Forman, & Christine Jones.* 75, 751, 11-F5 (1991)

Bok Globules and Small Molecular Clouds: Deep *IRAS* Photometry and ^{12}CO Spectroscopy. *Dan P. Clemens, João Lin Yun, & Mark H. Heyer.* 75, 877, 13-E1 (1991)

A Survey for Infrared Excesses among High Galactic Latitude SAO Stars. *Robert E. Stencel & Dana E. Backman.* 75, 905, 14-A1 (1991)

Protostellar Condensations in the Core of NGC 2024. *D. C. Lis, J. E. Carlstrom, & T. G. Phillips.* 370, 583, 55-F5 (1991)

Far-Infrared Line and Continuum Observations of G0.095+0.012 and the E2 Thermal Radio Filament near the Galactic Center. *Edwin F. Erickson, Sean W. J. Colgan, J. P. Simpson, Robert H. Rubin, Mark Morris, & Michael R. Haas.* 370, L69, 59-C1 (1991)

A Near-Infrared Imaging Survey of Interacting Galaxies: The Disk-Disk Merger Candidates Subset. *S. A. Stanford & H. A. Bushouse.* 371, 92, 61-C1 (1991)

Far-Infrared Properties of NGC 6822. *John S. Gallagher III, Deidre A. Hunter, Fred C. Gillett, & Walter L. Rice.* 371, 142, 61-G1 (1991)

The Infrared Properties of Compact Galactic Radio Sources: The Young and the Restless. *Richard L. White, Robert H. Becker, & David J. Helfand.* 371, 148, 62-A1 (1991)

A 2.2 Micron Survey in the L1630 Molecular Cloud. *Elizabeth A. Lada, D. L. DePoy, Neal J. Evans II, & Ian Gatley.* 371, 171, 62-C1 (1991)

Emission from Dust in Visual Reflection Nebulae at Infrared and Submillimeter Wavelengths. *Sean C. Casey.* 371, 183, 62-D1 (1991)

Near-Infrared Emission-Line Images of Three Herbig-Haro Objects. *Karl R. Stapelfeldt, Charles A. Beichman, J. Jeff Hester, Nicholas Z. Scoville, & Thomas N. Gautier III.* 371, 226, 63-A1 (1991)

An Extremely High Velocity CO Outflow from NGC 7538 IRS 9. *George F. Mitchell & Tatsuhiko I. Hasegawa.* 371, L33, 66-E1 (1991)

The Rate and Efficiency of High-Mass Star Formation along the Hubble Sequence. *Nicholas A. Devereux & Judith S. Young.* 371, 515, 68-A1 (1991)

Multifrequency VLA Observations of Radio Continuum from IRAS 16293−2422. *R. Estalella, G. Anglada, L. F. Rodríguez, & G. Garay.* 371, 626, 69-C12 (1991)

The Carbon-rich Proto–Planetary Nebula IRAS 22272+5435. *Bruce J. Hrivnak & Sun Kwok.* 371, 631, 69-D6 (1991)

IRAS Detection of Very Cold Dust in the Lynds 134 Cloud Complex. *R. J. Laureijs, F. O. Clark, & T. Prusti.* 372, 185, 76-C4 (1991)

A Redshift Survey of *IRAS* Galaxies. II. Methods for Determining Self-consistent Velocity and Density Fields. *Amos Yahil, Michael A. Strauss, Marc Davis, & John P. Huchra.* 372, 380, 80-E5 (1991)

A Redshift Survey of *IRAS* Galaxies. III. Reconstruction of the Velocity and Density Fields in *N*-Body Model Universes. *Marc Davis, Michael A. Strauss, & Amos Yahil.* 372, 394, 80-F7 (1991)

The Influence of High-Density Environment on the Radio–Far-Infrared Correlation of Spiral Galaxies. *T. K. Menon.* 372, 419, 81-A7 (1991)

Optical and Near-Infrared Polarimetry of the Infrared Luminous Galaxy IRAS 23060+0505. *J. H. Hough, C. Brindle, Beverley J. Wills, D. Wills, & J. Bailey.* 372, 478, 81-F9 (1991)

Molecular Outflows in the L1641 Region of Orion. *James A. Morgan & John Bally.* 372, 505, 82-B1 (1991)

Discovery of an Infrared Nucleus in Cygnus A: An Obscured Quasar Revealed? *S. Djorgovski, N. Weir, K. Matthews, & J. R. Graham.* 372, L67, 85-C5 (1991)

The Extinction to the H_2 Line Emission in the DR 21 Outflow Source. *Daniel Nadeau, Martin Riopel, & T. R. Geballe.* 372, L103, 85-F5 (1991)

A Millimeter-Wave Line Study of L1287: A Case of Induced Star Formation by Stellar Wind Compression? *Ji Yang, Tomofumi Umemoto, Takahiro Iwata, & Yasuo Fukui.* 373, 137, 87-F7 (1991)

Near-Infrared Long-Slit Spectroscopy of IRAS 14348−1447. *Tadashi Nakajima, Kimiaki Kawara, Minoru Nishida, & Brooke Gregory.* 373, 452, 93-E6 (1991)

The Dense, Inner Part of the Protostellar Disk: Protostar Candidates in GGD 27 IRS. *Takuya Yamashita, Yasuhiro Murata, Ryohei Kawabe, Norio Kaifu, & Motohide Tamura.* 373, 560, 95-A1 (1991)

Spatial Studies of Planetary Nebulae with *IRAS*. *G. W. Hawkins & B. Zuckerman.* 374, 227, 100-G11 (1991)

Two Micron Morphology of Candidate Protostars. *Motohide Tamura, Ian Gatley, William Waller, & Michael W. Werner.* 374, L25, 103-E7 (1991)

Infrared Emission in Paired Galaxies. II. Luminosity Functions and Far-Infrared Properties. *Cong Xu & Jack W. Sulentic.* 374, 407, 104-C5 (1991)

Time Evolution of Interstellar Dust and Far-Infrared Luminosity of Disk Galaxies. *Boqi Wang.* 374, 456, 104-G1 (1991)

Integrated Far-Infrared Background from Galaxies. *Boqi Wang.* 374, 465, 104-G12 (1991)

Infrared Images of M17. *Charles J. Lada, D. L. DePoy, K. M. Merrill, & Ian Gatley.* 374, 533, 105-G1 (1991)

A Survey of the 158 Micron [C II] Fine-Structure Line in the Central 50 Parsecs of The Galaxy. *A. Poglitsch, G. J. Stacey, N. Geis, M. Haggerty, J. Jackson, M. Rumitz, R. Genzel, & C. H. Townes.* 374, L33, 110-B5 (1991)

Ram-Pressure Stripping of the Multiphase Interstellar Medium of the Virgo Cluster Elliptical Galaxy M86 (NGC 4406). *David A. White, A. C. Fabian, W. Forman, C. Jones, & C. Stern.* 375, 35, 111-D9 (1991)

Diffuse Galactic Emission at Millimetric Wavelengths. *P. Andreani, G. Dall'Oglio, L. Martinis, L. Piccirillo, L. Pizzo, L. Rossi, & C. Venturino.* 375, 148, 112-G5 (1991)

Observations That Link Infrared Cirrus and Ultraviolet Extinction. *John A. Hackwell, James H. Hecht, & Mauricio Tapia.* 375, 163, 113-A9 (1991)

Telescope Beam-Profile Diagnostics and the Solar Limb. *Charles A. Lindsey & Thomas L. Roellig.* 375, 414, 116-A9 (1991)

Infrared Broad Emission Lines from an Obscured Quasar, IRAS 23060+0505. *Tadashi Nakajima, Nathaniel P. Carleton, & Minoru Nishida.* 375, L1, 117-A7 (1991)

An Infrared/Optical Investigation of 100 Micron "Cirrus." *Elizabeth S. Paley, Frank J. Low, John T. McGraw, Roc M. Cutri, & Hans-Walter Rix.* 376, 335, 129-A13 (1991)

NGC 1333 IRAS 4: A Very Young, Low-Luminosity Binary System. *Göran Sandell, Colin Aspin, William D. Duncan, Adrian P. G. Russell, & E. Ian Robson.* 376, L17, 130-C1 (1991)

NGC 7538 IRS 1: Subarcsecond Resolution Recombination Line and $^{15}NH_3$ Maser Observations. *R. A. Gaume, K. J. Johnston, H. A. Nguyen, T. L. Wilson, H. R. Dickel, W. M. Goss, & M. C. H. Wright.* 376, 608, 133-G12 (1991)

A Double Radio Source at the Center of the Outflow in L723. *Guillem Anglada, Robert Estalella, Luis F. Rodríguez, José M. Torrelles, Rosario López, & Jorge Cantó.* 376, 615, 134-A7 (1991)

Testing Models of Low-Mass Star Formation: High-Resolution Far-Infrared Observations of L1551 IRS 5. *Harold M. Butner, Neal J. Evans II, Daniel F. Lester, Russell M. Levreault, & Stephen E. Strom.* 376, 636, 134-C6 (1991)

Two Micron Spectroscopy of Infrared Sources in NGC 2071. *D. M. Walther, T. R. Geballe, & E. I. Robson.* 377, 246, 141-A9 (1991)

Infrared Emission Regions in the Interacting Galaxy System Arp 299. *C. G. Wynn-Williams, S. A. Eales, E. E. Becklin, K.-W. Hodapp, R. D. Joseph, I. S. McLean, D. A. Simons, & G. S. Wright.* 377, 426, 145-A13 (1991)

Compact Starbursts in Ultraluminous Infrared Galaxies. *J. J. Condon, Z.-P. Huang, Q. F. Yin, & T. X. Thuan.* 378, 65, 151-G5 (1991)

Galactic Structure from the *Spacelab* Infrared Telescope. II. Luminosity Models of the Milky Way. *S. M. Kent, T. M. Dame, & G. Fazio.* 378, 131, 152-F1 (1991)

IRAS 17380−3031: A New Dusty Late WC-Type Wolf-Rayet Star. *Martin Cohen, K. A. van der Hucht, P. M. Williams, & P. S. Thé.* 378, 302, 154-F7 (1991)

Infrared Polarization Images of Star-forming Regions. I. The Ubiquity of Bipolar Structure. *M. Tamura, Ian Gatley, R. R. Joyce, M. Ueno, H. Suto, & M. Sekiguchi.* 378, 611, 160-A1 (1991)

Massive Star Formation and Superwinds in IRAS 19254−7245 (The "Superantennae"). *Luis Colina, Sebastian Lipari, & F. Macchetto.* 379, 113, 164-D5 (1991)

The LkHα 101 Infrared Cluster. *M. Barsony, J. M. Schombert, & K. Kis-Halas.* 379, 221, 165-G1 (1991)

Excitation of the Hydroxyl Maser in OH/IR Stars. *Dale F. Dickinson.* 379, L29, 169-C11 (1991)

A Catalog of Bright-rimmed Clouds with *IRAS* Point Sources: Candidates for Star Formation by Radiation-driven Implosion. I. The Northern Hemisphere. *Koji Sugitani, Yasuo Fukui, & Katsuo Ogura.* 77, 59, 44-B1 (1991)

Direct Evidence for a Bar at the Galactic Center. *Leo Blitz & David N. Spergel.* 379, 631, 172-E1 (1991)

Location of the Thermal Continuum Source Sagittarius D. *Dariusz C. Lis.* 379, L53, 175-B10 (1991)

Search for Starbursts among X-Ray–selected Galaxies: Optical Spectroscopy. *Antonella Fruscione & Richard E. Griffiths.* 380, L13, 181-C1 (1991)

Infrared Hot Spots in the Nucleus of NGC 253. *Duncan A. Forbes, Martin J. Ward, & D. L. DePoy.* 380, L63, 188-C6 (1991)

Radial Dust Density Profiles in Small Molecular Clouds. *João Lin Yi n & Dan P. Clemens.* 381, 474, 196-E7 (1991)

Near-Infrared Observations of the $z \sim 2.3$ *IRAS* Source FSC 10214+4724. *B. T. Soifer, G. Neugebauer, J. R. Graham, K. Matthews, J. M. Mazzarella, C. J. Lonsdale, M. Rowan-Robinson, T. Broadhurst, A. Lawrence, & R. McMahon.* 381, L55, 199-D1 (1991)

Cocoon Stars in the Large Magellanic Cloud. *Neill Reid.* 382, 143, 202-A4 (1991)

A Cluster of He I Emission-Line Stars in the Galactic Center. *A. Krabbe, R. Genzel, S. Drapatz, & V. Rotaciuc.* 382, L19, 205-C1 (1991)

Infrared Images, Virgo Spirals, and the Tully-Fisher Law. *R. F. Peletier & S. P. Willner.* 382, 382, 206-C13 (1991)

Multifrequency Observations of BL Lacertae in 1988. *N. Kawai, M. Matsuoka, J. N. Bregman, H. D. Aller, M. F. Aller, P. A. Hughes, S. A. Balbus, T. J. Balonek, K. C. Chambers, R. E. S. Clegg, S. D. Clements, R. J. Leacock, A. G. Smith, R. Goodrich, J. S. Miller, M. Hereld, M. G. Hoare, V. A. Hughes, G. K. Miley, G. H. Moriarty-Schieven, K. Matthews, G. Neugebauer, T. Ohashi, P. F. Roche, H. A. Thronson, E. Valtaoja, H. Terasranta, J. R. Webb, B. J. Wills, & D. Wills.* 382, 508, 207-G8 (1991)

A Nearly Unipolar CO Outflow from the HH 46–47 System. *Lawrence M. Chernin & Colin R. Masson.* 382, L93, 211-E3 (1991)

On the Nature of the Excess 100 Micron Flux Associated with Carbon Stars. *Michael P. Egan & Chun Ming Leung.* 383, 314, 216-B1 (1991)

Infrared Recombination Lines of Hydrogen from Young Objects in the Southern Galactic Plane. *Sara C. Beck, Jacqueline Fischer, & Howard A. Smith.* 383, 336, 216-D1 (1991)

Infrared Dust and Millimeter-Wave Carbon Monoxide Emission in the Orion Region. *John Bally, William D. Langer, & Weihong Liu.* 383, 645, 222-C6 (1991)

Infrared Molecular Spectroscopy toward the Orion IRc2 and IRc7 Sources: A New Probe of Physical Conditions and Abundances in Molecular Clouds. *Neal J. Evans II, J. H. Lacy, & John S. Carr.* 383, 674, 222-E13 (1991)

New Candidates for Carbon Stars with Silicate Features. *S. Josephine Chan & Sun Kwok.* 383, 837, 224-F1 (1991)

Aperture Synthesis CS(2–1) Observations of a Young Stellar Object GL 490: Accretion Flow in Gas Disk. *Akiko Nakamura, Ryohei Kawabe, Yoshimi Kitamura, Masato Ishiguro, Yasuhiro Murata, & Nagayoshi Ohashi.* 383, L81, 226-F5 (1991)

New Low-Resolution Spectrometer Spectra for *IRAS* Sources. *Kevin Volk, Sun Kwok, R. E. Stencel, & E. Brugel.* 77, 607, 53-A1 (1991)

INFRARED: SPECTRA

Far-Infrared Lines from G45.13+0.14 A and K3-50 A: Density Fluctuations in Compact H II Regions. *Sean W. J. Colgan, J. P. Simpson, Robert H. Rubin, Edwin F. Erickson, M. R. Haas, & Jürgen Wolf.* 366, 172, 3-B13 (1991)

Far-Infrared and Submillimeter-Wavelength Observations of Star-forming Dense Cores. I. Spectra. *E. F. Ladd, Fred C. Adams, S. Casey, J. A. Davidson, G. A. Fuller, D. A. Harper, P. C. Myers, & R. Padman.* 366, 203, 3-E7 (1991)

CO Fundamental Bands in Late-Type Stars. II. Spectrum Simulations for F–K Stars. *Gunter Wiedemann & Thomas R. Ayres.* 366, 277, 4-D9 (1991)

Infrared Spectroscopy of T Tauri Stars. *C. Giovanardi, S. Gennari, A. Natta, & R. Stanga.* 367, 173, 14-B11 (1991)

Emission Features in the Spectrum of NGC 7027 near 3.3 Microns at Very High Resolution. *R. P. Lowe, J. M. Moorhead, W. H. Wehlau, & J.-P. Maillard.* 368, 195, 25-E1 (1991)

Energy Distributions of Symbiotic Novae. *Greg L. Bryan & Sun Kwok.* 368, 252, 26-C1 (1991)

Near-Infrared Spectroscopy of the Planetary Nebula NGC 6572. *Richard J. Rudy, George S. Rossano, Peter Erwin, & R. C. Puetter.* 368, 468, 30-G13 (1991)

Axisymmetric Models of Circumstellar Dust Shells. *Alan J. Collison & John D. Fix.* 368, 545, 31-G7 (1991)

IRAS Low-Resolution Spectral Observations of the 10 and 18 Micron Silicate Emission Features. *Janet P. Simpson.* 368, 570, 32-B13 (1991)

Observations of ^{12}CO and ^{13}CO $J = 9–8$ in Galactic Molecular Clouds. *R. T. Boreiko & A. L. Betz.* 369, 382, 42-E1 (1991)

High-Resolution Imaging of Brackett-γ and H_2 1–0 $S(1)$ Emission in the Seyfert Galaxy NGC 1068. *V. Rotaciuc, A. Krabbe, M. Cameron, S. Drapatz, R. Genzel, A. Sternberg, & J. W. V. Storey.* 370, L23, 53-D6 (1991)

Far-Infrared Fourier Transform Spectroscopy of $^{12}C^{18}O$. *P. De Natale, M. Inguscio, C. Rois Orza, & L. R. Zink.* 370, L53, 53-G5 (1991)

The Origin of the Far-Infrared Continuum in Active Galactic Nuclei. *L. K. Hunt.* 370, 511, 54-F9 (1991)

Mapping of Infrared Helium and Hydrogen Line Profiles in the Central Few Arcseconds of the Galaxy. *T. R. Geballe, K. Krisciunas, J. A. Bailey, & R. Wade.* 370, L73, 59-C8 (1991)

Near-Infrared Long-Slit Spectra of NGC 1068. *M. Tamura, S. G. Kleinmann, N. Z. Scoville, & R. R. Joyce.* 371, 131, 61-F3 (1991)

Episodic Outflows from High-Mass Protostars. *G. F. Mitchell, J.-P. Maillard, & T. I. Hasegawa.* 371, 342, 64-D1 (1991)

The Interstellar C-H Stretching Band near 3.4 Microns: Constraints on the Composition of Organic Material in the Diffuse Interstellar Medium. *S. A. Sandford, L. J. Allamandola, A. G. G. M. Tielens, K. Sellgren, M. Tapia, & Y. Pendleton.* 371, 607, 69-B1 (1991)

A New Method for Analyzing *IRAS* Data to Determine the Dust Temperature Distribution. *Taoling Xie, Paul F. Goldsmith, & Weimin Zhou.* 371, L81, 73-D12 (1991)

Atomic Oxygen Fine-Structure Splittings with Tunable Far-Infrared Spectroscopy. *Lyndon R. Zink, Kenneth M. Evenson, Fusakazu Matsushima, Thomas Nelis, & Ruth L. Robinson.* 371, L85, 73-E3 (1991)

The Mid-Infrared Spectrum of the Carbon Star HD 38218 and Its Possible Relation to Polycyclic Aromatic Hydrocarbons. *Richard H. Buss, Jr., A. G. G. M. Tielens, & Theodore P. Snow.* 372, 281, 77-D8 (1991)

The H_2 Line Profiles in the Cygnus Loop: Evidence for J-Shocks with Magnetic Precursors. *James R. Graham, Gillian S. Wright, & T. R. Geballe.* 372, L21, 79-C7 (1991)

Detection of Low-*J* Pure-Rotational Emission from H_2 in the Orion Bar Region: Evidence for Small-Scale Clumpiness. *Parvinder S. Parmar, John H. Lacy, & Jeffrey M. Achtermann.* 372, L25, 79-D1 (1991)

Detection of Silicates in the β Pictoris Disk. *C. M. Telesco & R. F. Knacke.* 372, L29, 79-D7 (1991)

Size and Density Distribution of Very Small Dust Grains in the Barnard 5 Cloud. *Dariusz C. Lis & Chun Ming Leung.* 372, L107, 85-F9 (1991)

A Sensitive Upper Limit on the Methane Abundance in Comet Levy (1990c). *T. Y. Brooke, A. T. Tokunaga, H. A. Weaver, G. Chin, & T. R. Geballe.* 372, L113, 85-G1 (1991)

The Far-Infrared Morphology of the Double-ringed Galaxy NGC 4736 (M94): A Ring Surrounding an Extended Nucleus. *Beverly J. Smith, D. F. Lester, P. M. Harvey, & R. W. Pogge.* 373, 66, 86-G5 (1991)

Parsec-Scale Penetration of Ultraviolet Photons into Molecular Clouds: [C II] 158 Micron Mapping of W3, NGC 1977, and NGC 2023. *J. E. Howe, D. T. Jaffe, R. Genzel, & G. J. Stacey.* 373, 158, 88-A5 (1991)

The SiH Vibrational Stretch as an Indicator of the Chemical State of Interstellar Grains. *Marla H. Moore, Toshihiko Tanabé, & Joseph A. Nuth.* 373, L31, 91-D7 (1991)

The 158 Micron [C II] Line: A Measure of Global Star Formation Activity in Galaxies. *G. J. Stacey, N. Geis, R. Genzel, J. B. Lugten, A. Poglitsch, A. Sternberg, & C. H. Townes.* 373, 423, 93-C1 (1991)

Broad Paschen-Alpha Emission in Two Extremely Infrared Luminous Seyfert 2 Galaxies. *Dean C. Hines.* 374, L9, 103-C7 (1991)

Infrared Fluorescence of H_2 in NGC 6240: A Starburst Origin for the H_2 Luminosity. *Masuo Tanaka, Tetsuo Hasegawa, & Ian Gatley.* 374, 516, 105-E9 (1991)

Large-Scale [C II] 158 Micron Emission from the Galaxy. *Hiroshi Shibai, Haruyuki Okuda, Takao Nakagawa, Hideo Matsuhara, Toshinori Maihara, Kohei Mizutani, Yukiyasu Kobayashi, Norihisa Hiromoto, Tetsuo Nishimura, & Frank J. Low.* 374, 522, 105-F1 (1991)

Observations of [Si II] (35 Micron) and [S I] (25 Micron) in Orion: Evidence for a Wind Shock near IRc2. *Michael R. Haas, David Hollenbach, & Edwin F. Erickson.* 374, 555, 106-B1 (1991)

A Survey of the 158 Micron [C II] Fine-Structure Line in the Central 50 Parsecs of The Galaxy. *A. Poglitsch, G. J. Stacey, N. Geis, M. Haggerty, J. Jackson, M. Rumitz, R. Genzel, & C. H. Townes.* 374, L33, 110-B5 (1991)

Infrared Broad Emission Lines from an Obscured Quasar, IRAS 23060+0505. *Tadashi Nakajima, Nathaniel P. Carleton, & Minoru Nishida.* 375, L1, 117-A7 (1991)

Near-Infrared Emission of Neutral Carbon from Photon-dominated Regions. *V. Escalante, A. Sternberg, & A. Dalgarno.* 375, 630, 120-E1 (1991)

Origins of the 12–200 Micron Flux in NGC 6946: Starlight and Continuum Dust Emission from an Sc Galaxy. *G. Engargiola.* 76, 875, 36-G5 (1991)

Discovery of Interstellar Methane: Observations of Gaseous and Solid CH_4 Absorption toward Young Stars in Molecular Clouds. *J. H. Lacy, J. S. Carr, Neal J. Evans II, F. Baas, J. M. Achtermann, & J. F. Arens.* 376, 556, 133-C9 (1991)

The Spectrum of NGC 7027 from 3080 to 2630 Wavenumbers (3.25–3.80 Microns): Detection of New Atomic and Molecular Hydrogen Lines and New Constraints on the Chemical Sidegroups on Polycyclic Aromatic Hydrocarbons. *Scott A. Sandford.* 376, 599, 133-G1 (1991)

Solar Gravitational Redshift from the Infrared Oxygen Triplet. *James C. LoPresto, Charles Schrader, & A. Keith Pierce.* 376, 757, 135-F11 (1991)

Low-Density Photodissociation Regions. *David J. Hollenbach, Takamasa Takahashi, & A. G. G. M. Tielens.* 377, 192, 140-C11 (1991)

Two Micron Spectroscopy of Infrared Sources in NGC 2071. *D. M. Walther, T. R. Geballe, & E. I. Robson.* 377, 246, 141-A9 (1991)

The Solar Mg I Spectrum from ATMOS. I. Identification and Preliminary Discussion. *John T. Jefferies.* 377, 337, 142-B5 (1991)

Shape and Clustering Effects on the Optical Properties of Amorphous Carbon. *François Rouleau & P. G. Martin.* 377, 526, 146-C3 (1991)

Partially Dissociative Jump Shocks in Molecular Hydrogen. *C. A. Chang & P. G. Martin.* 378, 202, 153-E1 (1991)

Pure Rotational Spectrum of Hydrogen Deuteride by Far-Infrared Fourier Transform Spectroscopy. *Lorenzo Ulivi, Paolo De Natale, & Massimo Inguscio.* 378, L29, 157-D7 (1991)

X-Ray Irradiation of Interstellar Grains in Active Galaxies: Evaporation and Infrared Spectra. *G. Mark Voit.* 379, 122, 164-E1 (1991)

Radiation Transport in Dust in Disk Geometry. I. Application to Externally Heated Interstellar Clouds. *George F. Spagna, Jr., Chun Ming Leung, & Michael P. Egan.* 379, 232, 166-A5 (1991)

Ionized Carbon in the Large Magellanic Cloud. *R. T. Boreiko & A. L. Betz.* 380, L27, 181-D9 (1991)

On the State of the Emitter of the 3.3 Micron Unidentified Infrared Band: Absorption Spectroscopy of Polycyclic Aromatic Hydrocarbon Species. *Gregory C. Flickinger, Thomas J. Wdowiak, & Percy L. Gómez.* 380, L43, 181-F1 (1991)

High-Resolution Spectra of the 3.29 Micron Interstellar Emission Feature: A Summary. *A. T. Tokunaga, K. Sellgren, R. G. Smith, T. Nagata, A. Sakata, & Y. Nakada.* 380, 452, 183-G8 (1991)

Galactic Center Gasdynamics: A One-armed Spiral in a Keplerian Disk. *J. H. Lacy, J. M. Achtermann, & E. Serabyn.* 380, L71, 188-D6 (1991)

Interstellar Solid CO: Polar and Nonpolar Interstellar Ices. *A. G. G. M. Tielens, A. T. Tokunaga, T. R. Geballe, & F. Baas.* 381, 181, 191-C5 (1991)

Preliminary Spectral Observations of the Galaxy with a 7° Beam by the *Cosmic Background Explorer* (*COBE*). *E. L. Wright, J. C. Mather, C. L. Bennett, E. S. Cheng, R. A. Shafer, D. J. Fixsen, R. E. Eplee, Jr., R. B. Isaacman, S. M. Read, N. W. Boggess, S. Gulkis, M. G. Hauser, M. Janssen, T. Kelsall, P. M. Lubin, S. S. Meyer, S. H. Moseley, Jr., T. L. Murdock, R. F. Silverberg, G. F. Smoot, R. Weiss, & D. T. Wilkinson.* 381, 200, 191-D12 (1991)

Near-Infrared Observations of the $z \sim 2.3$ *IRAS* Source FSC 10214+4724. *B. T. Soifer, G. Neugebauer, J. R. Graham, K. Matthews, J. M. Mazzarella, C. J. Lonsdale, M. Rowan-Robinson, T. Broadhurst, A. Lawrence, & R. McMahon.* 381, L55, 199-D1 (1991)

Infrared Spectroscopy of Cygnus A: Implications for the Obscured Active Nucleus. *Martin J. Ward, Philip R. Blanco, Andrew S. Wilson, & Minoru Nishida.* 382, 115, 201-E11 (1991)

CN and HCN in the Infrared Spectrum of IRC +10216. *G. R. Wiedemann, Kenneth H. Hinkle, John J. Keady, D. Deming, & D. E. Jennings.* 382, 321, 204-B10 (1991)

A Cluster of He I Emission-Line Stars in the Galactic Center. *A. Krabbe, R. Genzel, S. Drapatz, & V. Rotaciuc.* 382, L19, 205-C1 (1991)

The Optical Depth of the 158 Micron [^{12}C II] Line: Detection of the $F = 1 \rightarrow 0$ [^{13}C II] Hyperfine-Structure Component. *G. J. Stacey, C. H. Townes, A. Poglitsch, S. C. Madden, J. M. Jackson, F. Herrmann, R. Genzel, & N. Geis.* 382, L37, 205-E1 (1991)

A Standard Stellar Spectral Sequence in the Red/Near-Infrared: Classes K5 to M9. *J. Davy Kirkpatrick, Todd J. Henry, & Donald W. McCarthy, Jr.* 77, 417, 50-C5 (1991)

10 Micron Spectra of Protostars and the Solid Methanol Abundance. *W. A. Schutte, A. G. G. M. Tielens, & S. A. Sandford.* 382, 523, 208-A11 (1991)

Near-Infrared [Fe II] Emission of M82 Supernova Remnants: Implications for Tracing the Supernova Content of Galaxies. *Matthew A. Greenhouse, Charles E. Woodward, Harley A. Thronson, Jr., Richard J. Rudy, George S. Rossano, Peter Erwin, & R. C. Puetter.* 383, 164, 214-B1 (1991)

Infrared Recombination Lines of Hydrogen from Young Objects in the Southern Galactic Plane. *Sara C. Beck, Jacqueline Fischer, & Howard A. Smith.* 383, 336, 216-D1 (1991)

The 1.0–1.3 Micron Spectrum of LkHα 101. *Richard J. Rudy, Peter Erwin, George S. Rossano, & R. C. Puetter.* 383, 344, 216-D7 (1991)

Electric Field Strengths from the Solar 12 Micron Lines. *Edward S. Chang & William G. Schoenfeld.* 383, 450, 217-G9 (1991)

3.3 Micron Emission from Ultraviolet Excitation of Some Aromatic Molecules. *Jun Shan, Masako Suto, & L. C. Lee.* 383, 459, 218-A7 (1991)

Detection of ^{13}C-Ethane in Jupiter's Atmosphere. *Günter Wiedemann, Gordon L. Bjoraker, & Donald E. Jennings.* 383, L29, 219-D7 (1991)

On the Near-Infrared Spectrum of FU Orionis. *Nuria Calvet, Lee Hartmann, & Scott J. Kenyon.* 383, 752, 223-E6 (1991)

New Low-Resolution Spectrometer Spectra for *IRAS* Sources. *Kevin Volk, Sun Kwok, R. E. Stencel, & E. Brugel.* 77, 607, 53-A1 (1991)

INFRARED: STARS

Spatial Structure in the 10 Micron Spectrum of HD 44179 (The Red Rectangle). *G. L. Grasdalen, G. C. Sloan, & P. D. LeVan.* 384, L25, 6-D1 (1992)

IRAS 16293−2422: A Very Young Binary System? *Lee G. Mundy, Alwyn Wootten, Bruce A. Wilking, Geoffrey A. Blake, & Anneila I. Sargent.* 385, 306, 15-F5 (1992)

Discovery of Outflows from Young Stellar Objects in Bok Globules. *João Lin Yun & Dan P. Clemens.* 385, L21, 17-C6 (1992)

A Catalog of Co-added *IRAS* Fluxes of Orion Population Stars. *Wm. Bruce Weaver & Gordon Jones.* 78, 239, 4-G7 (1992)

Star Formation in Taurus. I. The *IRAS* Faint Source Survey. *C. A. Beichman, F. Boulanger, & M. Moshir.* 386, 248, 27-C5 (1992)

Gravitational Lensing by a Massive Black Hole at the Galactic Center. *Mark Wardle & Farhad Yusef-Zadeh.* 387, L65, 48-C1 (1992)

The 3 Micron Spectrum of the Classical Be Star β Monocerotis A. *K. Sellgren & R. G. Smith.* 388, 178, 51-B13 (1992)

Velocity Streaming of *IRAS* Main-Sequence Disk Stars and the Episodic Enhancement of Particulate Disks by Interstellar Clouds. *Daniel P. Whitmire, John J. Matese, & Patrick G. Whitman.* 388, 190, 51-D1 (1992)

A Near-Infrared Search for Brown Dwarfs in the Pleiades. *D. A. Simons & E. E. Becklin.* 390, 431, 80-F10 (1992)

A True-Field Magnetogram in a Solar Plage Region. *Douglas Rabin.* 390, L103, 85-D1 (1992)

Candidates for Extreme Carbon Stars. *Kevin Volk, Sun Kwok, & Philip P. Langill.* 391, 285, 89-D12 (1992)

Infrared Studies of Pre–Main-Sequence Intermediate-Mass Stars: LkHα 198. *Antonella Natta, Francesco Palla, Harold M. Butner, Neal J. Evans II, & Paul M. Harvey.* 391, 805, 98-A1 (1992)

Interstellar Polarization from 3 to 5 Microns in Reddened Stars. *P. G. Martin, A. J. Adamson, D. C. B. Whittet, J. H. Hough, J. A. Bailey, S.-H. Kim, S. Sato, M. Tamura, & T. Yamashita.* 392, 691, 110-G3 (1992)

8–14 Micron Spectroscopy of Carbon Stars Associated with Silicate Dust. *Paul D. LeVan, G. C. Sloan, Irene R. Little-Marenin, & G. L. Grasdalen.* 392, 702, 111-A1 (1992)

Constraints on the Galactic Bulge Using *IRAS* Variable Point Sources. *Martin D. Weinberg.* 392, L67, 113-C10 (1992)

The Nature of Dust around the Post–Asymptotic Giant Branch Objects HD 161796 and HD 179821. *K. Justtanont, M. J. Barlow, C. J. Skinner, & A. G. G. M. Tielens.* 392, L75, 113-D8 (1992)

Global Star Formation in the L1630 Molecular Cloud. *Elizabeth A. Lada.* 393, L25, 120-D7 (1992)

Measurement of CO Overtone Line Profiles in SVS 13. *John S. Carr & Alan T. Tokunaga.* 393, L67, 127-D7 (1992)

Emission-Line Studies of Young Stars. III. Correlations with the Infrared Excess. *Fred Hamann & S. E. Persson.* 394, 628, 137-C5 (1992)

The 8–13 Micron Spectrum of the Young Stellar Object WL 16. *M. S. Hanner, A. T. Tokunaga, & T. R. Geballe.* 395, L111, 154-C12 (1992)

OH/IR Star Color Mimics. *B. M. Lewis.* 396, 251, 158-B13 (1992)

Newly Identified Main-Sequence A Stars with Circumstellar Dust. *K.-P. Cheng, F. C. Bruhweiler, Y. Kondo, & C. A. Grady.* 396, L83, 167-C1 (1992)

IRAS Observations of Young Stellar Objects in the Corona Australis Dark Cloud. *Bruce A. Wilking, Thomas P. Greene, Charles J. Lada, Michael R. Meyer, & Erick T. Young.* 397, 520, 177-C9 (1992)

OH/IR Stars in the Magellanic Clouds. *P. R. Wood, J. B. Whiteoak, S. M. G. Hughes, M. S. Bessell, F. F. Gardner, & A. R. Hyland.* 397, 552, 177-G5 (1992)

Near-Infrared Spectrophotometry of FU Orionis Variables. *S. Sato, K. Okita, T. Yamashita, K. Mizutani, H. Shiba, Y. Kobayashi, & H. Takami.* 398, 273, 185-B7 (1992)

The Near-Infrared [Fe II] Lines of MWC 922. *Richard J. Rudy, Peter Erwin, George S. Rossano, & R. C. Puetter.* 398, 278, 185-C1 (1992)

8–13 Micron Spectroscopy of Nova Herculis 1991. *David K. Lynch, John A. Hackwell, & Ray W. Russell.* 398, 632, 192-A5 (1992)

Multiple Jets from the Young Star IRAS 21334+5039. *Howard A. Smith & Jacqueline Fischer.* 398, L99, 194-D1 (1992)

Nonequilibrium Iron Oxide Formation in Some Low-Mass Post–Asymptotic Giant Branch Stars. *Frans J. M. Rietmeijer.* 400, L39, 214-E6 (1992)

Another Neon Nova: Early Infrared Photometry and Spectroscopy of Nova Cygni 1992. *T. L. Hayward, R. D. Gehrz, J. W. Miles, & J. R. Houck.* 401, L101, 233-D5 (1992)

CO Observations of Candidates for Carbon-rich Asymptotic Giant Branch and Post–Asymptotic Giant Branch Stars. *Kevin Volk, Sun Kwok, & Andrew W. Woodsworth.* 402, 292, 4-F10 (1993)

The Spectroscopic Properties of Extreme M Dwarfs in the 2 Micron Region. *T. J. Davidge & P. C. Boeshaar.* 403, L47, 20-E10 (1993)

Spatially Resolved Spectra of Silicate Dust around α Orionis. *G. C. Sloan, G. L. Grasdalen, & Paul D. LeVan.* 404, 328, 32-A3 (1993)

An *IRAS* Survey of Star-forming Regions toward Cygnus. *Sten F. Odenwald & Phil R. Schwartz.* 405, 706, 51-G7 (1993)

The IRC +10216 Circumstellar Envelope. III. Infrared Molecular Line Profiles. *J. J. Keady & S. T. Ridgway.* 406, 199, 57-E5 (1993)

First Detection of Ionized Helium Absorption Lines in Infrared *K* Band Spectra of O-Type Stars. *Peter S. Conti, David L. Block, T. R. Geballe, & Margaret Murray Hanson.* 406, L21, 60-G5 (1993)

Infrared Observations of the Remarkable Main-Sequence Star HD 98800. *B. Zuckerman & E. E. Becklin.* 406, L25, 60-G10 (1993)

Bright Near-Infrared Sources within 1deg of the Galactic Center. I. Survey and 1–20 Micron Photometry. *Tetsuya Nagata, A. R. Hyland, S. M. Straw, Shuji Sato, & Kimiaki Kawara.* 406, 501, 64-A10 (1993)

Infrared Studies of Circumstellar Matter around Herbig Ae/Be and Related Stars. *Antonella Natta, Francesco Palla, Harold M. Butner, Neal J. Evans II, & Paul M. Harvey.* 406, 674, 66-C4 (1993)

Embedded Star Clusters Associated with Luminous *IRAS* Point Sources. *John M. Carpenter, Ronald L. Snell, F. Peter Schloerb, & M. F. Skrutskie.* 407, 657, 78-F11 (1993)

Near-Infrared 0.15″ Resolution Imaging of the Galactic Center. *A. Eckart, R. Genzel, R. Hofmann, B. J. Sams, & L. E. Tacconi-Garman.* 407, L77, 82-E1 (1993)

The Spectral Energy Distribution of Star-forming Regions. *Ralf Siebenmorgen.* 408, 218, 85-G3 (1993)

η Carinae: A New Model. *J. M. Borgwald & M. W. Friedlander.* 408, 230, 86-A3 (1993)

High-Resolution Mid-Infrared Spectra of Co II, Ni I, and Fe II in SN 1987A. *D. E. Jennings, R. J. Boyle, G. R. Wiedemann, & S. H. Moseley.* 408, 277, 86-E5 (1993)

Infrared Images of the Young Cluster NGC 2264. *Charles J. Lada, Erick T. Young, & Thomas P. Greene.* 408, 471, 91-A11 (1993)

Near-Infrared Discovery of the L810 Nebula Illuminator. *João Lin Yun, Dan P. Clemens, Mark J. McCaughrean, & Marcia Rieke.* 408, L101, 95-E9 (1993)

Observations of the Ca II Infrared Triplet in Chromospherically Active Single and Binary Stars. *Robert C. Dempsey, Bernard W. Bopp, Gregory W. Henry, & Douglas S. Hall.* 86, 293, 17-G7 (1993)

Circumstellar Shells Resolved in *IRAS* Survey Data. II. Analysis. *K. Young, T. G. Phillips, & G. R. Knapp.* 409, 725, 108-B3 (1993)

An Infrared Survey for Embedded Young Stars in the Perseus Molecular Cloud Complex. *E. F. Ladd, E. A. Lada, & P. C. Myers.* 410, 168, 114-C1 (1993)

Detection of O I and Si II Far-Infrared Fine-Structure Emission from α Orionis. *Michael R. Haas & Alfred E. Glassgold.* 410, L111, 126-C9 (1993)

Circumstellar Shells Resolved in the *IRAS* Survey Data. I. Data Processing Procedure, Results, and Confidence Tests. *K. Young, T. G. Phillips, & G. R. Knapp.* 86, 517, 21-B11 (1993)

IRAS Variables as Galactic Structure Tracers: Classification of the Bright Variables. *L. E. Allen, S. G. Kleinmann, & M. D. Weinberg.* 411, 188, 129-D11 (1993)

Infrared Imaging of the Galactic Center and the Search for Sagittarius A*. *T. M. Herbst, S. V. W. Beckwith, & Mark Shure.* 411, L21, 133-F13 (1993)

The Inner-Disk and Stellar Properties of the Young Stellar Object WL 16. *John S. Carr, Alan T. Tokunaga, Joan Najita, Frank H. Shu, & Alfred E. Glassgold.* 411, L37, 134-A13 (1993)

An Alternative to Unseen Companions to T Tauri Stars. *Alan P. Boss & Harold W. Yorke.* 411, L99, 142-F11 (1993)

Infrared Luminosity Functions for the Young Stellar Population Associated with the L1641 Molecular Cloud. *Karen M. Strom, Stephen E. Strom, & K. M. Merrill.* 412, 233, 145-A8 (1993)

Infrared CO Emission from Young Stars: High-Resolution Spectroscopy. *C. J. Chandler, J. E. Carlstrom, N. Z. Scoville, W. R. F. Dent, & T. R. Geballe.* 412, L71, 155-D13 (1993)

Long-Period Oxygen-rich Optical Miras in the Solar Neighborhood. *M. Jura, A. Yamamoto, & S. G. Kleinmann.* 413, 298, 160-A2 (1993)

IRS 16: The Galaxy's Central Wimp? *Peter Tamblyn & G. H. Rieke.* 414, 573, 178-D1 (1993)

The Contribution of Disks and Envelopes to the Millimeter Continuum Emission from Very Young Low-Mass Stars. *S. Terebey, C. J. Chandler, & P. André.* 414, 759, 180-F6 (1993)

The Embedded Young Stars in the Taurus-Auriga Molecular Cloud. II. Models for Scattered Light Images. *Scott J. Kenyon, Barbara A. Whitney, Mercedes Gomez, & Lee Hartmann.* 414, 773, 180-G9 (1993)

Submillimeter Studies of Main-Sequence Stars. *B. Zuckerman & E. E. Becklin.* 414, 793, 181-B4 (1993)

Infrared Spectra of Transition Objects and the Composition and Evolution of Carbon Dust. *R. H. Buss, Jr., A. G. G. M. Tielens, M. Cohen, M. W. Werner, J. D. Bregman, & F. C. Witteborn.* 415, 250, 188-B3 (1993)

Evidence for Hydrated Silicates toward SN 1987A. *Ralf Timmermann & Harold P. Larson.* 415, 820, 198-A13 (1993)

Airborne Spectrophotometry of SN 1987A from 1.7 to 12.6 Microns: Time History of the Dust Continuum and Line Emission. *Diane H. Wooden, David M. Rank, Jesse D. Bregman, Fred C. Witteborn, A. G. G. M. Tielens, Martin Cohen, Philip A. Pinto, & Timothy S. Axelrod.* 88, 477, 46-F9 (1993)

Detection of Silicates in the 51 Ophiuchi System. *S. B. Fajardo-Acosta, C. M. Telesco, & R. F. Knacke.* 417, L33, 223-B9 (1993)

A Deeply Embedded Companion to LkHα 198. *P. O. Lagage, G. Olofsson, S. Cabrit, C. J. Cesarsky, L. Nordh, & J. M. Rodriguez Espinosa.* 417, L79, 230-D6 (1993)

The Silicates in the Disk of β Pictoris. *R. F. Knacke, S. B. Fajardo-Acosta, C. M. Telesco, J. A. Hackwell, D. K. Lynch, & R. W. Russell.* 418, 440, 236-D13 (1993)

New OH/IR Stars from Color-selected *IRAS* Sources. III. A Complete Survey. *Jayaram N. Chengalur, B. M. Lewis, J. Eder, & Yervant Terzian.* 89, 189, 51-D3 (1993)

Expanding Atmospheric Model Including a Chromosphere. I. Study of the Infrared Excess in Be Stars. *Andrea C. Vázquez, Lydia S. Cidale, & Adela E. Ringuelet.* 419, 286, 249-F10 (1993)

Detection of Water Vapor in T Tauri Stars. *H. Shiba, S. Sato, T. Yamashita, Y. Kobayashi, & H. Takami.* 89, 299, 53-F1 (1993)

The Structure and Nature of NGC 2071 IRS 1: High-Resolution Radio Continuum Maps. *Howard A. Smith & Sara C. Beck.* 420, 643, 10-F7 (1994)

Discovery of a Deeply Embedded Companion to LkHα 234. *David A. Weintraub, Joel H. Kastner, & Ashwin Mahesh.* 420, L87, 15-F1 (1994)

Stellar Density Enhancements Associated with *IRAS* Sources in L1641. *Hua Chen & Alan T. Tokunaga.* 90, 149, 2-G12 (1994)

The Temporal Evolution of the 4–14 Micron Spectrum of V1974 Cygni (Nova Cygni 1992). *R. D. Gehrz, Charles E. Woodward, M. A. Greenhouse, S. Starrfield, D. H. Wooden, F. C. Witteborn, S. A. Sandford, L. J. Allamandola, J. D. Bregman, & M. Klapisch.* 421, 762, 27-F6 (1994)

Deep Infrared Array Photometry of Globular Clusters. I. M4. *T. J. Davidge & D. A. Simons.* 423, 640, 56-D13 (1994)

Infrared Spectroscopy and Imaging Polarimetry of the Disk around the T Tauri Star RNO 91. *David A. Weintraub, Stephen C. Tegler, Joel H. Kastner, & Terrence Rettig.* 423, 674, 57-A3 (1994)

Carbon Monoxide Fundamental Bands in Late-Type Stars. III. Chromosphere or CO-mosphere? *G. Wiedemann, T. R. Ayres, D. E. Jennings, & S. H. Saar.* 423, 806, 58-F6 (1994)

Near-Infrared Observations of the 1E 1740.7−2942 Field at the Galactic Center. *Joseph W. Haller & Fulvio Melia.* 423, L109, 60-F5 (1994)

K-Band Spectroscopy of OB Stars: A Preliminary Classification. *Margaret Murray Hanson & Peter S. Conti.* 423, L139, 61-C7 (1994)

Near-Infrared Spectroscopy of Young Stellar Objects. *D. M. Kelly, G. H. Rieke, & B. Campbell.* 425, 231, 83-B5 (1994)

The *K*-Band Surface Brightness of Late-Type Stars and the Distance to Cataclysmic Variables. *Tod F. Ramseyer.* 425, 243, 83-C5 (1994)

Optical Variability in the Unusual K5 V Infrared-Excess Star HD 98800. *Gregory W. Henry & Douglas S. Hall.* 425, L25, 85-D9 (1994)

COBE Diffuse Infrared Background Experiment Observations of Galactic Reddening and Stellar Populations. *R. G. Arendt, G. B. Berriman, N. Boggess, E. Dwek, M. G. Hauser, T. Kelsall, S. H. Moseley, T. L. Murdock, N. Odegard, R. F. Silverberg, T. J. Sodroski, & J. L. Weiland.* 425, L85, 94-E1 (1994)

A Catalog of Bright-rimmed Clouds with *IRAS* Point Sources: Candidates for Star Formation by Radiation-driven Implosion. II. The Southern Hemisphere. *Koji Sugitani & Katsuo Ogura.* 92, 163, 33-D11 (1994)

Silicon Monoxide in SN 1987A. *Weihong Liu & A. Dalgarno.* 428, 769, 139-G5 (1994)

A 7 Micron Dust Emission Feature in Oxygen-rich Circumstellar Shells. *J. H. Goebel, J. D. Bregman, & F. C. Witteborn.* 430, 317, 163-B3 (1994)

Observations of the Acceleration Regions of OH/IR Stars. *John D. Fix & Mark G. Mulhern.* 430, 824, 172-B5 (1994)

Supplement to the Arecibo 1612 MHz Survey of Color-selected *IRAS* Sources. *B. M. Lewis.* 93, 549, 50-D9 (1994)

Constraining Circumstellar Environments: Far-Infrared Observations of Herbig Ae/Be Stars. *James Di Francesco, Neal J. Evans II, Paul M. Harvey, Lee G. Mundy, & Harold M. Butner.* 432, 710, 204-G8 (1994)

Near-Infrared (*J*, *H*, *K*) Imaging of Herbig Ae/Be Stars. *Wenbin Li, Neal J. Evans II, Paul M. Harvey, & Cecilia Colomé.* 433, 199, 210-G3 (1994)

Silicates and Aromatic Hydrocarbons in the 10 Micron Spectrum of the Taurus Dark Cloud Source Elias 1. *Martha S. Hanner, Timothy Y. Brooke, & Alan T. Tokunaga.* 433, L97, 224-C7 (1994)

Flat Spectrum T Tauri Stars: The Case for Infall. *Nuria Calvet, Lee Hartmann, Scott J. Kenyon, & Barbara A. Whitney.* 434, 330, 230-A6 (1994)

Further Mid-Infrared Study of the ρ Ophiuchi Cloud Young Stellar Population: Luminosities and Masses of Pre–Main-Sequence Stars. *Thomas P. Greene, Bruce A. Wilking, Philippe André, Erick T. Young, & Charles J. Lada.* 434, 614, 236-C6 (1994)

10 Micron Imaging of UZ Tauri: Evidence for Circumstellar Disk Clearing due to a Close Companion Star. *A. M. Ghez, J. P. Emerson, J. R. Graham, M. Meixner, & C. J. Skinner.* 434, 707, 237-E3 (1994)

Protostellar Accretion Disks Resolved with the JCMT-CSO Interferometer. *O. P. Lay, J. E. Carlstrom, R. E. Hills, & T. G. Phillips.* 434, L75, 241-G9 (1994)

Deep Infrared Array Photometry of Globular Clusters. II. M71. *T. J. Davidge & D. A. Simons.* 435, 207, 246-B11 (1994)

[Fe II] 1.53 and 1.64 Micron Emission from Pre–Main-Sequence Stars. *Fred Hamann, Michal Simon, John S. Carr, & Lisa Prato.* 436, 292, 265-C10 (1994)

Circumprotostellar Environments. II. Envelopes, Activity, and Evolution. *G. H. Moriarty-Schieven, P. G. Wannier, Jocelyn Keene, & M. Tamura.* 436, 800, 276-F1 (1994)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. I. The $7° < |B| < 8°$ Strips. *H. Izumiura, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, N. Ukita, & I. Yamamura.* 437, 419, 288-G11 (1994)

10 Micron Spectroscopy of Young Stars in the ρ Ophiuchi Cloud. *M. S. Hanner, T. Y. Brooke, & A. T. Tokunaga.* 438, 250, 4-G9 (1995)

The Evolutionary Status of the Stellar Population in the ρ Ophiuchi Cloud Core. *Karen M. Strom, Jeremy Kepner, & Stephen E. Strom.* 438, 813, 15-D7 (1995)

The Temporal Evolution of the 1–5 Micron Spectrum of V1974 Cygni (Nova Cygni 1992). *Charles E. Woodward, Matthew A. Greenhouse, R. D. Gehrz, Y. J. Pendleton, R. R. Joyce, D. Van Buren, J. Fischer, N. J. Jennerjohn, & C. D. Kaminski.* 438, 921, 16-G7 (1995)

Multiple Star Formation in Bok Globule CB 34. *João F. Alves & João L. Yun.* 438, L107, 20-C1 (1995)

Near-Infrared Spectra of Compact Stellar Wind Sources at the Galactic Center. *S. Libonate, J. L. Pipher, W. J. Forrest, & M. L. N. Ashby.* 439, 202, 24-A10 (1995)

Evidence for Chemical Processing of Precometary Icy Grains in Circumstellar Environments of Pre–Main-Sequence Stars. *Stephen C. Tegler, David A. Weintraub, Terrence W. Rettig, Yvonne J. Pendleton, Douglas C. B. Whittet, & Craig A. Kulesa.* 439, 279, 25-A9 (1995)

RY Scuti: Infrared and Radio Observations of the Mass-Loss Wind of a Massive Binary Star System. *R. D. Gehrz, T. L. Hayward, J. R. Houck, J. W. Miles, R. M. Hjellming, T. J. Jones, Charles E. Woodward, Ricarda Prentice, W. J. Forrest, S. Libonate, & S. Solomon.* 439, 417, 26-G11 (1995)

A Search for T Tauri Stars in High-Latitude Molecular Clouds. II. The *IRAS* Faint Source Survey Catalog. *Loris Magnani, Jean-Pierre Caillault, Ari Buchalter, & C. A. Beichman.* 96, 159, 3-F3 (1995)

Infrared Photometry of the Black Hole Candidate Sagittarius A*. *Laird M. Close, Donald W. McCarthy, Jr., & Fulvio Melia.* 439, 682, 34-A1 (1995)

Spectral Energy of First Protostellar Cores: Detecting "Class −I" Protostars with *ISO* and *SIRTF*. *Alan P. Boss & Harold W. Yorke.* 439, L55, 40-E11 (1995)

Modeling the Light-Travel-Time Effect on the Far-Infrared Size of IRC +10216. *Edward L. Wright & Frederick K. Baganoff.* 440, 322, 45-E9 (1995)

LkHα 198 Revisited. *Harold M. Butner & Antonella Natta.* 440, 874, 55-B10 (1995)

Direct Measurement of the Inner Radius of the Dust Shell around the Cool Supergiant Star α Scorpii. *E. E. Bloemhof & R. M. Danen.* 440, L93, 58-C2 (1995)

Dust Particle Settling in Passive Disks around T Tauri Stars: Models and *IRAS* Observations. *Kotaro Miyake & Yoshitsugu Nakagawa.* 441, 361, 64-C13 (1995)

Infrared Properties of Circumstellar Dust Envelopes of Oxygen-rich Asymptotic Giant Branch Stars. *O. Hashimoto.* 442, 286, 81-B3 (1995)

Another Look at the *UBV* Variability of T Tauri Stars. *Pedro N. Safier.* 444, 818, 127-F12 (1995)

The Dust Disk around the Vega-Excess Star SAO 26804. *C. J. Skinner, K. J. Sylvester, J. R. Graham, M. J. Barlow, M. Meixner, E. Keto, J. F. Arens, & J. G. Jernigan.* 444, 861, 128-C13 (1995)

The Displacement of the Sun from the Galactic Plane Using *IRAS* and FAUST Source Counts. *Martin Cohen.* 444, 874, 128-E2 (1995)

Detection of Shocked Molecular Hydrogen in Infrared Companions to T Tauri Stars: Evidence for Ongoing Accretion. *T. M. Herbst, C. D. Koresko, & Christoph Leinert.* 444, L93, 130-F13 (1995)

Deep Infrared Array Photometry of Globular Clusters. III. M13. *T. J. Davidge & W. E. Harris.* 445, 211, 135-D7 (1995)

Infrared Emission and Dynamics of Outflows in Late-Type Stars. *Željko Ivezić & Moshe Elitzur.* 445, 415, 138-C6 (1995)

The Fate of the Solid Matter Orbiting HR 4796A. *M. Jura, A. M. Ghez, Russel J. White, D. W. McCarthy, R. C. Smith, & P. G. Martin.* 445, 451, 138-F11 (1995)

High Angular Resolution Spectroscopic and Polarimetric Imaging of the Galactic Center in the Near-Infrared. *A. Eckart, R. Genzel, R. Hofmann, B. J. Sams, & L. E. Tacconi-Garman.* 445, L23, 140-E1 (1995)

Of-Type Stars HD 16691 and HD 190429 Show WN-like Spectra in Infrared *K* Band. *Peter S. Conti, Margaret Murray Hanson, Patrick W. Morris, Allan J. Willis, & Stephen J. Fossey.* 445, L35, 140-F11 (1995)

Morphology, Near-Infrared Luminosity, and Mass of the Galactic Bulge from *COBE* DIRBE Observations. *E. Dwek, R. G. Arendt, M. G. Hauser, T. Kelsall, C. M. Lisse, S. H. Moseley, R. F. Silverberg, T. J. Sodroski, & J. L. Weiland.* 445, 716, 145-B1 (1995)

Neural Network Classification of the Near-Infrared Spectra of A-Type Stars. *Wm. Bruce Weaver & Ana V. Torres-Dodgen.* 446, 300, 157-D1 (1995)

Infrared Spectroscopy of Herbig-Haro Objects. *Richard D. Schwartz, A. S. B. Schultz, Martin Cohen, & Peredur M. Williams.* 446, 318, 157-E8 (1995)

The Subarcsecond 10 Micron Size of LkHα 101: Constraints on Circumstellar Dust. *R. M. Danen, C. R. Gwinn, & E. E. Bloemhof.* 447, 391, 177-F13 (1995)

A Circumstellar H_2O Maser Associated with the Circumnuclear Molecular Disk at the Galactic Center? *Deborah A. Levine, Donald F. Figer, Mark Morris, & Ian S. McLean.* 447, L101, 190-G7 (1995)

1 Millimeter Polarimetry of Young Stellar Objects: Low-Mass Protostars and T Tauri Stars. *Motohide Tamura, J. H. Hough, & Saeko S. Hayashi.* 448, 346, 197-A2 (1995)

Identification of Ionizing Sources and Young Stellar Objects in M17. *Margaret Murray Hanson & Peter S. Conti.* 448, L45, 200-A9 (1995)

The Infrared Spectrum of the Optically Thin Dust Shell of V705 Cassiopeiae (Nova Cassiopeiae 1993). *R. D. Gehrz, M. A. Greenhouse, T. L. Hayward, J. R. Houck, C. G. Mason, & C. E. Woodward.* 448, L119, 209-E9 (1995)

The 11 Micron Emissions of Carbon Stars. *J. H. Goebel, P. Cheeseman, & F. Gerbault.* 449, 246, 213-E9 (1995)

The First 8–13 Micron Spectra of Asymptotic Giant Branch Stars in the Magellanic Clouds. *M. A. T. Groenewegen et al., C. H. Smith, P. R. Wood, A. Omont, & T. Fujiyoshi.* 449, L119, 227-A8 (1995)

Star Formation in the Gemini OB1 Molecular Cloud Complex. *John M. Carpenter, Ronald L. Snell, & F. Peter Schloerb.* 450, 201, 230-G5 (1995)

An Infrared Spectroscopic Survey of the ρ Ophiuchi Young Stellar Cluster: Masses and Ages from the H-R Diagram. *Thomas P. Greene & Michael R. Meyer.* 450, 233, 231-C3 (1995)

Rayleigh Beacon Adaptive Optics Imaging of ADS 9731: Measurements of the Isoplanatic Field of View. *Julian C. Christou, Brent Ellerbroek, Robert Q. Fugate, Domenico Bonaccini, & Ruggero Stanga.* 450, 369, 233-A12 (1995)

Full Adaptive Optics Images of ADS 9731 and μ Cassiopeiae: Orbits and Masses. *Jack D. Drummond, Julian C. Christou, & Robert Q. Fugate.* 450, 380, 233-B12 (1995)

Silicate Emission at 10 Microns in Variables on the Asymptotic Giant Branch. *G. C. Sloan & S. D. Price.* 451, 758, 257-E13 (1995)

Spatially Resolved Mid-Infrared Observations of Circumstellar Dust around AB Aurigae. *Kenneth A. Marsh, Jeffrey E. Van Cleve, M. J. Mahoney, T. L. Hayward, & J. R. Houck.* 451, 777, 257-G10 (1995)

NGC 1333 IRAS 4: Further Multiplicity Revealed with the CSO-JCMT Interferometer. *O. P. Lay, J. E. Carlstrom, & R. E. Hills.* 452, L73, 270-F7 (1995)

In Search of HL Tauri. *David A. Weintraub, Joel H. Kastner, & Barbara A. Whitney.* 452, L141, 280-E6 (1995)

An *IRAS*-based Search for New Dusty Late-Type WC Wolf-Rayet Stars. *Martin Cohen.* 100, 413, 51-G1 (1995)

Bipolar Jets from Extremely Young Stars Observed in Molecular Hydrogen Emission. *Klaus-Werner Hodapp & E. F. Ladd.* 453, 715, 293-E13 (1995)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. III. Kinematics of the Bulge Stars. *H. Izumiura, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, N. Ukita, & I. Yamamura.* 453, 837, 295-D7 (1995)

The Low-Mass IMF in the ρ Ophiuchi Cluster. *D. M. Williams, F. Comerón, G. H. Rieke, & M. J. Rieke.* 454, 144, 301-C2 (1995)

Four Newly Identified Sources with 21 Micron Emission. *Sun Kwok, Bruce J. Hrivnak, & T. R. Geballe.* 454, 394, 304-F8 (1995)

Pre–Main-Sequence Evolution in the Taurus-Auriga Molecular Cloud. *Scott J. Kenyon & Lee Hartmann.* 101, 117, 54-D3 (1995)

The 30 Micron Emission Band in Carbon-rich Pre–Planetary Nebulae. *A. Omont, S. H. Moseley, P. Cox, W. Glaccum, S. Casey, T. Forveille, Kin-Wing Chan, R. Szczerba, R. F. Loewenstein, P. M. Harvey, & S. Kwok.* 454, 819, 313-B2 (1995)

Young Star Clusters in Bright-rimmed Clouds: Small-Scale Sequential Star Formation? *Koji Sugitani, Motohide Tamura, & Katsuo Ogura.* 455, L39, 324-G9 (1995)

Interstellar Extinction from 0.35 to 2.2 Microns: A Study Based on Luminous Southern Stars. *Lida He, D. C. B. Whittet, D. Kilkenny, & J. H. Spencer Jones.* 101, 335, 58-D12 (1995)

INSTABILITIES

Nonaxisymmetric Instabilities in Rotating Shear Flows: Internal Gravity Modes in Stratified Media and Analogies with Plane Flows. *P. Ghosh & M. A. Abramowicz.* 366, 221, 3-F13 (1991)

Thermal Instabilities in Proto–Globular Clusters Resulting from Time-dependent Potentials. *Stephen D. Murray & Douglas N. C. Lin.* 367, 149, 13-G6 (1991)

A Search for Instability in Two Families of Spherical Stellar Models. *Martin D. Weinberg.* 368, 66, 24-A1 (1991)

The Dynamic Instability of Adiabatic Blast Waves. *Dongsu Ryu & Ethan T. Vishniac.* 368, 411, 30-B12 (1991)

Rayleigh-Taylor Instabilities and Mixing in the Helium Star Models for Type Ib/Ic Supernovae. *Izumi Hachisu, Takuya Matsuda, Ken'ichi Nomoto, & Toshikazu Shigeyama.* 368, L27, 35-B4 (1991)

Self-Organization of Cosmic Radiation Pressure Instability. *Craig J. Hogan.* 369, 300, 41-D8 (1991)

The Finite-Amplitude Behavior of the Joule Mode under Astrophysical Conditions. *G. Bodo, S. Massaglia, R. Rosner, & A. Ferrari.* 370, 398, 52-C1 (1991)

On the Thermal Stability of Slabs, Cylinders, and Spheres. *Miguel H. Ibáñez S., & Florencio P. Plachco M.* 370, 743, 57-F1 (1991)

On Magnetothermal Instability in Cluster Cooling Flows. *Steven A. Balbus.* 372, 25, 74-C13 (1991)

A Powerful Local Shear Instability in Weakly Magnetized Disks. I. Linear Analysis. *Steven A. Balbus & John F. Hawley.* 376, 214, 127-E11 (1991)

A Powerful Local Shear Instability in Weakly Magnetized Disks. II. Nonlinear Evolution. *John F. Hawley & Steven A. Balbus.* 376, 223, 127-F8 (1991)

Stability of Nonrotating Stellar Systems. II. Prolate Shell-Orbit Models. *David Merritt & Lars Hernquist.* 376, 439, 131-G13 (1991)

Nonlinear Instability of the Accretion Line. *Noam Soker.* 376, 750, 135-F1 (1991)

Modes of Oscillation of a Uniformly Rotating, Homogeneous Spheroid of Stars. *Peter O. Vandervoort.* 377, 49, 138-F1 (1991)

Cloud Formation by Combined Instabilities in Galactic Gas Layers: Evidence for a *Q* Threshold in the Fragmentation of Shearing Wavelets. *Bruce G. Elmegreen.* 378, 139, 152-F11 (1991)

The Secular Instability of Axisymmetric Collisionless Star Clusters. *Henry E. Kandrup.* 380, 511, 184-E9 (1991)

A Model for Tidally Driven Eccentric Instabilities in Fluid Disks. *Stephen H. Lubow.* 381, 259, 192-B12 (1991)

Simulations of Tidally Driven Eccentric Instabilities with Application to Superhumps. *Stephen H. Lubow.* 381, 268, 192-C9 (1991)

Three-dimensional Simulations of Black Hole Tori. *John F. Hawley.* 381, 496, 196-G9 (1991)

Two-dimensional Hydrodynamic Calculations of the Nonlinear Development of the Goldreich-Schubert-Fricke Instability in a Rotating Annulus. *D. G. Korycansky.* 381, 515, 197-B1 (1991)

Inverse-Compton Gamma-Ray Emission from Chaotic, Early-Type Stellar Winds and Its Detectability by *Gamma Ray Observatory*. *Wan Chen & Richard L. White.* 381, L63, 199-E1 (1991)

Influence of a Dark Halo on the Stability of Elliptical Galaxies. *M. Stiavelli & L. S. Sparke.* 382, 466, 207-D1 (1991)

On the Effects of Interstellar Gas on the Oscillations and the Stability of Galaxies. *Peter O. Vandervoort.* 383, 498, 220-E1 (1991)

Self-Organization of Cosmic Radiation Pressure Instability. II. One-dimensional Simulations. *Craig J. Hogan & Jorden Woods.* 384, 111, 2-D4 (1992)

Acoustic Instability in Cosmic-Ray Mediated Shocks. *Hyesung Kang, T. W. Jones, & Dongsu Ryu.* 385, 193, 14-D1 (1992)

Emergence of Magnetic Flux from the Convection Zone into the Solar Atmosphere. I. Linear and Nonlinear Adiabatic Evolution of the Convective-Parker Instability. *S. Nozawa, K. Shibata, R. Matsumoto, A. C. Sterling, T. Tajima, Y. Uchida, A. Ferrari, & R. Rosner.* 78, 267, 5-D5 (1992)

Magnetic Interchange Instability of Accretion Disks. *M. Kaisig, T. Tajima, & R. V. E. Lovelace.* 386, 83, 25-B7 (1992)

Resonance Line Radiation Instability in Fully Ionized Plasmas. *William G. Mathews.* 386, 90, 25-C1 (1992)

Instabilities in Astrophysical Jets. I. Linear Analysis of Body and Surface Waves. *Jun-Hui Zhao, Jack O. Burns, Philip E. Hardee, & Michael L. Norman.* 387, 69, 37-G7 (1992)

Instabilities in Astrophysical Jets. II. Numerical Simulations of Slab Jets. *Jun-Hui Zhao, Jack O. Burns, Michael L. Norman, & Martin E. Sulkanen.* 387, 83, 38-B1 (1992)

Inhibition of Electron Thermal Conduction by Electromagnetic Instabilities. *Amir Levinson & David Eichler.* 387, 212, 39-E5 (1992)

On the Instability Strip of the Cepheid Stars. *C. Chiosi, P. Wood, G. Bertelli, & A. Bressan.* 387, 320, 41-A1 (1992)

Asymmetric Morphology of the Propagating Jet. II. The Effect of Atmospheric Gradients. *Philip E. Hardee, Raymond E. White III, Michael L. Norman, Michael A. Cooper, & David A. Clarke.* 387, 460, 44-D8 (1992)

Radiative Instabilities and 1000 Second Fluctuations in Astrophysical Masers. *Gerardo A. Scappaticci & William D. Watson.* 387, L73, 48-C10 (1992)

Convective Instability in Differentially Rotating Disks. *Dongsu Ryu & Jeremy Goodman.* 388, 438, 55-F12 (1992)

The Stability of Accretion Tori. IV. Fission and Fragmentation of Slender, Self-gravitating Annuli. *Dimitris M. Christodoulou & Ramesh Narayan.* 388, 451, 56-A1 (1992)

Magnetic Fields and Radiative Shocks in Protogalaxies and the Origin of Globular Clusters. *Paul R. Shapiro, Alejandro Clocchiatti, & Hyesung Kang.* 389, 269, 63-C11 (1992)

Mixing in Ejecta of Supernovae. I. General Properties of Two-dimensional Rayleigh-Taylor Instabilities and Mixing Width in Ejecta of Supernovae. *Izumi Hachisu, Takuya Matsuda, Ken'ichi Nomoto, & Toshikazu Shigeyama.* 390, 230, 76-G7 (1992)

Swing Amplification of Nonaxisymmetric Perturbations in Stars and Gas in a Sheared Galactic Disk. *Chanda J. Jog.* 390, 378, 80-B1 (1992)

Hydrodynamic Instabilities in Supernova Remnants: Self-similar Driven Waves. *Roger A. Chevalier, John M. Blondin, & Robert T. Emmering.* 392, 118, 102-D9 (1992)

Initiation of Bipolar Flows by Magnetic Field Twisting in Protostellar Nebulae. *William I. Newman, Alice L. Newman, & Richard V. E. Lovelace.* 392, 622, 110-A1 (1992)

Is the Oort *A*-Value a Universal Growth Rate Limit for Accretion Disk Shear Instabilities? *Steven A. Balbus & John F. Hawley.* 392, 662, 110-D12 (1992)

Superhump Timing in SU Ursae Majoris Systems: Implications of the Data for the Precessing Disk Model. *Lawrence A. Molnar & Henry A. Kobulnicky.* 392, 678, 110-F3 (1992)

Swinging Spiral Waves and Alfvén Turbulence in Accretion Disks. *M. Tagger, R. Pellat, & F. V. Coroniti.* 393, 708, 124-F1 (1992)

Giant Molecular Cloud Formation through the Parker Instability in a Skewed Magnetic Field. *Tomoyuki Hanawa, Ryoji Matsumoto, & Kazunari Shibata.* 393, L71, 127-E1 (1992)

The Stability of QSO/AGN Broad Emission Line Clouds. *I. S. Krinsky & R. C. Puetter.* 394, 472, 135-C1 (1992)

Hydrodynamics of the Hot Component of the Galactic Halo. II. Radiative and Dynamical Instabilities. *A. Ferrara & G. Einaudi.* 395, 475, 148-D9 (1992)

Dynamical Stability of Two-dimensional Accretion Flows: An Analytic Study. *Omri Gat & Mario Livio.* 396, 542, 164-C1 (1992)

An Examination of the $m = 1$ Instability in a Low-Mass Protoplanetary Disk. *Hyerim Noh, Ethan T. Vishniac, & William D. Cochran.* 397, 347, 172-B11 (1992)

On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. I. General Results. *Miguel H. Ibáñez S., Antonio Parravano, & César A. Mendoza B.* 398, 177, 184-B1 (1992)

Tidally Driven Inclination Instability in Keplerian Disks. *Stephen H. Lubow.* 398, 525, 190-F3 (1992)

Local Magnetohydrodynamic Instabilities and the Wave-driven Dynamo in Accretion Disks. *Ethan T. Vishniac & Patrick Diamond.* 398, 561, 191-B5 (1992)

Growth and Decay of Disturbances in Stratified Shear Flow in a Rotating Frame. *D. G. Korycansky.* 399, 176, 197-D3 (1992)

The Effect of Line Tying on Parker's Instability. *Ellen G. Zweibel & David L. Bruhwiler.* 399, 318, 199-C11 (1992)

Spatial Stability of the Magnetized Slab Jet. *Philip E. Hardee, Michael A. Cooper, Michael L. Norman, & James M. Stone.* 399, 478, 203-G11 (1992)

Band Splitting in Solar Type II Radio Bursts. *R. A. Treumann & J. LaBelle.* 399, L167, 208-E7 (1992)

Rapid Time Variations and Radiative Instabilities of Astrophysical Masers. *Gerardo A. Scappaticci & William D. Watson.* 400, 351, 213-C7 (1992)

Nonlinear Dynamics of a Three-dimensional Jet. *Philip E. Hardee & David A. Clarke.* 400, L9, 214-B6 (1992)

A Powerful Local Shear Instability in Weakly Magnetized Disks. III. Long-Term Evolution in a Shearing Sheet. *John F. Hawley & Steven A. Balbus.* 400, 595, 217-F12 (1992)

A Powerful Local Shear Instability in Weakly Magnetized Disks. IV. Nonaxisymmetric Perturbations. *Steven A. Balbus & John F. Hawley.* 400, 610, 218-A1 (1992)

An Instability Associated with a Magnetosphere-Disk Interaction. *H. C. Spruit & Ronald E. Taam.* 402, 593, 10-A5 (1993)

The Cosmic Doppler Instability. *Craig J. Hogan.* 403, 445, 21-B1 (1993)

The Kelvin-Helmholtz Instability in Photospheric Flows: Effects on Coronal Heating and Structure. *Judith T. Karpen, Spiro K. Antiochos, Russell B. Dahlburg, & Daniel S. Spicer.* 403, 769, 25-C13 (1993)

Parker Instability in a Realistic Gravitational Field. *Ahmet T. Giz & Frank H. Shu.* 404, 185, 30-C3 (1993)

Formation of Large-Scale Cosmic Structure by the Doppler Instability. *Y. B. Band.* 404, 425, 34-C1 (1993)

Effects of Magnetic Fields and Rotation on the Fragmentation of Filamentary Molecular Clouds: Comparison of the Theory with the Orion A Cloud. *Tomoyuki Hanawa, Fumitaka Nakamura, Tomoaki Matsumoto, Takenori Nakano, Ken'ichi Tatematsu, Tomofumi Umemoto, Osamu Kameya, Naomi Hirano, Tetsuo Hasegawa, Norio Kaifu, & Satoshi Yamamoto.* 404, L83, 40-G1 (1993)

The Stability of Cosmic-Ray–dominated Shocks: A Secondary Instability. *Dongsu Ryu, Hyesung Kang, & T. W. Jones.* 405, 199, 43-E7 (1993)

Parametric Instabilities of Circularly Polarized Alfvén Waves in High-β Plasmas. *Hiromitsu Hamabata.* 406, 563, 64-G5 (1993)

A Local Instability of Tidally Distorted Accretion Disks. *Jeremy Goodman.* 406, 596, 65-C8 (1993)

Nonlinear Growth of Dynamical Overstabilities in Blast Waves. *Mordecai-Mark Mac Low & Michael L. Norman.* 407, 207, 71-E11 (1993)

On the Nonlinear Instability of a Thermal Field. *Miguel H. Ibáñez S., Antonio Parravano, & César A. Mendoza B.* 407, 611, 78-B13 (1993)

Unstable Degenerates Revisited. *John Faulkner.* 408, 600, 92-F5 (1993)

Local Hydrodynamic Instability of Rotating Stars. *Alexander Lifschitz & Norman Lebovitz.* 408, 603, 92-F9 (1993)

Two-dimensional Viscous Accretion Disk Models. II. On Viscous Overstability. *W. Kley, J. C. B. Papaloizou, & D. N. C. Lin.* 409, 739, 108-C6 (1993)

A Generalized Zel'dovich Approximation to Gravitational Instability. *M. Giavalisco, B. Mancinelli, P. J. Mancinelli, & A. Yahil.* 411, 9, 127-B12 (1993)

On the Convective Instability of the Cometary Ionosphere. *A. I. Ershkovich & P. L. Israelevich.* 411, 891, 140-G12 (1993)

On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. II. Application to the Interstellar Medium. *Antonio Parravano, Miguel H. Ibáñez S., & César A. Mendoza B.* 412, 625, 151-E6 (1993)

The Stability of Accretion Tori. V. Unstable Modes and Avoided Crossings in Extended, Self-gravitating Annuli. *Dimitris M. Christodoulou.* 412, 696, 152-D13 (1993)

Oscillatory Instability of Radiative Shocks with Transverse Magnetic Field: Linear Analysis and Nonlinear Simulations. *G. Tóth & B. T. Draine.* 413, 176, 158-C8 (1993)

Anomalous Energy and Momentum Transfer of Intense Neutrinos in Supernova Explosions. *Tzihong Chiueh.* 413, L35, 162-E11 (1993)

Formation of Quasar Clouds by Thermal Instability in the Presence of Alfvén Wave Heating. *D. R. Gonçalves, V. Jatenco-Pereira, & R. Opher.* 414, 57, 170-F12 (1993)

Radiative Instability in Synchrotron-emitting Plasmas. *P. Rossi, G. Bodo, S. Massaglia, & A. Ferrari.* 414, 112, 171-D7 (1993)

Three-dimensional Magnetohydrodynamics of the Emerging Magnetic Flux in the Solar Atmosphere. *R. Matsumoto, T. Tajima, K. Shibata, & M. Kaisig.* 414, 357, 174-D8 (1993)

A Hydrodynamical Model for the Explosion of a Neutron Star Just below the Minimum Mass. *Monica Colpi, Stuart L. Shapiro, & Saul A. Teukolsky.* 414, 717, 180-B10 (1993)

Propagation and Stability Properties of Radio Jets in Cluster Cooling Flow Atmospheres. *Chris Loken, Jack O. Burns, Michael L. Norman, & David A. Clarke.* 417, 515, 225-F9 (1993)

Rings of Fire: Nuclear Burning as the Origin of Sub-Hertz Noise and Weak X-Ray Bursts in Accreting Neutron Stars. *Lars Bildsten.* 418, L21, 238-C8 (1993)

Temperatures of Enhanced Stability in Hot Thin Plasmas. *Neil Gehrels & Ellen D. Williams.* 418, L25, 238-D1 (1993)

Stability of Detonations in Supernovae. *A. M. Khokhlov.* 419, 200, 248-F5 (1993)

Dynamical Instabilities in Hollow Halo Models. *Joshua E. Barnes.* 419, L17, 252-C11 (1993)

Star Formation at Compressed Interfaces in Turbulent Self-gravitating Clouds. *B. G. Elmegreen.* 419, L29, 252-E1 (1993)

The Stability of Thick, Self-gravitating Disks in Protostellar Systems. *John W. Woodward, Joel E. Tohline, & Izumi Hachisu.* 420, 247, 4-A7 (1994)

Dynamics of the Magnetic Shearing Instability and Magnetohydrodynamic Turbulence in Accretion Disks. I. Vertical Magnetic Field. *W. Zhang, P. H. Diamond, & E. T. Vishniac.* 420, 705, 11-F2 (1994)

Hydrodynamic Instability and Coalescence of Binary Neutron Stars. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 420, 811, 13-A10 (1994)

Local Shear Instabilities in Weakly Ionized, Weakly Magnetized Disks. *Omer M. Blaes & Steven A. Balbus.* 421, 163, 18-A12 (1994)

The Effects of Kelvin-Helmholtz Instability on Resonance Absorption Layers in Coronal Loops. *Judith T. Karpen, Russell B. Dahlburg, & Joseph M. Davila.* 421, 372, 20-E10 (1994)

Nonlinear Evolution of Tidally Distorted Accretion Disks: Two-dimensional Simulations. *Dongsu Ryu & Jeremy Goodman.* 422, 269, 33-D10 (1994)

Magnetogravitational Instability of Self-gravitating Dusty Plasma. *R. K. Chhajlani & A. K. Parihar.* 422, 746, 41-B6 (1994)

Equilibrium, Stability, and Orbital Evolution of Close Binary Systems. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 423, 344, 50-D9 (1994)

The Formation of Stellar Systems by Gravitational Instability in the Cygnus Superbubble. *F. Comerón & J. Torra.* 423, 652, 56-F1 (1994)

On the Acceleration of Nuclear Flame Fronts in White Dwarfs. *F. X. Timmes.* 423, L131, 61-B5 (1994)

Stability against Phase Mixing of Collisionless Self-gravitating Matter. *Jens Hjorth.* 424, 106, 63-C11 (1994)

The Formation of Stellar Groups and Clusters in Molecular Cloud Cores. *Kanan Patel & Ralph E. Pudritz.* 424, 688, 73-D7 (1994)

On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. III. Molecular Gas. *Miguel H. Ibáñez S., & Antonio Parravano.* 424, 763, 74-C8 (1994)

X-Ray Enhancement of SN 1987A Due to Interaction with Its Ringlike Nebula. *Kuniaki Masai & Ken'ichi Nomoto.* 424, 924, 76-C3 (1994)

Nickel Bubble Instability and Mixing in SN 1987A. *Mikhail Basko.* 425, 264, 83-E5 (1994)

Instabilities of Counterrotating Stellar Disks. *J. A. Sellwood & David Merritt.* 425, 530, 88-C5 (1994)

Bending Instabilities in Stellar Systems. *David Merritt & J. A. Sellwood.* 425, 551, 88-E5 (1994)

Starbursts by Gravitational Collapse in the Inner Lindblad Resonance Rings of Galaxies. *B. G. Elmegreen.* 425, L73, 94-C8 (1994)

Testing the Gravitational Instability Hypothesis? *Arif Babul, David H. Weinberg, Avishai Dekel, & Jeremiah P. Ostriker.* 427, 1, 110-B1 (1994)

The Nonlinear Evolution of Rare Events. *Francis Bernardeau.* 427, 51, 110-F1 (1994)

Gravitational Instability and Disk Star Formation. *Boqi Wang & Joseph Silk.* 427, 759, 122-B4 (1994)

Nonlinear Instabilities in Shock-bounded Slabs. *Ethan T. Vishniac.* 428, 186, 130-E1 (1994)

Streaming Instability in Relativistically Hot Pulsar Magnetospheres. *James C. Weatherall.* 428, 261, 131-D5 (1994)

Gravitational Instabilities in a Proto–Planetary Disk Including the Effects of Magnetic Fields. *Hyerim Noh, Ethan T. Vishniac, & William D. Cochran.* 428, 275, 131-E9 (1994)

Nonlinear Approximations to Gravitational Instability: A Comparison in Second-Order Perturbation Theory. *Dipak Munshi & Alexei A. Starobinsky.* 428, 433, 135-E6 (1994)

Gravitational Instability of Cold Matter. *Edmund Bertschinger & Bhuvnesh Jain.* 431, 486, 184-E12 (1994)

Acoustic Instability Driven by Cosmic-Ray Streaming. *Mitchell C. Begelman & Ellen G. Zweibel.* 431, 689, 187-B6 (1994)

Low-Frequency Quasi-periodic Oscillations in Low-Mass X-Ray Binaries and Galactic Black Hole Candidates. *Xingming Chen & Ronald E. Taam.* 431, 732, 187-F3 (1994)

Secondary Maxima of Black Hole X-Ray Transients: A Clue to Understanding X-Ray Irradiation. *S. Mineshige.* 431, L99, 191-F7 (1994)

Cosmic Bullets as Particle Accelerators and Radio Sources. *T. W. Jones, Hyesung Kang, & I. L. Tregillis.* 432, 194, 195-E11 (1994)

Parasitic Instabilities in Magnetized, Differentially Rotating Disks. *Jeremy Goodman & Guohong Xu.* 432, 213, 195-G7 (1994)

Hydrodynamics of Binary Coalescence. I. Polytropes with Stiff Equations of State. *Frederic A. Rasio & Stuart L. Shapiro.* 432, 242, 196-C2 (1994)

On the Thermochemical Stability of the Pregalactic Gas. I. The Equilibrium States. *Patricia Rosenzweig, Antonio Parravano, Miguel H. Ibáñez S., & Yu. I. Izotov.* 432, 485, 202-A7 (1994)

Causally Limited Viscosity and the Stability Properties of Isothermal Accretion Disks. *Xue-Bing Wu & Lan-Tian Yang.* 432, 672, 204-D3 (1994)

Stability Criteria for Massive Current Sheets in Two-dimensional Potential Magnetic Fields. *J. J. Aly, S. Colombi, & T. Lepeltier.* 432, 793, 205-G9 (1994)

Axisymmetric Neutrino Radiation and the Mechanism of Supernova Explosions. *Tetsuya Shimizu, Shoichi Yamada, & Katsuhiko Sato.* 432, L119, 207-B1 (1994)

Supercloud Formation by Gravitational Collapse of Magnetic Gas in the Crest of a Spiral Density Wave. *B. G. Elmegreen.* 433, 39, 208-F5 (1994)

Four Experiments on Thermal Instabilities in Stellar Envelopes. *Alvio Renzini & Claudio Ritossa.* 433, 293, 212-A5 (1994)

The CO/SiO Radiative Instability in Cool Star Atmospheres Revisited. *M. Cuntz & D. O. Muchmore.* 433, 303, 212-B3 (1994)

Prompt Convection in Core Collapse Supernovae. *Stephen W. Bruenn & Anthony Mezzacappa.* 433, L45, 215-C1 (1994)

Generation of Spatial Structures by Nonlinear Mass-Exchange Processes in a Multicomponent Rotating Disk. *V. I. Korchagin & A. D. Ryabtsev.* 433, 520, 217-D9 (1994)

Thermally Unstable Perturbations in Stratified Conducting Atmospheres. *Fabio Reale, Salvatore Serio, & Giovanni Peres.* 433, 811, 221-C1 (1994)

Waves and Instabilities of a Toroidal Magnetic Flux Tube in a Rotating Star. *A. Ferriz-Mas & M. Schüssler.* 433, 852, 221-F10 (1994)

Linear Stability of Spherical Collisionless Stellar Systems. *G. Bertin, F. Pegoraro, F. Rubini, & E. Vesperini.* 434, 94, 226-D8 (1994)

On the Global Stability of Magnetized Accretion Disks. I. Axisymmetric Modes. *Charles Curry, Ralph E. Pudritz, & Peter G. Sutherland.* 434, 206, 228-C7 (1994)

Radiative Shock Overstability of Finite-sized Objects. *Ruth Dgani & Noam Soker.* 434, 262, 229-A11 (1994)

Nonaxisymmetric Three-dimensional Instability in Thin Accretion Disks. *Tzihong Chiueh & Yao-Huan Tseng.* 435, 379, 248-E11 (1994)

Disk-Instability Model for Black Hole Transients: Interplay of Thermal and Tidal Instabilities. *S. Ichikawa, S. Mineshige, & T. Kato.* 435, 748, 256-D2 (1994)

Nonlinear Instability of Accelerating Shock Waves with Application to Supernovae. *Ding Luo & Roger A. Chevalier.* 435, 815, 257-C9 (1994)
When Star Formation Stops: Galaxy Edges and Low Surface Brightness Disks. *B. G. Elmegreen & A. Parravano.* 435, L121, 260-A3 (1994)
Nonaxisymmetric Evolution in Protostellar Disks. *Gregory Laughlin & Peter Bodenheimer.* 436, 335, 265-G13 (1994)
What is the Condition for Fast Magnetic Reconnection? *T. Yokoyama & K. Shibata.* 436, L197, 282-E7 (1994)
Hydrodynamics of Rotating Stars and Close Binary Interactions: Compressible Ellipsoid Models. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 437, 742, 295-G13 (1994)
Critical Angular Velocities of Rotating Neutron Stars. *Lee Lindblom.* 438, 265, 5-B4 (1995)
Jeans Mass for Anisotropic Matter. *L. Herrera & N. O. Santos.* 438, 308, 5-F7 (1995)
Thermal Equilibria of Accretion Disks. *Marek A. Abramowicz, Xingming Chen, Shoji Kato, Jean-Pierre Lasota, & Oded Regev.* 438, L37, 10-C5 (1995)
Gravitational Radiation–driven Secular Instability of Rotating Polytropes. *Shin'ichirou Yoshida & Yoshiharu Eriguchi.* 438, 830, 15-F1 (1995)
Propagation of Nuclear Burning Fronts on Accreting Neutron Stars: X-Ray Bursts and Sub-Hertz Noise. *Lars Bildsten.* 438, 852, 16-A2 (1995)
Hydrodynamics of Binary Coalescence. II. Polytropes with $\Gamma = 5/3$. *Frederic A. Rasio & Stuart L. Shapiro.* 438, 887, 16-D1 (1995)
A Helical Jet in the Orthogonally Misaligned BL Lacertae Object Markarian 501 (B1652+398). *J. E. Conway & J. M. Wrobel.* 439, 98, 22-E3 (1995)
Rapid Polarization Variability in Intense Sources. *R. T. Gangadhara & V. Krishan.* 440, 116, 42-G1 (1995)
Local Three-dimensional Magnetohydrodynamic Simulations of Accretion Disks. *John F. Hawley, Charles F. Gammie, & Steven A. Balbus.* 440, 742, 53-D4 (1995)
Oscillatory Modes in Near-critical Accretion Flows. *Guy S. Miller & Myeong-Gu Park.* 440, 771, 53-F11 (1995)
Simulation of the Instability of Mach 2 and Mach 4 Gaseous Jets in Two and Three Dimensions. *Gene M. Bassett & Paul R. Woodward.* 441, 582, 70-B1 (1995)
Dynamics of Gravitational Instability Is Nonlocal. *Lev Kofman & Dmitry Pogosyan.* 442, 30, 77-E12 (1995)
Gravitational Radiation from Rapidly Rotating Nascent Neutron Stars. *Dong Lai & Stuart L. Shapiro.* 442, 259, 80-F11 (1995)
Incorporation of Ambipolar Diffusion into the ZEUS Magnetohydrodynamics Code. *Mordecai-Mark Mac Low, Michael L. Norman, Arieh Königl, & Mark Wardle.* 442, 726, 90-B10 (1995)
The Radial-azimuthal Instability of Accretion Disks. I. Radiation Pressure Domination. *Xue-Bing Wu, Qi-Bin Li, Yong-Heng Zhao, & Lan-Tian Yang.* 442, 736, 90-C10 (1995)
The Radial-azimuthal Instability of Accretion Disks. II. Gas Pressure Domination. *Xue-Bing Wu, Qi-Bin Li, Yong-Heng Zhao, & Lan-Tian Yang.* 442, 743, 90-D7 (1995)
A New Criterion for Bar-forming Instability in Rapidly Rotating Gaseous and Stellar Systems. I. Axisymmetric Form. *Dimitris M. Christodoulou, Isaac Shlosman, & Joel E. Tohline.* 443, 551, 105-D8 (1995)
A New Criterion for Bar-forming Instability in Rapidly Rotating Gaseous and Stellar Systems. II. Nonaxisymmetric Form. *Dimitris M. Christodoulou, Isaac Shlosman, & Joel E. Tohline.* 443, 563, 105-E10 (1995)
Hydrodynamics of Coalescing Binary Neutron Stars: Ellipsoidal Treatment. *Dong Lai & Stuart L. Shapiro.* 443, 705, 107-E12 (1995)
Unified Description of Accretion Flows around Black Holes. *Xingming Chen, Marek A. Abramowicz, Jean-Pierre Lasota, Ramesh Narayan, & Insu Yi.* 443, L61, 111-E4 (1995)
Hydrodynamic Instabilities in Supernova Remnants: Early Radiative Cooling. *Roger A. Chevalier & John M. Blondin.* 444, 312, 117-F11 (1995)
Hydrodynamics of Semiconvection. *William J. Merryfield.* 444, 318, 117-G7 (1995)
Nonaxisymmetric Secular Instabilities Driven by Star/Disk Coupling. *James N. Imamura, Joseph Toman, Richard H. Durisen, Brian K. Pickett, & Shelby Yang.* 444, 363, 118-E4 (1995)
Mass Transfer Cycles in Cataclysmic Variables. *A. R. King, J. Frank, U. Kolb, & H. Ritter.* 444, L37, 121-F7 (1995)
The Minimum Mass Ratio of W Ursae Majoris Binaries. *Frederic A. Rasio.* 444, L41, 121-G1 (1995)
Fragmentation of Filamentary Molecular Clouds with Longitudinal Magnetic Fields: Formation of Disks and Their Collapse. *Fumitaka Nakamura, Tomoyuki Hanawa, & Takenori Nakano.* 444, 770, 127-B2 (1995)
Instabilities and the Transport of Polarized Astrophysical Maser Radiation. *Bradley K. Wallin & William D. Watson.* 445, 465, 139-A4 (1995)
Magnetic Viscosity by Localized Shear Flow Instability in Magnetized Accretion Disks. *R. Matsumoto & T. Tajima.* 445, 767, 145-G1 (1995)
Phase-Transition Theory of Instabilities. I. Second-Harmonic Instability and Bifurcation Points. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 472, 162-E12 (1995)
Phase-Transition Theory of Instabilities. II. Fourth-Harmonic Bifurcations and λ-Transitions. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 485, 162-G3 (1995)
Phase-Transition Theory of Instabilities. III. The Third-Harmonic Bifurcation on the Jacobi Sequence and the Fission Problem. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 500, 163-A8 (1995)
Phase-Transition Theory of Instabilities. IV. Critical Points on the Maclaurin Sequence and Nonlinear Fission Processes. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 510, 163-B7 (1995)
Line-driven Instability Growth Rates in Wolf-Rayet Winds. *Kenneth G. Gayley & Stanely P. Owocki.* 446, 801, 167-B4 (1995)
The Statistical Physics of Solar Active Regions and the Fundamental Nature of Solar Flares. *Edward T. Lu.* 446, L109, 171-E3 (1995)
Instabilities in Photoionized Interstellar Gas. *Edvige Corbelli & Andrea Ferrara.* 447, 708, 185-G1 (1995)
On the Origin of the Observed Knots in Novae. *Shlomi Pistinner & Giora Shaviv.* 448, L37, 199-G8 (1995)
Cold Accretion Disks with Coronae and Advection. *Xingming Chen.* 448, 803, 206-A4 (1995)
Radiative Instabilities in Three-dimensional Astrophysical Masers. *Gerardo A. Scappaticci & William D. Watson.* 448, 862, 206-G1 (1995)
Magnetic Buoyancy, Vorticity, and Three-dimensional Flux-Tube Formation. *P. C. Matthews, D. W. Hughes, & M. R. E. Proctor.* 448, 938, 207-G11 (1995)
Theoretical Properties of the Ω-Loops in the Convection Zone of the Sun. IV. Stability of Updrafts. *E. N. Parker.* 448, 942, 208-A7 (1995)
Nonlinear Energy Transfer in Solar Magnetic Loops. *Daniel O. Gómez, Edward E. DeLuca, & Alexander N. McClymont.* 448, 954, 208-B8 (1995)
Destabilization of Strongly Magnetized Jets. *Philip E. Hardee & David A. Clarke.* 449, 119, 211-G4 (1995)
Numerical Analysis of the Dynamic Stability of Radiative Shocks. *Russell Strickland & John M. Blondin.* 449, 727, 222-G5 (1995)
Emission and Dynamics of a Heavy Three-dimensional Magnetized Jet. *Philip E. Hardee & David A. Clarke.* 451, L25, 252-D11 (1995)
The Optimal N-Body Method for Stability Studies of Galaxies. *David J. D. Earn & J. A. Sellwood.* 451, 533, 254-E12 (1995)
Thermal Instability and Pulsations of the Flame Front in White Dwarfs. *Vitaliy V. Bychkov & Michael A. Liberman.* 451, 711, 257-A7 (1995)
Local Nonlinear Approximations to the Growth of Cosmic Structures. *Paul J. Mancinelli & Amos Yahil.* 452, 75, 263-B8 (1995)
The Evolution of Accretion Disks with Coronae: A Model for the Low-Frequency Quasi-periodic Oscillations in X-Ray Binaries. *Marek A. Abramowicz, Xingming Chen, & Ronald E. Taam.* 452, 379, 267-C11 (1995)
Microscopic Instabilities of Nuclear Flames in Type Ia Supernovae. *J. C. Niemeyer & W. Hillebrandt.* 452, 779, 275-C12 (1995)
A Numerical Study of Rayleigh-Taylor Instability in Magnetic Fluids. *Byung-Il Jun, Michael L. Norman, & James M. Stone.* 453, 332, 285-F9 (1995)
General Local Stability Criteria for Stratified, Weakly Magnetized Rotating Systems. *Steven A. Balbus.* 453, 380, 286-C13 (1995)
On the Global Stability of Magnetized Accretion Disks. II. Vertical and Azimuthal Magnetic Fields. *Charles Curry & Ralph E. Pudritz.* 453, 697, 293-D6 (1995)
The Corrugation Instability in Slow Magnetosonic Shock Waves. *James M. Stone & Mark Edelman.* 454, 182, 301-G7 (1995)
Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. V. Coriolis Force and the Centrifugal Potential Barrier. *E. N. Parker.* 454, 927, 314-E10 (1995)

A Turbulent Model for the Interstellar Medium. II. Magnetic Fields and Rotation. *Thierry Passot, Enrique Vázquez-Semadeni, & Annick Pouquet.* 455, 536, 329-D1 (1995)

An Empirical Condition for Stability of Hierarchical Triple Systems. *Peter Eggleton & Ludmila Kiseleva.* 455, 640, 330-F8 (1995)

INSTRUMENTATION: DETECTORS

A Rotating Tomographic Imager for Solar Extreme-Ultraviolet/Soft X-Ray Emission. *Joseph M. Davila & W. T. Thompson.* 389, L91, 73-F8 (1992)

COBE Differential Microwave Radiometers: Calibration Techniques. *C. L. Bennett, G. F. Smoot, M. Janssen, S. Gulkis, A. Kogut, G. Hinshaw, C. Backus, M. G. Hauser, J. C. Mather, L. Rokke, L. Tenorio, R. Weiss, D. T. Wilkinson, E. L. Wright, G. De Amici, N. W. Boggess, E. S. Cheng, P. D. Jackson, P. Keegstra, T. Kelsall, R. Kummerer, C. Lineweaver, S. H. Moseley, T. L. Murdock, J. Santana, R. A. Shafer, & R. F. Silverberg.* 391, 466, 93-F7 (1992)

Calibration of the Energetic Gamma-Ray Experiment Telescope (EGRET) for the *Compton Gamma-Ray Observatory*. *D. J. Thompson, D. L. Bertsch, C. E. Fichtel, R. C. Hartman, R. Hofstadter, E. B. Hughes, S. D. Hunter, B. W. Hughlock, G. Kanbach, D. A. Kniffen, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, C. von Montigny, P. L. Nolan, H. I. Nel, K. Pinkau, H. Rothermel, E. J. Schneid, M. Sommer, P. Sreekumar, D. Tieger, & A. H. Walker.* 86, 629, 22-F1 (1993)

Instrument Description and Performance of the Imaging Gamma-Ray Telescope COMPTEL aboard the *Compton Gamma-Ray Observatory*. *V. Schönfelder, H. Aarts, K. Bennett, H. de Boer, J. Clear, W. Collmar, A. Connors, A. Deerenberg, R. Diehl, A. von Dordrecht, J. W. den Herder, W. Hermsen, M. Kippen, L. Kuiper, G. Lichti, J. Lockwood, J. Macri, M. McConnell, D. Morris, R. Much, J. Ryan, G. Simpson, M. Snelling, G. Stacy, H. Steinle, A. Strong, B. N. Swanenburg, B. Taylor, C. de Vries, & C. Winkler.* 86, 657, 23-A5 (1993)

The Oriented Scintillation Spectrometer Experiment: Instrument Description. *W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, W. R. Purcell, D. A. Grabelsky, M. P. Ulmer, D. A. Hillis, G. V. Jung, & R. A. Cameron.* 86, 693, 23-D3 (1993)

In-Flight Performance and Preliminary Results from the Far Ultraviolet Space Telescope (Faust) Flown on ATLAS-1. *Stuart Bowyer, Timothy P. Sasseen, Michael Lampton, & Xiaoyi Wu.* 415, 875, 198-G12 (1993)

A Deeply Embedded Companion to LkHα 198. *P. O. Lagage, G. Olofsson, S. Cabrit, C. J. Cesarsky, L. Nordh, & J. M. Rodriguez Espinosa.* 417, L79, 230-D6 (1993)

The Position of PSR 0540−69. *A. Shearer, M. Redfern, H. Pedersen, T. Rowold, P. O'Kane, R. Butler, C. O'Byrne, & M. Cullum.* 423, L51, 53-G3 (1994)

The Cosmic-Ray Energy Spectrum Observed by the Fly's Eye. *D. J. Bird, S. C. Corbató, H. Y. Dai, B. R. Dawson, J. W. Elbert, B. L. Emerson, K. D. Green, M. A. Huang, D. B. Kieda, M. Luo, S. Ko, C. G. Larsen, E. C. Loh, M. H. Salamon, J. D. Smith, P. Sokolsky, P. Sommers, J. K. K. Tang, & S. B. Thomas.* 424, 491, 67-G13 (1994)

GRIS Background Reduction Results Using Isotopically Enriched Ge. *S. D. Barthelmy, L. M. Bartlett, N. Gehrels, M. Leventhal, B. J. Teegarden, J. Tueller, S. Belyaev, V. Lebedev, & H. V. Klapdor-Kleingrothaus.* 427, 519, 116-D6 (1994)

Measurement of the Sunyaev-Zel'dovich Effect toward Abell 2163 at a Wavelength of 2.2 Millimeters. *T. M. Wilbanks, P. A. R. Ade, M. L. Fischer, W. L. Holzapfel, & A. E. Lange.* 427, L75, 126-F13 (1994)

A Wide-Field Monitor for *INTEGRAL*. *Niels Lund.* 92, 337, 36-C9 (1994)

A 3 × 3 CsI(Tl) Array as an Example of a Segmented Detector. *J. A. Ruiz, J. L. Ferrero, G. Bernabeu, V. Reglero, & F. Sanchez.* 92, 659, 40-F1 (1994)

A Positron Annihilation Radiation Telescope Using Laue Diffraction in a Crystal Lens. *Peter von Ballmoos & Robert K. Smither.* 92, 663, 40-F7 (1994)

A New Telescope for Wide-Band Gamma-Ray Astronomy: The Silicon Compton Recoil Telescope (SCRT). *O. Tümay Tümer, Farid Ait-Ouamer, Scott C. Blair, Gary L. Case, Brendan P. O'Neill, Terrence J. O'Neill, R. Stephen White, & Allen D. Zych.* 92, 671, 40-G2 (1994)

Spallation Products Induced in CsI(Tl) by High-Energy Protons. *J. A. Ruiz, E. Porras, J. L. Ferrero, V. Reglero, F. Sanchez, F. Lei, A. J. Bird, T. Carter, & A. J. Dean.* 92, 683, 41-A6 (1994)

High Time Resolution Infrared Observations of the Crab Nebula Pulsar. *S. M. Ransom, G. G. Fazio, S. S. Eikenberry, J. Middleditch, J. Kristian, K. Hays, & C. R. Pennypacker.* 431, L43, 182-G11 (1994)

Gamma-Ray Observations in the Galactic Center Region with an Imaging Detector. *Jalal Samimi & Robert L. Kinzer.* 434, 136, 227-A8 (1994)

In-Orbit Performance of the COSTAR-corrected Faint Object Camera. *R. I. Jedrzejewski, G. Hartig, P. Jakobsen, J. H. Crocker, & H. C. Ford.* 435, L7, 251-B12 (1994)

The Faint Limit of the *Hubble Space Telescope* Faint Object Spectrograph and Rejection of the Cosmic-Ray Background. *David Tytler & Christopher Davis.* 438, 420, 7-C5 (1995)

Calibrating the Broad Band X-Ray Telescope. *K. A. Weaver, K. A. Arnaud, E. A. Boldt, D. Christian, M. Corcoran, S. S. Holt, K. Jahoda, R. Kelley, F. E. Marshall, R. F. Mushotzky, R. Petre, G. Rawley, P. J. Serlemitsos, E. M. Schlegel, A. P. Smale, J. H. Swank, A. E. Szymkowiak, & S. Yamauchi.* 96, 303, 5-D13 (1995)

Dead-Time Modifications to Fast Fourier Transform Power Spectra. *W. Zhang, K. Jahoda, J. H. Swank, E. H. Morgan, & A. B. Giles.* 449, 930, 225-E9 (1995)

Determination of the Galactic ^{26}Al Source Distribution with a Novel Imaging Telescope. *E. Aprile, E. L. Chupp, A. Bolotnikov, & P. P. Dunphy.* 453, 685, 293-C5 (1995)

Performance and Preliminary Calibration of the Hopkins Ultraviolet Telescope on the Astro-2 Mission. *Jeffrey W. Kruk, Samuel T. Durrance, Gerard A. Kriss, Arthur F. Davidsen, William P. Blair, Brian R. Espey, & David S. Finley.* 454, L1, 307-C1 (1995)

INSTRUMENTATION: INTERFEROMETERS

Determination of the Visual Orbit of the Spectroscopic Binary α Andromedae with Submilliarcsecond Precison. *Xiaopei Pan, Michael Shao, M. Mark Colavita, J. Thomas Armstrong, David Mozurkewich, Maddali Vivekanand, Craig S. Denison, Richard S. Simon, & Kenneth J. Johnston.* 384, 624, 9-G9 (1992)

First Results of an On-Line Adaptive Optics System with Atmospheric Wavefront Sensing by an Artificial Neural Network. *M. Lloyd-Hart, P. Wizinowich, B. McLeod, D. Wittman, D. Colucci, R. Dekany, D. McCarthy, J. R. P. Angel, & D. Sandler.* 390, L41, 78-F8 (1992)

Atmospheric Fluctuations: Empirical Structure Functions and Projected Performance of Future Instruments. *M. Bester, W. C. Danchi, C. G. Degiacomi, L. J. Greenhill, & C. H. Townes.* 392, 357, 105-D1 (1992)

Solar Magnetic Field Studies Using the 12 Micron Emission Lines. II. Stokes Profiles and Vector Field Samples in Sunspots. *Tilak Hewagama, Drake Deming, Donald E. Jennings, Vladimir Osherovich, Gunter Wiedemann, David Zipoy, Donald L. Mickey, & Howard Garcia.* 86, 313, 18-B7 (1993)

High Angular Resolution Measurements of Algol. *Xiaopei Pan, Michael Shao, & M. Mark Colavita.* 413, L129, 169-C1 (1993)

A Fabry-Perot Imager for Near-Infrared Astrophysics at the Communications Research Laboratory 1.5 Meter Telescope, and Imaging of Hydrogen Recombination Lines in the Orion Nebula. *Hajime Sugai, Tomonori Usuda, Hirokazu Kataza, Masuo Tanaka, Hironobu Kawabata, Motoko Y. Inoue, Hideki Takami, Tetsuo Aoki, & Norihisa Hiromoto.* 427, 511, 116-C10 (1994)

Detection of a VLBI Counterjet in NGC 1275: A Possible Probe of the Parsec-Scale Accretion Region. *R. C. Walker, J. D. Romney, & J. M. Benson.* 430, L45, 165-F13 (1994)

INSTRUMENTATION: MISCELLANEOUS

Liquid Mirrors: Optical Shop Tests and Contributions to the Technology. *E. F. Borra, R. Content, L. Girard, S. Szapiel, L. M. Tremblay, & E. Boily.* 393, 829, 126-C1 (1992)

Tip-Tilt Compensation: Resolution Limits for Ground-based Telescopes Using Laser Guide Star Adaptive Optics. *Scot S. Olivier, Claire E. Max, Donald T. Gavel, & James M. Brase.* 407, 428, 74-D1 (1993)

Optical Shop Tests of a f/1.2 2.5 Meter Diameter Liquid Mirror. *E. F. Borra, R. Content, & L. Girard.* 418, 943, 244-D1 (1993)

A Wide Sky Coverage Ferrofluid Mercury Telescope. *William L. H. Shuter & Lorne A. Whitehead.* 424, L139, 79-F12 (1994)

Planet Detectability by an Adaptive Optics Stellar Coronagraph. *Tadashi Nakajima.* 425, 348, 84-F1 (1994)

The Solar Diameter and Oblateness Measured by the Solar Disk Sextant on the 1992 September 30 Balloon Flight. *S. Sofia, W. Heaps, & L. W. Twigg.* 427, 1048, 125-F2 (1994)

A Coronagraphic Search for Brown Dwarfs around Nearby Stars. *T. Nakajima, S. T. Durrance, D. A. Golimowski, & S. R. Kulkarni.* 428, 797, 140-B11 (1994)

The Polarization Sensitivity of the Liquid Xenon Imaging Telescope. *E. Aprile, A. Bolotnikov, D. Chen, R. Mukherjee, & F. Xu.* 92, 689, 41-A13 (1994)

The On-Orbit Performance of WFPC2. *John T. Trauger, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, John S. Gallagher III, Richard E. Griffiths, J. Jeff Hester, John G. Hoessel, Jon A. Holtzman, John E. Krist, Jeremy R. Mould, Paul A. Scowen, Karl R. Stapelfeldt, Alan M. Watson, & James A. Westphal.* 435, L3, 251-B5 (1994)

INSTRUMENTATION: PHOTOMETERS

A Bolometric Millimeter-Wave System for Observations of Anisotropy in the Cosmic Microwave Background Radiation on Medium Angular Scales. *M. L. Fischer, D. C. Alsop, E. S. Cheng, A. C. Clapp, D. A. Cottingham, J. O. Gundersen, T. C. Koch, E. Kreysa, P. R. Meinhold, A. E. Lange, P. M. Lubin, P. L. Richards, & G. F. Smoot.* 388, 242, 53-C11 (1992)

The Far-Infrared Photometer on the Infrared Telescope in Space. *A. E. Lange, M. M. Freund, S. Sato, T. Hirao, T. Matsumoto, & T. Watabe.* 428, 384, 133-A6 (1994)

INSTRUMENTATION: POLARIMETERS

Polarization in the Radio Galaxy 3C 109—An Obscured Quasar. *Robert W. Goodrich & Marshall H. Cohen.* 391, 623, 95-F12 (1992)

COBE DIRBE Near-Infrared Polarimetry of the Zodiacal Light: Initial Results. *G. B. Berriman, N. W. Boggess, M. G. Hauser, T. Kelsall, C. M. Lisse, S. H. Moseley, W. T. Reach, & R. F. Silverberg.* 431, L63, 183-C1 (1994)

INSTRUMENTATION: SPECTROGRAPHS

The Spectral Archive of Cosmic X-Ray Sources Observed by the *Einstein Observatory* Focal Plane Crystal Spectrometer. *Kenneth S. K. Lum, Claude R. Canizares, George W. Clark, Joan M. Coyne, Thomas H. Markert, Pablo J. Saez, Mark L. Schattenburg, & P. Frank Winkler.* 78, 423, 8-E11 (1992)

The Hopkins Ultraviolet Telescope: Performance and Calibration during the Astro-1 Mission. *Arthur F. Davidsen, Knox S. Long, Samuel T. Durrance, William P. Blair, Charles W. Bowers, Steven J. Conard, Paul D. Feldman, Henry C. Ferguson, Glen H. Fountain, Randy A. Kimble, Gerard A. Kriss, H. Warren Moos, & Kenneth A. Potocki.* 392, 264, 104-C1 (1992)

The Particle Background of the *ROSAT* PSPC. *S. L. Snowden, P. P. Plucinsky, U. Briel, G. Hasinger, & E. Pfeffermann.* 393, 819, 126-B1 (1992)

The Potential for Plasma Diagnostics from Stellar Extreme-Ultraviolet Observations. *U. Feldman, P. Mandelbaum, J. F. Seely, G. A. Doschek, & H. Gursky.* 81, 387, 40-D3 (1992)

Spatial Heterodyne Spectroscopy for the Exploration of Diffuse Interstellar Emission Lines at Far-Ultraviolet Wavelengths. *J. Harlander, R. J. Reynolds, & F. L. Roesler.* 396, 730, 166-D3 (1992)

Global O VI Line Emission from the Cygnus Loop Supernova Remnant and Direct Kinematic Measurement of the Associated Shock. *Andrew Rasmussen & Christopher Martin.* 396, L103, 167-E7 (1992)

The Scattered Solar X-Ray Background of the *ROSAT* PSPC. *S. L. Snowden & M. J. Freyberg.* 404, 403, 32-G3 (1993)

The Oriented Scintillation Spectrometer Experiment: Instrument Description. *W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, W. R. Purcell, D. A. Grabelsky, M. P. Ulmer, D. A. Hillis, G. V. Jung, & R. A. Cameron.* 86, 693, 23-D3 (1993)

IUE Short-Wavelength High-Dispersion Line List for the Symbiotic Nova RR Telescopii. *Jason P. Aufdenberg.* 87, 337, 31-D3 (1993)

Scattered Light in the Echelle Modes of the Goddard High Resolution Spectrograph aboard the *Hubble Space Telescope*. II. Analysis of In-Flight Spectroscopic Observations. *Jason A. Cardelli, Dennis C. Ebbets, & Blair D. Savage.* 413, 401, 161-C5 (1993)

An Updated Calibration of the *ROSAT* PSPC Particle Background for the Analysis of Diffuse and Extended Sources. *P. P. Plucinsky, S. L. Snowden, U. G. Briel, G. Hasinger, & E. Pfeffermann.* 418, 519, 237-D10 (1993)

The Extreme Ultraviolet Spectrograph: A Radial Groove Grating, Sounding Rocket–borne, Astronomical Instrument. *Erik Wilkinson, James C. Green, & Webster Cash.* 89, 211, 51-F5 (1993)

Calibration of the *COBE* FIRAS Instrument. *D. J. Fixsen, E. S. Cheng, D. A. Cottingham, R. E. Eplee, Jr., T. Hewagama, R. B. Isaacman, K. A. Jensen, J. C. Mather, D. L. Massa, S. S. Meyer, P. D. Noerdlinger, S. M. Read, L. P. Rosen, R. A. Shafer, A. R. Trenholme, R. Weiss, C. L. Bennett, N. W. Boggess, D. T. Wilkinson, & E. L. Wright.* 420, 457, 8-C11 (1994)

Near-Infrared Spectrometer on the Infrared Telescope in Space. *Manabu Noda, Toshio Matsumoto, Shuji Matsuura, Kunio Noguchi, Masahiro Tanaka, Mark A. Lim, & Hiroshi Murakami.* 428, 363, 132-F5 (1994)

The Mid-Infrared Spectrometer on the Infrared Telescope in Space (IRTS) Mission. *Thomas L. Roellig, Takashi Onaka, Thomas J. McMahon, & T. Tanabé.* 428, 370, 132-G1 (1994)

Far-Infrared Line Mapper (FILM) on the Infrared Telescope in Space. *Hiroshi Shibai, Masao Yui, Hideo Matsuhara, Norihisa Hiromoto, Takao Nakagawa, & Haruyuki Okuda.* 428, 377, 132-G11 (1994)

INTEGRAL: Overview and Mission Concept. *Christoph Winkler.* 92, 327, 36-B9 (1994)

HST FOS Spectroscopy of M87: Evidence for a Disk of Ionized Gas around a Massive Black Hole. *Richard J. Harms, Holland C. Ford, Zlatan I. Tsvetanov, George F. Hartig, Linda L. Dressel, Gerard A. Kriss, Ralph Bohlin, Arthur F. Davidsen, Bruce Margon, & Ajay K. Kochhar.* 435, L35, 252-A3 (1994)

Observations of Cosmic-Ray Electrons and Positrons Using an Imaging Calorimeter. *R. L. Golden, C. Grimani, B. L. Kimbell, S. A. Stephens, S. J. Stochaj, W. R. Webber, G. Basini, F. Bongiorno, F. Massimo Brancaccio, M. Ricci, J. F. Ormes, R. E. Streitmatter, P. Papini, P. Spillantini, M. T. Brunetti, A. Codino, M. Menichelli, I. Salvatori, M. P. De Pascale, A. Morselli, & P. Picozza.* 436, 769, 276-B2 (1994)

The Solar-Stellar Spectrograph: Project Description, Data Calibration, and Initial Results. *Jeffrey C. Hall & G. W. Lockwood.* 438, 404, 7-A12 (1995)

The Faint Limit of the *Hubble Space Telescope* Faint Object Spectrograph and Rejection of the Cosmic-Ray Background. *David Tytler & Christopher Davis.* 438, 420, 7-C5 (1995)

Effects of Prescattering Attenuation on Spectropolarimetric Line Profiles. *Kenneth Wood & J. E. Bjorkman.* 443, 348, 100-A3 (1995)

Performance and Preliminary Calibration of the Hopkins Ultraviolet Telescope on the Astro-2 Mission. *Jeffrey W. Kruk, Samuel T. Durrance, Gerard A. Kriss, Arthur F. Davidsen, William P. Blair, Brian R. Espey, & David S. Finley.* 454, L1, 307-C1 (1995)

The Ultraviolet Reflectivity of Jupiter at 3.5 Å Resolution from Astro-1 and Astro-2. *Patrick F. Morrissey, Paul D. Feldman, Melissa A. McGrath, Brian C. Wolven, & H. Warren Moos.* 454, L65, 308-E2 (1995)

INSTRUMENTS

An Optical Fiber System to Perform Bidimensional Spectroscopy. *S. Arribas, E. Mediavilla, & J. L. Rasilla.* 369, 260, 39-B9 (1991)

The Imaging Performance of the *Hubble Space Telescope*. *Christopher J. Burrows, Jon A. Holtzman, S. M. Faber, Pierre Y. Bely, Hashima Hasan, C. R. Lynds, & Daniel Schroeder.* 369, L21, 45-C1 (1991)

Spectral Observations of the Extreme Ultraviolet Background. *Simon E. Labov & Stuart Bowyer.* 371, 810, 71-F1 (1991)

The Case for a Liquid Mirror in a Lunar-based Telescope. *Ermanno F. Borra.* 373, 317, 89-G12 (1991)

Ca II H and K Measurements Made at Mount Wilson Observatory, 1966–1983. *Douglas K. Duncan, Arthur H. Vaughan, Olin C. Wilson, George W. Preston, James Frazer, Howard Lanning, Anthony Misch, Jean Mueller, David Soyumer, L. Woodard, Sallie L. Baliunas, Robert W. Noyes, Lee W. Hartmann, Alain Porter, Cornelis Zwaan, Frans Middelkoop, René G. M. Rutten, & Dimitri Mihalas.* 76, 383, 29-G9 (1991)

First Results from the Goddard High-Resolution Spectrograph: A Demonstration of Spectral Resolution and Experiments with Deconvolution. *Glenn M. Wahlgren, David S. Leckrone, Steven N. Shore, Don J. Lindler, Ronald L. Gilliland, & Dennis C. Ebbets.* 377, L41, 143-E6 (1991)

Locating Very High Energy Gamma-Ray Sources with Arcminute Accuracy. *C. W. Akerlof, M. F. Cawley, M. Chantell, D. J. Fegan, K. Harris, A. M. Hillas, D. G. Jennings, R. C. Lamb, M. A. Lawrence, M. J. Lang, D. A. Lewis, D. I. Meyer, G. Mohanty, K. S. O'Flaherty, M. Punch, P. T. Reynolds, M. S. Schubnell, T. C. Weekes, & T. Whitaker.* 377, L97, 150-E6 (1991)

The Intensity and Spectrum of the Diffuse X-Ray Background. *X. Wu, T. Hamilton, D. J. Helfand, & Q. Wang.* 379, 564, 171-F1 (1991)

INTERFEROMETRY

Anatomy of a Merger: CO in Arp 299 (IC 694–NGC 3690). *Anneila Sargent & Nick Scoville.* 366, L1, 6-A7 (1991)

VLA Radio Recombination Line Observations of Sagittarius A West. *D. A. Roberts, W. W. Goss, J. H. van Gorkom, & J. P. Leahy.* 366, L15, 6-B13 (1991)

Measurements of the Diameter of the Supernova SN 1987A. *M. Karovska, P. Nisenson, C. Standley, & S. R. Heathcote.* 367, L15, 17-C8 (1991)

Distribution of Dust about o Ceti and α Orionis Based on 11 Micron Spatial Interferometry. *M. Bester, W. C. Danchi, C. G. Degiacomi, C. H. Townes, & T. R. Geballe.* 367, L27, 17-E1 (1991)

Millimeter Interferometer Observations of Infrared Luminous Galaxies: NGC 828 and NGC 6240. *Z. Wang, N. Z. Scoville, & D. B. Sanders.* 368, 112, 24-D9 (1991)

Ultramassive ($\sim 10^{11}$ $M_{\odot}$) Dark Core in the Luminous Infrared Galaxy NGC 6240? *Jonathan Bland-Hawthorn, Andrew S. Wilson, & R. Brent Tully.* 371, L19, 66-C7 (1991)

Multifrequency VLA, VLBI, and Single-Dish Observations of the Quasar 4C 39.25. *Alan P. Marscher, Yun Fei Zhang, David B. Shaffer, Hugh D. Aller, & Margo F. Aller.* 371, 491, 67-E12 (1991)

VLBI Observations of Interstellar Ammonia Masers. *Preethi Pratap, Karl M. Menten, Mark J. Reid, James M. Moran, & C. Malcolm Walmsley.* 373, L13, 91-B12 (1991)

Asymmetries in the Atmosphere of Mira. *M. Karovska, P. Nisenson, C. Papaliolios, & R. P. Boyle.* 374, L51, 110-D1 (1991)

Imaging Spectrophotometry of Ionized Gas in NGC 1068. II. Global Ionization of the Inner Disk. *Jonathan Bland-Hawthorn, James Sokolowski, & Gerald Cecil.* 375, 78, 112-A1 (1991)

Imaging Spectrophotometry of Ionized Gas in NGC 1068. III. Anisotropic Excitation of the Large-Scale Disk by Scattering of Nuclear Continuum. *James Sokolowski, Jonathan Bland-Hawthorn, & Gerald Cecil.* 375, 583, 120-A1 (1991)

Compact Starbursts in Ultraluminous Infrared Galaxies. *J. J. Condon, Z.-P. Huang, Q. F. Yin, & T. X. Thuan.* 378, 65, 151-G5 (1991)

A Finger-like Extension of the 20 Kilometer per Second Cloud toward the Galactic Center. *Sachiko K. Okumura, Masato Ishiguro, Edward B. Fomalont, Tetsuo Hasegawa, Takashi Kasuga, Koh-Ichiro Morita, Ryohei Kawabe, & Hideyuki Kobayashi.* 378, 127, 152-E9 (1991)

First- and Second-Epoch VLBI Observations of the Gravitational Lens System 2016+112. *M. B. Heflin, M. V. Gorenstein, C. R. Lawrence, & B. F. Burke.* 378, 519, 158-G9 (1991)

R Aquarii: Hα Map of Subarcsecond Inner Structure. *E. K. Hege, C. K. Allen, & W. J. Cocke.* 381, 543, 197-D6 (1991)

Milliarcsecond Radio Structure of Weak-lined T Tauri Stars. *R. B. Phillips, C. J. Lonsdale, & E. D. Feigelson.* 382, 261, 203-D9 (1991)

The Radio "Lobes" of Scorpius X-1 Are Unrelated Background Sources. *E. B. Fomalont & B. J. Geldzahler.* 383, 289, 215-G1 (1991)

INTERGALACTIC MEDIUM

New Photoionization Models of Intergalactic Clouds. *Megan Donahue & J. Michael Shull.* 383, 511, 220-F1 (1991)

Lyman-Alpha Forest Correlations Using Neighbor Counts. *Avery Meiksin & François R. Bouchet.* 448, L85, 209-A8 (1995)

Gravitational Lensing in Clusters of Galaxies: New Clues Regarding the Dynamics of Intracluster Gas. *Jordi Miralda-Escudé & Arif Babul.* 449, 18, 210-D11 (1995)

INTERPLANETARY MEDIUM

Zodiacal Emission. II. Dust near the Ecliptic. *William T. Reach.* 369, 529, 44-C13 (1991)

Spatial Distribution of the Interplanetary Dust Deduced by Infrared Observations. *P. de Bernardis, F. Feminella, & G. Moreno.* 370, 396, 52-B10 (1991)

Solar Cycle Variation of the Interplanetary Magnetic Field Spiral. *Charles W. Smith & John W. Bieber.* 370, 435, 52-F4 (1991)

Ablation of Silicate Particles in High-Speed Continuum and Transition Flow with Application to the Collection of Interplanetary Dust Particles. *Aaron J. Rulison, Richard C. Flagan, Thomas J. Ahrens, & Wayne F. Miller.* 371, 432, 65-E5 (1991)

Cosmic-Ray Diurnal Anisotropy, 1936–1988: Implications for Drift and Modulation Theories. *John W. Bieber & Jiasheng Chen.* 372, 301, 77-F4 (1991)

Solar Particle Abundances at Energies Greater than 1 MeV per Nucleon and the Role of Interplanetary Shocks. *H. V. Cane, D. V. Reames, & T. T. von Rosenvinge.* 373, 675, 96-D1 (1991)

Radio Range Measurements of Coronal Electron Densities at 13 and 3.6 Centimeter Wavelengths during the 1988 Solar Conjunction of *Voyager 2*. *T. P. Krisher, J. D. Anderson, D. D. Morabito, S. W. Asmar, S. E. Borutzki, M. L. Delitsky, A. C. Densmore, P. M. Eshe, G. D. Lewis, M. J. Maurer, D. C. Roth, Y. H. Son, T. R. Spilker, D. N. Sweetnam, A. H. Taylor, G. L. Tyler, D. L. Gresh, & P. A. Rosen.* 375, L57, 124-C6 (1991)

Statistical Properties of Shock-accelerated Ions in the Outer Heliosphere. *L. J. Lanzerotti, R. E. Gold, D. J. Thomson, R. E. Decker, C. G. Maclennan, & S. M. Krimigis.* 380, L93, 188-F10 (1991)

On the Cosmological Significance of the Apparent Deficit of Small Interplanetary Scintillation Sources. *Chris A. Hajivassiliou.* 381, 3, 189-A13 (1991)

Interplanetary Transport of Decay Protons from Solar Flare Neutrons. *D. Ruffolo.* 382, 688, 210-B12 (1991)

The Simulated Features of Heliospheric Cosmic-Ray Modulation with a Time-dependent Drift Model. I. General Effects of the Changing Neutral Sheet over the Period 1985–1990. *M. S. Potgieter & J. A. Le Roux.* 386, 336, 28-D4 (1992)

Superevents: Their Origin and Propagation through the Heliosphere from 0.3 to 35 AU. *Wolfgang Dröge, Reinhold Müller-Mellin, & Edward W. Cliver.* 387, L97, 48-E10 (1992)

Variable Carbon and Oxygen Abundances in the Solar Wind as Observed in Earth's Magnetosheath by *AMPTE/CCE*. *R. von Steiger, S. P. Christon, G. Gloeckler, & F. M. Ipavich.* 389, 791, 71-B10 (1992)

The Influence of the Large-Scale Interplanetary Shock Structure on a Low-Energy Particle Event. *A. M. Heras, B. Sanahuja, Z. K. Smith, T. Detman, & M. Dryer.* 391, 359, 90-C13 (1992)

Rocket Observation of the Near-Infrared Spectrum of the Sky. *M. Noda, V. V. Christov, H. Matsuhara, T. Matsumoto, S. Matsuura, K. Noguchi, S. Sato, & H. Murakami.* 391, 456, 93-E9 (1992)

On the Form of the 1987 Hydrogen Spectrum in the Outer Heliosphere. *J. P. L. Reinecke & H. Moraal.* 392, 272, 104-D1 (1992)

Zodiacal Emission. III. Dust near the Asteroid Belt. *William T. Reach.* 392, 289, 104-E7 (1992)

The Simulated Features of Heliospheric Cosmic-Ray Modulation with a Time-dependent Drift Model. III. General Energy Dependence. *M. S. Potgieter & J. A. Le Roux.* 392, 300, 104-F5 (1992)

On Potential Field Models of the Solar Corona. *Y.-M. Wang & N. R. Sheeley, Jr.* 392, 310, 104-G1 (1992)

Probing the Heliosphere with Energetic Hydrogen Atoms. *K. C. Hsieh, K. L. Shih, J. R. Jokipii, & S. Grzedzielski.* 393, 756, 125-C1 (1992)

Detection of Fundamental and Harmonic Type III Radio Emission and the Associated Langmuir Waves at the Source Region. *M. J. Reiner, R. G. Stone, & J. Fainberg.* 394, 340, 132-B12 (1992)

Propagation Conditions of Relativistic Electrons in the Inner Heliosphere. *M.-B. Kallenrode, G. Wibberenz, & S. Hucke.* 394, 351, 132-C11 (1992)

Combined Infrared and Analytical Electron Microscope Studies of Interplanetary Dust Particles. *J. P. Bradley, H. J. Humecki, & M. S. Germani.* 394, 643, 137-D8 (1992)

Ion Injection and Fermi Acceleration at Earth's Bow Shock: The 1984 September 12 Event Revisited. *M. Scholer, K. J. Trattner, & H. Kucharek.* 395, 675, 151-F1 (1992)

Interplanetary Lyman-α Spectra as a Diagnostic of the Local Interstellar Plasma Density: The Baranov Two-Shocks Heliosphere Case. *R. Lallement, Y. G. Malama, E. Quemerais, J. L. Bertaux, & N. A. Zaitzev.* 396, 696, 166-A7 (1992)

The Simulated Features of Heliospheric Cosmic-Ray Modulation with a Time-dependent Drift Model. IV. The Role of Heliospheric Neutral Sheet Deformation. *J. A. Le Roux & M. S. Potgieter.* 397, 686, 179-E11 (1992)

Proton and Electron Mean Free Paths: The Palmer Consensus Revisited. *John W. Bieber, William H. Matthaeus, Charles W. Smith, Wolfgang Wanner, May-Britt Kallenrode, & Gerd Wibberenz.* 420, 294, 4-E5 (1994)

Drift Acceleration at Interplanetary Shocks. *G. Erdös & A. Balogh.* 90, 553, 10-F1 (1994)

Transport of Solar Energetic Particles. *Wolfgang Dröge.* 90, 567, 10-G3 (1994)

Modeling Composite and Fluffy Grains: The Effects of Porosity. *Michael J. Wolff, Geoffrey C. Clayton, P. G. Martin, & Regina E. Schulte-Ladbeck.* 423, 412, 51-C3 (1994)

Focused Interplanetary Transport of ∼ 1MeV Solar Energetic Protons through Self-generated Alfvén Waves. *C. K. Ng & D. V. Reames.* 424, 1032, 77-F7 (1994)

Light Scattering by Porous Dust Particles in the Discrete-Dipole Approximation. *K. Lumme & J. Rahola.* 425, 653, 89-F12 (1994)

The Coronal Electron Density Distribution Determined from Dual-Frequency Ranging Measurements during the 1991 Solar Conjunction of the *Ulysses* Spacecraft. *M. K. Bird, H. Volland, M. Pätzold, P. Edenhofer, S. W. Asmar, & J. P. Brenkle.* 426, 373, 100-G5 (1994)

Generation of Radiation in Solar Corona and Interplanetary Space by Energetic Electrons. *C. S. Wu, Peter H. Yoon, & G. C. Zhou.* 429, 406, 149-B8 (1994)

COBE DIRBE Near-Infrared Polarimetry of the Zodiacal Light: Initial Results. *G. B. Berriman, N. W. Boggess, M. G. Hauser, T. Kelsall, C. M. Lisse, S. H. Moseley, W. T. Reach, & R. F. Silverberg.* 431, L63, 183-C1 (1994)

Study of Cosmic-Ray H and He Isotopes at 23 AU. *E. S. Seo, F. B. McDonald, N. Lal, & W. R. Webber.* 432, 656, 204-B11 (1994)

The Cosmic-Ray Oxygen and Helium Spectra Measured at *Pioneer 10* over the Time of the 1987 Modulation Minimum, and Implications for the He/O Source Ratio. *W. R. Webber & F. B. McDonald.* 435, 464, 249-G2 (1994)

A Dynamical Model of Magnetic Clouds. *Tyan Yeh.* 438, 975, 17-E7 (1995)

The Propagation of Solar Energetic Protons: Comparative Studies in Two Cases with Markedly Different Scattering Conditions. *J. F. Valdés-Galicia, W. Wanner, M.-B. Kallenrode, & G. Wibberenz.* 439, 482, 27-F8 (1995)

Solar Coronal Dust Scattering in the Infrared. *R. M. MacQueen & Bradford W. Greeley.* 440, 361, 46-B8 (1995)

Near- and Far-Infrared Observations of Interplanetary Dust Bands from the *COBE* Diffuse Infrared Background Experiment. *William J. Spiesman, Michael G. Hauser, Thomas Kelsall, Carey M. Lisse, S. Harvey Moseley, Jr., William T. Reach, Robert F. Silverberg, Sally W. Stemwedel, & Janet L. Weiland.* 442, 662, 89-B8 (1995)

Charge State of Anomalous Cosmic-Ray Nitrogen, Oxygen, and Neon: *SAMPEX* Observations. *B. Klecker, M. C. McNab, J. B. Blake, D. C. Hamilton, D. Hovestadt, H. Kästle, M. D. Looper, G. M. Mason, J. E. Mazur, & M. Scholer.* 442, L69, 94-F9 (1995)

Three Low-Energy Particle Events: Modeling the Influence of the Parent Interplanetary Shock. *A. M. Heras, B. Sanahuja, D. Lario, Z. K. Smith, T. Detman, & M. Dryer.* 445, 497, 139-D4 (1995)

Observations of Anomalous Cosmic-Ray Hydrogen from the *Voyager* Spacecraft. *E. R. Christian, A. C. Cummings, & E. C. Stone.* 446, L105, 171-D9 (1995)

Solar Implications of *Ulysses* Interplanetary Field Measurements. *Y.-M. Wang & N. R. Sheeley, Jr.* 447, L143, 191-E9 (1995)

HST/GHRS Observations of the Interplanetary Medium Downwind and in the Inner Solar System. *John T. Clarke, Rosine Lallement, Jean-Loup Bertaux, & Eric Quemerais.* 448, 893, 207-C5 (1995)

A Reconciliation of the Discrepancy on the Cosmic-Ray Interplanetary Diffusion Mean Free Path. *L. Dennis Zhang.* 449, 386, 215-D6 (1995)

Fine-Scale Filamentary Structure in Coronal Streamers. *Richard Woo, John W. Armstrong, Michael K. Bird, & Martin Pätzold.* 449, L91, 217-E1 (1995)

Detectability of Electrostatic Decay Products in *Ulysses* and *Galileo* Observations of Type III Solar Radio Sources. *Iver H. Cairns.* 449, L95, 217-E8 (1995)

Pitch Angle Diffusion Coefficient in an Extended Quasi-linear Theory. *C. K. Ng & D. V. Reames.* 453, 890, 296-C3 (1995)

Heat Flux and Viscosity of Protons in the Collisionless Solar Wind. *L. L. Williams.* 453, 953, 297-B6 (1995)

Ion Acoustic Wave Frequencies and Onset Times during Type III Solar Radio Bursts. *Iver H. Cairns & P. A. Robinson.* 453, 959, 297-C1 (1995)

IRAS Measurements of Diffuse Solar System Radiation: Annual Sky Brightness Variation and Geometry of the Interplanetary Dust Cloud. *J. M. Vrtilek & M. G. Hauser.* 455, 677, 331-C6 (1995)

INTERSTELLAR: ABUNDANCES

The Physical Properties of Giant Molecular Cloud Complexes in the Outer Galaxy: Implications for the Ratio of H_2 Column Density to ^{12}CO Intensity. *T. J. Sodroski.* 366, 95, 2-C1 (1991)

The *In Situ* Formation of Large Molecules in Dense Interstellar Clouds. *Eric Herbst.* 366, 133, 2-F4 (1991)

Water Vapor in the Orion Molecular Cloud. *R. F. Knacke & H. P. Larson.* 367, 162, 14-A10 (1991)

Ultraviolet Interstellar Lines in the Spectrum of π Scorpii Recorded at 2 Kilometers per Second Resolution. *Charles L. Joseph & Edward B. Jenkins.* 368, 201, 25-E9 (1991)

Predicted Profiles of Ultraviolet Interstellar Absorption Lines. *D. E. Welty, L. M. Hobbs, & D. G. York.* 75, 425, 6-E5 (1991)

The Formation of Oxygen-containing Organic Molecules in the Orion Compact Ridge. *T. J. Millar, Eric Herbst, & S. B. Charnley.* 369, 147, 37-F11 (1991)

High-Density Gas in the Core of the Sagittarius B2 Molecular Cloud. *Dariusz C. Lis & Paul F. Goldsmith.* 369, 157, 37-G11 (1991)

Fossil DCN in Orion-KL. *Jeffrey G. Mangum, Richard L. Plambeck, & Alwyn Wootten.* 369, 169, 38-A11 (1991)

Laboratory Observation of the $^3P_1$–$^3P_0$ Transition of the Neutral Carbon Atom by Submillimeter-Wave Absorption Spectroscopy. *Satoshi Yamamoto & Shuji Saito.* 370, L103, 59-F7 (1991)

Ultraviolet Interstellar Absorption toward HD 156359, a Halo Star at 11 Kiloparsecs in the Direction $l = 329°$ and $b = -15°$. *Kenneth R. Sembach, Blair D. Savage, & Derck Massa.* 372, 81, 75-A11 (1991)

The Local Interstellar Medium toward the Center of Loop I. *Miriam Centurion & Giovanni Vladilo.* 372, 494, 82-A1 (1991)

The Gas-Phase Chemistry of Organic Molecules in Interstellar Clouds with Dynamical Mixing. *J.-P. Chièze, G. Pineau des Forêts, & Eric Herbst.* 373, 110, 87-D4 (1991)

Large-Scale [C II] 158 Micron Emission from the Galaxy. *Hiroshi Shibai, Haruyuki Okuda, Takao Nakagawa, Hideo Matsuhara, Toshinori Maihara, Kohei Mizutani, Yukiyasu Kobayashi, Norihisa Hiromoto, Tetsuo Nishimura, & Frank J. Low.* 374, 522, 105-F1 (1991)

Observations of [Si II] (35 Micron) and [S I] (25 Micron) in Orion: Evidence for a Wind Shock near IRc2. *Michael R. Haas, David Hollenbach, & Edwin F. Erickson.* 374, 555, 106-B1 (1991)

A Molecular Line Survey of Sagittarius B2 and Orion–KL from 70 to 115 GHz. II. Analysis of the Data. *B. E. Turner.* 76, 617, 33-D1 (1991)

Discovery of Interstellar Methane: Observations of Gaseous and Solid CH_4 Absorption toward Young Stars in Molecular Clouds. *J. H. Lacy, J. S. Carr, Neal J. Evans II, F. Baas, J. M. Achtermann, & J. F. Arens.* 376, 556, 133-C9 (1991)

Observations and Chemistry of Interstellar Refractory Elements. *B. E. Turner.* 376, 573, 133-E1 (1991)

Water in Dense Molecular Clouds. *P. G. Wannier, L. Pagani, T. B. H. Kuiper, M. A. Frerking, S. Gulkis, P. Encrenaz, H. M. Pickett, A. Lecacheux, & W. J. Wilson.* 377, 171, 140-B1 (1991)

First Results from the Goddard High-Resolution Spectrograph: Element Abundances as a Function of Velocity in the Neutral Gas toward ξ Persei. *Blair D. Savage, Jason A. Cardelli, Frederick C. Bruhweiler, Andrew M. Smith, Dennis C. Ebbets, & Kenneth R. Sembach.* 377, L53, 143-F6 (1991)

First Results from the Goddard High-Resolution Spectrograph: Elemental Abundances in the Diffuse Clouds toward ξ Persei. *Jason A. Cardelli, Blair D. Savage, Frederick C. Bruhweiler, Andrew M. Smith, Dennis C. Ebbets, Kenneth R. Sembach, & Ulysses J. Sofia.* 377, L57, 143-F11 (1991)

Interstellar $^{12}C/^{13}C$ Ratio Revisited. *Philippe Crane, Dennis J. Hegyi, & David L. Lambert.* 378, 181, 153-C1 (1991)

Molecular Gas in Elliptical Galaxies. *Joanna F. Lees, G. R. Knapp, Michael P. Rupen, & T. G. Phillips.* 379, 177, 165-B11 (1991)

The Interstellar $^{12}CN/^{13}CN$ Ratio toward ζ Persei. *Mary Elizabeth Kaiser, Isabel Hawkins, & Edward L. Wright.* 379, 267, 166-D1 (1991)

Detection of Interstellar H_3O^+: A Confirming Line. *Alwyn Wootten, J. G. Mangum, B. E. Turner, M. Bogey, F. Boulanger, F. Combes, P. J. Encrenaz, & M. Gerin.* 380, L79, 188-E6 (1991)

Molecular Line Survey of Sagittarius B2(M) from 330 to 355 GHz and Comparison with Sagittarius B2(N). *E. C. Sutton, P. A. Jaminet, W. C. Danchi, & Geoffrey A. Blake.* 77, 255, 47-F1 (1991)

Interstellar Environments Probed by Ca I Absorption and the Effects of Density-dependent Depletions. *Jason A. Cardelli, S. R. Federman, & V. V. Smith.* 381, L17, 194-C7 (1991)

Further High-Resolution Na I Observations of the Local Interstellar Medium. *B. Y. Welsh, P. W. Vedder, J. V. Vallerga, & N. Craig.* 381, 462, 196-D7 (1991)

Interstellar Gas Phase Abundance of Carbon, Oxygen, Nitrogen, Copper, Gallium, Germanium, and Krypton toward ζ Ophiuchi. *Jason A. Cardelli, Blair D. Savage, & Dennis C. Ebbets.* 383, L23, 219-D1 (1991)

Infrared Molecular Spectroscopy toward the Orion IRc2 and IRc7 Sources: A New Probe of Physical Conditions and Abundances in Molecular Clouds. *Neal J. Evans II, J. H. Lacy, & John S. Carr.* 383, 674, 222-E13 (1991)

INTERSTELLAR: GRAINS

Photolevitation of Diffuse Clouds. *José Franco, Federico Ferrini, Andrea Ferrara, & Bruno Barsella.* 366, 443, 8-D1 (1991)

A Search for Circumstellar Dust around HR 10, a Proposed β Pictoris Star. *Kwang-Ping Cheng, C. A. Grady, & Frederick C. Bruhweiler.* 366, L87, 11-E7 (1991)

Extinction and Polarization of Transmitted Light by Partially Aligned Nonspherical Grains. *Mikhail I. Mishchenko.* 367, 561, 20-C8 (1991)

The Nature of the Dust around R Coronae Borealis Stars: Isolated Amorphous Carbon or Graphite Fractals? *J. H. Hecht.* 367, 635, 21-B9 (1991)

Search for H_2-He Alloy Formation at Low Pressures and Cosmic Snowballs. *M. Leventhal & A. P. Mills, Jr.* 368, 178, 25-C7 (1991)

Magnetic Flux Loss from Interstellar Clouds with Various Grain-Size Distributions. *Ryoichi Nishi, Takenori Nakano, & Toyoharu Umebayashi.* 368, 181, 25-C11 (1991)

Emission Features in the Spectrum of NGC 7027 near 3.3 Microns at Very High Resolution. *R. P. Lowe, J. M. Moorhead, W. H. Wehlau, & J.-P. Maillard.* 368, 195, 25-E1 (1991)

An Infrared Analysis of Puppis A. *Richard G. Arendt, Eli Dwek, & Robert Petre.* 368, 474, 31-A7 (1991)

Dust Properties around Evolved Stars from Far-Infrared Size Limits. *Paul M. Harvey, Daniel F. Lester, David Brock, & Marshall Joy.* 368, 558, 32-A8 (1991)

Dust and Molecular Properties of the Low-Opacity Cloud Lynds 1563. *Frank O. Clark, R. J. Laureijs, & Lauri L. Wardell.* 370, 237, 50-B7 (1991)

Polarimetric Mapping of Orion Using MILLIPOL: Magnetic Activity in BN/KL. *Robert W. Leach, Dan P. Clemens, Brian D. Kane, & Richard Barvainis.* 370, 257, 50-D1 (1991)

Emission from Dust in Visual Reflection Nebulae at Infrared and Submillimeter Wavelengths. *Sean C. Casey.* 371, 183, 62-D1 (1991)

The Temperature of Large Dust Grains in Molecular Clouds. *F. O. Clark, R. J. Laureijs, & T. Prusti.* 371, 602, 69-A7 (1991)

The Interstellar C-H Stretching Band near 3.4 Microns: Constraints on the Composition of Organic Material in the Diffuse Interstellar Medium. *S. A. Sandford, L. J. Allamandola, A. G. G. M. Tielens, K. Sellgren, M. Tapia, & Y. Pendleton.* 371, 607, 69-B1 (1991)

A New Method for Analyzing *IRAS* Data to Determine the Dust Temperature Distribution. *Taoling Xie, Paul F. Goldsmith, & Weimin Zhou.* 371, L81, 73-D12 (1991)

The Albedo and Scattering Phase Function of Interstellar Dust and the Diffuse Background at Far-Ultraviolet Wavelengths. *Mark Hurwitz, Stuart Bowyer, & Christopher Martin.* 372, 167, 76-A12 (1991)

IRAS Detection of Very Cold Dust in the Lynds 134 Cloud Complex. *R. J. Laureijs, F. O. Clark, & T. Prusti.* 372, 185, 76-C4 (1991)

Size and Density Distribution of Very Small Dust Grains in the Barnard 5 Cloud. *Dariusz C. Lis & Chun Ming Leung.* 372, L107, 85-F9 (1991)

The SiH Vibrational Stretch as an Indicator of the Chemical State of Interstellar Grains. *Marla H. Moore, Toshihiko Tanabé, & Joseph A. Nuth.* 373, L31, 91-D7 (1991)

The Dense, Inner Part of the Protostellar Disk: Protostar Candidates in GGD 27 IRS. *Takuya Yamashita, Yasuhiro Murata, Ryohei Kawabe, Norio Kaifu, & Motohide Tamura.* 373, 560, 95-A1 (1991)

^{26}Al and ^{16}O in the Early Solar System: Clues from Meteoritic Al_2O_3. *Edward Anders, Alois Virag, Ernst Zinner, & Roy S. Lewis.* 373, L77, 97-F6 (1991)

Spatial Studies of Planetary Nebulae with *IRAS*. *G. W. Hawkins & B. Zuckerman.* 374, 227, 100-G11 (1991)

Continuum Emission at 1 Millimeter from the Elliptical Galaxy NGC 205. *Michel Fich & Paul Hodge.* 374, L17, 103-D7 (1991)

Time Evolution of Interstellar Dust and Far-Infrared Luminosity of Disk Galaxies. *Boqi Wang.* 374, 456, 104-G1 (1991)

Diffuse Galactic Emission at Millimetric Wavelengths. *P. Andreani, G. Dall'Oglio, L. Martinis, L. Piccirillo, L. Pizzo, L. Rossi, & C. Venturino.* 375, 148, 112-G5 (1991)

Formaldehyde in Envelopes of Interstellar Dark Clouds. *S. R. Federman & M. Allen.* 375, 157, 113-A1 (1991)

Trapped H_2O in SiO Condensate: An Explanation for the 3 Micron Band Observed toward the Galactic Center. *S. Wada, A. Sakata, & A. T. Tokunaga.* 375, L17, 117-C1 (1991)

On the Long-Wavelength Absorption by Interstellar Dust. *Edward L. Wright.* 375, 608, 120-C5 (1991)

Molecular Hydrogen Polarization Images of OMC-1. *Michael G. Burton, N. R. Minchin, J. H. Hough, C. Aspin, D. J. Axon, & J. A. Bailey.* 375, 611, 120-C9 (1991)

Spectroscopic Study of Direct and Dust-scattered Line Emission in the HH 1–HH 2 System. *J. Solf & K.-H. Böhm.* 375, 618, 120-D3 (1991)

An Infrared/Optical Investigation of 100 Micron "Cirrus." *Elizabeth S. Paley, Frank J. Low, John T. McGraw, Roc M. Cutri, & Hans-Walter Rix.* 376, 335, 129-A13 (1991)

NGC 1333 IRAS 4: A Very Young, Low-Luminosity Binary System. *Göran Sandell, Colin Aspin, William D. Duncan, Adrian P. G. Russell, & E. Ian Robson.* 376, L17, 130-C1 (1991)

Infrared and Visible Photometry of the Gravitational Lens System 2237+030. *Daniel Nadeau, H. K. C. Yee, W. J. Forrest, J. D. Garnett, Z. Ninkov, & J. L. Pipher.* 376, 430, 131-G1 (1991)

X-Ray Halos as Diagnostics of Interstellar Grains. *John S. Mathis & C.-W. Lee.* 376, 490, 132-E1 (1991)

Very Small Grains and the Infrared Colors of Galaxies. *G. Helou, C. Ryter, & B. T. Soifer.* 376, 505, 132-F6 (1991)

The Spectrum of NGC 7027 from 3080 to 2630 Wavenumbers (3.25–3.80 Microns): Detection of New Atomic and Molecular Hydrogen Lines and New Constraints on the Chemical Sidegroups on Polycyclic Aromatic Hydrocarbons. *Scott A. Sandford.* 376, 599, 133-G1 (1991)

Testing Models of Low-Mass Star Formation: High-Resolution Far-Infrared Observations of L1551 IRS 5. *Harold M. Butner, Neal J. Evans II, Daniel F. Lester, Russell M. Levreault, & Stephen E. Strom.* 376, 636, 134-C6 (1991)

Theoretical Studies of the Absorption Spectra of Polycyclic Aromatic Hydrocarbons. *Sylvio Canuto, Michael C. Zerner, & Geerd H. F. Diercksen.* 377, 150, 139-G3 (1991)

Shape and Clustering Effects on the Optical Properties of Amorphous Carbon. *François Rouleau & P. G. Martin.* 377, 526, 146-C3 (1991)

Positron Annihilation in the Interstellar Medium. *Nidhal Guessoum, Reuven Ramaty, & Richard E. Lingenfelter.* 378, 170, 153-B4 (1991)

X-Ray Irradiation of Interstellar Grains in Active Galaxies: Evaporation and Infrared Spectra. *G. Mark Voit.* 379, 122, 164-E1 (1991)

A Grain-heated, Dusty Planetary Nebula in M22. *Kazimierz J. Borkowski & J. Patrick Harrington.* 379, 168, 165-B1 (1991)

Radiation Transport in Dust in Disk Geometry. I. Application to Externally Heated Interstellar Clouds. *George F. Spagna, Jr., Chun Ming Leung, & Michael P. Egan.* 379, 232, 166-A5 (1991)

Vacuum Ultraviolet Imagery of the Virgo Cluster Region. III. Diffuse Far-Ultraviolet Radiation at High Galactic Latitudes. *Takashi Onaka & Keiichi Kodaira.* 379, 532, 171-C5 (1991)

Sticking Probability of H and D Atoms on Amorphous Ice: A Computational Study. *V. Buch & Q. Zhang.* 379, 647, 172-F7 (1991)

Desorption of Large Molecules from Grains in Dense Interstellar Clouds. *R. E. Johnson, V. Pirronello, B. Sundqvist, & B. Donn.* 379, L75, 175-D12 (1991)

On the State of the Emitter of the 3.3 Micron Unidentified Infrared Band: Absorption Spectroscopy of Polycyclic Aromatic Hydrocarbon Species. *Gregory C. Flickinger, Thomas J. Wdowiak, & Percy L. Gómez.* 380, L43, 181-F1 (1991)

Millimeter Continuum Observations of Galactic Center Giant Molecular Cloud Cores. *D. C. Lis, J. E. Carlstrom, & Jocelyn Keene.* 380, 429, 183-E7 (1991)

High-Resolution Spectra of the 3.29 Micron Interstellar Emission Feature: A Summary. *A. T. Tokunaga, K. Sellgren, R. G. Smith, T. Nagata, A. Sakata, & Y. Nakada.* 380, 452, 183-G8 (1991)

Interstellar Photodissociation and Photoionization Rates. *W. G. Roberge, D. Jones, S. Lepp, & A. Dalgarno.* 77, 287, 48-B1 (1991)

Evolution of Dust Grains through a Hot Gaseous Halo. *A. Ferrara, F. Ferrini, J. Franco, & B. Barsella.* 381, 137, 190-F9 (1991)

Interstellar Solid CO: Polar and Nonpolar Interstellar Ices. *A. G. G. M. Tielens, A. T. Tokunaga, T. R. Geballe, & F. Baas.* 381, 181, 191-C5 (1991)

Preliminary Spectral Observations of the Galaxy with a 7° Beam by the *Cosmic Background Explorer* (*COBE*). *E. L. Wright, J. C. Mather, C. L. Bennett, E. S. Cheng, R. A. Shafer, D. J. Fixsen, R. E. Eplee, Jr., R. B. Isaacman, S. M. Read, N. W. Boggess, S. Gulkis, M. G. Hauser, M. Janssen, T. Kelsall, P. M. Lubin, S. S. Meyer, S. H. Moseley, Jr., T. L. Murdock, R. F. Silverberg, G. F. Smoot, R. Weiss, & D. T. Wilkinson.* 381, 200, 191-D12 (1991)

Interstellar Environments Probed by Ca I Absorption and the Effects of Density-dependent Depletions. *Jason A. Cardelli, S. R. Federman, & V. V. Smith.* 381, L17, 194-C7 (1991)

Radial Dust Density Profiles in Small Molecular Clouds. *João Lin Yun & Dan P. Clemens.* 381, 474, 196-E7 (1991)

Diffuse Band Profiles in the Spectrum of HD 29647: Evidence for a Molecular Origin? *Theodore P. Snow & C. G. Seab.* 382, 189, 202-E7 (1991)

10 Micron Spectra of Protostars and the Solid Methanol Abundance. *W. A. Schutte, A. G. G. M. Tielens, & S. A. Sandford.* 382, 523, 208-A11 (1991)

Hydrogenated Amorphous Carbon Grains and the 2175 Å Interstellar Hump. *Armando Blanco, Ezio Bussoletti, Luigi Colangeli, Sergio Fonti, & John R. Stephens.* 382, L97, 211-E8 (1991)

Constraints on the Optical Properties of Interstellar Dust in the Far-Ultraviolet: *Voyager* Observations of the Diffuse Sky Background. *Jayant Murthy, R. C. Henry, & J. B. Holberg.* 383, 198, 214-E1 (1991)

3.3 Micron Emission from Ultraviolet Excitation of Some Aromatic Molecules. *Jun Shan, Masako Suto, & L. C. Lee.* 383, 459, 218-A7 (1991)

Infrared Dust and Millimeter-Wave Carbon Monoxide Emission in the Orion Region. *John Bally, William D. Langer, & Weihong Liu.* 383, 645, 222-C6 (1991)

The Dusty Envelopes of FU Orionis Variables. *Scott J. Kenyon & Lee W. Hartmann.* 383, 664, 222-E1 (1991)

A Model for the Infrared Emission from an OB Star Cluster Environment. *D. Leisawitz.* 77, 451, 51-B1 (1991)

INTERSTELLAR: MAGNETIC FIELDS

Reversing the Axisymmetric ($m = 0$) Magnetic Fields in the Milky Way. *J. P. Vallée.* 366, 450, 8-D9 (1991)

Magnetic Flux Loss from Interstellar Clouds with Various Grain-Size Distributions. *Ryoichi Nishi, Takenori Nakano, & Toyoharu Umebayashi.* 368, 181, 25-C11 (1991)

Polarimetric Mapping of Orion Using MILLIPOL: Magnetic Activity in BN/KL. *Robert W. Leach, Dan P. Clemens, Brian D. Kane, & Richard Barvainis.* 370, 257, 50-D1 (1991)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. I. The Issues, Formulation of the Problem, and Method of Solution. *Telemachos Ch. Mouschovias & Scott A. Morton.* 371, 296, 63-G1 (1991)

Thermal and Nonthermal Motions in Dense Cores. *P. C. Myers, E. F. Ladd, & G. A. Fuller.* 372, L95, 85-E9 (1991)

Magnetic Braking, Ambipolar Diffusion, Cloud Cores, and Star Formation: Natural Length Scales and Protostellar Masses. *Telemachos Ch. Mouschovias.* 373, 169, 88-B3 (1991)

On the Dispersion in Direction of Interstellar Polarization. *P. C. Myers & A. A. Goodman.* 373, 509, 94-C9 (1991)

Molecular Hydrogen Polarization Images of OMC-1. *Michael G. Burton, N. R. Minchin, J. H. Hough, C. Aspin, D. J. Axon, & J. A. Bailey.* 375, 611, 120-C9 (1991)

The Equilibria and Evolutions of Magnetized, Rotating, Isothermal Clouds. V. The Effect of the Toroidal Field. *Kohji Tomisaka.* 376, 190, 127-C11 (1991)

Positron Annihilation in the Interstellar Medium. *Nidhal Guessoum, Reuven Ramaty, & Richard E. Lingenfelter.* 378, 170, 153-B4 (1991)

Polarimetric Imaging of the Galactic Center at 12.4 Microns: The Detailed Magnetic Field Structure in the Northern Arm and East-West Bar. *David K. Aitken, Daniel Gezari, Craig H. Smith, Mark McCaughrean, & Patrick F. Roche.* 380, 419, 183-D10 (1991)

Polarized Radio Emission from the Edge-on Spiral Galaxies NGC 891 and NGC 4565. *S. Sukumar & R. J. Allen.* 382, 100, 201-D1 (1991)

INTERSTELLAR: MATTER

The Physical Properties of Giant Molecular Cloud Complexes in the Outer Galaxy: Implications for the Ratio of H_2 Column Density to ^{12}CO Intensity. *T. J. Sodroski.* 366, 95, 2-C1 (1991)

Refractive Interstellar Scintillation and Millisecond Pulsar Timing. *Wayne Hu, Roger W. Romani, & Daniel R. Stinebring.* 366, L33, 6-D9 (1991)

Stellar Lyman-Alpha Emission and the Local Interstellar Medium. *Wayne Landsman & Theodore Simon.* 366, L79, 11-D9 (1991)

Thermal Instabilities in Proto–Globular Clusters Resulting from Time-dependent Potentials. *Stephen D. Murray & Douglas N. C. Lin.* 367, 149, 13-G6 (1991)

Infrared Spectroscopy of T Tauri Stars. *C. Giovanardi, S. Gennari, A. Natta, & R. Stanga.* 367, 173, 14-B11 (1991)

Limits on the Density of Neutral Gas within 100 Parsecs from Observations of the Soft X-Ray Background. *M. Juda, J. J. Bloch, B. C. Edwards, D. McCammon, W. T. Sanders, S. L. Snowden, & J. Zhang.* 367, 182, 14-C8 (1991)

Ultraviolet Interstellar Lines in the Spectrum of π Scorpii Recorded at 2 Kilometers per Second Resolution. *Charles L. Joseph & Edward B. Jenkins.* 368, 201, 25-E9 (1991)

The Dynamic Instability of Adiabatic Blast Waves. *Dongsu Ryu & Ethan T. Vishniac.* 368, 411, 30-B12 (1991)

The Interstellar D_1 Line at High Resolution. *L. M. Hobbs & D. E. Welty.* 368, 426, 30-D1 (1991)

Predicted Profiles of Ultraviolet Interstellar Absorption Lines. *D. E. Welty, L. M. Hobbs, & D. G. York.* 75, 425, 6-E5 (1991)

Electron Densities and the Excitation of CN in Molecular Clouds. *John H. Black & Ewine F. van Dishoeck.* 369, L9, 40-B5 (1991)

Is Interstellar Detection of Higher Members of the Linear Radicals C_nCH and C_nN Feasible? *F. Pauzat, Y. Ellinger, & A. D. McLean.* 369, L13, 40-B11 (1991)

Radio Recombination Lines from Diffuse Interstellar Gas in the Galaxy. *J. C. Cersosimo & J. S. Onello.* 370, 225, 50-A5 (1991)

IRAS 23545+6508, a Dissociating Star: Prototype for a New Observational Class? *P. E. Dewdney, R. S. Roger, C. R. Purton, & W. H. McCutcheon.* 370, 243, 50-C1 (1991)

High-Resolution Imaging of Brackett-γ and H_2 1–0 $S(1)$ Emission in the Seyfert Galaxy NGC 1068. *V. Rotaciuc, A. Krabbe, M. Cameron, S. Drapatz, R. Genzel, A. Sternberg, & J. W. V. Storey.* 370, L23, 53-D6 (1991)

A 21 Centimeter Line Survey of a Region around Four Outer Galaxy Open Clusters. *D. Leisawitz & E. J. de Geus.* 75, 835, 13-A1 (1991)

On the Thermal Stability of Slabs, Cylinders, and Spheres. *Miguel H. Ibáñez S., & Florencio P. Plachco M.* 370, 743, 57-F1 (1991)

The Escape of Lyman-Alpha Radiation from a Multiphase Interstellar Medium. *David A. Neufeld.* 370, L85, 59-D13 (1991)

Spatial Structure of the Interstellar Gas toward the Globular Cluster M22. *B. Bates & M. G. Catney.* 371, L37, 66-E7 (1991)

Spectral Observations of the Extreme Ultraviolet Background. *Simon E. Labov & Stuart Bowyer.* 371, 810, 71-F1 (1991)

Detection of Local Interstellar CO Absorption toward BL Lacertae. *Alan P. Marscher, Thomas M. Bania, & Zhong Wang.* 371, L77, 73-D7 (1991)

Atomic Oxygen Fine-Structure Splittings with Tunable Far-Infrared Spectroscopy. *Lyndon R. Zink, Kenneth M. Evenson, Fusakazu Matsushima, Thomas Nelis, & Ruth L. Robinson.* 371, L85, 73-E3 (1991)

VLA Observations of 21 Centimeter H I Absorption toward Cassiopeia A. *John H. Bieging, W. Miller Goss, & Eric M. Wilcots.* 75, 999, 16-F5 (1991)

VLA and VLBI Angular Broadening Measurements: The Distribution of Interstellar Scattering at Low Galactic Latitudes. *A. L. Fey, S. R. Spangler, & J. M. Cordes.* 372, 132, 75-F1 (1991)

Line Integrals of n_e and n_e^2 at High Galactic Latitude. *R. J. Reynolds.* 372, L17, 79-C1 (1991)

The Local Interstellar Medium toward the Center of Loop I. *Miriam Centurion & Giovanni Vladilo.* 372, 494, 82-A1 (1991)

Thermal and Nonthermal Motions in Dense Cores. *P. C. Myers, E. F. Ladd, & G. A. Fuller.* 372, L95, 85-E9 (1991)

Parsec-Scale Penetration of Ultraviolet Photons into Molecular Clouds: [C II] 158 Micron Mapping of W3, NGC 1977, and NGC 2023. *J. E. Howe, D. T. Jaffe, R. Genzel, & G. J. Stacey.* 373, 158, 88-A5 (1991)

Magnetic Braking, Ambipolar Diffusion, Cloud Cores, and Star Formation: Natural Length Scales and Protostellar Masses. *Telemachos Ch. Mouschovias.* 373, 169, 88-B3 (1991)

Microstructure-determined Pulsar Dispersion Measures and the Problem of Profile Alignment. *Timothy H. Hankins, Vera A. Izvekova, Valerii M. Malofeev, Joanna M. Rankin, Yuri P. Shitov, & Daniel R. Stinebring.* 373, L17, 91-C1 (1991)

On the Dispersion in Direction of Interstellar Polarization. *P. C. Myers & A. A. Goodman.* 373, 509, 94-C9 (1991)

Supernova Remnant Evolution in an Interstellar Medium with Evaporating Clouds. *Richard L. White & Knox S. Long.* 373, 543, 94-F7 (1991)

The Interstellar Tunnel of Neutral-free Gas toward β Canis Majoris. *Barry Y. Welsh.* 373, 556, 94-G8 (1991)

The Expansion of the Crab Nebula. *M. F. Bietenholz, P. P. Kronberg, D. E. Hogg, & A. S. Wilson.* 373, L59, 97-D5 (1991)

Interstellar Grains within Interstellar Grains. *Thomas J. Bernatowicz, Sachiko Amari, Ernst K. Zinner, & Roy S. Lewis.* 373, L73, 97-E10 (1991)

New Observations of the Gas Cloud Associated with the Quasar-Galaxy Pair 3C 232/NGC 3067. *John T. Stocke, James Case, Megan Donahue, J. Michael Shull, & Theodore P. Snow.* 374, 72, 98-G7 (1991)

Continuum Emission at 1 Millimeter from the Elliptical Galaxy NGC 205. *Michel Fich & Paul Hodge.* 374, L17, 103-D7 (1991)

Large-Scale [C II] 158 Micron Emission from the Galaxy. *Hiroshi Shibai, Haruyuki Okuda, Takao Nakagawa, Hideo Matsuhara, Toshinori Maihara, Kohei Mizutani, Yukiyasu Kobayashi, Norihisa Hiromoto, Tetsuo Nishimura, & Frank J. Low.* 374, 522, 105-F1 (1991)

Observation of Neutral Hydrogen in the Globular Cluster NGC 2808. *D. J. Faulkner, Tania R. Scott, P. R. Wood, & Alan E. Wright.* 374, L45, 110-C6 (1991)

Observations That Link Infrared Cirrus and Ultraviolet Extinction. *John A. Hackwell, James H. Hecht, & Mauricio Tapia.* 375, 163, 113-A9 (1991)

Expansion of a Superbubble in a Uniform Magnetic Field. *Katia M. Ferrière, Mordecai-Mark Mac Low, & Ellen G. Zweibel.* 375, 239, 114-A4 (1991)

The Influence of the Interface between the Heliosphere and the Local Interstellar Medium on the Penetration of the H Atoms to the Solar System. *V. B. Baranov, M. G. Lebedev, & Yu. G. Malama.* 375, 347, 115-C1 (1991)

Interstellar Scattering Effects on the Detection of Narrow-Band Signals. *James M. Cordes & T. Joseph Lazio.* 376, 123, 126-D10 (1991)

The Dissipation of Magnetohydrodynamic Turbulence Responsible for Interstellar Scintillation and the Heating of the Interstellar Medium. *Steven R. Spangler.* 376, 540, 133-B5 (1991)

Isotopically Anomalous Ti in Presolar SiC from the Murchison Meteorite. *Trevor R. Ireland, Ernst K. Zinner, & Sachiko Amari.* 376, L53, 137-D7 (1991)

First Results from the Goddard High-Resolution Spectrograph: The Galactic Halo and the Lyα Forest at Low Redshift in 3C 273. *Simon L. Morris, Ray J. Weymann, Blair D. Savage, & Ronald L. Gilliland.* 377, L21, 143-C11 (1991)

First Results from the Goddard High-Resolution Spectrograph: Resolved Velocity and Density Structure in the β Pictoris Circumstellar Gas. *A. Boggess, Frederick C. Bruhweiler, C. A. Grady, Dennis C. Ebbets, Yoji Kondo, L. M. Trafton, John C. Brandt, & S. R. Heap.* 377, L49, 143-F1 (1991)

First Results from the Goddard High-Resolution Spectrograph: Element Abundances as a Function of Velocity in the Neutral Gas toward ξ Persei. *Blair D. Savage, Jason A. Cardelli, Frederick C. Bruhweiler, Andrew M. Smith, Dennis C. Ebbets, & Kenneth R. Sembach.* 377, L53, 143-F6 (1991)

First Results from the Goddard High-Resolution Spectrograph: Elemental Abundances in the Diffuse Clouds toward ξ Persei. *Jason A. Cardelli, Blair D. Savage, Frederick C. Bruhweiler, Andrew M. Smith, Dennis C. Ebbets, Kenneth R. Sembach, & Ulysses J. Sofia.* 377, L57, 143-F11 (1991)

First Results from the Goddard High-Resolution Spectrograph: C I, S I, and CO toward ξ Persei and the Physical Conditions in Diffuse Clouds. *Andrew M. Smith, Frederick C. Bruhweiler, David L. Lambert, Blair D. Savage, Jason A. Cardelli, Dennis C. Ebbets, Cheng-Hsuan Lyu, & Yaron Sheffer.* 377, L61, 143-G1 (1991)

Shape and Clustering Effects on the Optical Properties of Amorphous Carbon. *François Rouleau & P. G. Martin.* 377, 526, 146-C3 (1991)

The Metallicity of RR Lyrae Stars in Baade's Window. *Alistair R. Walker & Donald M. Terndrup.* 378, 119, 152-D13 (1991)

Galactic Structure from the *Spacelab* Infrared Telescope. II. Luminosity Models of the Milky Way. *S. M. Kent, T. M. Dame, & G. Fazio.* 378, 131, 152-F1 (1991)

Positron Annihilation in the Interstellar Medium. *Nidhal Guessoum, Reuven Ramaty, & Richard E. Lingenfelter.* 378, 170, 153-B4 (1991)

Variable Interstellar Absorption toward HD 72127A. II. 1981–1988. *L. M. Hobbs, R. Ferlet, D. E. Welty, & G. Wallerstein.* 378, 586, 159-F1 (1991)

The Analysis of Apparent Optical Depth Profiles for Interstellar Absorption Lines. *Blair D. Savage & Kenneth R. Sembach.* 379, 245, 166-B5 (1991)

Atomic Data for Resonance Absorption Lines. I. Wavelengths Longward of the Lyman Limit. *Donald C. Morton.* 77, 119, 45-B1 (1991)

Ionized Carbon in the Large Magellanic Cloud. *R. T. Boreiko & A. L. Betz.* 380, L27, 181-D9 (1991)

Interaction of Mass Lost in Globular Clusters with the Halo Medium. *D. J. Faulkner & Graeme H. Smith.* 380, 441, 183-F7 (1991)

Probing the Galactic Halo along the 3C 273 Sight Line Using *IUE*. *Geoffrey S. Burks, Donald G. York, J. Chris Blades, Ralph C. Bohlin, & Willem Wamsteker.* 381, 55, 189-F5 (1991)

Interstellar Solid CO: Polar and Nonpolar Interstellar Ices. *A. G. G. M. Tielens, A. T. Tokunaga, T. R. Geballe, & F. Baas.* 381, 181, 191-C5 (1991)

Preliminary Spectral Observations of the Galaxy with a 7° Beam by the *Cosmic Background Explorer* (*COBE*). *E. L. Wright, J. C. Mather, C. L. Bennett, E. S. Cheng, R. A. Shafer, D. J. Fixsen, R. E. Eplee, Jr., R. B. Isaacman, S. M. Read, N. W. Boggess, S. Gulkis, M. G. Hauser, M. Janssen, T. Kelsall, P. M. Lubin, S. S. Meyer, S. H. Moseley, Jr., T. L. Murdock, R. F. Silverberg, G. F. Smoot, R. Weiss, & D. T. Wilkinson.* 381, 200, 191-D12 (1991)

Interstellar Environments Probed by Ca I Absorption and the Effects of Density-dependent Depletions. *Jason A. Cardelli, S. R. Federman, & V. V. Smith.* 381, L17, 194-C7 (1991)

Further High-Resolution Na I Observations of the Local Interstellar Medium. *B. Y. Welsh, P. W. Vedder, J. V. Vallerga, & N. Craig.* 381, 462, 196-D7 (1991)

The Galactic Center Radio Source Shines below the Compton Limit. *C. R. Gwinn, R. M. Danen, J. Middleditch, L. M. Ozernoy, & T. Kh. Tran.* 381, L43, 199-B7 (1991)

H I Absorption Measurements toward 15 Pulsars and the Radial Distribution of Diffuse Ionized Gas in the Galaxy. *D. A. Frail, J. M. Cordes, T. H. Hankins, & J. M. Weisberg.* 382, 168, 202-C10 (1991)

Vertical Distribution and Support of Galactic H I. *Felix J. Lockman & Curtis S. Gehman.* 382, 182, 202-D12 (1991)

Diffuse Band Profiles in the Spectrum of HD 29647: Evidence for a Molecular Origin? *Theodore P. Snow & C. G. Seab.* 382, 189, 202-E7 (1991)

The Diffuse Interstellar Bands. VIII. New Features between 6000 and 8650 Å. *G. H. Herbig & K. D. Leka.* 382, 193, 202-E12 (1991)

A Survey of H I 21 Centimeter Emission Lines toward Supernova Remnants. *Bon-Chul Koo & Carl Heiles.* 382, 204, 202-F11 (1991)

Time Variability of Pulsar Dispersion Measures. *J. A. Phillips & A. Wolszczan.* 382, L27, 205-D1 (1991)

The Optical Depth of the 158 Micron [^{12}C II] Line: Detection of the $F = 1 \rightarrow 0$ [^{13}C II] Hyperfine-Structure Component. *G. J. Stacey, C. H. Townes, A. Poglitsch, S. C. Madden, J. M. Jackson, F. Herrmann, R. Genzel, & N. Geis.* 382, L37, 205-E1 (1991)

s-Process Ba, Nd, and Sm in Presolar SiC from the Murchison Meteorite. *Ernst Zinner, Sachiko Amari, & Roy S. Lewis.* 382, L47, 205-E11 (1991)

A Nearly Unipolar CO Outflow from the HH 46–47 System. *Lawrence M. Chernin & Colin R. Masson.* 382, L93, 211-E3 (1991)

A Complete CO Survey of M31. *E. Koper, T. M. Dame, F. P. Israel, & P. Thaddeus.* 383, L11, 219-B7 (1991)

Interstellar Gas Phase Abundance of Carbon, Oxygen, Nitrogen, Copper, Gallium, Germanium, and Krypton toward ζ Ophiuchi. *Jason A. Cardelli, Blair D. Savage, & Dennis C. Ebbets.* 383, L23, 219-D1 (1991)

Magnetized Supernova Remnants with Cosmic Rays. *Katia M. Ferrière & Ellen G. Zweibel.* 383, 602, 221-F11 (1991)

Observations of Ca II Absorption along the Nearly Parallel Lines of Sight toward 3C 273 and SN 1991T. *David M. Meyer & Katherine C. Roth.* 383, L41, 226-B11 (1991)

INTERSTELLAR: MOLECULES

The Physical Properties of Giant Molecular Cloud Complexes in the Outer Galaxy: Implications for the Ratio of H_2 Column Density to ^{12}CO Intensity. *T. J. Sodroski.* 366, 95, 2-C1 (1991)

The *In Situ* Formation of Large Molecules in Dense Interstellar Clouds. *Eric Herbst.* 366, 133, 2-F4 (1991)

CO $J = 3 \rightarrow 2$ Observations of Translucent and High-Latitude Molecular Clouds. *Ewine F. van Dishoeck, John H. Black, T. G. Phillips, & R. Gredel.* 366, 141, 2-G1 (1991)

Abundances of Hydrogen Sulfide in Star-forming Regions. *Y. C. Minh, L. M. Ziurys, W. M. Irvine, & D. McGonagle.* 366, 192, 3-D9 (1991)

Dust and Gas in the Core of Arp 220 (IC 4553). *N. Z. Scoville, A. I. Sargent, D. B. Sanders, & B. T. Soifer.* 366, L5, 6-A13 (1991)

Giant Molecular Clouds and the CO-to-H_2 Conversion Factor in IC 10. *Christine D. Wilson & I. Neill Reid.* 366, L11, 6-B7 (1991)

The Star-forming Disk and CO Bar in M101. *Jeffrey D. P. Kenney, Nick Z. Scoville, & Christine D. Wilson.* 366, 432, 8-C1 (1991)

Warm Neutral Halos around Molecular Clouds. III. Interpretation of H I and CO $J = 1$–0 Data. *B-G Andersson, Peter G. Wannier, & Mark Morris.* 366, 464, 8-F1 (1991)

A Spectroscopic Study of the DR 21 Outflow Source. II. The Vibrational H_2 Line Emission. *R. P. Garden, T. R. Geballe, I. Gatley, & D. Nadeau.* 366, 474, 8-G1 (1991)

Water Vapor in the Orion Molecular Cloud. *R. F. Knacke & H. P. Larson.* 367, 162, 14-A10 (1991)

A Search for Vibrationally Excited H_2O at 68 GHz. *S. J. Petuchowski & C. L. Bennett.* 367, 168, 14-B4 (1991)

Infrared Spectroscopy of T Tauri Stars. *C. Giovanardi, S. Gennari, A. Natta, & R. Stanga.* 367, 173, 14-B11 (1991)

OH Emission and the Nature of Minkowski's Footprint (M1-92). *E. R. Seaquist, René Plume, & L. E. Davis.* 367, 200, 14-E5 (1991)

Detection of ^{13}C Isotopomers of HC_5N ($J = 9–8$) in the Circumstellar Envelope of IRC +10216. *M. B. Bell & P. A. Feldman.* 367, L33, 17-E8 (1991)

Theoretical Determination of the Spectroscopic Constants of the MgC Molecule. *Marcos A. Castro, Sylvio Canuto, & Florian Müller-Plathe.* 367, L69, 22-D3 (1991)

A ^{12}CO Survey of the Small Magellanic Cloud. *M. Rubio, G. Garay, J. Montani, & P. Thaddeus.* 368, 173, 25-C1 (1991)

Excitation of Millimeter and Submillimeter Water Masers. *David A. Neufeld & Gary J. Melnick.* 368, 215, 25-F11 (1991)

CO Excitation and H_2 Masses of Infrared-luminous Galaxies. *Simon J. E. Radford, P. M. Solomon, & D. Downes.* 368, L15, 28-C7 (1991)

The Millimeter-Wave Spectrum of Highly Vibrationally Excited SiO. *R. Mollaaghababa, C. A. Gottlieb, J. M. Vrtilek, & P. Thaddeus.* 368, L19, 28-D1 (1991)

An Unbiased Survey for Dense Cores in the Lynds 1630 Molecular Cloud. *Elizabeth A. Lada, John Bally, & Antony A. Stark.* 368, 432, 30-D9 (1991)

The Structure and Kinematics of Bipolar Outflows: Observations and Models of the Monoceros R2 Outflow. *Barry A. Meyers-Rice & Charles J. Lada.* 368, 445, 30-E10 (1991)

Astronomical Detection of H_2CCC. *J. Cernicharo, C. A. Gottlieb, M. Guélin, T. C. Killian, G. Paubert, P. Thaddeus, & J. M. Vrtilek.* 368, L39, 35-C7 (1991)

Astronomical Detection of H_2CCCC. *J. Cernicharo, C. A. Gottlieb, M. Guélin, T. C. Killian, P. Thaddeus, & J. M. Vrtilek.* 368, L43, 35-C11 (1991)

The Formation of Oxygen-containing Organic Molecules in the Orion Compact Ridge. *T. J. Millar, Eric Herbst, & S. B. Charnley.* 369, 147, 37-F11 (1991)

High-Density Gas in the Core of the Sagittarius B2 Molecular Cloud. *Dariusz C. Lis & Paul F. Goldsmith.* 369, 157, 37-G11 (1991)

Fossil DCN in Orion-KL. *Jeffrey G. Mangum, Richard L. Plambeck, & Alwyn Wootten.* 369, 169, 38-A11 (1991)

Electron Densities and the Excitation of CN in Molecular Clouds. *John H. Black & Ewine F. van Dishoeck.* 369, L9, 40-B5 (1991)

Is Interstellar Detection of Higher Members of the Linear Radicals C_nCH and C_nN Feasible? *F. Pauzat, Y. Ellinger, & A. D. McLean.* 369, L13, 40-B11 (1991)

Observations of ^{12}CO and ^{13}CO $J = 9–8$ in Galactic Molecular Clouds. *R. T. Boreiko & A. L. Betz.* 369, 382, 42-E1 (1991)

Bow Shock Models of Ultracompact H II Regions. *Mordecai-Mark Mac Low, Dave Van Buren, Douglas O. S. Wood, & Ed Churchwell.* 369, 395, 42-F1 (1991)

High-Resolution CO Observations of Luminous Infrared Galaxies with Large L_{FI}/L_B Ratios: IRAS 10173+0828, Zw 049.057, IRAS 17208−0014. *P. Planesas, I. F. Mirabel, & D. B. Sanders.* 370, 172, 49-C5 (1991)

OB Star Formation and H I Production in Molecular Clouds in M33. *Christine D. Wilson & Nick Scoville.* 370, 184, 49-D11 (1991)

Molecular Hydrogen in the Vicinity of NGC 7538 IRS 1 and IRS 2: Temperature and Ortho-to-Para Ratio. *Susan Hoban, Dennis C. Reuter, Michael J. Mumma, & Alex D. Storrs.* 370, 228, 50-A10 (1991)

Dust and Molecular Properties of the Low-Opacity Cloud Lynds 1563. *Frank O. Clark, R. J. Laureijs, & Lauri L. Wardell.* 370, 237, 50-B7 (1991)

IRAS 23545+6508, a Dissociating Star: Prototype for a New Observational Class? *P. E. Dewdney, R. S. Roger, C. R. Purton, & W. H. McCutcheon.* 370, 243, 50-C1 (1991)

Fluctuations in Astronomical Masers. *Moshe Elitzur.* 370, L45, 53-F6 (1991)

Far-Infrared Fourier Transform Spectroscopy of $^{12}C^{18}O$. *P. De Natale, M. Inguscio, C. Rois Orza, & L. R. Zink.* 370, L53, 53-G5 (1991)

Bok Globules and Small Molecular Clouds: Deep *IRAS* Photometry and ^{12}CO Spectroscopy. *Dan P. Clemens, João Lin Yun, & Mark H. Heyer.* 75, 877, 13-E1 (1991)

Protostellar Condensations in the Core of NGC 2024. *D. C. Lis, J. E. Carlstrom, & T. G. Phillips.* 370, 583, 55-F5 (1991)

N_2H^+ in Orion: Chemical Clues to the Dynamics of the Quiescent Gas. *M. Womack, L. M. Ziurys, & S. Wyckoff.* 370, L99, 59-F1 (1991)

The Spectral Signatures of Collapse and Outflow around Young Stars. *E. R. Keto.* 371, 163, 62-B3 (1991)

A 2.2 Micron Survey in the L1630 Molecular Cloud. *Elizabeth A. Lada, D. L. DePoy, Neal J. Evans II, & Ian Gatley.* 371, 171, 62-C1 (1991)

An Extremely High Velocity CO Outflow from NGC 7538 IRS 9. *George F. Mitchell & Tatsuhiko I. Hasegawa.* 371, L33, 66-E1 (1991)

Laboratory Detection of HC_9N Using a Fourier Transform Microwave Spectrometer. *Minoru Iida, Yasuhiro Ohshima, & Yasuki Endo.* 371, L45, 66-F7 (1991)

Detection of CO Emission in the Elliptical Galaxies NGC 3265 and NGC 5666. *M. A. Gordon.* 371, 563, 68-E1 (1991)

The Temperature of Large Dust Grains in Molecular Clouds. *F. O. Clark, R. J. Laureijs, & T. Prusti.* 371, 602, 69-A7 (1991)

The Interstellar C-H Stretching Band near 3.4 Microns: Constraints on the Composition of Organic Material in the Diffuse Interstellar Medium. *S. A. Sandford, L. J. Allamandola, A. G. G. M. Tielens, K. Sellgren, M. Tapia, & Y. Pendleton.* 371, 607, 69-B1 (1991)

Detection of Local Interstellar CO Absorption toward BL Lacertae. *Alan P. Marscher, Thomas M. Bania, & Zhong Wang.* 371, L77, 73-D7 (1991)

Warm Neutral Halos around Molecular Clouds. II. H I and CO ($J = 1–0$) Observations. *Peter G. Wannier, B-G Andersson, Mark Morris, & Steven M. Lichten.* 75, 987, 16-B1 (1991)

The Molecular Interstellar Medium and the Near-Infrared Continuum of the Barred LINER NGC 6764. *A. Eckart, M. Cameron, J. M. Jackson, R. Genzel, A. I. Harris, W. Wild, & H. Zinnecker.* 372, 67, 74-G9 (1991)

Molecular Hydrogen Formation by Excited Atom Radiative Association. *William B. Latter & John H. Black.* 372, 161, 76-A4 (1991)

The Mid-Infrared Spectrum of the Carbon Star HD 38218 and Its Possible Relation to Polycyclic Aromatic Hydrocarbons. *Richard H. Buss, Jr., A. G. G. M. Tielens, & Theodore P. Snow.* 372, 281, 77-D8 (1991)

The H_2 Line Profiles in the Cygnus Loop: Evidence for J-Shocks with Magnetic Precursors. *James R. Graham, Gillian S. Wright, & T. R. Geballe.* 372, L21, 79-C7 (1991)

Detection of Low-J Pure-Rotational Emission from H_2 in the Orion Bar Region: Evidence for Small-Scale Clumpiness. *Parvinder S. Parmar, John H. Lacy, & Jeffrey M. Achtermann.* 372, L25, 79-D1 (1991)

Molecular Outflows in the L1641 Region of Orion. *James A. Morgan & John Bally.* 372, 505, 82-B1 (1991)

CS Multitransitional Studies of Density Distribution in Star-forming Regions. I. The NGC 2071 Region. *Shudong Zhou, Neal J. Evans II, Rolf Güsten, Lee G. Mundy, & Marc L. Kutner.* 372, 518, 82-C1 (1991)

The Extinction to the H_2 Line Emission in the DR 21 Outflow Source. *Daniel Nadeau, Martin Riopel, & T. R. Geballe.* 372, L103, 85-F5 (1991)

The Gas-Phase Chemistry of Organic Molecules in Interstellar Clouds with Dynamical Mixing. *J.-P. Chièze, G. Pineau des Forêts, & Eric Herbst.* 373, 110, 87-D4 (1991)

Dynamical Evolution and Molecular Abundances of Interstellar Clouds. *Sheo S. Prasad, Karen R. Heere, & Shankar P. Tarafdar.* 373, 123, 87-E5 (1991)

A Millimeter-Wave Line Study of L1287: A Case of Induced Star Formation by Stellar Wind Compression? *Ji Yang, Tomofumi Umemoto, Takahiro Iwata, & Yasuo Fukui.* 373, 137, 87-F7 (1991)

VLBI Observations of Interstellar Ammonia Masers. *Preethi Pratap, Karl M. Menten, Mark J. Reid, James M. Moran, & C. Malcolm Walmsley.* 373, L13, 91-B12 (1991)

A Second Outflow from L1551/IRS 5? *G. H. Moriarty-Schieven & P. G. Wannier.* 373, L23, 91-C8 (1991)

Collisional Pumping of H_2O Masers in Star-forming Regions. *Nikolaos D. Kylafis & Colin A. Norman.* 373, 525, 94-D13 (1991)

Nitric Oxide in Star-forming Regions: Further Evidence for Interstellar N-O Bonds. *L. M. Ziurys, D. McGonagle, Y. Minh, & W. M. Irvine.* 373, 535, 94-E11 (1991)

The Dense, Inner Part of the Protostellar Disk: Protostar Candidates in GGD 27 IRS. *Takuya Yamashita, Yasuhiro Murata, Ryohei Kawabe, Norio Kaifu, & Motohide Tamura.* 373, 560, 95-A1 (1991)

Variability of Interstellar Hydroxyl Masers. *Andrew W. Clegg & James M. Cordes.* 374, 150, 99-G11 (1991)

Probing the Core of Cepheus A: Millimeter and Submillimeter Observations. *G. H. Moriarty-Schieven, R. L. Snell, & V. A. Hughes.* 374, 169, 100-B3 (1991)

Observations of HCO^+ in B335. *Tatsuhiko I. Hasegawa, C. Rogers, & Saeko Suzuki Hayashi.* 374, 177, 100-C1 (1991)

Calculations Concerning the Reaction $C + H_3^+ \rightarrow CH^+ + H_2$. *D. Talbi, D. J. DeFrees, D. A. Egolf, & Eric Herbst.* 374, 390, 103-A1 (1991)

Infrared Fluorescence of H_2 in NGC 6240: A Starburst Origin for the H_2 Luminosity. *Masuo Tanaka, Tetsuo Hasegawa, & Ian Gatley.* 374, 516, 105-E9 (1991)

A Spectroscopic Study of the DR 21 Outflow Source. III. The CO Line Emission. *R. P. Garden, M. Hayashi, I. Gatley, T. Hasegawa, & N. Kaifu.* 374, 540, 105-G11 (1991)

A Molecular Line Survey of Sagittarius B2 and Orion–KL from 70 to 115 GHz. II. Analysis of the Data. *B. E. Turner.* 76, 617, 33-D1 (1991)

Formaldehyde in Envelopes of Interstellar Dark Clouds. *S. R. Federman & M. Allen.* 375, 157, 113-A1 (1991)

A Simulation of the Collapse and Fragmentation of Cooling Molecular Clouds. *Joe J. Monaghan & John C. Lattanzio.* 375, 177, 113-C1 (1991)

Molecular Hydrogen Polarization Images of OMC-1. *Michael G. Burton, N. R. Minchin, J. H. Hough, C. Aspin, D. J. Axon, & J. A. Bailey.* 375, 611, 120-C9 (1991)

The Smoothness of CO Line Profiles in Orion: Implications for Clumpiness. *Jan A. Tauber, Paul F. Goldsmith, & Robert L. Dickman.* 375, 635, 120-E7 (1991)

Probing Shock Models of CH^+ Formation. *Isabel Hawkins & Nahide Craig.* 375, 642, 120-F1 (1991)

Anatomy of the Barnard 5 Core. *G. A. Fuller, P. C. Myers, W. J. Welch, P. F. Goldsmith, W. D. Langer, B. G. Campbell, S. Guilloteau, & R. W. Wilson.* 376, 135, 126-E10 (1991)

Collisional Excitation of Formaldehyde in "Hot" Interstellar Molecular Regions. *Sheldon Green.* 76, 979, 38-E3 (1991)

CO (3→2) Mapping and Gas Excitation in the Core of M82. *R. P. J. Tilanus, L. J. Tacconi, E. C. Sutton, S. Zhou, D. B. Sanders, C. G. Wynn-Williams, K. Y. Lo, & S. A. Stephens.* 376, 500, 132-E13 (1991)

Can Phase Space Theory Reproduce Experimental Neutral Product Branching Ratios for Dissociative Recombination Reactions? *E. T. Galloway & Eric Herbst.* 376, 531, 133-A8 (1991)

Discovery of Interstellar Methane: Observations of Gaseous and Solid CH_4 Absorption toward Young Stars in Molecular Clouds. *J. H. Lacy, J. S. Carr, Neal J. Evans II, F. Baas, J. M. Achtermann, & J. F. Arens.* 376, 556, 133-C9 (1991)

Dense Cores in Dark Clouds. VI. Shapes. *P. C. Myers, G. A. Fuller, A. A. Goodman, & P. J. Benson.* 376, 561, 133-D1 (1991)

Observations and Chemistry of Interstellar Refractory Elements. *B. E. Turner.* 376, 573, 133-E1 (1991)

NGC 7538 IRS 1: Subarcsecond Resolution Recombination Line and $^{15}NH_3$ Maser Observations. *R. A. Gaume, K. J. Johnston, H. A. Nguyen, T. L. Wilson, H. R. Dickel, W. M. Goss, & M. C. H. Wright.* 376, 608, 133-G12 (1991)

Discovery of Interstellar NH. *David M. Meyer & Katherine C. Roth.* 376, L49, 137-D1 (1991)

Theoretical Studies of the Absorption Spectra of Polycyclic Aromatic Hydrocarbons. *Sylvio Canuto, Michael C. Zerner, & Geerd H. F. Diercksen.* 377, 150, 139-G3 (1991)

Energy Deposition by X-Ray Photoelectrons into Interstellar Molecular Clouds. *G. Mark Voit.* 377, 158, 140-A1 (1991)

Water in Dense Molecular Clouds. *P. G. Wannier, L. Pagani, T. B. H. Kuiper, M. A. Frerking, S. Gulkis, P. Encrenaz, H. M. Pickett, A. Lecacheux, & W. J. Wilson.* 377, 171, 140-B1 (1991)

Large Molecule Production by Mass-losing Carbon Stars: The Primary Source of Interstellar Polycyclic Aromatic Hydrocarbons? *William B. Latter.* 377, 187, 140-C5 (1991)

Low-Density Photodissociation Regions. *David J. Hollenbach, Takamasa Takahashi, & A. G. G. M. Tielens.* 377, 192, 140-C11 (1991)

First Results from the Goddard High-Resolution Spectrograph: C I, S I, and CO toward ξ Persei and the Physical Conditions in Diffuse Clouds. *Andrew M. Smith, Frederick C. Bruhweiler, David L. Lambert, Blair D. Savage, Jason A. Cardelli, Dennis C. Ebbets, Cheng-Hsuan Lyu, & Yaron Sheffer.* 377, L61, 143-G1 (1991)

Molecular Observations of the L723 Region: Interaction between the Clumpy Outflow and the Gaseous Core? *Saeko S. Hayashi, Tetsuo Hasegawa, & Norio Kaifu.* 377, 492, 145-G5 (1991)

On Molecular Cloud Scaling Laws and Star Formation. *R. N. Henriksen.* 377, 500, 146-A1 (1991)

U-shaped Outflow in the Lynds 1221 Dark Cloud: An Example of Interaction of Outflows with Ambient Molecular Clouds. *Tomofumi Umemoto, Naomi Hirano, Osamu Kameya, Yasuo Fukui, Nario Kuno, & Keiya Takakubo.* 377, 510, 146-A13 (1991)

The Dense Molecular Envelope around the Compact H II Region G5.89−0.39 (W28 A2). *Yolanda Gómez, Luis F. Rodríguez, Guido Garay, & James M. Moran.* 377, 519, 146-B9 (1991)

Polycyclic Aromatic Hydrocarbon Optical Properties and Contribution to the Acceleration of Stellar Outflows. *Isabelle Cherchneff, John R. Barker, & Alexander G. G. M. Tielens.* 377, 541, 146-D6 (1991)

Kinematical Models of Maser Shells Formed by Aspherical Stellar Outflows (U Orionis; OH 231.8+4.2; Orion-IRc2). *P. F. Bowers.* 76, 1099, 40-G9 (1991)

A Finger-like Extension of the 20 Kilometer per Second Cloud toward the Galactic Center. *Sachiko K. Okumura, Masato Ishiguro, Edward B. Fomalont, Tetsuo Hasegawa, Takashi Kasuga, Koh-Ichiro Morita, Ryohei Kawabe, & Hideyuki Kobayashi.* 378, 127, 152-E9 (1991)

Cloud Formation by Combined Instabilities in Galactic Gas Layers: Evidence for a Q Threshold in the Fragmentation of Shearing Wavelets. *Bruce G. Elmegreen.* 378, 139, 152-F11 (1991)

Interstellar $^{12}C/^{13}C$ Ratio Revisited. *Philippe Crane, Dennis J. Hegyi, & David L. Lambert.* 378, 181, 153-C1 (1991)

The Edges of Molecular Clouds: Fractal Boundaries and Density Structure. *E. Falgarone, T. G. Phillips, & C. K. Walker.* 378, 186, 153-C8 (1991)

Partially Dissociative Jump Shocks in Molecular Hydrogen. *C. A. Chang & P. G. Martin.* 378, 202, 153-E1 (1991)

The Velocity Dispersion of Giant Molecular Clouds. II. Mathematical and Numerical Refinements. *Charles F. Gammie, Jeremiah P. Ostriker, & Chanda J. Jog.* 378, 565, 159-D5 (1991)

Synthesis Imaging of the DR 21(OH) Cluster. I. Dust Continuum and $C^{18}O$ Emission. *Jeffrey G. Mangum, Alwyn Wootten, & Lee G. Mundy.* 378, 576, 159-E3 (1991)

Molecular Gas in Elliptical Galaxies. *Joanna F. Lees, G. R. Knapp, Michael P. Rupen, & T. G. Phillips.* 379, 177, 165-B11 (1991)

SiS in Outflow Regions: More High-Temperature Silicon Chemistry. *L. M. Ziurys.* 379, 260, 166-C7 (1991)

The Interstellar $^{12}CN/^{13}CN$ Ratio toward ζ Persei. *Mary Elizabeth Kaiser, Isabel Hawkins, & Edward L. Wright.* 379, 267, 166-D1 (1991)

Millimeter- and Submillimeter-Wave Spectrum of Highly Excited States of Water. *J. C. Pearson, Todd Anderson, Eric Herbst, Frank C. De Lucia, & Paul Helminger.* 379, L41, 169-D12 (1991)

Star Counts and Carbon Monoxide Observations of Maddalena's Cloud. *Youngung Lee, Ronald L. Snell, & Robert L. Dickman.* 379, 639, 172-E11 (1991)

Location of the Thermal Continuum Source Sagittarius D. *Dariusz C. Lis.* 379, L53, 175-B10 (1991)

Desorption of Large Molecules from Grains in Dense Interstellar Clouds. *R. E. Johnson, V. Pirronello, B. Sundqvist, & B. Donn.* 379, L75, 175-D12 (1991)

Ionized Carbon in the Large Magellanic Cloud. *R. T. Boreiko & A. L. Betz.* 380, L27, 181-D9 (1991)

Detection of a New Carbon-Chain Molecule, CCO. *Masatoshi Ohishi, Hiroko Suzuki, Shin-ichi Ishikawa, Chikashi Yamada, Hideto Kanamori, William M. Irvine, Ronald D. Brown, Peter D. Godfrey, & Norio Kaifu.* 380, L39, 181-E11 (1991)

On the State of the Emitter of the 3.3 Micron Unidentified Infrared Band: Absorption Spectroscopy of Polycyclic Aromatic Hydrocarbon Species. *Gregory C. Flickinger, Thomas J. Wdowiak, & Percy L. Gómez.* 380, L43, 181-F1 (1991)

Molecular Gas Excitation in NGC 253. *W. F. Wall, D. T. Jaffe, F. P. Israel, & F. N. Bash.* 380, 384, 183-A11 (1991)

Star Formation and the Molecular Content of IC 342. *Leslie J. Sage & P. M. Solomon.* 380, 392, 183-B7 (1991)

Millimeter Continuum Observations of Galactic Center Giant Molecular Cloud Cores. *D. C. Lis, J. E. Carlstrom, & Jocelyn Keene.* 380, 429, 183-E7 (1991)

CO J = 3–2 and J = 2–1 Observations of NGC 7027. *P. A. Jaminet, W. C. Danchi, E. C. Sutton, A. P. G. Russell, Göran Sandell, J. H. Bieging, & D. Wilner.* 380, 461, 184-A4 (1991)

The Discovery of a New, Very Strong, and Widespread Interstellar Methanol Maser Line. *Karl M. Menten.* 380, L75, 188-E1 (1991)

Molecular Line Survey of Sagittarius B2(M) from 330 to 355 GHz and Comparison with Sagittarius B2(N). *E. C. Sutton, P. A. Jaminet, W. C. Danchi, & Geoffrey A. Blake.* 77, 255, 47-F1 (1991)

Interstellar Photodissociation and Photoionization Rates. *W. G. Roberge, D. Jones, S. Lepp, & A. Dalgarno.* 77, 287, 48-B1 (1991)

Possible Deflection of a Jet by Molecular Clouds in NGC 4258. *R. L. Plante, K. Y. Lo, Jean-René Roy, Pierre Martin, & Louis Noreau.* 381, 110, 190-D4 (1991)

Orbit Crowding of Molecular Gas at a Bar-Spiral Arm Transition Zone in M83. *Jeffrey D. P. Kenney & Steven D. Lord.* 381, 118, 190-D13 (1991)

A Molecular Gas Ridge Offset from the Dust Lane in a Spiral Arm of M83. *Steven D. Lord & Jeffrey D. P. Kenney.* 381, 130, 190-E13 (1991)

H_2CO in IC 443G: Unusual Excitation and a Diagnostic of Shock Astrochemistry. *B. E. Turner & D. A. Lubowich.* 381, 173, 191-B9 (1991)

Preliminary Spectral Observations of the Galaxy with a 7° Beam by the *Cosmic Background Explorer* (*COBE*). *E. L. Wright, J. C. Mather, C. L. Bennett, E. S. Cheng, R. A. Shafer, D. J. Fixsen, R. E. Eplee, Jr., R. B. Isaacman, S. M. Read, N. W. Boggess, S. Gulkis, M. G. Hauser, M. Janssen, T. Kelsall, P. M. Lubin, S. S. Meyer, S. H. Moseley, Jr., T. L. Murdock, R. F. Silverberg, G. F. Smoot, R. Weiss, & D. T. Wilkinson.* 381, 200, 191-D12 (1991)

Infrared Spectroscopy of Cygnus A: Implications for the Obscured Active Nucleus. *Martin J. Ward, Philip R. Blanco, Andrew S. Wilson, & Minoru Nishida.* 382, 115, 201-E11 (1991)

The Relationship between the Carbon Monoxide Intensity and the Radio Continuum Emission in Spiral Galaxies. *David S. Adler, Ronald J. Allen, & K. Y. Lo.* 382, 475, 207-D12 (1991)

10 Micron Spectra of Protostars and the Solid Methanol Abundance. *W. A. Schutte, A. G. G. M. Tielens, & S. A. Sandford.* 382, 523, 208-A11 (1991)

Molecular Line Emission Models of Herbig-Haro Objects. I. H_2 Emission. *Mark G. Wolfire & Arieh Königl.* 383, 205, 214-E9 (1991)

3.3 Micron Emission from Ultraviolet Excitation of Some Aromatic Molecules. *Jun Shan, Masako Suto, & L. C. Lee.* 383, 459, 218-A7 (1991)

A Complete CO Survey of M31. *E. Koper, T. M. Dame, F. P. Israel, & P. Thaddeus.* 383, L11, 219-B7 (1991)

Gravitational Fragmentation: A Comparison with W49A. *Eric R. Keto, John C. Lattanzio, & Joe J. Monaghan.* 383, 639, 222-B12 (1991)

Infrared Dust and Millimeter-Wave Carbon Monoxide Emission in the Orion Region. *John Bally, William D. Langer, & Weihong Liu.* 383, 645, 222-C6 (1991)

Infrared Molecular Spectroscopy toward the Orion IRc2 and IRc7 Sources: A New Probe of Physical Conditions and Abundances in Molecular Clouds. *Neal J. Evans II, J. H. Lacy, & John S. Carr.* 383, 674, 222-E13 (1991)

X Marks the Spot: Distribution and Excitation of Unidentified Molecules in the Red Rectangle. *Gary D. Schmidt & Adolf N. Witt.* 383, 698, 222-G12 (1991)

Two New Molecular Outflows in L1551? *Marc W. Pound & John Bally.* 383, 705, 223-A7 (1991)

Aperture Synthesis CS(2–1) Observations of a Young Stellar Object GL 490: Accretion Flow in Gas Disk. *Akiko Nakamura, Ryohei Kawabe, Yoshimi Kitamura, Masato Ishiguro, Yasuhiro Murata, & Nagayoshi Ohashi.* 383, L81, 226-F5 (1991)

A Study of ^{13}CO Cloud Cores in Ophiuchus. *S. Nozawa, A. Mizuno, Y. Teshima, H. Ogawa, & Y. Fukui.* 77, 647, 53-E6 (1991)

H_2-rich Interstellar Grain Mantles: An Equilibrium Description. *Richard W. Dissly, Mark Allen, & Vincent G. Anicich.* 435, 685, 255-E1 (1994)

ISM: ABUNDANCES

Abundances of the Heavy Elements in the Magellanic Clouds. III. Interpretation of Results. *Stephen C. Russell & Michael A. Dopita.* 384, 508, 8-D9 (1992)

The Millimeter-Wave Spectrum of the CaOH Radical ($X\ ^2\Sigma^+$). *L. M. Ziurys, W. L. Barclay, Jr., & M. A. Anderson.* 384, L63, 11-E1 (1992)

The Molecular Core in G34.3+0.2: Millimeter Interferometric Observations of HCO^+, $H^{13}CN$, $HC^{15}N$, and SO. *Patricia Carral & William J. Welch.* 385, 244, 15-A4 (1992)

Production of Li, Be, and B in the Early Galaxy. *Gary Steigman & Terry P. Walker.* 385, L13, 17-B11 (1992)

The Oscillator Strength of the Si II $3s^23p\ ^2P–3s3p^2\ ^2D$ Multiplet and the Interstellar Abundance of Silicon. *P. L. Dufton, F. P. Keenan, A. Hibbert, P. C. Ojha, & R. P. Stafford.* 387, 414, 42-B1 (1992)

A Survey of N_2H^+ in Dense Clouds: Implications for Interstellar Nitrogen and Ion-Molecule Chemistry. *M. Womack, L. M. Ziurys, & S. Wyckoff.* 387, 417, 42-B6 (1992)

Detection of SiN in IRC +10216. *B. E. Turner.* 388, L35, 52-D1 (1992)

Faint Emission Lines in the Spectrum of the Orion Nebula and the Abundances of Some of the Rarer Elements. *Donald E. Osterbrock, Hien D. Tran, & Sylvain Veilleux.* 389, 305, 63-F11 (1992)

Small Galactic H II Regions. III. Images and Spectrophotometry of the Ionized Gas. *Deidre A. Hunter.* 79, 469, 20-C13 (1992)

The Interstellar Deuterium-to-Hydrogen Ratio: A Reevaluation of Lyman Absorption-Line Measurements. *Peter R. McCullough.* 390, 213, 76-E10 (1992)

On the Chemodynamics of Wolf-Rayet Ring Nebulae: NGC 6888. *César Esteban & José M. Vílchez.* 390, 536, 82-A7 (1992)

The Isotopic Composition of Iron-Group Cosmic Rays. *Richard A. Leske, Barrett Milliken, & Mark E. Wiedenbeck.* 390, L99, 85-C7 (1992)

SO in Starburst Galaxies. *S. J. Petuchowski & C. L. Bennett.* 391, 137, 87-F5 (1992)

The Age and Chemical Evolution of High-Redshift QSOs. *Fred Hamann & Gary Ferland.* 391, L53, 99-C7 (1992)

A Source Model for the L134N Molecular Cloud. *Daryl A. Swade & F. Peter Schloerb.* 392, 543, 109-A9 (1992)

A Survey of CCS, HC_3N, HC_5N, and NH_3 toward Dark Cloud Cores and Their Production Chemistry. *Hiroko Suzuki, Satoshi Yamamoto, Masatoshi Ohishi, Norio Kaifu, Shin-ichi Ishikawa, Yasuhiro Hirahara, & Shuro Takano.* 392, 551, 109-B4 (1992)

The Diffuse Interstellar Cloud toward HD 179406 (20 Aquilae). *Margaret Murray Hanson, Theodore P. Snow, & John H. Black.* 392, 571, 109-C12 (1992)

Detection of SiO Emission in the L1157 Dark Cloud. *Hitomi Mikami, Tomofumi Umemoto, Satoshi Yamamoto, & Shuji Saito.* 392, L87, 113-E11 (1992)

Estimates of N_2 Abundances in Dense Molecular Clouds. *M. Womack, L. M. Ziurys, & S. Wyckoff.* 393, 188, 116-D6 (1992)

Anomalously High Apparent Abundances of Singly Ionized Helium in the Galactic H II Region W3A. *P. R. Roelfsema, W. M. Goss, & D. C. V. Mallik.* 394, 188, 130-C13 (1992)

Ultraviolet and Radio Observations of Milky Way Halo Gas. *Laura Danly, Felix J. Lockman, Marilyn R. Meade, & Blair D. Savage.* 81, 125, 36-F9 (1992)

Mapping Observations of Sulfur-containing Carbon-Chain Molecules in Taurus Molecular Cloud 1 (TMC-1). *Yasuhiro Hirahara, Hiroko Suzuki, Satoshi Yamamoto, Kentarou Kawaguchi, Norio Kaifu, Masatoshi Ohishi, Shuro Takano, Shin-ichi Ishikawa, & Akimasa Masuda.* 394, 539, 136-B1 (1992)

Observation of Fine Structure in the Cold Phase of the Local Interstellar Medium Using K I Absorption. *Joaquín Trapero, John E. Beckman, Ricardo Génova, & Conal D. McKeith.* 394, 552, 136-C1 (1992)

Interstellar SiC with Unusual Isotopic Compositions: Grains from a Supernova? *Sachiko Amari, Peter Hoppe, Ernst Zinner, & Roy S. Lewis.* 394, L43, 139-C1 (1992)

Determination of the He^+/H^+ Ratio from α, β, and γ Radio Recombination Lines. *M. Peimbert, L. F. Rodríguez, T. M. Bania, R. T. Rood, & T. L. Wilson.* 395, 484, 148-E9 (1992)

CNO Abundances and Temperature Fluctuations in the Orion Nebula. *Donald K. Walter, Reginald J. Dufour, & J. Jeff Hester.* 397, 196, 170-D7 (1992)

Fractionation of CO in the Diffuse Clouds toward ζ Ophiuchi. *Yaron Sheffer, S. R. Federman, David L. Lambert, & Jason A. Cardelli.* 397, 482, 176-G3 (1992)

Detection of the Quadrupole Hyperfine Structure in $HCNH^+$. *L. M. Ziurys, A. J. Apponi, & J. T. Yoder.* 397, L123, 181-F6 (1992)

High-Resolution Imaging of the Galactic Cloud Monoceros R2. *Constantine P. Gonatas, Patrick Palmer, & G. Novak.* 398, 118, 183-D7 (1992)

On the Molecular Complexity of the Hot Cores in Orion A: Grain Surface Chemistry as "The Last Refuge of the Scoundrel." *S. B. Charnley, A. G. G. M. Tielens, & T. J. Millar.* 399, L71, 201-A8 (1992)

Methanol Ice in the Protostar GL 2136. *C. J. Skinner, A. G. G. M. Tielens, M. J. Barlow, & K. Justtanont.* 399, L79, 201-B7 (1992)

Observations of Highly Ionized Gas in the Galactic Halo. *Kenneth R. Sembach & Blair D. Savage.* 83, 147, 58-G11 (1992)

On Determining the Primordial Helium Abundance from the Spectra of H II Galaxies. *Alison Campbell.* 401, 157, 223-A1 (1992)

Accurate Oscillator Strengths for Ultraviolet Lines of Ar I: Implications for Interstellar Material. *S. R. Federman, D. J. Beideck, R. M. Schectman, & D. G. York.* 401, 367, 225-E9 (1992)

Ultraviolet Observations of the Gas Phase Abundances in the Diffuse Clouds toward ζ Ophiuchi at 3.5 Kilometers per Second Resolution. *Blair D. Savage, Jason A. Cardelli, & Ulysses J. Sofia.* 401, 706, 231-C9 (1992)

Interstellar Absorption along the Line of Sight to Theta Carinae Using *Copernicus* Observations. *M. M. Allen, E. B. Jenkins, & T. P. Snow.* 83, 261, 61-D1 (1992)

Abundance of Interstellar Carbon toward ζ Ophiuchi. *Jason A. Cardelli, John S. Mathis, Dennis C. Ebbets, & Blair D. Savage.* 402, L17, 6-D1 (1993)

Goddard High-Resolution Spectrograph Observations of the Local Interstellar Medium and the Deuterium/Hydrogen Ratio along the Line of Sight toward Capella. *Jeffrey L. Linsky, Alexander Brown, Ken Gayley, Athanassios Diplas, Blair D. Savage, Thomas R. Ayres, Wayne Landsman, Steven N. Shore, & Sara R. Heap.* 402, 694, 11-C1 (1993)

New 3 Millimeter Observations of Interstellar HNO: Reinstating a Discredited Identification. *Lewis E. Snyder, Yi-Jehng Kuan, L. M. Ziurys, & J. M. Hollis.* 403, L17, 20-C1 (1993)

Elemental Abundances in the Local Cosmic Rays at High Energies. *Simon P. Swordy, Jacques L'Heureux, Peter Meyer, & Dietrich Müller.* 403, 658, 23-G3 (1993)

Oxygen, Sulfur, Argon, and the Chemical Evolution of the Galactic Disk. *J. A. de Freitas Pacheco.* 403, 673, 24-A10 (1993)

Observations of the Gaseous Galactic Halo toward 3C 273 with the Goddard High Resolution Spectrograph. *Blair D. Savage, Limin Lu, Ray J. Weymann, Simon L. Morris, & Ronald L. Gilliland.* 404, 124, 29-E5 (1993)

Evidence for Protostellar Collapse in B335. *Shudong Zhou, Neal J. Evans II, Carsten Kömpe, & C. M. Walmsley.* 404, 232, 30-F11 (1993)

Extreme Ultraviolet Observations of G191-B2B and the Local Interstellar Medium with the Hopkins Ultraviolet Telescope. *Randy A. Kimble, Arthur F. Davidsen, William P. Blair, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Henry C. Ferguson, Richard C. Henry, Gerard A. Kriss, Jeffrey W. Kruk, Knox S. Long, H. Warren Moos, & Olaf Vancura.* 404, 663, 37-B13 (1993)

The $^{12}C/^{13}C$ Abundance Ratio in NGC 2264. *George F. Mitchell & Jean-Pierre Maillard.* 404, L79, 40-F8 (1993)

The Elemental and Isotopic Composition of Galactic Cosmic-Ray Nuclei from Scandium through Nickel. *Richard A. Leske.* 405, 567, 50-B1 (1993)

Structure and Chemistry of Orion S. *Joseph P. McMullin, Lee G. Mundy, & Geoffrey A. Blake.* 405, 599, 50-E5 (1993)

The Ionized Gas in the Center and in the Bar of the Spiral Galaxy NGC 6946. *Jean-René Roy & Julien Belley.* 406, 60, 55-G1 (1993)

Interstellar Deuterium in Cold Dense Clouds. *Michael Opendak.* 406, 548, 64-E12 (1993)

The Diffuse Interstellar Bands. IX. Constraints on the Identification. *G. H. Herbig.* 407, 142, 70-G5 (1993)

Determination of $^{12}C/^{13}C$ in the Interstellar Medium toward ζ Ophiuchi and ξ Persei. *Isabel Hawkins, Nahide Craig, & David M. Meyer.* 407, 185, 71-D1 (1993)

The Dispersal of Iron through the Interstellar Medium. *Nicholas P. T. Bateman & Richard B. Larson.* 407, 634, 78-D12 (1993)

Radiative Lifetimes, Branching Ratios, and Absolute Transition Probabilities in Cr II and Zn II. *S. D. Bergeson & J. E. Lawler.* 408, 382, 88-A3 (1993)

Extreme Ultraviolet Observations of HZ 43 and the Local H/He Ratio with the Hopkins Ultraviolet Telescope. *Randy A. Kimble, Arthur F. Davidsen, Knox S. Long, & Paul D. Feldman.* 408, L41, 89-C1 (1993)

$^{12}C/^{13}C$ Isotope Ratio in the Local Interstellar Medium from Observations of $^{13}C^{18}O$ in Molecular Clouds. *William D. Langer & Arno A. Penzias.* 408, 539, 92-A1 (1993)

Chemical Differentiation between Star-forming Regions: The Orion Hot Core and Compact Ridge. *P. Caselli, T. I. Hasegawa, & Eric Herbst.* 408, 548, 92-A11 (1993)

Composition of Interstellar Clouds in the Disk and Halo. I. HD 93521. *Lyman Spitzer, Jr., & Edward L. Fitzpatrick.* 409, 299, 100-G3 (1993)

Neutrino Decay and the Heat Budget of the Warm Interstellar Medium. *D. W. Sciama.* 409, L25, 104-D9 (1993)

The Interstellar $^7Li/^6Li$ Isotope Ratio toward ζ Ophiuchi and ζ Persei. *David M. Meyer, Isabel Hawkins, & Edward L. Wright.* 409, L61, 111-E8 (1993)

The Nature of the Molecular Cores in High-Latitude Cirrus Clouds. IV. The Electron Distribution and the Abundance and Chemistry of H_2CO. *B. E. Turner.* 410, 140, 113-G8 (1993)

The First Detection of Ionized Helium in the Local ISM: *EUVE* and *IUE* Spectroscopy of the Hot DA Dwarf GD 246. *Stéphane Vennes, Jean Dupois, Todd Rumph, Jeremy Drake, Stuart Bowyer, Pierre Chayer, & Gilles Fontaine.* 410, L119, 126-D7 (1993)

Hunt for Variations in Molecular Gas and Cloud Properties across the Inner, Northern Galactic Disk. *Harvey S. Liszt.* 411, 720, 138-F1 (1993)

High-Resolution Ca II Observations of the Local Interstellar Medium. *J. V. Vallerga, P. W. Vedder, N. Craig, & B. Y. Welsh.* 411, 729, 138-F13 (1993)

The Interstellar Abundances of Tin and Four Other Heavy Elements. *L. M. Hobbs, D. E. Welty, D. C. Morton, L. Spitzer, & D. G. York.* 411, 750, 139-A13 (1993)

The *Hubble Space Telescope* Quasar Absorption Line Key Project. III. First Observational Results on Milky Way Gas. *Blair D. Savage, Limin Lu, John N. Bahcall, Jacqueline Bergeron, Alec Boksenberg, George F. Hartig, Buell T. Jannuzi, Sofia Kirhakos, Felix J. Lockman, W. L. W. Sargent, Donald P. Schneider, David Turnshek, Ray J. Weymann, & Arthur M. Wolfe.* 413, 116, 157-E6 (1993)

Silicon and Carbon Abundances in the Orion Nebula. *Robert H. Rubin, Reginald J. Dufour, & Donald K. Walter.* 413, 242, 159-C6 (1993)

High-Resolution Ultraviolet Observations of the Interstellar Diffuse Clouds toward μ Columbae. *Ulysses J. Sofia, Blair D. Savage, & Jason A. Cardelli.* 413, 251, 159-D3 (1993)

Detection of Boron, Cobalt, and Other Weak Interstellar Lines toward ζ Ophiuchi. *S. R. Federman, Y. Sheffer, D. L. Lambert, & R. L. Gilliland.* 413, L51, 162-G7 (1993)

Emission of HeH^+ in Nebulae. *C. Cecchi-Pestellini & A. Dalgarno.* 413, 611, 164-B5 (1993)

The Significance of the Interstellar $^7Li/^6Li$ Ratio. *Gary Steigman.* 413, L73, 168-C12 (1993)

Density, Temperature, and Isotopic Abundance in Molecular Gas around ζ Ophiuchi. *Harvey S. Liszt.* 414, 242, 173-A10 (1993)

Comparison of Distributed Reacceleration and Leaky-Box Models of Cosmic-Ray Abundances ($3 \leq Z \leq 28$). *John R. Letaw, Rein Silberberg, & C. H. Tsao.* 414, 601, 178-F6 (1993)

The O^{++}/H^+ Abundance Ratio in Gaseous Nebulae Derived from Recombination Lines. *M. Peimbert, P. J. Storey, & S. Torres-Peimbert.* 414, 626, 179-A7 (1993)

Detection of Interstellar $^{12}C^{15}N$. *A. H. Saleck, R. Simon, N. Schneider, & G. Winnewisser.* 414, L133, 186-D3 (1993)

Oscillator Strengths of the Si II 181 Nanometer Resonance Multiplet. *S. D. Bergeson & J. E. Lawler.* 414, L137, 186-D9 (1993)

Bright Planetary Nebulae as Probes of Chemical Evolution. *Michael G. Richer.* 415, 240, 188-A6 (1993)

On ^{26}Al and Other Short-lived Interstellar Radioactivity. *Donald D. Clayton, Dieter H. Hartmann, & Mark D. Leising.* 415, L25, 192-A1 (1993)

A High-Resolution Optical and Radio Study of Milky Way Halo Gas. *C. E. Albert, J. C. Blades, D. C. Morton, Felix J. Lockman, M. Proulx, & L. Ferrarese.* 88, 81, 41-C7 (1993)

Forbidden Velocity Gas Detected in Ultraviolet Interstellar Absorption toward Four Distant Inner Galaxy Stars. *Todd M. Tripp, Kenneth R. Sembach, & Blair D. Savage.* 415, 652, 196-A1 (1993)

The Detection of [C I] in Molecular Outflows Associated with Young Stellar Objects. *Christopher K. Walker, Gopal Narayanan, Thomas H. Büttgenbach, John E. Carlstrom, Jocelyn Keene, & T. G. Phillips.* 415, 672, 196-B10 (1993)

Faint Object Spectrograph Spectra of the Broad Fe II Absorption Lines in the Remnant of SN 1006. *Chi-Chao Wu, D. Michael Crenshaw, Robert A. Fesen, Andrew J. S. Hamilton, & Craig L. Sarazin.* 416, 247, 204-B7 (1993)

Ultraviolet Transitions of Low Condensation Temperature Heavy Elements and New Data for Interstellar Arsenic, Selenium, Tellurium, and Lead. *Jason A. Cardelli, S. R. Federman, David L. Lambert, & C. E. Theodosiou.* 416, L41, 207-F5 (1993)

Detection of the Interstellar NH_2 Radical. *Ewine F. van Dishoeck, David J. Jansen, Peter Schilke, & T. G. Phillips.* 416, L83, 216-E10 (1993)

Bistability in Dark Cloud Chemistry. *J. Le Bourlot, G. Pineau des Forêts, E. Roueff, & P. Schilke.* 416, L87, 216-F1 (1993)

Photometric and Spectroscopic Analysis of High Galactic Latitude Molecular Clouds. II. High-Resolution Spectroscopic Observations of Na I, Ca II, Ca I, CH, and CH^+. *B. E. Penprase.* 88, 433, 46-B13 (1993)

Initial White Dwarf Results from the *Extreme Ultraviolet Explorer*. *David S. Finley, Patrick Jelinsky, Jean Dupuis, & Detlev Koester.* 417, 259, 220-F3 (1993)

C_3S and C_5S in IRC +10216. *M. B. Bell, L. W. Avery, & P. A. Feldman.* 417, L37, 223-C1 (1993)

Observations of Nearby Interstellar Gas and Dust in the Direction toward the Globular Cluster ω Centauri. *K. D. Wood & B. Bates.* 417, 572, 226-D10 (1993)

Deuterated Ammonia in Sagittarius B2. *Y. Peng, S. N. Vogel, & J. E. Carlstrom.* 418, 255, 234-C1 (1993)

Chemical Composition of M8 Based on *IUE* and Visual Observations. *M. Peimbert, S. Torres-Peimbert, & R. J. Dufour.* 418, 760, 242-A8 (1993)

Observations of [S IV] and the O/S Abundance Ratio in Two Halo Population Planetary Nebulae. *Donald R. Garnett & John H. Lacy.* 419, L93, 259-F8 (1993)

Radio Observations of D I and Fractionation. *Carl Heiles, Peter R. McCullough, & Alfred E. Glassgold.* 89, 271, 53-C11 (1993)

Highly Ionized Gas Absorption in the Disk and Halo toward HD 167756 at 3.5 Kilometers per Second Resolution. *Blair D. Savage, Kenneth R. Sembach, & Jason A. Cardelli.* 420, 183, 3-C1 (1994)

Interstellar Detection of the Intersystem Line Si II] λ2335 toward ζ Ophiuchi. *Jason A. Cardelli, Ulysses J. Sofia, Blair D. Savage, Francis P. Keenan, & Philip L. Dufton.* 420, L29, 7-D13 (1994)

Interstellar Gas and Dust in the Young Cluster IC 348. *Theodore P. Snow, Margaret Murray Hanson, C. Gregory Seab, & Jon M. Saken.* 420, 632, 10-E6 (1994)

Interstellar Carbon Monoxide toward ζ Ophiuchi. *David L. Lambert, Yaron Sheffer, Ronald L. Gilliland, & S. R. Federman.* 420, 756, 12-C10 (1994)

Nebular Properties from Far-Infrared Spectroscopy. *Robert H. Rubin, Janet P. Simpson, Steven D. Lord, Sean W. J. Colgan, Edwin F. Erickson, & Michael R. Haas.* 420, 772, 12-E1 (1994)

Detection of a New Molecular Ion HC_3NH^+ in TMC-1. *Kentarou Kawaguchi, Yasuko Kasai, Shin-ichi Ishikawa, Masatoshi Ohishi, Norio Kaifu, & Takayoshi Amano.* 420, L95, 15-F12 (1994)

Low Density of Neutral Hydrogen and Helium in the Local Interstellar Medium: *Extreme Ultraviolet Explorer* Photometry of the Lyman Continuum of the Hot White Dwarfs MCT 0501−2858, MCT 0455−2812, HZ 43, and GD 153. *Stéphane Vennes, Jean Dupuis, Stuart Bowyer, Gilles Fontaine, Alexandria Wiercigroch, Patrick Jelinsky, François Wesemael, & Roger Malina.* 421, L35, 21-G12 (1994)

Density Contrast Shell Models for the Planetary Nebula IC 2165. *S. Hyung.* 90, 119, 2-E4 (1994)

Al III, Si IV, and C IV Absorption toward ζ Ophiuchi: Evidence for Photoionized and Collisionally Ionized Gas. *Kenneth R. Sembach, Blair D. Savage, & Edward B. Jenkins.* 421, 585, 25-D12 (1994)

Elemental Abundances of the Supernova Remnant G292.0+1.8: Evidence for a Massive Progenitor. *John P. Hughes & K. P. Singh.* 422, 126, 31-F1 (1994)

High-Resolution 6450–24500 Å Spectra of η Carinae. *Fred Hamann, D. L. DePoy, Sveneric Johansson, & Jay Elias.* 422, 626, 39-F1 (1994)

Extreme Ultraviolet Spectroscopy of PKS 2155−304. *Antonella Fruscione, Stuart Bowyer, Arieh Königl, & Steven M. Kahn.* 422, L55, 44-G6 (1994)

Gamma-Ray Limits on Galactic ^{60}Fe and ^{44}Ti Nucleosynthesis. *Mark D. Leising & Gerald H. Share.* 424, 200, 64-D7 (1994)

Asymptotic Giant Branch Stars as a Source of Short-lived Radioactive Nuclei in the Solar Nebula. *G. J. Wasserburg, M. Busso, R. Gallino, & C. M. Raiteri.* 424, 412, 67-A6 (1994)

The Depletion of Calcium in the Interstellar Medium. *Greg Crinklaw, S. R. Federman, & Charles L. Joseph.* 424, 748, 74-B3 (1994)

CH^+ in the Interstellar Medium. *M. Marsha Allen.* 424, 754, 74-B11 (1994)

Observations of Large-Scale [C I] Emission from S140. *René Plume, D. T. Jaffe, & Jocelyn Keene.* 425, L49, 85-G3 (1994)

Hot Gas and the Origin of the Nebular Continuum in Novae. *Pedro Saizar & Gary J. Ferland.* 425, 755, 91-B10 (1994)

Evolutionary Models for High-Metallicity Giant Extragalactic H II Regions. *Maria Luisa García Vargas & Angeles I. Díaz.* 91, 553, 27-A4 (1994)

A Very Metal poor H II Region in the Outer Disk of M101. *Donald R. Garnett & Robert C. Kennicutt, Jr.* 426, 123, 97-F1 (1994)

Oxygen Abundances in Low Surface Brightness Disk Galaxies. *Stacy S. McGaugh.* 426, 135, 97-G3 (1994)

A Statistical Equilibrium Analysis of Interstellar CO toward ζ Ophiuchi as Recorded by the Goddard High Resolution Spectrograph. *Cheng-Hsuan Lyu, Andrew M. Smith, & Frederick C. Bruhweiler.* 426, 254, 99-C7 (1994)

Cosmic-Ray Isotopic Composition of C, N, O, Ne, Mg, Si Nuclei in the Energy Range 50–200 MeV per Nucleon Measured by the *Voyager* Spacecraft during the Solar Minimum Period. *A. Lukasiak, P. Ferrando, F. B. McDonald, & W. R. Webber.* 426, 366, 100-F10 (1994)

Probing the Galactic Disk and Halo. I. The NGC 3783 Sight Line. *Limin Lu, Blair D. Savage, & Kenneth R. Sembach.* 426, 563, 105-D7 (1994)

0.95–1.3 Micron Spectrophotometry of Two Bright Filaments of the Crab Nebula. *Richard J. Rudy, George S. Rossano, & R. C. Puetter.* 426, 646, 106-D10 (1994)

Spectrum of IC 2149 and Its Central Star. *Walter A. Feibelman, Siek Hyung, & Lawrence H. Aller.* 426, 653, 106-E6 (1994)

Detection of Sodium Cyanide (NaCN) in IRC 10216. *B. E. Turner, T. C. Steimle, & Leo Meerts.* 426, L97, 109-F13 (1994)

Composition of Interstellar Clouds in the Disk and Halo. II. γ^2 Velorum. *Edward L. Fitzpatrick & Lyman Spitzer, Jr.* 427, 232, 112-G8 (1994)

Optical and H I Observations of High-Velocity Gas toward HD 203664. *J. E. Little, P. L. Dufton, F. P. Keenan, E. S. Conlon, & R. D. Davies.* 427, 267, 113-C8 (1994)

An *IUE* Survey of Interstellar H I Lyman-Alpha Absorption. II. Interpretations. *Athanassios Diplas & Blair D. Savage.* 427, 274, 113-D1 (1994)

Highly Ionized Gas in the Galactic Halo. *J. Michael Shull & Jonathan D. Slavin.* 427, 784, 122-D6 (1994)

The Highly Ionized Regions of NGC 6302 and NGC 6537. *N. Rowlands, J. R. Houck, & T. Herter.* 427, 867, 123-D8 (1994)

Multiple Outflows in the Bipolar Planetary Nebula M1-16: A Molecular Line Study. *Raghvendra Sahai, Alwyn Wootten, Hugo E. Schwarz, & W. Wild.* 428, 237, 131-B5 (1994)

Molecular Abundances and Low-Mass Star Formation. I. Si- and S-bearing Species toward IRAS 16293−2422. *Geoffrey A. Blake, Ewine F. van Dishoeck, David J. Jansen, T. D. Groesbeck, & Lee G. Mundy.* 428, 680, 138-F13 (1994)

Detection of Absorption by H_2 in Molecular Clouds: A Direct Measurement of the H_2:CO Ratio. *J. H. Lacy, R. Knacke, T. R. Geballe, & A. T. Tokunaga.* 428, L69, 142-G1 (1994)

Dust Extinction and Molecular Gas in the Dark Cloud IC 5146. *Charles J. Lada, Elizabeth A. Lada, Dan P. Clemens, & John Bally.* 429, 694, 154-C11 (1994)

Voyager Measurements of the Isotopic Composition of Cosmic-Ray Aluminum and Implications for the Propagation of Cosmic Rays. *A. Lukasiak, F. B. McDonald, & W. R. Webber.* 430, L69, 166-B8 (1994)

An *IUE* Survey of Interstellar H I Lyα Absorption. I. Column Densities. *Athanassios Diplas & Blair D. Savage.* 93, 211, 44-F1 (1994)

The Abundant Elements in Interstellar Dust. *Ulysses J. Sofia, Jason A. Cardelli, & Blair D. Savage.* 430, 650, 170-A2 (1994)

The Cosmic Abundance of ^{3}He. III. Improved Line Parameters for Selected Sources. *Dana S. Balser, T. M. Bania, Charles J. Brockway, Robert T. Rood, & T. L. Wilson.* 430, 667, 170-B8 (1994)

High Rydberg State Carbon Recombination Lines toward Cassiopeia A: 332 MHz VLA Observations and Comparison with H I and Molecular Lines. *K. R. Anantharamaiah, W. C. Erickson, H. E. Payne, & Nimisha G. Kantharia.* 430, 682, 170-C11 (1994)

High Rydberg State Carbon Recombination Lines toward Cassiopeia A: Physical Conditions and a New Class of Models. *H. E. Payne, K. R. Anantharamaiah, & W. C. Erickson.* 430, 690, 170-D7 (1994)

A Study of X-Ray and Infrared Emissions from Dusty Nonradiative Shock Waves. *Olaf Vancura, John C. Raymond, Eli Dwek, William P. Blair, Knox S. Long, & Scott Foster.* 431, 188, 178-D13 (1994)

Gas Kinematics and Ionization along the Extended Sight Line to HD 116852. *Kenneth R. Sembach & Blair D. Savage.* 431, 201, 178-F1 (1994)

Atomic Carbon in the High-Latitude Molecular Cloud MBM 12. *James G. Ingalls, T. M. Bania, & James M. Jackson.* 431, L139, 192-D4 (1994)

The Spectrum of the Variable Planetary Nebula IC 4997. *Siek Hyung, Lawrence H. Aller, & Walter A. Feibelman.* 93, 465, 49-B5 (1994)

Diffuse Molecular Clouds and the Molecular Interstellar Medium from ^{13}CO Observations of M33. *Christine D. Wilson & Constance E. Walker.* 432, 148, 195-A13 (1994)

Abundances, Planetary Nebulae, and Stellar Evolution. *Lawrence H. Aller.* 432, 427, 201-C1 (1994)

Study of Cosmic-Ray H and He Isotopes at 23 AU. *E. S. Seo, F. B. McDonald, N. Lal, & W. R. Webber.* 432, 656, 204-B11 (1994)

[Fe II] Emission from High-Density Regions in the Orion Nebula. *Manuel A. Bautista, Anil K. Pradhan, & Donald E. Osterbrock.* 432, L135, 207-C13 (1994)

Intersystem Transitions of Interstellar Carbon Monoxide toward ζ Ophiuchi. *S. R. Federman, Jason A. Cardelli, Yaron Sheffer, David L. Lambert, & D. C. Morton.* 432, L139, 207-D5 (1994)

The Distribution of Neutral Hydrogen in the Interstellar Medium. I. The Data. *Antonella Fruscione, Isabel Hawkins, Patrick Jelinsky, & Alexandria Wiercigroch.* 94, 127, 53-E3 (1994)

Properties of the Highly Ionized Disk and Halo Gas toward Two Distant High-Latitude Stars. *Blair D. Savage & Kenneth R. Sembach.* 434, 145, 227-B6 (1994)

Highly Ionized Gas in the Galactic Disk: The $l = 295°$, $b = 0°$ Interarm Direction. *Kenneth R. Sembach.* 434, 244, 228-G3 (1994)

Anomalous Balmer Continuum Temperatures in the Orion Nebula. *Donald K. Walter & Reginald J. Dufour.* 434, L29, 232-E5 (1994)

Spectroscopy of the Supernova Remnant CTB 1. *Charles J. Hailey & William W. Craig.* 434, 635, 236-E6 (1994)

Three Millimeter Molecular Line Observations in Sagittarius B2. I. Full Synthesis Mapping Study of HNO, CCS, and $HC^{13}CCN$. *Yi-Jehng Kuan & Lewis E. Snyder.* 94, 651, 61-A8 (1994)

The Cosmic-Ray Oxygen and Helium Spectra Measured at *Pioneer 10* over the Time of the 1987 Modulation Minimum, and Implications for the He/O Source Ratio. *W. R. Webber & F. B. McDonald.* 435, 464, 249-G2 (1994)

The Soft X-Ray Properties of a Complete Sample of Optically Selected Quasars. I. First Results. *Ari Laor, Fabrizio Fiore, Martin Elvis, Belinda J. Wilkes, & Jonathan C. McDowell.* 435, 611, 254-E3 (1994)

The Dust in the Hydrogen-poor Ejecta of Abell 30. *Kazimierz J. Borkowski, J. Patrick Harrington, William P. Blair, & Jesse D. Bregman.* 435, 722, 256-A6 (1994)

Oscillator Strengths for Fe II Transitions at 224.918 and 226.008 Nanometers. *S. D. Bergeson, K. L. Mullman, & J. E. Lawler.* 435, L157, 260-E11 (1994)

Probing the Interstellar Medium with Pulsars on AU Scales. *Dale A. Frail, Joel M. Weisberg, James M. Cordes, & Corey Mathers.* 436, 144, 263-C1 (1994)

A High-Resolution Survey of Interstellar Na I D_1 Lines. *Daniel E. Welty, L. M. Hobbs, & Varsha P. Kulkarni.* 436, 152, 263-C12 (1994)

Interstellar CN Rotational Spectra: $^{12}C^{15}N$. *A. H. Saleck, R. Simon, & G. Winnewisser.* 436, 176, 263-E11 (1994)

Detection of Interstellar N_2O: A New Molecule Containing an N−O Bond. *L. M. Ziurys, A. J. Apponi, J. M. Hollis, & L. E. Snyder.* 436, L181, 282-B7 (1994)

Evidence for an Extended Neutral Galactic Halo. *C. E. Albert, B. Y. Welsh, & L. Danly.* 437, 204, 286-A7 (1994)

Violent Star Formation in NGC 2363. *Rosa M. González-Delgado, Enrique Pérez, Guillermo Tenorio-Tagle, José M. Vílchez, Elena Terlevich, Roberto Terlevich, Eduardo Telles, José M. Rodríguez-Espinosa, Miguel Mas-Hesse, María Luisa García-Vargas, Ángeles I. Díaz, Jordi Cepa, & Hector Castañeda.* 437, 239, 286-D10 (1994)

The Abundance of Interstellar Oxygen toward Orion: Evidence for Recent Infall? *David M. Meyer, M. Jura, Isabel Hawkins, & Jason A. Cardelli.* 437, L59, 292-C1 (1994)

The Local Distribution of Na I Interstellar Gas. *B. Y. Welsh, N. Craig, P. W. Vedder, & J. V. Vallerga.* 437, 638, 294-E4 (1994)

The Physics and Chemistry of Small Molecular Clouds in the Galactic Plane. II. H_2CO. *B. E. Turner.* 437, 658, 294-G12 (1994)

An Accurate Galactic N_H Map of the North Ecliptic Pole. *Martin Elvis, Felix J. Lockman, & C. Fassnacht.* 95, 413, 70-A6 (1994)

Detection of C_3N in the Spiral Arm Gas Clouds in the Direction of Cassiopeia A. *M. B. Bell & H. E. Matthews.* 438, 223, 4-D10 (1995)

Neutral Gas Contributions to [S II] Emission. *S. J. Petuchowski & C. L. Bennett.* 438, 735, 14-D3 (1995)

Hubble Space Telescope Observations of C_2 Molecules in Diffuse Interstellar Clouds. *David L. Lambert, Yaron Sheffer, & S. R. Federman.* 438, 740, 14-D11 (1995)

^{26}Al and Circumstellar Envelopes. *A. E. Glassgold.* 438, L111, 20-C9 (1995)

Probing the Galactic Disk and Halo. II. Hot Interstellar Gas toward the Inner Galaxy Star HD 156359. *Kenneth R. Sembach, Blair D. Savage, & Limin Lu.* 439, 672, 33-F12 (1995)

Grains in Ionized Nebulae: Spectral Line Diagnostics. *J. Kingdon, G. J. Ferland, & W. A. Feibelman.* 439, 793, 35-E3 (1995)

Gas Phase Abundances and Conditions along the Sight Line to the Low-Halo, Inner Galaxy Star HD 167756. *Jason A. Cardelli, Kenneth R. Sembach, & Blair D. Savage.* 440, 241, 44-E2 (1995)

Turbulent Diffusion and Its Effects on the Chemistry of Molecular Clouds. *Taoling Xie, Mark Allen, & William D. Langer.* 440, 674, 52-E1 (1995)

Injection of Freshly Synthesized ^{41}Ca in the Early Solar Nebula by an Asymptotic Giant Branch Star. *G. J. Wasserburg, R. Gallino, M. Busso, J. N. Goswami, & C. M. Raiteri.* 440, L101, 58-D1 (1995)

Hydrogen Chloride in OMC-1. *Peter Schilke, T. G. Phillips, & Ning Wang.* 441, 334, 64-A1 (1995)

A Molecular Line Study of NGC 1333/IRAS 4. *Geoffrey A. Blake, Göran Sandell, Ewine F. van Dishoeck, T. D. Groesbeck, Lee G. Mundy, & Colin Aspin.* 441, 689, 71-D13 (1995)

Large HCO^+ and HCN Abundances in the Translucent Cloud toward PKS 0528+134. *Michiel R. Hogerheijde, Eugène J. de Geus, Marco Spaans, Huib Jan van Langevelde, & Ewine F. van Dishoeck.* 441, L93, 76-D4 (1995)

Widespread Molecular Emission in the Galactic Plane from Species Other Than ^{12}CO. *Harvey S. Liszt.* 442, 163, 79-D8 (1995)

High-Density CN Filaments in NGC 2023. *A. Fuente, J. Martín-Pintado, & R. Gaume.* 442, L33, 85-A11 (1995)

Interstellar Titanium in the Galactic Halo. *Keith Lipman & Max Pettini.* 442, 628, 88-E8 (1995)

First Spectral Observations of the Diffuse Background with the *Extreme Ultraviolet Explorer*. *P. Jelinsky, J. V. Vallerga, & J. Edelstein.* 442, 653, 89-A8 (1995)

H I, CO, and *IRAS* Observations of NGC 7023. *C. Rogers, Mark H. Heyer, & P. E. Dewdney.* 442, 694, 89-F10 (1995)

Iron to Oxygen Abundance Ratio in the Orion Nebula. *Manuel A. Bautista & Anil K. Pradhan.* 442, L65, 94-F1 (1995)

Charge State of Anomalous Cosmic-Ray Nitrogen, Oxygen, and Neon: *SAMPEX* Observations. *B. Klecker, M. C. McNab, J. B. Blake, D. C. Hamilton, D. Hovestadt, H. Kästle, M. D. Looper, G. M. Mason, J. E. Mazur, & M. Scholer.* 442, L69, 94-F9 (1995)

CO and OH Absorption toward the Low-Latitude Radio Source 2023+336. *Henry A. Kobulnicky, John M. Dickey, & Rachel L. Akeson.* 443, L45, 103-A9 (1995)

The Distribution of Molecules in the Core of OMC-1. *E. C. Sutton, R. Peng, W. C. Danchi, P. A. Jaminet, G. Sandell, & A. P. G. Russell.* 97, 455, 18-E12 (1995)

Probing the Interstellar Medium along the Lines of Sight to SN 1994D and SN 1994I. *Luis C. Ho & Alexei V. Filippenko.* 444, 165, 115-E13 (1995)

The Local Metallicity–Surface Brightness Relationship in Galactic Disks. *Stuart D. Ryder.* 444, 610, 124-F12 (1995)

Optical and H I Observations of the Low-Velocity and Intermediate-Velocity Gas toward the Globular Cluster M13. *B. Bates, C. R. Shaw, S. N. Kemp, F. P. Keenan, & R. D. Davies.* 444, 672, 125-E7 (1995)

What Is the Problem with ^3He? *Keith A. Olive, Robert T. Rood, David N. Schramm, James Truran, & Elisabeth Vangioni-Flam.* 444, 680, 125-F6 (1995)

Far-Infrared Lines from H II Regions: Abundance Variations in the Galaxy. *Janet P. Simpson, Sean W. J. Colgan, Robert H. Rubin, Edwin F. Erickson, & Michael R. Haas.* 444, 721, 126-C6 (1995)

Composition of Interstellar Clouds in the Disk and Halo. III. HD 149881. *Lyman Spitzer, Jr., & Edward L. Fitzpatrick.* 445, 196, 135-C3 (1995)

A Cold Massive Interstellar Cloud within 120 Parsecs of the Sun: K I Optical and H I Radio Observations. *Joaquín Trapero, John E. Beckman, Miquel Serra-Ricart, Rodney D. Davies, Robert A. Watson, & Ramón J. García López.* 445, 231, 135-F9 (1995)

Properties of the +70 Kilometers per Second Cloud toward HD 203664. *Kenneth R. Sembach.* 445, 314, 136-G3 (1995)

A Critical Analysis of Interstellar Zn and Cr as Galactic Abundance Benchmarks for Quasar Absorbers. *Kenneth R. Sembach, Charles C. Steidel, Robert J. Macke, & David M. Meyer.* 445, L27, 140-E10 (1995)

Detection of MgCN in IRC +10216: A New Metal-bearing Free Radical. *L. M. Ziurys, A. J. Apponi, M. Guélin, & J. Cernicharo.* 445, L47, 141-A5 (1995)

Complex Molecules in Sagittarius B2(N): The Importance of Grain Chemistry. *Yanti Miao, David M. Mehringer, Yi-Jehng Kuan, & Lewis E. Snyder.* 445, L59, 141-B13 (1995)

On the Value of GEMS (Glass with Embedded Metal and Sulphides). *P. G. Martin.* 445, L63, 141-C8 (1995)

An *HST* Archival Study of Galactic Interstellar Zinc and Chromium. *Katherine C. Roth & J. Chris Blades.* 445, L95, 150-F11 (1995)

Molecular Oxygen: A New Astrophysical Maser? *P. Bergman.* 445, L167, 152-D1 (1995)

The Detection and Mapping Observations of C_2H_5OH in Orion Kleinmann-Low. *Masatoshi Ohishi, Shin-ichi Ishikawa, Satoshi Yamamoto, Shuji Saito, & Takayoshi Amano.* 446, L43, 160-G7 (1995)

The 685–692 GHz Spectrum of the Orion Core. *A. I. Harris, L. W. Avery, K.-F. Schuster, L. J. Tacconi, & R. Genzel.* 446, L85, 171-A9 (1995)

Observations of Anomalous Cosmic-Ray Hydrogen from the *Voyager* Spacecraft. *E. R. Christian, A. C. Cummings, & E. C. Stone.* 446, L105, 171-D9 (1995)

Neutral Hydrogen Absorption Measurements of Four Distant Pulsars and the Electron Density in the Inner Galaxy. *J. M. Weisberg, M. H. Siegel, D. A. Frail, & S. Johnston.* 447, 204, 175-A10 (1995)

Toward Extragalactic Chemistry: Detections of N_2H^+ and SiO in Nearby Galaxies. *Leslie J. Sage & L. M. Ziurys.* 447, 625, 184-F9 (1995)

HCl Absorption toward Sagittarius B2. *J. Zmuidzinas, G. A. Blake, J. Carlstrom, J. Keene, & D. Miller.* 447, L125, 191-C2 (1995)

Limits on Galactic Gamma-Ray Lines at 4.44 MeV and 6.13 MeV from Nuclear De-Excitation. *Michael J. Harris, Gerald H. Share, & Daniel C. Messina.* 448, 157, 194-C8 (1995)

Interstellar Alcohols. *S. B. Charnley, M. E. Kress, A. G. G. M. Tielens, & T. J. Millar.* 448, 232, 195-D1 (1995)

The Distribution of Metal-absorbing High-Velocity Clouds in the Galaxy. *David V. Bowen, J. Chris Blades, & Max Pettini.* 448, 662, 203-G10 (1995)

Probing the Galactic Disk and Halo. III. The Galactic and Intergalactic Sight Line to H1821+643. *Blair D. Savage, Kenneth R. Sembach, & Limin Lu.* 449, 145, 212-B11 (1995)

Si/O Abundance Ratios in Extragalactic H II Regions from Hubble Space Telescope UV Spectroscopy. *D. R. Garnett, R. J. Peimbert, S. Torres-Peimbert, G. A. Shields, E. D. Skillman, E. Terlevich, & R. J. Terlevich.* 449, L77, 217-C8 (1995)

A Search for *r*-Process Elements in the Vela Supernova Remnant. *George Wallerstein, Andrew D. Vanture, Edward B. Jenkins, & George M. Fuller.* 449, 688, 222-C10 (1995)

Interstellar Lead. *D. E. Welty, L. M. Hobbs, J. T. Lauroesch, D. C. Morton, & D. G. York.* 449, L135, 227-C8 (1995)

Coronal Gas in the Galactic Halo: ORFEUS Observations of NGC 346 No. 1 and PKS 2155−304. *M. Hurwitz, S. Bowyer, R.-P. Kudritzki, & D. J. Lennon.* 450, 149, 230-B2 (1995)

The Oscillator Strengths of the C_2 Phillips System. *P. Erman & A. Iwamae.* 450, L31, 236-A3 (1995)

Observation of Infrared and Radio Lines of Molecules toward GL 2591 and Comparison to Physical and Chemical Models. *John S. Carr, Neal J. Evans II, J. H. Lacy, & Shudong Zhou.* 450, 667, 240-A7 (1995)

Temperature Fluctuations in Photoionized Nebulae. *J. B. Kingdon & G. J. Ferland.* 450, 691, 240-C6 (1995)

Balmer Discontinuity Temperatures in the Orion Nebula. *X.-W. Liu, M. J. Barlow, I. J. Danziger, & P. J. Storey.* 450, L59, 244-F8 (1995)

H II Regions in Four Galaxies in and near the Local Group. *Paul Hodge & Bryan W. Miller.* 451, 176, 248-D9 (1995)

Deuterium and the Local Interstellar Medium Properties for the Procyon and Capella Lines of Sight. *Jeffrey L. Linsky, Athanassios Diplas, Brian E. Wood, Alexander Brown, Thomas R. Ayres, & Blair D. Savage.* 451, 335, 250-E2 (1995)

Cosmic-Ray H and He Isotopes in the Outer Heliosphere in 1994. *E. S. Seo & F. B. McDonald.* 451, L33, 252-E12 (1995)

Discovery of Highly Ionized High-Velocity Clouds toward Markarian 509. *Kenneth R. Sembach, Blair D. Savage, Limin Lu, & Edward M. Murphy.* 451, 616, 255-F12 (1995)

The Ratio of H_2 Column Density to ^{12}CO Intensity in the Vicinity of the Galactic Center. *T. J. Sodroski, N. Odegard, E. Dwek, M. G. Hauser, B. A. Franz, I. Freedman, T. Kelsall, W. F. Wall, G. B. Berriman, S. F. Odenwald, C. Bennett, W. T. Reach, & J. L. Weiland.* 452, 262, 265-F10 (1995)

Atomic Physics with the Goddard High-Resolution Spectrograph on the *Hubble Space Telescope*. I. Oscillator Strengths for Neutral Sulfur. *S. R. Federman & Jason A. Cardelli.* 452, 269, 265-G6 (1995)

Atomic Physics with the Goddard High-Resolution Spectrograph on the *Hubble Space Telescope*. II. Oscillator Strengths for Singly Ionized Iron. *Jason A. Cardelli & Blair D. Savage.* 452, 275, 266-A1 (1995)

The Continuum Structure of 11 Galactic H II Regions. *Dana S. Balser, T. M. Bania, Robert T. Rood, & T. L. Wilson.* 100, 371, 51-C6 (1995)

The *EUVE* and *IUE* Spectra of the Hot DA White Dwarf GD 659. *J. B. Holberg, M. A. Barstow, F. C. Bruhweiler, & E. M. Sion.* 453, 313, 285-D12 (1995)

Consequences of Dust in Metal-rich H II Regions. *Joseph C. Shields & Robert C. Kennicutt, Jr.* 454, 807, 313-A1 (1995)

Can Gas-Phase Radical/Neutral Reactions Account for Observed Abundances of Propynal within Dense Interstellar Clouds? *Simon Petrie.* 454, L165, 317-A9 (1995)

A Gamma-Ray Monte Carlo Study of the Clumpy Debris of SN 1987A. *Adam Burrows & Kenneth A. Van Riper.* 455, 215, 321-B3 (1995)

Silicon Monoxide in Sagittarius B2. *Y. Peng, Stuart N. Vogel, & J. E. Carlstrom.* 455, 223, 321-B14 (1995)

Confirmation of Interstellar HOC^+: Reevaluating the $[HCO^+]/[HOC^+]$ Abundance Ratio. *L. M. Ziurys & A. J. Apponi.* 455, L73, 325-F7 (1995)

The Physics and Chemistry of Small Translucent Molecular Clouds. V. SO and SO_2. *B. E. Turner.* 455, 556, 329-E10 (1995)

Hot White Dwarfs in the Local Interstellar Medium: Hydrogen and Helium Interstellar Column Densities and Stellar Effective Temperatures from *Extreme-Ultraviolet Explorer* Spectroscopy. *Jean Dupuis, Stéphane Vennes, Stuart Bowyer, Anil K. Pradhan, & Peter Thejll.* 455, 574, 329-G3 (1995)

Interstellar Lines in HD 72127A and B: A Binary Star behind the Vela Supernova Remnant. *George Wallerstein, Andrew Vanture, & Edward B. Jenkins.* 455, 590, 330-A9 (1995)

Big Bang Nucleosynthesis and a New Approach to Galactic Chemical Evolution. *Craig J. Copi, David N. Schramm, & Michael S. Turner.* 455, L95, 333-C1 (1995)

ISM: ATOMS

Highly Ionized Atoms toward HD 93521. *Lyman Spitzer, Jr., & Edward L. Fitzpatrick.* 391, L41, 92-C11 (1992)

The Optical Emission-Line Background and Accompanying Emissions at Ultraviolet, Infrared, and Millimeter Wavelengths. *R. J. Reynolds.* 392, L35, 106-E1 (1992)

Observation of Fine Structure in the Cold Phase of the Local Interstellar Medium Using K I Absorption. *Joaquín Trapero, John E. Beckman, Ricardo Génova, & Conal D. McKeith.* 394, 552, 136-C1 (1992)

Ultraviolet Observations of the Gas Phase Abundances in the Diffuse Clouds toward ζ Ophiuchi at 3.5 Kilometers per Second Resolution. *Blair D. Savage, Jason A. Cardelli, & Ulysses J. Sofia.* 401, 706, 231-C9 (1992)

Abundance of Interstellar Carbon toward ζ Ophiuchi. *Jason A. Cardelli, John S. Mathis, Dennis C. Ebbets, & Blair D. Savage.* 402, L17, 6-D1 (1993)

Accurate Oscillator Strengths for Interstellar Ultraviolet Lines of Cl I. *R. M. Schectman, S. R. Federman, D. J. Beideck, & D. G. Ellis.* 406, 735, 67-B6 (1993)

Can Galactic H I Be Radiatively Supported? *A. Ferrara.* 407, 157, 71-A7 (1993)

Highly Blueshifted H I Gas toward the Galactic Center. *Farhad Yusef-Zadeh, Anthony Lasenby, & Jennifer Marshall.* 410, L27, 118-G12 (1993)

The Interstellar Abundances of Tin and Four Other Heavy Elements. *L. M. Hobbs, D. E. Welty, D. C. Morton, L. Spitzer, & D. G. York.* 411, 750, 139-A13 (1993)

Detection of Boron, Cobalt, and Other Weak Interstellar Lines toward ζ Ophiuchi. *S. R. Federman, Y. Sheffer, D. L. Lambert, & R. L. Gilliland.* 413, L51, 162-G7 (1993)

Oscillator Strengths of the Si II 181 Nanometer Resonance Multiplet. *S. D. Bergeson & J. E. Lawler.* 414, L137, 186-D9 (1993)

Ultraviolet Transitions of Low Condensation Temperature Heavy Elements and New Data for Interstellar Arsenic, Selenium, Tellurium, and Lead. *Jason A. Cardelli, S. R. Federman, David L. Lambert, & C. E. Theodosiou.* 416, L41, 207-F5 (1993)

Interstellar Detection of the Intersystem Line Si II] λ2335 toward ζ Ophiuchi. *Jason A. Cardelli, Ulysses J. Sofia, Blair D. Savage, Francis P. Keenan, & Philip L. Dufton.* 420, L29, 7-D13 (1994)

The Annihilation of Positrons in the Cold Phase of the Interstellar Medium Revisited. *P. Wallyn, Ph. Durouchoux, C. Chapuis, & M. Leventhal.* 422, 610, 39-D7 (1994)

A Measurement of the $J = 2 \leftarrow 1$ Fine-Structure Interval for ^{28}Si and ^{29}Si in the Ground ^3P State. *John M. Brown, Lyndon R. Zink, & K. M. Evenson.* 423, L151, 61-D13 (1994)

The Distribution and Kinematics of Atomic Carbon near the Galactic Center. *E. Serabyn, Jocelyn Keene, D. C. Lis, & T. G. Phillips.* 424, L95, 79-A9 (1994)

Observations of Large-Scale [C I] Emission from S140. *René Plume, D. T. Jaffe, & Jocelyn Keene.* 425, L49, 85-G3 (1994)

The Fine-Structure Intervals of $^{14}N^{+}$ by Far-Infrared Laser Magnetic Resonance. *John M. Brown, Thomas D. Varberg, Kenneth M. Evenson, & Andrew L. Cooksy.* 428, L37, 134-E13 (1994)

Atomic Carbon in the High-Latitude Molecular Cloud MBM 12. *James G. Ingalls, T. M. Bania, & James M. Jackson.* 431, L139, 192-D4 (1994)

Atomic Sulfur: Frequency Measurement of the $J = 0 \leftarrow 1$ Fine-Structure Transition at 56.3 Microns by Laser Magnetic Resonance. *John M. Brown, Kenneth M. Evenson, & Lyndon R. Zink.* 431, L147, 192-E2 (1994)

Morphology of the Interstellar Cooling Lines Detected by *COBE*. *C. L. Bennett, D. J. Fixsen, G. Hinshaw, J. C. Mather, S. H. Moseley, E. L. Wright, R. E. Eplee, Jr., J. Gales, T. Hewagama, R. B. Isaacman, R. A. Shafer, & K. Turpie.* 434, 587, 235-G13 (1994)

Observation of [C I] toward the GL 2591 and W28 A2 Molecular Outflows. *Minho Choi, Neal J. Evans II, Daniel T. Jaffe, & Christopher K. Walker.* 435, 734, 256-B10 (1994)

Oscillator Strengths for Fe II Transitions at 224.918 and 226.008 Nanometers. *S. D. Bergeson, K. L. Mullman, & J. E. Lawler.* 435, L157, 260-E11 (1994)

A High-Resolution Survey of Interstellar Na I D_1 Lines. *Daniel E. Welty, L. M. Hobbs, & Varsha P. Kulkarni.* 436, 152, 263-C12 (1994)

The Abundance of Interstellar Oxygen toward Orion: Evidence for Recent Infall? *David M. Meyer, M. Jura, Isabel Hawkins, & Jason A. Cardelli.* 437, L59, 292-C1 (1994)

The Origin of N III λ990 and C III λ977 Emission in AGN Narrow-Line Region Gas. *J. W. Ferguson, G. J. Ferland, & A. K. Pradhan.* 438, L55, 19-B11 (1995)

Atomic Iron in Its ^5D Ground State: A Direct Measurement of the $J = 0 \leftarrow 1$ and $J = 1 \leftarrow 2$ Fine-Structure Intervals. *John M. Brown & Kenneth M. Evenson.* 441, L97, 76-D11 (1995)

A Cold Massive Interstellar Cloud within 120 Parsecs of the Sun: K I Optical and H I Radio Observations. *Joaquín Trapero, John E. Beckman, Miquel Serra-Ricart, Rodney D. Davies, Robert A. Watson, & Ramón J. García López.* 445, 231, 135-F9 (1995)

A Localized Excess of Diffuse Gamma Radiation. *A. Chen, J. Dwyer, & P. Kaaret.* 445, L109, 151-A9 (1995)

Interstellar Lead. *D. E. Welty, L. M. Hobbs, J. T. Lauroesch, D. C. Morton, & D. G. York.* 449, L135, 227-C8 (1995)

ISM: BUBBLES

Dynamics of Wind Bubbles and Superbubbles. I. Slow Winds and Fast Winds. *Bon-Chul Koo & Christopher F. McKee.* 388, 93, 50-C1 (1992)

Dynamics of Wind Bubbles and Superbubbles. II. Analytic Theory. *Bon-Chul Koo & Christopher F. McKee.* 388, 103, 50-C12 (1992)

Galactic Worms. I. Catalog of Worm Candidates. *Bon-Chul Koo, Carl Heiles, & William T. Reach.* 390, 108, 75-D6 (1992)

Effect of the Explosion of Supernovae and Superbubbles on the Galactic Dynamo. *Katia Ferrière.* 391, 188, 88-C13 (1992)

Completing the Evolution of Supernova Remnants and Their Bubbles. *Jonathan D. Slavin & Donald P. Cox.* 392, 131, 102-E9 (1992)

Astro-1 Ultraviolet Imaging of the 30 Doradus and SN 1987A Fields with the Ultraviolet Imaging Telescope. *Kwang-Ping Cheng, Andrew G. Michalitsianos, Paul Hintzen, Ralph C. Bohlin, Robert W. O'Connell, Robert H. Cornett, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L29, 145-A1 (1992)

Pulsar Nebulae in Supernovae. *Roger A. Chevalier & Claes Fransson.* 395, 540, 149-E3 (1992)

Evidence for Large-Scale Expanding Motions within the Orion A Molecular Cloud. *M. H. Heyer, J. Morgan, F. P. Schloerb, R. L. Snell, & P. F. Goldsmith.* 395, L99, 154-B1 (1992)

Warm Ionized Gas in the Edge-on Galaxies NGC 4565 and NGC 4631. *Richard J. Rand, Shrinivas R. Kulkarni, & J. Jeff Hester.* 396, 97, 156-C6 (1992)

An Axisymmetric Magnetohydrodynamic Model for the Crab Pulsar Wind Bubble. *Mitchell C. Begelman & Zhi-yun Li.* 397, 187, 170-C11 (1992)

The Galactic Center Wind. *Roger A. Chevalier.* 397, L39, 173-E12 (1992)

An Off-Center Point Explosion in a Radially Stratified Medium: Kompaneets Approximation. *D. G. Korycansky.* 398, 184, 184-B9 (1992)

Formation of the Dark Bays in the Crab Optical Synchrotron Nebula: Is the Crab Pulsar Wind Bubble Interacting with Its Progenitor's Wind? *Zhi-Yun Li & Mitchell C. Begelman.* 400, 186, 211-C1 (1992)

Two-Temperature Models of Old Supernova Remnants with Ion and Electron Thermal Conduction. *Wei Cui & Donald P. Cox.* 401, 206, 223-F1 (1992)

The Full Alpha-Tensor Due to Supernova Explosions and Superbubbles in the Galactic Disk. *Katia Ferrière.* 404, 162, 30-A7 (1993)

The Impact of Supernova Fragments on the Evolution of Multisupernova Remnants. *J. Franco, A. Ferrara, M. Różyczka, G. Tenorio-Tagle, & D. P. Cox.* 407, 100, 70-C11 (1993)

Magnetic Diffusion Due to Supernova Explosions and Superbubbles in the Galactic Disk. *Katia Ferrière.* 409, 248, 100-C1 (1993)

Large-Scale Explosions and Superbubbles in the Galactic Disk and Halo. I. Magnetohydrodynamic Simulations. *Shin Mineshige, Kazunari Shibata, & Paul R. Shapiro.* 409, 663, 107-C1 (1993)

Hot Bubbles in a Magnetic Interstellar Medium: Another Look at the Soft X-Ray Background. *Richard J. Edgar & Donald P. Cox.* 413, 190, 158-D10 (1993)

Evolution of Supernova Remnant Bubbles in a Warm Diffuse Medium: Survey of Results from One-dimensional Models and Their Impact on Estimates of Interstellar Porosity. *Jonathan D. Slavin & Donald P. Cox.* 417, 187, 219-F12 (1993)

Excitation of the [Fe III] Bubble Surrounding the Galactic Center "Mini-Cavity." *D. Lutz, A. Krabbe, & R. Genzel.* 418, 244, 234-B1 (1993)

Interstellar Magnetic Bubbles. *J. P. Vallée.* 419, 670, 256-A12 (1993)

Voyager Observations of Diffuse Far-Ultraviolet Continuum and Line Emission in Eridanus. *Jayant Murthy, M. Im, R. C. Henry, & J. B. Holberg.* 419, 739, 256-G7 (1993)

Magnetic Shaping of Planetary Nebulae and Other Stellar Wind Bubbles. *Roger A. Chevalier & Ding Luo.* 421, 225, 18-G1 (1994)

The Formation of Stellar Systems by Gravitational Instability in the Cygnus Superbubble. *F. Comerón & J. Torra.* 423, 652, 56-F1 (1994)

O Star Giant Bubbles in M33. *M. S. Oey & Philip Massey.* 425, 635, 89-E1 (1994)

Narrowband *HST* Imagery of the Young Planetary Nebula Henize 1357. *M. Bobrowsky.* 426, L47, 103-F5 (1994)

The Nuclear Superbubble of NGC 3079. *S. Veilleux, G. Cecil, J. Bland-Hawthorn, R. B. Tully, A. V. Filippenko, & W. L. W. Sargent.* 433, 48, 208-G2 (1994)

Filaments of Neutral Hydrogen toward the Galactic Anticenter. *Christopher M. Tamanaha.* 433, 648, 219-B3 (1994)

Morphology of the Interstellar Cooling Lines Detected by *COBE*. *C. L. Bennett, D. J. Fixsen, G. Hinshaw, J. C. Mather, S. H. Moseley, E. L. Wright, R. E. Eplee, Jr., J. Gales, T. Hewagama, R. B. Isaacman, R. A. Shafer, & K. Turpie.* 434, 587, 235-G13 (1994)

Hot Gas in the Interstellar Medium: A Reanalysis of O VI Absorption Data. *R. L. Shelton & D. P. Cox.* 434, 599, 236-B2 (1994)

Two New Light Echo Structures from SN 1987A at Large Distances. *Jun Xu, Arlin P. S. Crotts, & William E. Kunkel.* 435, 274, 247-B1 (1994)

The Local Distribution of Na I Interstellar Gas. *B. Y. Welsh, N. Craig, P. W. Vedder, & J. V. Vallerga.* 437, 638, 294-E4 (1994)

Observations of the Impact of Starbursts on the Interstellar Medium in Dwarf Galaxies. *Amanda T. Marlowe, Timothy M. Heckman, Rosemary F. G. Wyse, & Robert Schommer.* 438, 563, 12-A3 (1995)

The Hot Gas Filling Factor in the Vicinity of the Sun. *K. M. Ferrière.* 441, 281, 63-B12 (1995)

First Spectral Observations of the Diffuse Background with the *Extreme Ultraviolet Explorer*. *P. Jelinsky, J. V. Vallerga, & J. Edelstein.* 442, 653, 89-A8 (1995)

Noncoeval Star Formation, Starbursts, and the Growth of Supershells in OB Associations. *J. Michael Shull & Jon M. Saken.* 444, 663, 125-D9 (1995)

Socket Stars: *UBVRIJK* Radial Profiles. *Bradley E. Schaefer.* 444, 739, 126-D13 (1995)

A Supergiant Supernova-blown Bubble in the Spiral Galaxy NGC 1620. *J. Patricia Vader & Brian Chaboyer.* 445, 691, 144-F1 (1995)

The Optical Counterpart to the Extremely Luminous X-Ray Source near Holmberg IX: A Possible Supershell in a Tidal Tail. *Bryan W. Miller.* 446, L75, 170-G4 (1995)

X-Rays from Superbubbles in the Large Magellanic Cloud. III. X-Ray–dim Superbubbles. *You-Hua Chu, Hsiao-wei Chang, Yu-ling Su, & Mordecai-Mark Mac Low.* 450, 157, 230-B13 (1995)

Triggered Star Formation and the Dynamics of a Superbubble in the LMC: The OB Association LH 47/48 in DEM 152. *M. S. Oey & Philip Massey.* 452, 210, 264-G11 (1995)

Hubble Space Telescope Observations of the SN 1987A Triple Ring Nebula. *Christopher J. Burrows, John Krist, J. Jeff Hester, Raghvendra Sahai, John T. Trauger, Karl R. Stapelfeldt, John S. Gallagher III, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, Richard E. Griffiths, John G. Hoessel, Jon A. Holtzman, Jeremy R. Mould, Paul A. Scowen, Alan M. Watson, & James A. Westphal.* 452, 680, 274-A11 (1995)

On the Hot Gas Fraction in Supernova Remnants. *Uffe Hellsten & Jesper Sommer-Larsen.* 453, 264, 284-F10 (1995)

Wolf-Rayet Bubbles. I. Analytic Solutions. *Guillermo García-Segura & Mordecai-Mark Mac Low.* 455, 145, 320-B13 (1995)

Wolf-Rayet Bubbles. II. Gasdynamical Situations. *Guillermo García-Segura & Mordecai-Mark Mac Low.* 455, 160, 320-D3 (1995)

ISM: CLOUDS

Numerical Models for the Collapse and Fragmentation of Centrally Condensed Molecular Cloud Cores. *Elizabeth A. Myhill & William M. Kaula.* 386, 578, 32-E4 (1992)

Self-similar Solutions and the Stability of Collapsing Isothermal Filaments. *Shu-ichiro Inutsuka & Shoken M. Miyama.* 388, 392, 55-C1 (1992)

Primordial Giant Molecular Cloud Clumps Can Be Probed—Optically. *David L. Block, J. E. Dyson, & Claus Madsen.* 390, L13, 78-C1 (1992)

On the Nature of the Molecular Cores in High-Latitude Cirrus Clouds. II. Structure, Stability, and Physical Conditions from $C^{18}O$ Observations. *B. E. Turner, Lanping Xu, & L. J Rickard.* 391, 158, 88-A7 (1992)

Ambipolar Diffusion and Star Formation: Formation and Contraction of Axisymmetric Cloud Cores. I. Formulation of the Problem and Method of Solution. *Robert A. Fiedler & Telemachos Ch. Mouschovias.* 391, 199, 88-D12 (1992)

A Source Model for the L134N Molecular Cloud. *Daryl A. Swade & F. Peter Schloerb.* 392, 543, 109-A9 (1992)

The Diffuse Interstellar Cloud toward HD 179406 (20 Aquilae). *Margaret Murray Hanson, Theodore P. Snow, & John H. Black.* 392, 571, 109-C12 (1992)

Estimates of N_2 Abundances in Dense Molecular Clouds. *M. Womack, L. M. Ziurys, & S. Wyckoff.* 393, 188, 116-D6 (1992)

Ultraviolet, Optical, and Infrared Observations of the High-Latitude Molecular Cloud toward HD 210121. *Daniel E. Welty & James R. Fowler.* 393, 193, 116-D13 (1992)

Surveys of Dense Cores for High-Velocity Gas. *Yuefang Wu, Shudong Zhou, & Neal J. Evans II.* 394, 196, 130-D9 (1992)

In Search of Evidence for Protostellar Collapse: A Systematic Study of Line Formation in Low-Mass Dense Cores. *Shudong Zhou.* 394, 204, 130-E4 (1992)

Star Formation in Protogalactic Clouds. *Douglas N. C. Lin & Stephen D. Murray.* 394, 523, 135-G8 (1992)

Evidence for Large-Scale Expanding Motions within the Orion A Molecular Cloud. *M. H. Heyer, J. Morgan, F. P. Schloerb, R. L. Snell, & P. F. Goldsmith.* 395, L99, 154-B1 (1992)

Density Structure and Star Formation in Dense Cores with Thermal and Nonthermal Motions. *P. C. Myers & G. A. Fuller.* 396, 631, 165-C1 (1992)

A High-Resolution 21 Centimeter Line Study of Infrared Cirrus. *G. Joncas, F. Boulanger, & P. E. Dewdney.* 397, 165, 170-A10 (1992)

The Unusual Cometary Star-forming Region G110−13. *Sten Odenwald, Jacqueline Fischer, Felix J. Lockman, & Sally Stemwedel.* 397, 174, 170-B9 (1992)

Models of Gas-Grain Chemistry in Dense Interstellar Clouds with Complex Organic Molecules. *Tatsuhiko I. Hasegawa, Eric Herbst, & Chun Ming Leung.* 82, 167, 51-D13 (1992)

IRAS Observations of Young Stellar Objects in the Corona Australis Dark Cloud. *Bruce A. Wilking, Thomas P. Greene, Charles J. Lada, Michael R. Meyer, & Erick T. Young.* 397, 520, 177-C9 (1992)

The Structure of Magnetic Fields in Dark Clouds: Infrared Polarimetry in B216–217. *Alyssa A. Goodman, Terry J. Jones, Elizabeth A. Lada, & Philip C. Myers.* 399, 108, 196-E3 (1992)

On the Molecular Complexity of the Hot Cores in Orion A: Grain Surface Chemistry as "The Last Refuge of the Scoundrel." *S. B. Charnley, A. G. G. M. Tielens, & T. J. Millar.* 399, L71, 201-A8 (1992)

On the Virial Theorem for Turbulent Molecular Clouds. *Christopher F. McKee & Ellen G. Zweibel.* 399, 551, 204-F7 (1992)

Fragmentation of Elongated Cylindrical Clouds. IV. Clouds with Solid-Body Rotation about an Arbitrary Axis. *Ian Bonnell, Jean-Pierre Arcoragi, Hugo Martel, & Pierre Bastien.* 400, 579, 217-E8 (1992)

Interstellar Cloud Shapes: A Minimum-Hypothesis Account Involving a Purely Gravitational Effect. *Robert C. Fleck, Jr.* 401, 146, 222-G3 (1992)

The Dynamics of Molecular Cloud Envelopes in a Varying Ultraviolet Radiation Field. *C. Bréart de Boisanger, J.-P. Chièze, & B. Meltz.* 401, 182, 223-D1 (1992)

Photometric and Spectroscopic Analysis of High Galactic Latitude Molecular Clouds. I. Distances and Extinctions of Stars toward 25 Selected Regions. *B. E. Penprase.* 83, 273, 61-E7 (1992)

CO ($J = 1$–0) Line Emission from Giant Molecular Clouds. *Mark G. Wolfire, David Hollenbach, & A. G. G. M. Tielens.* 402, 195, 3-E1 (1993)

Dust Temperature Distributions in Star-forming Condensations. *Taoling Xie, Paul F. Goldsmith, Ronald L. Snell, & Weimin Zhou.* 402, 216, 3-F11 (1993)

The Observation of Correlated Velocity Structures in a Translucent Molecular Cloud and Implications for Turbulence. *L. Magnani, T. N. LaRosa, & S. N. Shore.* 402, 226, 3-G10 (1993)

Warm Neutral Halos around Molecular Clouds. VI. Physical and Chemical Modeling. *B-G Andersson & P. G. Wannier.* 402, 585, 9-G9 (1993)

Gravitational Formation Times and Stellar Mass Distributions for Stars of Mass 0.3–30 $M_\odot$. *P. C. Myers & G. A. Fuller.* 402, 635, 10-E1 (1993)

Nonlinear Waves and Solitons in Molecular Clouds. *Fred C. Adams & Marco Fatuzzo.* 403, 142, 15-F13 (1993)

New 3 Millimeter Observations of Interstellar HNO: Reinstating a Discredited Identification. *Lewis E. Snyder, Yi-Jehng Kuan, L. M. Ziurys, & J. M. Hollis.* 403, L17, 20-C1 (1993)

158 Micron [C II] Mapping of the Orion Molecular Cloud. *G. J. Stacey, D. T. Jaffe, N. Geis, R. Genzel, A. I. Harris, A. Poglitsch, J. Stutzki, & C. H. Townes.* 404, 219, 30-E11 (1993)

A Flux-limited Treatment for the Conductive Evaporation of Spherical Interstellar Gas Clouds. *William W. Dalton & Steven A. Balbus.* 404, 625, 36-F11 (1993)

Molecular Cloud Cores in the Orion A Cloud. I. Nobeyama CS (1–0) Survey. *Ken'ichi Tatematsu, Tomofumi Umemoto, Osamu Kameya, Naomi Hirano, Tetsuo Hasegawa, Masahiko Hayashi, Takahiro Iwata, Norio Kaifu, Hitomi Mikami, Yasuhiro Murata, Makoto Nakano, Takenori Nakano, Nagayoshi Ohashi, Kazuyoshi Sunada, Hiroshi Takaba, & Satoshi Yamamoto.* 404, 643, 37-A5 (1993)

On the Nature of the Molecular Cores in High-Latitude Cirrus Clouds. III. ^{13}CO Observations and Tests of CO Chemistry Models. *B. E. Turner.* 405, 229, 44-A3 (1993)

The Internal Mass Distribution of a Giant Molecular Cloud without Star Formation. *Jonathan P. Williams & Leo Blitz.* 405, L75, 54-E1 (1993)

N_2H^+ in the Orion Ambient Ridge: Cloud Clumping versus Rotation. *Maria Womack, L. M. Ziurys, & L. J. Sage.* 406, L29, 61-A1 (1993)

Shock Propagation in a Turbulent Cloud. *Toshiya Kimura & Makoto Tosa.* 406, 512, 64-B10 (1993)

Switch Shocks in Molecular Clouds. II. Implications. *Michael D. Smith.* 406, 520, 64-C7 (1993)

Dense Cores in Dark Clouds. VIII. Velocity Gradients. *A. A. Goodman, P. J. Benson, G. A. Fuller, & P. C. Myers.* 406, 528, 64-D3 (1993)

Interstellar Deuterium in Cold Dense Clouds. *Michael Opendak.* 406, 548, 64-E12 (1993)

Warm Neutral Halos around Molecular Clouds. V. OH (1665 and 1667 MHz) Observations. *Peter G. Wannier, B-G Andersson, S. R. Federman, B. M. Lewis, Y. P. Viala, & E. Shaya.* 407, 163, 71-B1 (1993)

OH Zeeman Observations of Dark Clouds. *R. M. Crutcher, T. H. Troland, A. A. Goodman, C. Heiles, I. Kazès, & P. C. Myers.* 407, 175, 71-C1 (1993)

$^{12}C/^{13}C$ Isotope Ratio in the Local Interstellar Medium from Observations of $^{13}C^{18}O$ in Molecular Clouds. *William D. Langer & Arno A. Penzias.* 408, 539, 92-A1 (1993)

CH as a Tracer of a Translucent Cloud Boundary. *Loris Magnani & Joseph S. Onello.* 408, 559, 92-B9 (1993)

Interstellar Extinction in the Infrared: The Molecular Cloud toward HD 62542. *D. C. B. Whittet, P. G. Martin, E. L. Fitzpatrick, & D. Massa.* 408, 573, 92-C11 (1993)

A Supershell Model for the High- and Intermediate-Velocity Neutral Hydrogen Clouds. *Gerrit L. Verschuur.* 409, 205, 99-D13 (1993)

The X-Ray Shadow of the High-Latitude Molecular Cloud MBM 12. *S. L. Snowden, D. McCammon, & F. Verter.* 409, L21, 104-D1 (1993)
Modeling the Structure of H I in the Galactic Disk. *Joel N. Bregman, Daniel D. Kelson, & Gregory A. Ashe.* 409, 682, 107-D9 (1993)
The Nature of the Molecular Cores in High-Latitude Cirrus Clouds. IV. The Electron Distribution and the Abundance and Chemistry of H_2CO. *B. E. Turner.* 410, 140, 113-G8 (1993)
Collapse and Fragmentation of Molecular Cloud Cores. I. Moderately Centrally Condensed Cores. *Alan P. Boss.* 410, 157, 114-B1 (1993)
An Infrared Survey for Embedded Young Stars in the Perseus Molecular Cloud Complex. *E. F. Ladd, E. A. Lada, & P. C. Myers.* 410, 168, 114-C1 (1993)
Observation of [C II] 158 Micron Emission from the Diffuse Interstellar Medium at High Galactic Latitude. *J. Bock, V. V. Hristov, M. Kawada, H. Matsuhara, T. Matsumoto, S. Matsuura, P. D. Mauskopf, P. L. Richards, M. Tanaka, & A. E. Lange.* 410, L115, 126-D1 (1993)
On the Nature of the Molecular Cores in High-Latitude Cirrus Clouds. V. NH_3 and Its Chemistry. *B. E. Turner.* 411, 219, 129-G13 (1993)
The Formation of Protostellar Disks. I. 1 $M_\odot$. *Harold W. Yorke, Peter Bodenheimer, & Gregory Laughlin.* 411, 274, 130-E13 (1993)
Magnetic Fields in Massive Cloud Cores: Comparison of MILLIPOL and *IRAS* Results. *Brian D. Kane, Dan P. Clemens, Richard Barvainis, & Robert W. Leach.* 411, 708, 138-E1 (1993)
High-Resolution Ca II Observations of the Local Interstellar Medium. *J. V. Vallerga, P. W. Vedder, N. Craig, & B. Y. Welsh.* 411, 729, 138-F13 (1993)
The Interstellar Abundances of Tin and Four Other Heavy Elements. *L. M. Hobbs, D. E. Welty, D. C. Morton, L. Spitzer, & D. G. York.* 411, 750, 139-A13 (1993)
An Interaction Model for the Formation of Dwarf Galaxies and 10^8 $M_\odot$ Clouds in Spiral Disks. *B. G. Elmegreen, M. Kaufman, & M. Thomasson.* 412, 90, 143-B10 (1993)
Magnetohydrodynamic Wave Propagation in One-dimensional Nonhomogeneous, Self-gravitating Clouds. *Marco Fatuzzo & Fred C. Adams.* 412, 146, 143-G10 (1993)
High-Resolution Ultraviolet Observations of the Interstellar Diffuse Clouds toward μ Columbae. *Ulysses J. Sofia, Blair D. Savage, & Jason A. Cardelli.* 413, 251, 159-D3 (1993)
Cometary Globules in the Southeast Quadrant of the Rosette Nebula. *Nimesh A. Patel, Taoling Xie, & Paul F. Goldsmith.* 413, 593, 163-G7 (1993)
Can Isolated Stellar-Mass Black Holes Explain the Hard X-Ray Sources in the Galactic Center Region? *Sergio Campana & Sandro Mereghetti.* 413, L89, 168-E10 (1993)
An H II Region beyond the Optical Disk of the Galaxy. *E. J. de Geus, S. N. Vogel, S. W. Digel, & R. A. Gruendl.* 413, L97, 168-F7 (1993)
A High-Resolution H I Survey of the Rosette Nebula. *Thomas A. Kuchar & T. M. Bania.* 414, 664, 179-D12 (1993)
The Embedded Young Stars in the Taurus-Auriga Molecular Cloud. I. Models for Spectral Energy Distributions. *Scott J. Kenyon, Núria Calvet, & Lee Hartmann.* 414, 676, 179-F1 (1993)
Ambipolar Diffusion and Star Formation: Formation and Contraction of Axisymmetric Cloud Cores. II. Results. *Robert A. Fiedler & Telemachos Ch. Mouschovias.* 415, 680, 196-C7 (1993)
^{13}CO and $C^{18}O$ Maps of N-Body Magnetohydrodynamic Simulations of Dark Clouds. *Lars G. Stenholm & Ralph E. Pudritz.* 416, 218, 203-F13 (1993)
A Determination of the Distance to the High-Velocity Cloud Complex M. *Laura Danly, C. E. Albert, & K. D. Kuntz.* 416, L29, 207-D13 (1993)
Collapse of Magnetized Molecular Cloud Cores. I. Semianalytical Solution. *Daniele Galli & Frank H. Shu.* 417, 220, 220-C1 (1993)
Collapse of Magnetized Molecular Cloud Cores. II. Numerical Results. *Daniele Galli & Frank H. Shu.* 417, 243, 220-D13 (1993)
Dynamics of Conductive/Cooling Fronts: Cloud Implosion and Thermal Solitons. *A. Ferrara & Yu. Shchekinov.* 417, 595, 226-F13 (1993)
CO Emission from Molecular Clouds in the Central Region of M31. *Yoshiaki Sofue & Shigeomi Yoshida.* 417, L63, 230-B12 (1993)
Thermal Material in Dense Cores: A New Narrow-Line Probe and Technique of Temperature Determination. *G. A. Fuller & P. C. Myers.* 418, 273, 234-D9 (1993)
The Langevin Equation and Its Application to Grain Alignment in Molecular Clouds. *W. G. Roberge, T. A. DeGraff, & J. E. Flaherty.* 418, 287, 234-E11 (1993)
Proto–Brown Dwarfs. I. Methods and Results for High-Latitude Clouds. *Marc W. Pound & Leo Blitz.* 418, 328, 235-B9 (1993)
Formaldehyde as a Probe of Physical Conditions in Dense Molecular Clouds. *Jeffrey G. Mangum & Alwyn Wootten.* 89, 123, 50-E5 (1993)
A [C II] 158 Micron Line Map of the ρ Ophiuchi Cloud. *Yukari Yamashita Yui, Takao Nakagawa, Yasuo Doi, Haruyuki Okuda, Hiroshi Shibai, Tetsuo Nishimura, & Frank J. Low.* 419, L37, 252-F3 (1993)
Molecular Cloud Core and CS Outflow Associated with Haro 4-255 FIR. *Ken'ichi Tatematsu, Tomofumi Umemoto, Yasuhiro Murata, Hua Chen, Naomi Hirano, & Hiroshi Takaba.* 419, 746, 257-A1 (1993)
Detection of AU-Scale Structure in Molecular Clouds. *Alan P. Marscher, E. M. Moore, & Thomas M. Bania.* 419, L101, 259-G5 (1993)
On the Hydrodynamic Interaction of Shock Waves with Interstellar Clouds. I. Nonradiative Shocks in Small Clouds. *Richard I. Klein, Christopher F. McKee, & Philip Colella.* 420, 213, 3-E5 (1994)
The Stability of Thick, Self-gravitating Disks in Protostellar Systems. *John W. Woodward, Joel E. Tohline, & Izumi Hachisu.* 420, 247, 4-A7 (1994)
The Production of Condensed Phase CO in Quiescent Molecular Clouds. *P. Caselli, T. I. Hasegawa, & Eric Herbst.* 421, 206, 18-E5 (1994)
An Observational Estimate of the Probability of Encounters between Mass-losing Evolved Stars and Molecular Clouds. *Joel H. Kastner & P. C. Myers.* 421, 605, 25-G3 (1994)
Molecular Clouds in the Extreme Outer Galaxy. *S. Digel, E. de Geus, & P. Thaddeus.* 422, 92, 31-B13 (1994)
Nitrogen Sulfide in Quiescent Dark Clouds. *Douglas McGonagle, William M. Irvine, & Masatoshi Ohishi.* 422, 621, 39-E8 (1994)
The HH 83 Molecular Cloud: Gone with the Wind. *John Bally, Alain Castets, & Gilles Duvert.* 423, 310, 50-A3 (1994)
Comparative Analysis of the Far-Infrared and ^{13}CO (J = 0–1) Emissions of the Taurus Complex. *Alain Abergel, François Boulanger, Akira Mizuno, & Yasuo Fukui.* 423, L59, 54-A3 (1994)
On the Distance Determination and Ionization of the High-Velocity Clouds. *A. Ferrara & G. B. Field.* 423, 665, 56-G5 (1994)
Hierarchical Structure in Nearly Pressureless Flows as a Consequence of Self-similar Statistics. *Enrique Vázquez-Semadeni.* 423, 681, 57-A12 (1994)
Submillimeter Continuum Survey of the Galactic Center. *D. C. Lis & J. E. Carlstrom.* 424, 189, 64-C8 (1994)
Structure and Chemistry in the Northwestern Condensation of the Serpens Molecular Cloud Core. *Joseph P. McMullin, Lee G. Mundy, Bruce A. Wilking, T. Hezel, & Geoff A. Blake.* 424, 222, 64-F1 (1994)
On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. III. Molecular Gas. *Miguel H. Ibáñez S., & Antonio Parravano.* 424, 763, 74-C8 (1994)
Chemical Transitions for Interstellar C_2 and CN in Cloud Envelopes. *S. R. Federman, C. J. Strom, D. L. Lambert, Jason A. Cardelli, V. V. Smith, & C. L. Joseph.* 424, 772, 74-D7 (1994)
A Large Area CO(J = 2–1) Mapping of the Giant Molecular Clouds in Orion. *Seiichi Sakamoto, Masahiko Hayashi, Tetsuo Hasegawa, Toshihiro Handa, & Tomoharu Oka.* 425, 641, 89-E10 (1994)
A Rocket-borne Observation of the Far-Infrared Sky at High Galactic Latitude. *M. Kawada, J. J. Bock, V. V. Hristov, A. E. Lange, H. Matsuhara, T. Matsumoto, S. Matsuura, P. D. Mauskopf, P. L. Richards, & M. Tanaka.* 425, L89, 94-E11 (1994)
A $C^{18}O$ (J = 1–0) Survey of Protostellar Candidates Embedded in the Taurus Molecular Cloud. *Masahiko Hayashi, Tetsuo Hasegawa, Nagayoshi Ohashi, & Kazuyoshi Sunada.* 426, 234, 99-A8 (1994)
Molecular Lines in Bok Globules and around Herbig Ae/Be Stars. *F. Scappini, G. G. C. Palumbo, G. Bruni, & P. Bergman.* 427, 259, 113-B12 (1994)
Structure and Evolution of Magnetically Supported Molecular Clouds: Evidence for Ambipolar Diffusion in the Barnard 1 Cloud. *R. M. Crutcher, Telemachos Ch. Mouschovias, T. H. Troland, & Glenn E. Ciolek.* 427, 839, 123-A13 (1994)
Discovery of $^{14}NH_3(3, 3)$ Maser Emission in the Interstellar Medium. *Jeffrey G. Mangum & Alwyn Wootten.* 428, L33, 134-E8 (1994)
The Ionization of the Diffuse Ionized Gas. *H. Domgörgen & John S. Mathis.* 428, 647, 138-D1 (1994)
Determining Structure in Molecular Clouds. *Jonathan P. Williams, Eugène J. de Geus, & Leo Blitz.* 428, 693, 139-A1 (1994)
Soft Gamma-Ray Repeaters: Black Holes in Giant Molecular Clouds? *Jonathan E. Grindlay.* 92, 465, 38-A8 (1994)
Supergiant Molecular Clouds and the Formation of Globular Cluster Systems. *William E. Harris & Ralph E. Pudritz.* 429, 177, 146-C9 (1994)
A Multiwavelength Study of IRAS 19550+3248: A Protostar Possibly Formed by a Cloud-Cloud Collision. *Bon-Chul Koo, Youngung Lee, G. A. Fuller,*

Myung Gyoon Lee, Suk-Minn Kwon, & Jae-Hoon Jung. 429, 233, 147-A7 (1994)

Statistical Analysis of Turbulence in Molecular Clouds. *Mark S. Miesch & John Bally.* 429, 645, 153-F13 (1994)

Atomic and Molecular Gas in Interstellar Cirrus Clouds. *William T. Reach, Bon-Chul Koo, & Carl Heiles.* 429, 672, 154-B1 (1994)

A Large-Scale Cloud Collision in the Galactic Center Molecular Cloud Near Sagittarius B2. *Tetsuo Hasegawa, Fumio Sato, John B. Whiteoak, & Ryosuke Miyawaki.* 429, L77, 158-C1 (1994)

A Survey of the Large Magellanic Cloud in the [C II] 158 Micron Line. *Kenji Mochizuki, Takao Nakagawa, Yasuo Doi, Yukari Y. Yui, Haruyuki Okuda, Hiroshi Shibai, Masao Yui, Tetsuo Nishimura, & Frank J. Low.* 430, L37, 165-E13 (1994)

Coagulation of Grains in Static and Collapsing Protostellar Clouds. *S. J. Weidenschilling & T. V. Ruzmaikina.* 430, 713, 170-F6 (1994)

Infrared Absorption Due to Hydrogenated Amorphous Carbon in the Diffuse Interstellar Medium. *W. W. Duley.* 430, L133, 175-B5 (1994)

A Comparison of CO ($J = 1 \rightarrow 0$) and CO ($J = 2 \rightarrow 1$) Emission in the Milky Way Molecular Ring. *Jean E. Chiar, Marc L. Kutner, Frances Verter, & James Leous.* 431, 658, 186-F13 (1994)

Supercloud Formation by Gravitational Collapse of Magnetic Gas in the Crest of a Spiral Density Wave. *B. G. Elmegreen.* 433, 39, 208-F5 (1994)

Dense Cores in Dark Clouds. IX. Observations of ^{13}CO and $C^{18}O$ in Vela, Chamaeleon, Musca, and the Coalsack. *J. W. S. Vilas-Boas, P. C. Myers, & G. A. Fuller.* 433, 96, 209-D11 (1994)

A Search for Dense Gas in Quiescent Bok Globules. *Brian D. Kane, Dan P. Clemens, & Philip C. Myers.* 433, L49, 215-C9 (1994)

Simulation of Variations of Absorption-Line Profiles in Clumpy Molecular Clouds. *Alan P. Marscher & Alan L. Stone.* 433, 705, 219-G2 (1994)

The Association of High-Latitude Molecular Clouds with H I Gas. *Be-Young Gir, Leo Blitz, & Loris Magnani.* 434, 162, 227-C13 (1994)

A Massive Young Embedded Object Associated with the UC H II Region G31.41+0.31. *R. Cesaroni, L. Olmi, C. M. Walmsley, E. Churchwell, & P. Hofner.* 435, L137, 260-C3 (1994)

Gamma-Ray Observations of Ophiuchus with EGRET: The Diffuse Emission and Point Sources. *S. D. Hunter, S. W. Digel, E. J. de Geus, & G. Kanbach.* 436, 216, 264-B12 (1994)

Synthesized Spectra of Turbulent Clouds. *E. Falgarone, D. C. Lis, T. G. Phillips, A. Pouquet, D. H. Porter, & P. R. Woodward.* 436, 728, 275-E1 (1994)

H_2 Emission as a Tracer of Molecular Hydrogen: Large-Scale Observations of Orion. *M. L. Luhman, D. T. Jaffe, L. D. Keller, & Soojong Pak.* 436, L185, 282-C1 (1994)

High Altitude Molecular Clouds. *Sangeeta Malhotra.* 437, 194, 285-G8 (1994)

Modeling Radiative Transfer in Molecular Clouds. I. HCO^+ in the Star-forming Region W49A North. *Hélène R. Dickel & Lawrence H. Auer.* 437, 222, 286-C4 (1994)

The Physics and Chemistry of Small Molecular Clouds in the Galactic Plane. II. H_2CO. *B. E. Turner.* 437, 658, 294-G12 (1994)

Molecular Clouds in Cygnus. I. A Large-Scale ^{13}CO Survey. *Kazuhito Dobashi, Jean-Phillipe Bernard, Yoshinori Yonekura, & Yasuo Fukui.* 95, 419, 70-B2 (1994)

A Theory for the Initial Mass Function. *Joseph Silk.* 438, L41, 10-C13 (1995)

Hubble Space Telescope Observations of C_2 Molecules in Diffuse Interstellar Clouds. *David L. Lambert, Yaron Sheffer, & S. R. Federman.* 438, 740, 14-D11 (1995)

Multiple Star Formation in Bok Globule CB 34. *João F. Alves & João L. Yun.* 438, L107, 20-C1 (1995)

Collapse and Fragmentation of Molecular Cloud Cores. II. Collapse Induced by Stellar Shock Waves. *Alan P. Boss.* 439, 224, 24-C7 (1995)

Interstellar Clouds in High-Speed, Supersonic Flows: Two-dimensional Simulations. *A. V. R. Schiano, Wayne A. Christiansen, & Jeffrey M. Knerr.* 439, 237, 24-D9 (1995)

A Search for T Tauri Stars in High-Latitude Molecular Clouds. II. The *IRAS* Faint Source Survey Catalog. *Loris Magnani, Jean-Pierre Caillault, Ari Buchalter, & C. A. Beichman.* 96, 159, 3-F3 (1995)

Equipartition of Energy for Turbulent Astrophysical Fluids: Accounting for the Unseen Energy in Molecular Clouds. *Ellen G. Zweibel & Christopher F. McKee.* 439, 779, 35-C13 (1995)

Turbulent Diffusion and Its Effects on the Chemistry of Molecular Clouds. *Taoling Xie, Mark Allen, & William D. Langer.* 440, 674, 52-E1 (1995)

Cyanogen Excitation in Diffuse Interstellar Clouds. *Katherine C. Roth & David M. Meyer.* 441, 129, 61-B7 (1995)

Dense Gas in High-Latitude Molecular Clouds. *William T. Reach, Marc W. Pound, David J. Wilner, & Youngung Lee.* 441, 244, 62-F5 (1995)

EGRET Observations of Gamma-Ray Emission from the Interstellar Gas in Orion. *S. W. Digel, S. D. Hunter, & R. Mukherjee.* 441, 270, 63-A11 (1995)

A Turbulent Model for the Interstellar Medium. I. Threshold Star Formation and Self-Gravity. *Enrique Vázquez-Semadeni, Thierry Passot, & Annick Pouquet.* 441, 702, 71-F1 (1995)

Observations of Magnetic Fields in Diffuse Clouds. *P. C. Myers, A. A. Goodman, R. Güsten, & C. Heiles.* 442, 177, 79-E11 (1995)

On Magnetic Turbulence in Interstellar Clouds. *P. C. Myers & V. K. Khersonsky.* 442, 186, 79-F9 (1995)

The *Hubble Space Telescope* Quasar Absorption Line Key Project. X. Galactic H I 21 Centimeter Emission toward 143 Quasars and Active Galactic Nuclei. *Felix J. Lockman & Blair D. Savage.* 97, 1, 11-B1 (1995)

First Spectral Observations of the Diffuse Background with the *Extreme Ultraviolet Explorer*. *P. Jelinsky, J. V. Vallerga, & J. Edelstein.* 442, 653, 89-A8 (1995)

A New Method for Determining the CO to H_2 Conversion Factor for Translucent Clouds. *Loris Magnani & Joseph S. Onello.* 443, 169, 97-D9 (1995)

The Formation of Protostellar Disks. II. Disks around Intermediate-Mass Stars. *Harold W. Yorke, Peter Bodenheimer, & Gregory Laughlin.* 443, 199, 97-G7 (1995)

Discovery and Imaging of a Galactic Cirrus Cloud with the Far Ultraviolet Space Telescope. *Lauri K. Haikala, Kalevi Mattila, Stuart Bowyer, Timothy P. Sasseen, Michael Lampton, & Jens Knude.* 443, L33, 102-F8 (1995)

CO and OH Absorption toward the Low-Latitude Radio Source 2023+336. *Henry A. Kobulnicky, John M. Dickey, & Rachel L. Akeson.* 443, L45, 103-A9 (1995)

The Importance of Classes of Neutral-Neutral Reactions in the Production of Complex Interstellar Molecules. *R. P. A. Bettens, H.-H. Lee, & Eric Herbst.* 443, 664, 107-A12 (1995)

Diffuse Band Profiles in the ρ Ophiuchi Cloud. *C. Gregory Seab & Theodore P. Snow, Jr.* 443, 698, 107-E1 (1995)

6 Centimeter Formaldehyde Absorption toward the Sagittarius B Star-forming Complex. *David M. Mehringer, Patrick Palmer, & W. M. Goss.* 97, 497, 19-B1 (1995)

Physical Properties of Molecular Clouds in the Inner Disk of M31. *R. J. Allen, J. Le Bourlot, J. Lequeux, G. Pineau des Forêts, & E. Roueff.* 444, 157, 115-E1 (1995)

Proto–Brown Dwarfs. II. Results in the Ophiuchus and Taurus Molecular Clouds. *Marc W. Pound & Leo Blitz.* 444, 270, 117-B10 (1995)

The Implications of Gamma-Ray Lines Observed from the Orion Complex. *Ramanath Cowsik & Michael W. Friedlander.* 444, L29, 121-E8 (1995)

Optical and H I Observations of the Low-Velocity and Intermediate-Velocity Gas toward the Globular Cluster M13. *B. Bates, C. R. Shaw, S. N. Kemp, F. P. Keenan, & R. D. Davies.* 444, 672, 125-E7 (1995)

Capture Calculations for the Rates of Important Neutral-Neutral Reactions in Dense Interstellar Clouds: $C + C_2H_2$ and $CN + C_2H_2$. *Qing Liao & Eric Herbst.* 444, 694, 125-G12 (1995)

ϵ Canis Majoris and the Ionization of the Local Cloud. *J. V. Vallerga & B. Y. Welsh.* 444, 702, 126-A9 (1995)

The Physics and Chemistry of Small Molecular Clouds in the Galactic Plane. III. NH_3. *B. E. Turner.* 444, 708, 126-B4 (1995)

Fragmentation of Filamentary Molecular Clouds with Longitudinal Magnetic Fields: Formation of Disks and Their Collapse. *Fumitaka Nakamura, Tomoyuki Hanawa, & Takenori Nakano.* 444, 770, 127-B2 (1995)

Hydromagnetic Waves and the Linewidth-Size Relation in Interstellar Molecular Clouds. *Telemachos Ch. Mouschovias & Dimitrios Psaltis.* 444, L105, 131-A8 (1995)

A Cold Massive Interstellar Cloud within 120 Parsecs of the Sun: K I Optical and H I Radio Observations. *Joaquín Trapero, John E. Beckman, Miquel Serra-Ricart, Rodney D. Davies, Robert A. Watson, & Ramón J. García López.* 445, 231, 135-F9 (1995)

Diamond, Aromatic, and Aliphatic Components of Interstellar Dust Grains: Random Covalent Networks in Carbonaceous Grains. *W. W. Duley.* 445, 240, 135-G7 (1995)

Anatomy of the Gemini OB1 Molecular Cloud Complex. *John M. Carpenter, Ronald L. Snell, & F. Peter Schloerb.* 445, 246, 136-A4 (1995)

Properties of the +70 Kilometers per Second Cloud toward HD 203664. *Kenneth R. Sembach.* 445, 314, 136-G3 (1995)

Complex Molecules in Sagittarius B2(N): The Importance of Grain Chemistry. *Yanti Miao, David M. Mehringer, Yi-Jehng Kuan, & Lewis E. Snyder.* 445, L59, 141-B13 (1995)

Locations of Starbursts in M82. *Jianjun Shen & K. Y. Lo.* 445, L99, 150-G5 (1995)

Overall Distribution of Dense Molecular Gas and Star Formation in the Taurus Cloud Complex. *A. Mizuno, T. Onishi, Y. Yonekura, T. Nagahama, H. Ogawa, & Y. Fukui.* 445, L161, 152-B7 (1995)

The Line Width–Size Relation in Massive Cloud Cores. *P. Caselli & P. C. Myers.* 446, 665, 165-C7 (1995)

A Sensitive Search for Galactic High-Velocity H I Clouds. *Edward M. Murphy, Felix J. Lockman, & Blair D. Savage.* 447, 642, 185-A4 (1995)

Turbulence in Molecular Clouds. *John Dubinski, Ramesh Narayan, & T. G. Phillips.* 448, 226, 195-C6 (1995)

Interstellar Alcohols. *S. B. Charnley, M. E. Kress, A. G. G. M. Tielens, & T. J. Millar.* 448, 232, 195-D1 (1995)

A Very High Resolution Survey of Interstellar CH and CH^+. *Philippe Crane, David L. Lambert, & Yaron Sheffer.* 99, 107, 35-E7 (1995)

The Distribution of Metal-absorbing High-Velocity Clouds in the Galaxy. *David V. Bowen, J. Chris Blades, & Max Pettini.* 448, 662, 203-G10 (1995)

A Comparison of Diffuse Ionized and Neutral Hydrogen Away from the Galactic Plane: Hα-emitting H I Clouds. *R. J. Reynolds, S. L. Tufte, D. T. Kung, P. R. McCullough, & C. Heiles.* 448, 715, 204-E12 (1995)

Does Near-Infrared Polarimetry Reveal the Magnetic Field in Cold Dark Clouds? *Alyssa A. Goodman, Terry J. Jones, Elizabeth A. Lada, & Philip C. Myers.* 448, 748, 205-B4 (1995)

Infrared Diagnostics of the Formation of H_2 on Interstellar Dust. *J. Le Bourlot, G. Pineau des Forêts, E. Roueff, A. Dalgarno, & R. Gredel.* 449, 178, 212-E11 (1995)

The Physics and Chemistry of Translucent Molecular Clouds. IV. HCO^+ and N_2H^+. *B. E. Turner.* 449, 635, 221-D12 (1995)

The Distribution of Warm Dust in the Star-forming Region Cepheus A: Infrared Constraints. *Cecilia Colomé & Paul M. Harvey.* 449, 656, 221-F8 (1995)

Solid Carbonyl Sulphide (OCS) in W33A. *M. E. Palumbo, A. G. G. M. Tielens, & A. T. Tokunaga.* 449, 674, 222-A10 (1995)

Interstellar Lead. *D. E. Welty, L. M. Hobbs, J. T. Lauroesch, D. C. Morton, & D. G. York.* 449, L135, 227-C8 (1995)

VLA OH Observations of High Negative Velocity Gas toward Sagittarius A West: A High-Velocity Cloud Interacting with the Galactic Center. *Jun-Hui Zhao, W. M. Goss, & Paul T. P. Ho.* 450, 122, 229-F9 (1995)

Detection of Hot Gas in the Interstellar Medium. *Jia-Sheng Huang, Antoinette Songaila, Lennox L. Cowie, & Edward B. Jenkins.* 450, 163, 230-C8 (1995)

The Formation of Condensates on Dust in Interstellar Clouds. *W. W. Duley & R. G. Smith.* 450, 179, 230-D13 (1995)

The Mass of a Star Formed in a Cloud Core: Theory and Its Application to the Orion A Cloud. *Takenori Nakano, Tetsuo Hasegawa, & Colin Norman.* 450, 183, 230-E7 (1995)

Exponential Tails in the Centroid Velocity Distributions of Star-forming Regions. *Mark S. Miesch & John M. Scalo.* 450, L27, 235-G9 (1995)

Photoevaporation of Dusty Clouds near Active Galactic Nuclei. *Edward A. Pier & G. Mark Voit.* 450, 628, 239-D13 (1995)

The Collision Origin of Cohen's Stream. *Christopher M. Tamanaha.* 450, 638, 239-E12 (1995)

Ammonia Maser in a Molecular Outflow toward W51. *Q. Zhang & Paul T. P. Ho.* 450, L63, 244-G1 (1995)

Internal Heating of Molecular Clouds by Tidal Fields. *Mousumi Das & Chanda J. Jog.* 451, 167, 248-C11 (1995)

The Disruption of Molecular Cloud Cores by Photoionization. *J. A. Rodríguez-Gaspar, G. Tenorio-Tagle, & J. Franco.* 451, 210, 248-G10 (1995)

Collapse and Fragmentation of Molecular Cloud Cores. III. Initial Differential Rotation. *Alan P. Boss & Elizabeth A. Myhill.* 451, 218, 249-A6 (1995)

The Density Structure in the Rosette Molecular Cloud: Signposts of Evolution. *Jonathan P. Williams, Leo Blitz, & Anthony A. Stark.* 451, 252, 249-D9 (1995)

The Sagittarius B2 Star-forming Region. II. High-Resolution H66α Observations of Sagittarius B2 North. *C. G. De Pree, R. A. Gaume, W. M. Goss, & M. J. Claussen.* 451, 284, 249-G6 (1995)

Thermal Balance in Dense Molecular Clouds: Radiative Cooling Rates and Emission-Line Luminosities. *David A. Neufeld, Stephen Lepp, & Gary J. Melnick.* 100, 132, 47-F2 (1995)

Are Galaxies Optically Thin to Their Own Lyman-Continuum Radiation? I. M33. *Kanan Patel & Christine D. Wilson.* 451, 607, 255-E11 (1995)

Discovery of Highly Ionized High-Velocity Clouds toward Markarian 509. *Kenneth R. Sembach, Blair D. Savage, Limin Lu, & Edward M. Murphy.* 451, 616, 255-F12 (1995)

Mechanical Alignment of Suprathermally Rotating Grains. *A. Lazarian.* 451, 660, 256-C11 (1995)

Sequential Star Formation in OB Associations: The Role of Molecular Cloud Turbulence. *Bruce G. Elmegreen, Toshiya Kimura, & Makoto Tosa.* 451, 675, 256-E1 (1995)

Gamma Rays, Cosmic Rays, and Extinct Radioactivity in Molecular Clouds. *Donald D. Clayton & Liping Jin.* 451, 681, 256-E10 (1995)

Si Emission in a Jetlike Molecular Outflow toward L1157. *Q. Zhang, Paul T. P. Ho, M. C. H. Wright, & D. J. Wilner.* 451, L71, 260-G1 (1995)

Observational Probes of the Small-Scale Structure of Molecular Clouds. *E. M. Moore & Alan P. Marscher.* 452, 671, 273-G13 (1995)

Grain Alignment by Ambipolar Diffusion in Molecular Clouds. *W. G. Roberge, S. Hanany, & D. W. Messinger.* 453, 238, 284-D3 (1995)

X-Ray Morphology, Kinematics, and Geometry of the Eridanus Soft X-Ray Enhancement. *Z. Guo, D. N. Burrows, W. T. Sanders, S. L. Snowden, & B. E. Penprase.* 453, 256, 284-E7 (1995)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. III. Effect of the Initial Mass-to-Flux Ratio. *Shantanu Basu & Telemachos Ch. Mouschovias.* 453, 271, 284-G9 (1995)

Study of Structure and Small-Scale Fragmentation in TMC-1. *W. D. Langer, T. Velusamy, T. B. H. Kuiper, S. Levin, E. Olsen, & V. Migenes.* 453, 293, 285-B9 (1995)

The Multiphase Structure of the Galactic Halo: High-Velocity Clouds in a Hot Corona. *Mark G. Wolfire, Christopher F. McKee, David Hollenbach, & A. G. G. M. Tielens.* 453, 673, 293-B3 (1995)

The Hydrodynamics of Shock-Cloud Interactions in Three Dimensions. *Jianjun Xu & James M. Stone.* 454, 172, 301-E12 (1995)

A Multiwavelength Study of 30 Doradus: The Interstellar Medium in a Low-Metallicity Galaxy. *A. Poglitsch, A. Krabbe, S. C. Madden, T. Nikola, N. Geis, L. E. B. Johansson, G. J. Stacey, & A. Sternberg.* 454, 293, 303-C8 (1995)

Ionized Carbon in NGC 6334. *R. T. Boreiko & A. L. Betz.* 454, 307, 303-E3 (1995)

Moderate-Density Regions in the Lynds 134 Cloud Complex. *R. J. Laureijs, Y. Fukui, G. Helou, A. Mizuno, K. Imaoka, & F. O. Clark.* 101, 87, 54-A10 (1995)

Pre–Main-Sequence Evolution in the Taurus-Auriga Molecular Cloud. *Scott J. Kenyon & Lee Hartmann.* 101, 117, 54-D3 (1995)

Can Gas-Phase Radical/Neutral Reactions Account for Observed Abundances of Propynal within Dense Interstellar Clouds? *Simon Petrie.* 454, L165, 317-A9 (1995)

Time-dependent Photodissociation Regions. *David Hollenbach & Antonella Natta.* 455, 133, 320-A12 (1995)

A Gamma-Ray Monte Carlo Study of the Clumpy Debris of SN 1987A. *Adam Burrows & Kenneth A. Van Riper.* 455, 215, 321-B3 (1995)

High-Resolution Studies of Solid CO in the Taurus Dark Cloud: Characterizing the Ices in Quiescent Clouds. *J. E. Chiar, A. J. Adamson, T. H. Kerr, & D. C. B. Whittet.* 455, 234, 321-C14 (1995)

A Turbulent Model for the Interstellar Medium. II. Magnetic Fields and Rotation. *Thierry Passot, Enrique Vázquez-Semadeni, & Annick Pouquet.* 455, 536, 329-D1 (1995)

The Physics and Chemistry of Small Translucent Molecular Clouds. V. SO and SO_2. *B. E. Turner.* 455, 556, 329-E10 (1995)

ISM: COSMIC RAYS

Acoustic Instability in Cosmic-Ray Mediated Shocks. *Hyesung Kang, T. W. Jones, & Dongsu Ryu.* 385, 193, 14-D1 (1992)

The Simulated Features of Heliospheric Cosmic-Ray Modulation with a Time-dependent Drift Model. I. General Effects of the Changing Neutral Sheet over the Period 1985–1990. *M. S. Potgieter & J. A. Le Roux.* 386, 336, 28-D4 (1992)

Gamma-Ray Bursts and Cosmic Rays from Accretion-induced Collapse. *Arnon Dar, Ben Zion Kozlowski, Shmuel Nussinov, & Reuven Ramaty.* 388, 164, 51-A11 (1992)

Propagation of Cosmic-Ray Nuclei in a Diffusing Galaxy with Convective Halo and Thin Matter Disk. *W. R. Webber, M. A. Lee, & M. Gupta.* 390, 96, 75-C3 (1992)

Cosmic Rays from the Galactic Center: Path Length Distributions and Galactic Gradient in a Modified Model. *T. Wibig.* 390, 105, 75-D1 (1992)

The Simulated Features of Heliospheric Cosmic-Ray Modulation with a Time-dependent Drift Model. II. On the Energy Dependence of the Onset of New Modulation in 1987. *J. A. Le Roux & M. S. Potgieter.* 390, 661, 83-E1 (1992)

The Isotopic Composition of Iron-Group Cosmic Rays. *Richard A. Leske, Barrett Milliken, & Mark E. Wiedenbeck.* 390, L99, 85-C7 (1992)

Evidence for Neutral Emission above 10^{17} eV from LMC X-4. *R. Meyhandan, B. R. Dawson, R. W. Clay, L. Horton, J. Ulrichs, & M. M. Winn.* 391, 236, 88-G11 (1992)

The Isotopic Composition of Cosmic-Ray B, C, N, and O: Evidence for an Overabundance of ^{18}O. *P. S. Gibner, R. A. Mewaldt, S. M. Schindler, E. C. Stone, & W. R. Webber.* 391, L89, 99-G5 (1992)

On the Form of the 1987 Hydrogen Spectrum in the Outer Heliosphere. *J. P. L. Reinecke & H. Moraal.* 392, 272, 104-D1 (1992)

The Simulated Features of Heliospheric Cosmic-Ray Modulation with a Time-dependent Drift Model. III. General Energy Dependence. *M. S. Potgieter & J. A. Le Roux.* 392, 300, 104-F5 (1992)

Studies of the Low-Energy Galactic Cosmic-Ray Composition near 28 AU at Sunspot Minimum: The Primary-to-Primary Ratios. *W. R. Webber, P. Ferrando, A. Lukasiak, & F. B. McDonald.* 392, L91, 113-F1 (1992)

The Diffuse Gamma-Ray Background, Light Element Abundances, and Signatures of Early Massive Star Formation. *Joseph Silk & David N. Schramm.* 393, L9, 120-B7 (1992)

Probing the Heliosphere with Energetic Hydrogen Atoms. *K. C. Hsieh, K. L. Shih, J. R. Jokipii, & S. Grzedzielski.* 393, 756, 125-C1 (1992)

Cosmic-Ray Secondary Antiprotons: A Closer Look. *Thomas K. Gaisser & Robert K. Schaefer.* 394, 174, 130-B10 (1992)

Viscous and Inertial Effects at Cosmic-Ray Shocks. *J. R. Jokipii & L. L. Williams.* 394, 184, 130-C8 (1992)

Wave Diffraction in Weak Cosmic-Ray–modified Shocks. *G. M. Webb & G. P. Zank.* 396, 549, 164-C9 (1992)

Cosmic-Ray–modified Supernova Remnant Shocks. *T. W. Jones & Hyesung Kang.* 396, 575, 164-E9 (1992)

Search for 100 TeV γ-Ray Emission from the Galactic Disk. *M. Aglietta, B. Alessandro, F. Arneodo, L. Bergamasco, A. Campos Fauth, C. Castagnoli, A. Castellina, C. Cattadori, A. Chiavassa, G. Cini, B. D'Ettorre Piazzoli, W. Fulgione, P. Galeotti, P. L. Ghia, G. Mannocchi, C. Morello, G. Navarra, L. Riccati, O. Saavedra, G. C. Trinchero, P. Vallania, & S. Vernetto.* 397, 148, 169-G4 (1992)

An Estimate of the Local Interstellar Antiproton Spectrum Using Solar Modulation Techniques on the Data. *J. S. Perko.* 397, 153, 169-G10 (1992)

The Simulated Features of Heliospheric Cosmic-Ray Modulation with a Time-dependent Drift Model. IV. The Role of Heliospheric Neutral Sheet Deformation. *J. A. Le Roux & M. S. Potgieter.* 397, 686, 179-E11 (1992)

On "High Flyers" in Fermi Acceleration. *Lewis Ball, D. B. Melrose, & C. A. Norman.* 398, L65, 188-B7 (1992)

Cosmic Rays from the Galactic Center: Electron and Positron Fluxes in a Modified Model. *Tadeusz Wibig.* 398, 507, 190-D9 (1992)

A Comparison of Models for Supernova Remnants Including Cosmic Rays. *Hyesung Kang & L. O'C. Drury.* 399, 182, 197-D11 (1992)

Discovery of a Synchrotron-emitting Halo around NGC 253. *C. L. Carilli, M. A. Holdaway, P. T. P. Ho, & C. G. De Pree.* 399, L59, 200-F8 (1992)

Electron Acceleration in Tycho's and Kepler's Supernova Remnants: Spectral Evidence of Fermi Shock Acceleration. *Stephen P. Reynolds & Donald C. Ellison.* 399, L75, 201-B1 (1992)

Reaction Rate and Energy-Loss Rate for Photopair Production by Relativistic Nuclei. *Michał J. Chodorowski, Andrzej A. Zdziarski, & Marek Sikora.* 400, 181, 211-B9 (1992)

Magnetohydrodynamic Wave Damping by Cosmic-Ray Viscosity. *Ahmed Boulares & Gregor Morfill.* 400, 622, 218-B6 (1992)

Observations of the Large Magellanic Cloud in High-Energy Gamma Rays. *P. Sreekumar, D. L. Bertsch, B. L. Dingus, C. E. Fichtel, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, K. Pinkau, E. J. Schneid, & D. J. Thompson.* 400, L67, 220-E1 (1992)

Fast Dynamos, Cosmic Rays, and the Galactic Magnetic Field. *E. N. Parker.* 401, 137, 222-F7 (1992)

Monte Carlo Calculations of Cosmic Rays in the Galaxy: Effect of the Source Distribution on the Age and Matter Distributions. *W. R. Webber.* 402, 185, 3-D1 (1993)

The Cosmic-Ray Path Length (Age) Distribution in the Galaxy: Experimental Limits on the Deviation from an Exponential. *W. R. Webber.* 402, 188, 3-D6 (1993)

Cosmic-Ray Acceleration during the Impact of Shocks on Dense Clouds. *T. W. Jones & Hyesung Kang.* 402, 560, 9-E1 (1993)

The Telegraph Equation in Charged Particle Transport. *T. I. Gombosi, J. R. Jokipii, J. Kota, K. Lorencz, & L. L. Williams.* 403, 377, 18-E1 (1993)

Production and Evolution of LiBeB Isotopes in the Galaxy. *N. Prantzos, M. Casse, & E. Vangioni-Flam.* 403, 630, 23-D12 (1993)

Dependence of the Interstellar Propagation of Ultraheavy Cosmic-Ray Nuclei on Various Parameters. *Robert R. Clinton & C. Jake Waddington.* 403, 644, 23-F1 (1993)

Elemental Abundances in the Local Cosmic Rays at High Energies. *Simon P. Swordy, Jacques L'Heureux, Peter Meyer, & Dietrich Müller.* 403, 658, 23-G3 (1993)

The Role of Merged Interaction Regions and Drifts in the Heliospheric Modulation of Cosmic Rays beyond 20 AU: A Computer Simulation. *M. S. Potgieter, J. A. Le Roux, L. F. Burlaga, & F. B. McDonald.* 403, 760, 25-C1 (1993)

Far-Infrared Investigations of a Methanol Clathrate Hydrate: Implications for Astronomical Observations. *Reggie L. Hudson & Marla H. Moore.* 404, L29, 33-G1 (1993)

The Stability of Cosmic-Ray–dominated Shocks: A Secondary Instability. *Dongsu Ryu, Hyesung Kang, & T. W. Jones.* 405, 199, 43-E7 (1993)

Cosmic-Ray Anisotropies and Gradients in Three Dimensions. *Jiasheng Chen & John W. Bieber.* 405, 375, 45-G3 (1993)

Beryllium and Boron Constraints on an Early Galactic Bright Phase. *Brian D. Fields, David N. Schramm, & James W. Truran.* 405, 559, 50-A7 (1993)

The Elemental and Isotopic Composition of Galactic Cosmic-Ray Nuclei from Scandium through Nickel. *Richard A. Leske.* 405, 567, 50-B1 (1993)

The Gradient of Galactic Cosmic Rays at the Solar-Wind Termination Shock. *J. R. Jokipii, J. Kóta, & E. Merényi.* 405, 782, 52-G1 (1993)

A Unified Transport Equation for Both Cosmic Rays and Thermal Particles. *L. L. Williams, N. Schwadron, J. R. Jokipii, & T. I. Gombosi.* 405, L79, 54-E7 (1993)

Cosmic-Ray Modulation, Merged Interaction Regions, and Multifractals. *L. F. Burlaga, J. Perko, & J. Pirraglia.* 407, 347, 73-D3 (1993)

Quasi-linear Theory and the Phenomenology of Interplanetary Solar Particle Transport. *Wolfgang Dröge, Ulrich Achatz, Wolfgang Wanner, Reinhard Schlickeiser, & Gerd Wibberenz.* 407, L95, 82-G1 (1993)

η Carinae: A New Model. *J. M. Borgwald & M. W. Friedlander.* 408, 230, 86-A3 (1993)

Magnetic Field Power Density Spectra during "Scatter-free" Solar Particle Events. *L. C. Tan & G. M. Mason.* 409, L29, 104-E1 (1993)

Cross Section Parameterizations for Cosmic-Ray Nuclei. I. Single Nucleon Removal. *John W. Norbury & Lawrence W. Townsend.* 86, 307, 18-A11 (1993)

Solar Neutron and Proton Production during the 1990 May 24 Cosmic-Ray Flare Increases. *H. Debrunner, J. A. Lockwood, & J. M. Ryan.* 409, 822, 109-D1 (1993)

Ionization States of Low-Energy Cosmic Rays: Results from Spacelab 3 Cosmic-Ray Experiment. *A. Dutta, J. N. Goswami, S. Biswas, N. Durgaprasad, B. Mitra, & R. K. Singh.* 411, 418, 132-F1 (1993)

Spatial and Temporal Distributed Acceleration of Cosmic Rays by Supernova Remnants: Three-dimensional Simulations. *G. A. Medina Tanco & R. Opher.* 411, 690, 138-C8 (1993)

The Cosmic-Ray ^{3}He/^{4}He Ratio from 100 to 1600 MeV amu^{-1}. *J. J. Beatty, D. J. Ficenec, S. Tobias, J. W. Mitchell, S. McKee, S. Nutter, G. Tarlé, A. Tomasch, J. Clem, T. G. Guzik, M. Lijowski, J. P. Wefel, C. R. Bower, R. M. Heinz, S. L. Mufson, J. Musser, J. J. Pitts, G. M. Spiczak, S. P. Ahlen, & B. Zhou.* 413, 268, 159-E8 (1993)

Cosmic-Ray–dominated Dense Molecular Gas in Normal and Starburst Galaxies. *Anatoly Suchkov, Ronald J. Allen, & Timothy M. Heckman.* 413, 542, 163-C1 (1993)

Alfvén Wave Transport Effects in the Time Evolution of Parallel Cosmic-Ray–modified Shocks. *T. W. Jones.* 413, 619, 164-C1 (1993)

Comparison of Distributed Reacceleration and Leaky-Box Models of Cosmic-Ray Abundances ($3 \leq Z \leq 28$). *John R. Letaw, Rein Silberberg, & C. H. Tsao.* 414, 601, 178-F6 (1993)

Direct Evidence of the Interplanetary Magnetic Field Effect on the Cosmic-Ray Shadow by the Sun. *M. Amenomori, Z. Cao, L. K. Ding, Z. Y. Feng, K. Hibino, N. Hotta, Q. Huang, A. X. Huo, H. G. Jia, G. Z. Jiang, S. Q. Jiao, F. Kajino, K. Kasahara, Labaciren, D. M. Mei, L. Meng, X. R. Meng, Mimaciren, K. Mizutani, J. Mu, H. Nanjo, M. Nishizawa, Nusang, A. Oguro, M. Ohnishi, I. Ohta, T. Ouchi, J. R. Ren, T. Saito, M. Sakata, Z. Z. Shi, M. Shibata, T. Shirai, H. Sugimoto, X. X. Sun, K. Taira, Y. H. Tan, N. Tateyama, S. Torii, H. Wang, C. Z. Wen, Y. Yamamoto, X. Y. Yao, G. C. Yu, P. Yuan, T. Yuda, J. G. Zeng, C. S. Zhang, H. M. Zhang, L. Zhang, Zhasang, Zhaxiciren, & W. D. Zhou (The Tibet ASγ Collaboration).* 415, L147, 200-G1 (1993)

The Crab Nebula's Cosmic-Ray Acceleration Zone Revealed. *P. P. Kronberg, H. Lesch, P. F. Ortiz, & M. F. Bietenholz.* 416, 251, 204-B13 (1993)

Diffuse Gamma-Ray Emission in the Galactic Plane from Cosmic-Ray, Matter, and Photon Interactions. *D. L. Bertsch, T. M. Dame, C. E. Fichtel, S. D. Hunter, P. Sreekumar, J. G. Stacy, & P. Thaddeus.* 416, 587, 210-F6 (1993)

A Single-Fluid, Self-consistent Formulation of Fluid Dynamics and Particle Transport. *L. L. Williams & J. R. Jokipii.* 417, 725, 228-D5 (1993)

High-Resolution Spectroscopy of Balmer-dominated Shocks in the Large Magellanic Cloud. *R. Chris Smith, John C. Raymond, & J. Martin Laming.* 420, 286, 4-D7 (1994)

Proton and Electron Mean Free Paths: The Palmer Consensus Revisited. *John W. Bieber, William H. Matthaeus, Charles W. Smith, Wolfgang Wanner, May-Britt Kallenrode, & Gerd Wibberenz.* 420, 294, 4-E5 (1994)

Enhanced Cosmic-Ray Acceleration Rates in Highly Inclined Astrophysical Shocks. *R. Lieu, J. J. Quenby, B. Drolias, & K. Naidu.* 421, 211, 18-E11 (1994)

Cross Section Parameterizations for Cosmic-Ray Nuclei. II. Double Nucleon Removal. *John W. Norbury & Cindy M. Mueller.* 90, 115, 2-D11 (1994)

Monte Carlo Simulations of Particle Acceleration at Oblique Shocks. *Matthew G. Baring, Donald C. Ellison, & Frank C. Jones.* 90, 547, 10-E6 (1994)

Transport of Solar Energetic Particles. *Wolfgang Dröge.* 90, 567, 10-G3 (1994)

On the Asymmetry of the Distribution of the Anomalous Cosmic-Ray Component in the Heliosphere. *Horst Fichtner, S. Ranga Sreenivasan, Hans-Jörg Fahr, Daniel Rucinski, & Stanislaw Grzedzielski.* 90, 595, 11-B9 (1994)

Evolution of Supernova Remnants with Cosmic Rays and Radiative Cooling. *E. A. Dorfi.* 90, 841, 14-B14 (1994)

Cosmic-Ray Transport and Acceleration. *Reinhard Schlickeiser.* 90, 929, 15-D1 (1994)

The Origins of High-Energy Cosmic Rays. *W. I. Axford.* 90, 937, 15-D11 (1994)

Time-dependent Simulation of Cosmic-Ray Shocks, Including Alfvén Transport. *T. W. Jones.* 90, 969, 15-G10 (1994)

Oblique Magnetohydrodynamic Cosmic-Ray–modified Shocks: Two-Fluid Numerical Simulations. *Adam Frank, T. W. Jones, & Dongsu Ryu.* 90, 975, 16-A4 (1994)

Bohm Diffusion and Cosmic-Ray–Modified Shocks. *Peter Duffy.* 90, 981, 16-A12 (1994)

The Isotopic Composition of Cosmic-Ray Beryllium and Its Implication for the Cosmic Ray's Age. *A. Lukasiak, P. Ferrando, F. B. McDonald, & W. R. Webber.* 423, 426, 51-D5 (1994)

The Long-Term Heliospheric Modulation of Galactic Cosmic Rays according to a Time-dependent Drift Model with Merged Interaction Regions. *M. S. Potgieter & J. A. Le Roux.* 423, 817, 58-G6 (1994)

Green's Formula and Variational Principles for Cosmic-Ray Transport with Application to Rotating and Shearing Flows. *G. M. Webb, J. R. Jokipii, & G. E. Morfill.* 424, 158, 64-A1 (1994)

Time-dependent Evolution of Cosmic-Ray–modified Shock Structure: Transition to Steady State. *D. J. Donohue, G. P. Zank, & G. M. Webb.* 424, 263, 65-B9 (1994)

The Cosmic-Ray Energy Spectrum Observed by the Fly's Eye. *D. J. Bird, S. C. Corbató, H. Y. Dai, B. R. Dawson, J. W. Elbert, B. L. Emerson, K. D. Green, M. A. Huang, D. B. Kieda, M. Luo, S. Ko, C. G. Larsen, E. C. Loh, M. H. Salamon, J. D. Smith, P. Sokolsky, P. Sommers, J. K. K. Tang, & S. B. Thomas.* 424, 491, 67-G13 (1994)

Neutrino Process Nucleosynthesis and the $^{11}B/^{10}B$ Ratio. *Keith A. Olive, Nikos Prantzos, Sean Scully, & Elisabeth Vangioni-Flam.* 424, 666, 73-B7 (1994)

Heavy-Ion Isotopic Anomalies in ^{3}He-rich Solar Particle Events. *G. M. Mason, J. E. Mazur, & D. C. Hamilton.* 425, 843, 92-C5 (1994)

A Study of M31, M87, NGC 253, and M82 in High-Energy Gamma Rays. *P. Sreekumar, D. L. Bertsch, B. L. Dingus, J. A. Esposito, C. E. Fichtel, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, E. J. Schneid, & D. J. Thompson.* 426, 105, 97-D1 (1994)

Cosmic-Ray Isotopic Composition of C, N, O, Ne, Mg, Si Nuclei in the Energy Range 50–200 MeV per Nucleon Measured by the *Voyager* Spacecraft during the Solar Minimum Period. *A. Lukasiak, P. Ferrando, F. B. McDonald, & W. R. Webber.* 426, 366, 100-F10 (1994)

Are Cosmic Rays Effective for Ionization of Protoplanetary Disks? *Arkady Z. Dolginov & Tomasz F. Stepinski.* 427, 377, 114-E3 (1994)

Coherent Pulses in the Diffusive Transport of Charged Particles. *J. Kóta.* 427, 1035, 125-D13 (1994)

A Search for Astrophysical Sources of Low-Energy Neutrinos Using the IMB Detector. *R. S. Miller, R. Becker-Szendy, C. B. Bratton, J. Breault, D. Casper, S. T. Dye, W. Gajewski, M. Goldhaber, T. J. Haines, P. G. Halverson, D. Kielczewska, W. R. Kropp, J. G. Learned, J. LoSecco, S. Matsuno, J. Matthews, G. McGrath, C. McGrew, L. Price, F. Reines, J. Schultz, D. Sinclair, H. W. Sobel, J. L. Stone, L. R. Sulak, R. Svoboda, & J. C. van der Velde.* 428, 629, 138-B1 (1994)

INTEGRAL, SNOBs, and Baryonic Dark Matter. *Gerard Gilmore.* 92, 539, 39-A8 (1994)

Cosmic Rays and Gamma Rays in Early Galaxian Phases and the Cosmic Gamma-Ray Background. *N. Prantzos & M. Casse.* 92, 575, 39-D12 (1994)

Energy Transport by Relativistic Neutrons from the Core of Active Galactic Nuclei. *W. Tkaczyk.* 92, 611, 40-A7 (1994)

Diffusive Shock Acceleration in the Presence of Current Sheets. *J. Kóta & J. R. Jokipii.* 429, 385, 148-G8 (1994)

Search for 10 TeV Gamma-Ray Emission from Active Galactic Nuclei with the Tibet Air Shower Array. *M. Amenomori, Z. Cao, B. Z. Dai, L. K. Ding, Y. X. Feng, Z. Y. Feng, K. Hibino, N. Hotta, Q. Huang, A. X. Huo, H. Y. Jia, G. Z. Jiang, S. Q. Jiao, F. Kajino, K. Kasahara, Labaciren, S. M. Liu, D. M. Mei, L. Meng, X. R. Meng, Mimaciren, K. Mizutani, J. Mu, H. Nanjo, M. Nishizawa, A. Oguro, M. Ohnishi, I. Ohta, T. Ouchi, J. R. Ren, To. Saito, M. Sakata, Z. Z. Shi, M. Shibata, T. Shirai, H. Sugimoto, X. X. Sun, K. Taira, Y. H. Tan, N. Tateyama, S. Torii, H. Wang, C. Z. Wen, Y. Yamamoto, G. C. Yu, P. Yuan, T. Yuda, C. S. Zhang, H. M. Zhang, L. Zhang, Zhasang, Zhaxiciren, & W. D. Zhou (The Tibet ASγ Collaboration).* 429, 634, 153-E11 (1994)

A New Measurement of the Flux of the Light Cosmic-Ray Nuclei at High Energies. *J. Buckley, J. Dwyer, D. Müller, S. Swordy, & K. K. Tang.* 429, 736, 154-G3 (1994)

The Evolution of Cosmic-Ray–mediated Magnetohydrodynamic Shocks: A Two-Fluid Approach. *Byung-Il Jun, David A. Clarke, & Michael L. Norman.* 429, 748, 155-A3 (1994)

New Measurements of Charge-changing Cross Sections in Carbon and Hydrogen Targets above 2 GeV per Nucleon: Evidence for an Energy Dependence That May Strongly Affect Estimates of the Energy Dependence of Cosmic-Ray Diffusion in the Galaxy. *W. R. Webber, W. R. Binns, D. Crary, & M. Westphall.* 429, 764, 155-B9 (1994)

Gamma Rays from Grazing Incidence Cosmic Rays in the Earth's Atmosphere. *Andrew Ulmer.* 429, L95, 158-E3 (1994)

Voyager Measurements of the Isotopic Composition of Cosmic-Ray Aluminum and Implications for the Propagation of Cosmic Rays. *A. Lukasiak, F. B. McDonald, & W. R. Webber.* 430, L69, 166-B8 (1994)

Charged-Particle Motion in Multidimensional Magnetic Field Turbulence. *J. Giacalone & J. R. Jokipii.* 430, L137, 175-B10 (1994)

Acoustic Instability Driven by Cosmic-Ray Streaming. *Mitchell C. Begelman & Ellen G. Zweibel.* 431, 689, 187-B6 (1994)

Stochastic Reacceleration of Cosmic Rays in the Interstellar Medium. *E. S. Seo & V. S. Ptuskin.* 431, 705, 187-C10 (1994)

Cosmic Bullets as Particle Accelerators and Radio Sources. *T. W. Jones, Hyesung Kang, & I. L. Tregillis.* 432, 194, 195-E11 (1994)

Study of Cosmic-Ray H and He Isotopes at 23 AU. *E. S. Seo, F. B. McDonald, N. Lal, & W. R. Webber.* 432, 656, 204-B11 (1994)

Cosmic-Ray Models for Early Galactic Lithium, Beryllium, and Boron Production. *Brian D. Fields, Keith A. Olive, & David N. Schramm.* 435, 185, 245-G9 (1994)

The Cosmic-Ray Oxygen and Helium Spectra Measured at *Pioneer 10* over the Time of the 1987 Modulation Minimum, and Implications for the He/O Source Ratio. *W. R. Webber & F. B. McDonald.* 435, 464, 249-G2 (1994)

Gamma-Ray Observations of Ophiuchus with EGRET: The Diffuse Emission and Point Sources. *S. D. Hunter, S. W. Digel, E. J. de Geus, & G. Kanbach.* 436, 216, 264-B12 (1994)

Observations of Cosmic-Ray Electrons and Positrons Using an Imaging Calorimeter. *R. L. Golden, C. Grimani, B. L. Kimbell, S. A. Stephens, S. J. Stochaj, W. R. Webber, G. Basini, F. Bongiorno, F. Massimo Brancaccio, M. Ricci, J. F. Ormes, R. E. Streitmatter, P. Papini, P. Spillantini, M. T. Brunetti, A. Codino, M. Menichelli, I. Salvatori, M. P. De Pascale, A. Morselli, & P. Picozza.* 436, 769, 276-B2 (1994)

Galactic Cosmic-Ray Mediation of a Spherical Solar Wind Flow. I. The Steady State Cold Gas Hydrodynamical Approximation. *J. A. le Roux & V. S. Ptuskin.* 438, 427, 7-D2 (1995)

On Purported Observations of Partially Ionized Galactic Cosmic Rays. *A. J. Tylka, P. R. Boberg, J. H. Adams, Jr., T. Kleis, & R. Beaujean.* 438, L83, 19-G1 (1995)

Implications of a High Population II B/Be Ratio. *Brian D. Fields, Keith A. Olive, & David N. Schramm.* 439, 854, 36-D7 (1995)

Detection of a Cosmic Ray with Measured Energy Well beyond the Expected Spectral Cutoff due to Cosmic Microwave Radiation. *D. J. Bird, S. C. Corbató, H. Y. Dai, J. W. Elbert, K. D. Green, M. A. Huang, D. B. Kieda, S. Ko, C. G. Larsen, E. C. Loh, M. Z. Luo, M. H. Salamon, J. D. Smith, P. Sokolsky, P. Sommers, J. K. K. Tang, & S. B. Thomas.* 441, 144, 61-C12 (1995)

In Search of a Source for the 320 EeV Fly's Eye Cosmic Ray. *Jerome W. Elbert & Paul Sommers.* 441, 151, 61-D9 (1995)

Propagation of Galactic Cosmic Rays under Diffusive Reacceleration. *U. Heinbach & M. Simon.* 441, 209, 62-C4 (1995)

Time-dependent Simulation of Oblique MHD Cosmic-Ray Shocks Using the Two-Fluid Model. *Adam Frank, T. W. Jones, & Dongsu Ryu.* 441, 629, 70-F11 (1995)

Contact and Pressure Balance Structures in Two-Fluid Cosmic-Ray Hydrodynamics. *G. M. Webb, M. Brio, G. P. Zank, & T. Story.* 442, 822, 91-E2 (1995)

The Simulation of Complete 11 and 22 Year Modulation Cycles for Cosmic Rays in the Heliosphere Using a Drift Model with Global Merged Interaction Regions. *J. A. le Roux & M. S. Potgieter.* 442, 847, 91-G3 (1995)

An Estimate of the Location of the Modulation Boundary for $E > 70$ MeV Galactic Cosmic Rays Using *Voyager* and *Pioneer* Spacecraft Data. *J. A. Lockwood & W. R. Webber.* 442, 852, 91-G12 (1995)

Effect of Adiabatic Deceleration on the Focused Transport of Solar Cosmic Rays. *D. Ruffolo.* 442, 861, 92-A12 (1995)

Charge State of Anomalous Cosmic-Ray Nitrogen, Oxygen, and Neon: *SAMPEX* Observations. *B. Klecker, M. C. McNab, J. B. Blake, D. C. Hamilton, D. Hovestadt, H. Kästle, M. D. Looper, G. M. Mason, J. E. Mazur, & M. Scholer.* 442, L69, 94-F9 (1995)

Parameterization of Spectral Distributions for Pion and Kaon Production in Proton-Proton Collisions. *John P. Schneider, John W. Norbury, & Frank A. Cucinotta.* 97, 571, 20-A1 (1995)

On the Value of GEMS (Glass with Embedded Metal and Sulphides). *P. G. Martin.* 445, L63, 141-C8 (1995)

A Localized Excess of Diffuse Gamma Radiation. *A. Chen, J. Dwyer, & P. Kaaret.* 445, L109, 151-A9 (1995)

Pioneer 10 and *Voyager 1* Observations of Anomalous Cosmic-Ray Hydrogen in the Outer Heliosphere. *Frank B. McDonald, Andrew Lukasiak, & William R. Webber.* 446, L101, 171-D1 (1995)

Observations of Anomalous Cosmic-Ray Hydrogen from the *Voyager* Spacecraft. *E. R. Christian, A. C. Cummings, & E. C. Stone.* 446, L105, 171-D9 (1995)

Limits on Galactic Gamma-Ray Lines at 4.44 MeV and 6.13 MeV from Nuclear De-Excitation. *Michael J. Harris, Gerald H. Share, & Daniel C. Messina.* 448, 157, 194-C8 (1995)

Possible Association of Ultra–High-Energy Cosmic-Ray Events with Strong Gamma-Ray Bursts. *Mordehai Milgrom & Vladimir Usov.* 449, L37, 216-E10 (1995)

Cosmic-Ray H and He Isotopes in the Outer Heliosphere in 1994. *E. S. Seo & F. B. McDonald.* 451, L33, 252-E12 (1995)

Gamma Rays, Cosmic Rays, and Extinct Radioactivity in Molecular Clouds. *Donald D. Clayton & Liping Jin.* 451, 681, 256-E10 (1995)

Galactic Cosmic-Ray Mediation of a Spherical Solar Wind Flow. II. The Steady State Hydromagnetic Approximation. *J. A. le Roux & V. S. Ptuskin.* 452, 423, 267-G11 (1995)

Cosmological Origin for Cosmic Rays above 10^{19} eV. *Eli Waxman.* 452, L1, 269-C1 (1995)

Charge State Measurements of Solar Energetic Particles Observed with *SAMPEX*. *G. M. Mason, J. E. Mazur, M. D. Looper, & R. A. Mewaldt.* 452, 901, 277-B7 (1995)

Acceleration Rates and Injection Efficiencies in Oblique Shocks. *Donald C. Ellison, Matthew G. Baring, & Frank C. Jones.* 453, 873, 296-A7 (1995)

The Acceleration of Ultra–High-Energy Cosmic Rays in Gamma-Ray Bursts. *Mario Vietri.* 453, 883, 296-B6 (1995)

The Origin of Cosmic Rays above $10^{18.5}$ eV. *Colin A. Norman, Donald B. Melrose, & Abraham Achterberg.* 454, 60, 300-A12 (1995)

Comparison of Three Numerical Treatments of Charged Particle Transport. *J. A. Earl, D. Ruffolo, H. L. Pauls, & J. W. Bieber.* 454, 749, 312-A13 (1995)

Extragalactic Magnetic Field and the Highest Energy Cosmic Rays. *Sangjin Lee, Angela V. Olinto, & Günter Sigl.* 455, L21, 324-E8 (1995)

ISM: DUST, EXTINCTION

An Infrared Study of Three Wolf-Rayet Ring Nebulae. *J. S. Mathis, J. P. Cassinelli, K. A. van der Hucht, T. Prusti, P. R. Wesselius, & P. M. Williams.* 384, 197, 3-D5 (1992)

Dust and Extinction in the Planetary Nebula NGC 7027. *Charles E. Woodward, Judith L. Pipher, W. J. Forrest, Andrea Moneti, & Mark A. Shure.* 385, 567, 20-B12 (1992)

Temperature Dependence of Infrared Bands Produced by Polycyclic Aromatic Hydrocarbons. *L. Colangeli, V. Mennella, & E. Bussoletti.* 385, 577, 20-C10 (1992)

Infrared Observations and Thermal Models of the β Pictoris Disk. *D. E. Backman, F. C. Gillett, & F. C. Witteborn.* 385, 670, 21-D8 (1992)

The First Spectropolarimetric Study of the Wavelength Dependence of Interstellar Polarization in the Ultraviolet. *Geoffrey C. Clayton, Christopher M. Anderson, Antonio Mario Magalhães, Arthur D. Code, Kenneth H. Nordsieck, Marilyn R. Meade, Michael J. Wolff, Brian Babler, Karen S. Bjorkman, Regina E. Schulte-Ladbeck, MaryJane Taylor, & Barbara A. Whitney.* 385, L53, 23-D7 (1992)

Physical Properties of Neutral Gas in M31 and the Galaxy. *Robert Braun & René A. M. Walterbos.* 386, 120, 25-E10 (1992)

Systematic Variations in the Wavelength Dependence of Interstellar Linear Polarization. *D. C. B. Whittet, P. G. Martin, J. H. Hough, M. F. Rouse, J. A. Bailey, & D. J. Axon.* 386, 562, 32-C14 (1992)

Extended Red Emission from Dust in Planetary Nebulae. *D. G. Furton & A. N. Witt.* 386, 587, 32-F1 (1992)

On Graphite and the Variations in the Ultraviolet Extinction Curve. *Per A. Aannestad.* 386, 627, 33-B5 (1992)

Interstellar Matter in Early-Type Galaxies. II. The Relationship between Gaseous Components and Galaxy Types. *Joel N. Bregman, David E. Hogg, & Morton S. Roberts.* 387, 484, 44-F9 (1992)

Dust within Globular Clusters: A Large Bubble in NGC 6624? *Juan C. Forte, Sergio A. Cellone, Mariano Méndez, & E. Irene Vega.* 388, 383, 55-B4 (1992)

Mass Loss from OH/IR Stars: Models for the Infrared Emission of Circumstellar Dust Shells. *K. Justtanont & A. G. G. M. Tielens.* 389, 400, 64-G10 (1992)

Quasar Absorption Lines with a Nonzero Cosmological Constant. *Edwin L. Turner & Satoru Ikeuchi.* 389, 478, 67-D7 (1992)

Thermal Dust Imaging: The Onset of Asymmetry in the Ultracompact H II Region G5.89−0.39. *Roger Ball, John F. Arens, J. Garrett Jernigan, Eric Keto, & Margaret M. Meixner.* 389, 616, 69-B1 (1992)

Extinction in Low-Ionization Broad Absorption Line Quasi-stellar Objects. *David Sprayberry & Craig B. Foltz.* 390, 39, 74-E6 (1992)

The Separation between Gas and Dust Filaments at the Edge of the Expanding Shell in Eridanus. *G. L. Verschuur, L. J Rickard, F. Verter, M. W. Pound, & D. Leisawitz.* 390, 514, 81-F7 (1992)

An Upper Limit on the Cosmic Ultraviolet Background. *Edward L. Wright.* 391, 34, 86-D11 (1992)

Thermal Emission Spectra from Polycyclic Aromatic Hydrocarbon Molecules of Astrophysical Interest. *V. Mennella, L. Colangeli, & E. Bussoletti.* 391, L45, 92-D1 (1992)

Walls and Windows in the Molecular Milky Way. *William H. Waller & Lowell E. Tacconi-Garman.* 80, 305, 26-D3 (1992)

Lyα Emission from Cooling Flows and Measures of the Dust Content of Rich Clusters of Galaxies. *Esther M. Hu.* 391, 608, 95-E7 (1992)

The Internal Extinction in Spiral Galaxies. *Mingsheng Han.* 391, 617, 95-F4 (1992)

Polarization in the Radio Galaxy 3C 109—An Obscured Quasar. *Robert W. Goodrich & Marshall H. Cohen.* 391, 623, 95-F12 (1992)

Electron Energy Loss Spectra of Polycyclic Aromatic Hydrocarbons. *John W. Keller, M. A. Coplan, & R. Goruganthu.* 391, 872, 98-G1 (1992)

Vacuum Ultraviolet Extinction Measurements on Cosmic Dust Analog Carbon Grains. *L. Colangeli, A. Blanco, S. Fonti, & E. Bussoletti.* 392, 284, 104-E1 (1992)

Zodiacal Emission. III. Dust near the Asteroid Belt. *William T. Reach.* 392, 289, 104-E7 (1992)

Interstellar Polarization from 3 to 5 Microns in Reddened Stars. *P. G. Martin, A. J. Adamson, D. C. B. Whittet, J. H. Hough, J. A. Bailey, S.-H. Kim, S. Sato, M. Tamura, & T. Yamashita.* 392, 691, 110-G3 (1992)

8–14 Micron Spectroscopy of Carbon Stars Associated with Silicate Dust. *Paul D. LeVan, G. C. Sloan, Irene R. Little-Marenin, & G. L. Grasdalen.* 392, 702, 111-A1 (1992)

The Nature of Dust around the Post–Asymptotic Giant Branch Objects HD 161796 and HD 179821. *K. Justtanont, M. J. Barlow, C. J. Skinner, & A. G. G. M. Tielens.* 392, L75, 113-D8 (1992)

SiC Particles from Asymptotic Giant Branch Stars: Mg Burning and the *s*-Process. *Lawrence E. Brown & Donald D. Clayton.* 392, L79, 113-E1 (1992)

The Relation of Dust and Atomic Gas Properties of Galaxies. *John G. Spitzak & Stephen E. Schneider.* 393, 126, 115-F1 (1992)

Ultraviolet, Optical, and Infrared Observations of the High-Latitude Molecular Cloud toward HD 210121. *Daniel E. Welty & James R. Fowler.* 393, 193, 116-D13 (1992)

High-Resolution Images of Dust Emission from Orion-KL. *Melvyn Wright, Goeran Sandell, David J. Wilner, & Richard L. Plambeck.* 393, 225, 117-A1 (1992)

Dust and the Transfer of Stellar Radiation within Galaxies. *Adolf N. Witt, Harley A. Thronson, Jr., & John M. Capuano, Jr.* 393, 611, 123-D7 (1992)

Contribution of Polycyclic Aromatic Hydrocarbon Molecules to the Interstellar Extinction Curve. *C. Joblin, A. Léger, & P. Martin.* 393, L79, 127-F1 (1992)

Quenched Carbonaceous Composite: Fluorescence Spectrum Compared to the Extended Red Emission Observed in Reflection Nebulae. *Akira Sakata, Setsuko Wada, Takatoshi Narisawa, Yoichi Asano, Yutaka Iijima, Takashi Onaka, & Alan T. Tokunaga.* 393, L83, 127-F7 (1992)

The Structure of NGC 4565 at 100, 160, and 200 Microns: Continuum Dust Emission in a Quiescent Sb Galaxy. *G. Engargiola & D. A. Harper.* 394, 104, 129-C13 (1992)

Redshift Asymmetry and Color-Velocity Correlation in Nearby Galaxy Groups: Evidence of Dust? *M. Girardi, M. Mezzetti, G. Giuricin, & F. Mardirossian.* 394, 442, 134-G9 (1992)

General Theory of the Purcell-Pennypacker Scattering Approach and Its Extension to Bianisotropic Scatterers. *Akhlesh Lakhtakia.* 394, 494, 135-E1 (1992)

Combined Infrared and Analytical Electron Microscope Studies of Interplanetary Dust Particles. *J. P. Bradley, H. J. Humecki, & M. S. Germani.* 394, 643, 137-D8 (1992)

Interstellar SiC with Unusual Isotopic Compositions: Grains from a Supernova? *Sachiko Amari, Peter Hoppe, Ernst Zinner, & Roy S. Lewis.* 394, L43, 139-C1 (1992)

Interstellar Dust from the Milky Way to the Magellanic Clouds. *Yichuan C. Pei.* 395, 130, 141-G1 (1992)

The Anomalous Extinction Curve in the Direction of ρ Ophiuchi from 950 to 1180 Å. *James C. Green, Theodore P. Snow, Timothy A. Cook, Webster C. Cash, & Orion Poplawski.* 395, 289, 143-E9 (1992)

Observations of the Light Echoes from SN 1987A Using the *Astro-1* Ultraviolet Imaging Telescope. *Arlin P. S. Crotts, Wayne B. Landsman, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 395, L25, 144-G7 (1992)

Astro-1 Ultraviolet Imaging of the 30 Doradus and SN 1987A Fields with the Ultraviolet Imaging Telescope. *Kwang-Ping Cheng, Andrew G. Michalitsianos, Paul Hintzen, Ralph C. Bohlin, Robert W. O'Connell, Robert H. Cornett, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L29, 145-A1 (1992)

Near-Infrared Broad-Line Profiles in Low-Redshift QSOs. *Keith L. Thompson.* 395, 403, 147-C13 (1992)

An *IRAS* Survey of Galactic Supernova Remnants. *Jon M. Saken, Robert A. Fesen, & J. Michael Shull.* 81, 715, 45-F9 (1992)

Raman and Infrared Spectra of Polycyclic Aromatic Hydrocarbon Molecules of Possible Astrophysical Interest. *L. Colangeli, V. Mennella, G. A. Baratta, E. Bussoletti, & G. Strazzulla.* 396, 369, 159-F5 (1992)

Models of Gas-Grain Chemistry in Dense Interstellar Clouds with Complex Organic Molecules. *Tatsuhiko I. Hasegawa, Eric Herbst, & Chun Ming Leung.* 82, 167, 51-D13 (1992)

An Infrared Supershell Surrounding the Cygnus OB1 Association. *Jon M. Saken, J. Michael Shull, Catharine D. Garmany, Joy Nichols-Bohlin, & Robert A. Fesen.* 397, 537, 177-E10 (1992)

On the Interaction between Dust and Gas in Late-Type Stellar Atmospheres and Winds. *K. B. MacGregor & R. E. Stencel.* 397, 644, 179-A13 (1992)

Observations of R Coronae Borealis Stars in Decline: Empirical Arguments for Dust Formation near the Stellar Surface. *Geoffrey C. Clayton, Barbara A. Whitney, S. Adam Stanford, & John S. Drilling.* 397, 652, 179-B10 (1992)

The Determination of Dust Mass in Galaxies. *John Kwan & Shuding Xie.* 398, 105, 183-C7 (1992)

Infrared Emission from Dust Structures Surrounding Herbig Ae/Be Stars. *F. Berrilli, G. Corciulo, G. Ingrosso, D. Lorenzetti, B. Nisini, & F. Strafella.* 398, 254, 185-A1 (1992)

Submillimeter Spectrum and Dust Mass of the Primeval Galaxy IRAS 10214+4724. *D. Downes, S. J. E. Radford, A. Greve, C. Thum, P. M. Solomon, & J. E. Wink.* 398, L25, 187-D7 (1992)

Spectropolarimetry of the 5797 Å Diffuse Interstellar Band. *A. J. Adamson & D. C. B. Whittet.* 398, L69, 188-C1 (1992)

Deviations of Interstellar Extinctions from the Mean *R*-dependent Extinction Law. *John S. Mathis & Jason A. Cardelli.* 398, 610, 191-F7 (1992)

A Near-Infrared Study of a Homogeneous Sample of Optically Selected Active Galactic Nuclei. II. Analysis of the Results and Interpretation. *L. Danese, V. Zitelli, G. L. Granato, R. Wade, G. De Zotti, & N. Mandolesi.* 399, 38, 195-E8 (1992)

Polarization in the Narrow [O III] Lines in Seyfert 2 Galaxies. *Robert W. Goodrich.* 399, 50, 195-F8 (1992)

The Structure of Magnetic Fields in Dark Clouds: Infrared Polarimetry in B216–217. *Alyssa A. Goodman, Terry J. Jones, Elizabeth A. Lada, & Philip C. Myers.* 399, 108, 196-E3 (1992)

An Efficient Method for the Calculation of Mean Extinction. I. The Analyticity of the Complex Extinction Efficiency of Homogeneous Spheres. *Zhang-fan Xing & J. Mayo Greenberg.* 399, 164, 197-C3 (1992)

Polarization of the Far-Infrared Emission from the Thermal Filaments of the Galactic Center Arc. *M. Morris, J. A. Davidson, M. Werner, J. Dotson, D. F. Figer, R. Hildebrand, G. Novak, & S. Platt.* 399, L63, 200-G6 (1992)

Methanol Ice in the Protostar GL 2136. *C. J. Skinner, A. G. G. M. Tielens, M. J. Barlow, & K. Justtanont.* 399, L79, 201-B7 (1992)

Scattering of Infrared Radiation by Dust in NGC 7023 and NGC 2023. *K. Sellgren, M. W. Werner, & H. L. Dinerstein.* 400, 238, 211-G9 (1992)

Hubble Space Telescope Spectroscopy of OB Stars in M31. *J. B. Hutchings, L. Bianchi, H. J. G. L. M. Lamers, P. Massey, & S. C. Morris.* 400, L35, 214-E1 (1992)

Nonequilibrium Iron Oxide Formation in Some Low-Mass Post–Asymptotic Giant Branch Stars. *Frans J. M. Rietmeijer.* 400, L39, 214-E6 (1992)

Dust Reverberation: A Model for the Infrared Variations of Fairall 9. *Richard Barvainis.* 400, 502, 216-E5 (1992)

Infrared Emission from X-Ray and Optically Emitting Regions in the Cygnus Loop Supernova Remnant. *Richard G. Arendt, Eli Dwek, & David Leisawitz.* 400, 562, 217-D1 (1992)

The Peculiar Infrared Temporal Development of Nova Vulpeculae 1987 (QV Vulpeculae). *R. D. Gehrz, T. J. Jones, C. E. Woodward, M. A. Greenhouse, R. M. Wagner, T. E. Harrison, T. L. Hayward, & J. Benson.* 400, 671, 218-G1 (1992)

Infrared Spectra of Obscuring Dust Tori around Active Galactic Nuclei. I. Calculational Method and Basic Trends. *Edward A. Pier & Julian H. Krolik.* 401, 99, 222-C5 (1992)

Far-Infrared Spectral Studies of Phase Changes in Water Ice Induced by Proton Irradiation. *Mala H. Moore & Reggie L. Hudson.* 401, 353, 225-D5 (1992)

The Low Filling Factor of Dust in the Galaxy. *Jayant Murthy, H. J. Walker, & R. C. Henry.* 401, 574, 229-F8 (1992)

Dust Temperature Distributions in Star-forming Condensations. *Taoling Xie, Paul F. Goldsmith, Ronald L. Snell, & Weimin Zhou.* 402, 216, 3-F11 (1993)

Spectroscopic Constraints on the Properties of Dust in Active Galactic Nuclei. *Ari Laor & Bruce T. Draine.* 402, 441, 8-B5 (1993)

Obscuration of Quasars by Dust in Damped Lyman-Alpha Systems. *S. Michael Fall & Yichuan C. Pei.* 402, 479, 8-E5 (1993)

Model Scattering Envelopes of Young Stellar Objects. II. Infalling Envelopes. *Barbara A. Whitney & Lee Hartmann.* 402, 605, 10-B5 (1993)

Continuous Absorption of He I λ10830 in Planetary Nebulae. *J. Kingdon & G. J. Ferland.* 403, 211, 16-E7 (1993)

Ultraviolet Interstellar Linear Polarization. I. Applicability of Current Dust Grain Models. *Michael J. Wolff, Geoffrey C. Clayton, & Marilyn R. Meade.* 403, 722, 24-F7 (1993)

Scattering and Luminescence in the Bubble Nebula. *Jean-Pierre Sivan & Jean-Marie Perrin.* 404, 258, 31-B1 (1993)

Spatially Resolved Spectra of Silicate Dust around α Orionis. *G. C. Sloan, G. L. Grasdalen, & Paul D. LeVan.* 404, 328, 32-A3 (1993)

Beyond Clausius-Mossotti: Wave Propagation on a Polarizable Point Lattice and the Discrete Dipole Approximation. *B. T. Draine & Jeremy Goodman.* 405, 685, 51-E11 (1993)

Magnetic Confinement of the Optical Jets in Young Stellar Objects. *S.-U. Choe & T. W. Jones.* 405, 698, 51-F11 (1993)

The Excitation Mechanism of [Fe II] 1.644 Micron Emission in Seyfert and Starburst Galaxies Revisited. *Hideaki Mouri, Kimiaki Kawara, & Yoshiaki Taniguchi.* 406, 52, 55-F5 (1993)

On the 2175 Å Absorption Band of Hollow, Onion-like Carbon Particles. *L. Henrard, A. A. Lucas, & Ph. Lambin.* 406, 92, 56-C1 (1993)

Bright Near-Infrared Sources within 1deg of the Galactic Center. I. Survey and 1–20 Micron Photometry. *Tetsuya Nagata, A. R. Hyland, S. M. Straw, Shuji Sato, & Kimiaki Kawara.* 406, 501, 64-A10 (1993)

The Ultraviolet Spectrum of Annealed Hydrogenated Amorphous Carbon Grains. *A. Blanco, E. Bussoletti, L. Colangeli, S. Fonti, V. Mennella, & J. R. Stephens.* 406, 739, 67-B12 (1993)

The Diffuse Interstellar Bands. IX. Constraints on the Identification. *G. H. Herbig.* 407, 142, 70-G5 (1993)

Nova Dust Nucleation: Kinetics and Photodissociation. *D. J. Johnson, M. W. Friedlander, & J. I. Katz.* 407, 714, 79-D4 (1993)

Dust Coagulation. *Arati Chokshi, A. G. G. M. Tielens, & D. Hollenbach.* 407, 806, 80-E1 (1993)

The 8–13 Micron Spectrum of Arp 299C. *C. C. Dudley & C. G. Wynn-Williams.* 407, L65, 82-D1 (1993)

The Spectral Energy Distribution of Star-forming Regions. *Ralf Siebenmorgen.* 408, 218, 85-G3 (1993)

Theoretical Infrared Spectra of Some Model Polycyclic Aromatic Hydrocarbons: Effect of Ionization. *D. J. De Frees, M. D. Miller, D. Talbi, F. Pauzat, & Y. Ellinger.* 408, 530, 91-G5 (1993)

Interstellar Extinction in the Infrared: The Molecular Cloud toward HD 62542. *D. C. B. Whittet, P. G. Martin, E. L. Fitzpatrick, & D. Massa.* 408, 573, 92-C11 (1993)

Hopkins Ultraviolet Telescope Observations of Far-Ultraviolet Scattering in NGC 7023: The Dust Albedo. *Jayant Murthy, Andrew Dring, Richard C. Henry, Jeffrey W. Kruk, William P. Blair, Randy A. Kimble, & Samuel T. Durrance.* 408, L97, 95-E3 (1993)

Multifrequency Observations of the Optically Active Radio-quiet Quasar GQ Comae. II. Ultraviolet, Optical, and Infrared Continuum Variability. *Michael L. Sitko, Annamaria K. Sitko, Aneta Siemiginowska, & R. Szczerba.* 409, 139, 98-F5 (1993)

Ice Grains in the Corona Australis Molecular Cloud. *W. P. Chen & J. A. Graham.* 409, 319, 101-A11 (1993)

An Infrared Study of the Remarkable Dusty M Star HR 3126. *J. E. Chiar, D. C. B. Whittet, D. K. Aitken, P. F. Roche, C. H. Smith, H. J. Walker, P. A. Whitelock, & C. Wright.* 409, 404, 102-A8 (1993)

The Nature of the Molecular Cores in High-Latitude Cirrus Clouds. IV. The Electron Distribution and the Abundance and Chemistry of H_2CO. *B. E. Turner.* 410, 140, 113-G8 (1993)

Submillimeter Continuum Emission from the Galactic Center Region. *W. R. F. Dent, H. E. Matthews, R. Wade, & W. D. Duncan.* 410, 650, 121-F11 (1993)

The Dynamics of Stellar Outflows Dominated by Interaction of Dust and Radiation. *Nathan Netzer & Moshe Elitzur.* 410, 701, 122-D11 (1993)

Voyager 2 Observations of NGC 7023: Dust Scattering Shortward of 1600 Å. *A. N. Witt, J. K. Petersohn, J. B. Holberg, J. Murthy, A. Dring, & R. C. Henry.* 410, 714, 122-E13 (1993)

Laboratory Spectra of Polycyclic Aromatic Hydrocarbon Ions and the Interstellar Extinction Curve. *Wei Lee & Thomas J. Wdowiak.* 410, L127, 126-E5 (1993)

M82: The Saga Continues. *K. K. McLeod, G. H. Rieke, M. J. Rieke, & D. M. Kelly.* 412, 111, 143-D10 (1993)

The Nature of Unidentified Far-Infrared Point Sources. *William T. Reach, Carl Heiles, & Bon-Chul Koo.* 412, 127, 143-F1 (1993)

Near- and Mid-Infrared Imaging of the Planetary Nebulae BD +30°3639 and IC 418. *Joseph L. Hora, Lynne K. Deutsch, William F. Hoffmann, Giovanni G. Fazio, & Kandiah Shivanandan.* 413, 304, 160-A10 (1993)

30 Doradus: Ultraviolet and Optical Stellar Photometry. *Jesse K. Hill, Ralph C. Bohlin, Kwang-Ping Cheng, Michael N. Fanelli, Paul Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 413, 604, 164-A5 (1993)

Calcium Depletion in Cooling-Flow Nebulae and the Origin of the Line-emitting Gas. *Megan Donahue & G. Mark Voit.* 414, L17, 175-D11 (1993)

What Is New about the New Comet Yanaka (1988r)? *J. Mayo Greenberg, P. D. Singh, & A. A. de Almeida.* 414, L45, 175-G7 (1993)

Hubble Space Telescope Ultraviolet Spectroscopy of the Highly Polarized but Quiescent Quasar OI 287. *Robert Antonucci, Anne L. Kinney, & Todd Hurt.* 414, 506, 177-E1 (1993)

Effects of Internal Dust on the Narrow-Line Region Lyman and Balmer Decrements. *Luc Binette, John Wang, Montserrat Villar-Martin, Peter G. Martin, & Gladis Magris C.* 414, 535, 177-G9 (1993)

On Graphite and the 2175 Å Extinction Profile. *B. T. Draine & Sangeeta Malhotra.* 414, 632, 179-B1 (1993)

Submillimeter Studies of Main-Sequence Stars. *B. Zuckerman & E. E. Becklin.* 414, 793, 181-B4 (1993)

A New Method to Calculate the Extinction Properties of Irregularly Shaped Particles. *François Rouleau & P. G. Martin.* 414, 803, 181-C2 (1993)

Millimeter and Submillimeter Continuum Emission from Early-Type Galaxies. *Michel Fich & Paul Hodge.* 415, 75, 186-A1 (1993)

Infrared Spectra of Transition Objects and the Composition and Evolution of Carbon Dust. *R. H. Buss, Jr., A. G. G. M. Tielens, M. Cohen, M. W. Werner, J. D. Bregman, & F. C. Witteborn.* 415, 250, 188-B3 (1993)

Activation of Extended Red Emission Photoluminescence in Carbon Solids by Exposure to Atomic Hydrogen and UV Radiation. *Douglas G. Furton & Adolf N. Witt.* 415, L51, 192-D1 (1993)

The Dust Content of Evolved Circumstellar Envelopes and the Optical Properties of Dust at Submillimeter to Radio Wavelengths. *G. R. Knapp, G. Sandell, & E. I. Robson.* 88, 173, 42-E7 (1993)

Evidence for Hydrated Silicates toward SN 1987A. *Ralf Timmermann & Harold P. Larson.* 415, 820, 198-A13 (1993)

Proximity Effects in Clusters of Particles. *François Rouleau & P. G. Martin.* 416, 707, 212-B10 (1993)

Circumstellar Properties of S Stars. I. Dust Features. *P. S. Chen & Sun Kwok.* 416, 769, 213-A1 (1993)

Airborne Spectrophotometry of SN 1987A from 1.7 to 12.6 Microns: Time History of the Dust Continuum and Line Emission. *Diane H. Wooden, David M. Rank, Jesse D. Bregman, Fred C. Witteborn, A. G. G. M. Tielens, Martin Cohen, Philip A. Pinto, & Timothy S. Axelrod.* 88, 477, 46-F9 (1993)

Condensation and Vaporization Studies of CH_3OH and NH_3 Ices: Major Implications for Astrochemistry. *Scott A. Sandford & Louis J. Allamandola.* 417, 815, 229-E7 (1993)

CO Emission from Molecular Clouds in the Central Region of M31. *Yoshiaki Sofue & Shigeomi Yoshida.* 417, L63, 230-B12 (1993)

Tracing the Stellar Mass in M51. *Hans-Walter Rix & Marcia J. Rieke.* 418, 123, 232-E10 (1993)

The Langevin Equation and Its Application to Grain Alignment in Molecular Clouds. *W. G. Roberge, T. A. DeGraff, & J. E. Flaherty.* 418, 287, 234-E11 (1993)

Extreme-Ultraviolet Extinction Measurements on Hydrogenated and Dehydrogenated Amorphous Carbon Grains. *L. Colangeli, V. Mennella, A. Blanco, S. Fonti, E. Bussoletti, H. E. Gumlich, H. C. Mertins, & Ch. Jung.* 418, 435, 236-D7 (1993)

The Silicates in the Disk of β Pictoris. *R. F. Knacke, S. B. Fajardo-Acosta, C. M. Telesco, J. A. Hackwell, D. K. Lynch, & R. W. Russell.* 418, 440, 236-D13 (1993)

Ultraviolet Background Radiation. *Richard C. Henry & Jayant Murthy.* 418, L17, 238-C1 (1993)

Infrared Spectra of Obscuring Dust Tori around Active Galactic Nuclei. II. Comparison with Observations. *Edward A. Pier & Julian H. Krolik.* 418, 673, 240-G10 (1993)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. I. Basic Physics and Formulation of the Problem. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 418, 774, 242-B13 (1993)

Subarcsecond Mid-Infrared Imaging of Warm Dust in the Narrow-Line Region of NGC 1068. *Murray Cameron, John W. V. Storey, Valentin Rotaciuc, Reinhard Genzel, Laurent Verstraete, Siegfried Drapatz, Ralf Siebenmorgen, & Terry J. Lee.* 419, 136, 247-G5 (1993)

Evolution in Dust Lane Ellipticals: Detection of Accreted Molecular Gas. *Leslie J. Sage & Giuseppe Galletta.* 419, 544, 254-E5 (1993)

Near-Infrared Images of MG 1131+0456 with the W. M. Keck Telescope: Another Dusty Gravitational Lens? *J. E. Larkin, K. Matthews, C. R. Lawrence, J. R. Graham, W. Harrison, G. Jernigan, S. Lin, J. Nelson, G. Neugebauer, G. Smith, B. T. Soifer, & C. Ziomkowski.* 420, L9, 7-B10 (1994)

Interstellar Gas and Dust in the Young Cluster IC 348. *Theodore P. Snow, Margaret Murray Hanson, C. Gregory Seab, & Jon M. Saken.* 420, 632, 10-E6 (1994)

The Structure and Nature of NGC 2071 IRS 1: High-Resolution Radio Continuum Maps. *Howard A. Smith & Sara C. Beck.* 420, 643, 10-F7 (1994)

From T Tauri Stars to Protostars: Circumstellar Material and Young Stellar Objects in the ρ Ophiuchi Cloud. *Philippe André & Thierry Montmerle.* 420, 837, 13-C12 (1994)

The Production of Condensed Phase CO in Quiescent Molecular Clouds. *P. Caselli, T. I. Hasegawa, & Eric Herbst.* 421, 206, 18-E5 (1994)

Thermal Behavior of Rocky Material in Contact with Ice. *Norbert I. Kömle, Gerhard Steiner, & Eberhard Grün.* 421, 350, 20-C9 (1994)

Composition and Radiative Properties of Grains in Molecular Clouds and Accretion Disks. *James B. Pollack, David Hollenbach, Steven Beckwith, Damon P. Simonelli, Ted Roush, & Wesley Fong.* 421, 615, 26-A1 (1994)

Models for the Evolution of the Spectral Energy Distribution of Elliptical Galaxies for Ultraviolet to Far-Infrared Wavelengths. *P. Mazzei, G. De Zotti, & C. Xu.* 422, 81, 31-A13 (1994)

The Dust Temperature Gradient in the Rosette Nebula. *R. F. Shipman & F. O. Clark.* 422, 153, 32-A5 (1994)

R_v-dependent Optical and Near-Ultraviolet Extinction. *James E. O'Donnell.* 422, 158, 32-A12 (1994)

The Size Distribution of Interstellar Dust Particles as Determined from Extinction. *Sang-Hee Kim, P. G. Martin, & Paul D. Hendry.* 422, 164, 32-B7 (1994)

The Origin of Variations in the 2175 Å Extinction Bump. *John S. Mathis.* 422, 176, 32-C8 (1994)

Properties of a B0 I Stellar Wind and Interstellar Grains Derived from *Ginga* Observations of the Binary X-Ray Pulsar 4U 1538−52. *George W. Clark, Jonathan W. Woo, & Fumiaki Nagase.* 422, 336, 34-C3 (1994)

Magnetogravitational Instability of Self-gravitating Dusty Plasma. *R. K. Chhajlani & A. K. Parihar.* 422, 746, 41-B6 (1994)

Spectral Imaging of the Orion Bar at 3.3, 8.4, and 11.3 Microns: Comparison with a Fluorescent Polycyclic Aromatic Hydrocarbon Model. *Jesse Bregman, Kristen Larson, David Rank, & Pasquale Temi.* 423, 326, 50-B10 (1994)

Modeling Composite and Fluffy Grains: The Effects of Porosity. *Michael J. Wolff, Geoffrey C. Clayton, P. G. Martin, & Regina E. Schulte-Ladbeck.* 423, 412, 51-C3 (1994)

X-Ray Halos as Tracers of the Distance of the Gamma-Ray Bursters. *S. Klose.* 423, L23, 53-D5 (1994)

A Laboratory Approach to the Interstellar Sulfide Dust Problem. *B. Begemann, J. Dorschner, T. Henning, H. Mutschke, & E. Thamm.* 423, L71, 54-C1 (1994)

Near-Infrared Observations of the 1E 1740.7−2942 Field at the Galactic Center. *Joseph W. Haller & Fulvio Melia.* 423, L109, 60-F5 (1994)

Spectropolarimetry of Five Objects toward the Galactic Center from 1.4 to 4.2 Microns. *Tetsuya Nagata, Naoto Kobayashi, & Shuji Sato.* 423, L113, 60-F11 (1994)

A Critical Evaluation of Semianalytic Methods in the Study of Centrally Heated, Unresolved, Infrared Sources. *Steven D. Doty & Chun Ming Leung.* 424, 729, 73-G10 (1994)

The Depletion of Calcium in the Interstellar Medium. *Greg Crinklaw, S. R. Federman, & Charles L. Joseph.* 424, 748, 74-B3 (1994)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. III. Typical Axisymmetric Solutions. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 425, 142, 82-A6 (1994)

The 8–13 Micron Spectra of Comets and the Composition of Silicate Grains. *Martha S. Hanner, David K. Lynch, & Ray W. Russell.* 425, 274, 83-F3 (1994)

Light Scattering by Porous Dust Particles in the Discrete-Dipole Approximation. *K. Lumme & J. Rahola.* 425, 653, 89-F12 (1994)

High-Resolution Far-Infrared Observations of the Ring Nebula. *C. Y. Zhang, P. M. Harvey, Beverly J. Smith, C. Colomé, & J. DiFrancesco.* 425, 687, 90-B13 (1994)

The Massive Molecular Outflow from CRL 2136 IRS 1. *Joel H. Kastner, David A. Weintraub, Ronald L. Snell, G. Sandell, C. Aspin, D. H. Hughes, & F. Baas.* 425, 695, 90-C9 (1994)

A Near-Infrared Study of the Monoceros R2 Star Formation Region. *Eric M. Howard, Judith L. Pipher, & William J. Forrest.* 425, 707, 90-D12 (1994)

COBE Diffuse Infrared Background Experiment Observations of Galactic Reddening and Stellar Populations. *R. G. Arendt, G. B. Berriman, N. Boggess, E. Dwek, M. G. Hauser, T. Kelsall, S. H. Moseley, T. L. Murdock, N. Odegard, R. F. Silverberg, T. J. Sodroski, & J. L. Weiland.* 425, L85, 94-E1 (1994)

A Rocket-borne Observation of the Far-Infrared Sky at High Galactic Latitude. *M. Kawada, J. J. Bock, V. V. Hristov, A. E. Lange, H. Matsuhara, T. Matsumoto, S. Matsuura, P. D. Mauskopf, P. L. Richards, & M. Tanaka.* 425, L89, 94-E11 (1994)

Extreme ^{26}Mg and ^{17}O Enrichments in an Orgueil Corundum: Identification of a Presolar Oxide Grain. *I. D. Hutcheon, G. R. Huss, A. J. Fahey, & G. J. Wasserburg.* 425, L97, 94-F7 (1994)

IRAS Colors within M31: Evidence for Deficiency of Very Small Grains? *Cong Xu & George Helou.* 426, 109, 97-D7 (1994)

Solid Carbon Monoxide in the Serpens Dark Cloud. *J. E. Chiar, A. J. Adamson, T. H. Kerr, & D. C. B. Whittet.* 426, 240, 99-B2 (1994)

Extinction, Ejecta Masses, and Radial Velocities of Novae. *Robert E. Williams.* 426, 279, 99-E8 (1994)

Radio-emitting Dust in the Free Electron Layer of Spiral Galaxies: Testing the Disk/Halo Interface. *A. Ferrara & R.-J. Dettmar.* 427, 155, 111-G7 (1994)

K'-Band Observations of the Evil Eye Galaxy: Are the Optical and Near-Infrared Dust Albedos Identical? *Adolf N. Witt, Rebecca S. Lindell, David L. Block, & Rhodri Evans.* 427, 227, 112-G1 (1994)

An *IUE* Survey of Interstellar H I Lyman-Alpha Absorption. II. Interpretations. *Athanassios Diplas & Blair D. Savage.* 427, 274, 113-D1 (1994)

Polarization Profiles of Scattered Emission Lines. I. General Formalism for Optically Thin Rayleigh Scattering. *W. J. Henney.* 427, 288, 113-E1 (1994)

Polarization Profiles of Scattered Emission Lines. II. Upstream Dust Scattering in the HH 1 Jet. *W. J. Henney, A. C. Raga, & D. J. Axon.* 427, 305, 113-F6 (1994)

Ultraviolet Interstellar Polarization Observed with the *Hubble Space Telescope*. *W. B. Somerville, R. G. Allen, D. J. Carnochan, Lida He, D. McNally, P. G. Martin, D. H. Morgan, K. Nandy, J. R. Walsh, D. C. B. Whittet, R. Wilson, & M. J. Wolff.* 427, L47, 117-F13 (1994)

The Photoelectric Heating Mechanism for Very Small Graphitic Grains and Polycyclic Aromatic Hydrocarbons. *E. L. O. Bakes & A. G. G. M. Tielens.* 427, 822, 122-G8 (1994)

Day 640 Infrared Line and Continuum Measurements: Dust Formation in SN 1987A. *Sean W. J. Colgan, Michael R. Haas, Edwin F. Erickson, Steven D. Lord, & David J. Hollenbach.* 427, 874, 123-E3 (1994)

Circumstellar Dust Emission Models. *Mark G. Wolfire & Ed Churchwell.* 427, 889, 123-F6 (1994)

A Diagnosis of Dust in Active Galactic Nuclei through Analysis of the Infrared Bump. *S. M. Viegas & M. Contini.* 428, 113, 129-E9 (1994)

Voyager Observations of Dust Scattering near the Coalsack Nebula. *Jayant Murthy, R. C. Henry, & J. B. Holberg.* 428, 233, 131-A13 (1994)

Large-Scale Characteristics of Interstellar Dust from *COBE* DIRBE Observations. *T. J. Sodroski, C. Bennett, N. Boggess, E. Dwek, B. A. Franz, M. G. Hauser, T. Kelsall, S. H. Moseley, N. Odegard, R. F. Silverberg, & J. L. Weiland.* 428, 638, 138-C1 (1994)

Infrared Spectra of Crystalline Phase Ices Condensed on Silicate Smokes at $T < 20$ K. *Marla H. Moore, Robert F. Ferrante, Reggie L. Hudson, Joseph A. Nuth III, & Bertram Donn.* 428, L81, 143-A7 (1994)

The Far-Infrared Properties of the CfA Galaxy Sample. II. Gas, Dust, and Star Formation along the Hubble Sequence. *Marc Sauvage & Trinh X. Thuan.* 429, 153, 146-A9 (1994)

The Reddening Law outside the Local Group Galaxies: The Case of NGC 7552 and NGC 5236. *Anne L. Kinney, Daniela Calzetti, Eduardo Bica, & Thaisa Storchi-Bergmann.* 429, 172, 146-C2 (1994)

The Initial Mass Function for Massive Stars in the Magellanic Clouds. II. Interstellar Reddening toward 14 OB Associations. *Robert J. Hill, Barry F. Madore, & Wendy L. Freedman.* 429, 192, 146-D12 (1994)

High-Resolution Images of the Dust and Ionized Gas Distribution in the Carina Nebula. *Jonathan B. Z. Whiteoak.* 429, 225, 146-G7 (1994)

Induced Nucleation of Carbon Dust in Red Giant Stars. *Brian J. Cadwell, Hai Wang, Eric D. Feigelson, & Michael Frenklach.* 429, 285, 147-E10 (1994)

Dust Extinction of the Stellar Continua in Starburst Galaxies: The Ultraviolet and Optical Extinction Law. *Daniela Calzetti, Anne L. Kinney, & Thaisa Storchi-Bergmann.* 429, 582, 153-A1 (1994)

Atomic and Molecular Gas in Interstellar Cirrus Clouds. *William T. Reach, Bon-Chul Koo, & Carl Heiles.* 429, 672, 154-B1 (1994)

Dust Extinction and Molecular Gas in the Dark Cloud IC 5146. *Charles J. Lada, Elizabeth A. Lada, Dan P. Clemens, & John Bally.* 429, 694, 154-C11 (1994)

Spectral Imaging of the Ney-Allen Nebula at 10 and 20 Microns. *T. L. Hayward.* 429, 726, 154-F5 (1994)

Color Excesses for Classical Cepheids from *BV* Photometry. *J. D. Fernie.* 429, 844, 156-B9 (1994)

Ultraviolet Spectra of Quenched Carbonaceous Composite Derivatives: Comparison to the "217 Nanometer" Interstellar Absorption Feature. *Akira Sakata, Setsuko Wada, Alan T. Tokunaga, Takatoshi Narisawa, Hidehiro Nakagawa, & Hiroshi Ono.* 430, 311, 163-A7 (1994)

A 7 Micron Dust Emission Feature in Oxygen-rich Circumstellar Shells. *J. H. Goebel, J. D. Bregman, & F. C. Witteborn.* 430, 317, 163-B3 (1994)

Predictions of Oxygen Isotope Ratios in Stars and of Oxygen-rich Interstellar Grains in Meteorites. *Arnold I. Boothroyd, I.-Juliana Sackmann, & G. J. Wasserburg.* 430, L77, 166-C7 (1994)

Oxygen Isotopes in Circumstellar Al_2O_3 Grains from Meteorites and Stellar Nucleosynthesis. *Gary R. Huss, Albert J. Fahey, Roberto Gallino, & G. J. Wasserburg.* 430, L81, 166-C13 (1994)

Evolution of Macromolecular Dust: Far-Ultraviolet Spectral Dust Extinction and Gas Absorption of Stellar Light as Measured with the Hopkins Ultraviolet Telescope. *Richard H. Buss, Jr., Marsha Allen, Stephan McCandliss, Jeffrey Kruk, Ji-Cheng Liu, & Tom Brown.* 430, 630, 169-F5 (1994)

The Abundant Elements in Interstellar Dust. *Ulysses J. Sofia, Jason A. Cardelli, & Blair D. Savage.* 430, 650, 170-A2 (1994)

Coagulation of Grains in Static and Collapsing Protostellar Clouds. *S. J. Weidenschilling & T. V. Ruzmaikina.* 430, 713, 170-F6 (1994)

The Puzzle of Silicon, Titanium, and Magnesium Anomalies in Meteoritic Silicon Carbide Grains. *Roberto Gallino, Claudia M. Raiteri, Maurizio Busso, & Francesca Matteucci.* 430, 858, 172-E13 (1994)

UIT: Ultraviolet Observations of the Small Magellanic Cloud. *Robert H. Cornett, J. K. Hill, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 430, L117, 174-G9 (1994)

Infrared Absorption Due to Hydrogenated Amorphous Carbon in the Diffuse Interstellar Medium. *W. W. Duley.* 430, L133, 175-B5 (1994)

A Study of X-Ray and Infrared Emissions from Dusty Nonradiative Shock Waves. *Olaf Vancura, John C. Raymond, Eli Dwek, William P. Blair, Knox S. Long, & Scott Foster.* 431, 188, 178-D13 (1994)

The Physics of Grain-Grain Collisions and Gas-Grain Sputtering in Interstellar Shocks. *A. G. G. M. Tielens, C. F. McKee, C. G. Seab, & D. J. Hollenbach.* 431, 321, 180-B3 (1994)

Spectroscopic Signatures of Infall in Young Protostellar Systems. *Christopher K. Walker, Gopal Narayanan, & Alan P. Boss.* 431, 767, 188-B5 (1994)

The Size Distribution of Interstellar Dust Particles as Determined from Polarization: Infinite Cylinders. *Sang-Hee Kim & P. G. Martin.* 431, 783, 188-D1 (1994)

Diagnostics of Dust Content in Spiral Galaxies: Numerical Simulations of Radiative Transfer. *Y. I. Byun, K. C. Freeman, & N. D. Kylafis.* 432, 114, 194-F1 (1994)

Lyα Emission and Absorption Features in the Spectra of Galaxies. *W. L. Chen & David A. Neufeld.* 432, 567, 203-A10 (1994)

The Far-Ultraviolet Dust Albedo in the Upper Scorpius Subgroup of the Scorpius OB2 Association. *Karl D. Gordon, Adolf N. Witt, George R. Carruthers, Susan A. Christensen, & Brian C. Dohne.* 432, 641, 204-A3 (1994)

Variable Extinction in HD 45677 and the Evolution of Dust Grains in Pre–Main-Sequence Disks. *Michael L. Sitko, Elaine M. Halbedel, Geoffrey F. Lawrence, J. Allyn Smith, & Ken Yanow.* 432, 753, 205-D3 (1994)

Near-Infrared Observations of W51. *Jeffrey D. Goldader & C. G. Wynn-Williams.* 433, 164, 210-D1 (1994)

The 3.2–3.6 Micron Spectra of Monoceros R2/IRS-3 and Elias 16. *K. Sellgren, R. G. Smith, & T. Y. Brooke.* 433, 179, 210-E5 (1994)

G5.89−0.39: A Compact H II Region with a Very Dense Circumstellar Dust Torus. *Paul M. Harvey, Daniel F. Lester, Cecilia Colomé, Beverly Smith, Jean-Louis Monin, & Isabelle Vauglin.* 433, 187, 210-F1 (1994)

Spectral Energy Distributions of the Brightest Palomar-Green Quasars at Intermediate Redshifts. *Todd M. Tripp, Jill Bechtold, & Richard F. Green.* 433, 533, 217-E12 (1994)

The Peculiar Dust Distribution of M82. *T. Ichikawa, W. van Driel, T. Aoki, T. Soyano, K. Tarusawa, & S. Yoshida.* 433, 645, 219-A11 (1994)

Grain Destruction in Shocks in the Interstellar Medium. *A. P. Jones, A. G. G. M. Tielens, D. J. Hollenbach, & C. F. McKee.* 433, 797, 221-A12 (1994)

The Particle-Size Distribution in the Dust Ejected from IRC +10216. *M. Jura.* 434, 713, 237-E12 (1994)

Broken Symmetry: The Structure of the Dust Envelope of IRC +10216. *Joel H. Kastner & David A. Weintraub.* 434, 719, 237-F7 (1994)

The Dust in the Hydrogen-poor Ejecta of Abell 30. *Kazimierz J. Borkowski, J. Patrick Harrington, William P. Blair, & Jesse D. Bregman.* 435, 722, 256-A6 (1994)

Millimetric Observations of Diffuse Galactic Emission: Further Ideas on the Interstellar Dust. *P. Merluzzi, E. Bussoletti, G. Dall'Oglio, & L. Piccirillo.* 436, 286, 265-C1 (1994)

ASCA Measurements of the Grain-scattered X-Ray Halos of Eclipsing Massive X-Ray Binaries: Vela X-1 and Centaurus X-3. *Jonathan W. Woo, George W. Clark, Charles S. R. Day, Fumiaki Nagase, & Toshiaki Takeshima.* 436, L5, 268-C9 (1994)

On the Determination of the Cosmic Infrared Background Radiation from the High-Energy Spectrum of Extragalactic Gamma-Ray Sources. *Eli Dwek & Jonathan Slavin.* 436, 696, 275-B1 (1994)

Ultraviolet Spectra of Amorphous Carbon Grains: Comparison with the Circumstellar Extinction around C-rich Objects. *A. M. Muci, A. Blanco, S. Fonti, & V. Orofino.* 436, 831, 277-B3 (1994)

The Effect of Grain Mantles and Grain Shape upon the 9.7 and 18 Micron Silicate Features. *James E. O'Donnell.* 437, 262, 286-F10 (1994)

Photon-dominated Regions around Cool Stars: The Effects of the Color Temperature of the Radiation Field. *Marco Spaans, A. G. G. M. Tielens, Ewine F. van Dishoeck, & E. L. O. Bakes.* 437, 270, 286-G7 (1994)

Near-Infrared Absorption Spectroscopy of Interstellar Hydrocarbon Grains. *Y. J. Pendleton, S. A. Sandford, L. J. Allamandola, A. G. G. M. Tielens, & K. Sellgren.* 437, 683, 295-B9 (1994)

Infrared Photometry and Spectrophotometry of Nova Herculis 1991 (= V838 Herculis): Observations of the Formation of Dust in the Ejecta of a Very Fast Nova. *Thomas E. Harrison & Guy S. Stringfellow.* 437, 827, 297-A3 (1994)

IRAS Images of Nearby Dark Clouds. *Douglas O. S. Wood, Philip C. Myers, & Debra A. Daugherty.* 95, 457, 70-E3 (1994)

Ultraviolet Imaging Telescope and Optical Emission-Line Observations of H II Regions in M81. *Jesse K. Hill, K. P. Cheng, Ralph C. Bohlin, Robert H. Cornett, P. M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 438, 181, 3-G2 (1995)

On the Injection of Fine Dust from the Jovian Magnetosphere. *D. Maravilla, K. R. Flammer, & D. A. Mendis.* 438, 968, 17-D11 (1995)

Evidence for Chemical Processing of Precometary Icy Grains in Circumstellar Environments of Pre–Main-Sequence Stars. *Stephen C. Tegler, David A. Weintraub, Terrence W. Rettig, Yvonne J. Pendleton, Douglas C. B. Whittet, & Craig A. Kulesa.* 439, 279, 25-A9 (1995)

Polarization of Thermal Emission from Aspherical Dust Grains in an Anisotropic Radiation Field. *Takashi Onaka.* 439, L21, 30-A10 (1995)

Grains in Ionized Nebulae: Spectral Line Diagnostics. *J. Kingdon, G. J. Ferland, & W. A. Feibelman.* 439, 793, 35-E3 (1995)

A Search for an X-Ray Scattering Halo around Scorpius X-1. *Dennis Gallagher, Webster Cash, & James Green.* 439, 976, 38-B2 (1995)

Dust in the Broad-Line Regions of Seyfert Galaxies. *Robert W. Goodrich.* 440, 141, 43-B7 (1995)

Solar Coronal Dust Scattering in the Infrared. *R. M. MacQueen & Bradford W. Greeley.* 440, 361, 46-B8 (1995)

Millimeter Observations of a Complete Sample of *IRAS* Galaxies: Dust Emission and Absorption in Spirals. *Alberto Franceschini & Paola Andreani.* 440, L5, 48-B8 (1995)

Discovery of a $z = 2.76$ Dusty Radio Galaxy? *Arjun Dey, Hyron Spinrad, & Mark Dickinson.* 440, 515, 50-D5 (1995)

A Near-Infrared Reflection Nebula Associated with NGC 2024 FIR 4. *T. J. T. Moore & T. Yamashita.* 440, 722, 53-B6 (1995)

The Growth of Solids, Destruction of Molecules, and Shielding of Radiation in the Young Stellar Disk of HD 45677. *Thomas M. Brown, Richard Buss, Jr., Carol Grady, & Karen Bjorkman.* 440, 865, 55-A11 (1995)

Gas-Phase Chemistry in Dense Interstellar Clouds Including Grain Surface Molecular Depletion and Desorption. *E. A. Bergin, W. D. Langer, & P. F. Goldsmith.* 441, 222, 62-D7 (1995)

Dust Particle Settling in Passive Disks around T Tauri Stars: Models and *IRAS* Observations. *Kotaro Miyake & Yoshitsugu Nakagawa.* 441, 361, 64-C13 (1995)

Cosmic Dust Synthesis by Accretion and Coagulation. *G. Praburam & J. Goree.* 441, 830, 73-D4 (1995)

Influence of Galactic Dust on the Accuracy of Cosmic Microwave Anisotropy Measurements. *Gianfranco Guarini, Bianca Melchiorri, & Francesco Melchiorri.* 442, 23, 77-E1 (1995)

Can We Improve upon Astronomical Silicate? *Sang-Hee Kim & P. G. Martin.* 442, 172, 79-E6 (1995)

Hot Bottom Burning in Asymptotic Giant Branch Stars and Its Effect on Oxygen Isotopic Abundances. *Arnold I. Boothroyd, I.-Juliana Sackmann, & G. J. Wasserburg.* 442, L21, 84-G4 (1995)

The Distribution of Far-Infrared Light in the "Dusty Hand" Galaxy NGC 2146. *Beverly J. Smith, P. M. Harvey, & D. F. Lester.* 442, 610, 88-C10 (1995)

H I, CO, and *IRAS* Observations of NGC 7023. *C. Rogers, Mark H. Heyer, & P. E. Dewdney.* 442, 694, 89-F10 (1995)

The Heating of Dust in Starburst Galaxies: The Contribution of the Nonionizing Radiation. *Daniela Calzetti, Ralph C. Bohlin, Anne L. Kinney, Thaisa Storchi-Bergmann, & Timothy M. Heckman.* 443, 136, 97-A12 (1995)

The Neutral Atomic Phases of the Interstellar Medium. *Mark G. Wolfire, David Hollenbach, Christopher F. McKee, A. G. G. M. Tielens, & E. L. O. Bakes.* 443, 152, 97-C3 (1995)

Ammonia Formation from the Reactions of H Atoms with N Atoms Trapped in a Solid N_2 Matrix at 10–30 K. *Kenzo Hiraoka, Akihiro Yamashita, Yasunori Yachi, Kazuo Aruga, Tetsuya Sato, & Hachizo Muto.* 443, 363, 100-B7 (1995)

Discovery and Imaging of a Galactic Cirrus Cloud with the Far Ultraviolet Space Telescope. *Lauri K. Haikala, Kalevi Mattila, Stuart Bowyer, Timothy P. Sasseen, Michael Lampton, & Jens Knude.* 443, L33, 102-F8 (1995)

On the Charge Distribution Function of Dust Grains in a Hot Gas. *C. Cervetto, B. Barsella, & A. Ferrara.* 443, 648, 106-G12 (1995)

Ultraviolet Extinction to 10.8 Inverse Microns. *Per A. Aannestad.* 443, 653, 106-G11 (1995)

Diffuse Band Profiles in the ρ Ophiuchi Cloud. *C. Gregory Seab & Theodore P. Snow, Jr.* 443, 698, 107-E1 (1995)

A New Desorption Mechanism for Condensed Phase Interstellar CO. *Fedor Dzegilenko & Eric Herbst.* 443, L81, 112-A11 (1995)

Interstellar Graphitic Particles Generated by Annealing of Nanodiamonds and Their Relation to the 2175 Å Peak Carrier. *Daniel Ugarte.* 443, L85, 112-B4 (1995)

Measurements of the Millimeter-Wave Spectrum of Interstellar Dust Emission. *M. L. Fischer, A. Clapp, M. Devlin, J. O. Gundersen, A. E. Lange, P. M. Lubin, P. R. Meinhold, P. L. Richards, & G. F. Smoot.* 444, 226, 116-E7 (1995)

Grain Formation around Carbon Stars. I. Stationary Outflow Models. *Michael P. Egan & Chun Ming Leung.* 444, 251, 117-A1 (1995)

A Dehydrogenation Study of Cosmic Carbon Analogue Grains. *V. Mennella, L. Colangeli, A. Blanco, E. Bussoletti, S. Fonti, P. Palumbo, & H. C. Mertins.* 444, 288, 117-D4 (1995)

The Size Distribution of Interstellar Dust Particles as Determined from Polarization: Spheroids. *Sang-Hee Kim & P. G. Martin.* 444, 293, 117-D13 (1995)

The Structure of the Dust Shells around IRC +10216. *G. C. Sloan & M. P. Egan.* 444, 452, 119-G1 (1995)

The Dust Disk around the Vega-Excess Star SAO 26804. *C. J. Skinner, R. J. Sylvester, J. R. Graham, M. J. Barlow, M. Meixner, E. Keto, J. F. Arens, & J. G. Jernigan.* 444, 861, 128-C13 (1995)

Diamond, Aromatic, and Aliphatic Components of Interstellar Dust Grains: Random Covalent Networks in Carbonaceous Grains. *W. W. Duley.* 445, 240, 135-G7 (1995)

Magnetic Fields around Bok Globules: CCD Polarimetry of CB 4. *Brian D. Kane, Dan P. Clemens, Robert W. Leach, & Richard Barvainis.* 445, 269, 136-C2 (1995)

Infrared Emission and Dynamics of Outflows in Late-Type Stars. *Željko Ivezić & Moshe Elitzur.* 445, 415, 138-C6 (1995)

A General Physicochemical Model of the Inner Coma of Active Comets. I. Implications of Spatially Distributed Gas and Dust Production. *J. F. Crifo.* 445, 470, 139-A12 (1995)

On the Value of GEMS (Glass with Embedded Metal and Sulphides). *P. G. Martin.* 445, L63, 141-C8 (1995)

Ultraviolet Interstellar Linear Polarization. II. The Wavelength Dependence. *Geoffrey C. Clayton, Michael J. Wolff, R. G. Allen, & O. L. Lupie.* 445, 947, 148-C11 (1995)

An *HST* Archival Study of Galactic Interstellar Zinc and Chromium. *Katherine C. Roth & J. Chris Blades.* 445, L95, 150-F11 (1995)

Soft X-Ray Flashes of Gamma-Ray Bursts as Tracers of the Distance of the Bursters. *S. Klose.* 446, 261, 156-G3 (1995)

Neural Network Classification of the Near-Infrared Spectra of A-Type Stars. *Wm. Bruce Weaver & Ana V. Torres-Dodgen.* 446, 300, 157-D1 (1995)

UIT and Optical Imagery of Large Magellanic Cloud Associations LH 52 and LH 53: Ages and Initial Mass Function Slopes. *Robert S. Hill, K.-P. Cheng, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 446, 622, 164-F10 (1995)

Correlation between the Spectral Index and the Degree of Crystallization of Carbon and Graphite Grains. *C. Koike, S. Kimura, C. Kaito, H. Suto, H. Shibai, T. Nagata, T. Tanabe, & Y. Saito.* 446, 902, 168-F1 (1995)

Scattering Properties of the Dust in the Reflection Nebula IC 435. *Daniela Calzetti, Ralph C. Bohlin, Karl D. Gordon, Adolf N. Witt, & Luciana Bianchi.* 446, L97, 171-C7 (1995)

High-Resolution Far-Infrared Observations of DR 21. *Cecilia Colomé, Paul M. Harvey, Daniel F. Lester, Murray F. Campbell, & Harold M. Butner.* 447, 236, 175-E5 (1995)

Dust Evaporation in Protostellar Cores. *Paolo Lenzuni, Hans-Peter Gail, & Thomas Henning.* 447, 848, 187-E10 (1995)

Carbon and Nitrogen Isotopes in Type II Supernova Diamonds. *Donald D. Clayton, Bradley S. Meyer, Chris I. Sanderson, Sara S. Russell, & C. T. Pillinger.* 447, 894, 188-C2 (1995)

EXAFS and XANES: New Astrophysical Tools to Study the Solid State Structure of Interstellar Grains. *Jonathan W. Woo.* 447, L129, 191-C8 (1995)

Large ^{18}O Excesses in Circumstellar Graphite Grains from the Murchison Meteorite: Indication of a Massive-Star Origin. *Sachiko Amari, Ernst Zinner, & Roy S. Lewis.* 447, L147, 191-F4 (1995)

Interstellar Grains in Elliptical Galaxies: Grain Evolution. *John C. Tsai & William G. Mathews.* 448, 84, 193-C12 (1995)

A Model for the Amorphous Carbon Grains around C-rich Objects. *A. Blanco, S. Fonti, & V. Orofino.* 448, 339, 196-G6 (1995)

1 Millimeter Polarimetry of Young Stellar Objects: Low-Mass Protostars and T Tauri Stars. *Motohide Tamura, J. H. Hough, & Saeko S. Hayashi.* 448, 346, 197-A2 (1995)

A Search for Polarization in Diffuse Interstellar Bands toward HD 197770. *A. J. Adamson & D. C. B. Whittet.* 448, L49, 200-B3 (1995)

Does Near-Infrared Polarimetry Reveal the Magnetic Field in Cold Dark Clouds? *Alyssa A. Goodman, Terry J. Jones, Elizabeth A. Lada, & Philip C. Myers.* 448, 748, 205-B4 (1995)

IRAS 08159−3543: Optical Detection of the Dusty, Neutral Bipolar Wind of a Luminous Young Stellar Object. *Th. Neckel & H. J. Staude.* 448, 832, 206-D1 (1995)

A Model of the Diffuse Ultraviolet Radiation Field. *Jayant Murthy & R. C. Henry.* 448, 848, 206-E7 (1995)

The Infrared Spectrum of the Optically Thin Dust Shell of V705 Cassiopeiae (Nova Cassiopeiae 1993). *R. D. Gehrz, M. A. Greenhouse, T. L. Hayward, J. R. Houck, C. G. Mason, & C. E. Woodward.* 448, L119, 209-E9 (1995)

Infrared Diagnostics of the Formation of H_2 on Interstellar Dust. *J. Le Bourlot, G. Pineau des Forêts, E. Roueff, A. Dalgarno, & R. Gredel.* 449, 178, 212-E11 (1995)

The X-Ray Halo of Nova V1974 Cygni (Nova Cygni 1992) and the Nature of Interstellar Dust. *John S. Mathis, David Cohen, John P. Finley, & J. Krautter.* 449, 320, 214-E1 (1995)

A New 3.25 Micron Absorption Feature Toward Monoceros R2/IRS 3. *K. Sellgren, T. Y. Brooke, R. G. Smith, & T. R. Geballe.* 449, L69, 217-B8 (1995)

Dust and Molecular Gas in the Barred Spiral Galaxy NGC 1530. *Michael W. Regan, Stuart N. Vogel, & Peter J. Teuben.* 449, 576, 220-F10 (1995)

The Distribution of Warm Dust in the Star-forming Region Cepheus A: Infrared Constraints. *Cecilia Colomé & Paul M. Harvey.* 449, 656, 221-F8 (1995)

Interstellar Lead. *D. E. Welty, L. M. Hobbs, J. T. Lauroesch, D. C. Morton, & D. G. York.* 449, L135, 227-C8 (1995)

The Formation of Condensates on Dust in Interstellar Clouds. *W. W. Duley & R. G. Smith.* 450, 179, 230-D13 (1995)

Photoevaporation of Dusty Clouds near Active Galactic Nuclei. *Edward A. Pier & G. Mark Voit.* 450, 628, 239-D13 (1995)

The Shapes and Alignment Properties of Interstellar Dust Grains. *Roger H. Hildebrand & Mark Dragovan.* 450, 663, 239-G13 (1995)

Dust Emission from L1641N: An Optically Thick Circumstellar Disk? *H. Chen, J.-H. Zhao, & N. Ohashi.* 450, L71, 245-A1 (1995)

Far-Infrared Spectral Observations of the Galaxy by *COBE*. *W. T. Reach, E. Dwek, D. J. Fixsen, T. Hewagama, J. C. Mather, R. A. Shafer, A. J. Banday, C. L. Bennett, E. S. Cheng, R. E. Eplee, Jr., D. Leisawitz, P. M. Lubin, S. M. Read, L. P. Rosen, F. G. D. Shuman, G. F. Smoot, T. J. Sodroski, & E. L. Wright.* 451, 188, 248-E10 (1995)

On the Electronic Structure of Small Carbon Grains of Astrophysical Interest. *V. Mennella, L. Colangeli, E. Bussoletti, G. Monaco, P. Palumbo, & A. Rotundi.* 100, 149, 47-G9 (1995)

R_V-dependent Interstellar Photodestruction Rates. *Cesare Cecchi-Pestellini, Santi Aiello, & Bruno Barsella.* 100, 187, 48-E2 (1995)

Stellar Contrails in Quasi-stellar Objects: The Origin of Broad Absorption Lines. *Nick Scoville & Colin Norman.* 451, 510, 254-C10 (1995)

Mechanical Alignment of Suprathermally Rotating Grains. *A. Lazarian.* 451, 660, 256-C11 (1995)

Problems with Cold Clouds and Cooling Flows. *G. Mark Voit & Megan Donahue.* 452, 164, 264-C9 (1995)

ARGO 1993 Observations of Interstellar Dust Emission. *S. Masi, E. Aquilini, A. Boscaleri, P. de Bernardis, M. De Petris, M. Gervasi, L. Martinis, V. Natale, P. Palumbo, & F. Scaramuzzi.* 452, 253, 265-E9 (1995)

The Nebular Extinction in the Orion Nebula. *Manuel A. Bautista, Richard W. Pogge, & D. L. DePoy.* 452, 685, 274-B7 (1995)

The Massive Post–Red Supergiants IRC +10420 and HD 179821. *Joel H. Kastner & David A. Weintraub.* 452, 833, 276-B7 (1995)

Can Dust Formation in Evolved Stars Be Suppressed near Active Galactic Nuclei? *T. W. Hartquist, R. H. Durisen, J. E. Dyson, J. M. C. Rawlings, D. A. Williams, & R. J. R. Williams.* 453, 77, 282-C3 (1995)

Davis-Greenstein Alignment of Nonspherical Grains. *A. Lazarian.* 453, 229, 284-C5 (1995)

Grain Alignment by Ambipolar Diffusion in Molecular Clouds. *W. G. Roberge, S. Hanany, & D. W. Messinger.* 453, 238, 284-D3 (1995)

Silicon Nitride from Supernovae. *Larry R. Nittler, Peter Hoppe, Conel M. O'D. Alexander, Sachiko Amari, Peter Eberhardt, Xia Gao, Roy S. Lewis, Roger Strebel, Robert M. Walker, & Ernst Zinner.* 453, L25, 289-E9 (1995)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. IV. Effect of Ultraviolet Ionization and Magnetically Controlled Infall Rate. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 454, 194, 302-A10 (1995)

The Fragmentation and Vaporization of Dust in Grain-Grain Collisions. *Kazimierz J. Borkowski & Eli Dwek.* 454, 254, 302-G1 (1995)

A Multiwavelength Study of 30 Doradus: The Interstellar Medium in a Low-Metallicity Galaxy. *A. Poglitsch, A. Krabbe, S. C. Madden, T. Nikola, N. Geis, L. E. B. Johansson, G. J. Stacey, & A. Sternberg.* 454, 293, 303-C8 (1995)

Organic Compounds Produced by Photolysis of Realistic Interstellar and Cometary Ice Analogs Containing Methanol. *Max P. Bernstein, Scott A. Sandford, Louis J. Allamandola, Sherwood Chang, & Maureen A. Scharberg.* 454, 327, 303-G1 (1995)

Consequences of Dust in Metal-rich H II Regions. *Joseph C. Shields & Robert C. Kennicutt, Jr.* 454, 807, 313-A1 (1995)

The 30 Micron Emission Band in Carbon-rich Pre–Planetary Nebulae. *A. Omont, S. H. Moseley, P. Cox, W. Glaccum, S. Casey, T. Forveille, Kin-Wing Chan, R. Szczerba, R. F. Loewenstein, P. M. Harvey, & S. Kwok.* 454, 819, 313-B2 (1995)

High-Resolution Far-Infrared Observations and Radiative-Transfer Models of W3 IRS 4 and IRS 5. *M. F. Campbell, H. M. Butner, P. M. Harvey, N. J. Evans II, M. B. Campbell, & C. N. Sabbey.* 454, 831, 313-C6 (1995)

Facts and Artifacts in Interstellar Diamond Spectra. *H. Mutschke, J. Dorschner, Th. Henning, C. Jäger, & U. Ott.* 454, L157, 316-G8 (1995)

Silicon Monoxide in Sagittarius B2. *Y. Peng, Stuart N. Vogel, & J. E. Carlstrom.* 455, 223, 321-B14 (1995)

High-Resolution Studies of Solid CO in the Taurus Dark Cloud: Characterizing the Ices in Quiescent Clouds. *J. E. Chiar, A. J. Adamson, T. H. Kerr, & D. C. B. Whittet.* 455, 234, 321-C14 (1995)

High-Density Amorphous Ice, the Frost on Interstellar Grains. *P. Jenniskens, D. F. Blake, M. A. Wilson, & A. Pohorille.* 455, 389, 323-D10 (1995)

Deficit of Far-Infrared [C II] Line Emission toward the Galactic Center. *Takao Nakagawa, Yasuo Doi, Yukari Yamashita Yui, Haruyuki Okuda, Kenji Mochizuki, Hiroshi Shibai, Tetsuo Nishimura, & Frank J. Low.* 455, L35, 324-G3 (1995)

Limits on Dust in Rich Clusters of Galaxies from the Color of Background Quasars. *Dan Maoz.* 455, L115, 333-E4 (1995)

Grain Alignment in the Taurus Dark Cloud. *P. A. Gerakines, D. C. B. Whittet, & A. Lazarian.* 455, L171, 334-E7 (1995)

Approaching the Interstellar Grain Organic Refractory Component. *J. Mayo Greenberg, Aigen Li, Celia X. Mendoza-Gómez, Willem A. Schutte, Perry A. Gerakines, & Menno de Groot.* 455, L177, 334-F1 (1995)

A Point in Favor of the Superparamagnetic Grain Hypothesis. *A. A. Goodman & D. C. B. Whittet.* 455, L181, 334-F8 (1995)

Interstellar Extinction from 0.35 to 2.2 Microns: A Study Based on Luminous Southern Stars. *Lida He, D. C. B. Whittet, D. Kilkenny, & J. H. Spencer Jones.* 101, 335, 58-D12 (1995)

ISM: GENERAL

Precision Measurements of Pulsar Dispersion. *J. A. Phillips & A. Wolszczan.* 385, 273, 15-C8 (1992)

The Development of H I Dissociation Zones around New H II Regions. *R. S. Roger & P. E. Dewdney.* 385, 536, 19-G5 (1992)

Physical Properties of Neutral Gas in M31 and the Galaxy. *Robert Braun & René A. M. Walterbos.* 386, 120, 25-E10 (1992)

Systematic Variations in the Wavelength Dependence of Interstellar Linear Polarization. *D. C. B. Whittet, P. G. Martin, J. H. Hough, M. F. Rouse, J. A. Bailey, & D. J. Axon.* 386, 562, 32-C14 (1992)

Inhibition of Electron Thermal Conduction by Electromagnetic Instabilities. *Amir Levinson & David Eichler.* 387, 212, 39-E5 (1992)

Interstellar Matter in Early-Type Galaxies. II. The Relationship between Gaseous Components and Galaxy Types. *Joel N. Bregman, David E. Hogg, & Morton S. Roberts.* 387, 484, 44-F9 (1992)

The Semicircular Shell of CTB 109. *Zhenru Wang, Quinyue Qu, Ding Luo, Richard McCray, & Mordecai-Mark Mac Low.* 388, 127, 50-E10 (1992)

Velocity Streaming of *IRAS* Main-Sequence Disk Stars and the Episodic Enhancement of Particulate Disks by Interstellar Clouds. *Daniel P. Whitmire, John J. Matese, & Patrick G. Whitman.* 388, 190, 51-D1 (1992)

The Bell Laboratories H I Survey. *Antony A. Stark, Charles F. Gammie, Robert W. Wilson, John Bally, Richard A. Linke, Carl Heiles, & Mark Hurwitz.* 79, 77, 13-D1 (1992)

Infrared Polarimetry and the Galactic Magnetic Field. II. Improved Models. *Terry Jay Jones, Dimitri Klebe, & John M. Dickey.* 389, 602, 69-A1 (1992)

Detection of a Local High-Velocity Absorption-Line System toward HD 93721. *B. E. Penprase & J. C. Blades.* 391, 276, 89-D1 (1992)

Incorporation of Density Fluctuations into Photoionization Calculations. *Robert E. Williams.* 392, 99, 102-C1 (1992)

Dynamics of Fronts in Thermally Bistable Fluids. *Christian Elphick, Oded Regev, & Nir Shaviv.* 392, 106, 102-C9 (1992)

Long-Term Pulsar Flux Monitoring and Refractive Interstellar Scintillation. *Victoria M. Kaspi & Daniel R. Stinebring.* 392, 530, 108-G8 (1992)

Highly Ionized Gas in the Gum Nebula and Elsewhere: A Comparison of *IUE* and *Copernicus* Satellite Results. *Richard J. Edgar & Blair D. Savage.* 396, 124, 156-F4 (1992)

Submillimeter Detection of Extragalactic C I Emission: IC 342. *Thomas H. Büttgenbach, Jocelyn Keene, T. G. Phillips, & Christopher K. Walker.* 397, L15, 173-C1 (1992)

Resolving the Forbidden-Line Emission Regions of Young Stellar Objects: DD Tauri. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 397, L107, 181-D7 (1992)

CN Rotational Excitation. *E. Palazzi, N. Mandolesi, & Philippe Crane.* 398, 53, 182-F5 (1992)

Normal O Stars in Dense Media Generate LINERs. *Joseph C. Shields.* 399, L27, 200-C1 (1992)

Heating the Warm Ionized Medium. *R. J. Reynolds & D. P. Cox.* 400, L33, 214-D10 (1992)

The Low Filling Factor of Dust in the Galaxy. *Jayant Murthy, H. J. Walker, & R. C. Henry.* 401, 574, 229-F8 (1992)

A Possible Connection between Enhanced CH^+ and Intense Far-Ultraviolet Radiation Fields. *Theodore P. Snow.* 402, L73, 13-A7 (1993)

Refractive Interstellar Scintillation of Pulsar Intensities at 74 MHz. *Y. Gupta, B. J. Rickett, & W. A. Coles.* 403, 183, 16-C3 (1993)

Formation of Globular Clusters from Gas in Large-Scale Unorganized Motion in Galaxies. *Yasuki Kumai, Baidyanath Basu, & Mitsuaki Fujimoto.* 404, 144, 29-G1 (1993)

Temporal Variations of Pulsar Dispersion Measures. *D. C. Backer, S. Hama, S. Van Hook, & R. S. Foster.* 404, 636, 36-G10 (1993)

Galactic Fine-Structure Lines: Morphologies of the Warm Ionized Interstellar Medium. *S. J. Petuchowski & C. L. Bennett.* 405, 591, 50-D9 (1993)

A New Survey of Nebulae around Galactic Wolf-Rayet Stars in the Northern Sky. *Grant J. Miller & You-Hua Chu.* 85, 137, 7-G9 (1993)

Dust Coagulation. *Arati Chokshi, A. G. G. M. Tielens, & D. Hollenbach.* 407, 806, 80-E1 (1993)

The X-Ray Shadow of the High-Latitude Molecular Cloud MBM 12. *S. L. Snowden, D. McCammon, & F. Verter.* 409, L21, 104-D1 (1993)

Discontinuities in the Dynamic Spectrum of the Pulsar 0823+26. *Andrew W. Clegg, Ralph L. Fiedler, & James M. Cordes.* 409, 691, 107-E13 (1993)

On the Origin of the Soft X-Ray Background. *Q. Daniel Wang & Richard McCray.* 409, L37, 111-B8 (1993)

A VLA Survey of Optically Visible Galactic H II Regions. *Michel Fich.* 86, 475, 20-F7 (1993)

Pulsar Distances and the Galactic Distribution of Free Electrons. *J. H. Taylor & J. M. Cordes.* 411, 674, 138-B3 (1993)

On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. II. Application to the Interstellar Medium. *Antonio Parravano, Miguel H. Ibáñez S., & César A. Mendoza B.* 412, 625, 151-E6 (1993)

Hydrodynamical Simulations of Star-Gas Interactions in the Interstellar Medium with an External Gravitational Potential. *Alexander Rosen, Joel N. Bregman, & Michael L. Norman.* 413, 137, 157-G5 (1993)

OSSE Observations of Galactic 511 keV Positron Annihilation Radiation: Initial Phase I Results. *W. R. Purcell, D. A. Grabelsky, M. P. Ulmer, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, & G. V. Jung.* 413, L85, 168-E4 (1993)

On Graphite and the 2175 Å Extinction Profile. *B. T. Draine & Sangeeta Malhotra.* 414, 632, 179-B1 (1993)

Excitation Rate Coefficients and Line Ratios for the Optical and Ultraviolet Transitions in S II. *Wei Cai & Anil K. Pradhan.* 88, 329, 44-C7 (1993)

Arecibo Observation of B2 0902+343 in the 21 Centimeter Line at Redshift 3.4. *F. H. Briggs, E. Sorar, & A. Taramopoulos.* 415, L99, 200-A2 (1993)

Proximity Effects in Clusters of Particles. *François Rouleau & P. G. Martin.* 416, 707, 212-B10 (1993)

Evolution of Supernova Remnant Bubbles in a Warm Diffuse Medium: Survey of Results from One-dimensional Models and Their Impact on Estimates of Interstellar Porosity. *Jonathan D. Slavin & Donald P. Cox.* 417, 187, 219-F12 (1993)

Interaction between the Supernova Remnant CTB 80 and the Ambient Interstellar Medium: H I and CO Observations. *Bon-Chul Koo, Min-Su Yun, Paul T. P. Ho, & Youngung Lee.* 417, 196, 219-G10 (1993)

Radio Dispersion as a Diagnostic of Gamma-Ray Burst Distances. *David M. Palmer.* 417, L25, 223-A9 (1993)

EUVE First Light Observation of the Diffuse Sky Background. *Richard Lieu, Stuart Bowyer, Michael Lampton, Patrick Jelinsky, & Jerry Edelstein.* 417, L41, 223-C8 (1993)

Dynamics of Conductive/Cooling Fronts: Cloud Implosion and Thermal Solitons. *A. Ferrara & Yu. Shchekinov.* 417, 595, 226-F13 (1993)

A Well-shaped Bipolar Outflow Sheil in Monoceros R2. *Taoling Xie, Paul F. Goldsmith, & Nimesh Patel.* 419, L33, 252-E7 (1993)

Emission from Circumstellar Interaction in Normal Type II Supernovae. *Roger A. Chevalier & Claes Fransson.* 420, 268, 4-C1 (1994)

Al III, Si IV, and C IV Absorption toward ζ Ophiuchi: Evidence for Photoionized and Collisionally Ionized Gas. *Kenneth R. Sembach, Blair D. Savage, & Edward B. Jenkins.* 421, 585, 25-D12 (1994)

A Critical Evaluation of Semianalytic Methods in the Study of Centrally Heated, Unresolved, Infrared Sources. *Steven D. Doty & Chun Ming Leung.* 424, 729, 73-G10 (1994)

A Rocket-borne Observation of the Far-Infrared Sky at High Galactic Latitude. *M. Kawada, J. J. Bock, V. V. Hristov, A. E. Lange, H. Matsuhara, T. Matsumoto, S. Matsuura, P. D. Mauskopf, P. L. Richards, & M. Tanaka.* 425, L89, 94-E11 (1994)

Pattern Evolution in Thermally Bistable Media. *Vered Aharonson, Oded Regev, & Nir Shaviv.* 426, 621, 106-B9 (1994)

The [N II] 205 Micron Line in M82: The Warm Ionized Medium. *S. J. Petuchowski, C. L. Bennett, Michael R. Haas, Edwin F. Erickson, Steven D. Lord, Robert H. Rubin, Sean W. J. Colgan, & D. J. Hollenbach.* 427, L17, 117-C8 (1994)

Highly Ionized Gas in the Galactic Halo. *J. Michael Shull & Jonathan D. Slavin.* 427, 784, 122-D6 (1994)

The Photoelectric Heating Mechanism for Very Small Graphitic Grains and Polycyclic Aromatic Hydrocarbons. *E. L. O. Bakes & A. G. G. M. Tielens.* 427, 822, 122-G8 (1994)

The Ionization of the Diffuse Ionized Gas. *H. Domgörgen & John S. Mathis.* 428, 647, 138-D1 (1994)

High-Precision Timing of Millisecond Pulsars. III. Long-Term Monitoring of PSRs B1855+09 and B1937+21. *V. M. Kaspi, J. H. Taylor, & M. F. Ryba.* 428, 713, 139-B9 (1994)

Photoionization of the Diffuse Interstellar Medium and Galactic Halo by OB Associations. *James B. Dove & J. Michael Shull.* 430, 222, 161-G7 (1994)

A Survey of Nebulae around Galactic Wolf-Rayet Stars in the Southern Sky. I. *A. P. Marston, Y.-H. Chu, & G. Garcia-Segura.* 93, 229, 44-G7 (1994)

The Molecular Content of the Rosette's Teardrops. *E. González-Alfonso & J. Cernicharo.* 430, L125, 175-A7 (1994)

Ionization Nebulae Surrounding Supersoft X-Ray Sources. *S. Rappaport, E. Chiang, T. Kallman, & R. Malina.* 431, 237, 179-B1 (1994)

Results of a Five-Year Program of Multifrequency Monitoring of Low-Frequency Variable Radio Sources. *K. J. Mitchell, Brian Dennison, J. J. Condon, Daniel R. Altschuler, H. E. Payne, S. L. O'Dell, & J. J. Broderick.* 93, 441, 48-F6 (1994)

On the Thermochemical Stability of the Pregalactic Gas. I. The Equilibrium States. *Patricia Rosenzweig, Antonio Parravano, Miguel H. Ibáñez S., & Yu. I. Izotov.* 432, 485, 202-A7 (1994)

Toward a Theory of Interstellar Turbulence. I. Weak Alfvénic Turbulence. *S. Sridhar & P. Goldreich.* 432, 612, 203-E11 (1994)

Morphology of the Interstellar Cooling Lines Detected by *COBE*. *C. L. Bennett, D. J. Fixsen, G. Hinshaw, J. C. Mather, S. H. Moseley, E. L. Wright, R. E. Eplee, Jr., J. Gales, T. Hewagama, R. B. Isaacman, R. A. Shafer, & K. Turpie.* 434, 587, 235-G13 (1994)

Hot Gas in the Interstellar Medium: A Reanalysis of O VI Absorption Data. *R. L. Shelton & D. P. Cox.* 434, 599, 236-B2 (1994)

Kinematic Distances of Galactic H II Regions from H I Absorption Studies. *Thomas A. Kuchar & T. M. Bania.* 436, 117, 262-G9 (1994)

On the Origin of the Diffuse C^+ 158 Micron Line Emission. *Carl Heiles.* 436, 720, 275-D3 (1994)

Collapse and Fragmentation of Magnetized Cylindrical Clouds. *Kohji Tomisaka.* 438, 226, 4-E3 (1995)

Toward a Theory of Interstellar Turbulence. II. Strong Alfvénic Turbulence. *P. Goldreich & S. Sridhar.* 438, 763, 14-F12 (1995)

EUVE Spectroscopy of ε Canis Majoris (B2 II) from 70 to 730 Å. *J. P. Cassinelli, D. H. Cohen, J. J. MacFarlane, J. E. Drew, A. E. Lynas-Gray, M. G. Hoare, J. V. Vallerga, B. Y. Welsh, P. W. Vedder, I. Hubeny, & T. Lanz.* 438, 932, 17-A8 (1995)

A Search for the He I λ5876 Recombination Line from the Diffuse Interstellar Medium. *R. J. Reynolds & S. L. Tufte.* 439, L17, 30-A1 (1995)

The Hot Gas Filling Factor in the Vicinity of the Sun. *K. M. Ferrière.* 441, 281, 63-B12 (1995)

A Turbulent Model for the Interstellar Medium. I. Threshold Star Formation and Self-Gravity. *Enrique Vázquez-Semadeni, Thierry Passot, & Annick Pouquet.* 441, 702, 71-F1 (1995)

Widespread Molecular Emission in the Galactic Plane from Species Other Than ^{12}CO. *Harvey S. Liszt.* 442, 163, 79-D8 (1995)

Can We Improve upon Astronomical Silicate? *Sang-Hee Kim & P. G. Martin.* 442, 172, 79-E6 (1995)

Images of HCO^+ (1–0) Emission in a Molecular Cloud near 1E 1740.7−2942. *J. A. Phillips & T. Joseph W. Lazio.* 442, L37, 85-B7 (1995)

The Neutral Atomic Phases of the Interstellar Medium. *Mark G. Wolfire, David Hollenbach, Christopher F. McKee, A. G. G. M. Tielens, & E. L. O. Bakes.* 443, 152, 97-C3 (1995)

On the Charge Distribution Function of Dust Grains in a Hot Gas. *C. Cervetto, B. Barsella, & A. Ferrara.* 443, 648, 106-G12 (1995)

Measurements of the Millimeter-Wave Spectrum of Interstellar Dust Emission. *M. L. Fischer, A. Clapp, M. Devlin, J. O. Gundersen, A. E. Lange, P. M. Lubin, P. R. Meinhold, P. L. Richards, & G. F. Smoot.* 444, 226, 116-E7 (1995)

Timing Parameters of 29 Pulsars. *F. Camilo & D. J. Nice.* 445, 756, 145-E11 (1995)

ORFEUS Observations of G191-B2B: Neutral and Ionized Gas in the Local Interstellar Medium. *M. Hurwitz & S. Bowyer.* 446, 812, 167-C4 (1995)

Neutral Hydrogen Absorption Measurements of Four Distant Pulsars and the Electron Density in the Inner Galaxy. *J. M. Weisberg, M. H. Siegel, D. A. Frail, & S. Johnston.* 447, 204, 175-A10 (1995)

Observations of the Galactic and Extragalactic Background with the Far-Ultraviolet Space Telescope (FAUST). *T. P. Sasseen, M. Lampton, S. Bowyer, & X. Wu.* 447, 630, 184-G3 (1995)

Anisotropic Modal Energy Transfer in Interstellar Turbulence. *David Montgomery & William H. Matthaeus.* 447, 706, 185-F10 (1995)

Instabilities in Photoionized Interstellar Gas. *Edvige Corbelli & Andrea Ferrara.* 447, 708, 185-G1 (1995)

A Comparison of Diffuse Ionized and Neutral Hydrogen Away from the Galactic Plane: Hα-emitting H I Clouds. *R. J. Reynolds, S. L. Tufte, D. T. Kung, P. R. McCullough, & C. Heiles.* 448, 715, 204-E12 (1995)

Detection of Hot Gas in the Interstellar Medium. *Jia-Sheng Huang, Antoinette Songaila, Lennox L. Cowie, & Edward B. Jenkins.* 450, 163, 230-C8 (1995)

ISM: GLOBULES

The Molecular Content of the Rosette's Teardrops. *E. González-Alfonso & J. Cernicharo.* 430, L125, 175-A7 (1994)

Modeling Line Profiles of Protostellar Collapse in B335 with the Monte Carlo Method. *Minho Choi, Neal J. Evans II, Erik M. Gregersen, & Yangsheng Wang.* 448, 742, 204-A9 (1995)

Collapse Candidates among the Bok Globules. *Yangsheng Wang, Neal J. Evans II, Shudong Zhou, & Dan P. Clemens.* 454, 217, 302-C9 (1995)

Discovery of Herbig-Haro Objects and Molecular Hydrogen Jets near Bok Globule CB 34. *Miguel C. Moreira & João L. Yun.* 454, 850, 313-E1 (1995)

ISM: H II REGIONS

The Molecular Core in G34.3+0.2: Millimeter Interferometric Observations of HCO^+, $H^{13}CN$, $HC^{15}N$, and SO. *Patricia Carral & William J. Welch.* 385, 244, 15-A4 (1992)

Line-of-Sight Results from H II Region Models. *R. B. Gruenwald & S. M. Viegas.* 78, 153, 3-E7 (1992)

The Molecular Interstellar Medium in Two Giant H II Regions in M33: NGC 604 and NGC 595. *Christine D. Wilson & Nick Scoville.* 385, 512, 19-E5 (1992)

The Development of H I Dissociation Zones around New H II Regions. *R. S. Roger & P. E. Dewdney.* 385, 536, 19-G5 (1992)

The Origin of Broad Emission Lines in the Extragalactic Giant H II Region NGC 2363. *Jean-René Roy, Martin Aubé, Marshall L. McCall, & R. J. Dufour.* 386, 498, 31-E7 (1992)

A CO Study of Sharpless 171: Evidence for Interaction between the H II Region and Its Neighboring Molecular Cloud. *Ji Yang & Yasuo Fukui.* 386, 618, 33-A8 (1992)

Motion at the Ionization Front in the Orion Nebula: A Kinematic Study of the [O I] Line. *C. R. O'Dell & Zheng Wen.* 387, 229, 39-F10 (1992)

Are the NGC 7538 Formaldehyde Masers Really Unusual? *Preethi Pratap, Lewis E. Snyder, & Wolfgang Batrla.* 387, 241, 40-A1 (1992)

The Sharpless 187 Gas Complex: A Multifrequency Study. *G. Joncas, D. Durand, & R. S. Roger.* 387, 591, 46-A9 (1992)

High Spatial Resolution 1.3 Centimeter Imaging of the NGC 2024 Star-forming Region. *R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 388, 489, 56-D1 (1992)

Dense Clumps of Ionized Gas near π Scorpii, as Revealed by the Fine-Structure Excitation of N II. *Frank Bertoldi & Edward B. Jenkins.* 388, 495, 56-D9 (1992)

Spectroscopy of Emission-Line Nebulae in Powerful Radio Galaxies: Interpretation. *S. A. Baum, T. M. Heckman, & W. van Breugel.* 389, 208, 62-E7 (1992)

Thermal Dust Imaging: The Onset of Asymmetry in the Ultracompact H II Region G5.89−0.39. *Roger Ball, John F. Arens, J. Garrett Jernigan, Eric Keto, & Margaret M. Meixner.* 389, 616, 69-B1 (1992)

Small Galactic H II Regions. III. Images and Spectrophotometry of the Ionized Gas. *Deidre A. Hunter.* 79, 469, 20-C13 (1992)

Galactic Worms. I. Catalog of Worm Candidates. *Bon-Chul Koo, Carl Heiles, & William T. Reach.* 390, 108, 75-D6 (1992)

Far-Infrared Observations of M17SW: The Clumpy Structure of the Photodissociation Region. *Margaret Meixner, Michael R. Haas, A. G. G. M. Tielens, E. F. Erickson, & M. Werner.* 390, 499, 81-E3 (1992)

The Radial Distribution of Oxygen in Disk Galaxies. *Dennis Zaritsky.* 390, L73, 84-G7 (1992)

CO Emission from the Dwarf Irregular Galaxy NGC 6822. *Christine D. Wilson.* 391, 144, 87-G1 (1992)

Compact Radio Sources near the Galactic Plane. *D. J. Helfand, S. Zoonematkermani, R. H. Becker, & R. L. White.* 80, 211, 25-B1 (1992)

Emission-Line Objects near Quasi-stellar Object Absorbers. III. Clustering and Colors of Moderate-Redshift H II Regions. *Brian Yanny & Donald G. York.* 391, 569, 95-A8 (1992)

The Powering Sources of the Molecular Outflows in the AFGL 437, AFGL 5142, and AFGL 5157 Regions. *José M. Torrelles, José F. Gómez, Guillem Anglada, Robert Estalella, Rainer Mauersberger, & Carlos Eiroa.* 392, 616, 109-G9 (1992)

The 0623+71 Bow Shock Nebula. *J. M. Hollis, R. J. Oliversen, R. M. Wagner, & W. A. Feibelman.* 393, 217, 116-G3 (1992)

Anomalously High Apparent Abundances of Singly Ionized Helium in the Galactic H II Region W3A. *P. R. Roelfsema, W. M. Goss, & D. C. V. Mallik.* 394, 188, 130-C13 (1992)

Bow Shock Models for the Velocity Structure of Ultracompact H II Regions. *Dave Van Buren & Mordecai-Mark Mac Low.* 394, 534, 136-A7 (1992)

The Compression of the M-0.02-0.07 Molecular Cloud by the Sagittarius A East Shell Source. *E. Serabyn, J. H. Lacy, & J. M. Achtermann.* 395, 166, 142-C1 (1992)

Astro-1 Ultraviolet Imaging of the 30 Doradus and SN 1987A Fields with the Ultraviolet Imaging Telescope. *Kwang-Ping Cheng, Andrew G. Michalitsianos, Paul Hintzen, Ralph C. Bohlin, Robert W. O'Connell, Robert H. Cornett, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L29, 145-A1 (1992)

Ultraviolet Imaging Telescope Ultraviolet Images: Large-Scale Structure, H II Regions, and Extinction in M81. *Jesse K. Hill, Ralph C. Bohlin, Kwang-Ping Cheng, Paul M. N. Hintzen, Wayne B. Landsman, Susan G. Neff, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L37, 145-B9 (1992)

Ultraviolet Imaging Telescope Observations of the Scd Galaxy NGC 628 (M74). *Peter C. Chen, Robert H. Cornett, Morton S. Roberts, Ralph C. Bohlin, Susan G. Neff, Robert W. O'Connell, Ronald A. Parise, Andrew M. Smith, & Theodore P. Stecher.* 395, L41, 145-C5 (1992)

Determination of the He^+/H^+ Ratio from α, β, and γ Radio Recombination Lines. *M. Peimbert, L. F. Rodríguez, T. M. Bania, R. T. Rood, & T. L. Wilson.* 395, 484, 148-E9 (1992)

CNO Abundances and Temperature Fluctuations in the Orion Nebula. *Donald K. Walter, Reginald J. Dufour, & J. Jeff Hester.* 397, 196, 170-D7 (1992)

The Oxygen Abundance Gradient in the Barred Spiral Galaxy NGC 4303. *Pierre Martin & Jean-René Roy.* 397, 463, 176-D13 (1992)

On the Nature of the Bipolar Molecular Outflow in AFGL 437. *J. F. Gómez, J. M. Torrelles, R. Estalella, G. Anglada, L. Verdes-Montenegro, & P. T. P. Ho.* 397, 492, 177-A1 (1992)

IRAS Observations and the Stellar Content of H II Regions in the Large Magellanic Cloud. *Kathleen DeGioia-Eastwood.* 397, 542, 177-F7 (1992)

O-Star Photoionization Models of Liners with Weak [O I] λ6300 Emission. *Alexei V. Filippenko & Roberto Terlevich.* 397, L79, 181-A1 (1992)

High-Resolution Imaging of the Galactic Cloud Monoceros R2. *Constantine P. Gonatas, Patrick Palmer, & G. Novak.* 398, 118, 183-D7 (1992)

Detection of [Fe II] Emission in the Galactic Center. *D. L. DePoy.* 398, 512, 190-E1 (1992)

Tests of Shock Chemistry in IC 443G. *B. E. Turner, Kin-Wing Chan, S. Green, & D. A. Lubowich.* 399, 114, 196-E12 (1992)

Infrared Spectroscopy of Dense Clouds in the C−H Stretch Region: Methanol and "Diamonds." *L. J. Allamandola, S. A. Sandford, A. G. G. M. Tielens, & T. M. Herbst.* 399, 134, 196-G7 (1992)

Imaging Spectrophotometry of the Orion Nebula Core. I. Emission-Line Mapping and Physical Conditions. *Richard W. Pogge, J. Michael Owen, & Bruce Atwood.* 399, 147, 197-A9 (1992)

Normal O Stars in Dense Media Generate LINERs. *Joseph C. Shields.* 399, L27, 200-C1 (1992)

Extinction and Scattering in the Orion Nebula: Comparison of Optical and VLA 21 Centimeter Studies. *C. R. O'Dell, Donald K. Walter, & Reginald J. Dufour.* 399, L67, 200-G12 (1992)

Two-Stage Starbursts in the Large Magellanic Cloud: N11 as a Once and Future 30 Doradus. *Nolan R. Walborn & Joel Wm. Parker.* 399, L87, 201-C5 (1992)

Heating the Warm Ionized Medium. *R. J. Reynolds & D. P. Cox.* 400, L33, 214-D10 (1992)

On Determining the Primordial Helium Abundance from the Spectra of H II Galaxies. *Alison Campbell.* 401, 157, 223-A1 (1992)

Radio Continuum and Radio Recombination Line Observations of Sagittarius B1 and G0.6−0.0. *David M. Mehringer, F. Yusef-Zadeh, Patrick Palmer, & W. M. Goss.* 401, 168, 223-B1 (1992)

VLBI Observations of the 6.7 GHz Methanol Masers toward W3(OH). *K. M. Menten, M. J. Reid, P. Pratap, J. M. Moran, & T. L. Wilson.* 401, L39, 227-F1 (1992)

The Environments of Young Stars: Mid-Infrared and Molecular Line Imaging. *Eric Keto, Deanne Proctor, Roger Ball, John Arens, & Garrett Jernigan.* 401, L113, 233-E11 (1992)

Dense Cores in L1204/S140: Star Formation and Velocity Shifts. *M. Tafalla, R. Bachiller, & J. Martín-Pintado.* 403, 175, 16-B8 (1993)

New 3 Millimeter Observations of Interstellar HNO: Reinstating a Discredited Identification. *Lewis E. Snyder, Yi-Jehng Kuan, L. M. Ziurys, & J. M. Hollis.* 403, L17, 20-C1 (1993)

Identification of Velocity Systems in the Inner Orion Nebula. *C. R. O'Dell, Jacobus H. Valk, Zheng Wen, & David M. Meyer.* 403, 678, 24-B4 (1993)

158 Micron [C II] Mapping of the Orion Molecular Cloud. *G. J. Stacey, D. T. Jaffe, N. Geis, R. Genzel, A. I. Harris, A. Poglitsch, J. Stutzki, & C. H. Townes.* 404, 219, 30-E11 (1993)

PIG (Partially Ionized Globule) Anatomy: Density and Temperature Structure of the Bright-rimmed Globule IC 1396E. *E. Serabyn, R. Güsten, & L. Mundy.* 404, 247, 31-A1 (1993)

A Circumstellar Molecular Gas Structure Associated with the Massive Young Star Cepheus A–HW 2. *José M. Torrelles, Luis F. Rodríguez, Jorge Cantó, & Paul T. P. Ho.* 404, L75, 40-F1 (1993)

Galactic Fine-Structure Lines: Morphologies of the Warm Ionized Interstellar Medium. *S. J. Petuchowski & C. L. Bennett.* 405, 591, 50-D9 (1993)

The Ionized Gas in the Center and in the Bar of the Spiral Galaxy NGC 6946. *Jean-René Roy & Julien Belley.* 406, 60, 55-G1 (1993)

Microarcsecond Proper Motions of Extragalactic Water Vapor Masers in M33. *L. J. Greenhill, J. M. Moran, M. J. Reid, K. M. Menten, & H. Hirabayashi.* 406, 482, 63-F13 (1993)

Diagonalization of the Velocity Variance/Covariance Matrix as a Diagnostic of Maser Proper Motions. *E. E. Bloemhof.* 406, L75, 68-E9 (1993)

Optical Emission-Line Properties of M33 Supernova Remnants. *R. Chris Smith, Robert P. Kirshner, William P. Blair, Knox S. Long, & P. Frank Winkler.* 407, 564, 77-E9 (1993)

Motion in the Orion Nebula: A Kinematic Study of [S III]. *Zheng Wen & C. R. O'Dell.* 409, 262, 100-D1 (1993)

Further Studies on the Champagne Phase of GM 24 (IRAS 17136−3617). *J. F. Gómez, J. M. Torrelles, M. Tapia, Y. Gómez, L. F. Rodríguez, M. Roth, & P. T. P. Ho.* 409, 269, 100-D10 (1993)

From Bipolar to Quadrupolar: The Collimation Processes of the Cepheus A Outflow. *José M. Torrelles, Lourdes Verdes-Montenegro, Paul T. P. Ho, Luis F. Rodríguez, & Jorge Cantó.* 410, 202, 114-F1 (1993)

New 325 MHz Observations of H II Galaxies: The Mechanisms That Shape the Unusual Radio Spectra. *Hans-Jörg Deeg, Elias Brinks, Neb Duric, Uli Klein, & Evan Skillman.* 410, 626, 121-D13 (1993)

Discovery of New Objects in the Orion Nebula on *HST* Images: Shocks, Compact Sources, and Protoplanetary Disks. *C. R. O'Dell, Zheng Wen, & Xihai Hu.* 410, 696, 122-C11 (1993)

A VLA Survey of Optically Visible Galactic H II Regions. *Michel Fich.* 86, 475, 20-F7 (1993)

Abundances of H II Regions in Early-Type Spiral Galaxies. *M. S. Oey & R. C. Kennicutt, Jr.* 411, 137, 128-G3 (1993)

High-Resolution H I Observations of H II Regions. III. Photodissociation Regions and the Magnetic Field near Orion B. *Paul P. van der Werf, W. M. Goss, Carl Heiles, R. M. Crutcher, & T. H. Troland.* 411, 247, 130-C8 (1993)

Spatially Resolved Optical and Near-Infrared Spectroscopy of I Zw 18. *Evan D. Skillman & Robert C. Kennicutt, Jr.* 411, 655, 137-G8 (1993)

Magnetic Fields in Massive Cloud Cores: Comparison of MILLIPOL and *IRAS* Results. *Brian D. Kane, Dan P. Clemens, Richard Barvainis, & Robert W. Leach.* 411, 708, 138-E1 (1993)

Radio Continuum and Radio Recombination Line Observations of Sagittarius B2. *David M. Mehringer, Patrick Palmer, W. M. Goss, & F. Yusef-Zadeh.* 412, 684, 152-C11 (1993)

Detection of the [N II] 122 and 205 Micron Lines: Densities in G333.6−0.2. *Sean W. J. Colgan, Michael R. Haas, Edwin F. Erickson, Robert H. Rubin, Janet P. Simpson, & R. W. Russell.* 413, 237, 159-B13 (1993)

Compact Ammonia Sources toward the G10.5+0.0 H II Region Complex. *Guido Garay, James M. Moran, & Luis F. Rodríguez.* 413, 582, 163-F8 (1993)

Cometary Globules in the Southeast Quadrant of the Rosette Nebula. *Nimesh A. Patel, Taoling Xie, & Paul F. Goldsmith.* 413, 593, 163-G7 (1993)

An H II Region beyond the Optical Disk of the Galaxy. *E. J. de Geus, S. N. Vogel, S. W. Digel, & R. A. Gruendl.* 413, L97, 168-F7 (1993)

Hidden Supernova Remnants in the Large Magellanic Cloud H II Complex N44. *You-Hua Chu, Mordecai-Mark Mac Low, Guillermo Garcia-Segura, Bart Wakker, & Robert C. Kennicutt, Jr.* 414, 213, 172-F2 (1993)

Continuum Hydrodynamical Equations for Multiphase Astrophysical Flows. *S. Pistinner & G. Shaviv.* 414, 612, 178-G5 (1993)

The O^{++}/H^{+} Abundance Ratio in Gaseous Nebulae Derived from Recombination Lines. *M. Peimbert, P. J. Storey, & S. Torres-Peimbert.* 414, 626, 179-A7 (1993)

Bright Planetary Nebulae as Probes of Chemical Evolution. *Michael G. Richer.* 415, 240, 188-A6 (1993)

Excitation Rate Coefficients and Line Ratios for the Optical and Ultraviolet Transitions in S II. *Wei Cai & Anil K. Pradhan.* 88, 329, 44-C7 (1993)

A Cold H II Region in the Molecular Globule G70.7+1.2. *J. A. Phillips, J. S. Onello, & S. R. Kulkarni.* 415, L143, 200-F8 (1993)

An Hα Atlas of Nearby Southern Spiral Galaxies. *Stuart D. Ryder & Michael A. Dopita.* 88, 415, 45-F7 (1993)

The Diffuse Ionized Interstellar Medium: Structures Resulting from Ionization by O Stars. *Walter Warren Miller III & Donald P. Cox.* 417, 579, 226-E7 (1993)

High-Resolution Centimeter Radio Continuum and Ammonia Maser Observations of the W51 Region of Star Formation. *R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 417, 645, 227-D1 (1993)

VLA Radio Recombination Line Observations of Ionized Gas in the -30 Kilometers per Second Molecular Cloud (G0.04+0.03) near the Galactic Center. I. The Discrete Radio Sources. *Jun-Hui Zhao, K. Desai, W. M. Goss, & F. Yusef-Zadeh.* 418, 235, 234-A1 (1993)

VLA Observations of Strong *IRAS* Point Sources Associated with Compact H II Regions. *Guido Garay, Luis F. Rodríguez, James M. Moran, & Ed Churchwell.* 418, 368, 235-E11 (1993)

Formaldehyde as a Probe of Physical Conditions in Dense Molecular Clouds. *Jeffrey G. Mangum & Alwyn Wootten.* 89, 123, 50-E5 (1993)

The Discovery of a Supernova Remnant Embedded in a Giant H II Region of M33. *Shawn M. Gordon, Robert P. Kirshner, Nebojsa Duric, & Knox S. Long.* 418, 743, 241-F10 (1993)

Chemical Composition of M8 Based on *IUE* and Visual Observations. *M. Peimbert, S. Torres-Peimbert, & R. J. Dufour.* 418, 760, 242-A8 (1993)

On the Formation of Spheroidal Stellar Systems and the Nature of Supersonic Turbulence in Star-forming Regions. *Guillermo Tenorio-Tagle, Casiana Muñoz-Tuñon, & Donald P. Cox.* 418, 767, 242-B3 (1993)

Simulated Ratio Recombination Line Emission at 1.3 Centimeters toward MWC 349. *J. Martín-Pintado, R. Gaume, R. Bachiller, K. Johnston, & P. Planesas.* 418, L79, 245-E2 (1993)

The He I 2.06 Micron to Brackett γ Ratio as a Nebular Diagnostic. *Joseph C. Shields.* 419, 181, 248-D4 (1993)

Luminous Radio-quiet Sources in W3(Main). *E. F. Ladd, J. R. Deane, D. B. Sanders, & C. G. Wynn-Williams.* 419, 186, 248-D11 (1993)

Structure of Dense Cores in M17 SW. I. A Multitransition CS and $C^{34}S$ Study. *Yangsheng Wang, Daniel T. Jaffe, Neal J. Evans II, Masahiko Hayashi, Ken'ichi Tatematsu, & Shudong Zhou.* 419, 707, 256-D12 (1993)

The 150 AU Structure of the Radio Continuum and the Ammonia Bipolar Outflow in CRL 618. *Jesús Martín-Pintado, Ralph Gaume, Rafael Bachiller, & Ken Johnson.* 419, 725, 256-F4 (1993)

H II Regions and the Abundance Properties of Spiral Galaxies. *Dennis Zaritsky, Robert C. Kennicutt, Jr., & John P. Huchra.* 420, 87, 2-B1 (1994)

Element Abundances in H II Galaxies. *Josefa Masegosa, Mariano Moles, & Ana Campos-Aguilar.* 420, 576, 9-G3 (1994)

Nebular Properties from Far-Infrared Spectroscopy. *Robert H. Rubin, Janet P. Simpson, Steven D. Lord, Sean W. J. Colgan, Edwin F. Erickson, & Michael R. Haas.* 420, 772, 12-E1 (1994)

On the Determination of the Number of O Stars in H II Regions and Starburst Galaxies. *William D. Vacca.* 421, 140, 17-F13 (1994)

Constraining the Influence of Star Formation on the Lowest ^{12}CO Line Ratios in M33. *Michele D. Thornley & Christine D. Wilson.* 421, 458, 23-G9 (1994)

Al III, Si IV, and C IV Absorption toward ζ Ophiuchi: Evidence for Photoionized and Collisionally Ionized Gas. *Kenneth R. Sembach, Blair D. Savage, & Edward B. Jenkins.* 421, 585, 25-D12 (1994)

Anatomy of a Photodissociation Region: High Angular Resolution Images of Molecular Emission in the Orion Bar. *Jan A. Tauber, A. G. G. M. Tielens, Margaret Meixner, & Paul F. Goldsmith.* 422, 136, 31-F13 (1994)

The Dust Temperature Gradient in the Rosette Nebula. *R. F. Shipman & F. O. Clark.* 422, 153, 32-A5 (1994)

The W3 IRS 5 Cluster: Radio Continuum and Water Maser Observations. *M. J. Claussen, R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 424, L41, 69-E13 (1994)

A 5 GHz VLA Survey of the Galactic Plane. *Robert H. Becker, Richard L. White, David J. Helfand, & S. Zoonematkermani.* 91, 347, 23-C1 (1994)

The Influence of Bars on the Chemical Composition of Spiral Galaxies. *Pierre Martin & Jean-René Roy.* 424, 599, 72-B10 (1994)

On the Size and Formation Mechanism of the Largest Star-forming Complexes in Spiral and Irregular Galaxies. *Debra Meloy Elmegreen, Bruce G. Elmegreen, Cornelia Lang, & Carnella Stephens.* 425, 57, 80-G11 (1994)

A Near-Infrared Study of the Monoceros R2 Star Formation Region. *Eric M. Howard, Judith L. Pipher, & William J. Forrest.* 425, 707, 90-D12 (1994)

Kinematic Structure of the 30 Doradus Giant H II Region. *You-Hua Chu & Robert C. Kennicutt, Jr.* 425, 720, 90-F1 (1994)

Evolutionary Models for High-Metallicity Giant Extragalactic H II Regions. *Maria Luisa García Vargas & Angeles I. Díaz.* 91, 553, 27-A4 (1994)

Ultracompact H II Regions. II. New High-Resolution Radio Images. *S. Kurtz, E. Churchwell, & D. O. S. Wood.* 91, 659, 28-D1 (1994)

Radio Continuum and Radio Recombination Line Observations of W51. *David M. Mehringer.* 91, 713, 29-A2 (1994)

A Very Metal poor H II Region in the Outer Disk of M101. *Donald R. Garnett & Robert C. Kennicutt, Jr.* 426, 123, 97-F1 (1994)

Oxygen Abundances in Low Surface Brightness Disk Galaxies. *Stacy S. McGaugh.* 426, 135, 97-G3 (1994)

Aperture Synthesis Imaging of Partially Ionized Gas in W48. *Joseph S. Onello, J. A. Phillips, P. Benaglia, W. M. Goss, & Yervant Terzian.* 426, 249, 99-B13 (1994)

A Fabry-Perot Imager for Near-Infrared Astrophysics at the Communications Research Laboratory 1.5 Meter Telescope, and Imaging of Hydrogen Recombination Lines in the Orion Nebula. *Hajime Sugai, Tomonori Usuda, Hirokazu Kataza, Masuo Tanaka, Hironobu Kawabata, Motoko Y. Inoue, Hideki Takami, Tetsuo Aoki, & Norihisa Hiromoto.* 427, 511, 116-C10 (1994)

The H II Regions of NGC 6822. III. A Photometric Atlas. *John Collier & Paul Hodge.* 92, 119, 32-G10 (1994)

A Catalog of Bright-rimmed Clouds with *IRAS* Point Sources: Candidates for Star Formation by Radiation-driven Implosion. II. The Southern Hemisphere. *Koji Sugitani & Katsuo Ogura.* 92, 163, 33-D11 (1994)

Radio Continuum, Ammonia, and Water Maser Observations of Bright, Unassociated *IRAS* Point Sources. *Mari Paz Miralles, Luis F. Rodríguez, & Eugenio Scalise.* 92, 173, 33-F3 (1994)

H II Regions in M81 Group Dwarf Galaxies. *Bryan W. Miller & Paul Hodge.* 427, 656, 120-G11 (1994)

An Analysis of *IRAS*-identified H II Regions and Their Radio Properties. *V. A. Hughes & G. C. MacLeod.* 427, 857, 123-C11 (1994)

Carbon Recombination Lines as a Diagnostic of Photodissociation Regions. *A. Natta, C. M. Walmsley, & A. G. G. M. Tielens.* 428, 209, 130-F12 (1994)

CS Multitransitional Study of Density Distribution in Star-forming Regions. II. The S140 Region. *Shudong Zhou, Harold M. Butner, Neal J. Evans II, Rolf Güsten, Marc L. Kutner, & Lee G. Mundy.* 428, 219, 130-G10 (1994)

Photoevaporation of Disks around Massive Stars and Application to Ultracompact H II Regions. *David Hollenbach, Doug Johnstone, Susana Lizano, & Frank Shu.* 428, 654, 138-D10 (1994)

A Bipolar Outflow of Ionized Gas in K3-50A: H76α Radio Recombination Line and Continuum Observations of K3-50. *C. G. De Pree, W. M. Goss, Patrick Palmer, & Robert H. Rubin.* 428, 670, 138-F1 (1994)

High-Resolution Images of the Dust and Ionized Gas Distribution in the Carina Nebula. *Jonathan B. Z. Whiteoak.* 429, 225, 146-G7 (1994)

The Velocity Structure of the Cometary H II Regions G13.87+0.28, G32.80+0.19B, and G61.48+0.09B1. *Guido Garay, Susana Lizano, & Yolanda Gómez.* 429, 268, 147-D6 (1994)

High-Resolution Observations of a New Ammonia Maser Line in G9.62+0.19. *P. Hofner, S. Kurtz, E. Churchwell, C. M. Walmsley, & R. Cesaroni.* 429, L85, 158-D1 (1994)

Photoionization of the Diffuse Interstellar Medium and Galactic Halo by OB Associations. *James B. Dove & J. Michael Shull.* 430, 222, 161-G7 (1994)

Nebular Properties and the Ionizing Radiation Field in the Galactic Center. *Joseph C. Shields & Gary J. Ferland.* 430, 236, 162-A9 (1994)

The Giant Molecular Cloud Monoceros R2. I. Shell Structure. *Taoling Xie & Paul F. Goldsmith.* 430, 252, 162-B13 (1994)

Cepheus A HW2: A Powerful Thermal Radio Jet. *Luis F. Rodríguez, Guido Garay, Salvador Curiel, Solange Ramírez, José M. Torrelles, Yolanda Gómez, & Arturo Velázquez.* 430, L65, 166-B2 (1994)

The Cosmic Abundance of ^3He. III. Improved Line Parameters for Selected Sources. *Dana S. Balser, T. M. Bania, Charles J. Brockway, Robert T. Rood, & T. L. Wilson.* 430, 667, 170-B8 (1994)

The Molecular Content of the Rosette's Teardrops. *E. González-Alfonso & J. Cernicharo.* 430, L125, 175-A7 (1994)

Detection of Formaldehyde Maser Emission near the Ultracompact H II Region G29.96−0.02. *Preethi Pratap, Karl M. Menten, & Lewis E. Snyder.* 430, L129, 175-A13 (1994)

Diffuse Ionized Gas in the Spiral Galaxy M31. *René A. M. Walterbos & Robert Braun.* 431, 156, 178-B3 (1994)

Spatially Resolved Optical and Near-Infrared Spectroscopy of the Low-Metallicity Galaxy UGC 4483. *Evan D. Skillman, Roberto J. Terlevich, Robert C. Kennicutt, Jr., Donald R. Garnett, & Elena Terlevich.* 431, 172, 178-C9 (1994)

Ionization Nebulae Surrounding Supersoft X-Ray Sources. *S. Rappaport, E. Chiang, T. Kallman, & R. Malina.* 431, 237, 179-B1 (1994)

Ionization Nebulae Surrounding Supersoft X-Ray Sources. *S. Rappaport, E. Chiang, T. Kallman, & R. Malina.* 431, 237, 179-B1 (1994)

Testing for Interaction between the Galaxies NGC 450 and UGC 807. *Mariano Moles, Isabel Márquez, Josefa Masegosa, Ascensión del Olmo, Jaime Perea, & Halton Arp.* 432, 135, 194-G12 (1994)

The Distribution and Nature of Star Formation Regions in NGC 1792. *Michael Dahlem, Dominik J. Bomans, & Jean-Marie Will.* 432, 590, 203-C10 (1994)

VLA Recombination Line Observations of the Cometary H II Region G34.3+0.2: Dynamics and Physical Properties. *Ralph A. Gaume, Alan L. Fey, & Mark J. Claussen.* 432, 648, 204-B1 (1994)

Thermal Infrared Imaging of Subarcsecond Structure in the Trapezium Nebula. *T. L. Hayward, J. R. Houck, & J. W. Miles.* 433, 157, 210-C1 (1994)

Near-Infrared Observations of W51. *Jeffrey D. Goldader & C. G. Wynn-Williams.* 433, 164, 210-D1 (1994)

G5.89−0.39: A Compact H II Region with a Very Dense Circumstellar Dust Torus. *Paul M. Harvey, Daniel F. Lester, Cecilia Colomé, Beverly Smith, Jean-Louis Monin, & Isabelle Vauglin.* 433, 187, 210-F1 (1994)

Two Micron Spectrophotometry of the Orion Nebula and the Detection of Significant [Fe III] Emission. *D. L. DePoy & Richard W. Pogge.* 433, 725, 220-B1 (1994)

Anomalous Balmer Continuum Temperatures in the Orion Nebula. *Donald K. Walter & Reginald J. Dufour.* 434, L29, 232-E5 (1994)

Relative Emission-Line Strengths for the 146 and 63 Micron Transitions in O I and a Comparison with Far-Infrared Observations of Photodissociation Regions. *F. P. Keenan, E. S. Conlon, & R. H. Rubin.* 434, 811, 239-B3 (1994)

The Primordial Helium Abundance from a New Sample of Metal-deficient Blue Compact Galaxies. *Yuri I. Izotov, Trinh X. Thuan, & Valentin A. Lipovetsky.* 435, 647, 255-A5 (1994)

VLA Spectral Line Observations of the H II Complex G34.3+0.2. *Alan L. Fey, Ralph A. Gaume, Gerald E. Nedoluha, & Mark J. Claussen.* 435, 738, 256-C3 (1994)

Kinematic Distances of Galactic H II Regions from H I Absorption Studies. *Thomas A. Kuchar & T. M. Bania.* 436, 117, 262-G9 (1994)

NGC 3603 and Its Wolf-Rayet Stars: Galactic Clone of R136 at the Core of 30 Doradus, but without the Massive Surrounding Cluster Halo. *Anthony F. J. Moffat, Laurent Drissen, & Michael M. Shara.* 436, 183, 263-F7 (1994)

Postrefurbishment Mission *Hubble Space Telescope* Images of the Core of the Orion Nebula: Proplyds, Herbig-Haro Objects, and Measurements of a Circumstellar Disk. *C. R. O'Dell & Zheng Wen.* 436, 194, 263-G8 (1994)

Ultraviolet-illuminated Molecular Cloud Boundaries: Extended [C II] 158 Micron Emission toward L1630. *D. T. Jaffe, S. Zhou, J. E. Howe, F. Herrmann, S. C. Madden, A. Poglitsch, P. P. van der Werf, & G. J. Stacey.* 436, 203, 264-A10 (1994)

A Survey of Nebulae around Galactic Wolf-Rayet Stars in the Southern Sky. II. *A. P. Marston, D. R. Yocum, G. Garcia-Segura, & Y.-H. Chu.* 95, 151, 66-A11 (1994)

Modeling Radiative Transfer in Molecular Clouds. I. HCO^+ in the Star-forming Region W49A North. *Hélène R. Dickel & Lawrence H. Auer.* 437, 222, 286-C4 (1994)

Violent Star Formation in NGC 2363. *Rosa M. González-Delgado, Enrique Pérez, Guillermo Tenorio-Tagle, José M. Vílchez, Elena Terlevich, Roberto Terlevich, Eduardo Telles, José M. Rodríguez-Espinosa, Miguel Mas-Hesse, María Luisa García-Vargas, Ángeles I. Díaz, Jordi Cepa, & Hector Castañeda.* 437, 239, 286-D10 (1994)

A Multiline, Multiresolution VLA Study of the Ultracompact H II Region G29.96−0.02. *A. Afflerbach, E. Churchwell, P. Hofner, & S. Kurtz.* 437, 697, 295-C12 (1994)

The Form of Abundance Gradients in Three Nearby Spiral Galaxies: M33, M81, and M101. *R. B. C. Henry & J. W. Howard.* 438, 170, 3-F1 (1995)

Ultraviolet Imaging Telescope and Optical Emission-Line Observations of H II Regions in M81. *Jesse K. Hill, K. P. Cheng, Ralph C. Bohlin, Robert H. Cornett, P. M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 438, 181, 3-G2 (1995)

Interstellar Scattering toward Cygnus X-3: Measurements of Anisotrophy and of the Inner Scale. *L. A. Molnar, R. L. Mutel, M. J. Reid, & K. J. Johnston.* 438, 708, 14-A2 (1995)

The NGC 7538 IRS 1 Region of Star Formation: Observations of the H66α Recombination Line with a Spatial Resolution of 300 AU. *R. A. Gaume, W. M. Goss, H. R. Dickel, T. L. Wilson, & K. J. Johnston.* 438, 776, 15-A1 (1995)

A Three-dimensional Model of the Orion Nebula. *Zheng Wen & C. R. O'Dell.* 438, 784, 15-A13 (1995)

Nova Persei 1901: Detection of the Site of Its Brightest Light Echo. *R. W. Tweedy.* 438, 917, 16-F13 (1995)

X-Ray Emission from Giant H II Regions in M101. *Rosa Murphy Williams & You-Hua Chu.* 439, 132, 23-A9 (1995)

A Search for the He I λ5876 Recombination Line from the Diffuse Interstellar Medium. *R. J. Reynolds & S. L. Tufte.* 439, L17, 30-A1 (1995)

Radio and *IRAS* Observations of Two Nebulae around WO Stars: G2.4+1.4 in the Galaxy and Sandage H II Region 3 in IC 1613. *W. M. Goss & Tatiana A. Lozinskaya.* 439, 637, 33-B8 (1995)

The Proper Motion and Wind Nebula of the Nearby Millisecond Pulsar J0437−4715. *J. F. Bell, M. Bailes, R. N. Manchester, J. M. Weisberg, & A. G. Lyne.* 440, L81, 58-A10 (1995)

High-Resolution X-Ray Imaging of M33. *Eric Schulman & Joel N. Bregman.* 441, 568, 69-G6 (1995)

A Turbulent Model for the Interstellar Medium. I. Threshold Star Formation and Self-Gravity. *Enrique Vázquez-Semadeni, Thierry Passot, & Annick Pouquet.* 441, 702, 71-F1 (1995)

Intense Radio Outburst from the Supermassive Star η Carinae. *R. A. Duncan, S. M. White, J. Lim, G. J. Nelson, S. A. Drake, & M. R. Kundu.* 441, L73, 76-A6 (1995)

The Distribution of Molecular and Neutral Gas and Magnetic Fields near the Bipolar H II Region S106. *D. A. Roberts, R. M. Crutcher, & T. H. Troland.* 442, 208, 80-A9 (1995)

Very Hot Ionized Material in Sagittarius B2 F. *David M. Mehringer, C. G. De Pree, Ralph A. Gaume, W. M. Goss, & Mark J. Claussen.* 442, L29, 85-A5 (1995)

Detection of a Series of Methanol Maser Lines at 1.9 Millimeter Wavelength. *V. I. Slysh, S. V. Kalenskii, & I. E. Val'tts.* 442, 668, 89-C7 (1995)

The Evolution of C/O in Dwarf Galaxies from *Hubble Space Telescope* FOS Observations. *Donald R. Garnett, Evan D. Skillman, Reginald J. Dufour, Manuel Peimbert, Silvia Torres-Peimbert, Roberto Terlevich, Elena Terlevich, & Gregory A. Shields.* 443, 64, 96-B6 (1995)

6 Centimeter Formaldehyde Absorption toward the Sagittarius B Star-forming Complex. *David M. Mehringer, Patrick Palmer, & W. M. Goss.* 97, 497, 19-B1 (1995)

On the Supersonic Turbulence of NGC 604. *Nanci S. P. Sabalisck, Guillermo Tenorio-Tagle, Héctor O. Castañeda, & Casiana Muñoz-Tuñón.* 444, 200, 116-B8 (1995)

A New Estimate of the Uncertainties in the Primordial Helium Abundance: New Bounds on Ω Baryons. *Dimitar Sasselov & Dalia Goldwirth.* 444, L5, 121-B8 (1995)

The Local Metallicity–Surface Brightness Relationship in Galactic Disks. *Stuart D. Ryder.* 444, 610, 124-F12 (1995)

Consequences of H II Region Models for Absorption Systems in the Quasar Spectra. *R. Srianand & Pushpa Khare.* 444, 643, 125-B10 (1995)

The Stellar Content of 30 Doradus Derived from Spatially Integrated Ultraviolet Spectra: A Test of Spectral Synthesis Models. *William D. Vacca, Carmelle Robert, Claus Leitherer, & Peter S. Conti.* 444, 647, 125-C3 (1995)

Far-Infrared Lines from H II Regions: Abundance Variations in the Galaxy. *Janet P. Simpson, Sean W. J. Colgan, Robert H. Rubin, Edwin F. Erickson, & Michael R. Haas.* 444, 721, 126-C6 (1995)

Socket Stars: *UBVRIJK* Radial Profiles. *Bradley E. Schaefer.* 444, 739, 126-D13 (1995)

Line Broadening in the W3(OH) Champagne Flow. *E. R. Keto, W. J. Welch, M. J. Reid, & P. T. P. Ho.* 444, 765, 127-A8 (1995)

Heavy Element Abundances in a New Sample of Low-Metallicity Blue Compact Galaxies. *Trinh X. Thuan, Yuri I. Izotov, & Valentin A. Lipovetsky.* 445, 108, 133-G5 (1995)

The Oxygen Distribution in NGC 3359 or a Disk Galaxy in the Early Phase of Bar Formation. *Pierre Martin & Jean-René Roy.* 445, 161, 134-F3 (1995)

Anatomy of the Gemini OB1 Molecular Cloud Complex. *John M. Carpenter, Ronald L. Snell, & F. Peter Schloerb.* 445, 246, 136-A4 (1995)

Optical Spectroscopy of Luminous Infrared Galaxies. II. Analysis of the Nuclear and Long-Slit Data. *S. Veilleux, D.-C. Kim, D. B. Sanders, J. M. Mazzarella, & B. T. Soifer.* 98, 171, 23-A8 (1995)

Radio Images of Sagittarius. II. Sagittarius C and Its Neighbors. *Harvey S. Liszt & Robert W. Spiker.* 98, 259, 25-D12 (1995)

A Supergiant Supernova-blown Bubble in the Spiral Galaxy NGC 1620. *J. Patricia Vader & Brian Chaboyer.* 445, 691, 144-F1 (1995)

Rotation and Outflow in Compact H II Regions: VLA Observations of the Molecular and Ionized Gas in NGC 6334A and NGC 6334F. *C. G. De Pree, L. F. Rodríguez, H. R. Dickel, & W. M. Goss.* 447, 220, 175-C8 (1995)

High-Resolution Far-Infrared Observations of DR 21. *Cecilia Colomé, Paul M. Harvey, Daniel F. Lester, Murray F. Campbell, & Harold M. Butner.* 447, 236, 175-E5 (1995)

The Large-Scale Structure, Kinematics, and Evolution of IC 1396. *Nimesh A. Patel, Paul F. Goldsmith, Ronald L. Snell, Thomas Hezel, & Taoling Xie.* 447, 721, 186-A4 (1995)

Identification of Ionizing Sources and Young Stellar Objects in M17. *Margaret Murray Hanson & Peter S. Conti.* 448, L45, 200-A9 (1995)

Identification of Emission-Line Stars in 30 Doradus Using *HST* Observations. *Joel Wm. Parker, Sara R. Heap, & Eliot M. Malumuth.* 448, 705, 204-D11 (1995)

A Comparison of Diffuse Ionized and Neutral Hydrogen Away from the Galactic Plane: Hα-emitting H I Clouds. *R. J. Reynolds, S. L. Tufte, D. T. Kung, P. R. McCullough, & C. Heiles.* 448, 715, 204-E12 (1995)

Radio Recombination Line Observations of Partially Ionized Gas in Galactic H II Regions. *Joseph S. Onello & J. A. Phillips.* 448, 727, 204-G1 (1995)

Si/O Abundance Ratios in Extragalactic H II Regions from Hubble Space Telescope UV Spectroscopy. *D. R. Garnett, R. J. Peimbert,*

S. Torres-Peimbert, G. A. Shields, E. D. Skillman, E. Terlevich, & R. J. Terlevich. 449, L77, 217-C8 (1995)

The Sagittarius B2 Star-forming Region. I. Sensitive 1.3 Centimeter Continuum Observations. *R. A. Gaume, M. J. Claussen, C. G. De Pree, W. M. Goss, & D. M. Mehringer.* 449, 663, 221-G5 (1995)

VLA Spectral Line Observations of a Shocked Cold H II Region in G70.7+1.2. *Joseph S. Onello, C. G. DePree, J. A. Phillips, & W. M. Goss.* 449, L127, 227-B8 (1995)

An H I/Optical Atlas of H II Galaxies and Their Companions. *Christopher L. Taylor, Elias Brinks, Randy M. Grashuis, & Evan D. Skillman.* 99, 427, 41-A2 (1995)

The Mass of a Star Formed in a Cloud Core: Theory and Its Application to the Orion A Cloud. *Takenori Nakano, Tetsuo Hasegawa, & Colin Norman.* 450, 183, 230-E7 (1995)

Hubble Space Telescope Imaging of the Wind-blown Lobe NGC 6165. *Paul Scowen, Jeff Hester, Arthur Code, Glen Mackie, C. Roger Lynds, & Earl J. O'Neil, Jr.* 450, 196, 230-F9 (1995)

Star Formation in the Gemini OB1 Molecular Cloud Complex. *John M. Carpenter, Ronald L. Snell, & F. Peter Schloerb.* 450, 201, 230-G5 (1995)

Balmer Discontinuity Temperatures in the Orion Nebula. *X.-W. Liu, M. J. Barlow, I. J. Danziger, & P. J. Storey.* 450, L59, 244-F8 (1995)

Element Abundances at High Redshifts: The N/O Ratio in a Primeval Galaxy. *Max Pettini, Keith Lipman, & Richard W. Hunstead.* 451, 100, 247-E1 (1995)

H II Regions in Four Galaxies in and near the Local Group. *Paul Hodge & Bryan W. Miller.* 451, 176, 248-D9 (1995)

The Density Structure in the Rosette Molecular Cloud: Signposts of Evolution. *Jonathan P. Williams, Leo Blitz, & Anthony A. Stark.* 451, 252, 249-D9 (1995)

The Sagittarius B2 Star-forming Region. II. High-Resolution H66α Observations of Sagittarius B2 North. *C. G. De Pree, R. A. Gaume, W. M. Goss, & M. J. Claussen.* 451, 284, 249-G6 (1995)

Ultraviolet Temporal Variability of the Peculiar Star R Aquarii. *S. R. Meier & M. Kafatos.* 451, 359, 250-G5 (1995)

Are Galaxies Optically Thin to Their Own Lyman-Continuum Radiation? I. M33. *Kanan Patel & Christine D. Wilson.* 451, 607, 255-E11 (1995)

High-Resolution Far-Infrared Mapping of the Star-forming Region RCW 122C. *C. Y. Zhang, P. M. Harvey, Beverly J. Smith, C. Colomé, & J. DiFrancesco.* 452, 308, 266-D1 (1995)

The Nebular Extinction in the Orion Nebula. *Manuel A. Bautista, Richard W. Pogge, & D. L. DePoy.* 452, 685, 274-B7 (1995)

Dense Gas in the DR 21 Region: High-Resolution Imaging of the NH_3 Inversion Lines. *T. L. Wilson, R. A. Gaume, K. J. Johnston, & A. R. Tieftrunk.* 452, 693, 274-C4 (1995)

Constraints on Circumstellar Disk Masses in the Trapezium Cluster. *Lee G. Mundy, Leslie W. Looney, & Elizabeth A. Lada.* 452, L137, 280-D12 (1995)

The Continuum Structure of 11 Galactic H II Regions. *Dana S. Balser, T. M. Bania, Robert T. Rood, & T. L. Wilson.* 100, 371, 51-C6 (1995)

IRAS LRS Spectra of the Sharpless H II Regions. *P. S. Chen, H. Gao, & G. Z. Xiong.* 100, 389, 51-D13 (1995)

Are Galaxies Optically Thin to Their Own Lyman-Continuum Radiation? II. NGC 6822. *Kanan Patel & Christine D. Wilson.* 453, 162, 283-D13 (1995)

Near-Infrared and Very High Sensitivity VLA 2 Centimeter Continuum Observations of the H II Region G29.96−0.02. *Alan L. Fey, Ralph A. Gaume, Mark J. Claussen, & Frederick J. Vrba.* 453, 308, 285-C14 (1995)

Warm Molecular Gas Associated with Cometary H II Regions. *Yolanda Gómez, Guido Garay, & Susana Lizano.* 453, 727, 293-G8 (1995)

Independent Confirmation of the 8.665 GHz Hyperfine Line of $^3He^+$ in W51. *M. B. Bell.* 453, 773, 294-E7 (1995)

Ionized Carbon in NGC 6334. *R. T. Boreiko & A. L. Betz.* 454, 307, 303-E3 (1995)

The H II Region Sharpless 170: A Multiscale Analysis of the Hα Velocity Field. *Marc-Antoine Miville-Deschênes, Gilles Joncas, & Daniel Durand.* 454, 316, 303-F1 (1995)

Accreting, Isolated Neutron Stars. III. Preheating of Infalling Gas and Cometary H II Regions. *Omer Blaes, Orlando Warren, & Piero Madau.* 454, 370, 304-D3 (1995)

Consequences of Dust in Metal-rich H II Regions. *Joseph C. Shields & Robert C. Kennicutt, Jr.* 454, 807, 313-A1 (1995)

The Star Formation Histories and Efficiencies of Two Giant H II Regions in M33. *Christine D. Wilson & Brenda C. Matthews.* 455, 125, 320-A1 (1995)

Young Star Clusters in Bright-rimmed Clouds: Small-Scale Sequential Star Formation? *Koji Sugitani, Motohide Tamura, & Katsuo Ogura.* 455, L39, 324-G9 (1995)

Wheels of Fire. I. Massive Star Formation in the Cartwheel Ring Galaxy. *James L. Higdon.* 455, 524, 329-B12 (1995)

H II Region Populations in Seyfert Galaxies. I. Database. *Zlatan I. Tsvetanov & Artashes R. Petrosian.* 101, 287, 57-F4 (1995)

ISM: INDIVIDUAL

Messier Number: M8

Chemical Composition of M8 Based on *IUE* and Visual Observations. *M. Peimbert, S. Torres-Peimbert, & R. J. Dufour.* 418, 760, 242-A8 (1993)

Messier Number: M17

Far-Infrared Observations of M17SW: The Clumpy Structure of the Photodissociation Region. *Margaret Meixner, Michael R. Haas, A. G. G. M. Tielens, E. F. Erickson, & M. Werner.* 390, 499, 81-E3 (1992)

CO Lines toward NGC 2024 and Other Star-forming Regions: A Closer Look at the Warm Gas Component. *U. U. Graf, A. Eckart, R. Genzel, A. I. Harris, A. Poglitsch, A. P. G. Russell, & J. Stutzki.* 405, 249, 44-B13 (1993)

Structure of Dense Cores in M17 SW. I. A Multitransition CS and $C^{34}S$ Study. *Yangsheng Wang, Daniel T. Jaffe, Neal J. Evans II, Masahiko Hayashi, Ken'ichi Tatematsu, & Shudong Zhou.* 419, 707, 256-D12 (1993)

CH_3C_2H as a Temperature Probe in Dense Giant Molecular Cloud Cores. *Edwin A. Bergin, Paul F. Goldsmith, Ronald L. Snell, & Hans Ungerechts.* 431, 674, 187-A3 (1994)

Identification of Ionizing Sources and Young Stellar Objects in M17. *Margaret Murray Hanson & Peter S. Conti.* 448, L45, 200-A9 (1995)

Messier Number: M42

A Search for the Rotational Transitions of H_2D^+ at 1370 GHz and H_3O^+ at 985 GHz. *R. T. Boreiko & A. L. Betz.* 405, L39, 47-F11 (1993)

Motion in the Orion Nebula: A Kinematic Study of [S III]. *Zheng Wen & C. R. O'Dell.* 409, 262, 100-D1 (1993)

NGC Number: NGC 595

The Molecular Interstellar Medium in Two Giant H II Regions in M33: NGC 604 and NGC 595. *Christine D. Wilson & Nick Scoville.* 385, 512, 19-E5 (1992)

Constraining the Influence of Star Formation on the Lowest ^{12}CO Line Ratios in M33. *Michele D. Thornley & Christine D. Wilson.* 421, 458, 23-G9 (1994)

The Star Formation Histories and Efficiencies of Two Giant H II Regions in M33. *Christine D. Wilson & Brenda C. Matthews.* 455, 125, 320-A1 (1995)

NGC Number: NGC 604

The Molecular Interstellar Medium in Two Giant H II Regions in M33: NGC 604 and NGC 595. *Christine D. Wilson & Nick Scoville.* 385, 512, 19-E5 (1992)

On the Supersonic Turbulence of NGC 604. *Nanci S. P. Sabalisck, Guillermo Tenorio-Tagle, Héctor O. Castañeda, & Casiana Muñoz-Tuñón.* 444, 200, 116-B8 (1995)

The Star Formation Histories and Efficiencies of Two Giant H II Regions in M33. *Christine D. Wilson & Brenda C. Matthews.* 455, 125, 320-A1 (1995)

NGC Number: NGC 1316

Planetary Nebulae as Standard Candles. IX. The Distance to the Fornax Cluster. *Russet McMillan, Robin Ciardullo, & George H. Jacoby.* 416, 62, 201-G7 (1993)

NGC Number: NGC 1333

Spectral Imaging of the 3.3 and 11.3 Micron Emission Bands in NGC 1333: Discovery of Spatially Separate Band Emissions. *Jesse Bregman, David Rank, Scott A. Sandford, & Pasquale Temi.* 410, 668, 122-A5 (1993)

A Molecular Line Study of NGC 1333/IRAS 4. *Geoffrey A. Blake, Göran Sandell, Ewine F. van Dishoeck, T. D. Groesbeck, Lee G. Mundy, & Colin Aspin.* 441, 689, 71-D13 (1995)

NGC Number: NGC 1399

Planetary Nebulae as Standard Candles. IX. The Distance to the Fornax Cluster. *Russet McMillan, Robin Ciardullo, & George H. Jacoby.* 416, 62, 201-G7 (1993)

NGC Number: NGC 1404

Planetary Nebulae as Standard Candles. IX. The Distance to the Fornax Cluster. *Russet McMillan, Robin Ciardullo, & George H. Jacoby.* 416, 62, 201-G7 (1993)

NGC Number: NGC 1976

Extinction and Scattering in the Orion Nebula: Comparison of Optical and VLA 21 Centimeter Studies. *C. R. O'Dell, Donald K. Walter, & Reginald J. Dufour.* 399, L67, 200-G12 (1992)

NGC Number: NGC 2023

Scattering of Infrared Radiation by Dust in NGC 7023 and NGC 2023. *K. Sellgren, M. W. Werner, & H. L. Dinerstein.* 400, 238, 211-G9 (1992)

High-Density CN Filaments in NGC 2023. *A. Fuente, J. Martín-Pintado, & R. Gaume.* 442, L33, 85-A11 (1995)

NGC Number: NGC 2024

High Spatial Resolution 1.3 Centimeter Imaging of the NGC 2024 Star-forming Region. *R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 388, 489, 56-D1 (1992)

Orion B (NGC 2024). III. BIMA SO $J_K = 2_2 \rightarrow 1_1$ Observations: Evidence for Peculiar Sulfur Chemistry. *Peter J. Barnes & Richard M. Crutcher.* 389, 325, 64-A5 (1992)

CO Lines toward NGC 2024 and Other Star-forming Regions: A Closer Look at the Warm Gas Component. *U. U. Graf, A. Eckart, R. Genzel, A. I. Harris, A. Poglitsch, A. P. G. Russell, & J. Stutzki.* 405, 249, 44-B13 (1993)

A Flattened Cloud Core in NGC 2024. *Paul T. P. Ho, Yun-Lou Peng, José M. Torrelles, José F. Gómez, Luis F. Rodríguez, & Jorge Cantó.* 408, 565, 92-C1 (1993)

A Near-Infrared Reflection Nebula Associated with NGC 2024 FIR 4. *T. J. T. Moore & T. Yamashita.* 440, 722, 53-B6 (1995)

NGC Number: NGC 2071

Structure, Chemistry, and Clumping in the NGC 2071 (North) Molecular Cloud. *Paul F. Goldsmith, Michael Margulis, Ronald L. Snell, & Y. Fukui.* 385, 522, 19-F3 (1992)

High-Velocity OH in Absorption: A New Tracer of Shocked Gas in Outflows? *A. Ruiz, L. F. Rodríguez, J. Cantó, & I. F. Mirabel.* 398, 139, 183-F3 (1992)

High-Velocity Hot Ammonia in Bipolar Outflows. *R. Bachiller, J. Martín-Pintado, & A. Fuente.* 417, L45, 223-D1 (1993)

J H K L Imaging and *K* Polarimetry of the Bipolar Outflow NGC 2071. *D. M. Walther, E. I. Robson, C. Aspin, & W. R. F. Dent.* 418, 310, 234-G9 (1993)

NGC Number: NGC 2264

The Morphology of a Bright Rim in NGC 2264: Early Stages of High-Mass Star Formation. *Jan A. Tauber, Dariusz C. Lis, & Paul F. Goldsmith.* 403, 202, 16-D10 (1993)

Cometary Globules in the Southeast Quadrant of the Rosette Nebula. *Nimesh A. Patel, Taoling Xie, & Paul F. Goldsmith.* 413, 593, 163-G7 (1993)

NGC Number: NGC 2264G

The Molecular Core and the Powering Source of the Bipolar Molecular Outflow in NGC 2264G. *José F. Gómez, Salvador Curiel, José M. Torrelles, Luis F. Rodríguez, Guillem Anglada, & José M. Girart.* 436, 749, 275-G1 (1994)

NGC Number: NGC 2359

On the Wind-powered Nebula NGC 2359 and the WN Star HD 56925. *Yang Chen, Zhen-ru Wang, & Qin-yue Qu.* 438, 950, 17-C1 (1995)

NGC Number: NGC 2363

The Origin of Broad Emission Lines in the Extragalactic Giant H II Region NGC 2363. *Jean-René Roy, Martin Aubé, Marshall L. McCall, & R. J. Dufour.* 386, 498, 31-E7 (1992)

Violent Star Formation in NGC 2363. *Rosa M. González-Delgado, Enrique Pérez, Guillermo Tenorio-Tagle, José M. Vílchez, Elena Terlevich, Roberto Terlevich, Eduardo Telles, José M. Rodríguez-Espinosa, Miguel Mas-Hesse, María Luisa García-Vargas, Ángeles I. Díaz, Jordi Cepa, & Hector Castañeda.* 437, 239, 286-D10 (1994)

NGC Number: NGC 3603

NGC 3603 and Its Wolf-Rayet Stars: Galactic Clone of R136 at the Core of 30 Doradus, but without the Massive Surrounding Cluster Halo. *Anthony F. J. Moffat, Laurent Drissen, & Michael M. Shara.* 436, 183, 263-F7 (1994)

NGC Number: NGC 6165

Hubble Space Telescope Imaging of the Wind-blown Lobe NGC 6165. *Paul Scowen, Jeff Hester, Arthur Code, Glen Mackie, C. Roger Lynds, & Earl J. O'Neil, Jr.* 450, 196, 230-F9 (1995)

NGC Number: NGC 6334

Shock-excited NH_3 (3,3) Masers in the NGC 6334 Star-forming Region. *Kathleen E. Kraemer & James M. Jackson.* 439, L9, 29-F7 (1995)

Ammonia Observations of NGC 6334 I(N). *T. B. H. Kuiper, W. L. Peters III, J. R. Forster, F. F. Gardner, & J. B. Whiteoak.* 446, 692, 165-E13 (1995)

Rotation and Outflow in Compact H II Regions: VLA Observations of the Molecular and Ionized Gas in NGC 6334A and NGC 6334F. *C. G. De Pree, L. F. Rodríguez, H. R. Dickel, & W. M. Goss.* 447, 220, 175-C8 (1995)

Ionized Carbon in NGC 6334. *R. T. Boreiko & A. L. Betz.* 454, 307, 303-E3 (1995)

NGC Number: NGC 6888

An Infrared Study of Three Wolf-Rayet Ring Nebulae. *J. S. Mathis, J. P. Cassinelli, K. A. van der Hucht, T. Prusti, P. R. Wesselius, & P. M. Williams.* 384, 197, 3-D5 (1992)

On the Chemodynamics of Wolf-Rayet Ring Nebulae: NGC 6888. *César Esteban & José M. Vílchez.* 390, 536, 82-A7 (1992)

Wolf-Rayet Bubbles. I. Analytic Solutions. *Guillermo García-Segura & Mordecai-Mark Mac Low.* 455, 145, 320-B13 (1995)

NGC Number: NGC 7023

Scattering of Infrared Radiation by Dust in NGC 7023 and NGC 2023. *K. Sellgren, M. W. Werner, & H. L. Dinerstein.* 400, 238, 211-G9 (1992)

Hopkins Ultraviolet Telescope Observations of Far-Ultraviolet Scattering in NGC 7023: The Dust Albedo. *Jayant Murthy, Andrew Dring, Richard C. Henry, Jeffrey W. Kruk, William P. Blair, Randy A. Kimble, & Samuel T. Durrance.* 408, L97, 95-E3 (1993)

Voyager 2 Observations of NGC 7023: Dust Scattering Shortward of 1600 Å. *A. N. Witt, J. K. Petersohn, J. B. Holberg, J. Murthy, A. Dring, & R. C. Henry.* 410, 714, 122-E13 (1993)

H I, CO, and *IRAS* Observations of NGC 7023. *C. Rogers, Mark H. Heyer, & P. E. Dewdney.* 442, 694, 89-F10 (1995)

NGC Number: NGC 7026

Collisional Effects in He I: An Observational Analysis. *J. Kingdon & G. J. Ferland.* 442, 714, 90-A8 (1995)

NGC Number: NGC 7027

The Radiative Association of He^+ and He and H^+ and H. *P. C. Stancil, J. F. Babb, & A. Dalgarno.* 414, 672, 179-E8 (1993)

NGC Number: NGC 7129

Discovery of a Deeply Embedded Companion to LkHα 234. *David A. Weintraub, Joel H. Kastner, & Ashwin Mahesh.* 420, L87, 15-F1 (1994)

NGC Number: NGC 7538

Are the NGC 7538 Formaldehyde Masers Really Unusual? *Preethi Pratap, Lewis E. Snyder, & Wolfgang Batrla.* 387, 241, 40-A1 (1992)

The NGC 7538 IRS 1 Region of Star Formation: Observations of the H66α Recombination Line with a Spatial Resolution of 300 AU. *R. A. Gaume, W. M. Goss, H. R. Dickel, T. L. Wilson, & K. J. Johnston.* 438, 776, 15-A1 (1995)

An HCO^+ Study of NGC 7538, IRS 9, and GL 490. *Tatsuhiko I. Hasegawa & George F. Mitchell.* 441, 665, 71-B11 (1995)

Search for 6 Centimeter Formaldehyde Masers in 22 Galactic Star-forming Regions. *David M. Mehringer, W. M. Goss, & Patrick Palmer.* 452, 304, 266-C8 (1995)

NGC Number: NGC 7635

Scattering and Luminescence in the Bubble Nebula. *Jean-Pierre Sivan & Jean-Marie Perrin.* 404, 258, 31-B1 (1993)

Name: R Aquarii

Evidence for Precession of the R Aquarii Jet. *J. M. Hollis & A. G. Michalitsianos.* 411, 235, 130-B3 (1993)

Name: Barnard 1

Structure and Evolution of Magnetically Supported Molecular Clouds: Evidence for Ambipolar Diffusion in the Barnard 1 Cloud. *R. M. Crutcher, Telemachos Ch. Mouschovias, T. H. Troland, & Glenn E. Ciolek.* 427, 839, 123-A13 (1994)

Name: Barnard 5

Hierarchical Structure Analysis of Interstellar Clouds Using Nonorthogonal Wavelets. *William D. Langer, Robert W. Wilson, & Charles H. Anderson.* 408, L45, 89-C7 (1993)

Name: Becklin-Neugebauer

Near-Infrared Imaging of the Becklin-Neugebauer–IRc2 Region in Orion with Subarcsecond Resolution. *C. Dougados, P. Léna, S. T. Ridgway, J. C. Christou, & R. G. Probst.* 406, 112, 56-E5 (1993)

The Effect of Grain Mantles and Grain Shape upon the 9.7 and 18 Micron Silicate Features. *James E. O'Donnell.* 437, 262, 286-F10 (1994)

What is Powering the Orion Kleinmann-Low Infrared Nebula? *Karl M. Menten & Mark J. Reid.* 445, L157, 152-A12 (1995)

Subarcsecond-Resolution 86 GHz Continuum Maps of Orion KL. *R. L. Plambeck, M. C. H. Wright, L. G. Mundy, & L. W. Looney.* 455, L189, 334-G10 (1995)

Name: η Carinae

High-Resolution 6450–24500 Å Spectra of η Carinae. *Fred Hamann, D. L. DePoy, Sveneric Johansson, & Jay Elias.* 422, 626, 39-F1 (1994)

Name: Carina Nebula

High-Resolution Images of the Dust and Ionized Gas Distribution in the Carina Nebula. *Jonathan B. Z. Whiteoak.* 429, 225, 146-G7 (1994)

Name: Cassiopeia A

High-Resolution Measurements of NH_3 Absorption toward Cassiopeia A. *R. A. Gaume, T. L. Wilson, & K. J. Johnston.* 425, 127, 81-G1 (1994)

The Three-dimensional Structure of the Cassiopeia A Supernova Remnant. I. The Spherical Shell. *Jeri E. Reed, J. Jeff Hester, A. C. Fabian, & P. F. Winkler.* 440, 706, 53-A1 (1995)

The Polarization and Depolarization of Radio Emission from Supernova Remnant Cassiopeia A. *M. C. Anderson, J. W. Keohane, & L. Rudnick.* 441, 300, 63-D7 (1995)

The Deceleration Powering of Synchrotron Emission from Ejecta Components of Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 441, 307, 63-E9 (1995)

CGRO/OSSE Observations of the Cassiopeia A Supernova Remnant. *L.-S. The, M. D. Leising, D. D. Clayton, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, G. V. Jung, D. A. Grabelsky, W. R. Purcell, & M. P. Ulmer.* 444, 244, 116-G4 (1995)

Evidence for Thermal Absorption inside Cassiopeia A. *N. E. Kassim, R. A. Perley, K. S. Dwarakanath, & W. C. Erickson.* 455, L59, 325-C8 (1995)

Name: PV Cephei

Radio Continuum from the Powering Sources of the RNO 43, Haro 4-255 FIR, B335, and PV Cephei Outflows and from the Herbig-Haro Object 32A. *G. Anglada, L. F. Rodríguez, J. Cantó, R. Estalella, & J. M. Torrelles.* 395, 494, 148-G1 (1992)

Name: Cepheus A

A Circumstellar Molecular Gas Structure Associated with the Massive Young Star Cepheus A–HW 2. *José M. Torrelles, Luis F. Rodríguez, Jorge Cantó, & Paul T. P. Ho.* 404, L75, 40-F1 (1993)

From Bipolar to Quadrupolar: The Collimation Processes of the Cepheus A Outflow. *José M. Torrelles, Lourdes Verdes-Montenegro, Paul T. P. Ho, Luis F. Rodríguez, & Jorge Cantó.* 410, 202, 114-F1 (1993)

Cepheus A HW2: A Powerful Thermal Radio Jet. *Luis F. Rodríguez, Guido Garay, Salvador Curiel, Solange Ramírez, José M. Torrelles, Yolanda Gómez, & Arturo Velázquez.* 430, L65, 166-B2 (1994)

CH_3C_2H as a Temperature Probe in Dense Giant Molecular Cloud Cores. *Edwin A. Bergin, Paul F. Goldsmith, Ronald L. Snell, & Hans Ungerechts.* 431, 674, 187-A3 (1994)

The Distribution of Warm Dust in the Star-forming Region Cepheus A: Infrared Constraints. *Cecilia Colomé & Paul M. Harvey.* 449, 656, 221-F8 (1995)

Name: Cepheus OB3

A Multitransitional CO Study of the Cepheus C Cloud Core. *M. H. Heyer & E. F. Ladd.* 439, 269, 24-G10 (1995)

Name: Chameleon I

ROSAT X-Ray Study of the Chamaeleon I Dark Cloud. I. The Stellar Population. *Eric D. Feigelson, Sophie Casanova, Thierry Montmerle, & Jean Guibert.* 416, 623, 211-B8 (1993)

Name: Coalsack

Voyager Observations of Dust Scattering near the Coalsack Nebula. *Jayant Murthy, R. C. Henry, & J. B. Holberg.* 428, 233, 131-A13 (1994)

Name: Corona Australis Cloud

IRAS Observations of Young Stellar Objects in the Corona Australis Dark Cloud. *Bruce A. Wilking, Thomas P. Greene, Charles J. Lada, Michael R. Meyer, & Erick T. Young.* 397, 520, 177-C9 (1992)

Ice Grains in the Corona Australis Molecular Cloud. *W. P. Chen & J. A. Graham.* 409, 319, 101-A11 (1993)

The Nature of CO and H_2O Ices in the Corona Australis Molecular Cloud. *Masuo Tanaka, Tetsuya Nagata, Shuji Sato, & Tetsuo Yamamoto.* 430, 779, 171-E8 (1994)

Name: Crab Nebula

Relativistic Magnetosonic Shock Waves in Synchrotron Sources: Shock Structure and Nonthermal Acceleration of Positrons. *Masahiro Hoshino, Jonathan Arons, Yves A. Gallant, & A. Bruce Langdon.* 390, 454, 81-A9 (1992)

Relativistic, Perpendicular Shocks in Electron-Positron Plasmas. *Yves A. Gallant, Masahiro Hoshino, A. Bruce Langdon, Jonathan Arons, & Claire E. Max.* 391, 73, 87-A1 (1992)

Activity and Radio Spectral Index Variations near the Center of the Crab Nebula. *M. F. Bietenholz & P. P. Kronberg.* 393, 206, 116-F1 (1992)

Ultraviolet Imaging Telescope Observations of the Crab Nebula. *Gregory S. Hennessy, Robert W. O'Connell, Kwang P. Cheng, Ralph C. Bohlin, Nicholas R. Collins, Theodore R. Gull, Paul Hintzen, Joan E. Isensee, Wayne B. Landsman, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L13, 144-E5 (1992)

The Expected High-Energy to Ultra–High-Energy Gamma-Ray Spectrum of the Crab Nebula. *O. C. de Jager & A. K. Harding.* 396, 161, 157-B6 (1992)

An Axisymmetric Magnetohydrodynamic Model for the Crab Pulsar Wind Bubble. *Mitchell C. Begelman & Zhi-yun Li.* 397, 187, 170-C11 (1992)

The Synchrotron Bays of the Crab Nebula: A Magnetic Structure Associated with a Presupernova Circumstellar Disk. *Robert A. Fesen, Crystal L. Martin, & J. Michael Shull.* 399, 599, 205-C7 (1992)

Far-Ultraviolet Observations of the Crab Nebula Using the Hopkins Ultraviolet Telescope. *William P. Blair, Knox S. Long, Olaf Vancura, Charles W. Bowers, Sarah Conger, Arthur F. Davidsen, Gerard A. Kriss, & Richard B. C. Henry.* 399, 611, 205-E1 (1992)

Formation of the Dark Bays in the Crab Optical Synchrotron Nebula: Is the Crab Pulsar Wind Bubble Interacting with Its Progenitor's Wind? *Zhi-Yun Li & Mitchell C. Begelman.* 400, 186, 211-C1 (1992)

Survey of Candidate Gamma-Ray Sources at TeV Energies Using a High-Resolution Cerenkov Imaging System: 1988–1991. *P. T. Reynolds, C. W. Akerlof, M. F. Cawley, M. Chantell, D. J. Fegan, A. M. Hillas, R. C. Lamb, M. J. Lang, M. A. Lawrence, D. A. Lewis, D. Macomb, D. I. Meyer, G. Mohanty, K. S. O'Flaherty, M. Punch, M. S. Schubnell, G. Vacanti, T. C. Weekes, & T. Whitaker.* 404, 206, 30-D11 (1993)

Observations of the Crab Pulsar and Nebula by the EGRET Telescope on the *Compton Gamma-Ray Observatory*. *P. L. Nolan, Z. Arzoumanian, D. L. Bertsch, J. Chiang, C. E. Fichtel, J. M. Fierro, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, P. W. Kwok, Y. C. Lin, J. R. Mattox, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, H. I. Nel, D. Nice, K. Pinkau, H. Rothermel, E. Schneid, M. Sommer, P. Sreekumar, J. H. Taylor, & D. J. Thompson.* 409, 697, 107-F8 (1993)

Alfvénic Fluctuations in a Relativistic Wind with a Spiral Magnetic Field and Random Magnetic Field Structures in the Crab Nebula. *Yu-Qing Lou.* 414, 656, 179-D2 (1993)

The Crab Nebula's Cosmic-Ray Acceleration Zone Revealed. *P. P. Kronberg, H. Lesch, P. F. Ortiz, & M. F. Bietenholz.* 416, 251, 204-B13 (1993)

Three-dimensional Propagation of Transverse Magnetohydrodynamic Perturbations in Relativistic Winds. *Yu-Qing Lou.* 418, 709, 241-C12 (1993)

SMM Observations of Gamma-Ray Transients. II. A Search for Gamma-Ray Lines between 400 and 600 keV from the Crab Nebula. *Michael J. Harris, Gerald H. Share, & Mark D. Leising.* 420, 649, 10-G1 (1994)

Relativistic Particle Acceleration in Plerions. *Jonathan Arons & Marco Tavani.* 90, 797, 13-F1 (1994)

Unpulsed High-Energy Radiation from the Crab Pulsar and Nebula. *W. M. Cheung & K. S. Cheng.* 90, 827, 14-A11 (1994)

0.95–1.3 Micron Spectrophotometry of Two Bright Filaments of the Crab Nebula. *Richard J. Rudy, George S. Rossano, & R. C. Puetter.* 426, 646, 106-D10 (1994)

Observation of Transient High-Energy Emission Features in the Spectra of Black Hole Candidates and the Crab Nebula by *GRANAT*/SIGMA.

M. Gilfanov, E. Churazov, R. Sunyaev, N. Khavenson, B. Novikov, A. Dyachkov, I. Tserenin, K. Sukhanov, L. Bouchet, M. Denis, M. C. Schmitz-Fraysse, P. Mandrou, J. Paul, B. Cordier, A. Goldwurm, & F. Lebrun. 92, 411, 37-C6 (1994)

Extraordinary Line-emitting Knots in the Crab Nebula. *Gordon M. MacAlpine, Stephen S. Lawrence, Beth A. Brown, Alan Uomoto, Bruce E. Woodgate, Larry W. Brown, Ronald J. Oliversen, James D. Lowenthal, & Charles Liu.* 432, L131, 207-C5 (1994)

Structure of Relativistic Shocks in Pulsar Winds: A Model of the Wisps in the Crab Nebula. *Yves A. Gallant & Jonathan Arons.* 435, 230, 246-E4 (1994)

WFPC2 Studies of the Crab Nebula. I. *HST* and *ROSAT* Imaging of the Synchrotron Nebula. *J. Jeff Hester, Paul A. Scowen, Ravi Sankrit, Christopher J. Burrows, John S. Gallagher III, Jon A. Holtzman, Alan Watson, John T. Trauger, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, Richard E. Griffiths, John G. Hoessel, John Krist, Roger Lynds, Jeremy R. Mould, Earl J. O'Neil, Jr., Karl R. Stapelfeldt, & James A. Westphal.* 448, 240, 195-D12 (1995)

Name: Cygnus Loop

Global O VI Line Emission from the Cygnus Loop Supernova Remnant and Direct Kinematic Measurement of the Associated Shock. *Andrew Rasmussen & Christopher Martin.* 396, L103, 167-E7 (1992)

Spectroscopy of a Balmer-dominated Filament in the Cygnus Loop with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Olaf Vancura, Charles W. Bowers, Arthur F. Davidsen, & John C. Raymond.* 400, 214, 211-E8 (1992)

Infrared Emission from X-Ray and Optically Emitting Regions in the Cygnus Loop Supernova Remnant. *Richard G. Arendt, Eli Dwek, & David Leisawitz.* 400, 562, 217-D1 (1992)

A Far-Ultraviolet Study of the Cygnus Loop Using the *Voyager* Ultraviolet Spectrometers. *Olaf Vancura, William P. Blair, Knox S. Long, John C. Raymond, & J. B. Holberg.* 417, 663, 227-E11 (1993)

The Balmer-dominated Northeast Limb of the Cygnus Loop Supernova Remnant. *J. Jeff Hester, John C. Raymond, & William P. Blair.* 420, 721, 11-G7 (1994)

A Study of X-Ray and Infrared Emissions from Dusty Nonradiative Shock Waves. *Olaf Vancura, John C. Raymond, Eli Dwek, William P. Blair, Knox S. Long, & Scott Foster.* 431, 188, 178-D13 (1994)

An X-Ray and Optical Study of the Interaction of the Cygnus Loop Supernova Remnant with an Interstellar Cloud. *James R. Graham, N. A. Levenson, J. J. Hester, J. C. Raymond, & R. Petre.* 444, 787, 127-C8 (1995)

Name: Cygnus X

A Complete CO Survey of the Cygnus X Region. *Helen O. Leung & P. Thaddeus.* 81, 267, 38-F3 (1992)

An *IRAS* Survey of Star-forming Regions toward Cygnus. *Sten F. Odenwald & Phil R. Schwartz.* 405, 706, 51-G7 (1993)

Name: 30 Doradus

A New Luminous Blue Variable: R143 in 30 Doradus. *Joel Wm. Parker, Geoffrey C. Clayton, Cláudia Winge, & Peter S. Conti.* 409, 770, 108-F3 (1993)

30 Doradus: Ultraviolet and Optical Stellar Photometry. *Jesse K. Hill, Ralph C. Bohlin, Kwang-Ping Cheng, Michael N. Fanelli, Paul Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 413, 604, 164-A5 (1993)

Kinematic Structure of the 30 Doradus Giant H II Region. *You-Hua Chu & Robert C. Kennicutt, Jr.* 425, 720, 90-F1 (1994)

Far-Infrared Lines from H II Regions: Abundance Variations in the Galaxy. *Janet P. Simpson, Sean W. J. Colgan, Robert H. Rubin, Edwin F. Erickson, & Michael R. Haas.* 444, 721, 126-C6 (1995)

Gas near the Center of 30 Doradus As Revealed by *Hubble Space Telescope* Images. *Deidre A. Hunter, Edward J. Shaya, Paul Scowen, J. Jeff Hester, Edward J. Groth, Roger Lynds, & Earl J. O'Neil, Jr.* 444, 758, 126-F11 (1995)

A Multiwavelength Study of 30 Doradus: The Interstellar Medium in a Low-Metallicity Galaxy. *A. Poglitsch, A. Krabbe, S. C. Madden, T. Nikola, N. Geis, L. E. B. Johansson, G. J. Stacey, & A. Sternberg.* 454, 293, 303-C8 (1995)

Name: Eridanus

The Separation between Gas and Dust Filaments at the Edge of the Expanding Shell in Eridanus. *G. L. Verschuur, L. J Rickard, F. Verter, M. W. Pound, & D. Leisawitz.* 390, 514, 81-F7 (1992)

A Multiwavelength Study of the Eridanus Soft X-Ray Enhancement. *D. N. Burrows, K. P. Singh, J. A. Nousek, G. P. Garmire, & J. Good.* 406, 97, 56-C7 (1993)

Voyager Observations of Diffuse Far-Ultraviolet Continuum and Line Emission in Eridanus. *Jayant Murthy, M. Im, R. C. Henry, & J. B. Holberg.* 419, 739, 256-G7 (1993)

Name: Gemini OB1

Anatomy of the Gemini OB1 Molecular Cloud Complex. *John M. Carpenter, Ronald L. Snell, & F. Peter Schloerb.* 445, 246, 136-A4 (1995)

Star Formation in the Gemini OB1 Molecular Cloud Complex. *John M. Carpenter, Ronald L. Snell, & F. Peter Schloerb.* 450, 201, 230-G5 (1995)

Name: Gum Nebula

Discovery of X-Ray Emission Associated with the Gum Nebula. *D. A. Leahy, J. Nousek, & G. Garmire.* 385, 561, 20-B4 (1992)

Highly Ionized Gas in the Gum Nebula and Elsewhere: A Comparison of *IUE* and *Copernicus* Satellite Results. *Richard J. Edgar & Blair D. Savage.* 396, 124, 156-F4 (1992)

Implications of ^{26}Al Emission at 1.8 MeV from the Vela Region. *U. Oberlack, R. Diehl, T. Montmerle, N. Prantzos, & P. von Ballmoos.* 92, 433, 37-E7 (1994)

Name: Haro 4-255 FIR

Radio Continuum from the Powering Sources of the RNO 43, Haro 4-255 FIR, B335, and PV Cephei Outflows and from the Herbig-Haro Object 32A. *G. Anglada, L. F. Rodríguez, J. Cantó, R. Estalella, & J. M. Torrelles.* 395, 494, 148-G1 (1992)

Molecular Cloud Core and CS Outflow Associated with Haro 4-255 FIR. *Ken'ichi Tatematsu, Tomofumi Umemoto, Yasuhiro Murata, Hua Chen, Naomi Hirano, & Hiroshi Takaba.* 419, 746, 257-A1 (1993)

Name: HVC Complex M

A Determination of the Distance to the High-Velocity Cloud Complex M. *Laura Danly, C. E. Albert, & K. D. Kuntz.* 416, L29, 207-D13 (1993)

Name: Kepler's Supernova

Dynamics of Kepler's Supernova Remnant. *Kazimierz J. Borkowski, John M. Blondin, & Craig L. Sarazin.* 400, 222, 211-F5 (1992)

On the X-Ray Spectrum of Kepler's Supernova Remnant. *Kazimierz J. Borkowski, Craig L. Sarazin, & John M. Blondin.* 429, 710, 154-E1 (1994)

Name: Kesteven 79

A *ROSAT* Observation of the Supernova Remnant Kesteven 79. *F. D. Seward & T. Velusamy.* 439, 715, 34-D13 (1995)

Name: Lynds 134

Moderate-Density Regions in the Lynds 134 Cloud Complex. *R. J. Laureijs, Y. Fukui, G. Helou, A. Mizuno, K. Imaoka, & F. O. Clark.* 101, 87, 54-A10 (1995)

Name: Lynds 1457

The Magnetic Field in Lynds 1457: Multiband Photopolarimetry. *B-G Andersson & Peter G. Wannier.* 443, L49, 103-B2 (1995)

Name: Maddalena Cloud

Determining Structure in Molecular Clouds. *Jonathan P. Williams, Eugène J. de Geus, & Leo Blitz.* 428, 693, 139-A1 (1994)

Name: Monoceros OB1

The Dense Gas Component of Outflows in the Monoceros OB1 Dark Cloud. *Grace A. Wolf-Chase & Christopher K. Walker.* 447, 244, 175-F4 (1995)

Name: Monoceros R2

High-Resolution Imaging of the Galactic Cloud Monoceros R2. *Constantine P. Gonatas, Patrick Palmer, & G. Novak.* 398, 118, 183-D7 (1992)

A Near-Infrared Study of the Monoceros R2 Star Formation Region. *Eric M. Howard, Judith L. Pipher, & William J. Forrest.* 425, 707, 90-D12 (1994)

The Giant Molecular Cloud Monoceros R2. I. Shell Structure. *Taoling Xie & Paul F. Goldsmith.* 430, 252, 162-B13 (1994)

Magnetic Field Structure in Monoceros R2. *T. H. Jarrett, G. Novak, T. Xie, & P. F. Goldsmith.* 430, 743, 171-B6 (1994)

Dense Clumps in the Monoceros R2 Outflow. *M. Tafalla, R. Bachiller, & M. C. H. Wright.* 432, L127, 207-B13 (1994)

Name: ρ Ophiuchi

Near-Infrared Observations of Young Stellar Objects in the ρ Ophiuchi Dark Cloud. *Thomas P. Greene & Erick T. Young.* 395, 516, 149-B5 (1992)

VLBI Survey of ρ Ophiuchi: A Population of Magnetized, Diskless Young Stellar Objects. *Philippe André, Bryan D. Deeney, Robert B. Phillips, & Jean-François Lestrade.* 401, 667, 230-G1 (1992)

From T Tauri Stars to Protostars: Circumstellar Material and Young Stellar Objects in the ρ Ophiuchi Cloud. *Philippe André & Thierry Montmerle.* 420, 837, 13-C12 (1994)

Gamma-Ray Observations of Ophiuchus with EGRET: The Diffuse Emission and Point Sources. *S. D. Hunter, S. W. Digel, E. J. de Geus, & G. Kanbach.* 436, 216, 264-B12 (1994)

10 Micron Spectroscopy of Young Stars in the ρ Ophiuchi Cloud. *M. S. Hanner, T. Y. Brooke, & A. T. Tokunaga.* 438, 250, 4-G9 (1995)

The Evolutionary Status of the Stellar Population in the ρ Ophiuchi Cloud Core. *Karen M. Strom, Jeremy Kepner, & Stephen E. Strom.* 438, 813, 15-D7 (1995)

ROSAT X-Ray Sources Embedded in the ρ Ophiuchi Cloud Core. *Sophie Casanova, Thierry Montmerle, Eric D. Feigelson, & Philippe André.* 439, 752, 35-A7 (1995)

Name: ρ Ophiuchi Cloud

A [C II] 158 Micron Line Map of the ρ Ophiuchi Cloud. *Yukari Yamashita Yui, Takao Nakagawa, Yasuo Doi, Haruyuki Okuda, Hiroshi Shibai, Tetsuo Nishimura, & Frank J. Low.* 419, L37, 252-F3 (1993)

Diffuse Band Profiles in the ρ Ophiuchi Cloud. *C. Gregory Seab & Theodore P. Snow, Jr.* 443, 698, 107-E1 (1995)

Name: ζ Ophiuchi Cloud

Determination of $^{12}C/^{13}C$ in the Interstellar Medium toward ζ Ophiuchi and ξ Persei. *Isabel Hawkins, Nahide Craig, & David M. Meyer.* 407, 185, 71-D1 (1993)

Name: Orion B

Global Star Formation in the L1630 Molecular Cloud. *Elizabeth A. Lada.* 393, L25, 120-D7 (1992)

High-Resolution H I Observations of H II Regions. III. Photodissociation Regions and the Magnetic Field near Orion B. *Paul P. van der Werf, W. M. Goss, Carl Heiles, R. M. Crutcher, & T. H. Troland.* 411, 247, 130-C8 (1993)

Name: Orion Complex

The Implications of Gamma-Ray Lines Observed from the Orion Complex. *Ramanath Cowsik & Michael W. Friedlander.* 444, L29, 121-E8 (1995)

Name: Orion Kleinmann-Low

High-Resolution Images of Dust Emission from Orion-KL. *Melvyn Wright, Goeran Sandell, David J. Wilner, & Richard L. Plambeck.* 393, 225, 117-A1 (1992)

N_2H^+ in the Orion Ambient Ridge: Cloud Clumping versus Rotation. *Maria Womack, L. M. Ziurys, & L. J. Sage.* 406, L29, 61-A1 (1993)

The Spectrum of Orion-KL at 2 Millimeters (150–160 GHz). *L. M. Ziurys & Douglas McGonagle.* 89, 155, 50-G13 (1993)

Confirmation of Interstellar Methylene. *J. M. Hollis, P. R. Jewell, & F. J. Lovas.* 438, 259, 5-A8 (1995)

What is Powering the Orion Kleinmann-Low Infrared Nebula? *Karl M. Menten & Mark J. Reid.* 445, L157, 152-A12 (1995)

The Detection and Mapping Observations of C_2H_5OH in Orion Kleinmann-Low. *Masatoshi Ohishi, Shin-ichi Ishikawa, Satoshi Yamamoto, Shuji Saito, & Takayoshi Amano.* 446, L43, 160-G7 (1995)

Name: Orion Nebula

Faint Emission Lines in the Spectrum of the Orion Nebula and the Abundances of Some of the Rarer Elements. *Donald E. Osterbrock, Hien D. Tran, & Sylvain Veilleux.* 389, 305, 63-F11 (1992)

Evidence for Large-Scale Expanding Motions within the Orion A Molecular Cloud. *M. H. Heyer, J. Morgan, F. P. Schloerb, R. L. Snell, & P. F. Goldsmith.* 395, L99, 154-B1 (1992)

CNO Abundances and Temperature Fluctuations in the Orion Nebula. *Donald K. Walter, Reginald J. Dufour, & J. Jeff Hester.* 397, 196, 170-D7 (1992)

CO (v = 1–0) Emission in the Molecular Shock Regions of OMC-1. *G. L. Grasdalen, John A. Hackwell, David K. Lynch, & Ray W. Russell.* 397, L119, 181-E13 (1992)

Imaging Spectrophotometry of the Orion Nebula Core. I. Emission-Line Mapping and Physical Conditions. *Richard W. Pogge, J. Michael Owen, & Bruce Atwood.* 399, 147, 197-A9 (1992)

Extinction and Scattering in the Orion Nebula: Comparison of Optical and VLA 21 Centimeter Studies. *C. R. O'Dell, Donald K. Walter, & Reginald J. Dufour.* 399, L67, 200-G12 (1992)

Identification of Velocity Systems in the Inner Orion Nebula. *C. R. O'Dell, Jacobus H. Valk, Zheng Wen, & David M. Meyer.* 403, 678, 24-B4 (1993)

158 Micron [C II] Mapping of the Orion Molecular Cloud. *G. J. Stacey, D. T. Jaffe, N. Geis, R. Genzel, A. I. Harris, A. Poglitsch, J. Stutzki, & C. H. Townes.* 404, 219, 30-E11 (1993)

Molecular Cloud Cores in the Orion A Cloud. I. Nobeyama CS (1–0) Survey. *Ken'ichi Tatematsu, Tomofumi Umemoto, Osamu Kameya, Naomi Hirano, Tetsuo Hasegawa, Masahiko Hayashi, Takahiro Iwata, Norio Kaifu, Hitomi Mikami, Yasuhiro Murata, Makoto Nakano, Takenori Nakano, Nagayoshi Ohashi, Kazuyoshi Sunada, Hiroshi Takaba, & Satoshi Yamamoto.* 404, 643, 37-A5 (1993)

Effects of Magnetic Fields and Rotation on the Fragmentation of Filamentary Molecular Clouds: Comparison of the Theory with the Orion A Cloud. *Tomoyuki Hanawa, Fumitaka Nakamura, Tomoaki Matsumoto, Takenori Nakano, Ken'ichi Tatematsu, Tomofumi Umemoto, Osamu Kameya, Naomi Hirano, Tetsuo Hasegawa, Norio Kaifu, & Satoshi Yamamoto.* 404, L83, 40-G1 (1993)

Hard X-Rays from the Orion Nebula Region. *Shigeo Yamauchi & Katsuji Koyama.* 405, 268, 44-D8 (1993)

Structure and Chemistry of Orion S. *Joseph P. McMullin, Lee G. Mundy, & Geoffrey A. Blake.* 405, 599, 50-E5 (1993)

Motion in the Orion Nebula: A Kinematic Study of [S III]. *Zheng Wen & C. R. O'Dell.* 409, 262, 100-D1 (1993)

The Physical Structure of Orion-KL on 2500 AU Scales Using the K-Doublet Transitions of Formaldehyde. *Jeffrey G. Mangum, Alwyn Wootten, & Richard L. Plambeck.* 409, 282, 100-E13 (1993)

Extended CO(7→6) Emission from Warm Gas in Orion. *J. E. Howe, D. T. Jaffe, E. N. Grossman, W. F. Wall, J. G. Mangum, & G. J. Stacey.* 410, 179, 114-D1 (1993)

Discovery of New Objects in the Orion Nebula on *HST* Images: Shocks, Compact Sources, and Protoplanetary Disks. *C. R. O'Dell, Zheng Wen, & Xihai Hu.* 410, 696, 122-C11 (1993)

Interferometric Observations for Oxygen-containing Organic Molecules toward Orion-KL. *Y. C. Minh, M. Ohishi, D. G. Roh, M. Ishiguro, & W. M. Irvine.* 411, 773, 139-D3 (1993)

Silicon and Carbon Abundances in the Orion Nebula. *Robert H. Rubin, Reginald J. Dufour, & Donald K. Walter.* 413, 242, 159-C6 (1993)

Fabry-Perot Imaging of Molecular Hydrogen Emission in Orion-KL Region. *Hajime Sugai, Tomonori Usuda, Hirokazu Kataza, Masuo Tanaka, Motoko Y. Inoue, Hironobu Kawabata, Hideki Takami, Tetsuo Aoki, & Norihisa Hiromoto.* 420, 746, 12-B12 (1994)

HST Photometry of the Trapezium Cluster. *Charles F. Prosser, John R. Stauffer, Lee Hartmann, David R. Soderblom, Burton F. Jones, Michael W. Werner, & Mark J. McCaughrean.* 421, 517, 24-E9 (1994)

Anatomy of a Photodissociation Region: High Angular Resolution Images of Molecular Emission in the Orion Bar. *Jan A. Tauber, A. G. G. M. Tielens, Margaret Meixner, & Paul F. Goldsmith.* 422, 136, 31-F13 (1994)

Maps of GHz Methyl Cyanide Emission in Orion-KL. *D. J. Wilner, M. C. H. Wright, & R. L. Plambeck.* 422, 642, 39-G7 (1994)

Spectral Imaging of the Orion Bar at 3.3, 8.4, and 11.3 Microns: Comparison with a Fluorescent Polycyclic Aromatic Hydrocarbon Model. *Jesse Bregman, Kristen Larson, David Rank, & Pasquale Temi.* 423, 326, 50-B10 (1994)

A Fabry-Perot Imager for Near-Infrared Astrophysics at the Communications Research Laboratory 1.5 Meter Telescope, and Imaging of Hydrogen Recombination Lines in the Orion Nebula. *Hajime Sugai, Tomonori Usuda, Hirokazu Kataza, Masuo Tanaka, Hironobu Kawabata, Motoko Y. Inoue, Hideki Takami, Tetsuo Aoki, & Norihisa Hiromoto.* 427, 511, 116-C10 (1994)

Spectral Imaging of the Ney-Allen Nebula at 10 and 20 Microns. *T. L. Hayward.* 429, 726, 154-F5 (1994)

The Molecular Gas Associated with the Orion Bright Bar. *Toshihiro Omodaka, Masahiko Hayashi, Tetsuo Hasegawa, & Saeko S. Hayashi.* 430, 256, 162-C7 (1994)

Shocked Pure-rotational Emission from H_2 in Orion. *Parvinder S. Parmar, John H. Lacy, & Jeffrey M. Achtermann.* 430, 786, 171-F3 (1994)

CH_3C_2H as a Temperature Probe in Dense Giant Molecular Cloud Cores. *Edwin A. Bergin, Paul F. Goldsmith, Ronald L. Snell, & Hans Ungerechts.* 431, 674, 187-A3 (1994)

ROSAT HRI Observations of Hot Stars in the Orion Nebula. *Jean-Pierre Caillault, Marc Gagné, & John R. Stauffer.* 432, 386, 198-A2 (1994)

[Fe II] Emission from High-Density Regions in the Orion Nebula. *Manuel A. Bautista, Anil K. Pradhan, & Donald E. Osterbrock.* 432, L135, 207-C13 (1994)

Thermal Infrared Imaging of Subarcsecond Structure in the Trapezium Nebula. *T. L. Hayward, J. R. Houck, & J. W. Miles.* 433, 157, 210-C1 (1994)

Two Micron Spectrophotometry of the Orion Nebula and the Detection of Significant [Fe III] Emission. *D. L. DePoy & Richard W. Pogge.* 433, 725, 220-B1 (1994)

Anomalous Balmer Continuum Temperatures in the Orion Nebula. *Donald K. Walter & Reginald J. Dufour.* 434, L29, 232-E5 (1994)

Postrefurbishment Mission *Hubble Space Telescope* Images of the Core of the Orion Nebula: Proplyds, Herbig-Haro Objects, and Measurements of a Circumstellar Disk. *C. R. O'Dell & Zheng Wen.* 436, 194, 263-G8 (1994)

H_2 Emission as a Tracer of Molecular Hydrogen: Large-Scale Observations of Orion. *M. L. Luhman, D. T. Jaffe, L. D. Keller, & Soojong Pak.* 436, L185, 282-C1 (1994)

A Three-dimensional Model of the Orion Nebula. *Zheng Wen & C. R. O'Dell.* 438, 784, 15-A13 (1995)

Velocity Field of the Orion-KL Region in Molecular Hydrogen Emission. *Hajime Sugai, Hironobu Kawabata, Tomonori Usuda, Motoko Y. Inoue, Hirokazu Kataza, & Masuo Tanaka.* 442, 674, 89-D3 (1995)

Iron to Oxygen Abundance Ratio in the Orion Nebula. *Manuel A. Bautista & Anil K. Pradhan.* 442, L65, 94-F1 (1995)

The Distribution of Molecules in the Core of OMC-1. *E. C. Sutton, R. Peng, W. C. Danchi, P. A. Jaminet, G. Sandell, & A. P. G. Russell.* 97, 455, 18-E12 (1995)

Deep *ROSAT* HRI Observations of the Orion Nebula Region. *Marc Gagné, Jean-Pierre Caillault, & John R. Stauffer.* 445, 280, 136-D2 (1995)

Balmer Discontinuity Temperatures in the Orion Nebula. *X.-W. Liu, M. J. Barlow, I. J. Danziger, & P. J. Storey.* 450, L59, 244-F8 (1995)

Fourier Transform Spectroscopy of the Orion Molecular Cloud Core. *E. Serabyn & E. W. Weisstein.* 451, 238, 249-C3 (1995)

The Nebular Extinction in the Orion Nebula. *Manuel A. Bautista, Richard W. Pogge, & D. L. DePoy.* 452, 685, 274-B7 (1995)

Constraints on Circumstellar Disk Masses in the Trapezium Cluster. *Lee G. Mundy, Leslie W. Looney, & Elizabeth A. Lada.* 452, L137, 280-D12 (1995)

Name: Orion IRc2

Detection of HCO^+ $J = 9 \rightarrow 8$ Line Emission toward Orion IRc2: Molecular Ions in Hot Dense Gas. *D. T. Jaffe, U. U. Graf, A. I. Harris, J. Stutzki, & S. H. Lepp.* 385, 240, 14-G13 (1992)

Mid-Infrared Imaging of Orion BN/KL: Astrometry of IRc2 and the SiO Maser. *Daniel Y. Gezari.* 396, L43, 160-G8 (1992)

Vibrational Ground-State SiO $J = 1$–0 Emission in Orion IRc2 Imaged with the VLA. *Claire J. Chandler & Christopher G. De Pree.* 455, L67, 325-E13 (1995)

SiO Emission from a 1000 AU Disk in Orion KL. *M. C. H. Wright, R. L. Plambeck, L. G. Mundy, & L. W. Looney.* 455, L185, 334-G3 (1995)

Subarcsecond-Resolution 86 GHz Continuum Maps of Orion KL. *R. L. Plambeck, M. C. H. Wright, L. G. Mundy, & L. W. Looney.* 455, L189, 334-G10 (1995)

Name: Parsamyan 21

The FU Orionis–Type Spectrum and Bipolar Outflow of Parsamyan 21. *H. J. Staude & Th. Neckel.* 400, 556, 217-C6 (1992)

Name: ξ Persei Cloud

Determination of $^{12}C/^{13}C$ in the Interstellar Medium toward ζ Ophiuchi and ξ Persei. *Isabel Hawkins, Nahide Craig, & David M. Meyer.* 407, 185, 71-D1 (1993)

Name: Perseus Molecular Cloud

Dense Cores in Dark Clouds. X. Ammonia Emission in the Perseus Molecular Cloud Complex. *E. F. Ladd, P. C. Myers, & A. A. Goodman.* 433, 117, 209-F10 (1994)

Name: Puppis A

CCD Soft X-Ray Observations of the Puppis A Supernova Remnant. *G. D. Berthiaume, D. N. Burrows, G. P. Garmire, & J. A. Nousek.* 425, 132, 81-G8 (1994)

A Far-Ultraviolet Spectrum of the Puppis A Supernova Remnant Using the Hopkins Ultraviolet Telescope. *William P. Blair, John C. Raymond, Knox S. Long, & Gerard A. Kriss.* 454, L35, 307-G12 (1995)

Name: Red Rectangle

Spatially Resolved Spectra of the Unidentified Infrared Features around HD 44179 (The Red Rectangle). *G. C. Sloan, G. L. Grasdalen, & Paul D. LeVan.* 409, 412, 102-B3 (1993)

3.3 and 11.3 Micron Images of HD 44179: Evidence for an Optically Thick Polycyclic Aromatic Hydrocarbon Disk. *Jesse D. Bregman, David Rank, Pasquale Temi, Doug Hudgins, & Laura Kay.* 411, 794, 139-F1 (1993)

A Long-lived Disk around the Red Rectangle? *M. Jura, S. P. Balm, & C. Kahane.* 453, 721, 293-F13 (1995)

Name: Ring Nebula

High-Resolution Far-Infrared Observations of the Ring Nebula. *C. Y. Zhang, P. M. Harvey, Beverly J. Smith, C. Colomé, & J. DiFrancesco.* 425, 687, 90-B13 (1994)

Name: Rosette Nebula

A High-Resolution H I Survey of the Rosette Nebula. *Thomas A. Kuchar & T. M. Bania.* 414, 664, 179-D12 (1993)

Determining Structure in Molecular Clouds. *Jonathan P. Williams, Eugène J. de Geus, & Leo Blitz.* 428, 693, 139-A1 (1994)

The Molecular Content of the Rosette's Teardrops. *E. González-Alfonso & J. Cernicharo.* 430, L125, 175-A7 (1994)

The Density Structure in the Rosette Molecular Cloud: Signposts of Evolution. *Jonathan P. Williams, Leo Blitz, & Anthony A. Stark.* 451, 252, 249-D9 (1995)

Name: Sagittarius A

CO Emission from Molecular Gas at −190 Kilometers per Second near Sagittarius A. *H. S. Liszt & W. B. Burton.* 407, L25, 75-C11 (1993)

The Center of the Galaxy in the Recent Past: A View from *GRANAT*. *R. A. Sunyaev, M. Markevitch, & M. Pavlinsky.* 407, 606, 78-B7 (1993)

Multiconfiguration VLA H92α Observations of Sagittarius A West at 1 Arcsecond Resolution. *D. A. Roberts & W. M. Goss.* 86, 133, 15-E1 (1993)

Excitation of the [Fe III] Bubble Surrounding the Galactic Center "Mini-Cavity." *D. Lutz, A. Krabbe, & R. Genzel.* 418, 244, 234-B1 (1993)

Submillimeter Continuum Survey of the Galactic Center. *D. C. Lis & J. E. Carlstrom.* 424, 189, 64-C8 (1994)

Infrared Photometry of the Black Hole Candidate Sagittarius A*. *Laird M. Close, Donald W. McCarthy, Jr., & Fulvio Melia.* 439, 682, 34-A1 (1995)

H110α Observations of Sagittarius A West: Ionized Gas at Peculiar Velocities at the Galactic Center. *Farhad Yusef-Zadeh, Jun-Hui Zhao, & W. M. Goss.* 442, 646, 88-G9 (1995)

Name: Sagittarius A East

Highly Blueshifted H I Gas toward the Galactic Center. *Farhad Yusef-Zadeh, Anthony Lasenby, & Jennifer Marshall.* 410, L27, 118-G12 (1993)

An H_2O Maser near Sagittarius A East: Evidence for Active Massive Star Formation near the Galactic Center. *Farhad Yusef-Zadeh & David M. Mehringer.* 452, L37, 270-A4 (1995)

Name: Sagittarius A West

Highly Blueshifted H I Gas toward the Galactic Center. *Farhad Yusef-Zadeh, Anthony Lasenby, & Jennifer Marshall.* 410, L27, 118-G12 (1993)

Name: Sagittarius A*

An Accreting Black Hole Model for Sagittarius A*. II. A Detailed Study. *Fulvio Melia.* 426, 577, 105-E9 (1994)

Anisotropy in the Angular Broadening of Sagittarius A* at the Galactic Center. *Farhad Yusef-Zadeh, William Cotton, Mark Wardle, Fulvio Melia, & Douglas A. Roberts.* 434, L63, 241-F1 (1994)

Name: Sagittarius B

Radio Continuum and Radio Recombination Line Observations of Sagittarius B1 and G0.6−0.0. *David M. Mehringer, F. Yusef-Zadeh, Patrick Palmer, & W. M. Goss.* 401, 168, 223-B1 (1992)

Deuterated Ammonia in Sagittarius B2. *Y. Peng, S. N. Vogel, & J. E. Carlstrom.* 418, 255, 234-C1 (1993)

Submillimeter Continuum Survey of the Galactic Center. *D. C. Lis & J. E. Carlstrom.* 424, 189, 64-C8 (1994)

6 Centimeter Formaldehyde Absorption toward the Sagittarius B Star-forming Complex. *David M. Mehringer, Patrick Palmer, & W. M. Goss.* 97, 497, 19-B1 (1995)

Name: Sagittarius B1

OH and H_2O Masers in Sagittarius B1: Evidence for Ongoing Star Formation. *David M. Mehringer, Patrick Palmer, & W. M. Goss.* 402, L69, 13-A1 (1993)

Name: Sagittarius B2

High Angular Resolution Far-Infrared Observations of Sagittarius B2. *Paul F. Goldsmith, Dariusz C. Lis, D. F. Lester, & P. M. Harvey.* 389, 338, 64-B7 (1992)

Millimeter-Wavelength Aperture Synthesis Observations of Massive Star-forming Regions in Sagittarius B2. *D. C. Lis, P. F. Goldsmith, J. E. Carlstrom, & N. Z. Scoville.* 402, 238, 4-A12 (1993)

The Center of the Galaxy in the Recent Past: A View from *GRANAT*. *R. A. Sunyaev, M. Markevitch, & M. Pavlinsky.* 407, 606, 78-B7 (1993)

Radio Continuum and Radio Recombination Line Observations of Sagittarius B2. *David M. Mehringer, Patrick Palmer, W. M. Goss, & F. Yusef-Zadeh.* 412, 684, 152-C11 (1993)

Detection of the Interstellar NH_2 Radical. *Ewine F. van Dishoeck, David J. Jansen, Peter Schilke, & T. G. Phillips.* 416, L83, 216-E10 (1993)

A Large-Scale Cloud Collision in the Galactic Center Molecular Cloud Near Sagittarius B2. *Tetsuo Hasegawa, Fumio Sato, John B. Whiteoak, & Ryosuke Miyawaki.* 429, L77, 158-C1 (1994)

New Formaldehyde Masers in Sagittarius B2. *David M. Mehringer, W. M. Goss, & Patrick Palmer.* 434, 237, 228-F6 (1994)

Three Millimeter Molecular Line Observations in Sagittarius B2. I. Full Synthesis Mapping Study of HNO, CCS, and $HC^{13}CCN$. *Yi-Jehng Kuan & Lewis E. Snyder.* 94, 651, 61-A8 (1994)

Complex Molecules in Sagittarius B2(N): The Importance of Grain Chemistry. *Yanti Miao, David M. Mehringer, Yi-Jehng Kuan, & Lewis E. Snyder.* 445, L59, 141-B13 (1995)

HCl Absorption toward Sagittarius B2. *J. Zmuidzinas, G. A. Blake, J. Carlstrom, J. Keene, & D. Miller.* 447, L125, 191-C2 (1995)

The Sagittarius B2 Star-forming Region. I. Sensitive 1.3 Centimeter Continuum Observations. *R. A. Gaume, M. J. Claussen, C. G. De Pree, W. M. Goss, & D. M. Mehringer.* 449, 663, 221-G5 (1995)

The Sagittarius B2 Star-forming Region. II. High-Resolution H66α Observations of Sagittarius B2 North. *C. G. De Pree, R. A. Gaume, W. M. Goss, & M. J. Claussen.* 451, 284, 249-G6 (1995)

BIMA Array CS $J = 2 \rightarrow 1$ Observations of Sagittarius B2. *David M. Mehringer.* 454, 782, 312-E8 (1995)

Silicon Monoxide in Sagittarius B2. *Y. Peng, Stuart N. Vogel, & J. E. Carlstrom.* 455, 223, 321-B14 (1995)

Name: Sagittarius B2 F

Very Hot Ionized Material in Sagittarius B2 F. *David M. Mehringer, C. G. De Pree, Ralph A. Gaume, W. M. Goss, & Mark J. Claussen.* 442, L29, 85-A5 (1995)

Name: Sagittarius C

Submillimeter Continuum Survey of the Galactic Center. *D. C. Lis & J. E. Carlstrom.* 424, 189, 64-C8 (1994)

Name: Scorpius OB2

The Far-Ultraviolet Dust Albedo in the Upper Scorpius Subgroup of the Scorpius OB2 Association. *Karl D. Gordon, Adolf N. Witt, George R. Carruthers, Susan A. Christensen, & Brian C. Dohne.* 432, 641, 204-A3 (1994)

Name: Serpens Dark Cloud

Solid Carbon Monoxide in the Serpens Dark Cloud. *J. E. Chiar, A. J. Adamson, T. H. Kerr, & D. C. B. Whittet.* 426, 240, 99-B2 (1994)

Name: Serpens Region

The Triple Radio Continuum Source in Serpens: Its Interaction with the Ambient Molecular Gas. *J. M. Torrelles, J. F. Gómez, S. Curiel, C. Eiroa, L. F. Rodríguez, & P. T. P. Ho.* 384, L59, 11-D7 (1992)

Name: Sharpless 170

The H II Region Sharpless 170: A Multiscale Analysis of the Hα Velocity Field. *Marc-Antoine Miville-Deschênes, Gilles Joncas, & Daniel Durand.* 454, 316, 303-F1 (1995)

Name: Sharpless 171

A CO Study of Sharpless 171: Evidence for Interaction between the H II Region and Its Neighboring Molecular Cloud. *Ji Yang & Yasuo Fukui.* 386, 618, 33-A8 (1992)

Name: HL Tauri

In Search of HL Tauri. *David A. Weintraub, Joel H. Kastner, & Barbara A. Whitney.* 452, L141, 280-E6 (1995)

Name: Taurus Cloud Complex

Overall Distribution of Dense Molecular Gas and Star Formation in the Taurus Cloud Complex. *A. Mizuno, T. Onishi, Y. Yonekura, T. Nagahama, H. Ogawa, & Y. Fukui.* 445, L161, 152-B7 (1995)

Name: Taurus Dark Cloud

Star Formation in Taurus. I. The *IRAS* Faint Source Survey. *C. A. Beichman, F. Boulanger, & M. Moshir.* 386, 248, 27-C5 (1992)

Global Aspects of Dynamics and Star Formation in Taurus. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 395, 501, 148-G13 (1992)

A $C^{18}O$ Survey of Dense Cores in the Taurus Molecular Cloud: Signatures of Evolution and Protostellar Collapse. *Shudong Zhou, Neal J. Evans II, Yangsheng Wang, Ruisheng Peng, & K. Y. Lo.* 433, 131, 209-G12 (1994)

Far-Ultraviolet Emission from the Taurus Molecular Cloud. *M. Hurwitz.* 433, 149, 210-B4 (1994)

Evidence for Chemical Processing of Precometary Icy Grains in Circumstellar Environments of Pre–Main-Sequence Stars. *Stephen C. Tegler, David A. Weintraub, Terrence W. Rettig, Yvonne J. Pendleton, Douglas C. B. Whittet, & Craig A. Kulesa.* 439, 279, 25-A9 (1995)

High-Resolution Studies of Solid CO in the Taurus Dark Cloud: Characterizing the Ices in Quiescent Clouds. *J. E. Chiar, A. J. Adamson, T. H. Kerr, & D. C. B. Whittet.* 455, 234, 321-C14 (1995)

Grain Alignment in the Taurus Dark Cloud. *P. A. Gerakines, D. C. B. Whittet, & A. Lazarian.* 455, L171, 334-E7 (1995)

Name: Taurus Molecular Cloud

Study of Structure and Small-Scale Fragmentation in TMC-1. *W. D. Langer, T. Velusamy, T. B. H. Kuiper, S. Levin, E. Olsen, & V. Migenes.* 453, 293, 285-B9 (1995)

Name: Trapezium Cluster

Constraints on Circumstellar Disk Masses in the Trapezium Cluster. *Lee G. Mundy, Leslie W. Looney, & Elizabeth A. Lada.* 452, L137, 280-D12 (1995)

Name: Tycho's Supernova

Evidence for Elemental Variation in the Ejecta of the Tycho Supernova Remnant. *O. Vancura, P. Gorenstein, & John P. Hughes.* 441, 680, 71-D1 (1995)

Name: Vela Supernova Remnant

ROSAT PSPC Observation of the Northeast Region of the Vela Supernova Remnant. I. Evidence of Thermal Structure on a Scale of 5′. *F. Bocchino, A. Maggio, & S. Sciortino.* 437, 209, 286-B1 (1994)

High-Velocity, High-Excitation Neutral Carbon in a Cloud in the Vela Supernova Remnant. *Edward B. Jenkins & George Wallerstein.* 440, 227, 44-C13 (1995)

Interstellar Lines in HD 72127A and B: A Binary Star behind the Vela Supernova Remnant. *George Wallerstein, Andrew Vanture, & Edward B. Jenkins.* 455, 590, 330-A9 (1995)

Alphanumeric: 0525−66

Negative Search for a Counterpart to the Gamma-Ray Repeater Source 0525−66. *John R. Dickel, You-Hua Chu, Christopher Gelino, Ross Beyer, Michael G. Burton, D. K. Milne, Jason Spyromilio, David A. Green, Christopher Wilkinson, & Norbert Junkes.* 448, 623, 203-D1 (1995)

Alphanumeric: 0540−69.3

The Outer Shell of SNR 0540−69.3. *F. D. Seward & F. R. Harnden, Jr.* 421, 581, 25-D5 (1994)

Alphanumeric: 0623+71

The 0623+71 Bow Shock Nebula. *J. M. Hollis, R. J. Oliversen, R. M. Wagner, & W. A. Feibelman.* 393, 217, 116-G3 (1992)

Alphanumeric: AFGL 437

The Powering Sources of the Molecular Outflows in the AFGL 437, AFGL 5142, and AFGL 5157 Regions. *José M. Torrelles, José F. Gómez, Guillem Anglada, Robert Estalella, Rainer Mauersberger, & Carlos Eiroa.* 392, 616, 109-G9 (1992)

On the Nature of the Bipolar Molecular Outflow in AFGL 437. *J. F. Gómez, J. M. Torrelles, R. Estalella, G. Anglada, L. Verdes-Montenegro, & P. T. P. Ho.* 397, 492, 177-A1 (1992)

Alphanumeric: AFGL 618

Near-Infrared Observations of AFGL 618. II. The Atomic Spectrum. *Douglas M. Kelly, William B. Latter, & G. H. Rieke.* 395, 174, 142-D1 (1992)

Alphanumeric: AFGL 2343

Discovery of an Extended Nebula around AFGL 2343 (HD 179821) at 10 Microns. *G. W. Hawkins, C. J. Skinner, M. M. Meixner, J. G. Jernigan, J. F. Arens, E. Keto, & J. R. Graham.* 452, 314, 266-D10 (1995)

Alphanumeric: AFGL 5142

The Powering Sources of the Molecular Outflows in the AFGL 437, AFGL 5142, and AFGL 5157 Regions. *José M. Torrelles, José F. Gómez, Guillem Anglada, Robert Estalella, Rainer Mauersberger, & Carlos Eiroa.* 392, 616, 109-G9 (1992)

The Molecular Cores in the L1287, AFGL 5142, and IRAS 20126+4104 Regions. *Robert Estalella, Rainer Mauersberger, José M. Torrelles, Guillem Anglada, José F. Gómez, Rosario López, & Dirk Muders.* 419, 698, 256-D1 (1993)

Alphanumeric: AFGL 5157

The Molecular Core in the AFGL 5157 Region. *José M. Torrelles, Carlos Eiroa, Rainer Mauersberger, Robert Estalella, Luis F. Miranda, & Guillem Anglada.* 384, 528, 8-F7 (1992)

The Powering Sources of the Molecular Outflows in the AFGL 437, AFGL 5142, and AFGL 5157 Regions. *José M. Torrelles, José F. Gómez, Guillem Anglada, Robert Estalella, Rainer Mauersberger, & Carlos Eiroa.* 392, 616, 109-G9 (1992)

Alphanumeric: AFGL 5376

AFGL 5376: A Strong, Large-Scale Shock near the Galactic Center. *Keven I. Uchida, Mark R. Morris, E. Serabyn, & John Bally.* 421, 505, 24-D9 (1994)

Alphanumeric: B335

Bipolar Outflow in B335: The Small-Scale Structure. *Naomi Hirano, Osamu Kameya, Takashi Kasuga, & Tomofumi Umemoto.* 390, L85, 85-B1 (1992)

Radio Continuum from the Powering Sources of the RNO 43, Haro 4-255 FIR, B335, and PV Cephei Outflows and from the Herbig-Haro Object 32A. *G. Anglada, L. F. Rodríguez, J. Cantó, R. Estalella, & J. M. Torrelles.* 395, 494, 148-G1 (1992)

Evidence for Protostellar Collapse in B335. *Shudong Zhou, Neal J. Evans II, Carsten Kömpe, & C. M. Walmsley.* 404, 232, 30-F11 (1993)

Line Formation in Collapsing Cloud Cores with Rotation and Applications to B335 and IRAS 16293−2422. *Shudong Zhou.* 442, 685, 89-E11 (1995)

Modeling Line Profiles of Protostellar Collapse in B335 with the Monte Carlo Method. *Minho Choi, Neal J. Evans II, Erik M. Gregersen, & Yangsheng Wang.* 448, 742, 204-A9 (1995)

CCS Observations of the Protostellar Envelope of B335. *T. Velusamy, T. B. H. Kuiper, & W. D. Langer.* 451, L75, 260-G11 (1995)

Alphanumeric: 3C 58

The X-Ray Emission of 3C 58 Revisited. *David J. Helfand, Robert H. Becker, & Richard L. White.* 453, 741, 294-A12 (1995)

Alphanumeric: 3C 400.2

ROSAT Observations of the Supernova Remnant 3C 400.2. *Jon M. Saken, Knox S. Long, William P. Blair, & P. Frank Winkler.* 443, 231, 98-C6 (1995)

Alphanumeric: CAL 83

Ionization Nebulae Surrounding CAL 83 and Other Supersoft X-Ray Sources. *R. A. Remillard, S. Rappaport, & L. M. Macri.* 439, 646, 33-C11 (1995)

Alphanumeric: CB 4

Magnetic Fields around Bok Globules: CCD Polarimetry of CB 4. *Brian D. Kane, Dan P. Clemens, Robert W. Leach, & Richard Barvainis.* 445, 269, 136-C2 (1995)

Alphanumeric: CB 34

Multiple Star Formation in Bok Globule CB 34. *João F. Alves & João L. Yun.* 438, L107, 20-C1 (1995)

Discovery of Herbig-Haro Objects and Molecular Hydrogen Jets near Bok Globule CB 34. *Miguel C. Moreira & João L. Yun.* 454, 850, 313-E1 (1995)

Alphanumeric: CRL 618

The 150 AU Structure of the Radio Continuum and the Ammonia Bipolar Outflow in CRL 618. *Jesús Martín-Pintado, Ralph Gaume, Rafael Bachiller, & Ken Johnson.* 419, 725, 256-F4 (1993)

The Disruption of the Dense Disk in CRL 618. *Jesús Martín-Pintado, Ralph A. Gaume, Kenneth J. Johnston, & Rafael Bachiller.* 446, 687, 165-E4 (1995)

Alphanumeric: CRL 2136

Motion at the Ionization Front in the Orion Nebula: A Kinematic Study of the [O I] Line. *C. R. O'Dell & Zheng Wen.* 387, 229, 39-F10 (1992)

The Juggler: A Three-lobed Near-Infrared Reflection Nebula toward CRL 2136 = OH 17.6+0.2. *Joel H. Kastner, David A. Weintraub, & C. Aspin.* 389, 357, 64-D1 (1992)

The Massive Molecular Outflow from CRL 2136 IRS 1. *Joel H. Kastner, David A. Weintraub, Ronald L. Snell, G. Sandell, C. Aspin, D. H. Hughes, & F. Baas.* 425, 695, 90-C9 (1994)

Alphanumeric: CRL 2688

The Multiple Molecular Winds of CRL 2688. *K. Young, G. Serabyn, T. G. Phillips, G. R. Knapp, R. Güsten, & A. Schulz.* 385, 265, 15-B13 (1992)

Alphanumeric: CTA 1

Faraday Rotation Measure Irregularities through the Supernova Remnant CTA 1: A Site of Enhanced Interstellar Plasma Turbulence. *John H. Simonetti.* 386, 170, 26-C3 (1992)

X-Ray Emission from the Supernova Remnant CTA 1. *F. D. Seward, B. Schmidt, & P. Slane.* 453, 284, 285-A11 (1995)

Alphanumeric: CTB 1

Spectroscopy of the Supernova Remnant CTB 1. *Charles J. Hailey & William W. Craig.* 434, 635, 236-E6 (1994)

Alphanumeric: CTB 80

Interaction between the Supernova Remnant CTB 80 and the Ambient Interstellar Medium: H I and CO Observations. *Bon-Chul Koo, Min-Su Yun, Paul T. P. Ho, & Youngung Lee.* 417, 196, 219-G10 (1993)

ROSAT Observations of the Unusual Supernova Remnant CTB 80 Containing the Pulsar PSR 1951+32. *Samar Safi-Harb, Hakki Ögelman, & John P. Finley.* 439, 722, 34-E10 (1995)

Alphanumeric: CTB 109

The Semicircular Shell of CTB 109. *Zhenru Wang, Quinyue Qu, Ding Luo, Richard McCray, & Mordecai-Mark Mac Low.* 388, 127, 50-E10 (1992)

Alphanumeric: DBB 80

Ultraviolet, Optical, and Infrared Observations of the High-Latitude Molecular Cloud toward HD 210121. *Daniel E. Welty & James R. Fowler.* 393, 193, 116-D13 (1992)

Alphanumeric: DEM 152

Triggered Star Formation and the Dynamics of a Superbubble in the LMC: The OB Association LH 47/48 in DEM 152. *M. S. Oey & Philip Massey.* 452, 210, 264-G11 (1995)

Alphanumeric: DR 21

Atomic and Molecular Outflow in DR 21. *A. P. G. Russell, J. Bally, R. Padman, & R. E. Hills.* 387, 219, 39-E13 (1992)

Synthesis Imaging of the DR 21 (OH) Cluster. II. Thermal Ammonia and Water Maser Emission. *Jeffrey G. Mangum, Alwyn Wootten, & Lee G. Mundy.* 388, 467, 56-B6 (1992)

High-Velocity HCO^+ Emission Associated with the DR 21 Molecular Outflow. *Rognvald P. Garden & John E. Carlstrom.* 392, 602, 109-F7 (1992)

High-Resolution Far-Infrared Observations of DR 21. *Cecilia Colomé, Paul M. Harvey, Daniel F. Lester, Murray F. Campbell, & Harold M. Butner.* 447, 236, 175-E5 (1995)

Dense Gas in the DR 21 Region: High-Resolution Imaging of the NH_3 Inversion Lines. *T. L. Wilson, R. A. Gaume, K. J. Johnston, & A. R. Tieftrunk.* 452, 693, 274-C4 (1995)

Alphanumeric: DR 21(OH)

Discovery of $^{14}NH_3(3, 3)$ Maser Emission in the Interstellar Medium. *Jeffrey G. Mangum & Alwyn Wootten.* 428, L33, 134-E8 (1994)

Alphanumeric: 1E 0102.2−7219

New Radio Observations of Supernova Remnant 1E 0102.2−7219 in the Small Magellanic Cloud. *S. W. Amy & Lewis Ball.* 411, 761, 139-C1 (1993)

Alphanumeric: G1.6−0.025

4_{-1}–3_0 *E* Methanol Emission in G1.6−0.025. *Aubrey D. Haschick & Willem A. Baan.* 410, 663, 121-G12 (1993)

Refrigeration of the 18.3 GHz C_3H_2 Transition in Dark Cloud G1.6−0.25. *T. B. H. Kuiper, J. B. Whiteoak, R.-S. Peng, W. L Peters III, & J. E. Reynolds.* 416, L33, 207-E7 (1993)

Alphanumeric: G2.4+1.4

Radio and *IRAS* Observations of Two Nebulae around WO Stars: G2.4+1.4 in the Galaxy and Sandage H II Region 3 in IC 1613. *W. M. Goss & Tatiana A. Lozinskaya.* 439, 637, 33-B8 (1995)

Alphanumeric: G5.89−0.39

Thermal Dust Imaging: The Onset of Asymmetry in the Ultracompact H II Region G5.89−0.39. *Roger Ball, John F. Arens, J. Garrett Jernigan, Eric Keto, & Margaret M. Meixner.* 389, 616, 69-B1 (1992)

G5.89−0.39: A Compact H II Region with a Very Dense Circumstellar Dust Torus. *Paul M. Harvey, Daniel F. Lester, Cecilia Colomé, Beverly Smith, Jean-Louis Monin, & Isabelle Vauglin.* 433, 187, 210-F1 (1994)

Alphanumeric: G10.0−0.3

Radio Monitoring and High-Resolution Imaging of the Soft Gamma-Ray Repeater 1806−20. *G. Vasisht, D. A. Frail, & S. R. Kulkarni.* 440, L65, 57-F6 (1995)

Alphanumeric: G10.5+0.0

Compact Ammonia Sources toward the G10.5+0.0 H II Region Complex. *Guido Garay, James M. Moran, & Luis F. Rodríguez.* 413, 582, 163-F8 (1993)

Alphanumeric: G10.6−0.4

The Rotating Molecular Core in G10.6−0.4: Synthesis Maps in $^{12}C^{18}O$. *Paul T. P. Ho, Susan Terebey, & Jean L. Turner.* 423, 320, 50-B1 (1994)

Alphanumeric: G13.3−1.3

A *ROSAT*-detected, New Galactic Supernova Remnant in Sagittarius, G13.3−1.3. *F. D. Seward, T. M. Dame, R. A. Fesen, & B. Aschenbach.* 449, 681, 222-B7 (1995)

Alphanumeric: G13.87+0.28

The Velocity Structure of the Cometary H II Regions G13.87+0.28, G32.80+0.19B, and G61.48+0.09B1. *Guido Garay, Susana Lizano, & Yolanda Gómez.* 429, 268, 147-D6 (1994)

Alphanumeric: G25.5+0.2

G25.5+0.2: A Ring Nebula around a Luminous Blue Star. *E. E. Becklin, B. Zuckerman, I. S. McLean, & T. R. Geballe.* 430, 774, 171-E1 (1994)

Alphanumeric: G27.4+0.0

The Nature of the Compact X-Ray Source in the Supernova Remnant G27.4+0.0. *David J. Helfand, R. H. Becker, G. Hawkins, & R. L. White.* 434, 627, 236-D9 (1994)

Alphanumeric: G29.9−0.02

Bow Shock Models for the Velocity Structure of Ultracompact H II Regions. *Dave Van Buren & Mordecai-Mark Mac Low.* 394, 534, 136-A7 (1992)

A Multiline, Multiresolution VLA Study of the Ultracompact H II Region G29.96−0.02. *A. Afflerbach, E. Churchwell, P. Hofner, & S. Kurtz.* 437, 697, 295-C12 (1994)

Alphanumeric: G32.80+0.19

The Velocity Structure of the Cometary H II Regions G13.87+0.28, G32.80+0.19B, and G61.48+0.09B1. *Guido Garay, Susana Lizano, & Yolanda Gómez.* 429, 268, 147-D6 (1994)

Near-Infrared and Very High Sensitivity VLA 2 Centimeter Continuum Observations of the H II Region G29.96−0.02. *Alan L. Fey, Ralph A. Gaume, Mark J. Claussen, & Frederick J. Vrba.* 453, 308, 285-C14 (1995)

Warm Molecular Gas Associated with Cometary H II Regions. *Yolanda Gómez, Guido Garay, & Susana Lizano.* 453, 727, 293-G8 (1995)

Alphanumeric: G34.3+0.1

The Environments of Young Stars: Mid-Infrared and Molecular Line Imaging. *Eric Keto, Deanne Proctor, Roger Ball, John Arens, & Garrett Jernigan.* 401, L113, 233-E11 (1992)

Alphanumeric: G34.3+0.2

The Molecular Core in G34.3+0.2: Millimeter Interferometric Observations of HCO^+, $H^{13}CN$, $HC^{15}N$, and SO. *Patricia Carral & William J. Welch.* 385, 244, 15-A4 (1992)

VLA Recombination Line Observations of the Cometary H II Region G34.3+0.2: Dynamics and Physical Properties. *Ralph A. Gaume, Alan L. Fey, & Mark J. Claussen.* 432, 648, 204-B1 (1994)

VLA Spectral Line Observations of the H II Complex G34.3+0.2. *Alan L. Fey, Ralph A. Gaume, Gerald E. Nedoluha, & Mark J. Claussen.* 435, 738, 256-C3 (1994)

Alphanumeric: G39.2−0.3

Spatial Spectral Index Variations in Galactic Shell Supernova Remnants G39.2−0.3 and G41.1−0.3. *Martha C. Anderson & Lawrence Rudnick.* 408, 514, 91-E9 (1993)

Alphanumeric: G41.1−0.3

Spatial Spectral Index Variations in Galactic Shell Supernova Remnants G39.2−0.3 and G41.1−0.3. *Martha C. Anderson & Lawrence Rudnick.* 408, 514, 91-E9 (1993)

Alphanumeric: G42.8−0.6

Supernova Remnant Candidates for the Soft γ-Ray Repeater 1900+14. *G. Vasisht, S. R. Kulkarni, D. A. Frail, & J. Greiner.* 431, L35, 182-F11 (1994)

Alphanumeric: G43.9+1.6

Supernova Remnant Candidates for the Soft γ-Ray Repeater 1900+14. *G. Vasisht, S. R. Kulkarni, D. A. Frail, & J. Greiner.* 431, L35, 182-F11 (1994)

Alphanumeric: G61.48+0.09

The Velocity Structure of the Cometary H II Regions G13.87+0.28, G32.80+0.19B, and G61.48+0.09B1. *Guido Garay, Susana Lizano, & Yolanda Gómez.* 429, 268, 147-D6 (1994)

Warm Molecular Gas Associated with Cometary H II Regions. *Yolanda Gómez, Guido Garay, & Susana Lizano.* 453, 727, 293-G8 (1995)

Alphanumeric: G100−13

The Unusual Cometary Star-forming Region G110−13. *Sten Odenwald, Jacqueline Fischer, Felix J. Lockman, & Sally Stemwedel.* 397, 174, 170-B9 (1992)

Alphanumeric: G216−2.5

The Cold, Massive Molecular Cloud G216−2.5. II. Structure and Kinematics. *Youngung Lee, Ronald L. Snell, & Robert L. Dickman.* 432, 167, 195-C8 (1994)

Alphanumeric: G292.0+1.8

Elemental Abundances of the Supernova Remnant G292.0+1.8: Evidence for a Massive Progenitor. *John P. Hughes & K. P. Singh.* 422, 126, 31-F1 (1994)

Alphanumeric: G318.9+0.4

Further Observations of the Peculiar Galactic Radio Source G318.9+0.4. *Jonathan B. Z. Whiteoak.* 415, 701, 196-E3 (1993)

Alphanumeric: G333.6−0.2

Detection of the [N II] 122 and 205 Micron Lines: Densities in G333.6−0.2. *Sean W. J. Colgan, Michael R. Haas, Edwin F. Erickson, Robert H. Rubin, Janet P. Simpson, & R. W. Russell.* 413, 237, 159-B13 (1993)

Nebular Properties from Far-Infrared Spectroscopy. *Robert H. Rubin, Janet P. Simpson, Steven D. Lord, Sean W. J. Colgan, Edwin F. Erickson, & Michael R. Haas.* 420, 772, 12-E1 (1994)

Alphanumeric: G359.1−00.2

Multifrequency Radio Studies of G359.1−00.2. *Andrew D. Gray, Jenniger Nicholls, Ron D. Ekers, & Lawrence E. Cram.* 448, 164, 194-D4 (1995)

Alphanumeric: G359.1−0.5

A Dense Molecular Ring Surrounding the Nonthermal Galactic Center Radio Shell G359.1−0.5. *Keven I. Uchida, Mark Morris, J. Bally, M. Pound, & F. Yusef-Zadeh.* 398, 128, 183-E5 (1992)

Alphanumeric: GC IRS 6E

Approaching the Interstellar Grain Organic Refractory Component. *J. Mayo Greenberg, Aigen Li, Celia X. Mendoza-Gómez, Willem A. Schutte, Perry A. Gerakines, & Menno de Groot.* 455, L177, 334-F1 (1995)

Alphanumeric: GL 490

A Multitransition CO Study of GL 490. *George F. Mitchell, Siow Wang Lee, Jean-Pierre Maillard, Henry Matthews, Tatsuhiko I. Hasegawa, & Andrew I. Harris.* 438, 794, 15-B12 (1995)

An HCO^+ Study of NGC 7538, IRS 9, and GL 490. *Tatsuhiko I. Hasegawa & George F. Mitchell.* 441, 665, 71-B11 (1995)

Alphanumeric: GL 618

Spectropolarimetry of the Post–Main-Sequence Bipolar Nebulae GL 618, M2-56, and M1-92. *Susan R. Trammell, Harriet L. Dinerstein, & Robert W. Goodrich.* 402, 249, 4-B12 (1993)

Alphanumeric: GL 2136

Methanol Ice in the Protostar GL 2136. *C. J. Skinner, A. G. G. M. Tielens, M. J. Barlow, & K. Justtanont.* 399, L79, 201-B7 (1992)

Alphanumeric: GL 2591

Infrared Morphology of Mass Outflow from GL 2591. *Motohide Tamura & Takuya Yamashita.* 391, 710, 96-G4 (1992)

Observation of [C I] toward the GL 2591 and W28 A2 Molecular Outflows. *Minho Choi, Neal J. Evans II, Daniel T. Jaffe, & Christopher K. Walker.* 435, 734, 256-B10 (1994)

Observation of Infrared and Radio Lines of Molecules toward GL 2591 and Comparison to Physical and Chemical Models. *John S. Carr, Neal J. Evans II, J. H. Lacy, & Shudong Zhou.* 450, 667, 240-A7 (1995)

CO J = 3–2 and HCO^+ J = 4–3 Observations of the GL 2591 Molecular Outflow. *Tatsuhiko I. Hasegawa & George F. Mitchell.* 451, 225, 249-B1 (1995)

Alphanumeric: GM 24

Further Studies on the Champagne Phase of GM 24 (IRAS 17136−3617). *J. F. Gómez, J. M. Torrelles, M. Tapia, Y. Gómez, L. F. Rodríguez, M. Roth, & P. T. P. Ho.* 409, 269, 100-D10 (1993)

Alphanumeric: GRS 1915+105

Radio Monitoring of GRS 1915+105. *L. F. Rodríguez, E. Gerard, I. F. Mirabel, Y. Gómez, & A. Velázquez.* 101, 173, 55-A5 (1995)

Alphanumeric: HH 1

Polarization Profiles of Scattered Emission Lines. II. Upstream Dust Scattering in the HH 1 Jet. *W. J. Henney, A. C. Raga, & D. J. Axon.* 427, 305, 113-F6 (1994)

Alphanumeric: HH 1–2

A New Herbig-Haro Flow in the HH 1–2 Complex. *Bo Reipurth, Steve Heathcote, M. Roth, A. Noriega-Crespo, & A. C. Raga.* 408, L49, 89-D1 (1993)

Ammonia Emission Downstream of the Herbig-Haro Object 1. *J. M. Torrelles, J. F. Gómez, P. T. P. Ho, G. Anglada, L. F. Rodríguez, & J. Cantó.* 417, 655, 227-D13 (1993)

The Puzzling Distribution of the High-Density Molecular Gas in HH 1–2: A Contracting Interstellar Toroid? *José M. Torrelles, José F. Gómez, Paul T. P. Ho, Luis F. Rodríguez, Guillem Anglada, & Jorge Cantó.* 435, 290, 247-D2 (1994)

Giant Bow Shock Pairs Associated with Herbig-Haro Jets. *Katsuo Ogura.* 450, L23, 235-F6 (1995)

Alphanumeric: HH 2

On the Nature of the Excitation of Herbig-Haro Object 2. *José M. Torrelles, Luis F. Rodríguez, Jorge Cantó, Guillem Anglada, José F. Gómez, Salvador Curiel, & Paul T. P. Ho.* 396, L95, 167-D7 (1992)

Alphanumeric: HH 7–11

The H_2 Velocity Field in Herbig-Haro 7-11. *John S. Carr.* 406, 553, 64-F6 (1993)

Alphanumeric: HH 32A

Radio Continuum from the Powering Sources of the RNO 43, Haro 4-255 FIR, B335, and PV Cephei Outflows and from the Herbig-Haro Object 32A. *G. Anglada, L. F. Rodríguez, J. Cantó, R. Estalella, & J. M. Torrelles.* 395, 494, 148-G1 (1992)

Alphanumeric: HH 46–47

Multiple Outflow Episodes from Protostars: Three-dimensional Models of Intermittent Jets. *Elisabete M. de Gouveia Dal Pino & Willy Benz.* 435, 261, 246-G11 (1994)

Alphanumeric: HH 47

Entrainment by the Jet in HH 47. *John C. Raymond, Jon A. Morse, Patrick Hartigan, Salvador Curiel, & Steve Heathcote.* 434, 232, 228-E12 (1994)

Molecular H_2 Emission in HH 47A: *Hubble Space Telescope* GHRS and FOC Observations. *Salvador Curiel, John C. Raymond, Mark Wolfire, Patrick Hartigan, Jon Morse, Richard D. Schwartz, & Peter Nisenson.* 453, 322, 285-E10 (1995)

Alphanumeric: HH 80

Large Proper Motions and Ejection of New Condensations in the HH 80–81 Thermal Radio Jet. *J. Martí, L. F. Rodríguez, & Bo Reipurth.* 449, 184, 212-F6 (1995)

Alphanumeric: HH 80 North

Ammonia Downstream from HH 80 North. *José M. Girart, Luis F. Rodriíguez, Guillem Anglada, Robert Estalella, José M. Torrelles, Josep Martí, Miriam Peña, Sandra Ayala, Salvador Curiel, & Alberto Noriega-Crespo.* 435, L145, 260-D4 (1994)

Alphanumeric: HH 81

Large Proper Motions and Ejection of New Condensations in the HH 80–81 Thermal Radio Jet. *J. Martí, L. F. Rodríguez, & Bo Reipurth.* 449, 184, 212-F6 (1995)

Alphanumeric: HH 83

The HH 83 Molecular Cloud: Gone with the Wind. *John Bally, Alain Castets, & Gilles Duvert.* 423, 310, 50-A3 (1994)

Circumstellar Gas around the Exciting Source of the HH 83 Jet. *Makoto Nakano, Koji Sugitani, Fumio Sato, & Katsuo Ogura.* 423, L147, 61-D5 (1994)

Alphanumeric: HH 111

Structure and Kinematics of the HH 111 Jet. *Bo Reipurth, A. C. Raga, & Steve Heathcote.* 392, 145, 102-F10 (1992)

Near-Infrared Observations of the HH 111 Region. *Roland Gredel & Bo Reipurth.* 407, L29, 75-D1 (1993)

Multiple Outflow Episodes from Protostars: Three-dimensional Models of Intermittent Jets. *Elisabete M. de Gouveia Dal Pino & Willy Benz.* 435, 261, 246-G11 (1994)

Alphanumeric: HH 124

Giant Bow Shock Pairs Associated with Herbig-Haro Jets. *Katsuo Ogura.* 450, L23, 235-F6 (1995)

Alphanumeric: HH 135

Spectacular Herbig-Haro Objects in the Carina Region. *K. Ogura & J. R. Walsh.* 400, 248, 212-A7 (1992)

Alphanumeric: HH 136

Spectacular Herbig-Haro Objects in the Carina Region. *K. Ogura & J. R. Walsh.* 400, 248, 212-A7 (1992)

Alphanumeric: HH 144

A New Herbig-Haro Flow in the HH 1–2 Complex. *Bo Reipurth, Steve Heathcote, M. Roth, A. Noriega-Crespo, & A. C. Raga.* 408, L49, 89-D1 (1993)

Alphanumeric: HH 145

A New Herbig-Haro Flow in the HH 1–2 Complex. *Bo Reipurth, Steve Heathcote, M. Roth, A. Noriega-Crespo, & A. C. Raga.* 408, L49, 89-D1 (1993)

Alphanumeric: IC 133

Microarcsecond Proper Motions of Extragalactic Water Vapor Masers in M33. *L. J. Greenhill, J. M. Moran, M. J. Reid, K. M. Menten, & H. Hirabayashi.* 406, 482, 63-F13 (1993)

Alphanumeric: IC 434

The [C II] 158 Micron Emission from the Horsehead Nebula. *S. Zhou, D. T. Jaffe, J. E. Howe, N. Geis, F. Herrmann, S. C. Madden, A. Poglitsch, & G. J. Stacey.* 419, 190, 248-E3 (1993)

Alphanumeric: IC 435

Scattering Properties of the Dust in the Reflection Nebula IC 435. *Daniela Calzetti, Ralph C. Bohlin, Karl D. Gordon, Adolf N. Witt, & Luciana Bianchi.* 446, L97, 171-C7 (1995)

Alphanumeric: IC 443

Strongly Shocked Interstellar Gas in IC 443. I. High-Resolution Molecular Observations. *Z. Wang & N. Z. Scoville.* 386, 158, 26-B3 (1992)

Tests of Shock Chemistry in IC 443G. *B. E. Turner, Kin-Wing Chan, S. Green, & D. A. Lubowich.* 399, 114, 196-E12 (1992)

Structure and Kinematics of Dense Gas Associated with the Supernova Remnant IC 443. *R. L. Dickman, Ronald L. Snell, L. M. Ziurys, & Yi-Long Huang.* 400, 203, 211-C9 (1992)

High-Resolution Images of Shocked Molecular Clumps in the Supernova Remnant IC 443. *Jan A. Tauber, Ronald L. Snell, Robert L. Dickman, & L. M. Ziurys.* 421, 570, 25-C4 (1994)

Infrared Imaging and Spectroscopy of the Molecular Shock in IC 443. *Matthew J. Richter, James R. Graham, & Gillian S. Wright.* 454, 277, 303-B1 (1995)

Alphanumeric: IC 1396

The Large-Scale Structure, Kinematics, and Evolution of IC 1396. *Nimesh A. Patel, Paul F. Goldsmith, Ronald L. Snell, Thomas Hezel, & Taoling Xie.* 447, 721, 186-A4 (1995)

Alphanumeric: IC 1396E

PIG (Partially Ionized Globule) Anatomy: Density and Temperature Structure of the Bright-rimmed Globule IC 1396E. *E. Serabyn, R. Güsten, & L. Mundy.* 404, 247, 31-A1 (1993)

Alphanumeric: IC 2220

An Infrared Study of the Remarkable Dusty M Star HR 3126. *J. E. Chiar, D. C. B. Whittet, D. K. Aitken, P. F. Roche, C. H. Smith, H. J. Walker, P. A. Whitelock, & C. Wright.* 409, 404, 102-A8 (1993)

Alphanumeric: IC 5146

Dust Extinction and Molecular Gas in the Dark Cloud IC 5146. *Charles J. Lada, Elizabeth A. Lada, Dan P. Clemens, & John Bally.* 429, 694, 154-C11 (1994)

Alphanumeric: IRAS 03282+3035

Shear in the IRAS 3282 Outflow. *M. Tafalla, R. Bachiller, J. Martín-Pintado, & M. C. H. Wright.* 415, L139, 200-F1 (1993)

High-Velocity Hot Ammonia in Bipolar Outflows. *R. Bachiller, J. Martín-Pintado, & A. Fuente.* 417, L45, 223-D1 (1993)

Shocked Molecular Gas around the Extremely Young Source IRAS 03282+3035. *R. Bachiller, S. Terebey, T. Jarrett, J. Martín-Pintado, C. A. Beichman, & D. Van Buren.* 437, 296, 287-C2 (1994)

Alphanumeric: IRAS 16293−2422

Molecular Abundances and Low-Mass Star Formation. I. Si- and S-bearing Species toward IRAS 16293−2422. *Geoffrey A. Blake, Ewine F. van Dishoeck, David J. Jansen, T. D. Groesbeck, & Lee G. Mundy.* 428, 680, 138-F13 (1994)

Line Formation in Collapsing Cloud Cores with Rotation and Applications to B335 and IRAS 16293−2422. *Shudong Zhou.* 442, 685, 89-E11 (1995)

Alphanumeric: IRAS 19550+3248

A Multiwavelength Study of IRAS 19550+3248: A Protostar Possibly Formed by a Cloud-Cloud Collision. *Bon-Chul Koo, Youngung Lee, G. A. Fuller, Myung Gyoon Lee, Suk-Minn Kwon, & Jae-Hoon Jung.* 429, 233, 147-A7 (1994)

Alphanumeric: IRAS 20050+2027

An Extremely High Velocity Multipolar Outflow around IRAS 20050+2720. *R. Bachiller, A. Fuente, & M. Tafalla.* 445, L51, 141-A13 (1995)

Alphanumeric: IRAS 20126+4104

The Molecular Cores in the L1287, AFGL 5142, and IRAS 20126+4104 Regions. *Robert Estalella, Rainer Mauersberger, José M. Torrelles, Guillem Anglada, José F. Gómez, Rosario López, & Dirk Muders.* 419, 698, 256-D1 (1993)

Alphanumeric: IRc2

What is Powering the Orion Kleinmann-Low Infrared Nebula? *Karl M. Menten & Mark J. Reid.* 445, L157, 152-A12 (1995)

The 685–692 GHz Spectrum of the Orion Core. *A. I. Harris, L. W. Avery, K.-F. Schuster, L. J. Tacconi, & R. Genzel.* 446, L85, 171-A9 (1995)

Alphanumeric: IRS 4

High-Resolution Far-Infrared Observations and Radiative-Transfer Models of W3 IRS 4 and IRS 5. *M. F. Campbell, H. M. Butner, P. M. Harvey, N. J. Evans II, M. B. Campbell, & C. N. Sabbey.* 454, 831, 313-C6 (1995)

Alphanumeric: IRS 5

High-Resolution Far-Infrared Observations and Radiative-Transfer Models of W3 IRS 4 and IRS 5. *M. F. Campbell, H. M. Butner, P. M. Harvey, N. J. Evans II, M. B. Campbell, & C. N. Sabbey.* 454, 831, 313-C6 (1995)

Alphanumeric: IRS 9

An HCO^+ Study of NGC 7538, IRS 9, and GL 490. *Tatsuhiko I. Hasegawa & George F. Mitchell.* 441, 665, 71-B11 (1995)

Alphanumeric: IRS 16

Evidence for the Interaction of the IRS 16 Wind with the Ionized and Molecular Gas at the Galactic Center. *Farhad Yusef-Zadeh & Mark Wardle.* 405, 584, 50-C5 (1993)

Highly Blueshifted H I Gas toward the Galactic Center. *Farhad Yusef-Zadeh, Anthony Lasenby, & Jennifer Marshall.* 410, L27, 118-G12 (1993)

Anisotropy in the Angular Broadening of Sagittarius A^* at the Galactic Center. *Farhad Yusef-Zadeh, William Cotton, Mark Wardle, Fulvio Melia, & Douglas A. Roberts.* 434, L63, 241-F1 (1994)

Alphanumeric: L134N

A Source Model for the L134N Molecular Cloud. *Daryl A. Swade & F. Peter Schloerb.* 392, 543, 109-A9 (1992)

Nitrogen Sulfide in Quiescent Dark Clouds. *Douglas McGonagle, William M. Irvine, & Masatoshi Ohishi.* 422, 621, 39-E8 (1994)

Alphanumeric: L483

The Infrared Nebula and Outflow in Lynds 483. *G. A. Fuller, E. A. Lada, C. R. Masson, & P. C. Myers.* 453, 754, 294-C3 (1995)

Alphanumeric: L810

Near-Infrared Discovery of the L810 Nebula Illuminator. *João Lin Yun, Dan P. Clemens, Mark J. McCaughrean, & Marcia Rieke.* 408, L101, 95-E9 (1993)

Alphanumeric: L1148

High-Velocity Hot Ammonia in Bipolar Outflows. *R. Bachiller, J. Martín-Pintado, & A. Fuente.* 417, L45, 223-D1 (1993)

Alphanumeric: L1157

The Outflow in the L1157 Dark Cloud: Evidence for Shock Heating of the Interacting Gas. *T. Umemoto, T. Iwata, Y. Fukui, H. Mikami, S. Yamamoto, O. Kameya, & N. Hirano.* 392, L83, 113-E6 (1992)

High-Velocity Hot Ammonia in Bipolar Outflows. *R. Bachiller, J. Martín-Pintado, & A. Fuente.* 417, L45, 223-D1 (1993)

Ammonia Emission from Bow Shocks in the L1157 Outflow. *M. Tafalla & R. Bachiller.* 443, L37, 102-G4 (1995)

Si Emission in a Jetlike Molecular Outflow toward L1157. *Q. Zhang, Paul T. P. Ho, M. C. H. Wright, & D. J. Wilner.* 451, L71, 260-G1 (1995)

Alphanumeric: L1204

Dense Cores in L1204/S140: Star Formation and Velocity Shifts. *M. Tafalla, R. Bachiller, & J. Martín-Pintado.* 403, 175, 16-B8 (1993)

Alphanumeric: L1228

Twin Herbig-Haro Jets and Molecular Outflows in L1228. *John Bally, David Devine, Robert A. Fesen, & Adair P. Lane.* 454, 345, 304-A9 (1995)

Alphanumeric: L1251

A New Look at the Dark Cloud L1251: Sensitive Observations of the Molecular Emission. *Fumio Sato, Akira Mizuno, Tomoo Nagahama, Toshikazu Onishi, Yoshinori Yonekura, & Yasuo Fukui.* 435, 279, 247-B11 (1994)

Alphanumeric: L1257

Proto–Brown Dwarfs. I. Methods and Results for High-Latitude Clouds. *Marc W. Pound & Leo Blitz.* 418, 328, 235-B9 (1993)

Alphanumeric: L1287

The Exciting Young Stellar Object for the Molecular Outflow at the Core of L1287. *David A. Weintraub & Joel Kastner.* 411, 767, 139-C9 (1993)

A Radio Candidate for the Exciting Source of the L1287 Bipolar Outflow. *Guillem Anglada, Luis F. Rodríguez, José M. Girart, Robert Estalella, & José M. Torrelles.* 420, L91, 15-F7 (1994)

Interferometric Observations of the Circumstellar Molecular Structure around the Young Stellar Object in L1287. *Ji Yang, Nagayoshi Ohashi, & Yasuo Fukui.* 455, 175, 320-E7 (1995)

Alphanumeric: L1448

The L1448 Molecular Jet. *John Bally, Elizabeth A. Lada, & Adair P. Lane.* 418, 322, 235-A10 (1993)

Alphanumeric: L1495

A Multiwavelength Study of Star Formation in the L1495E Cloud in Taurus. *Karen M. Strom & Stephen E. Strom.* 424, 237, 64-G4 (1994)

Alphanumeric: L1527

A $C^{18}O$ Survey of Dense Cores in the Taurus Molecular Cloud: Signatures of Evolution and Protostellar Collapse. *Shudong Zhou, Neal J. Evans II, Yangsheng Wang, Ruisheng Peng, & K. Y. Lo.* 433, 131, 209-G12 (1994)

Alphanumeric: L1551 IRS 5

The Molecular Hydrogen Emission around L1551 IRS 5: Shock- Heated Molecular Gas at the Base of the Molecular Outflow. *Takuya Yamashita & Motohide Tamura.* 387, L93, 48-E5 (1992)

Detection of Magnetohydrodynamic Shocks in the L1551 Outflow. *M. Barsony, N. Z. Scoville, & C. J. Chandler.* 409, 275, 100-E4 (1993)

Detection of the 2165 Inverse Centimeter (4.619 Micron) XCN Band in the Spectrum of L1551 IRS 5. *Stephen C. Tegler, David A. Weintraub, Louis J. Allamandola, Scott A. Sandford, Terrence W. Rettig, & Humberto Campins.* 411, 260, 130-D9 (1993)

"Spherical" Disks: Moving toward a Unified Source Model for L1551. *Harold M. Butner, Antonella Natta, & Neal J. Evans II.* 420, 326, 5-A1 (1994)

Successive Ejection Events in the L1551 Molecular Outflow. *R. Bachiller, M. Tafalla, & J. Cernicharo.* 425, L93, 94-F1 (1994)

Spatially Resolved Submillimeter Continuum Emission toward L1551 IRS 5. *E. F. Ladd, G. A. Fuller, R. Padman, P. C. Myers, & Fred C. Adams.* 439, 771, 35-C2 (1995)

Observations of the Clumpy Shell of the L1551 Bipolar Outflow. *R. L. Plambeck & R. L. Snell.* 446, 234, 156-D6 (1995)

Alphanumeric: L1551NE

The L1551NE Molecular Outflow. *G. H. Moriarty-Schieven, H. M. Butner, & P. G. Wannier.* 445, L55, 141-B6 (1995)

Alphanumeric: L1630

Global Star Formation in the L1630 Molecular Cloud. *Elizabeth A. Lada.* 393, L25, 120-D7 (1992)

The Structure and Nature of NGC 2071 IRS 1: High-Resolution Radio Continuum Maps. *Howard A. Smith & Sara C. Beck.* 420, 643, 10-F7 (1994)

Ultraviolet-illuminated Molecular Cloud Boundaries: Extended [C II] 158 Micron Emission toward L1630. *D. T. Jaffe, S. Zhou, J. E. Howe, F. Herrmann, S. C. Madden, A. Poglitsch, P. P. van der Werf, & G. J. Stacey.* 436, 203, 264-A10 (1994)

Alphanumeric: L1641

^{13}CO and HCO^+ Observations of *IRAS* Sources in L1641. *Hua Chen, Yasuo Fukui, & Ji Yang.* 398, 544, 190-G12 (1992)

The Association of ^{13}CO Molecular Gas with *IRAS* Sources in L1641. *H. Chen, Y. Fukui, & T. Iwata.* 411, 239, 130-B11 (1993)

Infrared Luminosity Functions for the Young Stellar Population Associated with the L1641 Molecular Cloud. *Karen M. Strom, Stephen E. Strom, & K. M. Merrill.* 412, 233, 145-A8 (1993)

Star Formation in the L1641 North Cluster. *Klaus-Werner Hodapp & James Deane.* 88, 119, 42-A1 (1993)

An *IRAS* Sample from Co-added Images of L1641. *H. Chen, A. T. Tokunaga, & Y. Fukui.* 416, 235, 204-A4 (1993)

Stellar Density Enhancements Associated with *IRAS* Sources in L1641. *Hua Chen & Alan T. Tokunaga.* 90, 149, 2-G12 (1994)

Alphanumeric: L1755

Does Near-Infrared Polarimetry Reveal the Magnetic Field in Cold Dark Clouds? *Alyssa A. Goodman, Terry J. Jones, Elizabeth A. Lada, & Philip C. Myers.* 448, 748, 205-B4 (1995)

Alphanumeric: LMC N49

A Multiwavelength Study of the Supernova Remnant N49 in the Large Magellanic Cloud. *Olaf Vancura, William P. Blair, Knox S. Long, & John C. Raymond.* 394, 158, 130-A1 (1992)

Alphanumeric: LMC N132D

High-Resolution X-Ray Spectroscopy of the Supernova Remnant N132D. *Una Hwang, John P. Hughes, Claude R. Canizares, & Thomas H. Markert.* 414, 219, 172-F11 (1993)

Alphanumeric: M−0.02−0.07

The Compression of the M-0.02-0.07 Molecular Cloud by the Sagittarius A East Shell Source. *E. Serabyn, J. H. Lacy, & J. M. Achtermann.* 395, 166, 142-C1 (1992)

Alphanumeric: M1-92

Spectropolarimetry of the Post–Main-Sequence Bipolar Nebulae GL 618, M2-56, and M1-92. *Susan R. Trammell, Harriet L. Dinerstein, & Robert W. Goodrich.* 402, 249, 4-B12 (1993)

Alphanumeric: M2-9

Spectropolarimetry of the Bipolar Planetary Nebula M2-9. *Susan R. Trammell, Robert W. Goodrich, & Harriet L. Dinerstein.* 453, 761, 294-D2 (1995)

Alphanumeric: M2-56

Spectropolarimetry of the Post–Main-Sequence Bipolar Nebulae GL 618, M2-56, and M1-92. *Susan R. Trammell, Harriet L. Dinerstein, & Robert W. Goodrich.* 402, 249, 4-B12 (1993)

Alphanumeric: M17SW

Detection of the Carbon Monoxide Ion (CO^+) in the Interstellar Medium and a Planetary Nebula. *William B. Latter, Christopher K. Walker, & Philip R. Maloney.* 419, L97, 259-F14 (1993)

Alphanumeric: MBM 12

Atomic Carbon in the High-Latitude Molecular Cloud MBM 12. *James G. Ingalls, T. M. Bania, & James M. Jackson.* 431, L139, 192-D4 (1994)

Alphanumeric: MBM 16

The Observation of Correlated Velocity Structures in a Translucent Molecular Cloud and Implications for Turbulence. *L. Magnani, T. N. LaRosa, & S. N. Shore.* 402, 226, 3-G10 (1993)

CH as a Tracer of a Translucent Cloud Boundary. *Loris Magnani & Joseph S. Onello.* 408, 559, 92-B9 (1993)

Alphanumeric: MSH 15−52

The Nonthermal Radio, X-Ray, and TeV Gamma-Ray Spectra of MSH 15−52. *I. du Plessis, O. C. de Jager, S. Buchner, H. I. Nel, A. R. North, B. C. Raubenheimer, & D. J. van der Walt.* 453, 746, 294-B6 (1995)

PSR 1509−58 and Its Plerionic Environment. *C. Greiveldinger, S. Caucino, S. Massaglia, H. Ögelman, & E. Trussoni.* 454, 855, 313-E11 (1995)

Alphanumeric: N49

Far-Ultraviolet Observations of the Supernova Remnant N49 Using the Hopkins Ultraviolet Telescope. *Olaf Vancura, William P. Blair, Knox S. Long, Arthur F. Davidsen, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Henry C. Ferguson, Richard C. Henry, Randy A. Kimble, Gerard A. Kriss, Jeffrey W. Kruk, & H. Warren Moos.* 401, 220, 223-G1 (1992)

Negative Search for a Counterpart to the Gamma-Ray Repeater Source 0525−66. *John R. Dickel, You-Hua Chu, Christopher Gelino, Ross Beyer, Michael G. Burton, D. K. Milne, Jason Spyromilio, David A. Green, Christopher Wilkinson, & Norbert Junkes.* 448, 623, 203-D1 (1995)

Alphanumeric: N132D

IUE Spectra and Optical Imaging of the Oxygen-rich Supernova Remnant N132D. *William P. Blair, John C. Raymond, & Knox S. Long.* 423, 334, 50-C7 (1994)

Alphanumeric: OH 231.8+4.2

Variation in the Near-Infrared Surface Brightness Distribution of the Bipolar Nebula OH 231.8+4.2. *Joel H. Kastner, David A. Weintraub, B. Zuckerman, E. E. Becklin, I. McLean, & I. Gatley.* 398, 552, 191-A8 (1992)

Radio and X-Ray Observations of OH 231.8+4.2. *Gregory B. Taylor & Mark Morris.* 409, 720, 108-A9 (1993)

Alphanumeric: OMC-1

Hydrogen Chloride in OMC-1. *Peter Schilke, T. G. Phillips, & Ning Wang.* 441, 334, 64-A1 (1995)

The 685–692 GHz Spectrum of the Orion Core. *A. I. Harris, L. W. Avery, K.-F. Schuster, L. J. Tacconi, & R. Genzel.* 446, L85, 171-A9 (1995)

Alphanumeric: RCW 58

An Infrared Study of Three Wolf-Rayet Ring Nebulae. *J. S. Mathis, J. P. Cassinelli, K. A. van der Hucht, T. Prusti, P. R. Wesselius, & P. M. Williams.* 384, 197, 3-D5 (1992)

Alphanumeric: RCW 122C

High-Resolution Far-Infrared Mapping of the Star-forming Region RCW 122C. *C. Y. Zhang, P. M. Harvey, Beverly J. Smith, C. Colomé, & J. DiFrancesco.* 452, 308, 266-D1 (1995)

Alphanumeric: RNO 1B/1C

The Molecular Cores in the L1287, AFGL 5142, and IRAS 20126+4104 Regions. *Robert Estalella, Rainer Mauersberger, José M. Torrelles, Guillem Anglada, José F. Gómez, Rosario López, & Dirk Muders.* 419, 698, 256-D1 (1993)

Alphanumeric: RNO 43

Radio Continuum from the Powering Sources of the RNO 43, Haro 4-255 FIR, B335, and PV Cephei Outflows and from the Herbig-Haro Object 32A. *G. Anglada, L. F. Rodríguez, J. Cantó, R. Estalella, & J. M. Torrelles.* 395, 494, 148-G1 (1992)

Alphanumeric: S106

CO Lines toward NGC 2024 and Other Star-forming Regions: A Closer Look at the Warm Gas Component. *U. U. Graf, A. Eckart, R. Genzel, A. I. Harris, A. Poglitsch, A. P. G. Russell, & J. Stutzki.* 405, 249, 44-B13 (1993)

The Distribution of Molecular and Neutral Gas and Magnetic Fields near the Bipolar H II Region S106. *D. A. Roberts, R. M. Crutcher, & T. H. Troland.* 442, 208, 80-A9 (1995)

Alphanumeric: S122

Riddle and Puzzle of the Optical Region S122 = 2306+1439. *J. P. Vallée & A. G. de Bruyn.* 393, 674, 124-B10 (1992)

Alphanumeric: S140

New VLA Observations of NH_3 in S140. *Shudong Zhou, Neal J. Evans II, Lee G. Mundy, & Marc L. Kutner.* 417, 613, 227-A7 (1993)

Observations of Large-Scale [C I] Emission from S140. *René Plume, D. T. Jaffe, & Jocelyn Keene.* 425, L49, 85-G3 (1994)

The S140 Core: Aperture Synthesis HCO^+ and SO Observations. *D. J. Wilner & W. J. Welch.* 427, 898, 123-G3 (1994)

CS Multitransitional Study of Density Distribution in Star-forming Regions. II. The S140 Region. *Shudong Zhou, Harold M. Butner, Neal J. Evans II, Rolf Güsten, Marc L. Kutner, & Lee G. Mundy.* 428, 219, 130-G10 (1994)

Alphanumeric: S147

A High Galactic Latitude Pulsar Survey of the Arecibo Sky. *R. S. Foster, B. J. Cadwell, A. Wolszczan, & S. B. Anderson.* 454, 826, 313-B12 (1995)

Alphanumeric: S255

High-Velocity OH in Absorption: A New Tracer of Shocked Gas in Outflows? *A. Ruiz, L. F. Rodríguez, J. Cantó, & I. F. Mirabel.* 398, 139, 183-F3 (1992)

Alphanumeric: S308

An Infrared Study of Three Wolf-Rayet Ring Nebulae. *J. S. Mathis, J. P. Cassinelli, K. A. van der Hucht, T. Prusti, P. R. Wesselius, & P. M. Williams.* 384, 197, 3-D5 (1992)

Alphanumeric: Sh 187

The Sharpless 187 Gas Complex: A Multifrequency Study. *G. Joncas, D. Durand, & R. S. Roger.* 387, 591, 46-A9 (1992)

Alphanumeric: SN 1006

Faint Object Spectrograph Spectra of the Broad Fe II Absorption Lines in the Remnant of SN 1006. *Chi-Chao Wu, D. Michael Crenshaw, Robert A. Fesen, Andrew J. S. Hamilton, & Craig L. Sarazin.* 416, 247, 204-B7 (1993)

Detection of Ultraviolet Emission Lines in SN 1006 with the Hopkins Ultraviolet Telescope. *John C. Raymond, William P. Blair, & Knox S. Long.* 454, L31, 307-G2 (1995)

Alphanumeric: SN 1985A

Detection of an Unresolved Nuclear Radio Source in M31. *Patrick C. Crane, John R. Dickel, & John J. Cowan.* 390, L9, 78-B7 (1992)

Alphanumeric: SN 1987A

Hydrogen Recombination at High Optical Depth and the Spectrum of SN 1987A. *Yueming Xu, Richard McCray, Ernesto Oliva, & Sofia Randich.* 386, 181, 26-D3 (1992)

Two New Light Echo Structures from SN 1987A at Large Distances. *Jun Xu, Arlin P. S. Crotts, & William E. Kunkel.* 435, 274, 247-B1 (1994)

HST Observations of the Ring around SN 1987A. *Philip C. Plait, Peter Lundqvist, Roger A. Chevalier, & Robert P. Kirshner.* 439, 730, 34-F8 (1995)

Alphanumeric: SNR 0540−693

The Radio Structure of Supernova Remnant 0540−693. *R. N. Manchester, L. Staveley-Smith, & M. J. Kesteven.* 411, 756, 139-B8 (1993)

Alphanumeric: SNR G326.3−1.8

ROSAT Observations of the Composite Supernova Remnant G326.3−1.8. *Namir E. Kassim, Paul Hertz, & Kurt W. Weiler.* 419, 733, 256-F13 (1993)

Alphanumeric: TMC

High-Resolution Observations of Turbulence in the Subcondensation TMC-1C in Heiles' Cloud 2: Estimation of the Velocity Spectrum of Turbulence. *Y. Kitamura, K. Sunada, M. Hayashi, & T. Hasegawa.* 413, 221, 159-A9 (1993)

Alphanumeric: TMC-1

Mapping Observations of Sulfur-containing Carbon-Chain Molecules in Taurus Molecular Cloud 1 (TMC-1). *Yasuhiro Hirahara, Hiroko Suzuki, Satoshi Yamamoto, Kentarou Kawaguchi, Norio Kaifu, Masatoshi Ohishi, Shuro Takano, Shin-ichi Ishikawa, & Akimasa Masuda.* 394, 539, 136-B1 (1992)

Sequential Star Formation in Taurus Molecular Cloud 1. *Tomoyuki Hanawa, Satoshi Yamamoto, & Yasuhiro Hirahara.* 420, 318, 4-G5 (1994)

Detection of a New Molecular Ion HC_3NH^+ in TMC-1. *Kentarou Kawaguchi, Yasuko Kasai, Shin-ichi Ishikawa, Masatoshi Ohishi, Norio Kaifu, & Takayoshi Amano.* 420, L95, 15-F12 (1994)

Nitrogen Sulfide in Quiescent Dark Clouds. *Douglas McGonagle, William M. Irvine, & Masatoshi Ohishi.* 422, 621, 39-E8 (1994)

Detection of a New Interstellar Molecule, H_2CN. *Masatoshi Ohishi, Douglas McGonagle, William M. Irvine, Satoshi Yamamoto, & Shuji Saito.* 427, L51, 117-G5 (1994)

Alphanumeric: VLA 1623

Submillimeter Continuum Observations of ρ Ophiuchi A: The Candidate Protostar VLA 1623 and Prestellar Clumps. *Philippe André, Derek Ward-Thompson, & Mary Barsony.* 406, 122, 56-F3 (1993)

Alphanumeric: VRO 42.05.01

ROSAT Observations of VRO 42.05.01. *David N. Burrows & Zhiyu Guo.* 421, L19, 21-E7 (1994)

Alphanumeric: W3

Anomalously High Apparent Abundances of Singly Ionized Helium in the Galactic H II Region W3A. *P. R. Roelfsema, W. M. Goss, & D. C. V. Mallik.* 394, 188, 130-C13 (1992)

Kinematics of W3(OH): First Proper Motions of OH Masers from VLBI Measurements. *E. E. Bloemhof, M. J. Reid, & J. M. Moran.* 397, 500, 177-A12 (1992)

Ammonia in the W3(OH) Region. *T. L. Wilson, R. A. Gaume, & K. J. Johnston.* 402, 230, 4-A1 (1993)

VLA Zeeman Observations of W3. *D. A. Roberts, R. M. Crutcher, T. H. Troland, & W. M. Goss.* 412, 675, 152-B12 (1993)

Luminous Radio-quiet Sources in W3(Main). *E. F. Ladd, J. R. Deane, D. B. Sanders, & C. G. Wynn-Williams.* 419, 186, 248-D11 (1993)

Submillimeter Observations of CO in the W3 Core. *Tatsuhiko I. Hasegawa, George F. Mitchell, Henry E. Matthews, & Linda Tacconi.* 426, 215, 98-G1 (1994)

Synchrotron Emission from the H_2O Maser Source in W3(OH). *M. J. Reid, A. L. Argon, C. R. Masson, K. M. Menten, & J. M. Moran.* 443, 238, 98-D3 (1995)

Line Broadening in the W3(OH) Champagne Flow. *E. R. Keto, W. J. Welch, M. J. Reid, & P. T. P. Ho.* 444, 765, 127-A8 (1995)

High-Resolution Far-Infrared Observations and Radiative-Transfer Models of W3 IRS 4 and IRS 5. *M. F. Campbell, H. M. Butner, P. M. Harvey, N. J. Evans II, M. B. Campbell, & C. N. Sabbey.* 454, 831, 313-C6 (1995)

Alphanumeric: W3(OH)

The Environments of Young Stars: Mid-Infrared and Molecular Line Imaging. *Eric Keto, Deanne Proctor, Roger Ball, John Arens, & Garrett Jernigan.* 401, L113, 233-E11 (1992)

Diagonalization of the Velocity Variance/Covariance Matrix as a Diagnostic of Maser Proper Motions. *E. E. Bloemhof.* 406, L75, 68-E9 (1993)

Sub-Arcsecond Imaging of W3(OH) at 87.7 GHz. *D. J. Wilner, W. J. Welch, & J. R. Forster.* 449, L73, 217-C1 (1995)

Alphanumeric: W28

A Young, Glitching Pulsar near the Direction of W28. *V. M. Kaspi, A. G. Lyne, R. N. Manchester, S. Johnston, N. D'Amico, & S. L. Shemar.* 409, L57, 111-E1 (1993)

Alphanumeric: W28 A2

Observation of [C I] toward the GL 2591 and W28 A2 Molecular Outflows. *Minho Choi, Neal J. Evans II, Daniel T. Jaffe, & Christopher K. Walker.* 435, 734, 256-B10 (1994)

Alphanumeric: W31A

Time Variations of H_2O Maser Emission at W31A and W75S. *E. E. Lekht, E. Mendoza-Torres, & R. L. Sorochenko.* 443, 222, 98-B8 (1995)

Alphanumeric: W33

Solid Carbonyl Sulphide (OCS) in W33A. *M. E. Palumbo, A. G. G. M. Tielens, & A. T. Tokunaga.* 449, 674, 222-A10 (1995)

Alphanumeric: W44

An X-Ray and Optical Study of the Supernova Remnant W44. *Jeonghee Rho, R. Petre, Eric M. Schlegel, & J. Jeff Hester.* 430, 757, 171-C8 (1994)

A Fast Expanding H I Shell in W44: A Preexisting Wind-blown Shell Overtaken by a Supernova Remnant. *Bon-Chul Koo & Carl Heiles.* 442, 679, 89-E1 (1995)

Alphanumeric: W48

Aperture Synthesis Imaging of Partially Ionized Gas in W48. *Joseph S. Onello, J. A. Phillips, P. Benaglia, W. M. Goss, & Yervant Terzian.* 426, 249, 99-B13 (1994)

Alphanumeric: W49

Distance and Kinematics of the W49N H_2O Maser Outflow. *C. R. Gwinn, J. M. Moran, & M. J. Reid.* 393, 149, 116-A1 (1992)

Fragmentation and Kinematics of the W49N Cloud Core. *E. Serabyn, R. Güsten, & A. Schulz.* 413, 571, 163-E9 (1993)

A Protostellar Jet Model for the Water Masers in W49N. *Mordecai-Mark Mac Low, Moshe Elitzur, James M. Stone, & Arieh Königl.* 427, 914, 124-A7 (1994)

Hypersonic Acceleration and Turbulence of H_2O Masers in W49N. *C. R. Gwinn.* 429, 241, 147-B3 (1994)

Physical Structure of H_2O Masers in W49N. *C. R. Gwinn.* 429, 253, 147-C3 (1994)

Radial Motions of Molecular Gas in the W49 Cloud Core. *James M. Jackson & Kathleen E. Kraemer.* 429, L37, 150-E7 (1994)

Modeling Radiative Transfer in Molecular Clouds. I. HCO^+ in the Star-forming Region W49A North. *Hélène R. Dickel & Lawrence H. Auer.* 437, 222, 286-C4 (1994)

Alphanumeric: W49B

Multifrequency Studies of Bright Radio Supernova Remnants. II. W49B. *David A. Moffett & Stephen P. Reynolds.* 437, 705, 295-D9 (1994)

Alphanumeric: W51

CO Lines toward NGC 2024 and Other Star-forming Regions: A Closer Look at the Warm Gas Component. *U. U. Graf, A. Eckart, R. Genzel, A. I. Harris, A. Poglitsch, A. P. G. Russell, & J. Stutzki.* 405, 249, 44-B13 (1993)

A Spectral-Line Survey of W51 from 17.6 to 22.0 GHz. *M. B. Bell, L. W. Avery, & J. K. G. Watson.* 86, 211, 16-F7 (1993)

High-Resolution Centimeter Radio Continuum and Ammonia Maser Observations of the W51 Region of Star Formation. *R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 417, 645, 227-D1 (1993)

Radio Continuum and Radio Recombination Line Observations of W51. *David M. Mehringer.* 91, 713, 29-A2 (1994)

Near-Infrared Observations of W51. *Jeffrey D. Goldader & C. G. Wynn-Williams.* 433, 164, 210-D1 (1994)

ROSAT Observations of the Supernova Remnant W51C. *Bon-Chul Koo, Kee-Tae Kim, & Frederick D. Seward.* 447, 211, 175-B8 (1995)

Ammonia Maser in a Molecular Outflow toward W51. *Q. Zhang & Paul T. P. Ho.* 450, L63, 244-G1 (1995)

Independent Confirmation of the 8.665 GHz Hyperfine Line of $^3He^+$ in W51. *M. B. Bell.* 453, 773, 294-E7 (1995)

Alphanumeric: W75S

Time Variations of H_2O Maser Emission at W31A and W75S. *E. E. Lekht, E. Mendoza-Torres, & R. L. Sorochenko.* 443, 222, 98-B8 (1995)

ISM: JETS AND OUTFLOWS

The Molecular Core in the AFGL 5157 Region. *José M. Torrelles, Carlos Eiroa, Rainer Mauersberger, Robert Estalella, Luis F. Miranda, & Guillem Anglada.* 384, 528, 8-F7 (1992)

The Triple Radio Continuum Source in Serpens: Its Interaction with the Ambient Molecular Gas. *J. M. Torrelles, J. F. Gómez, S. Curiel, C. Eiroa, L. F. Rodríguez, & P. T. P. Ho.* 384, L59, 11-D7 (1992)

Discovery of Outflows from Young Stellar Objects in Bok Globules. *João Lin Yun & Dan P. Clemens.* 385, L21, 17-C6 (1992)

Knots in Stellar Jets from Time-dependent Sources. *A. C. Raga & Lev Kofman.* 386, 222, 27-A1 (1992)

A CO $J = 2 \rightarrow 1$ Study of the Outflow Sources GL 490, GS 2591, M8E-IR, and W3 IRS 5. *George F. Mitchell, Tatsuhiko I. Hasegawa, & Jason Schella.* 386, 604, 32-G6 (1992)

Atomic and Molecular Outflow in DR 21. *A. P. G. Russell, J. Bally, R. Padman, & R. E. Hills.* 387, 219, 39-E13 (1992)

Properties of Swept-up Molecular Outflows. *Colin R. Masson & Lawrence M. Chernin.* 387, L47, 43-F1 (1992)

The Magnetic Collimation of Bipolar Outflows. I. Adiabatic Simulations. *James M. Stone & Michael L. Norman.* 389, 297, 63-F1 (1992)

The Structure of the Inner Arcsecond of R Aquarii Observed with the *Hubble Space Telescope*. *Denis Burgarella & Francesco Paresce.* 389, L29, 66-D10 (1992)

Jet Formation in the Transition from the Asymptotic Giant Branch to Planetary Nebulae. *Noam Soker.* 389, 628, 69-C1 (1992)

Bipolar Outflow in B335: The Small-Scale Structure. *Naomi Hirano, Osamu Kameya, Takashi Kasuga, & Tomofumi Umemoto.* 390, L85, 85-B1 (1992)

Infrared Morphology of Mass Outflow from GL 2591. *Motohide Tamura & Takuya Yamashita.* 391, 710, 96-G4 (1992)

Structure and Kinematics of the HH 111 Jet. *Bo Reipurth, A. C. Raga, & Steve Heathcote.* 392, 145, 102-F10 (1992)

On the Use of Forbidden Lines as Density Diagnostics in Stratified Media. *Pedro N. Safier.* 392, 492, 108-D5 (1992)

High-Velocity HCO^+ Emission Associated with the DR 21 Molecular Outflow. *Rognvald P. Garden & John E. Carlstrom.* 392, 602, 109-F7 (1992)

The Powering Sources of the Molecular Outflows in the AFGL 437, AFGL 5142, and AFGL 5157 Regions. *José M. Torrelles, José F. Gómez, Guillem Anglada, Robert Estalella, Rainer Mauersberger, & Carlos Eiroa.* 392, 616, 109-G9 (1992)

The Outflow in the L1157 Dark Cloud: Evidence for Shock Heating of the Interacting Gas. *T. Umemoto, T. Iwata, Y. Fukui, H. Mikami, S. Yamamoto, O. Kameya, & N. Hirano.* 392, L83, 113-E6 (1992)

Distance and Kinematics of the W49N H_2O Maser Outflow. *C. R. Gwinn, J. M. Moran, & M. J. Reid.* 393, 149, 116-A1 (1992)

Surveys of Dense Cores for High-Velocity Gas. *Yuefang Wu, Shudong Zhou, & Neal J. Evans II.* 394, 196, 130-D9 (1992)

Evidence for a Wind-swept Cavity in HH 34? *Alexander Rudolph & William J. Welch.* 395, 488, 148-F3 (1992)

Radio Continuum from the Powering Sources of the RNO 43, Haro 4-255 FIR, B335, and PV Cephei Outflows and from the Herbig-Haro Object 32A. *G. Anglada, L. F. Rodríguez, J. Cantó, R. Estalella, & J. M. Torrelles.* 395, 494, 148-G1 (1992)

Evidence for Large-Scale Expanding Motions within the Orion A Molecular Cloud. *M. H. Heyer, J. Morgan, F. P. Schloerb, R. L. Snell, & P. F. Goldsmith.* 395, L99, 154-B1 (1992)

Extremely High Velocity CO Emission from NGC 2071. *Lawrence M. Chernin & Colin R. Masson.* 396, L35, 160-F8 (1992)

On the Nature of the Excitation of Herbig-Haro Object 2. *José M. Torrelles, Luis F. Rodríguez, Jorge Cantó, Guillem Anglada, José F. Gómez, Salvador Curiel, & Paul T. P. Ho.* 396, L95, 167-D7 (1992)

On the Nature of the Bipolar Molecular Outflow in AFGL 437. *J. F. Gómez, J. M. Torrelles, R. Estalella, G. Anglada, L. Verdes-Montenegro, & P. T. P. Ho.* 397, 492, 177-A1 (1992)

High-Velocity HCO^+ Emission from L1551 IRS 5: Evidence for Wind-Cloud Interactions. *Alexander Rudolph.* 397, L111, 181-D13 (1992)

^{13}CO and HCO^+ Observations of *IRAS* Sources in L1641. *Hua Chen, Yasuo Fukui, & Ji Yang.* 398, 544, 190-G12 (1992)

Mapping AG Carinae: Long-Slit Spectroscopy and Coronographic Imaging of the Nebula and Jet. *Antonella Nota, Claus Leitherer, Mark Clampin, Perry Greenfield, & David A. Golimowski.* 398, 621, 191-G6 (1992)

Multiple Jets from the Young Star IRAS 21334+5039. *Howard A. Smith & Jacqueline Fischer.* 398, L99, 194-D1 (1992)

Circumprotostellar Environments. I. Molecular Outflows from Protostar Candidates in Taurus. *G. H. Moriarty-Schieven, P. G. Wannier, M. Tamura, & Jocelyn Keene.* 400, 260, 212-B10 (1992)

The FU Orionis–Type Spectrum and Bipolar Outflow of Parsamyan 21. *H. J. Staude & Th. Neckel.* 400, 556, 217-C6 (1992)

Radiation-viscous Boundary Layers. *Nahum Arav & Mitchell C. Begelman.* 401, 125, 222-E7 (1992)

Polycyclic Aromatic Hydrocarbon Formation in Carbon-rich Stellar Envelopes. *Isabelle Cherchneff, John R. Barker, & Alexander G. G. M. Tielens.* 401, 269, 224-D1 (1992)

Millimeter-Wavelength Aperture Synthesis Observations of Massive Star-forming Regions in Sagittarius B2. *D. C. Lis, P. F. Goldsmith, J. E. Carlstrom, & N. Z. Scoville.* 402, 238, 4-A12 (1993)

Model Scattering Envelopes of Young Stellar Objects. II. Infalling Envelopes. *Barbara A. Whitney & Lee Hartmann.* 402, 605, 10-B5 (1993)

Theory of Jets from Young Stars. *R. V. E. Lovelace, M. M. Romanova, & J. Contopoulos.* 403, 158, 16-A1 (1993)

Wiggled Structure of Herbig-Haro Objects: Helical Kink Instability of Jets from Young Stellar Objects. *Yasushi Todo, Yutaka Uchida, Tetsuya Sato, & Robert Rosner.* 403, 164, 16-A9 (1993)

Dense Cores in L1204/S140: Star Formation and Velocity Shifts. *M. Tafalla, R. Bachiller, & J. Martín-Pintado.* 403, 175, 16-B8 (1993)

A Circumstellar Molecular Gas Structure Associated with the Massive Young Star Cepheus A–HW 2. *José M. Torrelles, Luis F. Rodríguez, Jorge Cantó, & Paul T. P. Ho.* 404, L75, 40-F1 (1993)

Magnetic Confinement of the Optical Jets in Young Stellar Objects. *S.-U. Choe & T. W. Jones.* 405, 698, 51-F11 (1993)

Submillimeter Continuum Observations of ρ Ophiuchi A: The Candidate Protostar VLA 1623 and Prestellar Clumps. *Philippe André, Derek Ward-Thompson, & Mary Barsony.* 406, 122, 56-F3 (1993)

The Circumstellar Density Distribution of L1551NE. *M. Barsony & C. J. Chandler.* 406, L71, 68-E1 (1993)

Near-Infrared Observations of the HH 111 Region. *Roland Gredel & Bo Reipurth.* 407, L29, 75-D1 (1993)

Turbulent Magnetohydrodynamic Dynamo for Accretion Disks Using the Cross-Helicity Effect. *Akira Yoshizawa & Nobumitsu Yokoi.* 407, 540, 77-C8 (1993)

Infrared and Optical Imaging of *IRAS* Sources with CO Outflow: A Snapshot of Early Star Formation. *H. Chen, A. T. Tokunaga, K. M. Strom, & K.-W. Hodapp.* 407, 639, 78-E4 (1993)

Centrifugally Driven Winds from Protostellar Disks. I. Wind Model and Thermal Structure. *Pedro N. Safier.* 408, 115, 84-E6 (1993)

Centrifugally Driven Winds from Protostellar Disks. II. Forbidden-Line Emission in T Tauri Stars. *Pedro N. Safier.* 408, 148, 85-A1 (1993)

A New Herbig-Haro Flow in the HH 1–2 Complex. *Bo Reipurth, Steve Heathcote, M. Roth, A. Noriega-Crespo, & A. C. Raga.* 408, L49, 89-D1 (1993)

A Flattened Cloud Core in NGC 2024. *Paul T. P. Ho, Yun-Lou Peng, José M. Torrelles, José F. Gómez, Luis F. Rodríguez, & Jorge Cantó.* 408, 565, 92-C1 (1993)

Near-Infrared Discovery of the L810 Nebula Illuminator. *João Lin Yun, Dan P. Clemens, Mark J. McCaughrean, & Marcia Rieke.* 408, L101, 95-E9 (1993)

Detection of Magnetohydrodynamic Shocks in the L1551 Outflow. *M. Barsony, N. Z. Scoville, & C. J. Chandler.* 409, 275, 100-E4 (1993)

The Formation and Evolution of Shocks in Stellar Jets from a Variable Wind. *Patrick Hartigan & John Raymond.* 409, 705, 107-G5 (1993)

From Bipolar to Quadrupolar: The Collimation Processes of the Cepheus A Outflow. *José M. Torrelles, Lourdes Verdes-Montenegro, Paul T. P. Ho, Luis F. Rodríguez, & Jorge Cantó.* 410, 202, 114-F1 (1993)

The Structure of Protostellar Accretion Disks and the Origin of Bipolar Flows. *Mark Wardle & Arieh Königl.* 410, 218, 114-G6 (1993)

High-Resolution Long-Slit Spectral Imaging of the Mass Outflows in the Immediate Vicinity of DG Tauri. *J. Solf & K. H. Böhm.* 410, L31, 118-F13 (1993)

Three-dimensional Simulations of Protostellar Jets. *Elisabete M. de Gouveia Dal Pino & Willy Benz.* 410, 686, 122-B13 (1993)

Discovery of New Objects in the Orion Nebula on *HST* Images: Shocks, Compact Sources, and Protoplanetary Disks. *C. R. O'Dell, Zheng Wen, & Xihai Hu.* 410, 696, 122-C11 (1993)

The Dynamics of Stellar Outflows Dominated by Interaction of Dust and Radiation. *Nathan Netzer & Moshe Elitzur.* 410, 701, 122-D11 (1993)

A Search for Herbig-Haro Objects near Herbig Ae/Be Stars. *Robert W. Goodrich.* 86, 499, 21-A5 (1993)

Evidence for Precession of the R Aquarii Jet. *J. M. Hollis & A. G. Michalitsianos.* 411, 235, 130-B3 (1993)

The Association of ^{13}CO Molecular Gas with *IRAS* Sources in L1641. *H. Chen, Y. Fukui, & T. Iwata.* 411, 239, 130-B11 (1993)

The Exciting Young Stellar Object for the Molecular Outflow at the Core of L1287. *David A. Weintraub & Joel Kastner.* 411, 767, 139-C9 (1993)

Numerical Simulations of Protostellar Jets with Nonequilibrium Cooling. I. Method and Two-dimensional Results. *James M. Stone & Michael L. Norman.* 413, 198, 158-E6 (1993)

Numerical Simulations of Protostellar Jets with Nonequilibrium Cooling. II. Models of Pulsed Jets. *James M. Stone & Michael L. Norman.* 413, 210, 158-F13 (1993)

Properties of Jet-driven Molecular Outflows. *Colin R. Masson & Lawrence M. Chernin.* 414, 230, 172-G10 (1993)

The Small-Scale Structure and Kinematics of B335. *Claire J. Chandler & Anneila I. Sargent.* 414, L29, 175-E13 (1993)

Continuum Hydrodynamical Equations for Multiphase Astrophysical Flows. *S. Pistinner & G. Shaviv.* 414, 612, 178-G5 (1993)

The Triple Radio Continuum Source in Serpens: The Birth of a Herbig-Haro System? *S. Curiel, L. F. Rodríguez, J. M. Moran, & J. Cantó.* 415, 191, 187-D5 (1993)

Molecular Line Emission Models of Herbig-Haro Objects. II. HCO^+ Emission. *Mark G. Wolfire & Arieh Königl.* 415, 204, 187-E6 (1993)

Star Formation in the L1641 North Cluster. *Klaus-Werner Hodapp & James Deane.* 88, 119, 42-A1 (1993)

The Detection of [C I] in Molecular Outflows Associated with Young Stellar Objects. *Christopher K. Walker, Gopal Narayanan, Thomas H. Büttgenbach, John E. Carlstrom, Jocelyn Keene, & T. G. Phillips.* 415, 672, 196-B10 (1993)

Kinematical Evidence for a Rotating, Episodic Jet in the Planetary Nebula Fleming 1. *J. A. Lopez, J. Meaburn, & J. W. Palmer.* 415, L135, 200-E8 (1993)

Shear in the IRAS 3282 Outflow. *M. Tafalla, R. Bachiller, J. Martín-Pintado, & M. C. H. Wright.* 415, L139, 200-F1 (1993)

HH 80–81: A Highly Collimated Herbig-Haro Complex Powered by a Massive Young Star. *J. Martí, L. F. Rodríguez, & B. Reipurth.* 416, 208, 203-F1 (1993)

An *IRAS* Sample from Co-added Images of L1641. *H. Chen, A. T. Tokunaga, & Y. Fukui.* 416, 235, 204-A4 (1993)

Ultraviolet Spectroscopy of Herbig-Haro Objects: Spatial Structure, Spectroscopic Diagnostics, and Variability. *K.-H. Böhm, A. Noriega-Crespo, & J. Solf.* 416, 647, 211-D11 (1993)

Hydrodynamic Collimation of Precessing Jets. *W. Peter & D. Eichler.* 417, 170, 219-E3 (1993)

Extremely High Velocity Outflows. *Minho Choi, Neal J. Evans II, & Daniel T. Jaffe.* 417, 624, 227-B6 (1993)

Ammonia Emission Downstream of the Herbig-Haro Object 1. *J. M. Torrelles, J. F. Gómez, P. T. P. Ho, G. Anglada, L. F. Rodríguez, & J. Cantó.* 417, 655, 227-D13 (1993)

A Deeply Embedded Companion to LkHα 198. *P. O. Lagage, G. Olofsson, S. Cabrit, C. J. Cesarsky, L. Nordh, & J. M. Rodriguez Espinosa.* 417, L79, 230-D6 (1993)

J H K L Imaging and *K* Polarimetry of the Bipolar Outflow NGC 2071. *D. M. Walther, E. I. Robson, C. Aspin, & W. R. F. Dent.* 418, 310, 234-G9 (1993)

The L1448 Molecular Jet. *John Bally, Elizabeth A. Lada, & Adair P. Lane.* 418, 322, 235-A10 (1993)

A Dynamically Accreting Gas Disk around HL Tauri. *Masahiko Hayashi, Nagayoshi Ohashi, & Shoken M. Miyama.* 418, L71, 245-C13 (1993)

Molecular Hydrogen in the IRAS 03282+3035 Stellar Jet. *John Bally, David Devine, Mark Hereld, & Bernard J. Rauscher.* 418, L75, 245-D7 (1993)

Magnetic Confinement of Jets. *David Eichler.* 419, 111, 247-E2 (1993)

A Well-shaped Bipolar Outflow Shell in Monoceros R2. *Taoling Xie, Paul F. Goldsmith, & Nimesh Patel.* 419, L33, 252-E7 (1993)

The 150 AU Structure of the Radio Continuum and the Ammonia Bipolar Outflow in CRL 618. *Jesús Martín-Pintado, Ralph Gaume, Rafael Bachiller, & Ken Johnson.* 419, 725, 256-F4 (1993)

Molecular Cloud Core and CS Outflow Associated with Haro 4-255 FIR. *Ken'ichi Tatematsu, Tomofumi Umemoto, Yasuhiro Murata, Hua Chen, Naomi Hirano, & Hiroshi Takaba.* 419, 746, 257-A1 (1993)

Numerical Simulations of Protostellar Jets with Nonequilibrium Cooling. III. Three-dimensional Results. *James M. Stone & Michael L. Norman.* 420, 237, 3-G4 (1994)

Fabry-Perot Imaging of Molecular Hydrogen Emission in Orion-KL Region. *Hajime Sugai, Tomonori Usuda, Hirokazu Kataza, Masuo Tanaka, Motoko Y. Inoue, Hironobu Kawabata, Hideki Takami, Tetsuo Aoki, & Norihisa Hiromoto.* 420, 746, 12-B12 (1994)

A Radio Candidate for the Exciting Source of the L1287 Bipolar Outflow. *Guillem Anglada, Luis F. Rodríguez, José M. Girart, Robert Estalella, & José M. Torrelles.* 420, L91, 15-F7 (1994)

Disks and Jets in Planetary Nebulae. *Noam Soker & Mario Livio.* 421, 219, 18-F7 (1994)

Slender Elliptical Jets. *Michael D. Smith.* 421, 400, 23-B11 (1994)

Pumping of Main Line OH Masers in the Circumstellar Envelopes of OH/Infrared Stars. *Alan J. Collison & Gerald E. Nedoluha.* 422, 193, 32-E1 (1994)

The Kinematics of Molecular Outflows. *Steven W. Stahler.* 422, 616, 39-E1 (1994)

Near-Infrared Observations of the HH 46/47 System. *Jochen Eislöffel, Chris J. Davis, Thomas P. Ray, & Reinhard Mundt.* 422, L91, 45-C9 (1994)

The HH 83 Molecular Cloud: Gone with the Wind. *John Bally, Alain Castets, & Gilles Duvert.* 423, 310, 50-A3 (1994)

A Molecular Jet from LkHα 234. *George F. Mitchell & Henry E. Matthews.* 423, L55, 53-G8 (1994)

Velocity, Obscuration, and Age of Ionized Winds: Can They Be Correlated? *S. C. Beck.* 423, 733, 57-F5 (1994)

Circumstellar Gas around the Exciting Source of the HH 83 Jet. *Makoto Nakano, Koji Sugitani, Fumio Sato, & Katsuo Ogura.* 423, L147, 61-D5 (1994)

Physics and Evolution of Constant Opening Angle Jets Using a Quasi–One-dimensional Magnetohydrodynamic Model. *Theodoros Koupelis.* 424, 645, 72-G12 (1994)

Molecular Outflows from FU Orionis Stars. *Neal J. Evans II, Stephen Balkum, Russell M. Levreault, Lee Hartmann, & Scott Kenyon.* 424, 793, 74-F2 (1994)

The Massive Molecular Outflow from CRL 2136 IRS 1. *Joel H. Kastner, David A. Weintraub, Ronald L. Snell, G. Sandell, C. Aspin, D. H. Hughes, & F. Baas.* 425, 695, 90-C9 (1994)

Fabry-Perot Observations and New Models of the HH 47A and HH 47D Bow Shocks. *Jon A. Morse, Patrick Hartigan, Steve Heathcote, John C. Raymond, & Gerald Cecil.* 425, 738, 91-A1 (1994)

Successive Ejection Events in the L1551 Molecular Outflow. *R. Bachiller, M. Tafalla, & J. Cernicharo.* 425, L93, 94-F1 (1994)

Momentum Transfer by Astrophysical Jets. *Lawrence Chernin, Colin Masson, Elisabete M. de Gouveia Dal Pino, & Willy Benz.* 426, 204, 98-F2 (1994)

Submillimeter Observations of CO in the W3 Core. *Tatsuhiko I. Hasegawa, George F. Mitchell, Henry E. Matthews, & Linda Tacconi.* 426, 215, 98-G1 (1994)

On the Optical Counterparts, Long-Term Variabilities, Radio Jets, and Accretion Sources in 1E 1740.7−2942 and GRS 1758−258. *Wan Chen, Neil Gehrels, & Marvin Leventhal.* 426, 586, 105-F6 (1994)

Near-Infrared Imaging of HH 1/2 in Shocked Molecular Hydrogen and [Fe II]. *Chris J. Davis, Jochen Eislöffel, & Thomas P. Ray.* 426, L93, 109-F5 (1994)

Polarization Profiles of Scattered Emission Lines. II. Upstream Dust Scattering in the HH 1 Jet. *W. J. Henney, A. C. Raga, & D. J. Axon.* 427, 305, 113-F6 (1994)

Outflows from Young Stellar Objects in Bok Globules: Maps. *João Lin Yun & Dan P. Clemens.* 92, 145, 33-C5 (1994)

VLA Positions and Distributions of H_2O Masers Associated with 15 Mira and Semiregular Variables. *P. F. Bowers & K. J. Johnston.* 92, 189, 33-G8 (1994)

A Protostellar Jet Model for the Water Masers in W49N. *Mordecai-Mark Mac Low, Moshe Elitzur, James M. Stone, & Arieh Königl.* 427, 914, 124-A7 (1994)

Asymmetries in Bipolar Jets from Young Stars. *Gerhard A. Hirth, Reinhard Mundt, Josef Solf, & Thomas P. Ray.* 427, L99, 127-B11 (1994)

Subarcsecond VLA Maps of the Disk and the Jet in HL Tauri. *L. F. Rodríguez, J. Cantó, J. M. Torrelles, J. F. Gómez, G. Anglada, & P. T. P. Ho.* 427, L103, 127-C3 (1994)

Multiple Outflows in the Bipolar Planetary Nebula M1-16: A Molecular Line Study. *Raghvendra Sahai, Alwyn Wootten, Hugo E. Schwarz, & W. Wild.* 428, 237, 131-B5 (1994)

A Bipolar Outflow of Ionized Gas in K3-50A: H76α Radio Recombination Line and Continuum Observations of K3-50. *C. G. De Pree, W. M. Goss, Patrick Palmer, & Robert H. Rubin.* 428, 670, 138-F1 (1994)

A Parsec-Scale "Superjet" and Quasi-periodic Structure in the HH 34 Outflow? *John Bally & David Devine.* 428, L65, 142-F8 (1994)

Is the Galactic Center Annihilator 1E 1740.7−2942 a Source of MeV Gamma-Ray Continuum Emission? *Philippe Laurent & Jacques Paul.* 92, 375, 36-G5 (1994)

Magnetically Driven Jets and Winds: Exact Solutions. *J. Contopoulos & R. V. E. Lovelace.* 429, 139, 145-G7 (1994)

Physical Structure of H_2O Masers in W49N. *C. R. Gwinn.* 429, 253, 147-C3 (1994)

A Sub-Arcsecond–Scale Spectroscopic Study of the Complex Mass Outflows in the Vicinity of T Tauri. *K.-H. Böhm & J. Solf.* 430, 277, 162-E6 (1994)

Cepheus A HW2: A Powerful Thermal Radio Jet. *Luis F. Rodríguez, Guido Garay, Salvador Curiel, Solange Ramírez, José M. Torrelles, Yolanda Gómez, & Arturo Velázquez.* 430, L65, 166-B2 (1994)

Giant Explosion at the Galactic Center and Huge Shocked Shells in the Halo. *Yoshiaki Sofue.* 431, L91, 191-E8 (1994)

Emission-Line Studies of Young Stars. IV. The Optical Forbidden Lines. *Fred Hamann.* 93, 485, 49-D4 (1994)

From Supersonic Winds to Accretion: Comments on the Stability of Stellar Winds and Related Flows. *M. Velli.* 432, L55, 199-G13 (1994)

Dense Clumps in the Monoceros R2 Outflow. *M. Tafalla, R. Bachiller, & M. C. H. Wright.* 432, L127, 207-B13 (1994)

A Numerical Simulation of a Variable Velocity Jet. *S. Biro & A. C. Raga.* 434, 221, 228-D11 (1994)

Entrainment by the Jet in HH 47. *John C. Raymond, Jon A. Morse, Patrick Hartigan, Salvador Curiel, & Steve Heathcote.* 434, 232, 228-E12 (1994)

A K' Imaging Survey of Molecular Outflow Sources. *Klaus-Werner Hodapp.* 94, 615, 60-D12 (1994)

A New Look at the Dark Cloud L1251: Sensitive Observations of the Molecular Emission. *Fumio Sato, Akira Mizuno, Tomoo Nagahama, Toshikazu Onishi, Yoshinori Yonekura, & Yasuo Fukui.* 435, 279, 247-B11 (1994)

The Puzzling Distribution of the High-Density Molecular Gas in HH 1–2: A Contracting Interstellar Toroid? *José M. Torrelles, José F. Gómez, Paul T. P. Ho, Luis F. Rodríguez, Guillem Anglada, & Jorge Cantó.* 435, 290, 247-D2 (1994)

Observation of [C I] toward the GL 2591 and W28 A2 Molecular Outflows. *Minho Choi, Neal J. Evans II, Daniel T. Jaffe, & Christopher K. Walker.* 435, 734, 256-B10 (1994)

A Massive Young Embedded Object Associated with the UC H II Region G31.41+0.31. *R. Cesaroni, L. Olmi, C. M. Walmsley, E. Churchwell, & P. Hofner.* 435, L137, 260-C3 (1994)

Ammonia Downstream from HH 80 North. *José M. Girart, Luis F. Rodríguez, Guillem Anglada, Robert Estalella, José M. Torrelles, Josep Martí, Miriam Peña, Sandra Ayala, Salvador Curiel, & Alberto Noriega-Crespo.* 435, L145, 260-D4 (1994)

Mass-Loss Rates, Ionization Fractions, Shock Velocities, and Magnetic Fields of Stellar Jets. *Patrick Hartigan, Jon A. Morse, & John Raymond.* 436, 125, 263-A6 (1994)

Postrefurbishment Mission *Hubble Space Telescope* Images of the Core of the Orion Nebula: Proplyds, Herbig-Haro Objects, and Measurements of a Circumstellar Disk. *C. R. O'Dell & Zheng Wen.* 436, 194, 263-G8 (1994)

High-Velocity Sulfur Monoxide Emission from Protostellar Outflows. *Lawrence M. Chernin, Colin R. Masson, & Gary A. Fuller.* 436, 741, 275-F3 (1994)

The Molecular Core and the Powering Source of the Bipolar Molecular Outflow in NGC 2264G. *José F. Gómez, Salvador Curiel, José M. Torrelles, Luis F. Rodríguez, Guillem Anglada, & José M. Girart.* 436, 749, 275-G1 (1994)

A Molecular Outflow Driven by an Optical Jet. *George F. Mitchell, Tatsuhiko I. Hasegawa, William R. F. Dent, & Henry E. Matthews.* 436, L177, 282-A11 (1994)

Discovery of a Molecular Hydrogen Jet near IC 348. *Mark J. McCaughrean, John T. Rayner, & Hans Zinnecker.* 436, L189, 282-C9 (1994)

Shocked Molecular Gas around the Extremely Young Source IRAS 03282+3035. *R. Bachiller, S. Terebey, T. Jarrett, J. Martín-Pintado, C. A. Beichman, & D. Van Buren.* 437, 296, 287-C2 (1994)

The Circumstellar Environment of IRAS 05338−0624. *Joseph P. McMullin, Lee G. Mundy, & Geoff A. Blake.* 437, 305, 287-D6 (1994)

Near-Infrared Imaging of the Jets and Flows Associated with Herbig-Haro Objects HH 91, HH 110, and HH 111. *Christopher J. Davis, Reinhard Mundt, & Jochen Eislöffel.* 437, L55, 292-B1 (1994)

Inertial Confinement of Astrophysical Jets. *W. Peter & D. Eichler.* 438, 244, 4-F11 (1995)

Spatially Resolved Submillimeter Continuum Emission toward L1551 IRS 5. *E. F. Ladd, G. A. Fuller, R. Padman, P. C. Myers, & Fred C. Adams.* 439, 771, 35-C2 (1995)

Magnetohydrodynamic Simulations of Outflows from Accretion Disks. *G. V. Ustyugova, A. V. Koldoba, M. M. Romanova, V. M. Chechetkin, & R. V. E. Lovelace.* 439, L39, 40-C3 (1995)

Hot Spots in the NGC 2071 Molecular Outflow. *Lawrence M. Chernin & W. J. Welch.* 440, L21, 48-D8 (1995)

A Near-Infrared Reflection Nebula Associated with NGC 2024 FIR 4. *T. J. T. Moore & T. Yamashita.* 440, 722, 53-B6 (1995)

Water Masers in the L1448C Outflow. *Lawrence M. Chernin.* 440, L97, 58-C9 (1995)

Simulation of the Instability of Mach 2 and Mach 4 Gaseous Jets in Two and Three Dimensions. *Gene M. Bassett & Paul R. Woodward.* 441, 582, 70-B1 (1995)

The Stability and Collimation of Three-dimensional Jets. *Philip E. Hardee, David A. Clarke, & D. Andrew Howell.* 441, 644, 71-A1 (1995)

An HCO^+ Study of NGC 7538, IRS 9, and GL 490. *Tatsuhiko I. Hasegawa & George F. Mitchell.* 441, 665, 71-B11 (1995)

A Molecular Line Study of NGC 1333/IRAS 4. *Geoffrey A. Blake, Göran Sandell, Ewine F. van Dishoeck, T. D. Groesbeck, Lee G. Mundy, & Colin Aspin.* 441, 689, 71-D13 (1995)

The Relationship of Dense Gas to Star Formation in the Monoceros OB1 Dark Cloud. *Grace A. Wolf-Chase, Christopher K. Walker, & Charles J. Lada.* 442, 197, 79-G9 (1995)

Images of HCO^+ (1–0) Emission in a Molecular Cloud near 1E 1740.7−2942. *J. A. Phillips & T. Joseph W. Lazio.* 442, L37, 85-B7 (1995)

Velocity Field of the Orion-KL Region in Molecular Hydrogen Emission. *Hajime Sugai, Hironobu Kawabata, Tomonori Usuda, Motoko Y. Inoue, Hirokazu Kataza, & Masuo Tanaka.* 442, 674, 89-D3 (1995)

H I, CO, and *IRAS* Observations of NGC 7023. *C. Rogers, Mark H. Heyer, & P. E. Dewdney.* 442, 694, 89-F10 (1995)

Powerful Jets and Weak Outflows: HH 1–2 and HH 34. *Lawrence M. Chernin & Colin R. Masson.* 443, 181, 97-E11 (1995)

Synchrotron Emission from the H_2O Maser Source in W3(OH). *M. J. Reid, A. L. Argon, C. R. Masson, K. M. Menten, & J. M. Moran.* 443, 238, 98-D3 (1995)

Ammonia Emission from Bow Shocks in the L1157 Outflow. *M. Tafalla & R. Bachiller.* 443, L37, 102-G4 (1995)

Distinction of Parallel Outflows in L1448 through H_2 Excitation. *Christopher J. Davis & Michael D. Smith.* 443, L41, 102-G14 (1995)

The Molecular Environment of the HH 34 System. *G. Anglada, R. Estalella, R. Mauersberger, J. M. Torrelles, L. F. Rodríguez, J. Cantó, P. T. P. Ho, & P. D'Alessio.* 443, 682, 107-C9 (1995)

Advection-dominated Accretion: Self-Similarity and Bipolar Outflows. *Ramesh Narayan & Insu Yi.* 444, 231, 116-F1 (1995)

Grain Formation around Carbon Stars. I. Stationary Outflow Models. *Michael P. Egan & Chun Ming Leung.* 444, 251, 117-A1 (1995)

Cooling Gas Outflows from Galaxies. *Boqi Wang.* 444, 590, 124-E3 (1995)

Line Broadening in the W3(OH) Champagne Flow. *E. R. Keto, W. J. Welch, M. J. Reid, & P. T. P. Ho.* 444, 765, 127-A8 (1995)

An Extremely High Velocity Multipolar Outflow around IRAS 20050+2720. *R. Bachiller, A. Fuente, & M. Tafalla.* 445, L51, 141-A13 (1995)

The L1551NE Molecular Outflow. *G. H. Moriarty-Schieven, H. M. Butner, & P. G. Wannier.* 445, L55, 141-B6 (1995)

The Discovery of a Jetlike Feature from the Massive Star Herschel 36. *B. Stecklum, T. Henning, A. Eckart, R. R. Howell, & M. G. Hoare.* 445, L153, 152-A3 (1995)

Observations of the Clumpy Shell of the L1551 Bipolar Outflow. *R. L. Plambeck & R. L. Snell.* 446, 234, 156-D6 (1995)

CS(2–1) Emission from Dense Gas in the Bipolar Outflow of CRL 618. *Arsen R. Hajian, J. A. Phillips, & Yervant Terzian.* 446, 244, 156-E7 (1995)

Rotation and Outflow in Compact H II Regions: VLA Observations of the Molecular and Ionized Gas in NGC 6334A and NGC 6334F. *C. G. De Pree, L. F. Rodríguez, H. R. Dickel, & W. M. Goss.* 447, 220, 175-C8 (1995)

High-Resolution Far-Infrared Observations of DR 21. *Cecilia Colomé, Paul M. Harvey, Daniel F. Lester, Murray F. Campbell, & Harold M. Butner.* 447, 236, 175-E5 (1995)

The Dense Gas Component of Outflows in the Monoceros OB1 Dark Cloud. *Grace A. Wolf-Chase & Christopher K. Walker.* 447, 244, 175-F4 (1995)

Precessing Jets and Point-Symmetric Nebulae. *J. A. Cliffe, A. Frank, M. Livio, & T. W. Jones.* 447, L49, 181-C10 (1995)

Thermal Structure of Mixing Layers in Bipolar Outflows. *Susana Lizano & Carlo Giovanardi.* 447, 742, 186-C1 (1995)

VLBI Observations of Cygnus X-3 during the 1985 October Radio Outburst. *C. J. Schalinski, K. J. Johnston, A. Witzel, R. E. Spencer, R. Fiedler, E. Waltman, G. G. Pooley, R. Hjellming, & L. A. Molnar.* 447, 752, 186-D1 (1995)

WFPC2 Studies of the Crab Nebula. I. *HST* and *ROSAT* Imaging of the Synchrotron Nebula. *J. Jeff Hester, Paul A. Scowen, Ravi Sankrit, Christopher J. Burrows, John S. Gallagher III, Jon A. Holtzman, Alan Watson, John T. Trauger, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, Richard E. Griffiths, John G. Hoessel, John Krist, Roger Lynds, Jeremy R. Mould, Earl J. O'Neil, Jr., Karl R. Stapelfeldt, & James A. Westphal.* 448, 240, 195-D12 (1995)

Newly Discovered Galactic H_2O Masers Associated with Outflows. *Delin Xiang & B. E. Turner.* 99, 121, 35-F10 (1995)

Large Proper Motions and Ejection of New Condensations in the HH 80–81 Thermal Radio Jet. *J. Martí, L. F. Rodríguez, & Bo Reipurth.* 449, 184, 212-F6 (1995)

The Distribution of Warm Dust in the Star-forming Region Cepheus A: Infrared Constraints. *Cecilia Colomé & Paul M. Harvey.* 449, 656, 221-F8 (1995)

Further Mapping of the Radio Emission from Massive Young Stellar Objects. *Melvin G. Hoare & Simon T. Garrington.* 449, 874, 224-F11 (1995)

The Mass of a Star Formed in a Cloud Core: Theory and Its Application to the Orion A Cloud. *Takenori Nakano, Tetsuo Hasegawa, & Colin Norman.* 450, 183, 230-E7 (1995)

A Simple Type of Magnetically Driven Jets: An Astrophysical Plasma Gun. *J. Contopoulos.* 450, 616, 239-C12 (1995)

CO J = 3–2 and HCO^+ J = 4–3 Observations of the GL 2591 Molecular Outflow. *Tatsuhiko I. Hasegawa & George F. Mitchell.* 451, 225, 249-B1 (1995)

Ultraviolet Temporal Variability of the Peculiar Star R Aquarii. *S. R. Meier & M. Kafatos.* 451, 359, 250-G5 (1995)

Si Emission in a Jetlike Molecular Outflow toward L1157. *Q. Zhang, Paul T. P. Ho, M. C. H. Wright, & D. J. Wilner.* 451, L71, 260-G1 (1995)

Mass Flux and Terminal Velocities of Magnetically Driven Jets from Accretion Disks. *Takahiro Kudoh & Kazunari Shibata.* 452, L41, 270-B1 (1995)

Hubble Space Telescope Observations of the SN 1987A Triple Ring Nebula. *Christopher J. Burrows, John Krist, J. Jeff Hester, Raghvendra Sahai, John T. Trauger, Karl R. Stapelfeldt, John S. Gallagher III, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, Richard E. Griffiths, John G. Hoessel, Jon A. Holtzman, Jeremy R. Mould, Paul A. Scowen, Alan M. Watson, & James A. Westphal.* 452, 680, 274-A11 (1995)

Thermal Jets and H_2O Masers: The Case of HH 80–81. *Y. Gómez, L. F. Rodríguez, & J. Martí.* 453, 268, 284-G3 (1995)

Molecular H_2 Emission in HH 47A: *Hubble Space Telescope* GHRS and FOC Observations. *Salvador Curiel, John C. Raymond, Mark Wolfire, Patrick Hartigan, Jon Morse, Richard D. Schwartz, & Peter Nisenson.* 453, 322, 285-E10 (1995)

Bipolar Jets from Extremely Young Stars Observed in Molecular Hydrogen Emission. *Klaus-Werner Hodapp & E. F. Ladd.* 453, 715, 293-E13 (1995)

The Infrared Nebula and Outflow in Lynds 483. *G. A. Fuller, E. A. Lada, C. R. Masson, & P. C. Myers.* 453, 754, 294-C3 (1995)

Polarization Profiles of Scattered Emission Lines. III. Effects of Multiple Scattering and Non-Rayleigh Phase Functions. *W. J. Henney & D. J. Axon.* 454, 233, 302-E4 (1995)

Twin Herbig-Haro Jets and Molecular Outflows in L1228. *John Bally, David Devine, Robert A. Fesen, & Adair P. Lane.* 454, 345, 304-A9 (1995)

Radio Monitoring of GRS 1915+105. *L. F. Rodríguez, E. Gerard, I. F. Mirabel, Y. Gómez, & A. Velázquez.* 101, 173, 55-A5 (1995)

BIMA Array CS $J = 2 \rightarrow 1$ Observations of Sagittarius B2. *David M. Mehringer.* 454, 782, 312-E8 (1995)

Discovery of Herbig-Haro Objects and Molecular Hydrogen Jets near Bok Globule CB 34. *Miguel C. Moreira & João L. Yun.* 454, 850, 313-E1 (1995)

The Circumstellar Molecular Core around L1551 IRS 5. *G. A. Fuller, E. F. Ladd, R. Padman, P. C. Myers, & Fred C. Adams.* 454, 862, 313-F7 (1995)

Radio Continuum Detection of the Exciting Sources of the DG Tauri B and L1551NE Outflows. *Luis F. Rodríguez, Guillem Anglada, & Alejandro Raga.* 454, L149, 316-F5 (1995)

Interferometric Observations of the Circumstellar Molecular Structure around the Young Stellar Object in L1287. *Ji Yang, Nagayoshi Ohashi, & Yasuo Fukui.* 455, 175, 320-E7 (1995)

Momentum Distribution in Molecular Outflows. *Lawrence M. Chernin & Colin R. Masson.* 455, 182, 320-F3 (1995)

Circum-Protostellar Environments. III. Gas Densities and Kinetic Temperatures. *G. H. Moriarty-Schieven, P. G. Wannier, J. G. Mangum, M. Tamura, & V. K. Olmsted.* 455, 190, 320-F14 (1995)

The Discovery of a Bipolar, Rotating, Episodic Jet (BRET) in the Planetary Nebula KjPn 8. *J. A. López, R. Vázquez, & L. F. Rodríguez.* 455, L63, 325-E2 (1995)

ISM: KINEMATICS AND DYNAMICS

Dense Cores in Dark Clouds. VII. Line Width–Size Relations. *G. A. Fuller & P. C. Myers.* 384, 523, 8-F1 (1992)

The Molecular Core in the AFGL 5157 Region. *José M. Torrelles, Carlos Eiroa, Rainer Mauersberger, Robert Estalella, Luis F. Miranda, & Guillem Anglada.* 384, 528, 8-F7 (1992)

The Distribution of the 6_2–6_1 and 5_2–5_1 E-Type Methanol Masers in OMC-1. *K. J. Johnston, R. Gaume, S. Stolovy, T. L. Wilson, C. M. Walmsley, & K. M. Menten.* 385, 232, 14-G3 (1992)

The Origin of Broad Emission Lines in the Extragalactic Giant H II Region NGC 2363. *Jean-René Roy, Martin Aubé, Marshall L. McCall, & R. J. Dufour.* 386, 498, 31-E7 (1992)

A CO $J = 2 \rightarrow 1$ Study of the Outflow Sources GL 490, GS 2591, M8E-IR, and W3 IRS 5. *George F. Mitchell, Tatsuhiko I. Hasegawa, & Jason Schella.* 386, 604, 32-G6 (1992)

Motion at the Ionization Front in the Orion Nebula: A Kinematic Study of the [O I] Line. *C. R. O'Dell & Zheng Wen.* 387, 229, 39-F10 (1992)

Spectroscopy of Emission-Line Nebulae in Powerful Radio Galaxies: Interpretation. *S. A. Baum, T. M. Heckman, & W. van Breugel.* 389, 208, 62-E7 (1992)

Kinematics and Morphology of Material Occulting ζ Ophiuchi. *H. S. Liszt.* 390, 226, 76-G1 (1992)

On the Chemodynamics of Wolf-Rayet Ring Nebulae: NGC 6888. *César Esteban & José M. Vílchez.* 390, 536, 82-A7 (1992)

Highly Ionized Atoms toward HD 93521. *Lyman Spitzer, Jr., & Edward L. Fitzpatrick.* 391, L41, 92-C11 (1992)

Structure and Kinematics of the HH 111 Jet. *Bo Reipurth, A. C. Raga, & Steve Heathcote.* 392, 145, 102-F10 (1992)

Initiation of Bipolar Flows by Magnetic Field Twisting in Protostellar Nebulae. *William I. Newman, Alice L. Newman, & Richard V. E. Lovelace.* 392, 622, 110-A1 (1992)

A Complete CO Survey of the Cygnus X Region. *Helen O. Leung & P. Thaddeus.* 81, 267, 38-F3 (1992)

Bow Shock Models for the Velocity Structure of Ultracompact H II Regions. *Dave Van Buren & Mordecai-Mark Mac Low.* 394, 534, 136-A7 (1992)

Global Aspects of Dynamics and Star Formation in Taurus. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 395, 501, 148-G13 (1992)

Twin Peaks of CO Emission in the Central Regions of Barred Galaxies. *Jeffrey D. P. Kenney, Christine D. Wilson, Nick Z. Scoville, Nicholas A. Devereux, & Judith S. Young.* 395, L79, 153-G5 (1992)

Evidence for Large-Scale Expanding Motions within the Orion A Molecular Cloud. *M. H. Heyer, J. Morgan, F. P. Schloerb, R. L. Snell, & P. F. Goldsmith.* 395, L99, 154-B1 (1992)

A High-Resolution 21 Centimeter Line Study of Infrared Cirrus. *G. Joncas, F. Boulanger, & P. E. Dewdney.* 397, 165, 170-A10 (1992)

Kinematics of W3(OH): First Proper Motions of OH Masers from VLBI Measurements. *E. E. Bloemhof, M. J. Reid, & J. M. Moran.* 397, 500, 177-A12 (1992)

The Bow Shock and Mach Disk of HH 34. *Jon A. Morse, Patrick Hartigan, Gerald Cecil, John C. Raymond, & Steve Heathcote.* 399, 231, 198-B3 (1992)

The Synchrotron Bays of the Crab Nebula: A Magnetic Structure Associated with a Presupernova Circumstellar Disk. *Robert A. Fesen, Crystal L. Martin, & J. Michael Shull.* 399, 599, 205-C7 (1992)

Structure and Kinematics of Dense Gas Associated with the Supernova Remnant IC 443. *R. L. Dickman, Ronald L. Snell, L. M. Ziurys, & Yi-Long Huang.* 400, 203, 211-C9 (1992)

Submillimeter Line Observations of the Proto–Planetary Nebula CRL 2688. *P. A. Jaminet, W. C. Danchi, Göran Sandell, & E. C. Sutton.* 400, 535, 217-A7 (1992)

Fragmentation of Elongated Cylindrical Clouds. IV. Clouds with Solid-Body Rotation about an Arbitrary Axis. *Ian Bonnell, Jean-Pierre Arcoragi, Hugo Martel, & Pierre Bastien.* 400, 579, 217-E8 (1992)

Radio Continuum and Radio Recombination Line Observations of Sagittarius B1 and G0.6−0.0. *David M. Mehringer, F. Yusef-Zadeh, Patrick Palmer, & W. M. Goss.* 401, 168, 223-B1 (1992)

The Dynamics of Molecular Cloud Envelopes in a Varying Ultraviolet Radiation Field. *C. Bréart de Boisanger, J.-P. Chièze, & B. Meltz.* 401, 182, 223-D1 (1992)

Dense Cores in L1204/S140: Star Formation and Velocity Shifts. *M. Tafalla, R. Bachiller, & J. Martín-Pintado.* 403, 175, 16-B8 (1993)

Identification of Velocity Systems in the Inner Orion Nebula. *C. R. O'Dell, Jacobus H. Valk, Zheng Wen, & David M. Meyer.* 403, 678, 24-B4 (1993)

Shock Propagation in a Turbulent Cloud. *Toshiya Kimura & Makoto Tosa.* 406, 512, 64-B10 (1993)

Dense Cores in Dark Clouds. VIII. Velocity Gradients. *A. A. Goodman, P. J. Benson, G. A. Fuller, & P. C. Myers.* 406, 528, 64-D3 (1993)

The H_2 Velocity Field in Herbig-Haro 7-11. *John S. Carr.* 406, 553, 64-F6 (1993)

Diagonalization of the Velocity Variance/Covariance Matrix as a Diagnostic of Maser Proper Motions. *E. E. Bloemhof.* 406, L75, 68-E9 (1993)

Can Galactic H I Be Radiatively Supported? *A. Ferrara.* 407, 157, 71-A7 (1993)

G-Star Astropauses: A Test for Interstellar Pressure. *P. C. Frisch.* 407, 198, 71-E1 (1993)

Relaxation of Molecular Velocities and Spectral Line Profiles of Astrophysical Masers. *Nels Anderson & William D. Watson.* 407, 620, 78-C10 (1993)

The Dispersal of Iron through the Interstellar Medium. *Nicholas P. T. Bateman & Richard B. Larson.* 407, 634, 78-D12 (1993)

Circumstellar Molecular Gas of the HH 34 and HH 111 Exciting Stars. *Karl R. Stapelfeldt & Nicholas Z. Scoville.* 408, 239, 86-B1 (1993)

Motion in the Orion Nebula: A Kinematic Study of [S III]. *Zheng Wen & C. R. O'Dell.* 409, 262, 100-D1 (1993)

The Hyades Cluster-Supercluster Connection: Evidence for a Local Concentration of Dark Matter. *Stefano Casertano, Icko Iben, Jr., & Aaron Shiels.* 410, 90, 113-C5 (1993)

Extended CO(7→6) Emission from Warm Gas in Orion. *J. E. Howe, D. T. Jaffe, E. N. Grossman, W. F. Wall, J. G. Mangum, & G. J. Stacey.* 410, 179, 114-D1 (1993)

Highly Blueshifted H I Gas toward the Galactic Center. *Farhad Yusef-Zadeh, Anthony Lasenby, & Jennifer Marshall.* 410, L27, 118-G12 (1993)

High-Resolution Ca II Observations of the Local Interstellar Medium. *J. V. Vallerga, P. W. Vedder, N. Craig, & B. Y. Welsh.* 411, 729, 138-F13 (1993)

Radio Continuum and Radio Recombination Line Observations of Sagittarius B2. *David M. Mehringer, Patrick Palmer, W. M. Goss, & F. Yusef-Zadeh.* 412, 684, 152-C11 (1993)

High-Resolution Observations of Turbulence in the Subcondensation TMC-1C in Heiles' Cloud 2: Estimation of the Velocity Spectrum of Turbulence. *Y. Kitamura, K. Sunada, M. Hayashi, & T. Hasegawa.* 413, 221, 159-A9 (1993)

Fragmentation and Kinematics of the W49N Cloud Core. *E. Serabyn, R. Güsten, & A. Schulz.* 413, 571, 163-E9 (1993)

Compact Ammonia Sources toward the G10.5+0.0 H II Region Complex. *Guido Garay, James M. Moran, & Luis F. Rodríguez.* 413, 582, 163-F8 (1993)

Observations of Entrainment and Time Variability in the HH 47 Jet. *Patrick Hartigan, Jon A. Morse, Steve Heathcote, & Gerald Cecil.* 414, L121, 186-B11 (1993)

High Spatial Resolution Observations of CO in CRL 618. *Katsunori M. Shibata, Shuji Deguchi, Naomi Hirano, Osamu Kameya, & Shin'ichi Tamura.* 415, 708, 196-F1 (1993)

Shear in the IRAS 3282 Outflow. *M. Tafalla, R. Bachiller, J. Martín-Pintado, & M. C. H. Wright.* 415, L139, 200-F1 (1993)

^{13}CO and $C^{18}O$ Maps of N-Body Magnetohydrodynamic Simulations of Dark Clouds. *Lars G. Stenholm & Ralph E. Pudritz.* 416, 218, 203-F13 (1993)

Observations of Nearby Interstellar Gas and Dust in the Direction toward the Globular Cluster ω Centauri. *K. D. Wood & B. Bates.* 417, 572, 226-D10 (1993)

Extremely High Velocity Outflows. *Minho Choi, Neal J. Evans II, & Daniel T. Jaffe.* 417, 624, 227-B6 (1993)

Thermal Material in Dense Cores: A New Narrow-Line Probe and Technique of Temperature Determination. *G. A. Fuller & P. C. Myers.* 418, 273, 234-D9 (1993)

The 150 AU Structure of the Radio Continuum and the Ammonia Bipolar Outflow in CRL 618. *Jesús Martín-Pintado, Ralph Gaume, Rafael Bachiller, & Ken Johnson.* 419, 725, 256-F4 (1993)

Detection of AU-Scale Structure in Molecular Clouds. *Alan P. Marscher, E. M. Moore, & Thomas M. Bania.* 419, L101, 259-G5 (1993)

Vorticity, Angular Momentum, and Cloud Fragmentation. *J. J. Monaghan.* 420, 692, 11-D7 (1994)

The Balmer-dominated Northeast Limb of the Cygnus Loop Supernova Remnant. *J. Jeff Hester, John C. Raymond, & William P. Blair.* 420, 721, 11-G7 (1994)

AFGL 5376: A Strong, Large-Scale Shock near the Galactic Center. *Keven I. Uchida, Mark R. Morris, E. Serabyn, & John Bally.* 421, 505, 24-D9 (1994)

The He I 2.06 Micron to Brγ Ratio in 12 Planetary Nebulae. *D. L. DePoy & Joseph C. Shields.* 422, 187, 32-D7 (1994)

The Kinematics of Molecular Outflows. *Steven W. Stahler.* 422, 616, 39-E1 (1994)

Near-Infrared Observations of the HH 46/47 System. *Jochen Eislöffel, Chris J. Davis, Thomas P. Ray, & Reinhard Mundt.* 422, L91, 45-C9 (1994)

The Rotating Molecular Core in G10.6−0.4: Synthesis Maps in $^{12}C^{18}O$. *Paul T. P. Ho, Susan Terebey, & Jean L. Turner.* 423, 320, 50-B1 (1994)

Kinematic Structure of the 30 Doradus Giant H II Region. *You-Hua Chu & Robert C. Kennicutt, Jr.* 425, 720, 90-F1 (1994)

[C II] 158 Micron and [O I] 63 Micron Observations of the Galactic Center Region. *Kohei Mizutani, Toshinori Maihara, Hideo Matsuhara, Takao Nakagawa, Hiroshi Shibai, Haruyuki Okuda, Yukiyasu Kobayashi, Norihisa Hiromoto, Tetsuo Nishimura, & Frank J. Low.* 91, 613, 27-G5 (1994)

Radio Continuum and Radio Recombination Line Observations of W51. *David M. Mehringer.* 91, 713, 29-A2 (1994)

On the Velocity Dispersion in the Core of the Globular Cluster M15. *P. Dubath, G. Meylan, & M. Mayor.* 426, 192, 98-E2 (1994)

Near-Infrared Imaging of HH 1/2 in Shocked Molecular Hydrogen and [Fe II]. *Chris J. Davis, Jochen Eislöffel, & Thomas P. Ray.* 426, L93, 109-F5 (1994)

A Bipolar Outflow of Ionized Gas in K3-50A: H76α Radio Recombination Line and Continuum Observations of K3-50. *C. G. De Pree, W. M. Goss, Patrick Palmer, & Robert H. Rubin.* 428, 670, 138-F1 (1994)

Hypersonic Acceleration and Turbulence of H_2O Masers in W49N. *C. R. Gwinn.* 429, 241, 147-B3 (1994)

Physical Structure of H_2O Masers in W49N. *C. R. Gwinn.* 429, 253, 147-C3 (1994)

Radial Motions of Molecular Gas in the W49 Cloud Core. *James M. Jackson & Kathleen E. Kraemer.* 429, L37, 150-E7 (1994)

A Large-Scale Cloud Collision in the Galactic Center Molecular Cloud Near Sagittarius B2. *Tetsuo Hasegawa, Fumio Sato, John B. Whiteoak, & Ryosuke Miyawaki.* 429, L77, 158-C1 (1994)

A Sub-Arcsecond–Scale Spectroscopic Study of the Complex Mass Outflows in the Vicinity of T Tauri. *K.-H. Böhm & J. Solf.* 430, 277, 162-E6 (1994)

On the Influence of Bars and Star Formation on Galactic Abundance Gradients. *D. Friedli, W. Benz, & R. Kennicutt.* 430, L105, 174-F3 (1994)

The Cold, Massive Molecular Cloud G216−2.5. II. Structure and Kinematics. *Youngung Lee, Ronald L. Snell, & Robert L. Dickman.* 432, 167, 195-C8 (1994)

VLA Recombination Line Observations of the Cometary H II Region G34.3+0.2: Dynamics and Physical Properties. *Ralph A. Gaume, Alan L. Fey, & Mark J. Claussen.* 432, 648, 204-B1 (1994)

Dense Clumps in the Monoceros R2 Outflow. *M. Tafalla, R. Bachiller, & M. C. H. Wright.* 432, L127, 207-B13 (1994)

Dense Cores in Dark Clouds. IX. Observations of ^{13}CO and $C^{18}O$ in Vela, Chamaeleon, Musca, and the Coalsack. *J. W. S. Vilas-Boas, P. C. Myers, & G. A. Fuller.* 433, 96, 209-D11 (1994)

Filaments of Neutral Hydrogen toward the Galactic Anticenter. *Christopher M. Tamanaha.* 433, 648, 219-B3 (1994)

Simulation of Variations of Absorption-Line Profiles in Clumpy Molecular Clouds. *Alan P. Marscher & Alan L. Stone.* 433, 705, 219-G2 (1994)

Entrainment by the Jet in HH 47. *John C. Raymond, Jon A. Morse, Patrick Hartigan, Salvador Curiel, & Steve Heathcote.* 434, 232, 228-E12 (1994)

Three Millimeter Molecular Line Observations in Sagittarius B2. I. Full Synthesis Mapping Study of HNO, CCS, and $HC^{13}CCN$. *Yi-Jehng Kuan & Lewis E. Snyder.* 94, 651, 61-A8 (1994)

A New Look at the Dark Cloud L1251: Sensitive Observations of the Molecular Emission. *Fumio Sato, Akira Mizuno, Tomoo Nagahama, Toshikazu Onishi, Yoshinori Yonekura, & Yasuo Fukui.* 435, 279, 247-B11 (1994)

The Puzzling Distribution of the High-Density Molecular Gas in HH 1–2: A Contracting Interstellar Toroid? *José M. Torrelles, José F. Gómez, Paul T. P. Ho, Luis F. Rodríguez, Guillem Anglada, & Jorge Cantó.* 435, 290, 247-D2 (1994)

Observation of [C I] toward the GL 2591 and W28 A2 Molecular Outflows. *Minho Choi, Neal J. Evans II, Daniel T. Jaffe, & Christopher K. Walker.* 435, 734, 256-B10 (1994)

A High-Resolution Survey of Interstellar Na I D_1 Lines. *Daniel E. Welty, L. M. Hobbs, & Varsha P. Kulkarni.* 436, 152, 263-C12 (1994)

Synthesized Spectra of Turbulent Clouds. *E. Falgarone, D. C. Lis, T. G. Phillips, A. Pouquet, D. H. Porter, & P. R. Woodward.* 436, 728, 275-E1 (1994)

Near-Infrared Imaging of the Jets and Flows Associated with Herbig-Haro Objects HH 91, HH 110, and HH 111. *Christopher J. Davis, Reinhard Mundt, & Jochen Eislöffel.* 437, L55, 292-B1 (1994)

Gasdynamical Approach to a Face-on View of the Milky Way. *Keiichi Wada, Yoshiaki Taniguchi, Asao Habe, & Tetsuo Hasegawa.* 437, L123, 299-D8 (1994)

The NGC 7538 IRS 1 Region of Star Formation: Observations of the H66α Recombination Line with a Spatial Resolution of 300 AU. *R. A. Gaume, W. M. Goss, H. R. Dickel, T. L. Wilson, & K. J. Johnston.* 438, 776, 15-A1 (1995)

GHRS Observations of Mass-loaded Flows in Abell 78. *J. Patrick Harrington, Kazimierz J. Borkowski, & Zlatan Tsvetanov.* 439, 264, 24-G1 (1995)

A Multitransitional CO Study of the Cepheus C Cloud Core. *M. H. Heyer & E. F. Ladd.* 439, 269, 24-G10 (1995)

High-Velocity, High-Excitation Neutral Carbon in a Cloud in the Vela Supernova Remnant. *Edward B. Jenkins & George Wallerstein.* 440, 227, 44-C13 (1995)

Alfvén Waves in Interstellar Gasdynamics. *Christopher F. McKee & Ellen G. Zweibel.* 440, 686, 52-F2 (1995)

The Three-dimensional Structure of the Cassiopeia A Supernova Remnant. I. The Spherical Shell. *Jeri E. Reed, J. Jeff Hester, A. C. Fabian, & P. F. Winkler.* 440, 706, 53-A1 (1995)

The Deceleration Powering of Synchrotron Emission from Ejecta Components of Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 441, 307, 63-E9 (1995)

Large HCO^+ and HCN Abundances in the Translucent Cloud toward PKS 0528+134. *Michiel R. Hogerheijde, Eugène J. de Geus, Marco Spaans, Huib Jan van Langevelde, & Ewine F. van Dishoeck.* 441, L93, 76-D4 (1995)

Distinction of Parallel Outflows in L1448 through H_2 Excitation. *Christopher J. Davis & Michael D. Smith.* 443, L41, 102-G14 (1995)

CO and OH Absorption toward the Low-Latitude Radio Source 2023+336. *Henry A. Kobulnicky, John M. Dickey, & Rachel L. Akeson.* 443, L45, 103-A9 (1995)

6 Centimeter Formaldehyde Absorption toward the Sagittarius B Star-forming Complex. *David M. Mehringer, Patrick Palmer, & W. M. Goss.* 97, 497, 19-B1 (1995)

On the Supersonic Turbulence of NGC 604. *Nanci S. P. Sabalisck, Guillermo Tenorio-Tagle, Héctor O. Castañeda, & Casiana Muñoz-Tuñón.* 444, 200, 116-B8 (1995)

Cooling Gas Outflows from Galaxies. *Boqi Wang.* 444, 590, 124-E3 (1995)

Optical and H I Observations of the Low-Velocity and Intermediate-Velocity Gas toward the Globular Cluster M13. *B. Bates, C. R. Shaw, S. N. Kemp, F. P. Keenan, & R. D. Davies.* 444, 672, 125-E7 (1995)

Fragmentation of Filamentary Molecular Clouds with Longitudinal Magnetic Fields: Formation of Disks and Their Collapse. *Fumitaka Nakamura, Tomoyuki Hanawa, & Takenori Nakano.* 444, 770, 127-B2 (1995)

Complex Molecules in Sagittarius B2(N): The Importance of Grain Chemistry. *Yanti Miao, David M. Mehringer, Yi-Jehng Kuan, & Lewis E. Snyder.* 445, L59, 141-B13 (1995)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. II. The $4° < |b| < 5°$ Strips. *H. Izumiura, R. Catchpole, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, K. Sekiguchi, N. Ukita, & I. Yamamura.* 98, 271, 25-E14 (1995)

Observations of the Clumpy Shell of the L1551 Bipolar Outflow. *R. L. Plambeck & R. L. Snell.* 446, 234, 156-D6 (1995)

CS(2–1) Emission from Dense Gas in the Bipolar Outflow of CRL 618. *Arsen R. Hajian, J. A. Phillips, & Yervant Terzian.* 446, 244, 156-E7 (1995)

Detection of the H92α Recombination Line toward the Very Compact Planetary Nebulae IC 5117 and Hb 12. *Luis F. Miranda, José M. Torrelles, & Carlos Eiroa.* 446, L39, 160-F13 (1995)

The Line Width–Size Relation in Massive Cloud Cores. *P. Caselli & P. C. Myers.* 446, 665, 165-C7 (1995)

Patterns of High-Velocity Molecular Gas near Sagittarius A*. *H. S. Liszt & W. B. Burton.* 98, 679, 32-F4 (1995)

Rotation and Outflow in Compact H II Regions: VLA Observations of the Molecular and Ionized Gas in NGC 6334A and NGC 6334F. *C. G. De Pree, L. F. Rodríguez, H. R. Dickel, & W. M. Goss.* 447, 220, 175-C8 (1995)

Physical Properties of Dense Cores: DCO^+ Observations. *Harold M. Butner, Elizabeth A. Lada, & Robert B. Loren.* 448, 207, 195-A11 (1995)

A Very High Resolution Survey of Interstellar CH and CH^+. *Philippe Crane, David L. Lambert, & Yaron Sheffer.* 99, 107, 35-E7 (1995)

VLA OH Observations of High Negative Velocity Gas toward Sagittarius A West: A High-Velocity Cloud Interacting with the Galactic Center. *Jun-Hui Zhao, W. M. Goss, & Paul T. P. Ho.* 450, 122, 229-F9 (1995)

Hubble Space Telescope Imaging of the Wind-blown Lobe NGC 6165. *Paul Scowen, Jeff Hester, Arthur Code, Glen Mackie, C. Roger Lynds, & Earl J. O'Neil, Jr.* 450, 196, 230-F9 (1995)

The Collision Origin of Cohen's Stream. *Christopher M. Tamanaha.* 450, 638, 239-E12 (1995)

Internal Heating of Molecular Clouds by Tidal Fields. *Mousumi Das & Chanda J. Jog.* 451, 167, 248-C11 (1995)

Collapse and Fragmentation of Molecular Cloud Cores. III. Initial Differential Rotation. *Alan P. Boss & Elizabeth A. Myhill.* 451, 218, 249-A6 (1995)

The Density Structure in the Rosette Molecular Cloud: Signposts of Evolution. *Jonathan P. Williams, Leo Blitz, & Anthony A. Stark.* 451, 252, 249-D9 (1995)

The Sagittarius B2 Star-forming Region. II. High-Resolution H66α Observations of Sagittarius B2 North. *C. G. De Pree, R. A. Gaume, W. M. Goss, & M. J. Claussen.* 451, 284, 249-G6 (1995)

Observational Probes of the Small-Scale Structure of Molecular Clouds. *E. M. Moore & Alan P. Marscher.* 452, 671, 273-G13 (1995)

Dense Gas in the DR 21 Region: High-Resolution Imaging of the NH_3 Inversion Lines. *T. L. Wilson, R. A. Gaume, K. J. Johnston, & A. R. Tieftrunk.* 452, 693, 274-C4 (1995)

Collapse Candidates among the Bok Globules. *Yangsheng Wang, Neal J. Evans II, Shudong Zhou, & Dan P. Clemens.* 454, 217, 302-C9 (1995)

Ionized Carbon in NGC 6334. *R. T. Boreiko & A. L. Betz.* 454, 307, 303-E3 (1995)

The H II Region Sharpless 170: A Multiscale Analysis of the Hα Velocity Field. *Marc-Antoine Miville-Deschênes, Gilles Joncas, & Daniel Durand.* 454, 316, 303-F1 (1995)

Momentum Distribution in Molecular Outflows. *Lawrence M. Chernin & Colin R. Masson.* 455, 182, 320-F3 (1995)

Circum-Protostellar Environments. III. Gas Densities and Kinetic Temperatures. *G. H. Moriarty-Schieven, P. G. Wannier, J. G. Mangum, M. Tamura, & V. K. Olmsted.* 455, 190, 320-F14 (1995)

A Turbulent Model for the Interstellar Medium. II. Magnetic Fields and Rotation. *Thierry Passot, Enrique Vázquez-Semadeni, & Annick Pouquet.* 455, 536, 329-D1 (1995)

ISM: MAGNETIC FIELDS

The Zeeman Effect in Astrophysical Water Masers and the Observation of Strong Magnetic Fields in Regions of Star Formation. *Gerald E. Nedoluha & William D. Watson.* 384, 185, 3-C5 (1992)

Zeeman Measurements of the Magnetic Fields at the Galactic Center. *N. E. B. Killeen, K. Y. Lo, & R. Crutcher.* 385, 585, 20-D6 (1992)

Rotation Measures of Low-Latitude Extragalactic Sources and the Magnetoionic Structure of the Galaxy. *Andrew W. Clegg, James M. Cordes, John H. Simonetti, & Shrinivas R. Kulkarni.* 386, 143, 26-A1 (1992)

Faraday Rotation Measure Irregularities through the Supernova Remnant CTA 1: A Site of Enhanced Interstellar Plasma Turbulence. *John H. Simonetti.* 386, 170, 26-C3 (1992)

Magnetic Fields and Radiative Shocks in Protogalaxies and the Origin of Globular Clusters. *Paul R. Shapiro, Alejandro Clocchiatti, & Hyesung Kang.* 389, 269, 63-C11 (1992)

Effect of an Ensemble of Explosions on the Galactic Dynamo. I. General Formulation. *Katia Ferrière.* 389, 286, 63-E1 (1992)

Infrared Polarimetry and the Galactic Magnetic Field. II. Improved Models. *Terry Jay Jones, Dimitri Klebe, & John M. Dickey.* 389, 602, 69-A1 (1992)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. II. Results and a Length Scale for Protostellar Cores. *Telemachos Ch. Mouschovias & Scott A. Morton.* 390, 144, 75-G1 (1992)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. III. A Further Parameter Study and Magnetically Controlled Accretion Rate. *Telemachos Ch. Mouschovias & Scott A. Morton.* 390, 166, 76-A11 (1992)

On the Origin of Cosmological Magnetic Fields. *T. Tajima, S. Cable, K. Shibata, & R. M. Kulsrud.* 390, 309, 79-B1 (1992)

Effect of the Explosion of Supernovae and Superbubbles on the Galactic Dynamo. *Katia Ferrière.* 391, 188, 88-C13 (1992)

Ambipolar Diffusion and Star Formation: Formation and Contraction of Axisymmetric Cloud Cores. I. Formulation of the Problem and Method of Solution. *Robert A. Fiedler & Telemachos Ch. Mouschovias.* 391, 199, 88-D12 (1992)

Giant Molecular Cloud Formation through the Parker Instability in a Skewed Magnetic Field. *Tomoyuki Hanawa, Ryoji Matsumoto, & Kazunari Shibata.* 393, L71, 127-E1 (1992)

Pressure-confined Clumps in Magnetized Molecular Clouds. *Frank Bertoldi & Christopher F. McKee.* 395, 140, 142-A1 (1992)

The Spectrum of Random Magnetic Fields in the Mean Field Dynamo Theory of the Galactic Magnetic Field. *Russell M. Kulsrud & Stephen W. Anderson.* 396, 606, 165-A1 (1992)

The Structure of Magnetic Fields in Dark Clouds: Infrared Polarimetry in B216–217. *Alyssa A. Goodman, Terry J. Jones, Elizabeth A. Lada, & Philip C. Myers.* 399, 108, 196-E3 (1992)

The Bow Shock and Mach Disk of HH 34. *Jon A. Morse, Patrick Hartigan, Gerald Cecil, John C. Raymond, & Steve Heathcote.* 399, 231, 198-B3 (1992)

Discovery of a Synchrotron-emitting Halo around NGC 253. *C. L. Carilli, M. A. Holdaway, P. T. P. Ho, & C. G. De Pree.* 399, L59, 200-F8 (1992)

Polarization of the Far-Infrared Emission from the Thermal Filaments of the Galactic Center Arc. *M. Morris, J. A. Davidson, M. Werner, J. Dotson, D. F. Figer, R. Hildebrand, G. Novak, & S. Platt.* 399, L63, 200-G6 (1992)

On the Amplification of Large-Scale Magnetic Fields in Spiral Galaxies by Galactic Winds. *S. J. Spencer & L. E. Cram.* 400, 484, 216-C12 (1992)

Fast Dynamos, Cosmic Rays, and the Galactic Magnetic Field. *E. N. Parker.* 401, 137, 222-F7 (1992)

The Full Alpha-Tensor Due to Supernova Explosions and Superbubbles in the Galactic Disk. *Katia Ferrière.* 404, 162, 30-A7 (1993)

Parker Instability in a Realistic Gravitational Field. *Ahmet T. Giz & Frank H. Shu.* 404, 185, 30-C3 (1993)

Effects of Magnetic Fields and Rotation on the Fragmentation of Filamentary Molecular Clouds: Comparison of the Theory with the Orion A Cloud. *Tomoyuki Hanawa, Fumitaka Nakamura, Tomoaki Matsumoto, Takenori Nakano, Ken'ichi Tatematsu, Tomofumi Umemoto, Osamu Kameya, Naomi Hirano, Tetsuo Hasegawa, Norio Kaifu, & Satoshi Yamamoto.* 404, L83, 40-G1 (1993)

Magnetic Field Strengths in High-Redshift Galaxies: Can the Galactic Dynamo Be Tested? *Judith J. Perry, Alan M. Watson, & Philipp P. Kronberg.* 406, 407, 62-F12 (1993)

The Circumstellar Density Distribution of L1551NE. *M. Barsony & C. J. Chandler.* 406, L71, 68-E1 (1993)

OH Zeeman Observations of Dark Clouds. *R. M. Crutcher, T. H. Troland, A. A. Goodman, C. Heiles, I. Kazès, & P. C. Myers.* 407, 175, 71-C1 (1993)

Models for the Magnetic Field of M81. *David Moss, Axel Brandenburg, Karl Johan Donner, & Magnus Thomasson.* 409, 179, 99-B10 (1993)

Multiconfiguration VLA H92α Observations of Sagittarius A West at 1 Arcsecond Resolution. *D. A. Roberts & W. M. Goss.* 86, 133, 15-E1 (1993)

Large-Scale Explosions and Superbubbles in the Galactic Disk and Halo. I. Magnetohydrodynamic Simulations. *Shin Mineshige, Kazunari Shibata, & Paul R. Shapiro.* 409, 663, 107-C1 (1993)

A Similarity Solution to the Kinematic $\alpha^2\omega$ Dynamo Equation with Time-dependent Coefficients. *Chung-Ming Ko.* 410, 128, 113-F8 (1993)

High-Resolution H I Observations of H II Regions. III. Photodissociation Regions and the Magnetic Field near Orion B. *Paul P. van der Werf, W. M. Goss, Carl Heiles, R. M. Crutcher, & T. H. Troland.* 411, 247, 130-C8 (1993)

Magnetic Fields in Massive Cloud Cores: Comparison of MILLIPOL and *IRAS* Results. *Brian D. Kane, Dan P. Clemens, Richard Barvainis, & Robert W. Leach.* 411, 708, 138-E1 (1993)

VLA Zeeman Observations of W3. *D. A. Roberts, R. M. Crutcher, T. H. Troland, & W. M. Goss.* 412, 675, 152-B12 (1993)

Oscillatory Instability of Radiative Shocks with Transverse Magnetic Field: Linear Analysis and Nonlinear Simulations. *G. Tóth & B. T. Draine.* 413, 176, 158-C8 (1993)

Ambipolar Diffusion and Star Formation: Formation and Contraction of Axisymmetric Cloud Cores. II. Results. *Robert A. Fiedler & Telemachos Ch. Mouschovias.* 415, 680, 196-C7 (1993)

Collapse of Magnetized Molecular Cloud Cores. I. Semianalytical Solution. *Daniele Galli & Frank H. Shu.* 417, 220, 220-C1 (1993)

Collapse of Magnetized Molecular Cloud Cores. II. Numerical Results. *Daniele Galli & Frank H. Shu.* 417, 243, 220-D13 (1993)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. I. Basic Physics and Formulation of the Problem. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 418, 774, 242-B13 (1993)

Interstellar Magnetic Bubbles. *J. P. Vallée.* 419, 670, 256-A12 (1993)

Local Shear Instabilities in Weakly Ionized, Weakly Magnetized Disks. *Omer M. Blaes & Steven A. Balbus.* 421, 163, 18-A12 (1994)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. II. Numerical Method of Solution. *Scott A. Morton, Telemachos Ch. Mouschovias, & Glenn E. Ciolek.* 421, 561, 25-B6 (1994)

The Magnetic Field in the Ophiuchus Dark Cloud Complex. *Alyssa A. Goodman & Carl Heiles.* 424, 208, 64-E1 (1994)

Basic Theory for Polarized, Astrophysical Maser Radiation in a Magnetic Field. *William D. Watson.* 424, L37, 69-E8 (1994)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. III. Typical Axisymmetric Solutions. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 425, 142, 82-A6 (1994)

Structure and Evolution of Magnetically Supported Molecular Clouds: Evidence for Ambipolar Diffusion in the Barnard 1 Cloud. *R. M. Crutcher, Telemachos Ch. Mouschovias, T. H. Troland, & Glenn E. Ciolek.* 427, 839, 123-A13 (1994)

The Formation of Sharp Structures by Ambipolar Diffusion. *Axel Brandenburg & Ellen G. Zweibel.* 427, L91, 127-A11 (1994)

Magnetic Field Structure in Monoceros R2. *T. H. Jarrett, G. Novak, T. Xie, & P. F. Goldsmith.* 430, 743, 171-B6 (1994)

VV 114: Making of an Ultraluminous Galaxy? *M. S. Yun, N. Z. Scoville, & R. A. Knop.* 430, L109, 174-F9 (1994)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. I. Axisymmetric Solutions. *Shantanu Basu & Telemachos Ch. Mouschovias.* 432, 720, 205-A6 (1994)

Shock Interactions with Magnetized Interstellar Clouds. I. Steady Shocks Hitting Nonradiative Clouds. *Mordecai-Mark Mac Low, Christopher F. McKee, Richard I. Klein, James M. Stone, & Michael L. Norman.* 433, 757, 220-E2 (1994)

Galactic Magnetic Field Strengths and Star Formation Parameters. *J. P. Vallée.* 433, 778, 220-G1 (1994)

On the Global Stability of Magnetized Accretion Disks. I. Axisymmetric Modes. *Charles Curry, Ralph E. Pudritz, & Peter G. Sutherland.* 434, 206, 228-C7 (1994)

Mass-Loss Rates, Ionization Fractions, Shock Velocities, and Magnetic Fields of Stellar Jets. *Patrick Hartigan, Jon A. Morse, & John Raymond.* 436, 125, 263-A6 (1994)

Galactic Magnetism and the Rotation Curves of M31 and the Milky Way. *J. P. Vallée.* 437, 179, 285-F1 (1994)

Alfvén Waves in Interstellar Gasdynamics. *Christopher F. McKee & Ellen G. Zweibel.* 440, 686, 52-F2 (1995)

Polarization Properties of Two Pulsars. *R. N. Manchester & Simon Johnston.* 441, L65, 75-G6 (1995)

Observations of Magnetic Fields in Diffuse Clouds. *P. C. Myers, A. A. Goodman, R. Güsten, & C. Heiles.* 442, 177, 79-E11 (1995)

On Magnetic Turbulence in Interstellar Clouds. *P. C. Myers & V. K. Khersonsky.* 442, 186, 79-F9 (1995)

The Distribution of Molecular and Neutral Gas and Magnetic Fields near the Bipolar H II Region S106. *D. A. Roberts, R. M. Crutcher, & T. H. Troland.* 442, 208, 80-A9 (1995)

Fragmentation of Filamentary Molecular Clouds with Longitudinal Magnetic Fields: Formation of Disks and Their Collapse. *Fumitaka Nakamura, Tomoyuki Hanawa, & Takenori Nakano.* 444, 770, 127-B2 (1995)

Hydromagnetic Waves and the Linewidth-Size Relation in Interstellar Molecular Clouds. *Telemachos Ch. Mouschovias & Dimitrios Psaltis.* 444, L105, 131-A8 (1995)

Magnetic Fields around Bok Globules: CCD Polarimetry of CB 4. *Brian D. Kane, Dan P. Clemens, Robert W. Leach, & Richard Barvainis.* 445, 269, 136-C2 (1995)

A Faraday Rotation Search for Magnetic Fields in Quasar-damped Lyα Absorption Systems. *Abraham L. Oren & Arthur M. Wolfe.* 445, 624, 143-F7 (1995)

The Magnetic Fields in the Galactic Center: Detection of H I Zeeman Splitting. *R. L. Plante, K. Y. Lo, & R. M. Crutcher.* 445, L113, 151-B4 (1995)

Anisotropic Modal Energy Transfer in Interstellar Turbulence. *David Montgomery & William H. Matthaeus.* 447, 706, 185-F10 (1995)

Effects of Pressure and Resistivity on the Ambipolar Diffusion Singularity: Too Little, Too Late. *Axel Brandenburg & Ellen G. Zweibel.* 448, 734, 204-G12 (1995)

Does Near-Infrared Polarimetry Reveal the Magnetic Field in Cold Dark Clouds? *Alyssa A. Goodman, Terry J. Jones, Elizabeth A. Lada, & Philip C. Myers.* 448, 748, 205-B4 (1995)

Zeeman Effect Observations of H I Emission Profiles. I. Magnetic Field Limits for Three Regions Based on Observations Corrected for Polarized Beam Structure. *Gerrit L. Verschuur.* 451, 624, 255-G10 (1995)

Zeeman Effect Observations of H I Emission Profiles. II. Results of an Attempt to Confirm Previous Claims of Field Detections. *Gerrit L. Verschuur.* 451, 645, 256-B6 (1995)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. II. A Parameter Study. *Shantanu Basu & Telemachos Ch. Mouschovias.* 452, 386, 267-D7 (1995)

Davis-Greenstein Alignment of Nonspherical Grains. *A. Lazarian.* 453, 229, 284-C5 (1995)

Grain Alignment by Ambipolar Diffusion in Molecular Clouds. *W. G. Roberge, S. Hanany, & D. W. Messinger.* 453, 238, 284-D3 (1995)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. III. Effect of the Initial Mass-to-Flux Ratio. *Shantanu Basu & Telemachos Ch. Mouschovias.* 453, 271, 284-G9 (1995)

On the Global Stability of Magnetized Accretion Disks. II. Vertical and Azimuthal Magnetic Fields. *Charles Curry & Ralph E. Pudritz.* 453, 697, 293-D6 (1995)

The Milky Way's Spiral Arms Traced by Magnetic Fields, Dust, Gas, and Stars. *J. P. Vallée.* 454, 119, 300-G9 (1995)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. IV. Effect of Ultraviolet Ionization and Magnetically Controlled Infall Rate. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 454, 194, 302-A10 (1995)

A Turbulent Model for the Interstellar Medium. II. Magnetic Fields and Rotation. *Thierry Passot, Enrique Vázquez-Semadeni, & Annick Pouquet.* 455, 536, 329-D1 (1995)

Grain Alignment in the Taurus Dark Cloud. *P. A. Gerakines, D. C. B. Whittet, & A. Lazarian.* 455, L171, 334-E7 (1995)

A Point in Favor of the Superparamagnetic Grain Hypothesis. *A. A. Goodman & D. C. B. Whittet.* 455, L181, 334-F8 (1995)

ISM: MOLECULES

^{13}CO in IC 342: Evidence for a Spiral Density Wave in the Nucleus. *Jean L. Turner & Robert L. Hurt.* 384, 72, 1-G13 (1992)

Ambiguities in the Identification of Giant Molecular Cloud Complexes from Longitude-Velocity Diagrams. *David S. Adler & William W. Roberts, Jr.* 384, 95, 2-B12 (1992)

Dense Cores in Dark Clouds. VII. Line Width–Size Relations. *G. A. Fuller & P. C. Myers.* 384, 523, 8-F1 (1992)

The Molecular Core in the AFGL 5157 Region. *José M. Torrelles, Carlos Eiroa, Rainer Mauersberger, Robert Estalella, Luis F. Miranda, & Guillem Anglada.* 384, 528, 8-F7 (1992)

The Triple Radio Continuum Source in Serpens: Its Interaction with the Ambient Molecular Gas. *J. M. Torrelles, J. F. Gómez, S. Curiel, C. Eiroa, L. F. Rodríguez, & P. T. P. Ho.* 384, L59, 11-D7 (1992)

The Millimeter-Wave Spectrum of the CaOH Radical ($X\,^2\Sigma^+$). *L. M. Ziurys, W. L. Barclay, Jr., & M. A. Anderson.* 384, L63, 11-E1 (1992)

Formaldehyde Absorption in the Nucleus of NGC 3628. *Willem A. Baan & W. M. Goss.* 385, 188, 14-C10 (1992)

The Distribution of the 6_2–6_1 and 5_2–5_1 *E*-Type Methanol Masers in OMC-1. *K. J. Johnston, R. Gaume, S. Stolovy, T. L. Wilson, C. M. Walmsley, & K. M. Menten.* 385, 232, 14-G3 (1992)

Detection of HCO$^+$ $J = 9\rightarrow8$ Line Emission toward Orion IRc2: Molecular Ions in Hot Dense Gas. *D. T. Jaffe, U. U. Graf, A. I. Harris, J. Stutzki, & S. H. Lepp.* 385, 240, 14-G13 (1992)

The Molecular Interstellar Medium in Two Giant H II Regions in M33: NGC 604 and NGC 595. *Christine D. Wilson & Nick Scoville.* 385, 512, 19-E5 (1992)

Structure, Chemistry, and Clumping in the NGC 2071 (North) Molecular Cloud. *Paul F. Goldsmith, Michael Margulis, Ronald L. Snell, & Y. Fukui.* 385, 522, 19-F3 (1992)

The Development of H I Dissociation Zones around New H II Regions. *R. S. Roger & P. E. Dewdney.* 385, 536, 19-G5 (1992)

Zeeman Measurements of the Magnetic Fields at the Galactic Center. *N. E. B. Killeen, K. Y. Lo, & R. Crutcher.* 385, 585, 20-D6 (1992)

An Extended Search for Extragalactic O_2. *H. S. Liszt.* 386, 139, 25-G9 (1992)

The Rotational Spectrum of the Carbon Chain Radical HCCCO. *A. L. Cooksy, J. K. G. Watson, C. A. Gottlieb, & P. Thaddeus.* 386, L27, 29-D7 (1992)

Numerical Models for the Collapse and Fragmentation of Centrally Condensed Molecular Cloud Cores. *Elizabeth A. Myhill & William M. Kaula.* 386, 578, 32-E4 (1992)

Detection of Isocyanoacetylene HCCNC in TMC-1. *Kentarou Kawaguchi, Masatoshi Ohishi, Shin-ichi Ishikawa, & Norio Kaifu.* 386, L51, 36-C10 (1992)

A Survey of CS $J = 7\rightarrow6$ in Regions of Massive Star Formation. *René Plume, D. T. Jaffe, & Neal J. Evans II.* 78, 505, 9-F5 (1992)

Atomic and Molecular Outflow in DR 21. *A. P. G. Russell, J. Bally, R. Padman, & R. E. Hills.* 387, 219, 39-E13 (1992)

Are the NGC 7538 Formaldehyde Masers Really Unusual? *Preethi Pratap, Lewis E. Snyder, & Wolfgang Batrla.* 387, 241, 40-A1 (1992)

A Survey of N_2H^+ in Dense Clouds: Implications for Interstellar Nitrogen and Ion-Molecule Chemistry. *M. Womack, L. M. Ziurys, & S. Wyckoff.* 387, 417, 42-B6 (1992)

Dense Molecular Gas and Starbursts in Ultraluminous Galaxies. *P. M. Solomon, D. Downes, & S. J. E. Radford.* 387, L55, 48-B1 (1992)

The Molecular Hydrogen Emission around L1551 IRS 5: Shock- Heated Molecular Gas at the Base of the Molecular Outflow. *Takuya Yamashita & Motohide Tamura.* 387, L93, 48-E5 (1992)

Infrared Emission Spectra of Benzene and Naphthalene: Implications for the Interstellar Polycyclic Aromatic Hydrocarbon Hypothesis. *Jerrell D. Brenner & John R. Barker.* 388, L39, 52-D6 (1992)

Synthesis Imaging of the DR 21 (OH) Cluster. II. Thermal Ammonia and Water Maser Emission. *Jeffrey G. Mangum, Alwyn Wootten, & Lee G. Mundy.* 388, 467, 56-B6 (1992)

Orion B (NGC 2024). III. BIMA SO $J_K = 2_2 \rightarrow 1_1$ Observations: Evidence for Peculiar Sulfur Chemistry. *Peter J. Barnes & Richard M. Crutcher.* 389, 325, 64-A5 (1992)

High Angular Resolution Far-Infrared Observations of Sagittarius B2. *Paul F. Goldsmith, Dariusz C. Lis, D. F. Lester, & P. M. Harvey.* 389, 338, 64-B7 (1992)

Kinematics and Morphology of Material Occulting ζ Ophiuchi. *H. S. Liszt.* 390, 226, 76-G1 (1992)

Primordial Giant Molecular Cloud Clumps Can Be Probed—Optically. *David L. Block, J. E. Dyson, & Claus Madsen.* 390, L13, 78-C1 (1992)

Switch Shocks in Molecular Clouds. I. Plane-parallel Magnetohydrodynamic Analysis. *Michael D. Smith.* 390, 447, 81-A1 (1992)

Far-Infrared Observations of M17SW: The Clumpy Structure of the Photodissociation Region. *Margaret Meixner, Michael R. Haas, A. G. G. M. Tielens, E. F. Erickson, & M. Werner.* 390, 499, 81-E3 (1992)

Bipolar Outflow in B335: The Small-Scale Structure. *Naomi Hirano, Osamu Kameya, Takashi Kasuga, & Tomofumi Umemoto.* 390, L85, 85-B1 (1992)

The Kinematics of the Molecular Gas in Centaurus A. *A. C. Quillen, P. T. de Zeeuw, E. S. Phinney, & T. G. Phillips.* 391, 121, 87-D13 (1992)

SO in Starburst Galaxies. *S. J. Petuchowski & C. L. Bennett.* 391, 137, 87-F5 (1992)

Formaldehyde Reactions in Dark Clouds. *A. D. Sen, V. G. Anicich, & S. R. Federman.* 391, 141, 87-F10 (1992)

CO Emission from the Dwarf Irregular Galaxy NGC 6822. *Christine D. Wilson.* 391, 144, 87-G1 (1992)

Velocity Structure in Optical CH^+ Lines toward HD 190603 and Implications for the Formation of CH^+. *M. M. Allen & Theodore P. Snow.* 391, 152, 87-G13 (1992)

On the Nature of the Molecular Cores in High-Latitude Cirrus Clouds. II. Structure, Stability, and Physical Conditions from $C^{18}O$ Observations. *B. E. Turner, Lanping Xu, & L. J Rickard.* 391, 158, 88-A7 (1992)

Walls and Windows in the Molecular Milky Way. *William H. Waller & Lowell E. Tacconi-Garman.* 80, 305, 26-D3 (1992)

Infrared Morphology of Mass Outflow from GL 2591. *Motohide Tamura & Takuya Yamashita.* 391, 710, 96-G4 (1992)

Chemistry in Circumstellar Disks: CS toward HL Tauri. *Geoffrey A. Blake, Ewine F. van Dishoeck, & Anneila I. Sargent.* 391, L99, 100-A5 (1992)

A Source Model for the L134N Molecular Cloud. *Daryl A. Swade & F. Peter Schloerb.* 392, 543, 109-A9 (1992)

A Survey of CCS, HC_3N, HC_5N, and NH_3 toward Dark Cloud Cores and Their Production Chemistry. *Hiroko Suzuki, Satoshi Yamamoto, Masatoshi Ohishi, Norio Kaifu, Shin-ichi Ishikawa, Yasuhiro Hirahara, & Shuro Takano.* 392, 551, 109-B4 (1992)

The Diffuse Interstellar Cloud toward HD 179406 (20 Aquilae). *Margaret Murray Hanson, Theodore P. Snow, & John H. Black.* 392, 571, 109-C12 (1992)

High Spatial Resolution Observations of HCO^+ in the NGC 7027 Molecular Envelope. *S. Deguchi, H. Izumiura, Nguyen-Q-Rieu, K. M. Shibata, N. Ukita, & I. Yamamura.* 392, 597, 109-F1 (1992)

High-Velocity HCO^+ Emission Associated with the DR 21 Molecular Outflow. *Rogwald P. Garden & John E. Carlstrom.* 392, 602, 109-F7 (1992)

The Outflow in the L1157 Dark Cloud: Evidence for Shock Heating of the Interacting Gas. *T. Umemoto, T. Iwata, Y. Fukui, H. Mikami, S. Yamamoto, O. Kameya, & N. Hirano.* 392, L83, 113-E6 (1992)

Detection of SiO Emission in the L1157 Dark Cloud. *Hitomi Mikami, Tomofumi Umemoto, Satoshi Yamamoto, & Shuji Saito.* 392, L87, 113-E11 (1992)

Distance and Kinematics of the W49N H_2O Maser Outflow. *C. R. Gwinn, J. M. Moran, & M. J. Reid.* 393, 149, 116-A1 (1992)

Estimates of N_2 Abundances in Dense Molecular Clouds. *M. Womack, L. M. Ziurys, & S. Wyckoff.* 393, 188, 116-D6 (1992)

Ultraviolet, Optical, and Infrared Observations of the High-Latitude Molecular Cloud toward HD 210121. *Daniel E. Welty & James R. Fowler.* 393, 193, 116-D13 (1992)

The Tully-Fisher Relation for the CO Line. *John M. Dickey & Ilya Kazès.* 393, 530, 122-D5 (1992)

Surveys of Dense Cores for High-Velocity Gas. *Yuefang Wu, Shudong Zhou, & Neal J. Evans II.* 394, 196, 130-D9 (1992)

A Complete CO Survey of the Cygnus X Region. *Helen O. Leung & P. Thaddeus.* 81, 267, 38-F3 (1992)

Mapping Observations of Sulfur-containing Carbon-Chain Molecules in Taurus Molecular Cloud 1 (TMC-1). *Yasuhiro Hirahara, Hiroko Suzuki, Satoshi Yamamoto, Kentarou Kawaguchi, Norio Kaifu, Masatoshi Ohishi, Shuro Takano, Shin-ichi Ishikawa, & Akimasa Masuda.* 394, 539, 136-B1 (1992)

Pressure-confined Clumps in Magnetized Molecular Clouds. *Frank Bertoldi & Christopher F. McKee.* 395, 140, 142-A1 (1992)

The Compression of the M-0.02-0.07 Molecular Cloud by the Sagittarius A East Shell Source. *E. Serabyn, J. H. Lacy, & J. M. Achtermann.* 395, 166, 142-C1 (1992)

The Ultraviolet and Visible Spectrum of the Polycyclic Aromatic Hydrocarbon $C_{10}H_8^+$: Possible Contributions to the Diffuse Interstellar Bands and to the Ultraviolet–Visible Extinction. *F. Salama & L. J. Allamandola.* 395, 301, 143-G9 (1992)

Evidence for a Wind-swept Cavity in HH 34? *Alexander Rudolph & William J. Welch.* 395, 488, 148-F3 (1992)

Global Aspects of Dynamics and Star Formation in Taurus. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 395, 501, 148-G13 (1992)

High-Resolution Photoabsorption Cross Sections of $E^1\Pi$–$X^1\Sigma^+$ Vibrational Bands of ^{12}CO and ^{13}CO. *G. Stark, P. L. Smith, K. Ito, & K. Yoshino.* 395, 705, 152-B5 (1992)

Twin Peaks of CO Emission in the Central Regions of Barred Galaxies. *Jeffrey D. P. Kenney, Christine D. Wilson, Nick Z. Scoville, Nicholas A. Devereux, & Judith S. Young.* 395, L79, 153-G5 (1992)

Evidence for Large-Scale Expanding Motions within the Orion A Molecular Cloud. *M. H. Heyer, J. Morgan, F. P. Schloerb, R. L. Snell, & P. F. Goldsmith.* 395, L99, 154-B1 (1992)

Protonated Acetylene: An Important Circumstellar and Interstellar Ion. *A. E. Glassgold, A. Omont, & M. Guélin.* 396, 115, 156-E5 (1992)

Extended Infrared Emission around IRAS 21282+5050. *Jesse D. Bregman, John Booth, D. Kirk Gilmore, Laura Kay, & David Rank.* 396, 120, 156-E12 (1992)

Detection of HNCCC in TMC-1. *Kentarou Kawaguchi, Shuro Takano, Masatoshi Ohishi, Shin-ichi Ishikawa, Keisuke Miyazawa, Norio Kaifu, Koichi Yamashita, Satoshi Yamamoto, Shuji Saito, Yasuhiro Ohshima, & Yasuki Endo.* 396, L49, 161-A1 (1992)

Density Structure and Star Formation in Dense Cores with Thermal and Nonthermal Motions. *P. C. Myers & G. A. Fuller.* 396, 631, 165-C1 (1992)

A Sensitive Search for Rotational Lines of Vibrationally Excited HC_5N in IRC +10°216. *M. B. Bell, P. A. Feldman, & L. W. Avery.* 396, 643, 165-D1 (1992)

Outflowing Molecular Gas in NGC 3079. *Judith A. Irwin & Yoshiaki Sofue.* 396, L75, 167-B1 (1992)

On the Detectability of the Gas of Other Solar Nebulae. *Toshihiro Omodaka, Yoshimi Kitamura, & Eiko Kawazoe.* 396, L87, 167-C7 (1992)

On the Nature of the Excitation of Herbig-Haro Object 2. *José M. Torrelles, Luis F. Rodríguez, Jorge Cantó, Guillem Anglada, José F. Gómez, Salvador Curiel, & Paul T. P. Ho.* 396, L95, 167-D7 (1992)

Detection of Interstellar SO^+: A Diagnostic of Dissociative Shock Chemistry. *B. E. Turner.* 396, L107, 167-F1 (1992)

Aperture Synthesis CO (J = 3–2) Observations of a Protogalaxy Candidate IRAS F10214+4724. *R. Kawabe, K. Sakamoto, S. Ishizuki, & M. Ishiguro.* 397, L23, 173-C12 (1992)

Models of Gas-Grain Chemistry in Dense Interstellar Clouds with Complex Organic Molecules. *Tatsuhiko I. Hasegawa, Eric Herbst, & Chun Ming Leung.* 82, 167, 51-D13 (1992)

Calculations of Ion-Molecule Deuterium Fractionation Reactions Involving HD. *Sergio A. Maluendes, A. D. McLean, & Eric Herbst.* 397, 477, 176-F10 (1992)

Fractionation of CO in the Diffuse Clouds toward ζ Ophiuchi. *Yaron Sheffer, S. R. Federman, David L. Lambert, & Jason A. Cardelli.* 397, 482, 176-G3 (1992)

CO (v = 1–0) Emission in the Molecular Shock Regions of OMC-1. *G. L. Grasdalen, John A. Hackwell, David K. Lynch, & Ray W. Russell.* 397, L119, 181-E13 (1992)

Detection of the Quadrupole Hyperfine Structure in $HCNH^+$. *L. M. Ziurys, A. J. Apponi, & J. T. Yoder.* 397, L123, 181-F6 (1992)

CN Rotational Excitation. *E. Palazzi, N. Mandolesi, & Philippe Crane.* 398, 53, 182-F5 (1992)

High-Resolution Imaging of the Galactic Cloud Monoceros R2. *Constantine P. Gonatas, Patrick Palmer, & G. Novak.* 398, 118, 183-D7 (1992)

A Dense Molecular Ring Surrounding the Nonthermal Galactic Center Radio Shell G359.1−0.5. *Keven I. Uchida, Mark Morris, J. Bally, M. Pound, & F. Yusef-Zadeh.* 398, 128, 183-E5 (1992)

Warm Molecular Gas in the Primeval Galaxy IRAS 10214+4724. *P. M. Solomon, D. Downes, & S. J. E. Radford.* 398, L29, 187-E1 (1992)

Laboratory Measurement of the Rotational Spectrum of HCCS. *J. M. Vrtilek, C. A. Gottlieb, E. W. Gottlieb, W. Wang, & P. Thaddeus.* 398, L73, 188-C7 (1992)

^{13}CO and HCO^+ Observations of *IRAS* Sources in L1641. *Hua Chen, Yasuo Fukui, & Ji Yang.* 398, 544, 190-G12 (1992)

Nuclear Molecular Gas in the Virgo Cluster S0 Galaxy NGC 4710. *J. M. Wrobel & Jeffrey D. P. Kenney.* 399, 94, 196-C10 (1992)

Tests of Shock Chemistry in IC 443G. *B. E. Turner, Kin-Wing Chan, S. Green, & D. A. Lubowich.* 399, 114, 196-E12 (1992)

Infrared Spectroscopy of Dense Clouds in the C−H Stretch Region: Methanol and "Diamonds." *L. J. Allamandola, S. A. Sandford, A. G. G. M. Tielens, & T. M. Herbst.* 399, 134, 196-G7 (1992)

On the Molecular Complexity of the Hot Cores in Orion A: Grain Surface Chemistry as "The Last Refuge of the Scoundrel." *S. B. Charnley, A. G. G. M. Tielens, & T. J. Millar.* 399, L71, 201-A8 (1992)

Methanol Ice in the Protostar GL 2136. *C. J. Skinner, A. G. G. M. Tielens, M. J. Barlow, & K. Justtanont.* 399, L79, 201-B7 (1992)

Laboratory Measurement of the Millimeter and Submillimeter Wave Spectrum of $C_2H_3^+$. *M. Bogey, M. Cordonnier, C. Demuynck, & J. L. Destombes.* 399, L103, 201-E3 (1992)

A Survey for Extragalactic HCN and HCO^+. *Nguyen-Q-Rieu, James M. Jackson, Christian Henkel, Truong-Bach, & Rainer Mauersberger.* 399, 521, 204-D1 (1992)

Interstellar H_3O^+ and Its Relation to the O_2 and H_2O Abundances. *T. G. Phillips, Ewine F. van Dishoeck, & Jocelyn Keene.* 399, 533, 204-E1 (1992)

On the Virial Theorem for Turbulent Molecular Clouds. *Christopher F. McKee & Ellen G. Zweibel.* 399, 551, 204-F7 (1992)

Mid-Infrared Rotational Line Emission from Interstellar Molecular Hydrogen. *Michael G. Burton, D. J. Hollenbach, & A. G. G. M. Tielens.* 399, 563, 204-G7 (1992)

A Surface Brightness Correlation between Carbon Monoxide and Nonthermal Radio Continuum Emission in the Galaxy. *R. J. Allen.* 399, 573, 205-A5 (1992)

Submillimeter Line Observations of the Proto–Planetary Nebula CRL 2688. *P. A. Jaminet, W. C. Danchi, Göran Sandell, & E. C. Sutton.* 400, 535, 217-A7 (1992)

The Excitation Temperature of HC_9N in the Circumstellar Envelope of IRC +10216. *M. B. Bell, L. W. Avery, J. M. MacLeod, & H. E. Matthews.* 400, 551, 217-B12 (1992)

The Dynamics of Molecular Cloud Envelopes in a Varying Ultraviolet Radiation Field. *C. Bréart de Boisanger, J.-P. Chièze, & B. Meltz.* 401, 182, 223-D1 (1992)

VLBI Observations of the 6.7 GHz Methanol Masers toward W3(OH). *K. M. Menten, M. J. Reid, P. Pratap, J. M. Moran, & T. L. Wilson.* 401, L39, 227-F1 (1992)

Observational Constraints on Solar Nebula Nitrogen Chemistry: N_2/NH_3. *Maria Womack, Susan Wyckoff, & L. M. Ziurys.* 401, 728, 231-E6 (1992)

On Ionized Napthalene ($C_{10}H_8^+$) as a Carrier of Diffuse Interstellar Bands. *Theodore P. Snow.* 401, 775, 232-B10 (1992)

The Environments of Young Stars: Mid-Infrared and Molecular Line Imaging. *Eric Keto, Deanne Proctor, Roger Ball, John Arens, & Garrett Jernigan.* 401, L113, 233-E11 (1992)

Photometric and Spectroscopic Analysis of High Galactic Latitude Molecular Clouds. I. Distances and Extinctions of Stars toward 25 Selected Regions. *B. E. Penprase.* 83, 273, 61-E7 (1992)

Neutral Gas in the Central 2 Parsecs of the Galaxy. *J. M. Jackson, N. Geis, R. Genzel, A. I. Harris, S. Madden, A. Poglitsch, G. J. Stacey, & C. H. Townes.* 402, 173, 3-C1 (1993)

CO (J = 1–0) Line Emission from Giant Molecular Clouds. *Mark G. Wolfire, David Hollenbach, & A. G. G. M. Tielens.* 402, 195, 3-E1 (1993)

The Observation of Correlated Velocity Structures in a Translucent Molecular Cloud and Implications for Turbulence. *L. Magnani, T. N. LaRosa, & S. N. Shore.* 402, 226, 3-G10 (1993)

Ammonia in the W3(OH) Region. *T. L. Wilson, R. A. Gaume, & K. J. Johnston.* 402, 230, 4-A1 (1993)

Millimeter-Wavelength Aperture Synthesis Observations of Massive Star-forming Regions in Sagittarius B2. *D. C. Lis, P. F. Goldsmith, J. E. Carlstrom, & N. Z. Scoville.* 402, 238, 4-A12 (1993)

The Millimeter-Wave Spectrum of the MgH and MgD Radicals. *L. M. Ziurys, W. L. Barclay, Jr., & M. A. Anderson.* 402, L21, 6-D8 (1993)

First Measurements of Extragalactic CO(4–3). *R. Güsten, E. Serabyn, C. Kasemann, A. Schinckel, G. Schneider, A. Schulz, & K. Young.* 402, 537, 9-C1 (1993)

Warm Neutral Halos around Molecular Clouds. VI. Physical and Chemical Modeling. *B-G Andersson & P. G. Wannier.* 402, 585, 9-G9 (1993)

Gravitational Formation Times and Stellar Mass Distributions for Stars of Mass 0.3–30 $M_\odot$. *P. C. Myers & G. A. Fuller.* 402, 635, 10-E1 (1993)

Upper Limits to the CO J = 1–0 Emission around Vega-like Stars: Gas Depletion of the Circumstellar Ring around ϵ Eridani. *Takuya Yamashita, Toshihiro Handa, Toshihiro Omodaka, Yoshimi Kitamura, Eiko Kawazoe, Saeko S. Hayashi, & Norio Kaifu.* 402, L65, 12-G7 (1993)

A Possible Connection between Enhanced CH^+ and Intense Far-Ultraviolet Radiation Fields. *Theodore P. Snow.* 402, L73, 13-A7 (1993)

Dense Cores in L1204/S140: Star Formation and Velocity Shifts. *M. Tafalla, R. Bachiller, & J. Martín-Pintado.* 403, 175, 16-B8 (1993)

High-Velocity Formaldehyde Absorption within 30″ of the Galactic Nucleus. *T. Pauls, K. J. Johnston, T. L. Wilson, J. M. Marr, & A. Rudolph.* 403, L13, 20-B6 (1993)

New 3 Millimeter Observations of Interstellar HNO: Reinstating a Discredited Identification. *Lewis E. Snyder, Yi-Jehng Kuan, L. M. Ziurys, & J. M. Hollis.* 403, L17, 20-C1 (1993)

Survey of Galactic CO Emission toward Compact Extragalactic Millimeter-Wave Continuum Sources. *Harvey S. Liszt & Robert W. Wilson.* 403, 663, 23-G11 (1993)

Laboratory Detection of HNCCC and DNCCC by Pulsed Discharge Nozzle Fourier-Transform Microwave Spectroscopy. *Yasuhiro Hirahara, Yasuhiro Ohshima, & Yasuki Endo.* 403, L83, 27-F1 (1993)

158 Micron [C II] Mapping of the Orion Molecular Cloud. *G. J. Stacey, D. T. Jaffe, N. Geis, R. Genzel, A. I. Harris, A. Poglitsch, J. Stutzki, & C. H. Townes.* 404, 219, 30-E11 (1993)

Evidence for Protostellar Collapse in B335. *Shudong Zhou, Neal J. Evans II, Carsten Kömpe, & C. M. Walmsley.* 404, 232, 30-F11 (1993)

PIG (Partially Ionized Globule) Anatomy: Density and Temperature Structure of the Bright-rimmed Globule IC 1396E. *E. Serabyn, R. Güsten, & L. Mundy.* 404, 247, 31-A1 (1993)

Scattering and Luminescence in the Bubble Nebula. *Jean-Pierre Sivan & Jean-Marie Perrin.* 404, 258, 31-B1 (1993)

Molecular Cloud Cores in the Orion A Cloud. I. Nobeyama CS (1–0) Survey. *Ken'ichi Tatematsu, Tomofumi Umemoto, Osamu Kameya, Naomi Hirano, Tetsuo Hasegawa, Masahiko Hayashi, Takahiro Iwata, Norio Kaifu, Hitomi Mikami, Yasuhiro Murata, Makoto Nakano, Takenori Nakano, Nagayoshi Ohashi, Kazuyoshi Sunada, Hiroshi Takaba, & Satoshi Yamamoto.* 404, 643, 37-A5 (1993)

The Scale Height and Radial Distribution of Molecular Gas in NGC 891. *N. Z. Scoville, D. Thakkar, J. E. Carlstrom, & A. I. Sargent.* 404, L59, 40-D7 (1993)

Discovery of a Rotating Protoplanetary Gas Disk around the Young Star GG Tauri. *R. Kawabe, M. Ishiguro, T. Omodaka, Y. Kitamura, & S. M. Miyama.* 404, L63, 40-E1 (1993)

A Circumstellar Molecular Gas Structure Associated with the Massive Young Star Cepheus A–HW 2. *José M. Torrelles, Luis F. Rodríguez, Jorge Cantó, & Paul T. P. Ho.* 404, L75, 40-F1 (1993)

The $^{12}C/^{13}C$ Abundance Ratio in NGC 2264. *George F. Mitchell & Jean-Pierre Maillard.* 404, L79, 40-F8 (1993)

A Survey of Bimolecular Ion-Molecule Reactions for Use in Modeling the Chemistry of Planetary Atmospheres, Cometary Comae, and Interstellar Clouds: 1993 Supplement. *V. G. Anicich.* 84, 215, 4-C11 (1993)

On the Nature of the Molecular Cores in High-Latitude Cirrus Clouds. III. ^{13}CO Observations and Tests of CO Chemistry Models. *B. E. Turner.* 405, 229, 44-A3 (1993)

A Search for the Rotational Transitions of H_2D^+ at 1370 GHz and H_3O^+ at 985 GHz. *R. T. Boreiko & A. L. Betz.* 405, L39, 47-F11 (1993)

The Internal Mass Distribution of a Giant Molecular Cloud without Star Formation. *Jonathan P. Williams & Leo Blitz.* 405, L75, 54-E1 (1993)

The Ionized Gas in the Center and in the Bar of the Spiral Galaxy NGC 6946. *Jean-René Roy & Julien Belley.* 406, 60, 55-G1 (1993)

On the 2175 Å Absorption Band of Hollow, Onion-like Carbon Particles. *L. Henrard, A. A. Lucas, & Ph. Lambin.* 406, 92, 56-C1 (1993)

A Multiwavelength Study of the Eridanus Soft X-Ray Enhancement. *D. N. Burrows, K. P. Singh, J. A. Nousek, G. P. Garmire, & J. Good.* 406, 97, 56-C7 (1993)

N_2H^+ in the Orion Ambient Ridge: Cloud Clumping versus Rotation. *Maria Womack, L. M. Ziurys, & L. J. Sage.* 406, L29, 61-A1 (1993)

Heterogenous Array Observations of IC 342: The CO Isotopic Ratio. *M. C. H. Wright, S. Ishizuki, J. L. Turner, P. T. P. Ho, & K. Y. Lo.* 406, 470, 63-E10 (1993)

Interferometric Observations of Three Giant Molecular Clouds in M31. *Christine D. Wilson & Alexander L. Rudolph.* 406, 477, 63-F6 (1993)

Shock Propagation in a Turbulent Cloud. *Toshiya Kimura & Makoto Tosa.* 406, 512, 64-B10 (1993)

Switch Shocks in Molecular Clouds. II. Implications. *Michael D. Smith.* 406, 520, 64-C7 (1993)

Dense Cores in Dark Clouds. VIII. Velocity Gradients. *A. A. Goodman, P. J. Benson, G. A. Fuller, & P. C. Myers.* 406, 528, 64-D3 (1993)

Warm Neutral Halos around Molecular Clouds. V. OH (1665 and 1667 MHz) Observations. *Peter G. Wannier, B-G Andersson, S. R. Federman, B. M. Lewis, Y. P. Viala, & E. Shaya.* 407, 163, 71-B1 (1993)

OH Zeeman Observations of Dark Clouds. *R. M. Crutcher, T. H. Troland, A. A. Goodman, C. Heiles, I. Kazès, & P. C. Myers.* 407, 175, 71-C1 (1993)

CO Emission from Molecular Gas at −190 Kilometers per Second near Sagittarius A. *H. S. Liszt & W. B. Burton.* 407, L25, 75-C11 (1993)

Hierarchical Structure Analysis of Interstellar Clouds Using Nonorthogonal Wavelets. *William D. Langer, Robert W. Wilson, & Charles H. Anderson.* 408, L45, 89-C7 (1993)

Rotational Spectra of the $X\ ^2\Sigma^+$ States of CaH and CaD. *C. I. Frum, J. J. Oh, E. A. Cohen, & H. M. Pickett.* 408, L61, 89-F1 (1993)

The Millimeter-Wave Spectrum of CaH ($X\ ^2\Sigma^+$). *W. L. Barclay, Jr., M. A. Anderson, & L. M. Ziurys.* 408, L65, 89-F8 (1993)

Theoretical Infrared Spectra of Some Model Polycyclic Aromatic Hydrocarbons: Effect of Ionization. *D. J. De Frees, M. D. Miller, D. Talbi, F. Pauzat, & Y. Ellinger.* 408, 530, 91-G5 (1993)

$^{12}C/^{13}C$ Isotope Ratio in the Local Interstellar Medium from Observations of $^{13}C^{18}O$ in Molecular Clouds. *William D. Langer & Arno A. Penzias.* 408, 539, 92-A1 (1993)

Chemical Differentiation between Star-forming Regions: The Orion Hot Core and Compact Ridge. *P. Caselli, T. I. Hasegawa, & Eric Herbst.* 408, 548, 92-A11 (1993)

CH as a Tracer of a Translucent Cloud Boundary. *Loris Magnani & Joseph S. Onello.* 408, 559, 92-B9 (1993)

A Flattened Cloud Core in NGC 2024. *Paul T. P. Ho, Yun-Lou Peng, José M. Torrelles, José F. Gómez, Luis F. Rodríguez, & Jorge Cantó.* 408, 565, 92-C1 (1993)

H_2 Morphology of Young Planetary Nebulae. *James R. Graham, T. M. Herbst, K. Matthews, G. Neugebauer, B. T. Soifer, E. Serabyn, & S. Beckwith.* 408, L105, 95-F1 (1993)

Laboratory Detection of a New Free Radical C_4S ($^3\Sigma^-$). *Yasuhiro Hirahara, Yasuhiro Ohshima, & Yasuki Endo.* 408, L113, 95-F13 (1993)

Molecular Gas in Powerful Radio Galaxies Detected by *IRAS*. *J. M. Mazzarella, J. R. Graham, D. B. Sanders, & S. Djorgovski.* 409, 170, 99-A13 (1993)

The Physical Structure of Orion-KL on 2500 AU Scales Using the *K*-Doublet Transitions of Formaldehyde. *Jeffrey G. Mangum, Alwyn Wootten, & Richard L. Plambeck.* 409, 282, 100-E13 (1993)

Collisional Excitation of H_2 Molecules by H Atoms. *M. E. Mandy & P. G. Martin.* 86, 199, 16-E1 (1993)

H_2 in Interstellar and Extragalactic Ices: Infrared Characteristics, Ultraviolet Production, and Implications. *Scott A. Sandford & Louis J. Allamandola.* 409, L65, 111-F1 (1993)

Density Wave Kinematics and Giant Molecular Association Formation in M51. *Richard J. Rand.* 410, 68, 113-A3 (1993)

The Nature of the Molecular Cores in High-Latitude Cirrus Clouds. IV. The Electron Distribution and the Abundance and Chemistry of H_2CO. *B. E. Turner.* 410, 140, 113-G8 (1993)

Collapse and Fragmentation of Molecular Cloud Cores. I. Moderately Centrally Condensed Cores. *Alan P. Boss.* 410, 157, 114-B1 (1993)

Extended CO(7→6) Emission from Warm Gas in Orion. *J. E. Howe, D. T. Jaffe, E. N. Grossman, W. F. Wall, J. G. Mangum, & G. J. Stacey.* 410, 179, 114-D1 (1993)

The Formation of Cyanopolyyne Molecules in IRC +10216. *Isabelle Cherchneff, Alfred E. Glassgold, & Gary A. Mamon.* 410, 188, 114-D12 (1993)

From Bipolar to Quadrupolar: The Collimation Processes of the Cepheus A Outflow. *José M. Torrelles, Lourdes Verdes-Montenegro, Paul T. P. Ho, Luis F. Rodríguez, & Jorge Cantó.* 410, 202, 114-F1 (1993)

Detection of CO Emission from Massive Molecular Clouds in the Inner Disk of M31. *Ronald J. Allen & J. Lequeux.* 410, L15, 117-G7 (1993)

An Ab Initio Prediction of the Spectroscopic Constants of MgNC: The First Mg-bearing Molecule in Space. *Keisaku Ishii, Tsuneo Hirano, Umpei Nagashima, Bernhard Weis, & Koichi Yamashita.* 410, L43, 118-D7 (1993)

Laboratory Detection of C_5S by Pulsed–Discharge-Nozzle Fourier Transform Microwave Spectroscopy. *Yasuko Kasai, Kinichi Obi, Yasuhiro Ohshima, Yasuhiro Hirahara, Yasuki Endo, Kentarou Kawaguchi, & Akinori Murakami.* 410, L45, 118-D11 (1993)

Laboratory Measurements of the Millimeter-Wave Spectra of Calcium Isocyanide. *Timothy C. Steimle, Shuji Saito, & Shuro Takano.* 410, L49, 118-C2 (1993)

Laboratory Submillimeter-Wave Observation of the $N = 1$–0 Transition of the ND($^3\Sigma^-$) Radical. *Shuji Saito & Masahiro Goto.* 410, L53, 118-C7 (1993)

Submillimeter Continuum Emission from the Galactic Center Region. *W. R. F. Dent, H. E. Matthews, R. Wade, & W. D. Duncan.* 410, 650, 121-F11 (1993)

4_{-1}–3_0 *E* Methanol Emission in G1.6−0.025. *Aubrey D. Haschick & Willem A. Baan.* 410, 663, 121-G12 (1993)

Spectral Imaging of the 3.3 and 11.3 Micron Emission Bands in NGC 1333: Discovery of Spatially Separate Band Emissions. *Jesse Bregman, David Rank, Scott A. Sandford, & Pasquale Temi.* 410, 668, 122-A5 (1993)

Laboratory Spectra of Polycyclic Aromatic Hydrocarbon Ions and the Interstellar Extinction Curve. *Wei Lee & Thomas J. Wdowiak.* 410, L127, 126-E5 (1993)

On the Nature of the Molecular Cores in High-Latitude Cirrus Clouds. V. NH_3 and Its Chemistry. *B. E. Turner.* 411, 219, 129-G13 (1993)

The Association of ^{13}CO Molecular Gas with *IRAS* Sources in L1641. *H. Chen, Y. Fukui, & T. Iwata.* 411, 239, 130-B11 (1993)

Detection of the 2165 Inverse Centimeter (4.619 Micron) XCN Band in the Spectrum of L1551 IRS 5. *Stephen C. Tegler, David A. Weintraub, Louis J. Allamandola, Scott A. Sandford, Terrence W. Rettig, & Humberto Campins.* 411, 260, 130-D9 (1993)

HCO^+, $H^{13}CN$, and $H^{12}CN$ Aperture Synthesis Observations of the Circumnuclear Molecular Ring in the Galactic Center. *J. M. Marr, M. C. H. Wright, & D. C. Backer.* 411, 667, 138-A8 (1993)

Hunt for Variations in Molecular Gas and Cloud Properties across the Inner, Northern Galactic Disk. *Harvey S. Liszt.* 411, 720, 138-F1 (1993)

Interferometric Observations for Oxygen-containing Organic Molecules toward Orion-KL. *Y. C. Minh, M. Ohishi, D. G. Roh, M. Ishiguro, & W. M. Irvine.* 411, 773, 139-D3 (1993)

3.3 and 11.3 Micron Images of HD 44179: Evidence for an Optically Thick Polycyclic Aromatic Hydrocarbon Disk. *Jesse D. Bregman, David Rank, Pasquale Temi, Doug Hudgins, & Laura Kay.* 411, 794, 139-F1 (1993)

Molecular Gas in the Early-Type Starburst Galaxy NGC 3928. *Jonathan G. Li, E. R. Seaquist, & L. J. Sage.* 411, L71, 142-C11 (1993)

M82: The Saga Continues. *K. K. McLeod, G. H. Rieke, M. J. Rieke, & D. M. Kelly.* 412, 111, 143-D10 (1993)

The Nature of Unidentified Far-Infrared Point Sources. *William T. Reach, Carl Heiles, & Bon-Chul Koo.* 412, 127, 143-F1 (1993)

Magnetohydrodynamic Wave Propagation in One-dimensional Nonhomogeneous, Self-gravitating Clouds. *Marco Fatuzzo & Fred C. Adams.* 412, 146, 143-G10 (1993)

The Molecular Gas and Star Formation in *IRAS* Bright Early-Type Disk Galaxies. I. NGC 7625. *Jonathan G. Li, E. R. Seaquist, J. M. Wrobel, Zhong Wang, & L. J. Sage.* 413, 150, 158-A6 (1993)

High-Resolution Observations of Turbulence in the Subcondensation TMC-1C in Heiles' Cloud 2: Estimation of the Velocity Spectrum of Turbulence. *Y. Kitamura, K. Sunada, M. Hayashi, & T. Hasegawa.* 413, 221, 159-A9 (1993)

Cosmic-Ray–dominated Dense Molecular Gas in Normal and Starburst Galaxies. *Anatoly Suchkov, Ronald J. Allen, & Timothy M. Heckman.* 413, 542, 163-C1 (1993)

Fragmentation and Kinematics of the W49N Cloud Core. *E. Serabyn, R. Güsten, & A. Schulz.* 413, 571, 163-E9 (1993)

Compact Ammonia Sources toward the G10.5+0.0 H II Region Complex. *Guido Garay, James M. Moran, & Luis F. Rodríguez.* 413, 582, 163-F8 (1993)

Cometary Globules in the Southeast Quadrant of the Rosette Nebula. *Nimesh A. Patel, Taoling Xie, & Paul F. Goldsmith.* 413, 593, 163-G7 (1993)

Interstellar Cyanogen and the Temperature of the Cosmic Microwave Background Radiation. *Katherine C. Roth, David M. Meyer, & Isabel Hawkins.* 413, L67, 168-C5 (1993)

The Detection of a New Methanol Maser Transition at 9.9 GHz. *V. I. Slysh, S. V. Kalenskii, & I. E. Val'tts.* 413, L133, 169-C6 (1993)

Kiloparsec-Scale Molecular Gas Excitation in Spiral Galaxies. *W. F. Wall, D. T. Jaffe, F. N. Bash, F. P. Israel, P. R. Maloney, & F. Baas.* 414, 98, 171-C5 (1993)

Properties of Jet-driven Molecular Outflows. *Colin R. Masson & Lawrence M. Chernin.* 414, 230, 172-G10 (1993)

Density, Temperature, and Isotopic Abundance in Molecular Gas around ζ Ophiuchi. *Harvey S. Liszt.* 414, 242, 173-A10 (1993)

What Is New about the New Comet Yanaka (1988r)? *J. Mayo Greenberg, P. D. Singh, & A. A. de Almeida.* 414, L45, 175-G7 (1993)

Infrared Frequencies and Intensities for Astrophysically Important Polycyclic Aromatic Hydrocarbon Cations. *Jan Szczepanski & Martin Vala.* 414, 646, 179-C4 (1993)

Rotational Frequencies of Transition Metal Hydrides for Astrophysical Searches in the Far-Infrared. *John M. Brown, Stuart P. Beaton, & Kenneth M. Evenson.* 414, L125, 186-C6 (1993)

The Millimeter-Wave Spectrum of AlOH. *A. J. Apponi, W. L. Barclay, Jr., & L. M. Ziurys.* 414, L129, 186-C11 (1993)

Detection of Interstellar $^{12}C^{15}N$. *A. H. Saleck, R. Simon, N. Schneider, & G. Winnewisser.* 414, L133, 186-D3 (1993)

Formaldehyde Emission in Galaxies. *Willem A. Baan, Aubrey D. Haschick, & Robert Uglesich.* 415, 140, 186-G1 (1993)

Theoretical Modeling of the Infrared Fluorescence from Interstellar Polycyclic Aromatic Hydrocarbons. *W. A. Schutte, A. G. G. M. Tielens, & L. J. Allamandola.* 415, 397, 189-G12 (1993)

The C^0/CO Ratio Problem: A Possible New Precision Test of the Decaying Neutrino Theory. *D. W. Sciama.* 415, L31, 192-A8 (1993)

The Detection of [C I] in Molecular Outflows Associated with Young Stellar Objects. *Christopher K. Walker, Gopal Narayanan, Thomas H. Büttgenbach, John E. Carlstrom, Jocelyn Keene, & T. G. Phillips.* 415, 672, 196-B10 (1993)

CO Emission in the Radio-loud Quasar 3C 48. *N. Z. Scoville, S. Padin, D. B. Sanders, B. T. Soifer, & M. S. Yun.* 415, L75, 199-E7 (1993)

Ab Initio Rotational Constants of Isocyanopolyynes. *Arturo Arnau, Estanislao Silla, & Iñaki Tuñón.* 415, L151, 200-G8 (1993)

^{13}CO and $C^{18}O$ Maps of *N*-Body Magnetohydrodynamic Simulations of Dark Clouds. *Lars G. Stenholm & Ralph E. Pudritz.* 416, 218, 203-F13 (1993)

An *IRAS* Sample from Co-added Images of L1641. *H. Chen, A. T. Tokunaga, & Y. Fukui.* 416, 235, 204-A4 (1993)

Refrigeration of the 18.3 GHz C_3H_2 Transition in Dark Cloud G1.6−0.25. *T. B. H. Kuiper, J. B. Whiteoak, R.-S. Peng, W. L. Peters III, & J. E. Reynolds.* 416, L33, 207-E7 (1993)

Detection of the Interstellar NH_2 Radical. *Ewine F. van Dishoeck, David J. Jansen, Peter Schilke, & T. G. Phillips.* 416, L83, 216-E10 (1993)

Bistability in Dark Cloud Chemistry. *J. Le Bourlot, G. Pineau des Forêts, E. Roueff, & P. Schilke.* 416, L87, 216-F1 (1993)

Photometric and Spectroscopic Analysis of High Galactic Latitude Molecular Clouds. II. High-Resolution Spectroscopic Observations of Na I, Ca II, Ca I, CH, and CH^+. *B. E. Penprase.* 88, 433, 46-B13 (1993)

Calculations Concerning Interstellar Isomeric Abundance Ratios for C_3H and C_3H_2. *Sergio A. Maluendes, A. D. McLean, & Eric Herbst.* 417, 181, 219-F3 (1993)

Collapse of Magnetized Molecular Cloud Cores. I. Semianalytical Solution. *Daniele Galli & Frank H. Shu.* 417, 220, 220-C1 (1993)

Collapse of Magnetized Molecular Cloud Cores. II. Numerical Results. *Daniele Galli & Frank H. Shu.* 417, 243, 220-D13 (1993)

The Location of Warm HC_3N and Warm HC_5N Gas in the Circumstellar Envelope of IRC +10216. *M. B. Bell.* 417, 305, 221-C9 (1993)

C_3S and C_5S in IRC +10216. *M. B. Bell, L. W. Avery, & P. A. Feldman.* 417, L37, 223-C1 (1993)

Origin of the Hydrocarbon Component of Carbonaceous Chondrites: The Star-Meteorite Connection. *Wei Lee & Thomas J. Wdowiak.* 417, L49, 223-D8 (1993)

New VLA Observations of NH_3 in S140. *Shudong Zhou, Neal J. Evans II, Lee G. Mundy, & Marc L. Kutner.* 417, 613, 227-A7 (1993)

Extremely High Velocity Outflows. *Minho Choi, Neal J. Evans II, & Daniel T. Jaffe.* 417, 624, 227-B6 (1993)

High-Resolution Centimeter Radio Continuum and Ammonia Maser Observations of the W51 Region of Star Formation. *R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 417, 645, 227-D1 (1993)

Ammonia Emission Downstream of the Herbig-Haro Object 1. *J. M. Torrelles, J. F. Gómez, P. T. P. Ho, G. Anglada, L. F. Rodríguez, & J. Cantó.* 417, 655, 227-D13 (1993)

CO Emission from Molecular Clouds in the Central Region of M31. *Yoshiaki Sofue & Shigeomi Yoshida.* 417, L63, 230-B12 (1993)

VLA Radio Recombination Line Observations of Ionized Gas in the -30 Kilometers per Second Molecular Cloud (G0.04+0.03) near the Galactic Center. I. The Discrete Radio Sources. *Jun-Hui Zhao, K. Desai, W. M. Goss, & F. Yusef-Zadeh.* 418, 235, 234-A1 (1993)

Deuterated Ammonia in Sagittarius B2. *Y. Peng, S. N. Vogel, & J. E. Carlstrom.* 418, 255, 234-C1 (1993)

Radiative Cooling of Warm Molecular Gas. *David A. Neufeld & Michael J. Kaufman.* 418, 263, 234-C11 (1993)

Thermal Material in Dense Cores: A New Narrow-Line Probe and Technique of Temperature Determination. *G. A. Fuller & P. C. Myers.* 418, 273, 234-D9 (1993)

The Langevin Equation and Its Application to Grain Alignment in Molecular Clouds. *W. G. Roberge, T. A. DeGraff, & J. E. Flaherty.* 418, 287, 234-E11 (1993)

New Observations of the Optical Spectrum of SiO^+ and the Prediction of Its Rotational Spectrum. *L. Zhang, R. Cameron, R. A. Holt, T. J. Scholl, & S. D. Rosner.* 418, 307, 234-G5 (1993)

The L1448 Molecular Jet. *John Bally, Elizabeth A. Lada, & Adair P. Lane.* 418, 322, 235-A10 (1993)

Formaldehyde as a Probe of Physical Conditions in Dense Molecular Clouds. *Jeffrey G. Mangum & Alwyn Wootten.* 89, 123, 50-E5 (1993)

The Spectrum of Orion-KL at 2 Millimeters (150–160 GHz). *L. M. Ziurys & Douglas McGonagle.* 89, 155, 50-G13 (1993)

A Complete CO Survey of M31. I. Distribution and Kinematics. *T. M. Dame, E. Koper, F. P. Israel, & P. Thaddeus.* 418, 730, 241-E8 (1993)

Molecular Hydrogen in the IRAS 03282+3035 Stellar Jet. *John Bally, David Devine, Mark Hereld, & Bernard J. Rauscher.* 418, L75, 245-D7 (1993)

The [C II] 158 Micron Emission from the Horsehead Nebula. *S. Zhou, D. T. Jaffe, J. E. Howe, N. Geis, F. Herrmann, S. C. Madden, A. Poglitsch, & G. J. Stacey.* 419, 190, 248-E3 (1993)

Evolution in Dust Lane Ellipticals: Detection of Accreted Molecular Gas. *Leslie J. Sage & Giuseppe Galletta.* 419, 544, 254-E5 (1993)

Circumstellar CO Emission of Evolved Stars and Mass Loss. *John Kwan & Zoe Webster.* 419, 674, 256-B3 (1993)

On the System of Diffuse Interstellar Bands at 5844 and 5850 Å. *J. Krełowski, Theodore P. Snow, J. Papaj, C. G. Seab, & B. Wszolek.* 419, 692, 256-C9 (1993)

Structure of Dense Cores in M17 SW. I. A Multitransition CS and $C^{34}S$ Study. *Yangsheng Wang, Daniel T. Jaffe, Neal J. Evans II, Masahiko Hayashi, Ken'ichi Tatematsu, & Shudong Zhou.* 419, 707, 256-D12 (1993)

Molecular Cloud Core and CS Outflow Associated with Haro 4-255 FIR. *Ken'ichi Tatematsu, Tomofumi Umemoto, Yasuhiro Murata, Hua Chen, Naomi Hirano, & Hiroshi Takaba.* 419, 746, 257-A1 (1993)

Detection of the Carbon Monoxide Ion (CO^+) in the Interstellar Medium and a Planetary Nebula. *William B. Latter, Christopher K. Walker, & Philip R. Maloney.* 419, L97, 259-F14 (1993)

Detection of AU-Scale Structure in Molecular Clouds. *Alan P. Marscher, E. M. Moore, & Thomas M. Bania.* 419, L101, 259-G5 (1993)

Size Effects on Dissociation Rates of Polycyclic Aromatic Hydrocarbon Cations: Laboratory Studies and Astrophysical Implications. *H. W. Jochims, E. Rühl, H. Baumgärtel, S. Tobita, & S. Leach.* 420, 307, 4-F6 (1994)

Sequential Star Formation in Taurus Molecular Cloud 1. *Tomoyuki Hanawa, Satoshi Yamamoto, & Yasuhiro Hirahara.* 420, 318, 4-G5 (1994)

The Physics and Chemistry of Small Molecular Clouds in the Galactic Plane. I. Physical Conditions from $C^{18}O$ and ^{13}CO Observations. *B. E. Turner.* 420, 661, 11-A1 (1994)

Fabry-Perot Imaging of Molecular Hydrogen Emission in Orion-KL Region. *Hajime Sugai, Tomonori Usuda, Hirokazu Kataza, Masuo Tanaka, Motoko Y. Inoue, Hironobu Kawabata, Hideki Takami, Tetsuo Aoki, & Norihisa Hiromoto.* 420, 746, 12-B12 (1994)

Interstellar Carbon Monoxide toward ζ Ophiuchi. *David L. Lambert, Yaron Sheffer, Ronald L. Gilliland, & S. R. Federman.* 420, 756, 12-C10 (1994)

The Production of Condensed Phase CO in Quiescent Molecular Clouds. *P. Caselli, T. I. Hasegawa, & Eric Herbst.* 421, 206, 18-E5 (1994)

Constraining the Influence of Star Formation on the Lowest ^{12}CO Line Ratios in M33. *Michele D. Thornley & Christine D. Wilson.* 421, 458, 23-G9 (1994)

AFGL 5376: A Strong, Large-Scale Shock near the Galactic Center. *Keven I. Uchida, Mark R. Morris, E. Serabyn, & John Bally.* 421, 505, 24-D9 (1994)

High-Resolution Images of Shocked Molecular Clumps in the Supernova Remnant IC 443. *Jan A. Tauber, Ronald L. Snell, Robert L. Dickman, & L. M. Ziurys.* 421, 570, 25-C4 (1994)

The Bipolar Symmetry of Ring-like Planetary Nebulae: Molecular Hydrogen Emission from Halos. *Joel H. Kastner, Ian Gatley, K. M. Merrill, R. Probst, & David A. Weintraub.* 421, 600, 25-F2 (1994)

Composition and Radiative Properties of Grains in Molecular Clouds and Accretion Disks. *James B. Pollack, David Hollenbach, Steven Beckwith, Damon P. Simonelli, Ted Roush, & Wesley Fong.* 421, 615, 26-A1 (1994)

Molecular Clouds in the Extreme Outer Galaxy. *S. Digel, E. de Geus, & P. Thaddeus.* 422, 92, 31-B13 (1994)

Anatomy of a Photodissociation Region: High Angular Resolution Images of Molecular Emission in the Orion Bar. *Jan A. Tauber, A. G. G. M. Tielens, Margaret Meixner, & Paul F. Goldsmith.* 422, 136, 31-F13 (1994)

Nitrogen Sulfide in Quiescent Dark Clouds. *Douglas McGonagle, William M. Irvine, & Masatoshi Ohishi.* 422, 621, 39-E8 (1994)

Maps of GHz Methyl Cyanide Emission in Orion-KL. *D. J. Wilner, M. C. H. Wright, & R. L. Plambeck.* 422, 642, 39-G7 (1994)

The Rotating Molecular Core in G10.6−0.4: Synthesis Maps in $^{12}C^{18}O$. *Paul T. P. Ho, Susan Terebey, & Jean L. Turner.* 423, 320, 50-B1 (1994)

Spectral Imaging of the Orion Bar at 3.3, 8.4, and 11.3 Microns: Comparison with a Fluorescent Polycyclic Aromatic Hydrocarbon Model. *Jesse Bregman, Kristen Larson, David Rank, & Pasquale Temi.* 423, 326, 50-B10 (1994)

Comparative Analysis of the Far-Infrared and ^{13}CO (J = 0–1) Emissions of the Taurus Complex. *Alain Abergel, François Boulanger, Akira Mizuno, & Yasuo Fukui.* 423, L59, 54-A3 (1994)

Infrared Spectroscopy and Imaging Polarimetry of the Disk around the T Tauri Star RNO 91. *David A. Weintraub, Stephen C. Tegler, Joel H. Kastner, & Terrence Rettig.* 423, 674, 57-A3 (1994)

Circumstellar Gas around the Exciting Source of the HH 83 Jet. *Makoto Nakano, Koji Sugitani, Fumio Sato, & Katsuo Ogura.* 423, L147, 61-D5 (1994)

Structure and Chemistry in the Northwestern Condensation of the Serpens Molecular Cloud Core. *Joseph P. McMullin, Lee G. Mundy, Bruce A. Wilking, T. Hezel, & Geoff A. Blake.* 424, 222, 64-F1 (1994)

The Millimeter-Wave Spectrum of the CaF Radical ($X\ ^2\Sigma^+$). *M. A. Anderson, M. D. Allen, & L. M. Ziurys.* 424, 503, 68-A13 (1994)

The H_2O Masers in IC 10SE. *Willem A. Baan & Aubrey Haschick.* 424, L33, 69-E1 (1994)

The Formation of Stellar Groups and Clusters in Molecular Cloud Cores. *Kanan Patel & Ralph E. Pudritz.* 424, 688, 73-D7 (1994)

CH^+ in the Interstellar Medium. *M. Marsha Allen.* 424, 754, 74-B11 (1994)

On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. III. Molecular Gas. *Miguel H. Ibáñez S., & Antonio Parravano.* 424, 763, 74-C8 (1994)

Chemical Transitions for Interstellar C_2 and CN in Cloud Envelopes. *S. R. Federman, C. J. Strom, D. L. Lambert, Jason A. Cardelli, V. V. Smith, & C. L. Joseph.* 424, 772, 74-D7 (1994)

Molecular Outflows from FU Orionis Stars. *Neal J. Evans II, Stephen Balkum, Russell M. Levreault, Lee Hartmann, & Scott Kenyon.* 424, 793, 74-F2 (1994)

The Source of the Relativistic Particles in the Galactic Center Arc. *E. Serabyn & Mark Morris.* 424, L91, 79-A1 (1994)

Shock-excited Maser Emission from the Supernova Remnant W28. *D. A. Frail, W. M. Goss, & V. I. Slysh.* 424, L111, 79-C8 (1994)

High-Resolution Measurements of NH_3 Absorption toward Cassiopeia A. *R. A. Gaume, T. L. Wilson, & K. J. Johnston.* 425, 127, 81-G1 (1994)

Evidence for HCO^+ Infall toward T Tauri? *Huib Jan van Langevelde, Ewine F. van Dishoeck, & Geoffrey A. Blake.* 425, L45, 85-F11 (1994)

Observations of Large-Scale [C I] Emission from S140. *René Plume. D. T. Jaffe, & Jocelyn Keene.* 425, L49, 85-G3 (1994)

Millimeter and Submillimeter Rest Frequencies for the MgF Radical. *M. A. Anderson, M. D. Allen, & L. M. Ziurys.* 425, L53, 85-G9 (1994)

A Large Area CO(J = 2–1) Mapping of the Giant Molecular Clouds in Orion. *Seiichi Sakamoto, Masahiko Hayashi, Tetsuo Hasegawa, Toshihiro Handa, & Tomoharu Oka.* 425, 641, 89-E10 (1994)

The Massive Molecular Outflow from CRL 2136 IRS 1. *Joel H. Kastner, David A. Weintraub, Ronald L. Snell, G. Sandell, C. Aspin, D. H. Hughes, & F. Baas.* 425, 695, 90-C9 (1994)

Submillimeter Observations of CO in the W3 Core. *Tatsuhiko I. Hasegawa, George F. Mitchell, Henry E. Matthews, & Linda Tacconi.* 426, 215, 98-G1 (1994)

A $C^{18}O$ (J = 1–0) Survey of Protostellar Candidates Embedded in the Taurus Molecular Cloud. *Masahiko Hayashi, Tetsuo Hasegawa, Nagayoshi Ohashi, & Kazuyoshi Sunada.* 426, 234, 99-A8 (1994)

Solid Carbon Monoxide in the Serpens Dark Cloud. *J. E. Chiar, A. J. Adamson, T. H. Kerr, & D. C. B. Whittet.* 426, 240, 99-B2 (1994)

General Analytic Results for Nonlinear Waves and Solitons in Molecular Clouds. *Fred C. Adams, Marco Fatuzzo, & Richard Watkins.* 426, 629, 106-C5 (1994)

Submillimeter Molecular Line Observations of IRC +10216: Searches for MgH, SiH_2, and HCO^+, and Detection of Hot HCN. *L. W. Avery, M. B. Bell, C. T. Cunningham, P. A. Feldman, R. H. Hayward, J. M. McLeod, H. E. Matthews, & J. D. Wade.* 426, 737, 107-E12 (1994)

Detection of Sodium Cyanide (NaCN) in IRC 10216. *B. E. Turner, T. C. Steimle, & Leo Meerts.* 426, L97, 109-F13 (1994)

Molecular Lines in Bok Globules and around Herbig Ae/Be Stars. *F. Scappini, G. G. C. Palumbo, G. Bruni, & P. Bergman.* 427, 259, 113-B12 (1994)

Detection of a New Interstellar Molecule, H_2CN. *Masatoshi Ohishi, Douglas McGonagle, William M. Irvine, Satoshi Yamamoto, & Shuji Saito.* 427, L51, 117-G5 (1994)

Accurate Determination of Predissociation Rates and Transition Frequencies for Carbon Monoxide. *W. Ubachs, K. S. E. Eikema, P. F. Levelt, W. Hogervorst, M. Drabbels, W. L. Meerts, & J. J. ter Meulen.* 427, L55, 117-G10 (1994)

Outflows from Young Stellar Objects in Bok Globules: Maps. *João Lin Yun & Dan P. Clemens.* 92, 145, 33-C5 (1994)

A Study of Molecular Gas in the Center of the S0 Galaxy NGC 4710. *G. A. Welch & G. F. Mitchell.* 427, 770, 122-C3 (1994)

The Photoelectric Heating Mechanism for Very Small Graphitic Grains and Polycyclic Aromatic Hydrocarbons. *E. L. O. Bakes & A. G. G. M. Tielens.* 427, 822, 122-G8 (1994)

Dense Molecular Shocks and Accretion onto Protostellar Disks. *David A. Neufeld & David J. Hollenbach.* 428, 170, 130-C11 (1994)

CS Multitransitional Study of Density Distribution in Star-forming Regions. II. The S140 Region. *Shudong Zhou, Harold M. Butner, Neal J. Evans II, Rolf Güsten, Marc L. Kutner, & Lee G. Mundy.* 428, 219, 130-G10 (1994)

Multiple Outflows in the Bipolar Planetary Nebula M1-16: A Molecular Line Study. *Raghvendra Sahai, Alwyn Wootten, Hugo E. Schwarz, & W. Wild.* 428, 237, 131-B5 (1994)

Discovery of $^{14}NH_3$(3, 3) Maser Emission in the Interstellar Medium. *Jeffrey G. Mangum & Alwyn Wootten.* 428, L33, 134-E8 (1994)

Large-Scale Characteristics of Interstellar Dust from *COBE* DIRBE Observations. *T. J. Sodroski, C. Bennett, N. Boggess, E. Dwek, B. A. Franz, M. G. Hauser, T. Kelsall, S. H. Moseley, N. Odegard, R. F. Silverberg, & J. L. Weiland.* 428, 638, 138-C1 (1994)

Molecular Abundances and Low-Mass Star Formation. I. Si- and S-bearing Species toward IRAS 16293−2422. *Geoffrey A. Blake, Ewine F. van Dishoeck, David J. Jansen, T. D. Groesbeck, & Lee G. Mundy.* 428, 680, 138-F13 (1994)

Detection of Absorption by H_2 in Molecular Clouds: A Direct Measurement of the H_2:CO Ratio. *J. H. Lacy, R. Knacke, T. R. Geballe, & A. T. Tokunaga.* 428, L69, 142-G1 (1994)

Infrared Spectra of Crystalline Phase Ices Condensed on Silicate Smokes at $T < 20$ K. *Marla H. Moore, Robert F. Ferrante, Reggie L. Hudson, Joseph A. Nuth III, & Bertram Donn.* 428, L81, 143-A7 (1994)

Is the Galactic Center Annihilator 1E 1740.7−2942 a Source of MeV Gamma-Ray Continuum Emission? *Philippe Laurent & Jacques Paul.* 92, 375, 36-G5 (1994)

A Multiwavelength Study of IRAS 19550+3248: A Protostar Possibly Formed by a Cloud-Cloud Collision. *Bon-Chul Koo, Youngung Lee, G. A. Fuller, Myung Gyoon Lee, Suk-Minn Kwon, & Jae-Hoon Jung.* 429, 233, 147-A7 (1994)

Physical Structure of H_2O Masers in W49N. *C. R. Gwinn.* 429, 253, 147-C3 (1994)

The Millimeter and Submillimeter Rotational Spectrum of the MgCN Radical ($X\ ^2\Sigma^+$). *M. A. Anderson, T. C. Steimle, & L. M. Ziurys.* 429, L41, 150-F1 (1994)

Survey of Local CO Emission toward Compact Extragalactic Millimeter-Wave Continuum Sources and Implications for Local Galactic Structure. *Harvey S. Liszt.* 429, 638, 153-F3 (1994)

Statistical Analysis of Turbulence in Molecular Clouds. *Mark S. Miesch & John Bally.* 429, 645, 153-F13 (1994)

Atomic and Molecular Gas in Interstellar Cirrus Clouds. *William T. Reach, Bon-Chul Koo, & Carl Heiles.* 429, 672, 154-B1 (1994)

Dust Extinction and Molecular Gas in the Dark Cloud IC 5146. *Charles J. Lada, Elizabeth A. Lada, Dan P. Clemens, & John Bally.* 429, 694, 154-C11 (1994)

High-Resolution Observations of a New Ammonia Maser Line in G9.62+0.19. *P. Hofner, S. Kurtz, E. Churchwell, C. M. Walmsley, & R. Cesaroni.* 429, L85, 158-D1 (1994)

Electric Dipole Moment of C_3S. *R. D. Suenram & F. J. Lovas.* 429, L89, 158-D7 (1994)

Overtone Emission from Interstellar Polycyclic Aromatic Hydrocarbons. *W. W. Duley.* 429, L91, 158-D11 (1994)

The Giant Molecular Cloud Monoceros R2. I. Shell Structure. *Taoling Xie & Paul F. Goldsmith.* 430, 252, 162-B13 (1994)

The Molecular Gas Associated with the Orion Bright Bar. *Toshihiro Omodaka, Masahiko Hayashi, Tetsuo Hasegawa, & Saeko S. Hayashi.* 430, 256, 162-C7 (1994)

Evolution of Macromolecular Dust: Far-Ultraviolet Spectral Dust Extinction and Gas Absorption of Stellar Light as Measured with the Hopkins Ultraviolet Telescope. *Richard H. Buss, Jr., Marsha Allen, Stephan McCandliss, Jeffrey Kruk, Ji-Cheng Liu, & Tom Brown.* 430, 630, 169-F5 (1994)

High Rydberg State Carbon Recombination Lines toward Cassiopeia A: 332 MHz VLA Observations and Comparison with H I and Molecular Lines. *K. R. Anantharamaiah, W. C. Erickson, H. E. Payne, & Nimisha G. Kantharia.* 430, 682, 170-C11 (1994)

New Detections of Interstellar HNO at 2 and 1.2 Millimeters: More N–O Bonds. *L. M. Ziurys, J. M. Hollis, & L. E. Snyder.* 430, 706, 170-E11 (1994)

Interstellar SO^+. *B. E. Turner.* 430, 727, 170-G9 (1994)

Shocked Pure-rotational Emission from H_2 in Orion. *Parvinder S. Parmar, John H. Lacy, & Jeffrey M. Achtermann.* 430, 786, 171-F3 (1994)

The Molecular Content of the Rosette's Teardrops. *E. González-Alfonso & J. Cernicharo.* 430, L125, 175-A7 (1994)

Detection of Formaldehyde Maser Emission near the Ultracompact H II Region G29.96–0.02. *Preethi Pratap, Karl M. Menten, & Lewis E. Snyder.* 430, L129, 175-A13 (1994)

A Comparison of CO ($J = 1 \rightarrow 0$) and CO ($J = 2 \rightarrow 1$) Emission in the Milky Way Molecular Ring. *Jean E. Chiar, Marc L. Kutner, Frances Verter, & James Leous.* 431, 658, 186-F13 (1994)

CH_3C_2H as a Temperature Probe in Dense Giant Molecular Cloud Cores. *Edwin A. Bergin, Paul F. Goldsmith, Ronald L. Snell, & Hans Ungerechts.* 431, 674, 187-A3 (1994)

Scattered Halos around H_2O Masers. *C. R. Gwinn.* 431, L123, 192-B7 (1994)

A Millimeter-Wave Study and Astronomical Search for the HCCCS Radical. *M. C. McCarthy, J. M. Vrtilek, E. W. Gottlieb, F.-M. Tao, C. A. Gottlieb, & P. Thaddeus.* 431, L127, 192-B13 (1994)

3 Millimeter $J = 1$–0 HCO^+ Emission from the Diffuse Cloud toward ζ Ophiuchi. *Harvey S. Liszt & Robert Lucas.* 431, L131, 192-C5 (1994)

Interpretation of the 4141 Inverse Centimeters (2.415 Microns) Interstellar Infrared Absorption Feature. *V. Buch & J. P. Devlin.* 431, L135, 192-C11 (1994)

Atomic Carbon in the High-Latitude Molecular Cloud MBM 12. *James G. Ingalls, T. M. Bania, & James M. Jackson.* 431, L139, 192-D4 (1994)

High-Resolution Oscillator Strength Measurements for the $A(v')$–$X(0)$ Bands of Carbon Monoxide with $11 \leq v' \leq 14$. *Peter L. Smith, G. Stark, K. Yoshino, & K. Ito.* 431, L143, 192-D11 (1994)

Highly Unsaturated Hydrocarbons as Potential Carriers of Some Diffuse Interstellar Bands. *P. Freivogel, J. Fulara, & J. P. Maier.* 431, L151, 192-E7 (1994)

Diffuse Molecular Clouds and the Molecular Interstellar Medium from ^{13}CO Observations of M33. *Christine D. Wilson & Constance E. Walker.* 432, 148, 195-A13 (1994)

Excitation of Interstellar Hydrogen Chloride. *David A. Neufeld & Sheldon Green.* 432, 158, 195-B11 (1994)

The Cold, Massive Molecular Cloud G216–2.5. II. Structure and Kinematics. *Youngung Lee, Ronald L. Snell, & Robert L. Dickman.* 432, 167, 195-C8 (1994)

The C_4H Radical and the Diffuse Interstellar Bands: An Ab Initio Study. *M. Kolbuszewski.* 432, L63, 200-A13 (1994)

Shock Propagation and the Generation of Magnetohydrodynamic Wave Fields in Inhomogeneous Molecular Clouds. *Mark S. Miesch & Ellen G. Zweibel.* 432, 622, 203-F9 (1994)

Intersystem Transitions of Interstellar Carbon Monoxide toward ζ Ophiuchi. *S. R. Federman, Jason A. Cardelli, Yaron Sheffer, David L. Lambert, & D. C. Morton.* 432, L139, 207-D5 (1994)

Dense Cores in Dark Clouds. IX. Observations of ^{13}CO and $C^{18}O$ in Vela, Chamaeleon, Musca, and the Coalsack. *J. W. S. Vilas-Boas, P. C. Myers, & G. A. Fuller.* 433, 96, 209-D11 (1994)

Dense Cores in Dark Clouds. X. Ammonia Emission in the Perseus Molecular Cloud Complex. *E. F. Ladd, P. C. Myers, & A. A. Goodman.* 433, 117, 209-F10 (1994)

A $C^{18}O$ Survey of Dense Cores in the Taurus Molecular Cloud: Signatures of Evolution and Protostellar Collapse. *Shudong Zhou, Neal J. Evans II, Yangsheng Wang, Ruisheng Peng, & K. Y. Lo.* 433, 131, 209-G12 (1994)

Far-Ultraviolet Emission from the Taurus Molecular Cloud. *M. Hurwitz.* 433, 149, 210-B4 (1994)

The 3.2–3.6 Micron Spectra of Monoceros R2/IRS-3 and Elias 16. *K. Sellgren, R. G. Smith, & T. Y. Brooke.* 433, 179, 210-E5 (1994)

A Search for Dense Gas in Quiescent Bok Globules. *Brian D. Kane, Dan P. Clemens, & Philip C. Myers.* 433, L49, 215-C9 (1994)

The Vertical Equilibrium of Molecular Gas in the Galactic Disk. *Sangeeta Malhotra.* 433, 687, 219-E10 (1994)

Simulation of Variations of Absorption-Line Profiles in Clumpy Molecular Clouds. *Alan P. Marscher & Alan L. Stone.* 433, 705, 219-G2 (1994)

On the Analysis of Para-Ammonia Observations. *T. B. H. Kuiper.* 433, 712, 219-G11 (1994)

Pump Cycles and Population Flow Networks in Astrophysical Masers: An Application to Class II Methanol Masers with Different Saturation Degrees. *A. M. Sobolev & S. Deguchi.* 433, 719, 220-A6 (1994)

The Association of High-Latitude Molecular Clouds with H I Gas. *Be-Young Gir, Leo Blitz, & Loris Magnani.* 434, 162, 227-C13 (1994)

Vibrational Excitation in the Products of Electron-Ion Recombination: A Test of Theory for Ions of Interstellar Significance. *Nigel G. Adams & Lucia M. Babcock.* 434, 184, 228-A1 (1994)

Collisional Excitation of Interstellar Sulfur Monoxide. *Sheldon Green.* 434, 188, 228-A8 (1994)

New Formaldehyde Masers in Sagittarius B2. *David M. Mehringer, W. M. Goss, & Patrick Palmer.* 434, 237, 228-F6 (1994)

First Observations of Individual Molecular Clouds in the Irregular Galaxy NGC 6822. *Christine D. Wilson.* 434, L11, 232-C1 (1994)

Detection of the Overtone of the 3.3 Micron Emission Feature in IRAS 21282+5050. *T. R. Geballe, C. Joblin, L. B. d'Hendecourt, M. Jourdain de Muizon, A. G. G. M. Tielens, & A. Léger.* 434, L15, 232-C8 (1994)

Morphology of the Interstellar Cooling Lines Detected by *COBE*. *C. L. Bennett, D. J. Fixsen, G. Hinshaw, J. C. Mather, S. H. Moseley, E. L. Wright, R. E. Eplee, Jr., J. Gales, T. Hewagama, R. B. Isaacman, R. A. Shafer, & K. Turpie.* 434, 587, 235-G13 (1994)

A K' Imaging Survey of Molecular Outflow Sources. *Klaus-Werner Hodapp.* 94, 615, 60-D12 (1994)

Three Millimeter Molecular Line Observations in Sagittarius B2. I. Full Synthesis Mapping Study of HNO, CCS, and $HC^{13}CCN$. *Yi-Jehng Kuan & Lewis E. Snyder.* 94, 651, 61-A8 (1994)

A New Look at the Dark Cloud L1251: Sensitive Observations of the Molecular Emission. *Fumio Sato, Akira Mizuno, Tomoo Nagahama, Toshikazu Onishi, Yoshinori Yonekura, & Yasuo Fukui.* 435, 279, 247-B11 (1994)

The Puzzling Distribution of the High-Density Molecular Gas in HH 1–2: A Contracting Interstellar Toroid? *José M. Torrelles, José F. Gómez, Paul T. P. Ho, Luis F. Rodríguez, Guillem Anglada, & Jorge Cantó.* 435, 290, 247-D2 (1994)

Formal Results Regarding Metric Space Techniques for the Study of Astrophysical Maps. *Fred C. Adams & Jennifer J. Wiseman.* 435, 693, 255-E12 (1994)

A Quantitative Analysis of *IRAS* Maps of Molecular Clouds. *Jennifer J. Wiseman & Fred C. Adams.* 435, 708, 255-G3 (1994)

A Massive Young Embedded Object Associated with the UC H II Region G31.41+0.31. *R. Cesaroni, L. Olmi, C. M. Walmsley, E. Churchwell, & P. Hofner.* 435, L137, 260-C3 (1994)

Ammonia Downstream from HH 80 North. *José M. Girart, Luis F. Rodríguez, Guillem Anglada, Robert Estalella, José M. Torrelles, Josep Martí, Miriam Peña, Sandra Ayala, Salvador Curiel, & Alberto Noriega-Crespo.* 435, L145, 260-D4 (1994)

Interstellar CN Rotational Spectra: $^{12}C^{15}N$. *A. H. Saleck, R. Simon, & G. Winnewisser.* 436, 176, 263-E11 (1994)

Ultraviolet-illuminated Molecular Cloud Boundaries: Extended [C II] 158 Micron Emission toward L1630. *D. T. Jaffe, S. Zhou, J. E. Howe, F. Herrmann, S. C. Madden, A. Poglitsch, P. P. van der Werf, & G. J. Stacey.* 436, 203, 264-A10 (1994)

A Compilation of Electronic Transitions in the CO Molecule and the Interpretation of Some Puzzling Interstellar Absorption Features. *Donald C. Morton & Louis Noreau.* 95, 301, 67-F11 (1994)

High-Velocity Sulfur Monoxide Emission from Protostellar Outflows. *Lawrence M. Chernin, Colin R. Masson, & Gary A. Fuller.* 436, 741, 275-F3 (1994)

The Molecular Core and the Powering Source of the Bipolar Molecular Outflow in NGC 2264G. *José F. Gómez, Salvador Curiel, José M. Torrelles, Luis F. Rodríguez, Guillem Anglada, & José M. Girart.* 436, 749, 275-G1 (1994)

Possible Detection of ^{14}CO in the Carbon Star IRC +10216. *Gregory A. Wright.* 436, L157, 281-F1 (1994)

Detection of a Thick Molecular Disk in the Galaxy. *T. M. Dame & P. Thaddeus.* 436, L173, 282-A3 (1994)

Detection of Interstellar N_2O: A New Molecule Containing an N–O Bond. *L. M. Ziurys, A. J. Apponi, J. M. Hollis, & L. E. Snyder.* 436, L181, 282-B7 (1994)

H_2 Emission as a Tracer of Molecular Hydrogen: Large-Scale Observations of Orion. *M. L. Luhman, D. T. Jaffe, L. D. Keller, & Soojong Pak.* 436, L185, 282-C1 (1994)

Discovery of a Molecular Hydrogen Jet near IC 348. *Mark J. McCaughrean, John T. Rayner, & Hans Zinnecker.* 436, L189, 282-C9 (1994)

High Altitude Molecular Clouds. *Sangeeta Malhotra.* 437, 194, 285-G8 (1994)

Modeling Radiative Transfer in Molecular Clouds. I. HCO^+ in the Star-forming Region W49A North. *Hélène R. Dickel & Lawrence H. Auer.* 437, 222, 286-C4 (1994)

The Near-Infrared Structure and Spectra of the Bipolar Nebulae M2-9 and AFGL 2688: The Role of Ultraviolet Pumping and Shocks in Molecular Hydrogen Excitation. *Joseph L. Hora & William B. Latter.* 437, 281, 287-A8 (1994)

Shocked Molecular Gas around the Extremely Young Source IRAS 03282+3035. *R. Bachiller, S. Terebey, T. Jarrett, J. Martín-Pintado, C. A. Beichman, & D. Van Buren.* 437, 296, 287-C2 (1994)

The Physics and Chemistry of Small Molecular Clouds in the Galactic Plane. II. H_2CO. *B. E. Turner.* 437, 658, 294-G12 (1994)

Homologous Series of Diffuse Interstellar Bands. *James K. G. Watson.* 437, 678, 295-B1 (1994)

The Discovery of Five New H_2O Megamasers in Active Galaxies. *J. A. Braatz, A. S. Wilson, & C. Henkel.* 437, L99, 299-A8 (1994)

Molecular Clouds in Cygnus. I. A Large-Scale ^{13}CO Survey. *Kazuhito Dobashi, Jean-Phillipe Bernard, Yoshinori Yonekura, & Yasuo Fukui.* 95, 419, 70-B2 (1994)

IRAS Images of Nearby Dark Clouds. *Douglas O. S. Wood, Philip C. Myers, & Debra A. Daugherty.* 95, 457, 70-E3 (1994)

Single-Sideband Calibration for CO, ^{13}CO, HCN, and CS Lines near 345 GHz. *Yangsheng Wang, Daniel T. Jaffe, Urs U. Graf, & Neal J. Evans II.* 95, 503, 71-C7 (1994)

Detection of C_3N in the Spiral Arm Gas Clouds in the Direction of Cassiopeia A. *M. B. Bell & H. E. Matthews.* 438, 223, 4-D10 (1995)

Confirmation of Interstellar Methylene. *J. M. Hollis, P. R. Jewell, & F. J. Lovas.* 438, 259, 5-A8 (1995)

A Theory for the Initial Mass Function. *Joseph Silk.* 438, L41, 10-C13 (1995)

Submillimeter HCN and HCO^+ Emission from Galaxies. *James M. Jackson, Timothy A. D. Paglione, John E. Carlstrom, & Nguyen-Q- Rieu.* 438, 695, 13-F11 (1995)

Hubble Space Telescope Observations of C_2 Molecules in Diffuse Interstellar Clouds. *David L. Lambert, Yaron Sheffer, & S. R. Federman.* 438, 740, 14-D11 (1995)

Collapse and Fragmentation of Molecular Cloud Cores. II. Collapse Induced by Stellar Shock Waves. *Alan P. Boss.* 439, 224, 24-C7 (1995)

Time-dependent Fluorescent H_2 Emission. *O. Goldshmidt & A. Sternberg.* 439, 256, 24-F3 (1995)

A Multitransitional CO Study of the Cepheus C Cloud Core. *M. H. Heyer & E. F. Ladd.* 439, 269, 24-G10 (1995)

Evidence for Chemical Processing of Precometary Icy Grains in Circumstellar Environments of Pre–Main-Sequence Stars. *Stephen C. Tegler, David A. Weintraub, Terrence W. Rettig, Yvonne J. Pendleton, Douglas C. B. Whittet, & Craig A. Kulesa.* 439, 279, 25-A9 (1995)

Laboratory Detection and Millimeter Spectrum of the MgCCH Radical. *M. A. Anderson & L. M. Ziurys.* 439, L25, 30-B5 (1995)

Equipartition of Energy for Turbulent Astrophysical Fluids: Accounting for the Unseen Energy in Molecular Clouds. *Ellen G. Zweibel & Christopher F. McKee.* 439, 779, 35-C13 (1995)

Turbulent Diffusion and Its Effects on the Chemistry of Molecular Clouds. *Taoling Xie, Mark Allen, & William D. Langer.* 440, 674, 52-E1 (1995)

The Galactic Distribution of Aliphatic Hydrocarbons in the Diffuse Interstellar Medium. *Scott A. Sandford, Yvonne J. Pendleton, & Louis J. Allamandola.* 440, 697, 52-G2 (1995)

HCN Emission from Bright Carbon Stars: The Ground State Masers and Peculiar Broad Features. *Hideyuki Izumiura, Nobuharu Ukita, & Takashi Tsuji.* 440, 728, 53-C1 (1995)

Cyanogen Excitation in Diffuse Interstellar Clouds. *Katherine C. Roth & David M. Meyer.* 441, 129, 61-B7 (1995)

Gas-Phase Chemistry in Dense Interstellar Clouds Including Grain Surface Molecular Depletion and Desorption. *E. A. Bergin, W. D. Langer, & P. F. Goldsmith.* 441, 222, 62-D7 (1995)

Dense Gas in High-Latitude Molecular Clouds. *William T. Reach, Marc W. Pound, David J. Wilner, & Youngung Lee.* 441, 244, 62-F5 (1995)

A Search for Pre–Main-Sequence Stars in High-Latitude Molecular Clouds. III. A Survey of the *Einstein* Database. *Jean-Pierre Caillault, Loris Magnani, & Chris Fryer.* 441, 261, 62-G12 (1995)

EGRET Observations of Gamma-Ray Emission from the Interstellar Gas in Orion. *S. W. Digel, S. D. Hunter, & R. Mukherjee.* 441, 270, 63-A11 (1995)

Hydrogen Chloride in OMC-1. *Peter Schilke, T. G. Phillips, & Ning Wang.* 441, 334, 64-A1 (1995)

An HCO^+ Study of NGC 7538, IRS 9, and GL 490. *Tatsuhiko I. Hasegawa & George F. Mitchell.* 441, 665, 71-B11 (1995)

A Molecular Line Study of NGC 1333/IRAS 4. *Geoffrey A. Blake, Göran Sandell, Ewine F. van Dishoeck, T. D. Groesbeck, Lee G. Mundy, & Colin Aspin.* 441, 689, 71-D13 (1995)

Large HCO^+ and HCN Abundances in the Translucent Cloud toward PKS 0528+134. *Michiel R. Hogerheijde, Eugène J. de Geus, Marco Spaans, Huib Jan van Langevelde, & Ewine F. van Dishoeck.* 441, L93, 76-D4 (1995)

Widespread Molecular Emission in the Galactic Plane from Species Other Than ^{12}CO. *Harvey S. Liszt.* 442, 163, 79-D8 (1995)

On Magnetic Turbulence in Interstellar Clouds. *P. C. Myers & V. K. Khersonsky.* 442, 186, 79-F9 (1995)

The Relationship of Dense Gas to Star Formation in the Monoceros OB1 Dark Cloud. *Grace A. Wolf-Chase, Christopher K. Walker, & Charles J. Lada.* 442, 197, 79-G9 (1995)

3.4 Micron Emission from Ultraviolet Excitation of Alkanes. *G. P. Pinho & W. W. Duley.* 442, L41, 85-C1 (1995)

Detection of a Series of Methanol Maser Lines at 1.9 Millimeter Wavelength. *V. I. Slysh, S. V. Kalenskii, & I. E. Val'tts.* 442, 668, 89-C7 (1995)

Velocity Field of the Orion-KL Region in Molecular Hydrogen Emission. *Hajime Sugai, Hironobu Kawabata, Tomonori Usuda, Motoko Y. Inoue, Hirokazu Kataza, & Masuo Tanaka.* 442, 674, 89-D3 (1995)

H I, CO, and *IRAS* Observations of NGC 7023. *C. Rogers, Mark H. Heyer, & P. E. Dewdney.* 442, 694, 89-F10 (1995)

CO and OH Absorption toward the Low-Latitude Radio Source 2023+336. *Henry A. Kobulnicky, John M. Dickey, & Rachel L. Akeson.* 443, L45, 103-A9 (1995)

The Importance of Classes of Neutral-Neutral Reactions in the Production of Complex Interstellar Molecules. *R. P. A. Bettens, H.-H. Lee, & Eric Herbst.* 443, 664, 107-A12 (1995)

The Molecular Environment of the HH 34 System. *G. Anglada, R. Estalella, R. Mauersberger, J. M. Torrelles, L. F. Rodríguez, J. Cantó, P. T. P. Ho, & P. D'Alessio.* 443, 682, 107-C9 (1995)

A New Desorption Mechanism for Condensed Phase Interstellar CO. *Fedor Dzegilenko & Eric Herbst.* 443, L81, 112-A11 (1995)

The Distribution of Molecules in the Core of OMC-1. *E. C. Sutton, R. Peng, W. C. Danchi, P. A. Jaminet, G. Sandell, & A. P. G. Russell.* 97, 455, 18-E12 (1995)

6 Centimeter Formaldehyde Absorption toward the Sagittarius B Star-forming Complex. *David M. Mehringer, Patrick Palmer, & W. M. Goss.* 97, 497, 19-B1 (1995)

Physical Properties of Molecular Clouds in the Inner Disk of M31. *R. J. Allen, J. Le Bourlot, J. Lequeux, G. Pineau des Forêts, & E. Roueff.* 444, 157, 115-E1 (1995)

The Millimeter/Submillimeter Rotational Spectrum of CaCCH($X\ ^2\Sigma^+$). *M. A. Anderson & L. M. Ziurys.* 444, L57, 122-B1 (1995)

Capture Calculations for the Rates of Important Neutral-Neutral Reactions in Dense Interstellar Clouds: $C + C_2H_2$ and $CN + C_2H_2$. *Qing Liao & Eric Herbst.* 444, 694, 125-G12 (1995)

The Physics and Chemistry of Small Molecular Clouds in the Galactic Plane. III. NH_3. *B. E. Turner.* 444, 708, 126-B4 (1995)

Hopkins Ultraviolet Telescope Observations of H_2 toward the Planetary Nebula NGC 1535. *Charles W. Bowers, William P. Blair, Knox S. Long, & Arthur F. Davidsen.* 444, 748, 126-E11 (1995)

Hydromagnetic Waves and the Linewidth-Size Relation in Interstellar Molecular Clouds. *Telemachos Ch. Mouschovias & Dimitrios Psaltis.* 444, L105, 131-A8 (1995)

Anatomy of the Gemini OB1 Molecular Cloud Complex. *John M. Carpenter, Ronald L. Snell, & F. Peter Schloerb.* 445, 246, 136-A4 (1995)

Vibrationally Excited H_2, HCl, and NO^+ in the Diffuse Clouds toward ζ Ophiuchi. *S. R. Federman, Jason A. Cardelli, Ewine F. van Dishoeck, David L. Lambert, & J. H. Black.* 445, 325, 137-A4 (1995)

Detection of MgCN in IRC +10216: A New Metal-bearing Free Radical. *L. M. Ziurys, A. J. Apponi, M. Guélin, & J. Cernicharo.* 445, L47, 141-A5 (1995)

An Extremely High Velocity Multipolar Outflow around IRAS 20050+2720. *R. Bachiller, A. Fuente, & M. Tafalla.* 445, L51, 141-A13 (1995)

The L1551NE Molecular Outflow. *G. H. Moriarty-Schieven, H. M. Butner, & P. G. Wannier.* 445, L55, 141-B6 (1995)

Complex Molecules in Sagittarius B2(N): The Importance of Grain Chemistry. *Yanti Miao, David M. Mehringer, Yi-Jehng Kuan, & Lewis E. Snyder.* 445, L59, 141-B13 (1995)

Laboratory Millimeter-Wave Spectrum of Chromium Monochloride. *Tomoko Oike, Toshiaki Okabayashi, & Mitsutoshi Tanimoto.* 445, L67, 141-D1 (1995)

The FCRAO Extragalactic CO Survey. I. The Data. *Judith S. Young, Shuding Xie, Linda Tacconi, Pat Knezek, Paul Viscuso, Lowell Tacconi-Garman, Nick Scoville, Steve Schneider, F. Peter Schloerb, Steve Lord, Amy Lesser, Jeff Kenney, Yi-Long Huang, Nick Devereux, Mark Claussen, James Case, John Carpenter, Mike Berry, & Lori Allen.* 98, 219, 23-E3 (1995)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. II. The $4° < |\ b\ | < 5°$ Strips. *H. Izumiura, R. Catchpole, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, K. Sekiguchi, N. Ukita, & I. Yamamura.* 98, 271, 25-E14 (1995)

Collisional Excitation of H_2 Molecules by H Atoms. *S. Lepp, V. Buch, & A. Dalgarno.* 98, 345, 26-E8 (1995)

Microwave Spectrum of the NS Radical in the $^2\Pi_r$ Ground Electronic State. *Sang K. Lee, Hiroyuki Ozeki, & Shuji Saito.* 98, 351, 26-F5 (1995)

Overall Distribution of Dense Molecular Gas and Star Formation in the Taurus Cloud Complex. *A. Mizuno, T. Onishi, Y. Yonekura, T. Nagahama, H. Ogawa, & Y. Fukui.* 445, L161, 152-B7 (1995)

Molecular Oxygen: A New Astrophysical Maser? *P. Bergman.* 445, L167, 152-D1 (1995)

The Detection and Mapping Observations of C_2H_5OH in Orion Kleinmann-Low. *Masatoshi Ohishi, Shin-ichi Ishikawa, Satoshi Yamamoto, Shuji Saito, & Takayoshi Amano.* 446, L43, 160-G7 (1995)

The Nuclear Structure of NGC 3079. *Willem A. Baan & Judith A. Irwin.* 446, 602, 164-D9 (1995)

GR 8: CO-to-H_2 Conversion Factor at Extremely Low Metallicity. *Frances Verter & Paul Hodge.* 446, 616, 164-F1 (1995)

The Line Width–Size Relation in Massive Cloud Cores. *P. Caselli & P. C. Myers.* 446, 665, 165-C7 (1995)

The 685–692 GHz Spectrum of the Orion Core. *A. I. Harris, L. W. Avery, K.-F. Schuster, L. J. Tacconi, & R. Genzel.* 446, L85, 171-A9 (1995)

The Dense Gas Component of Outflows in the Monoceros OB1 Dark Cloud. *Grace A. Wolf-Chase & Christopher K. Walker.* 447, 244, 175-F4 (1995)

Molecular Gas in the Inner 3.2 Kiloparsecs of NGC 2403: Star Formation at Subcritical Gas Surface Densities. *Michele D. Thornley & Christine D. Wilson.* 447, 616, 184-E10 (1995)

Toward Extragalactic Chemistry: Detections of N_2H^+ and SiO in Nearby Galaxies. *Leslie J. Sage & L. M. Ziurys.* 447, 625, 184-F9 (1995)

Molecular Abundances and Low-Mass Star Formation. II. Organic and Deuterated Species toward IRAS 16293−2422. *Ewine F. van Dishoeck, Geoffrey A. Blake, David J. Jansen, & T. D. Groesbeck.* 447, 760, 186-D12 (1995)

HCl Absorption toward Sagittarius B2. *J. Zmuidzinas, G. A. Blake, J. Carlstrom, J. Keene, & D. Miller.* 447, L125, 191-C2 (1995)

Physical Properties of Dense Cores: DCO^+ Observations. *Harold M. Butner, Elizabeth A. Lada, & Robert B. Loren.* 448, 207, 195-A11 (1995)

Turbulence in Molecular Clouds. *John Dubinski, Ramesh Narayan, & T. G. Phillips.* 448, 226, 195-C6 (1995)

Interstellar Alcohols. *S. B. Charnley, M. E. Kress, A. G. G. M. Tielens, & T. J. Millar.* 448, 232, 195-D1 (1995)

A Very High Resolution Survey of Interstellar CH and CH^+. *Philippe Crane, David L. Lambert, & Yaron Sheffer.* 99, 107, 35-E7 (1995)

Modeling Line Profiles of Protostellar Collapse in B335 with the Monte Carlo Method. *Minho Choi, Neal J. Evans II, Erik M. Gregersen, & Yangsheng Wang.* 448, 742, 204-A9 (1995)

The Metallicity Dependence of the CO-to-H_2 Conversion Factor from Observations of Local Group Galaxies. *Christine D. Wilson.* 448, L97, 209-C1 (1995)

Anomalously Excited OH and Competition between Maser Transitions toward Centaurus A. *Huib Jan van Langevelde, Ewine F. van Dishoeck, Maartje N. Sevenster, & Frank P. Israel.* 448, L123, 209-F2 (1995)

Infrared Diagnostics of the Formation of H_2 on Interstellar Dust. *J. Le Bourlot, G. Pineau des Forêts, E. Roueff, A. Dalgarno, & R. Gredel.* 449, 178, 212-E11 (1995)

Gravitational Infall in the Dense Cores L1527 and L483. *P. C. Myers, R. Bachiller, P. Caselli, G. A. Fuller, D. Mardones, M. Tafalla, & D. J. Wilner.* 449, L65, 217-B1 (1995)

A New 3.25 Micron Absorption Feature Toward Monoceros R2/IRS 3. *K. Sellgren, T. Y. Brooke, R. G. Smith, & T. R. Geballe.* 449, L69, 217-B8 (1995)

Detection of Pure Rotational H_2 Emission from the Supernova Remnant IC 443: Further Evidence for a Partially Dissociating J-Shock. *Matthew J. Richter, James. R. Graham, Gillian S. Wright, Douglas M. Kelly, & John H. Lacy.* 449, L83, 217-D2 (1995)

The Physics and Chemistry of Translucent Molecular Clouds. IV. HCO^+ and N_2H^+. *B. E. Turner.* 449, 635, 221-D12 (1995)

Solid Carbonyl Sulphide (OCS) in W33A. *M. E. Palumbo, A. G. G. M. Tielens, & A. T. Tokunaga.* 449, 674, 222-A10 (1995)

Detection of a Circumstellar Gas around DM Tauri: A Protoplanetary Disk around a Single Star? *Toshihiro Handa, Shoken M. Miyama, Takuya Yamashita, Toshihiro Omodaka, Yoshimi Kitamura, Masahiko Hayashi, Toshikazu Onishi, Ronald L. Snell, Stephen E. Strom, Karen M. Strom, Michael F. Skrutskie, Suzan Edwards, Nagayoshi Ohashi, Kazuyoshi Sunada, Masao Saito, Yasuo Fukui, Akira Mizuno, Jun-ichi Watanabe, & Hirokazu Kataza.* 449, 894, 225-B1 (1995)

Extended Molecular Gas in FSC 10214+4724. *N. Z. Scoville, M. S. Yun, R. L. Brown, & P. A. Vanden Bout.* 449, L109, 226-G2 (1995)

Chemistry in Dense Photon-dominated Regions. *A. Sternberg & A. Dalgarno.* 99, 565, 43-A3 (1995)

High-Resolution Berkeley-Illinois-Maryland Association Observations of CO, HCN, and ^{13}CO in NGC 1068. *Tamara T. Helfer & Leo Blitz.* 450, 90, 229-C10 (1995)

Star Formation in the Gemini OB1 Molecular Cloud Complex. *John M. Carpenter, Ronald L. Snell, & F. Peter Schloerb.* 450, 201, 230-G5 (1995)

Exponential Tails in the Centroid Velocity Distributions of Star-forming Regions. *Mark S. Miesch & John M. Scalo.* 450, L27, 235-G9 (1995)

The Oscillator Strengths of the C_2 Phillips System. *P. Erman & A. Iwamae.* 450, L31, 236-A3 (1995)

Internal Heating of Molecular Clouds by Tidal Fields. *Mousumi Das & Chanda J. Jog.* 451, 167, 248-C11 (1995)

Collapse and Fragmentation of Molecular Cloud Cores. III. Initial Differential Rotation. *Alan P. Boss & Elizabeth A. Myhill.* 451, 218, 249-A6 (1995)

CO J = 3–2 and HCO^+ J = 4–3 Observations of the GL 2591 Molecular Outflow. *Tatsuhiko I. Hasegawa & George F. Mitchell.* 451, 225, 249-B1 (1995)

Fourier Transform Spectroscopy of the Orion Molecular Cloud Core. *E. Serabyn & E. W. Weisstein.* 451, 238, 249-C3 (1995)

The Density Structure in the Rosette Molecular Cloud: Signposts of Evolution. *Jonathan P. Williams, Leo Blitz, & Anthony A. Stark.* 451, 252, 249-D9 (1995)

An Out-of-Plane CO (J = 2–1) Survey of the Milky Way. I. The Data. *Seiichi Sakamoto, Tetsuo Hasegawa, Masahiko Hayashi, Toshihiro Handa, & Tomoharu Oka.* 100, 125, 47-E1 (1995)

Thermal Balance in Dense Molecular Clouds: Radiative Cooling Rates and Emission-Line Luminosities. *David A. Neufeld, Stephen Lepp, & Gary J. Melnick.* 100, 132, 47-F2 (1995)

Investigating the Near-Infrared Properties of Planetary Nebulae. I. Narrowband Images. *William B. Latter, Douglas M. Kelly, Joseph L. Hora, & Lynne K. Deutsch.* 100, 159, 48-A8 (1995)

Maps of the Molecular Emission around 18 Evolved Stars. *K. Z. Stanek, G. R. Knapp, K. Young, & T. G. Phillips.* 100, 169, 48-C8 (1995)

The Radiative Association of C and S, C^+ and S, Si and O, and Si^+ and O. *C. M. Andreazza, P. D. Singh, & G. C. Sanzovo.* 451, 889, 259-D7 (1995)

CCS Observations of the Protostellar Envelope of B335. *T. Velusamy, T. B. H. Kuiper, & W. D. Langer.* 451, L75, 260-G11 (1995)

Microwave Spectra of the Isotopomers of HCS^+ and Its Substitution Structure. *Jian Tang & Shuji Saito.* 451, L93, 261-C7 (1995)

Laboratory Submillimeter-Wave Spectroscopy of the CH_2 ($^3B_1$) Radical. *Hiroyuki Ozeki & Shuji Saito.* 451, L97, 261-C13 (1995)

The Ratio of H_2 Column Density to ^{12}CO Intensity in the Vicinity of the Galactic Center. *T. J. Sodroski, N. Odegard, E. Dwek, M. G. Hauser, B. A. Franz, I. Freedman, T. Kelsall, W. F. Wall, G. B. Berriman, S. F. Odenwald, C. Bennett, W. T. Reach, & J. L. Weiland.* 452, 262, 265-F10 (1995)

Search for 6 Centimeter Formaldehyde Masers in 22 Galactic Star-forming Regions. *David M. Mehringer, W. M. Goss, & Patrick Palmer.* 452, 304, 266-C8 (1995)

Observational Probes of the Small-Scale Structure of Molecular Clouds. *E. M. Moore & Alan P. Marscher.* 452, 671, 273-G13 (1995)

Dense Gas in the DR 21 Region: High-Resolution Imaging of the NH_3 Inversion Lines. *T. L. Wilson, R. A. Gaume, K. J. Johnston, & A. R. Tieftrunk.* 452, 693, 274-C4 (1995)

Laboratory Measurement of the J = 1–0 Transition of AlH near 387 GHz. *Masahiro Goto & Shuji Saito.* 452, L147, 280-F1 (1995)

The Millimeter/Submillimeter Spectrum and Rotational Rest Frequencies of $MgCH_3(\tilde{X}\ ^2A_1)$. *M. A. Anderson & L. M. Ziurys.* 452, L157, 280-G7 (1995)

Study of Structure and Small-Scale Fragmentation in TMC-1. *W. D. Langer, T. Velusamy, T. B. H. Kuiper, S. Levin, E. Olsen, & V. Migenes.* 453, 293, 285-B9 (1995)

A Search for Interstellar C_3 in the Translucent Cloud toward HD 147889. *L. Matthew Haffner & David M. Meyer.* 453, 450, 287-C8 (1995)

Warm Molecular Gas Associated with Cometary H II Regions. *Yolanda Gómez, Guido Garay, & Susana Lizano.* 453, 727, 293-G8 (1995)

The Molecular Medium of H1413+117: BIMA CO (3–2) and HCO^+ (4–3) Observations. *D. J. Wilner, J.-H. Zhao, & Paul T. P. Ho.* 453, L91, 298-E11 (1995)

Collapse Candidates among the Bok Globules. *Yangsheng Wang, Neal J. Evans II, Shudong Zhou, & Dan P. Clemens.* 454, 217, 302-C9 (1995)

Infrared Imaging and Spectroscopy of the Molecular Shock in IC 443. *Matthew J. Richter, James R. Graham, & Gillian S. Wright.* 454, 277, 303-B1 (1995)

Organic Compounds Produced by Photolysis of Realistic Interstellar and Cometary Ice Analogs Containing Methanol. *Max P. Bernstein, Scott A. Sandford, Louis J. Allamandola, Sherwood Chang, & Maureen A. Scharberg.* 454, 327, 303-G1 (1995)

Moderate-Density Regions in the Lynds 134 Cloud Complex. *R. J. Laureijs, Y. Fukui, G. Helou, A. Mizuno, K. Imaoka, & F. O. Clark.* 101, 87, 54-A10 (1995)

BIMA Array CS $J = 2 \rightarrow 1$ Observations of Sagittarius B2. *David M. Mehringer.* 454, 782, 312-E8 (1995)

Can Gas-Phase Radical/Neutral Reactions Account for Observed Abundances of Propynal within Dense Interstellar Clouds? *Simon Petrie.* 454, L165, 317-A9 (1995)

Time-dependent Photodissociation Regions. *David Hollenbach & Antonella Natta.* 455, 133, 320-A12 (1995)

Interferometric Observations of the Circumstellar Molecular Structure around the Young Stellar Object in L1287. *Ji Yang, Nagayoshi Ohashi, & Yasuo Fukui.* 455, 175, 320-E7 (1995)

Circum-Protostellar Environments. III. Gas Densities and Kinetic Temperatures. *G. H. Moriarty-Schieven, P. G. Wannier, J. G. Mangum, M. Tamura, & V. K. Olmsted.* 455, 190, 320-F14 (1995)

Silicon Monoxide in Sagittarius B2. *Y. Peng, Stuart N. Vogel, & J. E. Carlstrom.* 455, 223, 321-B14 (1995)

High-Density Amorphous Ice, the Frost on Interstellar Grains. *P. Jenniskens, D. F. Blake, M. A. Wilson, & A. Pohorille.* 455, 389, 323-D10 (1995)

Deficit of Far-Infrared [C II] Line Emission toward the Galactic Center. *Takao Nakagawa, Yasuo Doi, Yukari Yamashita Yui, Haruyuki Okuda, Kenji Mochizuki, Hiroshi Shibai, Tetsuo Nishimura, & Frank J. Low.* 455, L35, 324-G3 (1995)

Confirmation of Interstellar HOC^+: Reevaluating the $[HCO^+]/[HOC^+]$ Abundance Ratio. *L. M. Ziurys & A. J. Apponi.* 455, L73, 325-F7 (1995)

Radio-astronomical Spectroscopy of the Hyperfine Structure of N_2H^+. *P. Caselli, P. C. Myers, & P. Thaddeus.* 455, L77, 325-G1 (1995)

Analytic Temperature Dependences for a Complete Set of Rate Coefficients for Collisional Excitation and Dissociation of H_2 Molecules by H Atoms. *P. G. Martin & M. E. Mandy.* 455, L89, 326-A9 (1995)

The Physics and Chemistry of Small Translucent Molecular Clouds. V. SO and SO_2. *B. E. Turner.* 455, 556, 329-E10 (1995)

Photon Heating of Envelopes around Young Stellar Objects: An Explanation for CO J = 6–5. *Marco Spaans, Michiel R. Hogerheijde, Lee G. Mundy, & Ewine F. van Dishoeck.* 455, L167, 334-D12 (1995)

Microwave Spectra, Hyperfine Structure, and Electric Dipole Moments for Conformers I and II of Glycine. *F. J. Lovas, Y. Kawashima, J.-U. Grabow, R. D. Suenram, G. T. Fraser, & E. Hirota.* 455, L201, 335-B3 (1995)

ISM: PLANETARY NEBULAE: GENERAL

Level Populations for Fe III Applicable to Astrophysical Plasmas and a Comparison with Planetary Nebula Observations. *F. P. Keenan, K. A. Berrington, P. G. Burke, C. J. Zeippen, M. Le Dourneuf, & R. E. S. Clegg.* 384, 385, 5-F7 (1992)

Dust and Extinction in the Planetary Nebula NGC 7027. *Charles E. Woodward, Judith L. Pipher, W. J. Forrest, Andrea Moneti, & Mark A. Shure.* 385, 567, 20-B12 (1992)

Extended Red Emission from Dust in Planetary Nebulae. *D. G. Furton & A. N. Witt.* 386, 587, 32-F1 (1992)

Unusual 3 Micron Emission Features in Three Proto–Planetary Nebulae. *T. R. Geballe, A. G. G. M. Tielens, S. Kwok, & B. J. Hrivnak.* 387, L89, 48-E1 (1992)

Planetary Nebulae as Standard Candles. VIII. Evidence for a Change in the Luminosity Function Cutoff at Low Metallicity. *Robin Ciardullo & George H. Jacoby.* 388, 268, 53-F1 (1992)

A Theoretical Calibration of the Planetary Nebular Cosmic Distance Scale. *Michael A. Dopita, George H. Jacoby, & E. Vassiliadis.* 389, 27, 60-D1 (1992)

Improved Calculations for the C III λλ1907,1909 and Si III λλ1883,1892 Electron Density Sensitive Emission-Line Ratios, and a Comparison with *IUE* Observations. *F. P. Keenan, W. A. Feibelman, & K. A. Berrington.* 389, 443, 65-D5 (1992)

Jet Formation in the Transition from the Asymptotic Giant Branch to Planetary Nebulae. *Noam Soker.* 389, 628, 69-C1 (1992)

N III Line Emission in Planetary Nebulae: Continuum Fluorescence. *G. J. Ferland.* 389, L63, 73-D1 (1992)

Spectrophotometry of Bowen Resonance Fluorescence Lines in Three Planetary Nebulae. *C. R. O'Dell & Christopher O. Miller.* 390, 219, 76-F4 (1992)

Compact Radio Sources near the Galactic Plane. *D. J. Helfand, S. Zoonematkermani, R. H. Becker, & R. L. White.* 80, 211, 25-B1 (1992)

Models of Planetary Nebula Spectral Evolution. *Kevin Volk.* 80, 347, 27-B11 (1992)

Stellar Wind Paleontology. II. Faint Halos and Historical Mass Ejection in Planetary Nebulae. *Bruce Balick, Guillermo Gonzalez, Adam Frank, & George Jacoby.* 392, 582, 109-D11 (1992)

The Kinematics of Planetary Nebulae in the Outer Fields of the Large Magellanic Cloud. *E. Vassiliadis, Stephen J. Meatheringham, & Michael A. Dopita.* 394, 489, 135-D7 (1992)

X-Ray Observations of Planetary Nebulae with Binary Nuclei. *K. M. V. Apparao, G. D. Berthiaume, & J. A. Nousek.* 397, 534, 177-E5 (1992)

Optical Spectroscopy of Magellanic Cloud Planetary Nebulae. III. *E. Vassiliadis, Michael A. Dopita, D. H. Morgan, & J. F. Bell.* 83, 87, 58-B1 (1992)

Spectropolarimetry of the Post–Main-Sequence Bipolar Nebulae GL 618, M2-56, and M1-92. *Susan R. Trammell, Harriet L. Dinerstein, & Robert W. Goodrich.* 402, 249, 4-B12 (1993)

Continuous Absorption of He I λ10830 in Planetary Nebulae. *J. Kingdon & G. J. Ferland.* 403, 211, 16-E7 (1993)

Oxygen, Sulfur, Argon, and the Chemical Evolution of the Galactic Disk. *J. A. de Freitas Pacheco.* 403, 673, 24-A10 (1993)

Astrophysical Gasdynamics Confronts Reality: The Shaping of Planetary Nebuale. *Adam Frank, Bruce Balick, Vincent Icke, & Garrelt Mellema.* 404, L25, 33-F7 (1993)

CCD Mosaic Images of the Supernova Remnant 3C 400.2. *P. Frank Winkler, Todd M. Olinger, & Scott A. Westerbeke.* 405, 608, 50-F1 (1993)

A Model for the Dramatic Decline of FG Sagittae. *Icko Iben, Jr., & Mario Livio.* 406, L15, 60-F8 (1993)

H_2 Morphology of Young Planetary Nebulae. *James R. Graham, T. M. Herbst, K. Matthews, G. Neugebauer, B. T. Soifer, E. Serabyn, & S. Beckwith.* 408, L105, 95-F1 (1993)

Circumstellar Shells Resolved in *IRAS* Survey Data. II. Analysis. *K. Young, T. G. Phillips, & G. R. Knapp.* 409, 725, 108-B3 (1993)

On the Distance to Galactic Planetary Nebulae. *C. Y. Zhang.* 410, 239, 115-B1 (1993)

Search for Ionized Cores in Proto–Planetary Nebulae, and the Asymptotic Giant Branch to Planetary Nebula Transition. *Hans Ulrich Käufl, Alvio Renzini, & Letizia Stanghellini.* 410, 251, 115-C1 (1993)

The Ratio of Optical-to-Infrared Emission Line Strengths in Ar III as Electron Density Diagnostics for Planetary Nebulae. *F. P. Keenan & E. S. Conlon.* 410, 426, 117-C12 (1993)

Circumstellar Shells Resolved in the *IRAS* Survey Data. I. Data Processing Procedure, Results, and Confidence Tests. *K. Young, T. G. Phillips, & G. R. Knapp.* 86, 517, 21-B11 (1993)

The Spectrum of the Central Star of the Planetary Nebula in M22. *J. Patrick Harrington & George Paltoglou.* 411, L103, 142-G3 (1993)

The Radial Velocities of Planetary Nebulae in NGC 3379. *Robin Ciardullo, George H. Jacoby, & Herwig B. Dejonghe.* 414, 454, 176-G3 (1993)

The Planetary Nebula System and Dynamics of NGC 5128. I. Planetary Nebulae as Standard Candles. *Xiaohui Hui, Holland C. Ford, Robin Ciardullo, & George H. Jacoby.* 414, 463, 177-A1 (1993)

Bright Planetary Nebulae as Probes of Chemical Evolution. *Michael G. Richer.* 415, 240, 188-A6 (1993)

Infrared Spectra of Transition Objects and the Composition and Evolution of Carbon Dust. *R. H. Buss, Jr., A. G. G. M. Tielens, M. Cohen, M. W. Werner, J. D. Bregman, & F. C. Witteborn.* 415, 250, 188-B3 (1993)

Winds in Central Stars of Planetary Nebulae. *A. Modigliani, P. Patriarchi, & M. Perinotto.* 415, 258, 188-B12 (1993)

Trace of Planetary Nebula Evolution by Distance-independent Parameters. *C. Y. Zhang & S. Kwok.* 88, 137, 42-B9 (1993)

Electron Density Diagnostics for Gaseous Nebulae Involving the O IV Intercombination Lines near 1400 Å. *F. P. Keenan, E. S. Conlon, D. A. Bowden, W. A. Feibelman, & A. K. Pradhan.* 88, 169, 42-E1 (1993)

Planetary Nebulae as Standard Candles. IX. The Distance to the Fornax Cluster. *Russet McMillan, Robin Ciardullo, & George H. Jacoby.* 416, 62, 201-G7 (1993)

The Planetary Nebula System and Dynamics of NGC 5128. II. A Planetary Nebula Catalog. *Xiaohui Hui, Holland C. Ford, Robin Ciardullo, & George H. Jacoby.* 88, 423, 46-B1 (1993)

Improved Observations of Faint Planetary Nebulae in the Magellanic Clouds. *George H. Jacoby & James B. Kaler.* 417, 209, 220-A12 (1993)

Formation and Evolution of Binary Planetary Nebula Nuclei and Related Objects. *Icko Iben, Jr., & Alexander V. Tutukov.* 418, 343, 235-C12 (1993)

The Formation of Binary and Single Nuclei of Planetary Nebulae. *L. R. Yungelson, A. V. Tutukov, & M. Livio.* 418, 794, 242-D8 (1993)

A Comparison of the Planetary Nebula Luminosity Function and Surface Brightness Fluctuation Distance Scales. *Robin Ciardullo, George H. Jacoby, & John L. Tonry.* 419, 479, 253-F9 (1993)

The 150 AU Structure of the Radio Continuum and the Ammonia Bipolar Outflow in CRL 618. *Jesús Martín-Pintado, Ralph Gaume, Rafael Bachiller, & Ken Johnson.* 419, 725, 256-F4 (1993)

Observations of [S IV] and the O/S Abundance Ratio in Two Halo Population Planetary Nebulae. *Donald R. Garnett & John H. Lacy.* 419, L93, 259-F8 (1993)

Near-Infrared Spectroscopy of Proto–Planetary Nebulae. *Bruce J. Hrivnak, Sun Kwok, & T. R. Geballe.* 420, 783, 12-F1 (1994)

Disks and Jets in Planetary Nebulae. *Noam Soker & Mario Livio.* 421, 219, 18-F7 (1994)

Magnetic Shaping of Planetary Nebulae and Other Stellar Wind Bubbles. *Roger A. Chevalier & Ding Luo.* 421, 225, 18-G1 (1994)

Density Contrast Shell Models for the Planetary Nebula IC 2165. *S. Hyung.* 90, 119, 2-E4 (1994)

The Bipolar Symmetry of Ring-like Planetary Nebulae: Molecular Hydrogen Emission from Halos. *Joel H. Kastner, Ian Gatley, K. M. Merrill, R. Probst, & David A. Weintraub.* 421, 600, 25-F2 (1994)

The He I 2.06 Micron to Brγ Ratio in 12 Planetary Nebulae. *D. L. DePoy & Joseph C. Shields.* 422, 187, 32-D7 (1994)

A Laboratory Approach to the Interstellar Sulfide Dust Problem. *B. Begemann, J. Dorschner, T. Henning, H. Mutschke, & E. Thamm.* 423, L71, 54-C1 (1994)

FLIERs and Other Microstructures in Planetary Nebulae. II. *Bruce Balick, M. Perinotto, A. Maccioni, Yervant Terzian, & A. Hajian.* 424, 800, 74-F11 (1994)

High-Resolution Spectroscopy of V1853 Cygni (LS II +34°26): Birth of a Planetary Nebula? *Verne V. Smith & David L. Lambert.* 424, L123, 79-D13 (1994)

Narrowband *HST* Imagery of the Young Planetary Nebula Henize 1357. *M. Bobrowsky.* 426, L47, 103-F5 (1994)

Post–Asymptotic Giant Branch Evolution of Low- to Intermediate-Mass Stars. *E. Vassiliadis & P. R. Wood.* 92, 125, 33-A4 (1994)

The Radiation Gasdynamics of Planetary Nebulae. IV. From the Owl to the Eskimo. *Adam Frank & Garrelt Mellema.* 430, 800, 171-G5 (1994)

Abundances, Planetary Nebulae, and Stellar Evolution. *Lawrence H. Aller.* 432, 427, 201-C1 (1994)

Two Planetary Nebula Candidates around Hot DA White Dwarfs. *Richard W. Tweedy & Karen B. Kwitter.* 433, L93, 224-B11 (1994)

Radiative Shock Overstability of Finite-sized Objects. *Ruth Dgani & Noam Soker.* 434, 262, 229-A11 (1994)

Time-dependent Fluorescent H_2 Emission. *O. Goldshmidt & A. Sternberg.* 439, 256, 24-F3 (1995)

The Kinetics of Systems of Planetesimals. *J. F. Luciani, F. Namouni, & R. Pellat.* 439, 800, 35-E13 (1995)

A Volume-limited Survey of High Galactic Latitude Planetary Nebulae with the *Extreme Ultraviolet Explorer*. *Antonella Fruscione, Jeremy J. Drake, Kelley McDonald, & Roger F. Malina.* 441, 726, 72-A1 (1995)

Planetary Nebulae as Probes of Dark Matter in NGC 3384. *Benoit Tremblay, David Merritt, & T. B. Williams.* 443, L5, 102-B8 (1995)

Oxygen Abundances in Diffuse Ellipticals and the Metallicity-Luminosity Relations for Dwarf Galaxies. *Michael G. Richer & Marshall L. McCall.* 445, 642, 144-A1 (1995)

The Ionized Masses of Planetary Nebulae. *David Buckley & Stephen E. Schneider.* 446, 279, 157-B2 (1995)

He 3-1475 and Its Jets. *M. Bobrowsky, A. A. Zijlstra, E. K. Grebel, C. G. Tinney, P. te Lintel Hekkert, G. C. Van de Steene, L. Likkel, & T. R. Bedding.* 446, L89, 171-B3 (1995)

A Statistical Distance Scale for Galactic Planetary Nebulae. *C. Y. Zhang.* 98, 659, 32-D9 (1995)

A Survey of Planetary Nebulae at Na D: Evidence for Neutral Envelopes. *Harriet L. Dinerstein, Christopher Sneden, & John Uglum.* 447, 262, 176-A7 (1995)

Precessing Jets and Point-Symmetric Nebulae. *J. A. Cliffe, A. Frank, M. Livio, & T. W. Jones.* 447, L49, 181-C10 (1995)

Temperature Fluctuations in Photoionized Nebulae. *J. B. Kingdon & G. J. Ferland.* 450, 691, 240-C6 (1995)

Luminous Supersoft X-Ray Sources and the Planetary Nebula Luminosity Function. *R. Di Stefano, F. Paerels, & S. Rappaport.* 450, 705, 240-D10 (1995)

Investigating the Near-Infrared Properties of Planetary Nebulae. I. Narrowband Images. *William B. Latter, Douglas M. Kelly, Joseph L. Hora, & Lynne K. Deutsch.* 100, 159, 48-A8 (1995)

Evolutionary Paths in Multiple-Shell Planetary Nebulae. *Letizia Stanghellini & Anna Pasquali.* 452, 286, 266-B1 (1995)

Evolutionary Tests of the Planetary Nebula Luminosity Function. *Letizia Stanghellini.* 452, 515, 271-G1 (1995)

C IV and O VI Transitions in the Region λλ1100–2000 and Examples Found in *IUE* Spectra of Hot Stars. *Walter A. Feibelman & Sveneric Johansson.* 100, 405, 51-F3 (1995)

Four Newly Identified Sources with 21 Micron Emission. *Sun Kwok, Bruce J. Hrivnak, & T. R. Geballe.* 454, 394, 304-F8 (1995)

The 30 Micron Emission Band in Carbon-rich Pre–Planetary Nebulae. *A. Omont, S. H. Moseley, P. Cox, W. Glaccum, S. Casey, T. Forveille, Kin-Wing Chan, R. Szczerba, R. F. Loewenstein, P. M. Harvey, & S. Kwok.* 454, 819, 313-B2 (1995)

Time-dependent Photodissociation Regions. *David Hollenbach & Antonella Natta.* 455, 133, 320-A12 (1995)

Asymmetrical Mass Loss from Rotating Red Giant Variables. *S. M. Asida & Y. Tuchman.* 455, 286, 322-B2 (1995)

ISM: PLANETARY NEBULAE: INDIVIDUAL

NGC Number: NGC 1535

Hopkins Ultraviolet Telescope Observations of H_2 toward the Planetary Nebula NGC 1535. *Charles W. Bowers, William P. Blair, Knox S. Long, & Arthur F. Davidsen.* 444, 748, 126-E11 (1995)

NGC Number: NGC 2438

Radio and X-Ray Observations of OH 231.8+4.2. *Gregory B. Taylor & Mark Morris.* 409, 720, 108-A9 (1993)

NGC Number: NGC 3242

Fast, Low-Ionization Emission Regions and Other Microstructures in Planetary Nebulae. *Bruce Balick, M. Rugers, Yervant Terzian, & Jayaram N. Chengalur.* 411, 778, 139-D10 (1993)

NGC Number: NGC 6302

Detection of the Angular Expansion Rate and Determination of the Distance of the Planetary Nebula NGC 6302. *Yolanda Gómez, Luis F. Rodríguez, & James M. Moran.* 416, 620, 211-B1 (1993)

The Highly Ionized Regions of NGC 6302 and NGC 6537. *N. Rowlands, J. R. Houck, & T. Herter.* 427, 867, 123-D8 (1994)

NGC Number: NGC 6537

The Highly Ionized Regions of NGC 6302 and NGC 6537. *N. Rowlands, J. R. Houck, & T. Herter.* 427, 867, 123-D8 (1994)

NGC Number: NGC 6720

The Bipolar Symmetry of Ring-like Planetary Nebulae: Molecular Hydrogen Emission from Halos. *Joel H. Kastner, Ian Gatley, K. M. Merrill, R. Probst, & David A. Weintraub.* 421, 600, 25-F2 (1994)

NGC Number: NGC 6751

The *IUE* Spectrum of the Planetary Nebula NGC 6751. *Walter A. Feibelman.* 448, 766, 205-C11 (1995)

NGC Number: NGC 7027

0.8–1.6 Micron Spectroscopy of the Planetary Nebula NGC 7027. *Richard J. Rudy, Peter Erwin, George S. Rossano, & R. C. Puetter.* 384, 536, 8-G1 (1992)

Al II Emission-Line Strengths in Low-Density Astrophysical Plasmas. *F. P. Keenan, L. K. Harra, K. M. Aggarwal, & W. A. Feibelman.* 385, 375, 16-E1 (1992)

Dust and Extinction in the Planetary Nebula NGC 7027. *Charles E. Woodward, Judith L. Pipher, W. J. Forrest, Andrea Moneti, & Mark A. Shure.* 385, 567, 20-B12 (1992)

The High-Excitation Region of NGC 7027. *N. Rowlands, J. R. Houck, T. L. Hayward, & J. W. Miles.* 390, L93, 85-C1 (1992)

High Spatial Resolution Observations of HCO^+ in the NGC 7027 Molecular Envelope. *S. Deguchi, H. Izumiura, Nguyen-Q-Rieu, K. M. Shibata, N. Ukita, & I. Yamamura.* 392, 597, 109-F1 (1992)

BIMA Observations of HCO^+ Emission from the Planetary Nebula NGC 7027. *Lauren Likkel.* 397, L115, 181-E6 (1992)

H_2 Morphology of Young Planetary Nebulae. *James R. Graham, T. M. Herbst, K. Matthews, G. Neugebauer, B. T. Soifer, E. Serabyn, & S. Beckwith.* 408, L105, 95-F1 (1993)

Emission of HeH^+ in Nebulae. *C. Cecchi-Pestellini & A. Dalgarno.* 413, 611, 164-B5 (1993)

Detection of the Carbon Monoxide Ion (CO^+) in the Interstellar Medium and a Planetary Nebula. *William B. Latter, Christopher K. Walker, & Philip R. Maloney.* 419, L97, 259-F14 (1993)

The Bipolar Symmetry of Ring-like Planetary Nebulae: Molecular Hydrogen Emission from Halos. *Joel H. Kastner, Ian Gatley, K. M. Merrill, R. Probst, & David A. Weintraub.* 421, 600, 25-F2 (1994)

Collisional Effects in He I: An Observational Analysis. *J. Kingdon & G. J. Ferland.* 442, 714, 90-A8 (1995)

Accurate Wavenumbers for Mid-Infrared Fine-Structure Lines. *Douglas M. Kelly & John H. Lacy.* 454, L161, 317-A1 (1995)

NGC Number: NGC 7293

CO in the Cometary Globules of the Helix Nebula. *P. J. Huggins, R. Bachiller, P. Cox, & T. Forveille.* 401, L43, 227-F7 (1992)

Two-Temperature X-Ray Emission from the Planetary Nebula NGC 7293. *D. A. Leahy, C. Y. Zhang, & Sun Kwok.* 422, 205, 32-F1 (1994)

NGC Number: NGC 7662

Fast, Low-Ionization Emission Regions and Other Microstructures in Planetary Nebulae. *Bruce Balick, M. Rugers, Yervant Terzian, & Jayaram N. Chengalur.* 411, 778, 139-D10 (1993)

Name: Abell 30

HST Imaging of Hydrogen-poor Ejecta in Abell 30 and Abell 78: Wind-blown Cometary Structures. *Kazimierz J. Borkowski, J. Patrick Harrington, Zlatan Tsvetanov, & Robin E. S. Clegg.* 415, L47, 192-C4 (1993)

The Dust in the Hydrogen-poor Ejecta of Abell 30. *Kazimierz J. Borkowski, J. Patrick Harrington, William P. Blair, & Jesse D. Bregman.* 435, 722, 256-A6 (1994)

Diffuse X-Ray Emission from the Hydrogen-deficient Planetary Nebula Abell 30. *You-Hua Chu & Ching-Hwa Ho.* 448, L127, 209-F9 (1995)

Name: Abell 78

HST Imaging of Hydrogen-poor Ejecta in Abell 30 and Abell 78: Wind-blown Cometary Structures. *Kazimierz J. Borkowski, J. Patrick Harrington, Zlatan Tsvetanov, & Robin E. S. Clegg.* 415, L47, 192-C4 (1993)

GHRS Observations of Mass-loaded Flows in Abell 78. *J. Patrick Harrington, Kazimierz J. Borkowski, & Zlatan Tsvetanov.* 439, 264, 24-G1 (1995)

Name: Fleming 1

Kinematical Evidence for a Rotating, Episodic Jet in the Planetary Nebula Fleming 1. *J. A. Lopez, J. Meaburn, & J. W. Palmer.* 415, L135, 200-E8 (1993)

Name: Henize 1357

Narrowband *HST* Imagery of the Young Planetary Nebula Henize 1357. *M. Bobrowsky.* 426, L47, 103-F5 (1994)

Name: Red Rectangle

Adaptive Optics Imaging of Proto–Planetary Nebulae: Frosty Leo and the Red Rectangle. *F. Roddier, C. Roddier, J. E. Graves, & M. J. Northcott.* 443, 249, 98-E7 (1995)

Name: BE Ursae Majoris

BE Ursae Majoris: Precataclysmic Binary System and Planetary Nucleus. *James Liebert, R. W. Tweedy, R. Napiwotzki, & M. S. Fulbright.* 441, 424, 65-B11 (1995)

Alphanumeric: A30

Interaction of a Stellar Wind with Clumpy Stellar Ejecta in A30. *Kazimierz J. Borkowski, J. Patrick Harrington, & Zlatan I. Tsvetanov.* 449, L143, 227-D8 (1995)

Alphanumeric: AFGL 618

Near-Infrared Observations of the Proto–Planetary Nebula AFGL 618. *William B. Latter, Philip R. Maloney, Douglas M. Kelly, John H. Black, G. H. Rieke, & M. J. Rieke.* 389, 347, 64-C3 (1992)

Near-Infrared Observations of AFGL 618. II. The Atomic Spectrum. *Douglas M. Kelly, William B. Latter, & G. H. Rieke.* 395, 174, 142-D1 (1992)

Alphanumeric: AFGL 2688

The Near-Infrared Structure and Spectra of the Bipolar Nebulae M2-9 and AFGL 2688: The Role of Ultraviolet Pumping and Shocks in Molecular Hydrogen Excitation. *Joseph L. Hora & William B. Latter.* 437, 281, 287-A8 (1994)

Alphanumeric: BD +30°3639

H_2 Morphology of Young Planetary Nebulae. *James R. Graham, T. M. Herbst, K. Matthews, G. Neugebauer, B. T. Soifer, E. Serabyn, & S. Beckwith.* 408, L105, 95-F1 (1993)

Near- and Mid-Infrared Imaging of the Planetary Nebulae BD +30°3639 and IC 418. *Joseph L. Hora, Lynne K. Deutsch, William F. Hoffmann, Giovanni G. Fazio, & Kandiah Shivanandan.* 413, 304, 160-A10 (1993)

Near- and Mid-Infrared Imaging of the Planetary Nebulae BD +30°3639 and IC 418. *Joseph L. Hora, Lynne K. Deutsch, William F. Hoffmann, Giovanni G. Fazio, & Kandiah Shivanandan.* 413, 304, 160-A10 (1993)

Alphanumeric: 3C 400.2

CCD Mosaic Images of the Supernova Remnant 3C 400.2. *P. Frank Winkler, Todd M. Olinger, & Scott A. Westerbeke.* 405, 608, 50-F1 (1993)

Alphanumeric: CRL 618

High Spatial Resolution Observations of CO in CRL 618. *Katsunori M. Shibata, Shuji Deguchi, Naomi Hirano, Osamu Kameya, & Shin'ichi Tamura.* 415, 708, 196-F1 (1993)

CS(2–1) Emission from Dense Gas in the Bipolar Outflow of CRL 618. *Arsen R. Hajian, J. A. Phillips, & Yervant Terzian.* 446, 244, 156-E7 (1995)

Alphanumeric: CRL 915

Radio-Frequency Continuum Emission from Evolved Stars. *G. R. Knapp, P. F. Bowers, K. Young, & T. G. Phillips.* 455, 293, 322-B12 (1995)

Alphanumeric: CRL 2688

Submillimeter Line Observations of the Proto–Planetary Nebula CRL 2688. *P. A. Jaminet, W. C. Danchi, Göran Sandell, & E. C. Sutton.* 400, 535, 217-A7 (1992)

Alphanumeric: Hb 12

Detection of the H92α Recombination Line toward the Very Compact Planetary Nebulae IC 5117 and Hb 12. *Luis F. Miranda, José M. Torrelles, & Carlos Eiroa.* 446, L39, 160-F13 (1995)

Alphanumeric: He 3-1357

Recent Changes in the *IUE* Spectrum of the Very Young Planetary Nebula He 3-1357 (=SAO 244567). *Walter A. Feibelman.* 443, 245, 98-D13 (1995)

Alphanumeric: He 3-1475

He 3-1475 and Its Jets. *M. Bobrowsky, A. A. Zijlstra, E. K. Grebel, C. G. Tinney, P. te Lintel Hekkert, G. C. Van de Steene, L. Likkel, & T. R. Bedding.* 446, L89, 171-B3 (1995)

Alphanumeric: IC 418

The Spectra of IC 418 and IC 5117 from 1.5 to 1.75 Microns. *C. Y. Zhang & Sun Kwok.* 385, 255, 15-B1 (1992)

Alphanumeric: IC 2149

Fast, Low-Ionization Emission Regions and Other Microstructures in Planetary Nebulae. *Bruce Balick, M. Rugers, Yervant Terzian, & Jayaram N. Chengalur.* 411, 778, 139-D10 (1993)

Spectrum of IC 2149 and Its Central Star. *Walter A. Feibelman, Siek Hyung, & Lawrence H. Aller.* 426, 653, 106-E6 (1994)

Alphanumeric: IC 2165

Density Contrast Shell Models for the Planetary Nebula IC 2165. *S. Hyung.* 90, 119, 2-E4 (1994)

Alphanumeric: IC 4593

The Morphology and Interaction with the Interstellar Medium of the Planetary Nebula IC 4593. *Daniel B. Zucker & Noam Soker.* 408, 579, 92-D5 (1993)

Alphanumeric: IC 4997

Fe III Emission Lines in the Optical Spectrum of the Planetary Nebula IC 4997. *F. P. Keenan, L. H. Aller, S. Hyung, E. S. Conlon, & G. A. Warren.* 410, 430, 117-D3 (1993)

The Spectrum of the Variable Planetary Nebula IC 4997. *Siek Hyung, Lawrence H. Aller, & Walter A. Feibelman.* 93, 465, 49-B5 (1994)

Alphanumeric: IC 5117

The Spectra of IC 418 and IC 5117 from 1.5 to 1.75 Microns. *C. Y. Zhang & Sun Kwok.* 385, 255, 15-B1 (1992)

Detection of the H92α Recombination Line toward the Very Compact Planetary Nebulae IC 5117 and Hb 12. *Luis F. Miranda, José M. Torrelles, & Carlos Eiroa.* 446, L39, 160-F13 (1995)

Alphanumeric: IRAS 09371+1212

Adaptive Optics Imaging of Proto–Planetary Nebulae: Frosty Leo and the Red Rectangle. *F. Roddier, C. Roddier, J. E. Graves, & M. J. Northcott.* 443, 249, 98-E7 (1995)

Alphanumeric: IRAS 17423−1755

Radio-Frequency Continuum Emission from Evolved Stars. *G. R. Knapp, P. F. Bowers, K. Young, & T. G. Phillips.* 455, 293, 322-B12 (1995)

Alphanumeric: IRAS 18333−2357

Stripping of a Planetary Nebula from the Globular Cluster M22. *Kazimierz J. Borkowski, Zlatan Tsvetanov, & J. Patrick Harrington.* 402, L57, 12-F9 (1993)

The Spectrum of the Central Star of the Planetary Nebula in M22. *J. Patrick Harrington & George Paltoglou.* 411, L103, 142-G3 (1993)

Alphanumeric: IRAS 21282+5050

Extended Infrared Emission around IRAS 21282+5050. *Jesse D. Bregman, John Booth, D. Kirk Gilmore, Laura Kay, & David Rank.* 396, 120, 156-E12 (1992)

Photometry and Imaging of the Peculiar Planetary Nebula IRAS 21282+5050. *Sun Kwok, Bruce J. Hrivnak, & Philip P. Langill.* 408, 586, 92-E3 (1993)

2–12.5 Micron Imaging of IRAS 21282+5050: The Structure of a Young Planetary Nebula. *M. Meixner, C. J. Skinner, P. Temi, D. Rank, Jesse Bregman, J. R. Ball, E. Keto, J. F. Arens, & J. G. Jernigan.* 411, 266, 130-E3 (1993)

Detection of the Overtone of the 3.3 Micron Emission Feature in IRAS 21282+5050. *T. R. Geballe, C. Joblin, L. B. d'Hendecourt, M. Jourdain de Muizon, A. G. G. M. Tielens, & A. Léger.* 434, L15, 232-C8 (1994)

Alphanumeric: KjPn 8

The Discovery of a Bipolar, Rotating, Episodic Jet (BRET) in the Planetary Nebula KjPn 8. *J. A. López, R. Vázquez, & L. F. Rodríguez.* 455, L63, 325-E2 (1995)

Alphanumeric: LMC N66

Imaging of Four Planetary Nebulae in the Magellanic Clouds Using the *Hubble Space Telescope* Faint Object Camera. *J. C. Blades, M. J. Barlow, R. Albrecht, C. Barbieri, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, S. Osmer, & W. B. Sparks.* 398, L41, 187-F7 (1992)

Time-dependent Behavior and Physical Conditions of the LMC Planetary Nebula N66. *M. Peña, M. Peimbert, S. Torres-Peimbert, M. T. Ruiz, & J. Maza.* 441, 343, 64-B1 (1995)

Alphanumeric: LMC N201

Imaging of Four Planetary Nebulae in the Magellanic Clouds Using the *Hubble Space Telescope* Faint Object Camera. *J. C. Blades, M. J. Barlow, R. Albrecht, C. Barbieri, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, S. Osmer, & W. B. Sparks.* 398, L41, 187-F7 (1992)

Alphanumeric: LSIV −12° 111

LSIV −12° 111: A Candidate Halo Proto–Planetary Nebula. *E. S. Conlon, P. L. Dufton, R. J. H. McCausland, & F. P. Keenan.* 408, 593, 92-E11 (1993)

Alphanumeric: M1-16

Multiple Outflows in the Bipolar Planetary Nebula M1-16: A Molecular Line Study. *Raghvendra Sahai, Alwyn Wootten, Hugo E. Schwarz, & W. Wild.* 428, 237, 131-B5 (1994)

Alphanumeric: M1-75

Extreme Nitrogen Enrichment in the Asymmetrical Planetary Nebula M1-75. *Martín A. Guerrero, Letizia Stanghellini, & Arturo Manchado.* 444, L49, 122-A1 (1995)

Alphanumeric: M1-92

A Direct Image of Wind Interaction in the Post-AGB Evolution: CO Observations of M1-92. *V. Bujarrabal, J. Alcolea, R. Neri, & M. Grewing.* 436, L169, 281-G9 (1994)

Alphanumeric: M2-9

The Near-Infrared Structure and Spectra of the Bipolar Nebulae M2-9 and AFGL 2688: The Role of Ultraviolet Pumping and Shocks in Molecular Hydrogen Excitation. *Joseph L. Hora & William B. Latter.* 437, 281, 287-A8 (1994)

Spectropolarimetry of the Bipolar Planetary Nebula M2-9. *Susan R. Trammell, Robert W. Goodrich, & Harriet L. Dinerstein.* 453, 761, 294-D2 (1995)

Alphanumeric: N66

A Thermal Pulse in Progress in the Nucleus of the Large Magellanic Cloud Planetary Nebula N66. *M. Peña, S. Torres-Peimbert, M. Peimbert, M. T. Ruiz, & J. Maza.* 428, L9, 134-B13 (1994)

Alphanumeric: N67/SMP 22

A Comprehensive X-Ray Study of the Small Magellanic Cloud. *Qingde Wang & Xiaoyi Wu.* 78, 391, 7-G5 (1992)

Einstein Observations of Ultrasoft X-Ray Sources in the Magellanic Clouds. *Thomas Brown, France Córdova, Robin Ciardullo, Richard Thompson, & Howard Bond.* 422, 118, 31-E4 (1994)

Alphanumeric: Sh 2-216

The Closest Planetary Nebula, Sh 2-216, and Its Interaction with the Interstellar Medium. *R. W. Tweedy, M. A. Martos, & A. Noriega-Crespo.* 447, 257, 175-G7 (1995)

Alphanumeric: SMC N2

Imaging of Four Planetary Nebulae in the Magellanic Clouds Using the *Hubble Space Telescope* Faint Object Camera. *J. C. Blades, M. J. Barlow, R. Albrecht, C. Barbieri, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, S. Osmer, & W. B. Sparks.* 398, L41, 187-F7 (1992)

Alphanumeric: SMC N5

Imaging of Four Planetary Nebulae in the Magellanic Clouds Using the *Hubble Space Telescope* Faint Object Camera. *J. C. Blades, M. J. Barlow, R. Albrecht, C. Barbieri, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, S. Osmer, & W. B. Sparks.* 398, L41, 187-F7 (1992)

Alphanumeric: SMP 83

Hubble Space Telescope Observations of Planetary Nebulae in the Magellanic Clouds. I. The Extreme Type I SMP 83/WS 35. *Michael A. Dopita, Holland C. Ford, Ralph Bohlin, Ian N. Evans, & Stephen J. Meatheringham.* 418, 804, 242-E7 (1993)

Alphanumeric: SMP 85

Hubble Space Telescope Observations of Planetary Nebulae in the Magellanic Clouds. II. SMP 85, A Young Planetary. *Michael A. Dopita, Emanuel Vassiliadis, Stephen J. Meatheringham, Holland C. Ford, Ralph Bohlin, Peter R. Wood, Theodore P. Stecher, Stephen P. Maran, & J. Patrick Harrington.* 426, 150, 98-A6 (1994)

Alphanumeric: Vy 2-2

Detection of the H92α Recombination Line toward the Very Compact Planetary Nebulae IC 5117 and Hb 12. *Luis F. Miranda, José M. Torrelles, & Carlos Eiroa.* 446, L39, 160-F13 (1995)

Alphanumeric: WDHS 1

A Very Hot, Hydrogen-rich, White Dwarf Planetary Nucleus. *James Liebert, P. Bergeron, & R. W. Tweedy.* 424, 817, 75-A3 (1994)

ISM: REFLECTION NEBULAE

The Juggler: A Three-lobed Near-Infrared Reflection Nebula toward CRL 2136 = OH 17.6+0.2. *Joel H. Kastner, David A. Weintraub, & C. Aspin.* 389, 357, 64-D1 (1992)

Riddle and Puzzle of the Optical Region S122 = 2306+1439. *J. P. Vallée & A. G. de Bruyn.* 393, 674, 124-B10 (1992)

Quenched Carbonaceous Composite: Fluorescence Spectrum Compared to the Extended Red Emission Observed in Reflection Nebulae. *Akira Sakata, Setsuko Wada, Takatoshi Narisawa, Yoichi Asano, Yutaka Iijima, Takashi Onaka, & Alan T. Tokunaga.* 393, L83, 127-F7 (1992)

Ultraviolet Imaging Telescope Images of the Reflection Nebula NGC 7023: Derivation of Ultraviolet Scattering Properties of Dust Grains. *Adolf N. Witt, Jens K. Petersohn, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 395, L5, 144-D1 (1992)

Scattering of Infrared Radiation by Dust in NGC 7023 and NGC 2023. *K. Sellgren, M. W. Werner, & H. L. Dinerstein.* 400, 238, 211-G9 (1992)

The Low Filling Factor of Dust in the Galaxy. *Jayant Murthy, H. J. Walker, & R. C. Henry.* 401, 574, 229-F8 (1992)

Hopkins Ultraviolet Telescope Observations of Far-Ultraviolet Scattering in NGC 7023: The Dust Albedo. *Jayant Murthy, Andrew Dring, Richard C. Henry, Jeffrey W. Kruk, William P. Blair, Randy A. Kimble, & Samuel T. Durrance.* 408, L97, 95-E3 (1993)

Near-Infrared Discovery of the L810 Nebula Illuminator. *João Lin Yun, Dan P. Clemens, Mark J. McCaughrean, & Marcia Rieke.* 408, L101, 95-E9 (1993)

An Infrared Study of the Remarkable Dusty M Star HR 3126. *J. E. Chiar, D. C. B. Whittet, D. K. Aitken, P. F. Roche, C. H. Smith, H. J. Walker, P. A. Whitelock, & C. Wright.* 409, 404, 102-A8 (1993)

Voyager 2 Observations of NGC 7023: Dust Scattering Shortward of 1600 Å. *A. N. Witt, J. K. Petersohn, J. B. Holberg, J. Murthy, A. Dring, & R. C. Henry.* 410, 714, 122-E13 (1993)

Ultraviolet Background Radiation. *Richard C. Henry & Jayant Murthy.* 418, L17, 238-C1 (1993)

A Near-Infrared Study of the Monoceros R2 Star Formation Region. *Eric M. Howard, Judith L. Pipher, & William J. Forrest.* 425, 707, 90-D12 (1994)

Polarization Profiles of Scattered Emission Lines. II. Upstream Dust Scattering in the HH 1 Jet. *W. J. Henney, A. C. Raga, & D. J. Axon.* 427, 305, 113-F6 (1994)

The Giant Molecular Cloud Monoceros R2. I. Shell Structure. *Taoling Xie & Paul F. Goldsmith.* 430, 252, 162-B13 (1994)

Broken Symmetry: The Structure of the Dust Envelope of IRC +10216. *Joel H. Kastner & David A. Weintraub.* 434, 719, 237-F7 (1994)

A Near-Infrared Reflection Nebula Associated with NGC 2024 FIR 4. *T. J. T. Moore & T. Yamashita.* 440, 722, 53-B6 (1995)

H I, CO, and *IRAS* Observations of NGC 7023. *C. Rogers, Mark H. Heyer, & P. E. Dewdney.* 442, 694, 89-F10 (1995)

Scattering Properties of the Dust in the Reflection Nebula IC 435. *Daniela Calzetti, Ralph C. Bohlin, Karl D. Gordon, Adolf N. Witt, & Luciana Bianchi.* 446, L97, 171-C7 (1995)

In Search of HL Tauri. *David A. Weintraub, Joel H. Kastner, & Barbara A. Whitney.* 452, L141, 280-E6 (1995)

ISM: STRUCTURE

The Distribution of the 6_2–6_1 and 5_2–5_1 *E*-Type Methanol Masers in OMC-1. *K. J. Johnston, R. Gaume, S. Stolovy, T. L. Wilson, C. M. Walmsley, & K. M. Menten.* 385, 232, 14-G3 (1992)

Structure, Chemistry, and Clumping in the NGC 2071 (North) Molecular Cloud. *Paul F. Goldsmith, Michael Margulis, Ronald L. Snell, & Y. Fukui.* 385, 522, 19-F3 (1992)

Comparing Restored *HST* and VLA Imagery of R Aquarii. *J. M. Hollis, J. E. Dorband, & F. Yusef-Zadeh.* 386, 293, 27-G3 (1992)

Motion at the Ionization Front in the Orion Nebula: A Kinematic Study of the [O I] Line. *C. R. O'Dell & Zheng Wen.* 387, 229, 39-F10 (1992)

Synthesis Imaging of the DR 21 (OH) Cluster. II. Thermal Ammonia and Water Maser Emission. *Jeffrey G. Mangum, Alwyn Wootten, & Lee G. Mundy.* 388, 467, 56-B6 (1992)

High Spatial Resolution 1.3 Centimeter Imaging of the NGC 2024 Star-forming Region. *R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 388, 489, 56-D1 (1992)

Dense Clumps of Ionized Gas near π Scorpii, as Revealed by the Fine-Structure Excitation of N II. *Frank Bertoldi & Edward B. Jenkins.* 388, 495, 56-D9 (1992)

Orion B (NGC 2024). III. BIMA SO $J_K = 2_2 \rightarrow 1_1$ Observations: Evidence for Peculiar Sulfur Chemistry. *Peter J. Barnes & Richard M. Crutcher.* 389, 325, 64-A5 (1992)

The Juggler: A Three-lobed Near-Infrared Reflection Nebula toward CRL 2136 = OH 17.6+0.2. *Joel H. Kastner, David A. Weintraub, & C. Aspin.* 389, 357, 64-D1 (1992)

Far-Infrared Observations of M17SW: The Clumpy Structure of the Photodissociation Region. *Margaret Meixner, Michael R. Haas, A. G. G. M. Tielens, E. F. Erickson, & M. Werner.* 390, 499, 81-E3 (1992)

Stellar Wind Paleontology. II. Faint Halos and Historical Mass Ejection in Planetary Nebulae. *Bruce Balick, Guillermo Gonzalez, Adam Frank, & George Jacoby.* 392, 582, 109-D11 (1992)

Recognition and Characterization of Hierarchical Interstellar Structure. II. Structure Tree Statistics. *Padraig Houlahan & John Scalo.* 393, 172, 116-C1 (1992)

A Multiwavelength Study of the Supernova Remnant N49 in the Large Magellanic Cloud. *Olaf Vancura, William P. Blair, Knox S. Long, & John C. Raymond.* 394, 158, 130-A1 (1992)

High-Resolution Imaging of the Galactic Cloud Monoceros R2. *Constantine P. Gonatas, Patrick Palmer, & G. Novak.* 398, 118, 183-D7 (1992)

Variation in the Near-Infrared Surface Brightness Distribution of the Bipolar Nebula OH 231.8+4.2. *Joel H. Kastner, David A. Weintraub, B. Zuckerman, E. E. Becklin, I. McLean, & I. Gatley.* 398, 552, 191-A8 (1992)

Interstellar Cloud Shapes: A Minimum-Hypothesis Account Involving a Purely Gravitational Effect. *Robert C. Fleck, Jr.* 401, 146, 222-G3 (1992)

Nonlinear Waves and Solitons in Molecular Clouds. *Fred C. Adams & Marco Fatuzzo.* 403, 142, 15-F13 (1993)

608 MHz VLBI Observations of the Compact Double Radio Source 2050+364: Constraints on Interstellar Scattering. *Alan L. Fey & Robert L. Mutel.* 404, 197, 30-D1 (1993)

Models of Clumpy Photodissociation Regions. *M. Meixner & A. G. G. M. Tielens.* 405, 216, 43-G2 (1993)

N_2H^+ in the Orion Ambient Ridge: Cloud Clumping versus Rotation. *Maria Womack, L. M. Ziurys, & L. J. Sage.* 406, L29, 61-A1 (1993)

The Morphology and Interaction with the Interstellar Medium of the Planetary Nebula IC 4593. *Daniel B. Zucker & Noam Soker.* 408, 579, 92-D5 (1993)

Interstellar Matter near the Pleiades. IV. The Wake of the Pleiades through the Interstellar Medium in Taurus. *Richard E. White & John Bally.* 409, 234, 99-G13 (1993)

Motion in the Orion Nebula: A Kinematic Study of [S III]. *Zheng Wen & C. R. O'Dell.* 409, 262, 100-D1 (1993)

Modeling the Structure of H I in the Galactic Disk. *Joel N. Bregman, Daniel D. Kelson, & Gregory A. Ashe.* 409, 682, 107-D9 (1993)

Angular Broadening of Pulsars and the Distribution of Interstellar Plasma Fluctuations. *C. R. Gwinn, N. Bartel, & J. M. Cordes.* 410, 673, 122-A13 (1993)

The First Detection of Ionized Helium in the Local ISM: *EUVE* and *IUE* Spectroscopy of the Hot DA Dwarf GD 246. *Stéphane Vennes, Jean Dupois, Todd Rumph, Jeremy Drake, Stuart Bowyer, Pierre Chayer, & Gilles Fontaine.* 410, L119, 126-D7 (1993)

High-Resolution H I Observations of H II Regions. III. Photodissociation Regions and the Magnetic Field near Orion B. *Paul P. van der Werf, W. M. Goss, Carl Heiles, R. M. Crutcher, & T. H. Troland.* 411, 247, 130-C8 (1993)

Hunt for Variations in Molecular Gas and Cloud Properties across the Inner, Northern Galactic Disk. *Harvey S. Liszt.* 411, 720, 138-F1 (1993)

Interferometric Observations for Oxygen-containing Organic Molecules toward Orion-KL. *Y. C. Minh, M. Ohishi, D. G. Roh, M. Ishiguro, & W. M. Irvine.* 411, 773, 139-D3 (1993)

Fast, Low-Ionization Emission Regions and Other Microstructures in Planetary Nebulae. *Bruce Balick, M. Rugers, Yervant Terzian, & Jayaram N. Chengalur.* 411, 778, 139-D10 (1993)

A Determination of the Distance to the High-Velocity Cloud Complex M. *Laura Danly, C. E. Albert, & K. D. Kuntz.* 416, L29, 207-D13 (1993)

The Diffuse Ionized Interstellar Medium: Structures Resulting from Ionization by O Stars. *Walter Warren Miller III & Donald P. Cox.* 417, 579, 226-E7 (1993)

High-Resolution Centimeter Radio Continuum and Ammonia Maser Observations of the W51 Region of Star Formation. *R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 417, 645, 227-D1 (1993)

VLA Radio Recombination Line Observations of Ionized Gas in the -30 Kilometers per Second Molecular Cloud (G0.04+0.03) near the Galactic Center. I. The Discrete Radio Sources. *Jun-Hui Zhao, K. Desai, W. M. Goss, & F. Yusef-Zadeh.* 418, 235, 234-A1 (1993)

Proto–Brown Dwarfs. I. Methods and Results for High-Latitude Clouds. *Marc W. Pound & Leo Blitz.* 418, 328, 235-B9 (1993)

Star Formation at Compressed Interfaces in Turbulent Self-gravitating Clouds. *B. G. Elmegreen.* 419, L29, 252-E1 (1993)

Structure of Dense Cores in M17 SW. I. A Multitransition CS and $C^{34}S$ Study. *Yangsheng Wang, Daniel T. Jaffe, Neal J. Evans II, Masahiko Hayashi, Ken'ichi Tatematsu, & Shudong Zhou.* 419, 707, 256-D12 (1993)

Detection of AU-Scale Structure in Molecular Clouds. *Alan P. Marscher, E. M. Moore, & Thomas M. Bania.* 419, L101, 259-G5 (1993)

Low Density of Neutral Hydrogen and Helium in the Local Interstellar Medium: *Extreme Ultraviolet Explorer* Photometry of the Lyman Continuum of the Hot White Dwarfs MCT 0501−2858, MCT 0455−2812, HZ 43, and GD 153. *Stéphane Vennes, Jean Dupuis, Stuart Bowyer, Gilles Fontaine, Alexandria Wiercigroch, Patrick Jelinsky, François Wesemael, & Roger Malina.* 421, L35, 21-G12 (1994)

Hierarchical Structure in Nearly Pressureless Flows as a Consequence of Self-similar Statistics. *Enrique Vázquez-Semadeni.* 423, 681, 57-A12 (1994)

Analysis Procedures for *ROSAT* XRT/PSPC Observations of Extended Objects and the Diffuse Background. *S. L. Snowden, D. McCammon, D. N. Burrows, & J. A. Mendenhall.* 424, 714, 73-F7 (1994)

FLIERs and Other Microstructures in Planetary Nebulae. II. *Bruce Balick, M. Perinotto, A. Maccioni, Yervant Terzian, & A. Hajian.* 424, 800, 74-F11 (1994)

Ultracompact H II Regions. II. New High-Resolution Radio Images. *S. Kurtz, E. Churchwell, & D. O. S. Wood.* 91, 659, 28-D1 (1994)

Multiple Outflows in the Bipolar Planetary Nebula M1-16: A Molecular Line Study. *Raghvendra Sahai, Alwyn Wootten, Hugo E. Schwarz, & W. Wild.* 428, 237, 131-B5 (1994)

Determining Structure in Molecular Clouds. *Jonathan P. Williams, Eugène J. de Geus, & Leo Blitz.* 428, 693, 139-A1 (1994)

DIRBE Evidence for a Warp in the Interstellar Dust Layer and Stellar Disk of the Galaxy. *H. T. Freudenreich, G. B. Berriman, E. Dwek, M. G. Hauser, T. Kelsall, S. H. Moseley, R. F. Silverberg, T. J. Sodroski, G. N. Toller, & J. L. Weiland.* 429, L69, 158-B3 (1994)

The Giant Molecular Cloud Monoceros R2. I. Shell Structure. *Taoling Xie & Paul F. Goldsmith.* 430, 252, 162-B13 (1994)

The Impact of SN 1987A with Its Circumstellar Ring. *Ding Luo, Richard McCray, & Jonathan Slavin.* 430, 264, 162-D3 (1994)

A Summary of Extreme Scattering Events and a Descriptive Model. *R. Fiedler, B. Dennison, K. J. Johnston, E. B. Waltman, & R. S. Simon.* 430, 581, 169-A13 (1994)

Galactic Structures Associated with Extreme Scattering Events in the Radio Light Curves of NRAO 140, 0954+658, and 2352+495. *R. Fiedler, T. Pauls, K. J. Johnston, & B. Dennison.* 430, 595, 169-C1 (1994)

The Spectrum of the Variable Planetary Nebula IC 4997. *Siek Hyung, Lawrence H. Aller, & Walter A. Feibelman.* 93, 465, 49-B5 (1994)

[Fe II] Emission from High-Density Regions in the Orion Nebula. *Manuel A. Bautista, Anil K. Pradhan, & Donald E. Osterbrock.* 432, L135, 207-C13 (1994)

Simulation of Variations of Absorption-Line Profiles in Clumpy Molecular Clouds. *Alan P. Marscher & Alan L. Stone.* 433, 705, 219-G2 (1994)

Broken Symmetry: The Structure of the Dust Envelope of IRC +10216. *Joel H. Kastner & David A. Weintraub.* 434, 719, 237-F7 (1994)

Ultraviolet-illuminated Molecular Cloud Boundaries: Extended [C II] 158 Micron Emission toward L1630. *D. T. Jaffe, S. Zhou, J. E. Howe, F. Herrmann, S. C. Madden, A. Poglitsch, P. P. van der Werf, & G. J. Stacey.* 436, 203, 264-A10 (1994)

Detection of a Thick Molecular Disk in the Galaxy. *T. M. Dame & P. Thaddeus.* 436, L173, 282-A3 (1994)

The Near-Infrared Structure and Spectra of the Bipolar Nebulae M2-9 and AFGL 2688: The Role of Ultraviolet Pumping and Shocks in Molecular Hydrogen Excitation. *Joseph L. Hora & William B. Latter.* 437, 281, 287-A8 (1994)

A Study of the Ultraviolet Absorption Lines through the Complete Galactic Halo by the Analysis of *HST* Faint Object Spectrograph Spectra of Active Galactic Nuclei. I. *Geoffrey S. Burks, Frank Bartko, J. Michael Shull, John T. Stocke, Elise R. Sachs, E. Margaret Burbidge, Ross D. Cohen, Vesa T. Junkkarinen, Richard J. Harms, & Derck Massa.* 437, 630, 294-D7 (1994)

The Local Distribution of Na I Interstellar Gas. *B. Y. Welsh, N. Craig, P. W. Vedder, & J. V. Vallerga.* 437, 638, 294-E4 (1994)

The Three-dimensional Structure of the Cassiopeia A Supernova Remnant. I. The Spherical Shell. *Jeri E. Reed, J. Jeff Hester, A. C. Fabian, & P. F. Winkler.* 440, 706, 53-A1 (1995)

The Deceleration Powering of Synchrotron Emission from Ejecta Components of Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 441, 307, 63-E9 (1995)

First Spectral Observations of the Diffuse Background with the *Extreme Ultraviolet Explorer*. *P. Jelinsky, J. V. Vallerga, & J. Edelstein.* 442, 653, 89-A8 (1995)

Iron to Oxygen Abundance Ratio in the Orion Nebula. *Manuel A. Bautista & Anil K. Pradhan.* 442, L65, 94-F1 (1995)

Electron Density Power Spectrum in the Local Interstellar Medium. *J. W. Armstrong, B. J. Rickett, & S. R. Spangler.* 443, 209, 98-A6 (1995)

CO and OH Absorption toward the Low-Latitude Radio Source 2023+336. *Henry A. Kobulnicky, John M. Dickey, & Rachel L. Akeson.* 443, L45, 103-A9 (1995)

Socket Stars: *UBVRIJK* Radial Profiles. *Bradley E. Schaefer.* 444, 739, 126-D13 (1995)

Gas near the Center of 30 Doradus As Revealed by *Hubble Space Telescope* Images. *Deidre A. Hunter, Edward J. Shaya, Paul Scowen, J. Jeff Hester, Edward J. Groth, Roger Lynds, & Earl J. O'Neil, Jr.* 444, 758, 126-F11 (1995)

Anatomy of the Gemini OB1 Molecular Cloud Complex. *John M. Carpenter, Ronald L. Snell, & F. Peter Schloerb.* 445, 246, 136-A4 (1995)

The Closest Planetary Nebula, Sh 2-216, and Its Interaction with the Interstellar Medium. *R. W. Tweedy, M. A. Martos, & A. Noriega-Crespo.* 447, 257, 175-G7 (1995)

Multifrequency Radio Studies of G359.1−00.2. *Andrew D. Gray, Jenniger Nicholls, Ron D. Ekers, & Lawrence E. Cram.* 448, 164, 194-D4 (1995)

WFPC2 Studies of the Crab Nebula. I. *HST* and *ROSAT* Imaging of the Synchrotron Nebula. *J. Jeff Hester, Paul A. Scowen, Ravi Sankrit, Christopher J. Burrows, John S. Gallagher III, Jon A. Holtzman, Alan Watson, John T. Trauger, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, Richard E. Griffiths, John G. Hoessel, John Krist, Roger Lynds, Jeremy R. Mould, Earl J. O'Neil, Jr., Karl R. Stapelfeldt, & James A. Westphal.* 448, 240, 195-D12 (1995)

The Sagittarius B2 Star-forming Region. I. Sensitive 1.3 Centimeter Continuum Observations. *R. A. Gaume, M. J. Claussen, C. G. De Pree, W. M. Goss, & D. M. Mehringer.* 449, 663, 221-G5 (1995)

The Sagittarius B2 Star-forming Region. II. High-Resolution H66α Observations of Sagittarius B2 North. *C. G. De Pree, R. A. Gaume, W. M. Goss, & M. J. Claussen.* 451, 284, 249-G6 (1995)

Investigating the Near-Infrared Properties of Planetary Nebulae. I. Narrowband Images. *William B. Latter, Douglas M. Kelly, Joseph L. Hora, & Lynne K. Deutsch.* 100, 159, 48-A8 (1995)

Maps of the Molecular Emission around 18 Evolved Stars. *K. Z. Stanek, G. R. Knapp, K. Young, & T. G. Phillips.* 100, 169, 48-C8 (1995)

A Three-dimensional Study Using Light Echoes of the Structure of the Interstellar Medium in Front of SN 1987A. *Jun Xu, Arlin P. S. Crotts, & William E. Kunkel.* 451, 806, 258-C6 (1995)

Evolutionary Paths in Multiple-Shell Planetary Nebulae. *Letizia Stanghellini & Anna Pasquali.* 452, 286, 266-B1 (1995)

Observational Probes of the Small-Scale Structure of Molecular Clouds. *E. M. Moore & Alan P. Marscher.* 452, 671, 273-G13 (1995)

Near-Infrared and Very High Sensitivity VLA 2 Centimeter Continuum Observations of the H II Region G29.96−0.02. *Alan L. Fey, Ralph A. Gaume, Mark J. Claussen, & Frederick J. Vrba.* 453, 308, 285-C14 (1995)

The Multiphase Structure of the Galactic Halo: High-Velocity Clouds in a Hot Corona. *Mark G. Wolfire, Christopher F. McKee, David Hollenbach, & A. G. G. M. Tielens.* 453, 673, 293-B3 (1995)

The Infrared Nebula and Outflow in Lynds 483. *G. A. Fuller, E. A. Lada, C. R. Masson, & P. C. Myers.* 453, 754, 294-C3 (1995)

A Multiwavelength Study of 30 Doradus: The Interstellar Medium in a Low-Metallicity Galaxy. *A. Poglitsch, A. Krabbe, S. C. Madden, T. Nikola, N. Geis, L. E. B. Johansson, G. J. Stacey, & A. Sternberg.* 454, 293, 303-C8 (1995)

High-Resolution Far-Infrared Observations and Radiative-Transfer Models of W3 IRS 4 and IRS 5. *M. F. Campbell, H. M. Butner, P. M. Harvey, N. J. Evans II, M. B. Campbell, & C. N. Sabbey.* 454, 831, 313-C6 (1995)

Wolf-Rayet Bubbles. I. Analytic Solutions. *Guillermo García-Segura & Mordecai-Mark Mac Low.* 455, 145, 320-B13 (1995)

A Very Luminous Binary Millisecond Pulsar. *José Navarro, A. G. de Bruyn, D. A. Frail, S. R. Kulkarni, & A. G. Lyne.* 455, L55, 325-C1 (1995)

Hot White Dwarfs in the Local Interstellar Medium: Hydrogen and Helium Interstellar Column Densities and Stellar Effective Temperatures from *Extreme-Ultraviolet Explorer* Spectroscopy. *Jean Dupuis, Stéphane Vennes, Stuart Bowyer, Anil K. Pradhan, & Peter Thejll.* 455, 574, 329-G3 (1995)

ISM: SUPERNOVA REMNANTS

Discovery of X-Ray Emission Associated with the Gum Nebula. *D. A. Leahy, J. Nousek, & G. Garmire.* 385, 561, 20-B4 (1992)

Strongly Shocked Interstellar Gas in IC 443. I. High-Resolution Molecular Observations. *Z. Wang & N. Z. Scoville.* 386, 158, 26-B3 (1992)

Faraday Rotation Measure Irregularities through the Supernova Remnant CTA 1: A Site of Enhanced Interstellar Plasma Turbulence. *John H. Simonetti.* 386, 170, 26-C3 (1992)

The Spectral Archive of Cosmic X-Ray Sources Observed by the *Einstein Observatory* Focal Plane Crystal Spectrometer. *Kenneth S. K. Lum, Claude R. Canizares, George W. Clark, Joan M. Coyne, Thomas H. Markert, Pablo J. Saez, Mark L. Schattenburg, & P. Frank Winkler.* 78, 423, 8-E11 (1992)

The [O I] λλ6300,6364 Doublet of SN 1987A. *Hongwei Li & Richard McCray.* 387, 309, 40-F12 (1992)

The Semicircular Shell of CTB 109. *Zhenru Wang, Quinyue Qu, Ding Luo, Richard McCray, & Mordecai-Mark Mac Low.* 388, 127, 50-E10 (1992)

G203.2−12.3: A New Optical Supernova Remnant in Orion. *P. Frank Winkler & Bo Reipurth.* 389, L25, 66-D1 (1992)

On the Optical Counterpart of 1E 1207.4−5209, the Central X-Ray Source of a Ring-shaped Supernova Remnant. *Giovanni F. Bignami, Patrizia A. Caraveo, & Sandro Mereghetti.* 389, L67, 73-D5 (1992)

Detection of an Unresolved Nuclear Radio Source in M31. *Patrick C. Crane, John R. Dickel, & John J. Cowan.* 390, L9, 78-B7 (1992)

The Three-dimensional Interaction of a Supernova Remnant with an Interstellar Cloud. *James M. Stone & Michael L. Norman.* 390, L17, 78-C11 (1992)

Hydrodynamic Instabilities in Supernova Remnants: Self-similar Driven Waves. *Roger A. Chevalier, John M. Blondin, & Robert T. Emmering.* 392, 118, 102-D9 (1992)

Completing the Evolution of Supernova Remnants and Their Bubbles. *Jonathan D. Slavin & Donald P. Cox.* 392, 131, 102-E9 (1992)

Activity and Radio Spectral Index Variations near the Center of the Crab Nebula. *M. F. Bietenholz & P. P. Kronberg.* 393, 206, 116-F1 (1992)

Shock Breakout in SN 1987A. *Lisa Ensman & Adam Burrows.* 393, 742, 125-A10 (1992)

A Speckle Hologram of the Interstellar Plasma. *K. M. Desai, C. R. Gwinn, J. Reynolds, E. A. King, D. Jauncey, C. Flanagan, G. Nicolson, R. A. Preston, & D. L. Jones.* 393, L75, 127-E7 (1992)

A Multiwavelength Study of the Supernova Remnant N49 in the Large Magellanic Cloud. *Olaf Vancura, William P. Blair, Knox S. Long, & John C. Raymond.* 394, 158, 130-A1 (1992)

The Compression of the M-0.02-0.07 Molecular Cloud by the Sagittarius A East Shell Source. *E. Serabyn, J. H. Lacy, & J. M. Achtermann.* 395, 166, 142-C1 (1992)

Ultraviolet Imaging Telescope Observations of the Cygnus Loop. *Robert H. Cornett, Edward B. Jenkins, Ralph C. Bohlin, Kwang-Ping Cheng, Theodore R. Gull, Robert W. O'Connell, Robert A. R. Parker, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L9, 144-D7 (1992)

Ultraviolet Imaging Telescope Observations of the Crab Nebula. *Gregory S. Hennessy, Robert W. O'Connell, Kwang P. Cheng, Ralph C. Bohlin, Nicholas R. Collins, Theodore R. Gull, Paul Hintzen, Joan E. Isensee, Wayne B. Landsman, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L13, 144-E5 (1992)

Astro-1 Ultraviolet Imaging of the 30 Doradus and SN 1987A Fields with the Ultraviolet Imaging Telescope. *Kwang-Ping Cheng, Andrew G. Michalitsianos, Paul Hintzen, Ralph C. Bohlin, Robert W. O'Connell, Robert H. Cornett, Morton S. Roberts, Andrew M. Smith, Eric P. Smith, & Theodore P. Stecher.* 395, L29, 145-A1 (1992)

Pulsar Nebulae in Supernovae. *Roger A. Chevalier & Claes Fransson.* 395, 540, 149-E3 (1992)

A Rapid Decline in the Optical Emission from SN 1957D in M83. *Knox S. Long, P. Frank Winkler, & William P. Blair.* 395, 632, 151-A5 (1992)

High-Resolution Optical Imaging of the Large Magellanic Cloud Plerion 0540−69. *P. A. Caraveo, G. F. Bignami, S. Mereghetti, & M. Mombelli.* 395, L103, 154-B11 (1992)

An *IRAS* Survey of Galactic Supernova Remnants. *Jon M. Saken, Robert A. Fesen, & J. Michael Shull.* 81, 715, 45-F9 (1992)

Diffusive Acceleration of Electrons in SN 1987A. *Lewis Ball & J. G. Kirk.* 396, L39, 160-G1 (1992)

Cosmic-Ray–modified Supernova Remnant Shocks. *T. W. Jones & Hyesung Kang.* 396, 575, 164-E9 (1992)

X-Ray Emission from SN 1986J in NGC 891. *Joel N. Bregman & Rachel A. Pildis.* 398, L107, 194-E7 (1992)

A Comparison of Models for Supernova Remnants Including Cosmic Rays. *Hyesung Kang & L. O'C. Drury.* 399, 182, 197-D11 (1992)

Electron Acceleration in Tycho's and Kepler's Supernova Remnants: Spectral Evidence of Fermi Shock Acceleration. *Stephen P. Reynolds & Donald C. Ellison.* 399, L75, 201-B1 (1992)

The Synchrotron Bays of the Crab Nebula: A Magnetic Structure Associated with a Presupernova Circumstellar Disk. *Robert A. Fesen, Crystal L. Martin, & J. Michael Shull.* 399, 599, 205-C7 (1992)

Far-Ultraviolet Observations of the Crab Nebula Using the Hopkins Ultraviolet Telescope. *William P. Blair, Knox S. Long, Olaf Vancura, Charles W. Bowers, Sarah Conger, Arthur F. Davidsen, Gerard A. Kriss, & Richard B. C. Henry.* 399, 611, 205-E1 (1992)

G308.8−0.1: An Unusual Supernova Remnant Containing a Short-Period Pulsar, PSR J1341−6220. *J. L. Caswell, M. J. Kesteven, R. T. Stewart, D. K. Milne, & R. F. Haynes.* 399, L151, 208-D1 (1992)

PSR J1341−6220: A Young Pulsar in a Supernova Remnant. *Victoria M. Kaspi, R. N. Manchester, Simon Johnston, A. G. Lyne, & N. D'Amico.* 399, L155, 208-D5 (1992)

Shock Wave Emergence at the Stellar Surface and the Subsequent Gas Expansion into a Vacuum: The Sphericity Involvement. *Ya. M. Kazhdan & Marina Murzina.* 400, 192, 211-C9 (1992)

Structure and Kinematics of Dense Gas Associated with the Supernova Remnant IC 443. *R. L. Dickman, Ronald L. Snell, L. M. Ziurys, & Yi-Long Huang.* 400, 203, 211-C9 (1992)

Spectroscopy of a Balmer-dominated Filament in the Cygnus Loop with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Olaf Vancura, Charles W. Bowers, Arthur F. Davidsen, & John C. Raymond.* 400, 214, 211-E8 (1992)

Dynamics of Kepler's Supernova Remnant. *Kazimierz J. Borkowski, John M. Blondin, & Craig L. Sarazin.* 400, 222, 211-F5 (1992)

Infrared Emission from X-Ray and Optically Emitting Regions in the Cygnus Loop Supernova Remnant. *Richard G. Arendt, Eli Dwek, & David Leisawitz.* 400, 562, 217-D1 (1992)

Two-Temperature Models of Old Supernova Remnants with Ion and Electron Thermal Conduction. *Wei Cui & Donald P. Cox.* 401, 206, 223-F1 (1992)

Far-Ultraviolet Observations of the Supernova Remnant N49 Using the Hopkins Ultraviolet Telescope. *Olaf Vancura, William P. Blair, Knox S. Long, Arthur F. Davidsen, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Henry C. Ferguson, Richard C. Henry, Randy A. Kimble, Gerard A. Kriss, Jeffrey W. Kruk, & H. Warren Moos.* 401, 220, 223-G1 (1992)

Radio Detection of PSR B0540−69. *R. N. Manchester, D. P. Mar, A. G. Lyne, V. M. Kaspi, & S. Johnston.* 403, L29, 20-D1 (1993)

Faint Object Camera Observations of the Shape and Expansion of SN 1987A. *P. Jakobsen, F. Macchetto, & N. Panagia.* 403, 736, 24-G10 (1993)

CCD Mosaic Images of the Supernova Remnant 3C 400.2. *P. Frank Winkler, Todd M. Olinger, & Scott A. Westerbeke.* 405, 608, 50-F1 (1993)

A Multiwavelength Study of the Eridanus Soft X-Ray Enhancement. *D. N. Burrows, K. P. Singh, J. A. Nousek, G. P. Garmire, & J. Good.* 406, 97, 56-C7 (1993)

The Impact of Supernova Fragments on the Evolution of Multisupernova Remnants. *J. Franco, A. Ferrara, M. Różyczka, G. Tenorio-Tagle, & D. P. Cox.* 407, 100, 70-C11 (1993)

The Optical Recovery of SN 1979C in NGC 4321 (M100). *Robert A. Fesen & David M. Matonick.* 407, 110, 70-D9 (1993)

Nonlinear Growth of Dynamical Overstabilities in Blast Waves. *Mordecai-Mark Mac Low & Michael L. Norman.* 407, 207, 71-E11 (1993)

Optical Emission-Line Properties of M33 Supernova Remnants. *R. Chris Smith, Robert P. Kirshner, William P. Blair, Knox S. Long, & P. Frank Winkler.* 407, 564, 77-E9 (1993)

The Freeze-out Phase of SN 1987A: Implications for the Light Curve. *Claes Fransson & Cecilia Kozma.* 408, L25, 89-A1 (1993)

Spatial Spectral Index Variations in Galactic Shell Supernova Remnants G39.2−0.3 and G41.1−0.3. *Martha C. Anderson & Lawrence Rudnick.* 408, 514, 91-E9 (1993)

Deep VLA Imaging of Pulsar-powered Nebulae and the Beaming Fraction of Young Pulsars. *Dale A. Frail & David A. Moffett.* 408, 637, 93-B5 (1993)

Star Trapping and Metallicity Enrichment in Quasars and Active Galactic Nuclei. *Paweł Artymowicz, D. N. C. Lin, & E. Joseph Wampler.* 409, 592, 106-C12 (1993)

Large-Scale Explosions and Superbubbles in the Galactic Disk and Halo. I. Magnetohydrodynamic Simulations. *Shin Mineshige, Kazunari Shibata, & Paul R. Shapiro.* 409, 663, 107-C1 (1993)

Modeling the Structure of H I in the Galactic Disk. *Joel N. Bregman, Daniel D. Kelson, & Gregory A. Ashe.* 409, 682, 107-D9 (1993)

A Young, Glitching Pulsar near the Direction of W28. *V. M. Kaspi, A. G. Lyne, R. N. Manchester, S. Johnston, N. D'Amico, & S. L. Shemar.* 409, L57, 111-E1 (1993)

Angular Broadening of Pulsars and the Distribution of Interstellar Plasma Fluctuations. *C. R. Gwinn, N. Bartel, & J. M. Cordes.* 410, 673, 122-A13 (1993)

The Radio Structure of Supernova Remnant 0540−693. *R. N. Manchester, L. Staveley-Smith, & M. J. Kesteven.* 411, 756, 139-B8 (1993)

New Radio Observations of Supernova Remnant 1E 0102.2−7219 in the Small Magellanic Cloud. *S. W. Amy & Lewis Ball.* 411, 761, 139-C1 (1993)

Radio Emission from Young Supernova Remnants. II. Evolution and Dependence on Characteristics of the Progenitor and the External Medium. *John R. Dickel, Jean A. Eilek, & Eric M. Jones.* 412, 648, 151-G7 (1993)

A Model of Unpulsed Gamma Rays from the Crab Pulsar. *W. M. Cheung & K. S. Cheng.* 413, 694, 165-B1 (1993)

The Optical Recovery of SN 1970G in M101 (NGC 5457). *Robert A. Fesen.* 413, L109, 168-G13 (1993)

Hidden Supernova Remnants in the Large Magellanic Cloud H II Complex N44. *You-Hua Chu, Mordecai-Mark Mac Low, Guillermo Garcia-Segura, Bart Wakker, & Robert C. Kennicutt, Jr.* 414, 213, 172-F2 (1993)

High-Resolution X-Ray Spectroscopy of the Supernova Remnant N132D. *Una Hwang, John P. Hughes, Claude R. Canizares, & Thomas H. Markert.* 414, 219, 172-F11 (1993)

Alfvénic Fluctuations in a Relativistic Wind with a Spiral Magnetic Field and Random Magnetic Field Structures in the Crab Nebula. *Yu-Qing Lou.* 414, 656, 179-D2 (1993)

X-Rays from SN 1986J: Emission of a Shocked Clumpy Wind. *N. N. Chugai.* 414, L101, 185-G10 (1993)

Further Observations of the Peculiar Galactic Radio Source G318.9+0.4. *Jonathan B. Z. Whiteoak.* 415, 701, 196-E3 (1993)

Associating Young Pulsars and Supernova Remnants: PSR 1610−50 and the Case for High-Velocity Pulsars. *Patrizia A. Caraveo.* 415, L111, 200-B6 (1993)

Faint Object Spectrograph Spectra of the Broad Fe II Absorption Lines in the Remnant of SN 1006. *Chi-Chao Wu, D. Michael Crenshaw, Robert A. Fesen, Andrew J. S. Hamilton, & Craig L. Sarazin.* 416, 247, 204-B7 (1993)

Evolution of Supernova Remnant Bubbles in a Warm Diffuse Medium: Survey of Results from One-dimensional Models and Their Impact on Estimates of Interstellar Porosity. *Jonathan D. Slavin & Donald P. Cox.* 417, 187, 219-F12 (1993)

Interaction between the Supernova Remnant CTB 80 and the Ambient Interstellar Medium: H I and CO Observations. *Bon-Chul Koo, Min-Su Yun, Paul T. P. Ho, & Youngung Lee.* 417, 196, 219-G10 (1993)

A Far-Ultraviolet Study of the Cygnus Loop Using the *Voyager* Ultraviolet Spectrometers. *Olaf Vancura, William P. Blair, Knox S. Long, John C. Raymond, & J. B. Holberg.* 417, 663, 227-E11 (1993)

The Discovery of a Supernova Remnant Embedded in a Giant H II Region of M33. *Shawn M. Gordon, Robert P. Kirshner, Nebojsa Duric, & Knox S. Long.* 418, 743, 241-F10 (1993)

ROSAT Observations of the Composite Supernova Remnant G326.3−1.8. *Namir E. Kassim, Paul Hertz, & Kurt W. Weiler.* 419, 733, 256-F13 (1993)

Iron, Cobalt, and Nickel in SN 1987A. *Hongwei Li, Richard McCray, & Rashid A. Sunyaev.* 419, 824, 257-G10 (1993)

On the Hydrodynamic Interaction of Shock Waves with Interstellar Clouds. I. Nonradiative Shocks in Small Clouds. *Richard I. Klein, Christopher F. McKee, & Philip Colella.* 420, 213, 3-E5 (1994)

Emission from Circumstellar Interaction in Normal Type II Supernovae. *Roger A. Chevalier & Claes Fransson.* 420, 268, 4-C1 (1994)

High-Resolution Spectroscopy of Balmer-dominated Shocks in the Large Magellanic Cloud. *R. Chris Smith, John C. Raymond, & J. Martin Laming.* 420, 286, 4-D7 (1994)

Detection of X-Rays from SN 1987A with *ROSAT*. *Paul Gorenstein, John P. Hughes, & Wallace H. Tucker.* 420, L25, 7-D8 (1994)

The Balmer-dominated Northeast Limb of the Cygnus Loop Supernova Remnant. *J. Jeff Hester, John C. Raymond, & William P. Blair.* 420, 721, 11-G7 (1994)

Bright Radio Continuum Emission from Star Formation in the Cores of Nearby Spiral Galaxies. *Jean L. Turner & Paul T. P. Ho.* 421, 122, 17-E7 (1994)

Revised Proper-Motion Results for the Soft X-Ray–emitting Radio Pulsar PSR 0656+14. *R. J. Thompson, Jr., & F. A. Córdova.* 421, L13, 21-D11 (1994)

ROSAT Observations of VRO 42.05.01. *David N. Burrows & Zhiyu Guo.* 421, L19, 21-E7 (1994)

The Dynamical and Radiative Evolution of Clumpy Supernova Ejecta. *M. C. Anderson, T. W. Jones, L. Rudnick, I. L. Tregillis, & Hyesung Kang.* 421, L31, 21-G1 (1994)

High-Resolution Images of Shocked Molecular Clumps in the Supernova Remnant IC 443. *Jan A. Tauber, Ronald L. Snell, Robert L. Dickman, & L. M. Ziurys.* 421, 570, 25-C4 (1994)

The Outer Shell of SNR 0540−69.3. *F. D. Seward & F. R. Harnden, Jr.* 421, 581, 25-D5 (1994)

Elemental Abundances of the Supernova Remnant G292.0+1.8: Evidence for a Massive Progenitor. *John P. Hughes & K. P. Singh.* 422, 126, 31-F1 (1994)

The Spectral Turnover of the "Filled-Center" Supernova Remnant 3C 58: Implications for When Acceleration Occurs. *D. A. Green.* 90, 817, 13-G12 (1994)

Evolution of Supernova Remnants with Cosmic Rays and Radiative Cooling. *E. A. Dorfi.* 90, 841, 14-B14 (1994)

Model Images of Radio Halos around Supernova Remnants. *Stephen P. Reynolds.* 90, 845, 14-C6 (1994)

IUE Spectra and Optical Imaging of the Oxygen-rich Supernova Remnant N132D. *William P. Blair, John C. Raymond, & Knox S. Long.* 423, 334, 50-C7 (1994)

Compact Radio Sources in the Starburst Galaxy M82 and the $\Sigma - D$ Relation for Supernova Remnants. *Z. P. Huang, T. X. Thuan, R. A. Chevalier, J. J. Condon, & Q. F. Yin.* 424, 114, 63-D7 (1994)

Do the Compact Radio Sources in NGC 253 and M82 Fade over Time? *James S. Ulvestad & Robert R. J. Antonucci.* 424, L29, 69-D10 (1994)

X-Ray Enhancement of SN 1987A Due to Interaction with Its Ringlike Nebula. *Kuniaki Masai & Ken'ichi Nomoto.* 424, 924, 76-C3 (1994)

The Very Luminous Supernova Remnant in NGC 6946. *Eric M. Schlegel.* 424, L99, 79-B3 (1994)

The Optical Counterpart to the Luminous X-Ray Supernova Remnant in NGC 6946. *William P. Blair & Robert A. Fesen.* 424, L103, 79-B9 (1994)

Shock-excited Maser Emission from the Supernova Remnant W28. *D. A. Frail, W. M. Goss, & V. I. Slysh.* 424, L111, 79-C8 (1994)

The Ring around Supernova 1987A Revisited. I. Ellipticity of the Ring. *Andrew Gould.* 425, 51, 80-G2 (1994)

High-Resolution Measurements of NH_3 Absorption toward Cassiopeia A. *R. A. Gaume, T. L. Wilson, & K. J. Johnston.* 425, 127, 81-G1 (1994)

CCD Soft X-Ray Observations of the Puppis A Supernova Remnant. *G. D. Berthiaume, D. N. Burrows, G. P. Garmire, & J. A. Nousek.* 425, 132, 81-G8 (1994)

Multifrequency Studies of Bright Radio Supernova Remnants. I. 3C 391. *David A. Moffett & Stephen P. Reynolds.* 425, 668, 90-A1 (1994)

The Radio Counterpart to the Luminous X-Ray Supernova Remnant in NGC 6946. *Schuyler D. Van Dyk, Richard A. Sramek, Kurt W. Weiler, Scott D. Hyman, & Rachel E. Virden.* 425, L77, 94-D1 (1994)

Electron Injection and Acceleration at Nonlinear Shocks: Results of Numerical Simulations. *Amir Levinson.* 426, 327, 100-C1 (1994)

0.95–1.3 Micron Spectrophotometry of Two Bright Filaments of the Crab Nebula. *Richard J. Rudy, George S. Rossano, & R. C. Puetter.* 426, 646, 106-D10 (1994)

X-Ray Observations of Supernova Remnants as Distance Indicators. *Namir E. Kassim, Paul Hertz, Schuyler D. Van Dyk, & Kurt W. Weiler.* 427, L95, 127-B5 (1994)

The Late-Time Optical Spectrum of SN 1980K. *Robert A. Fesen & David M. Matonick.* 428, 157, 130-B7 (1994)

Geminga: A Cooling Superfluid Neutron Star. *Dany Page.* 428, 250, 131-C6 (1994)

Magnetic Fields in Young Supernova Remnants. *Yu-Qing Lou.* 428, L21, 134-D2 (1994)

Implications of ^{26}Al Emission at 1.8 MeV from the Vela Region. *U. Oberlack, R. Diehl, T. Montmerle, N. Prantzos, & P. von Ballmoos.* 92, 433, 37-E7 (1994)

On the X-Ray Spectrum of Kepler's Supernova Remnant. *Kazimierz J. Borkowski, Craig L. Sarazin, & John M. Blondin.* 429, 710, 154-E1 (1994)

Observation of 7 TeV Gamma Rays from the Crab Using the Large Zenith Angle Air Čerenkov Imaging Technique. *T. Tanimori, T. Tsukagoshi, T. Kifune, P. G. Edwards, M. Fujimoto, T. Hara, N. Hayashida, Y. Matsubara, Y. Mizumoto, Y. Muraki, S. Ogio, J. R. Patterson, M. D. Roberts, G. Rowell, T. Suda, T. Tamura, M. Teshima, G. J. Thornton, T. Watase, & T. Yoshikoshi.* 429, L61, 158-A5 (1994)

An X-Ray and Optical Study of the Supernova Remnant W44. *Jeonghee Rho, R. Petre, Eric M. Schlegel, & J. Jeff Hester.* 430, 757, 171-C8 (1994)

G25.5+0.2: A Ring Nebula around a Luminous Blue Star. *E. E. Becklin, B. Zuckerman, I. S. McLean, & T. R. Geballe.* 430, 774, 171-E1 (1994)

A Study of X-Ray and Infrared Emissions from Dusty Nonradiative Shock Waves. *Olaf Vancura, John C. Raymond, Eli Dwek, William P. Blair, Knox S. Long, & Scott Foster.* 431, 188, 178-D13 (1994)

Supernova Remnant Candidates for the Soft γ-Ray Repeater 1900+14. *G. Vasisht, S. R. Kulkarni, D. A. Frail, & J. Greiner.* 431, L35, 182-F11 (1994)

A More Direct Measure of Supernova Rates in Starburst Galaxies. *Dave Van Buren & Matthew A. Greenhouse.* 431, 640, 186-E5 (1994)

An X-Ray Study of Five Supernova Remnants in the Carina Spiral Arm. *Una Hwang & Thomas H. Markert.* 431, 819, 188-G5 (1994)

The Unusual Tail of the Tornado Nebula. *R. T. Stewart, R. F. Haynes, A. D. Gray, & W. Reich.* 432, L39, 199-F2 (1994)

Extraordinary Line-emitting Knots in the Crab Nebula. *Gordon M. MacAlpine, Stephen S. Lawrence, Beth A. Brown, Alan Uomoto, Bruce E. Woodgate, Larry W. Brown, Ronald J. Oliversen, James D. Lowenthal, & Charles Liu.* 432, L131, 207-C5 (1994)

Shock Interactions with Magnetized Interstellar Clouds. I. Steady Shocks Hitting Nonradiative Clouds. *Mordecai-Mark Mac Low, Christopher F. McKee, Richard I. Klein, James M. Stone, & Michael L. Norman.* 433, 757, 220-E2 (1994)

Radio Observations of M83 and Its Supernova Remnants. *John J. Cowan, Douglas A. Roberts, & David Branch.* 434, 128, 226-G10 (1994)

The PSR 1800−21/G8.7−0.1 Association: A View from *ROSAT*. *John P. Finley & Hakki Ögelman.* 434, L25, 232-D11 (1994)

The Nature of the Compact X-Ray Source in the Supernova Remnant G27.4+0.0. *David J. Helfand, R. H. Becker, G. Hawkins, & R. L. White.* 434, 627, 236-D9 (1994)

Spectroscopy of the Supernova Remnant CTB 1. *Charles J. Hailey & William W. Craig.* 434, 635, 236-E6 (1994)

Two New Light Echo Structures from SN 1987A at Large Distances. *Jun Xu, Arlin P. S. Crotts, & William E. Kunkel.* 435, 274, 247-B1 (1994)

Observations of SN 1987A with the COSTAR-corrected Faint Object Camera. *P. Jakobsen, R. Jedrzejewski, F. Macchetto, & N. Panagia.* 435, L47, 252-C2 (1994)

Thin Shell Formation in Radiative Shocks. I. Supernova Remnants in Low-Density Media. *José Franco, Walter Warren Miller III, S. J. Arthur, Guillermo Tenorio-Tagle, & Roberto Terlevich.* 435, 805, 257-B10 (1994)

Electron Energy Loss in Oxygen Plasmas. *G. A. Victor, John C. Raymond, & J. L. Fox.* 435, 864, 258-A7 (1994)

ROSAT PSPC Observation of the Northeast Region of the Vela Supernova Remnant. I. Evidence of Thermal Structure on a Scale of 5′. *F. Bocchino, A. Maggio, & S. Sciortino.* 437, 209, 286-B1 (1994)

Multifrequency Studies of Bright Radio Supernova Remnants. II. W49B. *David A. Moffett & Stephen P. Reynolds.* 437, 705, 295-D9 (1994)

Nonequilibria in Thermal Emission from Supernova Remnants. *Kuniaki Masai.* 437, 770, 296-C2 (1994)

The Radio Lifetime of Supernova Remnants and the Distribution of Pulsar Velocities at Birth. *D. A. Frail, W. M. Goss, & J. B. Z. Whiteoak.* 437, 781, 296-D2 (1994)

The Circumstellar Envelope of SN 1987A. I. The Shape of the Double-lobed Nebula and Its Rings and the Distance to the Large Magellanic Cloud. *Arlin P. S. Crotts, William E. Kunkel, & Stephen R. Heathcote.* 438, 724, 14-B11 (1995)

Neutral Gas Contributions to [S II] Emission. *S. J. Petuchowski & C. L. Bennett.* 438, 735, 14-D3 (1995)

Very High Energy Gamma Rays from PSR 1706−44. *T. Kifune, T. Tanimori, S. Ogio, T. Tamura, H. Fujii, M. Fujimoto, T. Hara, N. Hayashida, S. Kabe, F. Kakimoto, Y. Matsubara, Y. Mizumoto, Y. Muraki, T. Suda, M. Teshima, T. Tsukagoshi, Y. Watase, T. Yoshikoshi, P. G. Edwards, J. R. Patterson, M. D. Roberts, G. P. Rowell, & G. J. Thornton.* 438, L91, 20-A1 (1995)

Young Oxygen-rich Supernova Remnants. II. An Oxygen-rich Emission Mechanism. *Ralph S. Sutherland & Michael A. Dopita.* 439, 381, 26-D4 (1995)

ROSAT Observations of the Eridanus Soft X-Ray Enhancement. *S. L. Snowden, D. N. Burrows, W. T. Sanders, B. Aschenbach, & E. Pfeffermann.* 439, 399, 26-E11 (1995)

A *ROSAT* Observation of the Supernova Remnant Kesteven 79. *F. D. Seward & T. Velusamy.* 439, 715, 34-D13 (1995)

ROSAT Observations of the Unusual Supernova Remnant CTB 80 Containing the Pulsar PSR 1951+32. *Samar Safi-Harb, Hakki Ögelman, & John P. Finley.* 439, 722, 34-E10 (1995)

High-Velocity, High-Excitation Neutral Carbon in a Cloud in the Vela Supernova Remnant. *Edward B. Jenkins & George Wallerstein.* 440, 227, 44-C13 (1995)

The Three-dimensional Structure of the Cassiopeia A Supernova Remnant. I. The Spherical Shell. *Jeri E. Reed, J. Jeff Hester, A. C. Fabian, & P. F. Winkler.* 440, 706, 53-A1 (1995)

Radio Monitoring and High-Resolution Imaging of the Soft Gamma-Ray Repeater 1806−20. *G. Vasisht, D. A. Frail, & S. R. Kulkarni.* 440, L65, 57-F6 (1995)

The Hot Gas Filling Factor in the Vicinity of the Sun. *K. M. Ferrière.* 441, 281, 63-B12 (1995)

The Polarization and Depolarization of Radio Emission from Supernova Remnant Cassiopeia A. *M. C. Anderson, J. W. Keohane, & L. Rudnick.* 441, 300, 63-D7 (1995)

The Deceleration Powering of Synchrotron Emission from Ejecta Components of Supernova Remnant Cassiopeia A. *M. C. Anderson & L. Rudnick.* 441, 307, 63-E9 (1995)

High-Resolution X-Ray Imaging of M33. *Eric Schulman & Joel N. Bregman.* 441, 568, 69-G6 (1995)

Evidence for Elemental Variation in the Ejecta of the Tycho Supernova Remnant. *O. Vancura, P. Gorenstein, & John P. Hughes.* 441, 680, 71-D1 (1995)

A Fast Expanding H I Shell in W44: A Preexisting Wind-blown Shell Overtaken by a Supernova Remnant. *Bon-Chul Koo & Carl Heiles.* 442, 679, 89-E1 (1995)

ROSAT Observations of the Supernova Remnant 3C 400.2. *Jon M. Saken, Knox S. Long, William P. Blair, & P. Frank Winkler.* 443, 231, 98-C6 (1995)

High-Resolution Measurements of the Kα Spectra of Low-Ionization Species of Iron: A New Spectral Signature of Nonequilibrium Ionization Conditions in Young Supernova Remnants. *V. Decaux, P. Beiersdorfer, A. Osterheld, M. Chen, & S. M. Kahn.* 443, 464, 101-D13 (1995)

A Star Trail Model of the Galactic Center Snake. *Jennifer Nicholls & E. T. Le Strange.* 443, 638, 106-F3 (1995)

The Radio Detection of SN 1968D in NGC 6946. *Scott D. Hyman, Schuyler D. Van Dyk, Kurt W. Weiler, & Richard A. Sramek.* 443, L77, 112-A2 (1995)

CGRO/OSSE Observations of the Cassiopeia A Supernova Remnant. *L.-S. The, M. D. Leising, D. D. Clayton, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, G. V. Jung, D. A. Grabelsky, W. R. Purcell, & M. P. Ulmer.* 444, 244, 116-G4 (1995)

An X-Ray and Optical Study of the Interaction of the Cygnus Loop Supernova Remnant with an Interstellar Cloud. *James R. Graham, N. A. Levenson, J. J. Hester, J. C. Raymond, & R. Petre.* 444, 787, 127-C8 (1995)

ASCA Observations of the Large Magellanic Cloud Supernova Remnant Sample: Typing Supernovae from Their Remnants. *John P. Hughes, Ichizo Hayashi, David Helfand, Una Hwang, Masayuki Itoh, Robert Kirshner, Katsuji Koyama, Thomas Markert, Hiroshi Tsunemi, & Jonathan Woo.* 444, L81, 130-E1 (1995)

The Relativistic ISM in M33: Role of the Supernova Remnants. *N. Duric, S. M. Gordon, W. M. Goss, F. Viallefond, & C. Lacey.* 445, 173, 134-G8 (1995)

A Supergiant Supernova-blown Bubble in the Spiral Galaxy NGC 1620. *J. Patricia Vader & Brian Chaboyer.* 445, 691, 144-F1 (1995)

Observational Constraints on the Maximum Neutron Star Mass. *H. A. Bethe & G. E. Brown.* 445, L129, 151-E1 (1995)

Similarity Solution for a Supernova Remnant Evolving in an Inhomogeneous Stellar Wind. *Yang Chen, Ning Liu, & Zhen-ru Wang.* 446, 755, 166-D11 (1995)

The Optical Counterpart to the Extremely Luminous X-Ray Source near Holmberg IX: A Possible Supershell in a Tidal Tail. *Bryan W. Miller.* 446, L75, 170-G4 (1995)

ROSAT Observations of the Supernova Remnant W51C. *Bon-Chul Koo, Kee-Tae Kim, & Frederick D. Seward.* 447, 211, 175-B8 (1995)

Negative Search for a Counterpart to the Gamma-Ray Repeater Source 0525−66. *John R. Dickel, You-Hua Chu, Christopher Gelino, Ross Beyer, Michael G. Burton, D. K. Milne, Jason Spyromilio, David A. Green, Christopher Wilkinson, & Norbert Junkes.* 448, 623, 203-D1 (1995)

Detection of Pure Rotational H_2 Emission from the Supernova Remnant IC 443: Further Evidence for a Partially Dissociating J-Shock. *Matthew J. Richter, James. R. Graham, Gillian S. Wright, Douglas M. Kelly, & John H. Lacy.* 449, L83, 217-D2 (1995)

A *ROSAT*-detected, New Galactic Supernova Remnant in Sagittarius, G13.3−1.3. *F. D. Seward, T. M. Dame, R. A. Fesen, & B. Aschenbach.* 449, 681, 222-B7 (1995)

A Search for *r*-Process Elements in the Vela Supernova Remnant. *George Wallerstein, Andrew D. Vanture, Edward B. Jenkins, & George M. Fuller.* 449, 688, 222-C10 (1995)

A Three-dimensional Study Using Light Echoes of the Structure of the Interstellar Medium in Front of SN 1987A. *Jun Xu, Arlin P. S. Crotts, & William E. Kunkel.* 451, 806, 258-C6 (1995)

The Presupernova H II Region around SN 1987A. *Roger A. Chevalier & Vikram V. Dwarkadas.* 452, L45, 270-B8 (1995)

On the Hot Gas Fraction in Supernova Remnants. *Uffe Hellsten & Jesper Sommer-Larsen.* 453, 264, 284-F10 (1995)

X-Ray Emission from the Supernova Remnant CTA 1. *F. D. Seward, B. Schmidt, & P. Slane.* 453, 284, 285-A11 (1995)

The X-Ray Emission of 3C 58 Revisited. *David J. Helfand, Robert H. Becker, & Richard L. White.* 453, 741, 294-A12 (1995)

The Nonthermal Radio, X-Ray, and TeV Gamma-Ray Spectra of MSH 15−52. *I. du Plessis, O. C. de Jager, S. Buchner, H. I. Nel, A. R. North, B. C. Raubenheimer, & D. J. van der Walt.* 453, 746, 294-B6 (1995)

The Hydrodynamics of Shock-Cloud Interactions in Three Dimensions. *Jianjun Xu & James M. Stone.* 454, 172, 301-E12 (1995)

Infrared Imaging and Spectroscopy of the Molecular Shock in IC 443. *Matthew J. Richter, James R. Graham, & Gillian S. Wright.* 454, 277, 303-B1 (1995)

Detection of Ultraviolet Emission Lines in SN 1006 with the Hopkins Ultraviolet Telescope. *John C. Raymond, William P. Blair, & Knox S. Long.* 454, L31, 307-G2 (1995)

A Far-Ultraviolet Spectrum of the Puppis A Supernova Remnant Using the Hopkins Ultraviolet Telescope. *William P. Blair, John C. Raymond, Knox S. Long, & Gerard A. Kriss.* 454, L35, 307-G12 (1995)

PSR 1509−58 and Its Plerionic Environment. *C. Greiveldinger, S. Caucino, S. Massaglia, H. Ögelman, & E. Trussoni.* 454, 855, 313-E11 (1995)

Does the Crab Have a Shell? *D. A. Frail, N. E. Kassim, T. J. Cornwell, & W. M. Goss.* 454, L129, 316-C8 (1995)

Hydrogen Molecules in SN 1987A. *Michael Culhane & Richard McCray.* 455, 335, 322-F7 (1995)

Evidence for Thermal Absorption inside Cassiopeia A. *N. E. Kassim, R. A. Perley, K. S. Dwarakanath, & W. C. Erickson.* 455, L59, 325-C8 (1995)

Discovery of a Candidate Isolated Neutron Star in a New Supernova Remnant near CTB 1. *Charles J. Hailey & William W. Craig.* 455, L151, 334-B12 (1995)

LABORATORY SPECTRA

The Millimeter-Wave Spectrum of Highly Vibrationally Excited SiO. *R. Mollaaghababa, C. A. Gottlieb, J. M. Vrtilek, & P. Thaddeus.* 368, L19, 28-D1 (1991)

High-Resolution Absorption Cross Sections of Carbon Monoxide Bands at 295 K between 91.7 and 100.4 Nanometers. *G. Stark, K. Yoshino, Peter L. Smith, K. Ito, & W. H. Parkinson.* 369, 574, 44-G13 (1991)

Far-Infrared Fourier Transform Spectroscopy of $^{12}C^{18}O$. *P. De Natale, M. Inguscio, C. Rois Orza, & L. R. Zink.* 370, L53, 53-G5 (1991)

Laboratory Observation of the $^3P_1$–$^3P_0$ Transition of the Neutral Carbon Atom by Submillimeter-Wave Absorption Spectroscopy. *Satoshi Yamamoto & Shuji Saito.* 370, L103, 59-F7 (1991)

Ablation of Silicate Particles in High-Speed Continuum and Transition Flow with Application to the Collection of Interplanetary Dust Particles. *Aaron J. Rulison, Richard C. Flagan, Thomas J. Ahrens, & Wayne F. Miller.* 371, 432, 65-E5 (1991)

Laboratory Detection of HC_9N Using a Fourier Transform Microwave Spectrometer. *Minoru Iida, Yasuhiro Ohshima, & Yasuki Endo.* 371, L45, 66-F7 (1991)

Atomic Oxygen Fine-Structure Splittings with Tunable Far-Infrared Spectroscopy. *Lyndon R. Zink, Kenneth M. Evenson, Fusakazu Matsushima, Thomas Nelis, & Ruth L. Robinson.* 371, L85, 73-E3 (1991)

The SiH Vibrational Stretch as an Indicator of the Chemical State of Interstellar Grains. *Marla H. Moore, Toshihiko Tanabé, & Joseph A. Nuth.* 373, L31, 91-D7 (1991)

Trapped H_2O in SiO Condensate: An Explanation for the 3 Micron Band Observed toward the Galactic Center. *S. Wada, A. Sakata, & A. T. Tokunaga.* 375, L17, 117-C1 (1991)

Association of CH_3^+ and H_2: Conflicting Results. *David R. Bates.* 375, 833, 123-A5 (1991)

Pure Rotational Spectrum of Hydrogen Deuteride by Far-Infrared Fourier Transform Spectroscopy. *Lorenzo Ulivi, Paolo De Natale, & Massimo Inguscio.* 378, L29, 157-D7 (1991)

Millimeter- and Submillimeter-Wave Spectrum of Highly Excited States of Water. *J. C. Pearson, Todd Anderson, Eric Herbst, Frank C. De Lucia, & Paul Helminger.* 379, L41, 169-D12 (1991)

On the State of the Emitter of the 3.3 Micron Unidentified Infrared Band: Absorption Spectroscopy of Polycyclic Aromatic Hydrocarbon Species. *Gregory C. Flickinger, Thomas J. Wdowiak, & Percy L. Gómez.* 380, L43, 181-F1 (1991)

Regularities of Stark Parameters along the Periodic Table. *J. Purić, M. Ćuk, M. S. Dimitrijević, & A. Lesage.* 382, 353, 204-E7 (1991)

Laboratory Infrared Spectra of CH_2D^+ and $HCCD^+$ and Predicted Microwave Transitions. *Matthias Rösslein, Mary-Frances Jagod, Charles M. Gabrys, & Takeshi Oka.* 382, L51, 205-F1 (1991)

Hydrogenated Amorphous Carbon Grains and the 2175 Å Interstellar Hump. *Armando Blanco, Ezio Bussoletti, Luigi Colangeli, Sergio Fonti, & John R. Stephens.* 382, L97, 211-E8 (1991)

3.3 Micron Emission from Ultraviolet Excitation of Some Aromatic Molecules. *Jun Shan, Masako Suto, & L. C. Lee.* 383, 459, 218-A7 (1991)

LINE: FORMATION

The Origin of the Optical Emission Lines Associated with Extragalactic Radio Sources. *S. M. Viegas & Elisabete M. de Gouveia Dal Pino.* 384, 467, 8-A1 (1992)

Fe II Emission Lines. II. Excitation Mechanisms in Cool Stars. *P. G. Judge, C. Jordan, & U. Feldman.* 384, 613, 9-F10 (1992)

Inner Shell of Optically Thin Gas in Active Galactic Nuclei. *Wei Zheng.* 385, 127, 13-E4 (1992)

Magnetic Acceleration of Broad Emission-Line Clouds in Active Galactic Nuclei. *Robert T. Emmering, Roger D. Blandford, & Isaac Shlosman.* 385, 460, 19-A1 (1992)

Resonance Line Radiation Instability in Fully Ionized Plasmas. *William G. Mathews.* 386, 90, 25-C1 (1992)

Hydrogen Recombination at High Optical Depth and the Spectrum of SN 1987A. *Yueming Xu, Richard McCray, Ernesto Oliva, & Sofia Randich.* 386, 181, 26-D3 (1992)

Winds from T Tauri Stars. II. Balmer Line Profiles for Inner Disk Winds. *Nuria Calvet, Lee Hartmann, & Robert Hewett.* 386, 229, 27-A9 (1992)

Resonant Compton Cooling and Annihilation Line Production in Gamma-Ray Bursts. *R. D. Preece & A. K. Harding.* 386, 308, 28-B1 (1992)

Partially Coherent Scattering in Stellar Chromospheres. I. Effects on Resonance Line Thermalization. *Kenneth G. Gayley.* 78, 549, 10-D7 (1992)

Anisotropic Line Emission and the Geometry of the Broad-Line Region in Active Galactic Nuclei. *G. J. Ferland, B. M. Peterson, K. Horne, W. F. Welsh, & S. N. Nahar.* 387, 95, 38-C1 (1992)

The Sobolev Approximation for Line Formation with Partial Frequency Redistribution. *D. G. Hummer & G. B. Rybicki.* 387, 248, 40-A10 (1992)

The [O I] λλ6300,6364 Doublet of SN 1987A. *Hongwei Li & Richard McCray.* 387, 309, 40-F12 (1992)

On the Density and Field Sensitivities of Dielectronic Recombination. *Daniel B. Reisenfeld, John C. Raymond, Albert R. Young, & John L. Kohl.* 389, L37, 66-E5 (1992)

N III Line Emission in Planetary Nebulae: Continuum Fluorescence. *G. J. Ferland.* 389, L63, 73-D1 (1992)

Partially Coherent Scattering in Stellar Chromospheres. II. The First-Order Escape Probability Method. *K. G. Gayley.* 390, 573, 82-D8 (1992)

X-Ray Emission-Line Spectra of Photoionized Plasmas: Density Sensitivity of the Fe L-Shell Series. *Duane A. Liedahl, Steven M. Kahn, Albert L. Osterheld, & William H. Goldstein.* 391, 306, 89-F11 (1992)

The Age and Chemical Evolution of High-Redshift QSOs. *Fred Hamann & Gary Ferland.* 391, L53, 99-C7 (1992)

Electron Impact Polarization of Atomic Spectral Lines. I. A General Theoretical Scheme. *Silvano Fineschi & Egidio Landi Degl'Innocenti.* 392, 337, 105-B6 (1992)

A Modified Eddington-Barbier Relation in Highly Coherent Resonance-Line Wings. *K. G. Gayley.* 392, 353, 105-C9 (1992)

On the Use of Forbidden Lines as Density Diagnostics in Stratified Media. *Pedro N. Safier.* 392, 492, 108-D5 (1992)

Non-LTE Radiating Acoustic Shocks and Ca II K2V Bright Points. *Mats Carlsson & Robert F. Stein.* 397, L59, 173-G11 (1992)

Angle-dependent Green's Functions for Relativistic Compton Reflection. *Xin-Min Hua & Richard E. Lingenfelter.* 397, 591, 178-D1 (1992)

Inversion of Stokes Profiles. *B. Ruiz Cobo & J. C. del Toro Iniesta.* 398, 375, 186-D11 (1992)

Resonance Scattering of Fe XVII: A Density Diagnostic. *J. T. Schmelz, J. L. R. Saba, & K. T. Strong.* 398, L115, 194-F6 (1992)

CO (J = 1–0) Line Emission from Giant Molecular Clouds. *Mark G. Wolfire, David Hollenbach, & A. G. G. M. Tielens.* 402, 195, 3-E1 (1993)

Molecular Line Emission from Circumstellar Disks. *Steven V. W. Beckwith & Anneila I. Sargent.* 402, 280, 4-E9 (1993)

CCD Observations of the Hα Line in Late G and K Supergiants and Their Interpretation. *Sushma V. Mallik.* 402, 303, 4-G10 (1993)

O I Lines in the Sun and Stars. I. Understanding the Resonance Lines. *M. Carlsson & P. G. Judge.* 402, 344, 5-D9 (1993)

A New Interpretation of the Redshift Observed in Optically Thin Transition Region Lines. *Viggo Hansteen.* 402, 741, 11-G1 (1993)

An Interpretation of the Narrow Positron Annihilation Feature from X-Ray Nova Muscae 1991. *Wan Chen, Neil Gehrels, & F. H. Cheng.* 403, L71, 27-D7 (1993)

The Ca II Emission Lines of SN 1987A. *Hongwei Li & Richard McCray.* 405, 730, 52-B9 (1993)

Multiline Transfer and the Dynamics of Wolf-Rayet Winds. *L. B. Lucy & D. C. Abbott.* 405, 738, 52-C5 (1993)

The Excitation Mechanism of [Fe II] 1.644 Micron Emission in Seyfert and Starburst Galaxies Revisited. *Hideaki Mouri, Kimiaki Kawara, & Yoshiaki Taniguchi.* 406, 52, 55-F5 (1993)

Energy Balance in the Solar Transition Region. III. Helium Emission in Hydrostatic, Constant-Abundance Models with Diffusion. *J. M. Fontenla, E. H. Avrett, & R. Loeser.* 406, 319, 59-A7 (1993)

Centrifugally Driven Winds from Protostellar Disks. II. Forbidden-Line Emission in T Tauri Stars. *Pedro N. Safier.* 408, 148, 85-A1 (1993)

An Implicit Integral Method to Solve Selected Radiative Transfer Problems. I. Non-LTE Line Formation. *E. Simonneau & L. Crivellari.* 409, 830, 109-D12 (1993)

Rigorous Treatment of the Radiative Transfer Problem in Stellar Winds: Significance of the Velocity Law and the Chromosphere in the Hα Profile. *Lydia S. Cidale & Adela E. Ringuelet.* 411, 874, 140-F5 (1993)

Strong-Field Cyclotron Scattering. I. Scattering Amplitudes and Natural Line Width. *Carlo Graziani.* 412, 351, 146-D13 (1993)

The Atmospheres of T Tauri Stars. II. Chromospheric Line Fluxes and Veiling. *C. C. Batalha & Gibor Basri.* 412, 363, 146-E13 (1993)

Spectrum Formation in Supernovae: Numerical Techniques. *Ronald G. Eastman & Philip A. Pinto.* 412, 731, 152-G12 (1993)

The "Baldwin Effect" in Wolf-Rayet Stars. *Patrick Morris, Peter S. Conti, Henny J. G. L. M. Lamers, & Gloria Koenigsberger.* 414, L25, 175-E7 (1993)

A Semi-Analytic Model for Cyclotron Line Formation. *J. C. L. Wang, I. Wasserman, & D. Q. Lamb.* 414, 815, 181-D2 (1993)

The X-Ray Spectra of Cluster Cooling Flows. I. Optically Thin Models. *Michael W. Wise & Craig L. Sarazin.* 415, 58, 185-F10 (1993)

Infrared Coronal Emission Lines and the Possibility of Their Laser Emission in Seyfert Nuclei. *Matthew A. Greenhouse, Uri Feldman, Howard A. Smith, Marcel Klapisch, Anand K. Bhatia, & Avi Bar-Shalom.* 88, 23, 40-C11 (1993)

The Relativistic Sobolev Method Applied to Homologously Expanding Atmospheres. *David J. Jeffery.* 415, 734, 197-A5 (1993)

Partially Coherent Scattering in Stellar Chromospheres. IV. Analytic Wing Approximations. *K. G. Gayley.* 415, 811, 198-A1 (1993)

Compton Backscattered Annihilation Radiation and the Mass of Nova Muscae. *Xin-Min Hua & Richard E. Lingenfelter.* 416, L17, 207-C11 (1993)

Refrigeration of the 18.3 GHz C_3H_2 Transition in Dark Cloud G1.6−0.25. *T. B. H. Kuiper, J. B. Whiteoak, R.-S. Peng, W. L Peters III, & J. E. Reynolds.* 416, L33, 207-E7 (1993)

Semiempirical Flare Models with Chromospheric Condensation. *W. Q. Gan, E. Rieger, & C. Fang.* 416, 886, 214-D10 (1993)

Formation of P Cygni Line Profiles in Relativistically Expanding Atmospheres. II. The Effect of the Continuum Frequency Shape and Limb Darkening of the Core. *Damien Hutsemékers.* 417, 97, 218-D12 (1993)

Helium-like Iron Line Temperature Diagnostics in Clusters of Galaxies. *Douglas A. Swartz & Martin E. Sulkanen.* 417, 487, 225-D3 (1993)

Resonance Scattering by Mercurian Sodium. *Donald M. Hunten & Lloyd V. Wallace.* 417, 757, 228-G6 (1993)

The Chemical Evolution of QSOs and the Implications for Cosmology and Galaxy Formation. *Fred Hamann & Gary Ferland.* 418, 11, 231-B13 (1993)

Forbidden Line Formation in Hydromagnetic Disk Winds. I. Oblique Shocks. *Rachid Ouyed & Ralph E. Pudritz.* 419, 255, 249-C13 (1993)

Iron, Cobalt, and Nickel in SN 1987A. *Hongwei Li, Richard McCray, & Rashid A. Sunyaev.* 419, 824, 257-G10 (1993)

Stimulated Raman Scattering as an Explanation for the Extreme High-Velocity Features of Water Maser Emission. *Shuji Deguchi.* 420, 551, 9-D11 (1994)

The He I λ10830 Line in Classical Cepheids. I. Observations. *Dimitar D. Sasselov & John B. Lester.* 423, 777, 58-C11 (1994)

The He I λ10830 Line in Classical Cepheids. II. Mechanism of Formation. *Dimitar D. Sasselov & John B. Lester.* 423, 785, 58-D7 (1994)

The Chromospheric Structure of Classical Cepheids: Constraints from the He I λ10830 Line. *Dimitar D. Sasselov & John B. Lester.* 423, 795, 58-E6 (1994)

Carbon Monoxide Fundamental Bands in Late-Type Stars. III. Chromosphere or CO-mosphere? *G. Wiedemann, T. R. Ayres, D. E. Jennings, & S. H. Saar.* 423, 806, 58-F6 (1994)

Polarization Profiles of Scattered Emission Lines. I. General Formalism for Optically Thin Rayleigh Scattering. *W. J. Henney.* 427, 288, 113-E1 (1994)

Polarization Profiles of Scattered Emission Lines. II. Upstream Dust Scattering in the HH 1 Jet. *W. J. Henney, A. C. Raga, & D. J. Axon.* 427, 305, 113-F6 (1994)

The Time Development of a Resonance Line in the Expanding Universe. *George B. Rybicki & Ian P. Dell'Antonio.* 427, 603, 120-C2 (1994)

Molecular Hydrogen Emission in Galaxies: Determination of Excitation Mechanism. *Hideaki Mouri.* 427, 777, 122-C12 (1994)

The Envelopes of Be Stars Driven by Optically Thin Lines. *Haiqi Chen & J. M. Marlborough.* 427, 1005, 125-B7 (1994)

Recombinational Lines of P_S (Positronium) as Tracer of Annihilation Processes. *V. V. Burdyuzha & V. L. Kauts.* 92, 549, 39-B6 (1994)

The Impact of SN 1987A with Its Circumstellar Ring. *Ding Luo, Richard McCray, & Jonathan Slavin.* 430, 264, 162-D3 (1994)

High Rydberg State Carbon Recombination Lines toward Cassiopeia A: Physical Conditions and a New Class of Models. *H. E. Payne, K. R. Anantharamaiah, & W. C. Erickson.* 430, 690, 170-D7 (1994)

Shocked Pure-rotational Emission from H_2 in Orion. *Parvinder S. Parmar, John H. Lacy, & Jeffrey M. Achtermann.* 430, 786, 171-F3 (1994)

Compton Scattering in Jets: A Mechanism for ∼0.4 and ≤ 0.2 MeV Line Production. *J. G. Skibo, C. D. Dermer, & R. Ramaty.* 431, L39, 182-G5 (1994)

Emission-Line Studies of Young Stars. IV. The Optical Forbidden Lines. *Fred Hamann.* 93, 485, 49-D4 (1994)

Resonance Line Polarization in Spherical Atmospheres: Partial Redistribution Effects Studied with the Domke-Hubeny Redistribution Matrix. *K. N. Nagendra.* 432, 274, 196-E10 (1994)

A Spectroscopic Analysis of DAO and Hot DA White Dwarfs: The Implications of the Presence of Helium and the Nature of DAO Stars. *P. Bergeron, F. Wesemael, A. Beauchamp, M. A. Wood, R. Lamontagne, G. Fontaine, & James Liebert.* 432, 305, 197-A6 (1994)

Dynamic Processes in Be Star Atmospheres. II. He I $2P$–nD Line Formation in λ Eridani (Outburst). *Myron A. Smith, Ivan Hubeny, Thierry Lanz, & Thomas Meylan.* 432, 392, 198-A10 (1994)

Imaging Spectroscopy of the Solar CO Lines at 4.67 Microns. *Han Uitenbroek, R. W. Noyes, & Douglas Rabin.* 432, L67, 200-B5 (1994)

Laser Action in Far-Infrared Astrophysical Sources. *Jianfang Peng & Anil K. Pradhan.* 432, L123, 207-B7 (1994)

The Formation of the Solar He II 1640.4 Å Emission Line. *Cathrine Wahlstrøm & Mats Carlsson.* 433, 417, 213-E1 (1994)

Star-Disk Collisions and the Origin of the Broad Lines in Quasars. *Wojciech H. Zurek, Aneta Siemiginowska, & Stirling A. Colgate.* 434, 46, 225-G2 (1994)

Flat Spectrum T Tauri Stars: The Case for Infall. *Nuria Calvet, Lee Hartmann, Scott J. Kenyon, & Barbara A. Whitney.* 434, 330, 230-A6 (1994)

[Fe II] 1.53 and 1.64 Micron Emission from Pre–Main-Sequence Stars. *Fred Hamann, Michal Simon, John S. Carr, & Lisa Prato.* 436, 292, 265-C10 (1994)

The Origin of N III λ990 and C III λ977 Emission in AGN Narrow-Line Region Gas. *J. W. Ferguson, G. J. Ferland, & A. K. Pradhan.* 438, L55, 19-B11 (1995)

A Potential Cyclotron Line Signature in Low-Luminosity X-Ray Sources. *Robert W. Nelson, John C. L. Wang, E. E. Salpeter, & Ira Wasserman.* 438, L99, 20-B1 (1995)

Non-LTE Line-blanketed Model Atmospheres of Hot Stars. II. Hot, Metal-rich White Dwarfs. *T. Lanz & I. Hubeny.* 439, 905, 37-B1 (1995)

Lithium Abundances in Strong Lithium K Giant Stars: LTE and Non-LTE Analyses. *Ramiro de la Reza & Licio da Silva.* 439, 917, 37-C3 (1995)

The He I Emission Lines of SN 1987A. *Hongwei Li & Richard McCray.* 441, 821, 73-C6 (1995)

Infrared Line Emission from High-Redshift Galaxies. I. Calculations. *Filippo Mannucci & Steven V. W. Beckwith.* 442, 569, 87-F8 (1995)

Line Formation in Collapsing Cloud Cores with Rotation and Applications to B335 and IRAS 16293−2422. *Shudong Zhou.* 442, 685, 89-E11 (1995)

Broad Ne VIII λ774 Emission from Quasars in the *HST*-FOS Snapshot Survey (ABSNAP). *Fred Hamann, Lin Zuo, & David Tytler.* 444, L69, 130-C1 (1995)

A Duty Cycle Hypothesis for the Central Engines of LINERs. *Michael Eracleous, Mario Livio, & Luc Binette.* 445, L1, 140-B1 (1995)

On Spectral Line Formation and Measurement in Cepheids: Implications to Distance Determination. *C. N. Sabbey, D. D. Sasselov, M. S. Fieldus, J. B. Lester, K. A. Venn, & R. P. Butler.* 446, 250, 156-F2 (1995)

Line-driven Instability Growth Rates in Wolf-Rayet Winds. *Kenneth G. Gayley & Stanely P. Owocki.* 446, 801, 167-B4 (1995)

On Solar Emission Lines: Calculation of Relative Line Intensities Based on the Finite-Temperature Schrödinger Equation. *G. P. Malik, Usha Malik, L. K. Pande, & V. S. Varma.* 447, 443, 178-E8 (1995)

The Mg I λ285.21 Nanometer Line: An Example of Non-LTE Line Formation. *Han Uitenbroek & Carine Briand.* 447, 453, 178-F9 (1995)

High-Resolution Ultraviolet Spectroscopy of Jupiter's Aurora with the *Hubble Space Telescope*. *Y. H. Kim, J. J. Caldwell, & J. L. Fox.* 447, 906, 188-D3 (1995)

Solution to the Bivariate Integral Inversion Problem: The Determination of Emission Measures Differential in Temperature and Density. *Veronika Hubeny & Philip G. Judge.* 448, L61, 200-C13 (1995)

The H_2 Excitation by Formation Pumping in the Merging Galaxy NGC 6240? *Hideaki Mouri & Yoshiaki Taniguchi.* 449, 134, 212-A8 (1995)

Photoevaporation of Dusty Clouds near Active Galactic Nuclei. *Edward A. Pier & G. Mark Voit.* 450, 628, 239-D13 (1995)

Bound-Bound Transitions in Strongly Magnetized Hydrogen Plasma. *George G. Pavlov & Alexander Y. Potekhin.* 450, 883, 243-B6 (1995)

The Disruption of Molecular Cloud Cores by Photoionization. *J. A. Rodríguez-Gaspar, G. Tenorio-Tagle, & J. Franco.* 451, 210, 248-G10 (1995)

Iteration Profiles in Radiative Transfer Problems. I. From Vectorial to Scalar Coupling. *L. Crivellari & E. Simonneau.* 451, 328, 250-D6 (1995)

A Semiempirical Determination of the Wind Velocity Structure for the Hybrid-Chromosphere Star α Trianguli Australis. *Graham M. Harper, Brian E. Wood, Jeffrey L. Linsky, Philip D. Bennett, Thomas R. Ayres, & Alexander Brown.* 452, 407, 267-F6 (1995)

Polarization Profiles of Scattered Emission Lines. III. Effects of Multiple Scattering and Non-Rayleigh Phase Functions. *W. J. Henney & D. J. Axon.* 454, 233, 302-E4 (1995)

An Improved Line-Strength Parameterization in Hot-Star Winds. *Kenneth G. Gayley.* 454, 410, 305-A4 (1995)

Broad Ne VIII λ744 Emission from the Quasar PG 1148+549. *Fred Hamann, Joseph C. Shields, Gary J. Ferland, & Kirk T. Korista.* 454, 688, 311-B9 (1995)

The Structure of Wolf-Rayet Winds. I. Observation of Ionization Stratification in WR 6 and WR 111. *Regina E. Schulte-Ladbeck, Philippe R. J. Eenens, & Kevin Davis.* 454, 917, 314-D11 (1995)

Hydrogen Molecules in SN 1987A. *Michael Culhane & Richard McCray.* 455, 335, 322-F7 (1995)

Partial Redistribution in Multilevel Atoms. I. Method and Application to the Solar Hydrogen Line Formation. *I. Hubeny & B. W. Lites.* 455, 376, 323-C8 (1995)

On the Failure of Standard Emission Measure Analysis for Solar Extreme-Ultraviolet and Ultraviolet Irradiance Spectra. *P. G. Judge, T. N. Woods, P. Brekke, & G. J. Rottman.* 455, L85, 326-A2 (1995)

LINE FORMATION

The Escape of Lyman-Alpha Radiation from a Multiphase Interstellar Medium. *David A. Neufeld.* 370, L85, 59-D13 (1991)

Magnetic Two-Photon Scattering and Two-Photon Emission: Cross Sections and Redistribution Functions. *S. G. Alexander & P. Mészáros.* 372, 554, 82-E11 (1991)

Cyclotron Harmonics in Accreting Pulsars and Gamma-Ray Bursters: Effect of Two-Photon Processes. *S. G. Alexander & P. Mészáros.* 372, 565, 82-F9 (1991)

Temperature-dependent Saturation of Hydrogen Lines in Solar Flares. *K. G. Gayley.* 374, 773, 108-F5 (1991)

Energy Balance in the Solar Transition Region. II. Effects of Pressure and Energy Input on Hydrostatic Models. *J. M. Fontenla, E. H. Avrett, & R. Loeser.* 377, 712, 148-E1 (1991)

Fe II Emission Lines. I. Chromospheric Spectra of Red Giants. *P. G. Judge & C. Jordan.* 77, 75, 44-E1 (1991)

On Solar Emission Lines. *G. P. Malik, L. K. Pande, & Vijaya S. Varma.* 379, 788, 174-E1 (1991)

The Inability of the Resonant Compton Upscattering Model of Gamma-Ray Bursts to Produce a Third Cyclotron Harmonic. *J. J. Brainerd.* 379, L57, 175-C1 (1991)

Formation of the Infrared Emission Lines of Mg I in the Solar Atmosphere. *E. S. Chang, E. H. Avrett, P. J. Mauas, R. W. Noyes, & R. Loeser.* 379, L79, 175-E1 (1991)

Effects of Aberration and Advection on Line Formation. *A. Peraiah.* 380, 212, 178-F1 (1991)

Compton Backscattered 511 keV Annihilation Line Emission and the 170 keV Line from the Galactic Center Direction. *Richard E. Lingenfelter & Xin-Min Hua.* 381, 426, 196-A10 (1991)

N III Line Emission in Planetary Nebulae: Not Bowen Fluorescence. *S. O. Kastner & A. K. Bhatia.* 381, L59, 199-D7 (1991)

Electric Field Strengths from the Solar 12 Micron Lines. *Edward S. Chang & William G. Schoenfeld.* 383, 450, 217-G9 (1991)

LINE: IDENTIFICATION

Detection of HCO^+ $J = 9 \rightarrow 8$ Line Emission toward Orion IRc2: Molecular Ions in Hot Dense Gas. *D. T. Jaffe, U. U. Graf, A. I. Harris, J. Stutzki, & S. H. Lepp.* 385, 240, 14-G13 (1992)

Accurate Far-Infrared Rotational Frequencies of Carbon Monoxide. *Thomas D. Varberg & Kenneth M. Evenson.* 385, 763, 22-E8 (1992)

The Contribution of Methanol to the 3.4 Micron Emission Feature in Comets. *Dennis C. Reuter.* 386, 330, 28-C11 (1992)

Detection of Isocyanoacetylene HCCNC in TMC-1. *Kentarou Kawaguchi, Masatoshi Ohishi, Shin-ichi Ishikawa, & Norio Kaifu.* 386, L51, 36-C10 (1992)

The 3 Micron Spectrum of the Classical Be Star β Monocerotis A. *K. Sellgren & R. G. Smith.* 388, 178, 51-B13 (1992)

Near-Ultraviolet Spectroscopy of Comet Austin (1989c1). *Jacobus H. Valk, C. R. O'Dell, Anita L. Cochran, William D. Cochran, Chet B. Opal, & Edwin S. Barker.* 388, 621, 58-A1 (1992)

The Comet-Tail (A–X) System of CO^+: Precise Molecular Constants of Its $X\ ^2\Sigma^+$, $A\ ^2\Pi_i$, and $B\ ^2\Sigma^+$ States. *C. Haridass, C. V. V. Prasad, & S. Paddi Reddy.* 388, 669, 58-E1 (1992)

Improved Laboratory Rest Frequency Measurements and Pressure Shift and Broadening Parameters for the $J = 2 \leftarrow 1$ and $J = 3 \leftarrow 2$ Rotational Transitions of CO. *S. P. Belov, M. Yu. Tretyakov, & R. D. Suenram.* 393, 848, 126-D9 (1992)

Near-Infrared Observations of AFGL 618. II. The Atomic Spectrum. *Douglas M. Kelly, William B. Latter, & G. H. Rieke.* 395, 174, 142-D1 (1992)

The Ultraviolet and Visible Spectrum of the Polycyclic Aromatic Hydrocarbon $C_{10}H_8^+$: Possible Contributions to the Diffuse Interstellar Bands and to the Ultraviolet–Visible Extinction. *F. Salama & L. J. Allamandola.* 395, 301, 143-G9 (1992)

Detection of HNCCC in TMC-1. *Kentarou Kawaguchi, Shuro Takano, Masatoshi Ohishi, Shin-ichi Ishikawa, Keisuke Miyazawa, Norio Kaifu, Koichi Yamashita, Satoshi Yamamoto, Shuji Saito, Yasuhiro Ohshima, & Yasuki Endo.* 396, L49, 161-A1 (1992)

Global O VI Line Emission from the Cygnus Loop Supernova Remnant and Direct Kinematic Measurement of the Associated Shock. *Andrew Rasmussen & Christopher Martin.* 396, L103, 167-E7 (1992)

An Extension of the High-Resolution Millimeter- and Submillimeter-Wave Spectrum of Methanol to High Angular Momentum Quantum Numbers. *Todd Anderson, Eric Herbst, & Frank C. De Lucia.* 82, 405, 55-A9 (1992)

Detection of the Quadrupole Hyperfine Structure in $HCNH^+$. *L. M. Ziurys, A. J. Apponi, & J. T. Yoder.* 397, L123, 181-F6 (1992)

Laboratory Measurement of the Rotational Spectrum of HCCS. *J. M. Vrtilek, C. A. Gottlieb, E. W. Gottlieb, W. Wang, & P. Thaddeus.* 398, L73, 188-C7 (1992)

The Spectrum of the Peculiar WC7+OB Star HD 192641. *Anne B. Underhill.* 398, 636, 192-A10 (1992)

Infrared Spectroscopy of Dense Clouds in the C–H Stretch Region: Methanol and "Diamonds." *L. J. Allamandola, S. A. Sandford, A. G. G. M. Tielens, & T. M. Herbst.* 399, 134, 196-G7 (1992)

Interstellar H_3O^+ and Its Relation to the O_2 and H_2O Abundances. *T. G. Phillips, Ewine F. van Dishoeck, & Jocelyn Keene.* 399, 533, 204-E1 (1992)

Hubble Space Telescope Faint Object Spectrograph and Ground-based Observations of the Broad Absorption Line Quasar 0226–1024. *Kirk T. Korista, Ray J. Weymann, Simon L. Morris, Michael Kopko, Jr., David A. Turnshek, George F. Hartig, Craig B. Foltz, E. Margaret Burbidge, & Vesa T. Junkkarinen.* 401, 529, 229-C1 (1992)

On Ionized Napthalene ($C_{10}H_8^+$) as a Carrier of Diffuse Interstellar Bands. *Theodore P. Snow.* 401, 775, 232-B10 (1992)

The Millimeter-Wave Spectrum of the MgH and MgD Radicals. *L. M. Ziurys, W. L. Barclay, Jr., & M. A. Anderson.* 402, L21, 6-D8 (1993)

A 25 m$\AA$ Isotope Shift in B I at 2090 $\AA$: A Possible Diagnostic of the Cosmic $^{11}B/^{10}B$ Ratio? *Sveneric G. Johansson, Ulf Litzén, Jörg Kasten, & Manfred Kock.* 403, L25, 20-C11 (1993)

Laboratory Detection of HNCCC and DNCCC by Pulsed Discharge Nozzle Fourier-Transform Microwave Spectroscopy. *Yasuhiro Hirahara, Yasuhiro Ohshima, & Yasuki Endo.* 403, L83, 27-F1 (1993)

Scattering and Luminescence in the Bubble Nebula. *Jean-Pierre Sivan & Jean-Marie Perrin.* 404, 258, 31-B1 (1993)

Laboratory Spectroscopy of MgNC: The First Radioastronomical Identification of Mg-bearing Molecule. *Kentarou Kawaguchi, Eriko Kagi, Tsuneo Hirano, Shuro Takano, & Shuji Saito.* 406, L39, 61-B1 (1993)

The Ultraviolet Spectrum of Annealed Hydrogenated Amorphous Carbon Grains. *A. Blanco, E. Bussoletti, L. Colangeli, S. Fonti, V. Mennella, & J. R. Stephens.* 406, 739, 67-B12 (1993)

The Diffuse Interstellar Bands. IX. Constraints on the Identification. *G. H. Herbig.* 407, 142, 70-G5 (1993)

The Millimeter-Wave Spectrum of CaH ($X\ ^2\Sigma^+$). *W. L. Barclay, Jr., M. A. Anderson, & L. M. Ziurys.* 408, L65, 89-F8 (1993)

Laboratory Detection of a New Free Radical C_4S ($^3\Sigma^-$). *Yasuhiro Hirahara, Yasuhiro Ohshima, & Yasuki Endo.* 408, L113, 95-F13 (1993)

A Spectral-Line Survey of W51 from 17.6 to 22.0 GHz. *M. B. Bell, L. W. Avery, & J. K. G. Watson.* 86, 211, 16-F7 (1993)

On the Carrier of the Band at 700 Nanometers in the Iron Hydride Spectrum. *John G. Phillips & Sumner P. Davis.* 409, 860, 109-G9 (1993)

Laboratory Detection of C_5S by Pulsed–Discharge-Nozzle Fourier Transform Microwave Spectroscopy. *Yasuko Kasai, Kinichi Obi, Yasuhiro Ohshima, Yasuhiro Hirahara, Yasuki Endo, Kentarou Kawaguchi, & Akinori Murakami.* 410, L45, 118-D11 (1993)

Laboratory Measurements of the Millimeter-Wave Spectra of Calcium Isocyanide. *Timothy C. Steimle, Shuji Saito, & Shuro Takano.* 410, L49, 118-C2 (1993)

Mid- and Far-Infrared Spectroscopy of Ices: Optical Constants and Integrated Absorbances. *D. M. Hudgins, S. A. Sandford, L. J. Allamandola, & A. G. G. M. Tielens.* 86, 713, 23-E13 (1993)

Detection of the 2165 Inverse Centimeter (4.619 Micron) XCN Band in the Spectrum of L1551 IRS 5. *Stephen C. Tegler, David A. Weintraub, Louis J. Allamandola, Scott A. Sandford, Terrence W. Rettig, & Humberto Campins.* 411, 260, 130-D9 (1993)

An Improved Ultraviolet Spectral Line List for the Symbiotic Star RR Telescopii. *G. A. Doschek & W. A. Feibelman.* 87, 331, 31-C7 (1993)

IUE Short-Wavelength High-Dispersion Line List for the Symbiotic Nova RR Telescopii. *Jason P. Aufdenberg.* 87, 337, 31-D3 (1993)

Detection of [O III] λ5007 Emission from the Io Plasma Torus. *Nicolas Thomas.* 414, L41, 175-G2 (1993)

Rotational Frequencies of Transition Metal Hydrides for Astrophysical Searches in the Far-Infrared. *John M. Brown, Stuart P. Beaton, & Kenneth M. Evenson.* 414, L125, 186-C6 (1993)

The Millimeter-Wave Spectrum of AlOH. *A. J. Apponi, W. L. Barclay, Jr., & L. M. Ziurys.* 414, L129, 186-C11 (1993)

Detection of Interstellar $^{12}C^{15}N$. *A. H. Saleck, R. Simon, N. Schneider, & G. Winnewisser.* 414, L133, 186-D3 (1993)

Theoretical Modeling of the Infrared Fluorescence from Interstellar Polycyclic Aromatic Hydrocarbons. *W. A. Schutte, A. G. G. M. Tielens, & L. J. Allamandola.* 415, 397, 189-G12 (1993)

Ab Initio Rotational Constants of Isocyanopolyynes. *Arturo Arnau, Estanislao Silla, & Iñaki Tuñón.* 415, L151, 200-G8 (1993)

The Spectrum of EZ Canis Majoris (HD 50896) to the Lyman Limit with the Hopkins Ultraviolet Telescope. *Stephan R. McCandliss, Richard H. Buss, Jr., William P. Blair, Charles W. Bowers, Arthur F. Davidsen, Paul D. Feldman, & Jeffrey W. Kruk.* 416, 372, 205-F3 (1993)

Detection of the Interstellar NH_2 Radical. *Ewine F. van Dishoeck, David J. Jansen, Peter Schilke, & T. G. Phillips.* 416, L83, 216-E10 (1993)

The Spectrum of Orion-KL at 2 Millimeters (150–160 GHz). *L. M. Ziurys & Douglas McGonagle.* 89, 155, 50-G13 (1993)

The Laboratory Spectrum of Acetaldehyde at 1 Millimeter (230–325 GHz). *W. L. Barclay, Jr., M. A. Anderson, L. M. Ziurys, I. Kleiner, & J. T. Hougen.* 89, 221, 51-G3 (1993)

On the System of Diffuse Interstellar Bands at 5844 and 5850 Å. *J. Krełowski, Theodore P. Snow, J. Papaj, C. G. Seab, & B. Wszolek.* 419, 692, 256-C9 (1993)

A High-Resolution ^{13}C Isotope Study in the Vacuum Ultraviolet of Spectra of $CO(A \rightarrow X)$, C I, and C II. *C. Haridass & K. P. Huber.* 420, 433, 6-C1 (1994)

Detection of a New Molecular Ion HC_3NH^+ in TMC-1. *Kentarou Kawaguchi, Yasuko Kasai, Shin-ichi Ishikawa, Masatoshi Ohishi, Norio Kaifu, & Takayoshi Amano.* 420, L95, 15-F12 (1994)

The Tololo Nova Survey: Spectra of Recent Novae. *R. E. Williams, M. M. Phillips, & M. Hamuy.* 90, 297, 5-F1 (1994)

Comparison of New Experimental and Astrophysical *f*-Values for Some Ru II Lines, Observed in *HST* Spectra of χ Lupi. *Sveneric G. Johansson, Ali Joueizadeh, Ulf Litzén, Jörgen Larsson, Anders Persson, Claes-Göran Wahlström, Sune Svanberg, David S. Leckrone, & Glenn M. Wahlgren.* 421, 809, 28-C8 (1994)

Gamma-Ray Spectral Observations with *Yohkoh*. *M. Yoshimori, K. Suga, K. Morimoto, T. Hiraoka, J. Sato, K. Kawabata, & K. Ohki.* 90, 639, 11-F7 (1994)

A Measurement of the $J = 2 \leftarrow 1$ Fine-Structure Interval for ^{28}Si and ^{29}Si in the Ground ^3P State. *John M. Brown, Lyndon R. Zink, & K. M. Evenson.* 423, L151, 61-D13 (1994)

The Millimeter-Wave Spectrum of the CaF Radical ($X\ ^2\Sigma^+$). *M. A. Anderson, M. D. Allen, & L. M. Ziurys.* 424, 503, 68-A13 (1994)

Laboratory Measurements of Rotational Transitions of Lithium Hydride in the Far-Infrared. *M. Bellini, P. de Natale, M. Inguscio, E. Fink, D. Galli, & F. Palla.* 424, 507, 68-B4 (1994)

On the Carrier of the Band at 700 Nanometers in the Iron Hydride Spectrum of Phillips and Davis: Evidence Favoring Calcium Hydride. *Walter J. Balfour & Lennart Klynning.* 424, 1049, 78-A1 (1994)

Millimeter and Submillimeter Rest Frequencies for the MgF Radical. *M. A. Anderson, M. D. Allen, & L. M. Ziurys.* 425, L53, 85-G9 (1994)

Extreme Ultraviolet Explorer Satellite Observation of Jupiter's Io Plasma Torus. *D. T. Hall, G. R. Gladstone, H. W. Moos, F. Bagenal, J. T. Clarke, P. D. Feldman, M. A. McGrath, N. M. Schneider, D. E. Shemansky, D. F. Strobel, & J. H. Waite.* 426, L51, 103-G1 (1994)

Submillimeter Molecular Line Observations of IRC +10216: Searches for MgH, SiH_2, and HCO^+, and Detection of Hot HCN. *L. W. Avery, M. B. Bell, C. T. Cunningham, P. A. Feldman, R. H. Hayward, J. M. McLeod, H. E. Matthews, & J. D. Wade.* 426, 737, 107-E12 (1994)

The Fe XIV Spectrum: Predicted Line Intensities and Solar Identifications. *A. K. Bhatia, S. O. Kastner, F. P. Keenan, E. S. Conlon, & K. G. Widing.* 427, 497, 116-B8 (1994)

GHRS Observations of Cool, Low-Gravity Stars. I. The Far-Ultraviolet Spectrum of α Orionis (M2 Iab). *Kenneth G. Carpenter, Richard D. Robinson, Glenn M. Wahlgren, Jeffrey L. Linsky, & Alexander Brown.* 428, 329, 132-C6 (1994)

The Fine-Structure Intervals of $^{14}N^+$ by Far-Infrared Laser Magnetic Resonance. *John M. Brown, Thomas D. Varberg, Kenneth M. Evenson, & Andrew L. Cooksy.* 428, L37, 134-E13 (1994)

Infrared Spectra of Crystalline Phase Ices Condensed on Silicate Smokes at $T < 20$ K. *Marla H. Moore, Robert F. Ferrante, Reggie L. Hudson, Joseph A. Nuth III, & Bertram Donn.* 428, L81, 143-A7 (1994)

Analysis of the $3d^6 4s(^6D)4f$–$5g$ Supermultiplet of Fe I in Laboratory and Solar Infrared Spectra. *S. Johansson, G. Nave, M. Geller, A. J. Sauval, N. Grevesse, W. G. Schoenfeld, E. S. Chang, & C. B. Farmer.* 429, 419, 149-C11 (1994)

The Millimeter and Submillimeter Rotational Spectrum of the MgCN Radical ($X\ ^2\Sigma^+$). *M. A. Anderson, T. C. Steimle, & L. M. Ziurys.* 429, L41, 150-F1 (1994)

Accurate Calculation of the Isotope Shift and Hyperfine Structure in the Boron (B II) Line at 1362 Å. *Per Jönsson, Sveneric G. Johansson, & Charlotte Froese Fischer.* 429, L45, 150-F7 (1994)

New Detections of Interstellar HNO at 2 and 1.2 Millimeters: More N–O Bonds. *L. M. Ziurys, J. M. Hollis, & L. E. Snyder.* 430, 706, 170-E11 (1994)

Misdirected Quasars and Evolved Stars in Distant Radio Galaxies. *Sperello di Serego Alighieri, Andrea Cimatti, & Robert A. E. Fosbury.* 431, 123, 177-F5 (1994)

A Millimeter-Wave Study and Astronomical Search for the HCCCS Radical. *M. C. McCarthy, J. M. Vrtilek, E. W. Gottlieb, F.-M. Tao, C. A. Gottlieb, & P. Thaddeus.* 431, L127, 192-B13 (1994)

Atomic Sulfur: Frequency Measurement of the $J = 0 \leftarrow 1$ Fine-Structure Transition at 56.3 Microns by Laser Magnetic Resonance. *John M. Brown, Kenneth M. Evenson, & Lyndon R. Zink.* 431, L147, 192-E2 (1994)

The Submillimeter-Wave Spectrum of Propionitrile (C_2H_5CN). *J. C. Pearson, K. V. L. N. Sastry, Eric Herbst, & F. C. De Lucia.* 93, 589, 51-A6 (1994)

The C_4H Radical and the Diffuse Interstellar Bands: An Ab Initio Study. *M. Kolbuszewski.* 432, L63, 200-A13 (1994)

MEPSICRON Spectrophotometry of Seyfert Galaxies. I. Spectral Atlas. *Irene Cruz-González, Luis Carrasco, Alfonso Serrano, José Guichard, Deborah Dultzin-Hacyan, & Gian Franco Bisiacchi.* 94, 47, 52-E9 (1994)

The Molecular Emission-Line Spectrum of IRC +10216 between 330 and 358 GHz. *T. D. Groesbeck, T. G. Phillips, & Geoffrey A. Blake.* 94, 147, 53-F12 (1994)

A Far-Ultraviolet Atlas of Symbiotic Stars Observed with *IUE*. I. The SWP Range. *S. R. Meier, M. Kafatos, R. P. Fahey, & A. G. Michalitsianos.* 94, 183, 54-C2 (1994)

A New Multiplet Table for Fe I. *G. Nave, S. Johansson, R. C. M. Learner, A. P. Thorne, & J. W. Brault.* 94, 221, 54-F12 (1994)

Two Micron Spectrophotometry of the Orion Nebula and the Detection of Significant [Fe III] Emission. *D. L. DePoy & Richard W. Pogge.* 433, 725, 220-B1 (1994)

Exotic Fluoride Molecules in IRC +10216: Confirmation of AlF and Searches for MgF and CaF. *L. M. Ziurys, A. J. Apponi, & T. G. Phillips.* 433, 729, 220-B7 (1994)

Morphology of the Interstellar Cooling Lines Detected by *COBE*. *C. L. Bennett, D. J. Fixsen, G. Hinshaw, J. C. Mather, S. H. Moseley, E. L. Wright, R. E. Eplee, Jr., J. Gales, T. Hewagama, R. B. Isaacman, R. A. Shafer, & K. Turpie.* 434, 587, 235-G13 (1994)

Ground-based Detection of an Infrared [Si X] Coronal Emission Line and Improved Wavelengths for the Infrared [Fe XIII] Emission Lines. *M. J. Penn & J. R. Kuhn.* 434, 807, 239-A10 (1994)

Interstellar CN Rotational Spectra: $^{12}C^{15}N$. *A. H. Saleck, R. Simon, & G. Winnewisser.* 436, 176, 263-E11 (1994)

Detection of Interstellar N_2O: A New Molecule Containing an N–O Bond. *L. M. Ziurys, A. J. Apponi, J. M. Hollis, & L. E. Snyder.* 436, L181, 282-B7 (1994)

Ab Initio Rotational Constants of the Nitriles Derived from Cyanodiacetylene (HC_4CN). *Raúl Moreno, Estanislao Silla, Iñaki Tuñon, & Arturo Arnau.* 437, 532, 290-D9 (1994)

Homologous Series of Diffuse Interstellar Bands. *James K. G. Watson.* 437, 678, 295-B1 (1994)

Confirmation of Interstellar Methylene. *J. M. Hollis, P. R. Jewell, & F. J. Lovas.* 438, 259, 5-A8 (1995)

The Soft Gamma-Ray Spectrum of A0535+26: Detection of an Absorption Feature at 110 keV by OSSE. *J. E. Grove, M. S. Strickman, W. N. Johnson, J. D. Kurfess, R. L. Kinzer, C. H. Starr, G. V. Jung, E. Kendziorra, P. Kretschmar, M. Maisack, & R. Staubert.* 438, L25, 10-A9 (1995)

EUVE Spectroscopy of ϵ Canis Majoris (B2 II) from 70 to 730 Å. *J. P. Cassinelli, D. H. Cohen, J. J. MacFarlane, J. E. Drew, A. E. Lynas-Gray, M. G. Hoare, J. V. Vallerga, B. Y. Welsh, P. W. Vedder, I. Hubeny, & T. Lanz.* 438, 932, 17-A8 (1995)

Laboratory Detection and Millimeter Spectrum of the MgCCH Radical. *M. A. Anderson & L. M. Ziurys.* 439, L25, 30-B5 (1995)

Theoretical Determination of the Electronic Ground State of the MgC Molecule. *Clarissa O. da Silva, Edilson C. da Silva, & Marco Antonio Chaer Nascimento.* 439, 1044, 39-B3 (1995)

Intermediate-Resolution Spectroscopy of the Radio Galaxy B2 0902+34 at $z \approx 3.4$. *J. M. Martín-Mirones, E. Martínez-González, J. I. González-Serrano, & J. L. Sanz.* 440, 191, 43-G2 (1995)

Atomic Iron in Its ^5D Ground State: A Direct Measurement of the $J = 0 \leftarrow 1$ and $J = 1 \leftarrow 2$ Fine-Structure Intervals. *John M. Brown & Kenneth M. Evenson.* 441, L97, 76-D11 (1995)

Laboratory Measurement of Rotational Spectrum of the ^{18}OH Radical Using a Tunable Far-Infrared Spectrometer. *Isamu Morino, Hitoshi Odashima, Fusakazu Matsushima, Shozo Tsunekawa, & Kojiro Takagi.* 442, 907, 92-F3 (1995)

Laboratory Studies of 3.3 Micron Emission from Naphthalene Induced by 193 and 248 Nanometer Excitation. *Richard M. Williams & Stephen R. Leone.* 443, 675, 107-B13 (1995)

The Distribution of Molecules in the Core of OMC-1. *E. C. Sutton, R. Peng, W. C. Danchi, P. A. Jaminet, G. Sandell, & A. P. G. Russell.* 97, 455, 18-E12 (1995)

SIGMA Observations of the Galactic Center at 511 keV. *I. Malet, J. P. Roques, L. Bouchet, G. Vedrenne, J. Paul, B. Cordier, J. Ballet, F. Lebrun, R. Sunyaev, E. Churazov, M. Gilfanov, N. Khavenson, A. Dyachkov, N. Kuleshova, A. Sheikhet, & I. Tzerenin.* 444, 222, 116-D13 (1995)

The Millimeter/Submillimeter Rotational Spectrum of CaCCH($X\ ^2\Sigma^+$). *M. A. Anderson & L. M. Ziurys.* 444, L57, 122-B1 (1995)

Broad Ne VIII λ774 Emission from Quasars in the *HST*-FOS Snapshot Survey (ABSNAP). *Fred Hamann, Lin Zuo, & David Tytler.* 444, L69, 130-C1 (1995)

Detection of MgCN in IRC +10216: A New Metal-bearing Free Radical. *L. M. Ziurys, A. J. Apponi, M. Guélin, & J. Cernicharo.* 445, L47, 141-A5 (1995)

Microwave Spectrum of the NS Radical in the $^2\Pi_r$ Ground Electronic State. *Sang K. Lee, Hiroyuki Ozeki, & Shuji Saito.* 98, 351, 26-F5 (1995)

Interpretation of Anomalous Ultraviolet Transitions of Fe II Observed in Laboratory Fourier Transform Spectra and Stellar *HST* and *IUE* Spectra. *Sveneric Johansson, Tomas Brage, David S. Leckrone, Gillian Nave, & Glenn M. Wahlgren.* 446, 361, 158-C1 (1995)

The 685–692 GHz Spectrum of the Orion Core. *A. I. Harris, L. W. Avery, K.-F. Schuster, L. J. Tacconi, & R. Genzel.* 446, L85, 171-A9 (1995)

BATSE Gamma-Ray Burst Line Search. III. Line Detectability. *D. L. Band, L. A. Ford, J. L. Matteson, M. S. Briggs, W. S. Paciesas, G. N. Pendleton, R. D. Preece, D. M. Palmer, B. J. Teegarden, & B. E. Schaefer.* 447, 289, 176-D4 (1995)

The Ultraviolet Emission Properties of 13 Quasars. *Ari Laor, John N. Bahcall, Buell T. Jannuzi, Donald P. Schneider, & Richard F. Green.* 99, 1, 34-C1 (1995)

Fourier Transform Spectroscopy of the Orion Molecular Cloud Core. *E. Serabyn & E. W. Weisstein.* 451, 238, 249-C3 (1995)

Laboratory Submillimeter-Wave Spectroscopy of the CH_2 ($^3B_1$) Radical. *Hiroyuki Ozeki & Shuji Saito.* 451, L97, 261-C13 (1995)

Laboratory Measurement of the $J = 1$–0 Transition of AlH near 387 GHz. *Masahiro Goto & Shuji Saito.* 452, L147, 280-F1 (1995)

The Millimeter/Submillimeter Spectrum and Rotational Rest Frequencies of $MgCH_3$($\tilde{X}\ ^2A_1$). *M. A. Anderson & L. M. Ziurys.* 452, L157, 280-G7 (1995)

C IV and O VI Transitions in the Region λλ1100–2000 and Examples Found in *IUE* Spectra of Hot Stars. *Walter A. Feibelman & Sveneric Johansson.* 100, 405, 51-F3 (1995)

New and Alternative Line Identifications in Solar Chromospheric and Photospheric Spectra. *S. O. Kastner.* 100, 473, 52-D13 (1995)

A Search for Interstellar C_3 in the Translucent Cloud toward HD 147889. *L. Matthew Haffner & David M. Meyer.* 453, 450, 287-C8 (1995)

Infrared Absorption and Emission Spectra of SiO. *J. M. Campbell, D. Klapstein, M. Dulick, P. F. Bernath, & L. Wallace.* 101, 237, 55-G10 (1995)

Broad Ne VIII λ744 Emission from the Quasar PG 1148+549. *Fred Hamann, Joseph C. Shields, Gary J. Ferland, & Kirk T. Korista.* 454, 688, 311-B9 (1995)

The Canada-France Redshift Survey. III. "Single Emission-Line" Objects, Analysis of Repeat Observations, and Spectroscopic Identifications in the 1415+52 and 2215+00 Fields. *S. J. Lilly, F. Hammer, O. Le Fèvre, & David Crampton.* 455, 75, 319-C6 (1995)

Confirmation of Interstellar HOC^+: Reevaluating the $[HCO^+]/[HOC^+]$ Abundance Ratio. *L. M. Ziurys & A. J. Apponi.* 455, L73, 325-F7 (1995)

Microwave Spectra, Hyperfine Structure, and Electric Dipole Moments for Conformers I and II of Glycine. *F. J. Lovas, Y. Kawashima, J.-U. Grabow, R. D. Suenram, G. T. Fraser, & E. Hirota.* 455, L201, 335-B3 (1995)

LINE IDENTIFICATIONS

Southern *IRAS* Quasar with Extreme Fe II Emission. *S. Lípari, F. D. Macchetto, & D. Golombek.* 366, L65, 11-C1 (1991)

A Search for Vibrationally Excited H_2O at 68 GHz. *S. J. Petuchowski & C. L. Bennett.* 367, 168, 14-B4 (1991)

The Millimeter-Wave Spectrum of Highly Vibrationally Excited SiO. *R. Mollaaghababa, C. A. Gottlieb, J. M. Vrtilek, & P. Thaddeus.* 368, L19, 28-D1 (1991)

New Ultraviolet Spectroscopic Features Found in Comet Brorsen-Metcalf (1989o). *C. R. O'Dell, Christopher O. Miller, Anita L. Cochran, William D. Cochran, Chet B. Opal, & Edwin S. Barker.* 368, 616, 32-G1 (1991)

Astronomical Detection of H_2CCC. *J. Cernicharo, C. A. Gottlieb, M. Guélin, T. C. Killian, G. Paubert, P. Thaddeus, & J. M. Vrtilek.* 368, L39, 35-C7 (1991)

Astronomical Detection of H_2CCCC. *J. Cernicharo, C. A. Gottlieb, M. Guélin, T. C. Killian, P. Thaddeus, & J. M. Vrtilek.* 368, L43, 35-C11 (1991)

A Ubiquitous Absorption Feature in the X-Ray Spectra of BL Lacertae Objects. *Greg M. Madejski, Richard F. Mushotzky, Kimberly A. Weaver, Keith A. Arnaud, & C. Megan Urry.* 370, 198, 49-F1 (1991)

The Solar Spectrum between 914 and 1177 Å. *U. Feldman & G. A. Doschek.* 75, 925, 14-B13 (1991)

Theoretical Vibrations of Carbon Chains C_3, C_4, C_5, C_6, C_7, C_8, and C_9. *Joe Kurtz & Ludwik Adamowicz.* 370, 784, 58-C5 (1991)

Spectral Observations of the Extreme Ultraviolet Background. *Simon E. Labov & Stuart Bowyer.* 371, 810, 71-F1 (1991)

An Ultraviolet Spectral Atlas of a Sunspot and an Active Region 1190–1730 Å. *P. Brekke, O. Kjeldseth-Moe, J.-D. F. Bartoe, & G. E. Brueckner.* 75, 1337, 23-C1 (1991)

The SiH Vibrational Stretch as an Indicator of the Chemical State of Interstellar Grains. *Marla H. Moore, Toshihiko Tanabé, & Joseph A. Nuth.* 373, L31, 91-D7 (1991)

A High Signal-to-Noise Ratio Composite Quasar Spectrum. *Paul J. Francis, Paul C. Hewett, Craig B. Foltz, Frederic H. Chaffee, Ray J. Weymann, & Simon L. Morris.* 373, 465, 93-F10 (1991)

Broad Na D Emission in QSOs and the Profile of He I λ5876. *Keith L. Thompson.* 374, 496, 105-C7 (1991)

Cyclotron Line Features in the Spectrum of the Transient X-Ray Pulsar X0115+634. *F. Nagase, T. Dotani, Y. Tanaka, K. Makishima, T. Mihara, T. Sakao, H. Tsunemi, S. Kitamoto, K. Tamura, A. Yoshida, & H. Nakamura.* 375, L49, 124-B11 (1991)

The Spectrum of NGC 7027 from 3080 to 2630 Wavenumbers (3.25–3.80 Microns): Detection of New Atomic and Molecular Hydrogen Lines and New Constraints on the Chemical Sidegroups on Polycyclic Aromatic Hydrocarbons. *Scott A. Sandford.* 376, 599, 133-G1 (1991)

Millimeter- and Submillimeter-Wave Spectrum of Highly Excited States of Water. *J. C. Pearson, Todd Anderson, Eric Herbst, Frank C. De Lucia, & Paul Helminger.* 379, L41, 169-D12 (1991)

Search for Starbursts among X-Ray–selected Galaxies: Optical Spectroscopy. *Antonella Fruscione & Richard E. Griffiths.* 380, L13, 181-C1 (1991)

A Catalog of Absorption in the Spectra of Quasi-stellar Objects. *V. Junkkarinen, A. Hewitt, & G. Burbidge.* 77, 203, 47-B1 (1991)

Molecular Line Survey of Sagittarius B2(M) from 330 to 355 GHz and Comparison with Sagittarius B2(N). *E. C. Sutton, P. A. Jaminet, W. C. Danchi, & Geoffrey A. Blake.* 77, 255, 47-F1 (1991)

A Table of Astronomically Important Ro-vibrational Transitions for the H_3^+ Molecular Ion. *Lancelot Kao, Takeshi Oka, Steven Miller, & Jonathan Tennyson.* 77, 317, 48-E1 (1991)

The 1.0–1.3 Micron Spectrum of LkHα 101. *Richard J. Rudy, Peter Erwin, George S. Rossano, & R. C. Puetter.* 383, 344, 216-D7 (1991)

Infrared Molecular Spectroscopy toward the Orion IRc2 and IRc7 Sources: A New Probe of Physical Conditions and Abundances in Molecular Clouds. *Neal J. Evans II, J. H. Lacy, & John S. Carr.* 383, 674, 222-E13 (1991)

Extreme-Ultraviolet Spectroscopy and Photometry of EQ Pegasi. *Brunella C. Monsignori Fossi, Massimo Landini, Antonella Fruscione, & Jean Dupuis.* 449, 376, 215-C7 (1995)

Solid Carbonyl Sulphide (OCS) in W33A. *M. E. Palumbo, A. G. G. M. Tielens, & A. T. Tokunaga.* 449, 674, 222-A10 (1995)

LINE: PROFILES

Line Shapes of Rotating Stars with Application to Alpha Lyrae. *G. H. Elste.* 384, 284, 4-D10 (1992)

Energetics and Dynamics in a Large Solar Flare of 1989 March. *Jean-Pierre Wülser, Dominic M. Zarro, & Richard C. Canfield.* 384, 341, 5-B13 (1992)

Fluid Flow in a Jet and the Ca XIX Line Profiles Observed during Solar Flares. *P. L. Bornmann & J. R. Lemen.* 385, 363, 16-D1 (1992)

Winds from T Tauri Stars. II. Balmer Line Profiles for Inner Disk Winds. *Nuria Calvet, Lee Hartmann, & Robert Hewett.* 386, 229, 27-A9 (1992)

Balmer Line Profiles for Infalling T Tauri Envelopes. *Nuria Calvet & Lee Hartmann.* 386, 239, 27-B8 (1992)

Virial and Jet-induced Velocities in Seyfert Galaxies. II. Galaxy Rotation as Virial Parameter. *Mark Whittle.* 387, 109, 38-D2 (1992)

Virial and Jet-induced Velocities in Seyfert Galaxies. III. Galaxy Luminosity as Virial Parameter. *Mark Whittle.* 387, 121, 38-E1 (1992)

Properties of Swept-up Molecular Outflows. *Colin R. Masson & Lawrence M. Chernin.* 387, L47, 43-F1 (1992)

Systematic QSO Emission-Line Velocity Shifts and New Unbiased Redshifts. *David Tytler & Xiao-Ming Fan.* 79, 1, 12-B1 (1992)

What Caused an Unusually Broad He I 10830 Å Emission Line in a Solar Limb Flare? *J. Q. You & G. K. Oertel.* 389, L33, 66-E1 (1992)

Spectral Evolution of Accretion Disks of Dwarf Novae. III. Outburst Cycle of SS Cygni. *F. H. Cheng & D. N. C. Lin.* 389, 714, 70-C5 (1992)

The Broad Emission-Line Profiles and Profile Variability of the Seyfert 1 Galaxy Arakelian 120. *Kirk T. Korista.* 79, 285, 18-C7 (1992)

Time Series Observations of O Stars. I. *IUE* Observations of Variability in the Stellar Wind of ζ Puppis. *R. K. Prinja, L. A. Balona, C. T. Bolton, R. A. Crowe, M. S. Fieldus, A. W. Fullerton, D. R. Gies, I. D. Howarth, D. McDavid, & A. H. N. Reid.* 390, 266, 77-C6 (1992)

Propagating Absorption Enhancements in the Wind of the Extreme Of Supergiant HD 151804. *A. W. Fullerton, D. R. Gies, & C. T. Bolton.* 390, 650, 83-D1 (1992)

Line Profile Asymmetries in Chromospherically Active Stars. *Robert C. Dempsey, Bernard W. Bopp, Klaus G. Strassmeier, Arno F. Granados, Gregory W. Henry, & Douglas S. Hall.* 392, 187, 103-C5 (1992)

Hα Observations of Early-Type Stars. *S. Scuderi, G. Bonanno, R. Di Benedetto, D. Spadaro, & N. Panagia.* 392, 201, 103-D7 (1992)

On the Interpretation of the Spectrum of FU Orionis. *P. P. Petrov & G. H. Herbig.* 392, 209, 103-E1 (1992)

Twin Peaks: IC 4329A and Arakelian 120. *P. Marziani, M. Calvani, & J. W. Sulentic.* 393, 658, 124-A5 (1992)

Line Profile and Variability Data to Probe the Broad-Line Region Geometry: Of Disks and Nests. *F. Mannucci, M. Salvati, & R. M. Stanga.* 394, 98, 129-C6 (1992)

Physical Properties of Be Star Envelopes from Balmer and Fe II Emission Lines. *Arne Slettebak, George W. Collins II, & Ryland Truax.* 81, 335, 39-D13 (1992)

Near-Infrared Broad-Line Profiles in Low-Redshift QSOs. *Keith L. Thompson.* 395, 403, 147-C13 (1992)

Interplanetary Lyman-α Spectra as a Diagnostic of the Local Interstellar Plasma Density: The Baranov Two-Shocks Heliosphere Case. *R. Lallement, Y. G. Malama, E. Quemerais, J. L. Bertaux, & N. A. Zaitzev.* 396, 696, 166-A7 (1992)

Global O VI Line Emission from the Cygnus Loop Supernova Remnant and Direct Kinematic Measurement of the Associated Shock. *Andrew Rasmussen & Christopher Martin.* 396, L103, 167-E7 (1992)

Resolving the Forbidden-Line Emission Regions of Young Stellar Objects: DD Tauri. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 397, L107, 181-D7 (1992)

Absorption-Line Profiles in a Companion Spectrum of a Mass-losing Cool Supergiant. *Liliya L. Rodrigues & Erika Böhm-Vitense.* 401, 695, 231-B10 (1992)

Coordinated Spectral and Temporal Hα Observations of a Solar Flare. *J.-F. de La Beaujardière, Alan L. Kiplinger, & Richard C. Canfield.* 401, 761, 232-A5 (1992)

New Observations of 5 Minute Oscillations in the Opposite Flanks of Solar Fraunhofer Lines. I. The Effect of Varying the Spectral and Temporal Resolution. *L. Bertello, B. Caccin, P. Francia, & E. Pietropaolo.* 401, 768, 232-B1 (1992)

The Hydrogen Lyman-Alpha Emission of Capella. *Thomas R. Ayres, A. Brown, K. G. Gayley, & Jeffrey L. Linsky.* 402, 710, 11-D5 (1993)

Average Effects of Large-Scale Convection on Helioseismic Line Widths and Frequencies. *Eugene M. Lavely & Michael H. Ritzwoller.* 403, 810, 26-A6 (1993)

Colliding Wind Binary Systems: Monte Carlo Simulations of Line-Profile Variability. *Ian R. Stevens.* 404, 281, 31-D3 (1993)

The Magnetohydrodynamics of Umbral Flux Tubes. I. Theoretical Model. *Detlev Degenhardt & Bruce W. Lites.* 404, 383, 32-E9 (1993)

The Quasar Proximity Effect in an Equivalent-Width–limited Sample of the Lyman-Alpha Forest. *Victor V. Chernomordik & Leonid M. Ozernoy.* 404, L5, 33-D1 (1993)

Formation of Double-peaked Lines in Stochastic Winds of T Tauri Stars. *A. S. Mitskevich, A. Natta, & V. P. Grinin.* 404, 751, 38-C7 (1993)

GRIS Detections of the 511 keV Line from the Galactic Center Region in 1992. *M. Leventhal, S. D. Barthelmy, N. Gehrels, B. J. Teegarden, J. Tueller, & L. M. Bartlett.* 405, L25, 47-E1 (1993)

The IRC +10216 Circumstellar Envelope. III. Infrared Molecular Line Profiles. *J. J. Keady & S. T. Ridgway.* 406, 199, 57-E5 (1993)

A New Method for the Identification of Non-Gaussian Line Profiles in Elliptical Galaxies. *Roeland P. van der Marel & Marijn Franx.* 407, 525, 77-B5 (1993)

Relaxation of Molecular Velocities and Spectral Line Profiles of Astrophysical Masers. *Nels Anderson & William D. Watson.* 407, 620, 78-C10 (1993)

Metal-Line Blanketing and the Peculiar Hβ Line Profile in the DAO Star Feige 55. *P. Bergeron, F. Wesemael, R. Lamontagne, & P. Chayer.* 407, L85, 82-F1 (1993)

Centrifugally Driven Winds from Protostellar Disks. II. Forbidden-Line Emission in T Tauri Stars. *Pedro N. Safier.* 408, 148, 85-A1 (1993)

Dynamic Processes in Be Star Atmospheres. I. "Dimple" Formation in the He sci λ6678 Line of λ Eridani. *Myron A. Smith & Ronald S. Polidan.* 408, 323, 87-B8 (1993)

Circumstellar Material in Algol: A Study of the Balmer Line Profiles. *Mercedes T. Richards.* 86, 255, 17-D3 (1993)

A Search for Rapid Variability in the Broad Hα Profiles of Seyfert and Radio Galaxies. *Michael Eracleous & Jules P. Halpern.* 409, 584, 106-C1 (1993)

Evidence for a Very Broad Line Region in PG 1138+222. *Paolo Marziani & Jack W. Sulentic.* 409, 612, 106-E10 (1993)

Chromospheric Heating by Acoustic Shocks: A Confrontation of GHRS Observations of α Tauri (K5 III) with Ab Initio Calculations. *P. G. Judge & M. Cuntz.* 409, 776, 108-F13 (1993)

Features of the Fluorescent Iron Line from Highly Inclined Disks: Some Possible Examples for NGC 6814. *G. Bao.* 409, L41, 111-C1 (1993)

The Peculiar Balmer Line Profiles of OQ 208. *P. Marziani, J. W. Sulentic, M. Calvani, E. Perez, M. Moles, & M. V. Penston.* 410, 56, 112-G4 (1993)

Double-peaked Broad Line Emission from the LINER Nucleus of NGC 1097. *Thaisa Storchi-Bergmann, Jack A. Baldwin, & Andrew S. Wilson.* 410, L11, 117-G1 (1993)

Ultraviolet Line Diagnostics of Accretion Disk Winds in Cataclysmic Variables. *Peter Vitello & Isaac Shlosman.* 410, 815, 123-G11 (1993)

Asymmetries of Solar Oscillation Line Profiles. *T. L. Duvall, Jr., S. M. Jefferies, J. W. Harvey, Y. Osaki, & M. A. Pomerantz.* 410, 829, 124-A13 (1993)

The Inner-Disk and Stellar Properties of the Young Stellar Object WL 16. *John S. Carr, Alan T. Tokunaga, Joan Najita, Frank H. Shu, & Alfred E. Glassgold.* 411, L37, 134-A13 (1993)

Collisional Excitation of CO by H_2O: An Astrophysicist's Guide to Obtaining Rate Constants from Coherent Anti-Stokes Raman Line Shape Data. *Sheldon Green.* 412, 436, 147-E6 (1993)

Infrared CO Emission from Young Stars: High-Resolution Spectroscopy. *C. J. Chandler, J. E. Carlstrom, N. Z. Scoville, W. R. F. Dent, & T. R. Geballe.* 412, L71, 155-D13 (1993)

Statistics of QSO Broad Emission-Line Profiles. I. The C IV λ1549 Line and the λ1400 Feature. *Beverley J. Wills, M. S. Brotherton, D. Fang, Charles C. Steidel, & Wallace L. W. Sargent.* 415, 563, 194-G8 (1993)

^{13}CO and $C^{18}O$ Maps of N-Body Magnetohydrodynamic Simulations of Dark Clouds. *Lars G. Stenholm & Ralph E. Pudritz.* 416, 218, 203-F13 (1993)

On the Interpretation of the Ultraviolet Spectra of Symbiotic Stars and Recurrent Novae. I. *Steven N. Shore & Jason P. Aufdenberg.* 416, 355, 205-D10 (1993)

Formation of P Cygni Line Profiles in Relativistically Expanding Atmospheres. II. The Effect of the Continuum Frequency Shape and Limb Darkening of the Core. *Damien Hutsemékers.* 417, 97, 218-D12 (1993)

Time-Series Observations of O Stars. II. Optical Observations of ζ Ophiuchi. *A. H. N. Reid, C. T. Bolton, R. A. Crowe, M. S. Fieldus, A. W. Fullerton, D. R. Gies, I. D. Howarth, D. McDavid, R. K. Prinja, & K. C. Smith.* 417, 320, 221-E1 (1993)

Thermal Material in Dense Cores: A New Narrow-Line Probe and Technique of Temperature Determination. *G. A. Fuller & P. C. Myers.* 418, 273, 234-D9 (1993)

Evidence for Accretion Disk Precession in the Cataclysmic Binary AM Canum Venaticorum. *Joseph Patterson, Jules Halpern, & Anouk Shambrook.* 419, 803, 257-E13 (1993)

A Synoptic Study of Hα Line Profile Variability in the T Tauri Star SU Aurigae. *Mark S. Giampapa, Gibor S. Basri, Christopher M. Johns, & Catherine L. Imhoff.* 89, 321, 54-A8 (1993)

The Ultraviolet Emission Properties of Five Low-Redshift Active Galactic Nuclei at High Signal-to-Noise Ratio and Spectral Resolution. *Ari Laor, John N. Bahcall, Buell T. Jannuzi, Donald P. Schneider, Richard F. Green, & George F. Hartig.* 420, 110, 2-C12 (1994)

High-Resolution Spectroscopy of Balmer-dominated Shocks in the Large Magellanic Cloud. *R. Chris Smith, John C. Raymond, & J. Martin Laming.* 420, 286, 4-D7 (1994)

A Study of the Spectrum of HD 108, An Unusual Of Star. *Anne B. Underhill.* 420, 869, 13-F6 (1994)

Statistics of QSO Broad Emission-Line Profiles. II. The C IV λ1549, C III] λ1909, and Mg II λ2798 Lines. *M. S. Brotherton, Beverley J. Wills, Charles C. Steidel, & Wallace L. W. Sargent.* 423, 131, 47-F9 (1994)

Forbidden-Line Formation in Hydromagnetic Disk Winds. II. Line Profiles. *Rachid Ouyed & Ralph E. Pudritz.* 423, 753, 58-A3 (1994)

Multispectral Observations of Chromospheric Evaporation in the 1991 November 15 X-Class Solar Flare. *Jean-Pierre Wülser, Richard C. Canfield, Loren W. Acton, J. Leonard Culhane, Andrew Phillips, Andrzej Fludra, Taro Sakao, Satoshi Masuda, Takeo Kosugi, & Saku Tsuneta.* 424, 459, 67-E4 (1994)

Apparent Sizes and Spectral Line Profiles for Spherical ("Three-dimensional") Astrophysical Masers. *Robert T. Emmering & William D. Watson.* 424, 991, 77-B8 (1994)

An Optical Study of Compact Steep-Spectrum Radio Sources. I. The Spectroscopic Data. *Richard Gelderman & Mark Whittle.* 91, 491, 26-B1 (1994)

Low-Velocity Variability in the Stellar Wind of HD 152408 (O8: Iafpe). *Raman K. Prinja & A. W. Fullerton.* 426, 345, 100-D12 (1994)

Magnetospheric Accretion Models for T Tauri Stars. I. Balmer Line Profiles without Rotation. *Lee Hartmann, Robert Hewett, & Nuria Calvet.* 426, 669, 106-F13 (1994)

Evolution of Solitary Density Waves in Stellar Winds of Early-Type Stars: A Simple Explanation of Discrete Absorption Component Behavior. *Wayne L. Waldron, Larry Klein, & Bruce Altner.* 426, 725, 107-D10 (1994)

Line Strength and Self-broadening Coefficient of the Pure Rotational $S(1)$ Quadrupole Line in H_2. *Dennis C. Reuter & J. Marcos Sirota.* 428, L77, 143-A1 (1994)

The "Monochromatic Density Diagnostic" Technique: First Detection of Multiple Density Components in the Chromosphere of α Tauri. *P. G. Judge.* 430, 351, 163-E5 (1994)

The Broad Emission Line and Continuum Variations of Seyfert Galaxies. II. Broad-Line Region Structure and Kinematics. *Edward I. Rosenblatt, Matthew A. Malkan, Wallace L. W. Sargent, & Anthony C. S. Readhead.* 93, 73, 43-A1 (1994)

The Intermediate Line Region of QSOs. *M. S. Brotherton, Beverley J. Wills, Paul J. Francis, & Charles C. Steidel.* 430, 495, 167-G9 (1994)

Shocked Pure-rotational Emission from H_2 in Orion. *Parvinder S. Parmar, John H. Lacy, & Jeffrey M. Achtermann.* 430, 786, 171-F3 (1994)

Analytic Lyman-Alpha Wing Diagnostics and the Chromospheric Excitation Balance in Cool Dwarfs. *K. G. Gayley.* 431, 806, 188-F4 (1994)

Zeeman Enhancement of Lines in Extremely Active K Dwarfs. *Gibor Basri & Geoffrey W. Marcy.* 431, 844, 189-B11 (1994)

Emission-Line Studies of Young Stars. IV. The Optical Forbidden Lines. *Fred Hamann.* 93, 485, 49-D4 (1994)

An Atlas of Doppler Emission-Line Tomography of Cataclysmic Variable Stars. *Ronald H. Kaitchuck, Eric M. Schlegel, R. Kent Honeycutt, Keith Horne, T. R. Marsh, J. C. White II, & Cathy S. Mansperger.* 93, 519, 49-G3 (1994)

Dynamic Processes in Be Star Atmospheres. II. He I $2P$–nD Line Formation in λ Eridani (Outburst). *Myron A. Smith, Ivan Hubeny, Thierry Lanz, & Thomas Meylan.* 432, 392, 198-A10 (1994)

On the Stellar Kinematical Evidence for Massive Black Holes in Galactic Nuclei Expected with the *Hubble Space Telescope*. *Roeland P. van der Marel.* 432, L91, 206-F1 (1994)

The Formation of the Solar He II 1640.4 Å Emission Line. *Cathrine Wahlstrøm & Mats Carlsson.* 433, 417, 213-E1 (1994)

Emergence of Double-peaked Emission Lines in the Broad-Line Radio Galaxy Pictor A. *Jules P. Halpern & Michael Eracleous.* 433, L17, 214-F5 (1994)

Simulation of Variations of Absorption-Line Profiles in Clumpy Molecular Clouds. *Alan P. Marscher & Alan L. Stone.* 433, 705, 219-G2 (1994)

Modeling the Double-Trough Structure Observed in Broad Absorption Line QSOs Using Radiative Acceleration. *Nahum Arav & Mitchell C. Begelman.* 434, 479, 234-C8 (1994)

Variable Emission Lines as Evidence of Spiral Shocks in Accretion Disks around Active Galactic Nuclei. *Sandip K. Chakrabarti & Paul J. Wiita.* 434, 518, 234-G9 (1994)

Molecular Rotational Line Profiles from Oxygen-rich Red Giant Winds. *K. Justtanont, C. J. Skinner, & A. G. G. M. Tielens.* 435, 852, 257-G6 (1994)

A High-Resolution Survey of Interstellar Na I D_1 Lines. *Daniel E. Welty, L. M. Hobbs, & Varsha P. Kulkarni.* 436, 152, 263-C12 (1994)

On the Temperature and Velocity through the Photosphere of a Sunspot Penumbra. *J. C. del Toro Iniesta, T. D. Tarbell, & B. Ruiz Cobo.* 436, 400, 266-G8 (1994)

An Atlas of Ultraviolet P Cygni Profiles. *Theodore P. Snow, Henny J. G. L. M. Lamers, Douglas M. Lindholm, & Andrew P. Odell.* 95, 163, 66-C8 (1994)

Line Profile Variations from Atmospheric Eclipses: Constraints on the Wind Structure in Wolf-Rayet Stars. *L. H. Auer & G. Koenigsberger.* 436, 859, 277-E5 (1994)

Properties and Variability of the Stellar Wind from P Cygni. *S. Scuderi, G. Bonanno, D. Spadaro, N. Panagia, H. J. G. L. M. Lamers, & A. de Koter.* 437, 465, 289-E1 (1994)

A Multiline, Multiresolution VLA Study of the Ultracompact H II Region G29.96−0.02. *A. Afflerbach, E. Churchwell, P. Hofner, & S. Kurtz.* 437, 697, 295-C12 (1994)

Temperature Dependence of Nonthermal Motions in Solar Flare Plasmas Observed with the Flat Crystal Spectrometer on *SMM*. *Ester Antonucci & Maria Adele Dodero.* 438, 480, 8-C3 (1995)

Pictor A: A New Double-peaked Emission-Line Quasar. *J. W. Sulentic, P. Marziani, T. Zwitter, & M. Calvani.* 438, L1, 9-E1 (1995)

Elliptical Accretion Disks in Active Galactic Nuclei. *Michael Eracleous, Mario Livio, Jules P. Halpern, & Thaisa Storchi-Bergmann.* 438, 610, 12-E8 (1995)

Grains in Ionized Nebulae: Spectral Line Diagnostics. *J. Kingdon, G. J. Ferland, & W. A. Feibelman.* 439, 793, 35-E3 (1995)

Classical Rotational Broadening of Spectral Lines. *George W. Collins II & Ryland J. Truax.* 439, 860, 36-E3 (1995)

Infrared Zeeman Analysis of ε Eridani. *Jeff A. Valenti, Geoffrey W. Marcy, & Gibor Basri.* 439, 939, 37-E9 (1995)

Emission-Line Profiles from Self-gravitating Thin Disks. *V. Karas, A. Lanza, & D. Vokrouhlický.* 440, 108, 42-F4 (1995)

Velocity Profile of the Ionized Disk and the Mass of the Black Hole in M87. *Sandip K. Chakrabarti.* 441, 576, 70-A6 (1995)

Spectroscopic Studies of DB White Dwarfs: Confirmation and Modeling of New Forbidden Components of He I. *A. Beauchamp, F. Wesemael, P. Bergeron, & James Liebert.* 441, L85, 76-C4 (1995)

Large HCO^+ and HCN Abundances in the Translucent Cloud toward PKS 0528+134. *Michiel R. Hogerheijde, Eugène J. de Geus, Marco Spaans, Huib Jan van Langevelde, & Ewine F. van Dishoeck.* 441, L93, 76-D4 (1995)

The Transition Regions of Capella. *Jeffrey L. Linsky, Brian E. Wood, Philip Judge, Alexander Brown, Catherine Andrulis, & Thomas R. Ayres.* 442, 381, 82-C9 (1995)

Line Formation in Collapsing Cloud Cores with Rotation and Applications to B335 and IRAS 16293−2422. *Shudong Zhou.* 442, 685, 89-E11 (1995)

The Solar Lyα Line Profile. *Thomas N. Woods, Gary J. Rottman, O. R. White, Juan Fontenla, & E. H. Avrett.* 442, 898, 92-E4 (1995)

Effects of Prescattering Attenuation on Spectropolarimetric Line Profiles. *Kenneth Wood & J. E. Bjorkman.* 443, 348, 100-A3 (1995)

CO and OH Absorption toward the Low-Latitude Radio Source 2023+336. *Henry A. Kobulnicky, John M. Dickey, & Rachel L. Akeson.* 443, L45, 103-A9 (1995)

The Variability of the Double-peaked Balmer Lines in the Active Nucleus of NGC 1097. *Thaisa Storchi-Bergmann, Michael Eracleous, Mario Livio, Andrew S. Wilson, Alexei V. Filippenko, & Jules P. Halpern.* 443, 617, 106-D2 (1995)

Diffuse Band Profiles in the ρ Ophiuchi Cloud. *C. Gregory Seab & Theodore P. Snow, Jr.* 443, 698, 107-E1 (1995)

Evolution of Hα Emission Profiles in S-Type Mira Stars. *Andrew W. Woodsworth.* 444, 396, 119-A4 (1995)

On Spectral Line Formation and Measurement in Cepheids: Implications to Distance Determination. *C. N. Sabbey, D. D. Sasselov, M. S. Fieldus, J. B. Lester, K. A. Venn, & R. P. Butler.* 446, 250, 156-F2 (1995)

Infrared CO Emission from Young Stars: Accretion Disks and Neutral Winds. *C. J. Chandler, J. E. Carlstrom, & N. Z. Scoville.* 446, 793, 167-A7 (1995)

Hubble Space Telescope Sample of Radio-loud Quasars: Ultraviolet Spectra of the First 31 Quasars. *Beverley J. Wills, Keith L. Thompson, Mingsheng Han, H. Netzer, D. Wills, J. A. Baldwin, G. J. Ferland, I. W. A. Browne, & M. S. Brotherton.* 447, 139, 174-A11 (1995)

QSO Broad Emission Line Asymmetries: Evidence of Gravitational Redshift? *Michael R. Corbin.* 447, 496, 182-F2 (1995)

The *Hubble Space Telescope* Sample of Radio-loud Quasars: The Lyα/Hβ Ratio. *Hagai Netzer, M. S. Brotherton, Beverley J. Wills, Mingsheng Han, D. Wills, J. A. Baldwin, G. J. Ferland, & I. W. A. Browne.* 448, 27, 192-E10 (1995)

The Ultraviolet Emission Properties of 13 Quasars. *Ari Laor, John N. Bahcall, Buell T. Jannuzi, Donald P. Schneider, & Richard F. Green.* 99, 1, 34-C1 (1995)

The Line Profile Variability of SU Aurigae. *Christopher M. Johns & Gibor Basri.* 449, 341, 214-G3 (1995)

Gravitational Infall in the Dense Cores L1527 and L483. *P. C. Myers, R. Bachiller, P. Caselli, G. A. Fuller, D. Mardones, M. Tafalla, & D. J. Wilner.* 449, L65, 217-B1 (1995)

Bound-Bound Transitions in Strongly Magnetized Hydrogen Plasma. *George G. Pavlov & Alexander Y. Potekhin.* 450, 883, 243-B6 (1995)

Differential Emission Measure and Iron-to-Calcium Abundance in Solar Flare Plasmas. *Ester Antonucci & Renato Martin.* 451, 402, 251-D6 (1995)

Doppler Imaging of the Cool Spot Distribution on the Weak T Tauri Star V410 Tauri. *Artie P. Hatzes.* 451, 784, 258-A6 (1995)

Solar Lyman Series Line Profiles and Atomic Hydrogen Excitation Rates. *R. R. Meier.* 452, 462, 268-E1 (1995)

A Study of the Spectra of Seven Of Stars. II. Line Profiles and Equivalent Widths. *Anne B. Underhill.* 100, 461, 52-C13 (1995)

Periodic Variations in Ultraviolet Spectral Lines of the B0.5 Ib Star HD 64760: Evidence for Corotating Wind Streams Rooted in Surface Variations. *Stanley P. Owocki, Steven R. Cranmer, & Alexander W. Fullerton.* 453, L37, 289-G1 (1995)

The Iron Kα Line Profile in NGC 4151. *T. Yaqoob, R. Edelson, K. A. Weaver, R. S. Warwick, R. F. Mushotzky, P. J. Serlemitsos, & S. S. Holt.* 453, L81, 298-D8 (1995)

High-Density Amorphous Ice, the Frost on Interstellar Grains. *P. Jenniskens, D. F. Blake, M. A. Wilson, & A. Pohorille.* 455, 389, 323-D10 (1995)

LINE PROFILES

A Study of Solar Flare Energy Transport Based on Coordinated Hα and X-Ray Observations. *Richard C. Canfield, Dominic M. Zarro, Jean-Pierre Wülser, & Brian R. Dennis.* 367, 671, 21-E11 (1991)

Spectral Line Profiles and Luminosities of Astrophysical Water Masers. *Gerald E. Nedoluha & William D. Watson.* 367, L63, 22-C11 (1991)

The Line-emitting Regions of the Exceptional Seyfert Galaxy Markarian 359. *Sylvain Veilleux.* 368, 158, 25-A9 (1991)

The Interstellar D_I Line at High Resolution. *L. M. Hobbs & D. E. Welty.* 368, 426, 30-D1 (1991)

A Study of the Structure and Kinematics of the Narrow-Line Region in Seyfert Galaxies. I. Atlas of Line Profiles. *Sylvain Veilleux.* 75, 357, 5-F1 (1991)

A Study of the Structure and Kinematics of the Narrow-Line Region in Seyfert Galaxies. II. Analysis of the Line-Profile Parameters. *Sylvain Veilleux.* 75, 383, 6-A1 (1991)

Predicted Profiles of Ultraviolet Interstellar Absorption Lines. *D. E. Welty, L. M. Hobbs, & D. G. York.* 75, 425, 6-E5 (1991)

A Study of the Structure and Kinematics of the Narrow-Line Region in Seyfert Galaxies. III. Individual Objects. *Sylvain Veilleux.* 369, 331, 42-A1 (1991)

Mapping of Infrared Helium and Hydrogen Line Profiles in the Central Few Arcseconds of the Galaxy. *T. R. Geballe, K. Krisciunas, J. A. Bailey, & R. Wade.* 370, L73, 59-C8 (1991)

C IV Line Profile Correlations in NGC 4151. *R. P. Fahey, A. G. Michalitsianos, & D. Kazanas.* 371, 136, 61-F9 (1991)

The Spectral Signatures of Collapse and Outflow around Young Stars. *E. R. Keto.* 371, 163, 62-B3 (1991)

Episodic Outflows from High-Mass Protostars. *G. F. Mitchell, J.-P. Maillard, & T. I. Hasegawa.* 371, 342, 64-D1 (1991)

Spatial Structure of the Interstellar Gas toward the Globular Cluster M22. *B. Bates & M. G. Catney.* 371, L37, 66-E7 (1991)

Ultraviolet Variability of NGC 5548: Dynamics of the Continuum Production Region and Geometry of the Broad-Line Region. *J. H. Krolik, Keith Horne, T. R. Kallman, M. A. Malkan, R. A. Edelson, & G. A. Kriss.* 371, 541, 68-C6 (1991)

A Comparison of C IV and Hβ Broad Emission-Line Profiles in Low-Redshift Active Galactic Nuclei. *Michael R. Corbin.* 371, L51, 73-B1 (1991)

Broad Na D Emission in QSOs and the Profile of He I λ5876. *Keith L. Thompson.* 374, 496, 105-C7 (1991)

Cyclotron Resonant Scattering and Absorption. *Alice K. Harding & Joseph K. Daugherty.* 374, 687, 107-E8 (1991)

The Emission-Line Properties of Steep Radio Spectrum Quasars. *Michael R. Corbin.* 375, 503, 119-A11 (1991)

The Smoothness of CO Line Profiles in Orion: Implications for Clumpiness. *Jan A. Tauber, Paul F. Goldsmith, & Robert L. Dickman.* 375, 635, 120-E7 (1991)

Probing Shock Models of CH^+ Formation. *Isabel Hawkins & Nahide Craig.* 375, 642, 120-F1 (1991)

Coronal Dynamics of a Quiescent Active Region. *Julia L. R. Saba & Keith T. Strong.* 375, 789, 122-D9 (1991)

Line Profiles from a Disk around a Rotating Black Hole. *Ari Laor.* 376, 90, 126-B1 (1991)

Interstellar Scattering Effects on the Detection of Narrow-Band Signals. *James M. Cordes & T. Joseph Lazio.* 376, 123, 126-D10 (1991)

Mass Loss in the 96 Day Binary UU Cancri. *Joel A. Eaton, Douglas S. Hall, & R. Kent Honeycutt.* 376, 289, 128-E1 (1991)

Unique Broad-Line Profile Variations in the Radio Galaxy 3C 390.3. *Sylvain Veilleux & Wei Zheng.* 377, 89, 139-B7 (1991)

Characteristics of Intermediate-Degree Solar *p*-Mode Line Widths. *S. M. Jefferies, T. L. Duvall, Jr., J. W. Harvey, Y. Osaki, & M. A. Pomerantz.* 377, 330, 142-A11 (1991)

First Results from the Goddard High-Resolution Spectrograph: High-Resolution Observations of the 1942 Å Resonance Line of Hg II in the Chemically Peculiar B Star, χ Lupi. *David S. Leckrone, Glenn M. Wahlgren, & Sveneric G. Johansson.* 377, L37, 143-E1 (1991)

The Analysis of Apparent Optical Depth Profiles for Interstellar Absorption Lines. *Blair D. Savage & Kenneth R. Sembach.* 379, 245, 166-B5 (1991)

Echo Images of Broad-Line Regions in Active Galactic Nuclei. *William F. Welsh & Keith Horne.* 379, 586, 172-A1 (1991)

Metallic Line Profiles of the A0 V Star Vega. *Austin F. Gulliver, Saul J. Adelman, Charles R. Cowley, & J. Murray Fletcher.* 380, 223, 178-G1 (1991)

Inferring Chromospheric Flare Heating from Hydrogen-Line Wings. *K. G. Gayley & R. C. Canfield.* 380, 660, 186-D1 (1991)

The Systemic Redshift of the Quasar 1331+170. *R. F. Carswell, C. M. Mountain, D. J. Robertson, S. M. Beard, A. R. Glendinning, D. C. Laird, L. C. Lawrence, D. Montgomery, G. Pentland, D. A. Pickup, I. A. Smith, J. A. Bailey, A. Bridger, M. M. Casali, T. R. Geballe, P. Puxley, M. G. Smith, G. S. Wright, S. K. Ramsay, A. C. Baker, B. R. Espey, & M. J. Ward.* 381, L5, 194-B1 (1991)

3C 390.3: Modeling Variable Profile Humps. *Wei Zheng, Sylvain Veilleux, & Steven A. Grandi.* 381, 418, 196-A1 (1991)

Polarization Properties of Emission Lines from Relativistic Accretion Disks. *Kaiyou Chen & Douglas M. Eardley.* 382, 125, 201-F10 (1991)

Diffuse Band Profiles in the Spectrum of HD 29647: Evidence for a Molecular Origin? *Theodore P. Snow & C. G. Seab.* 382, 189, 202-E7 (1991)

Regularities of Stark Parameters along the Periodic Table. *J. Purić, M. Ćuk, M. S. Dimitrijević, & A. Lesage.* 382, 353, 204-E7 (1991)

Outflows Driven by Cosmic-Ray Pressure in Broad Absorption Line QSOs. *Mitchell C. Begelman, Martijn de Kool, & Marek Sikora.* 382, 416, 206-F9 (1991)

Emission-Line and Continuum Properties of 92 Bright QSOs: Luminosity Dependence and Differences between Radio-selected and Optically Selected Samples. *Charles C. Steidel & Wallace L. W. Sargent.* 382, 433, 207-A1 (1991)

Vector Magnetic Fields in Sunspots. I. Stokes Profile Analysis Using the Marshall Space Flight Center Magnetograph. *K. S. Balasubramaniam & E. A. West.* 382, 699, 210-C11 (1991)

Electric Field Strengths from the Solar 12 Micron Lines. *Edward S. Chang & William G. Schoenfeld.* 383, 450, 217-G9 (1991)

A Study of the Hα Line in X1735−444. *Alan P. Smale & Robin H. D. Corbet.* 383, 853, 224-G6 (1991)

LUMINOSITY FUNCTION

Multicomponent Models for the Dynamic Evolution of Globular Clusters. *Hyung Mok Lee, Gregory G. Fahlman, & Harvey B. Richer.* 366, 455, 8-E1 (1991)

The Joint Far-Infrared–Optical Luminosity Function for Spiral Galaxies and Data for the Abell 400 and Cancer Clusters. *Edvige Corbelli, Edwin E. Salpeter, & John M. Dickey.* 370, 49, 47-F4 (1991)

Star Formation in Taurus-Auriga: The High-Mass Stars. *Frederick M. Walter & William T. Boyd.* 370, 318, 51-C1 (1991)

Altered Luminosity Functions for Relativistically Beamed Objects. II. Distribution of Lorentz Factors and Parent Populations with Complex Luminosity Functions. *C. M. Urry & P. Padovani.* 371, 60, 60-G5 (1991)

The Effect of Anisotropic Emission from Thick Accretion Disks on the Luminosity Functions of Active Galactic Nuclei. *C. M. Urry, P. Marziani, & M. Calvani.* 371, 510, 67-G7 (1991)

On the Population of H I Dwarf Galaxies. *David H. Weinberg, Arpad Szomoru, P. Guhathakurta, & J. H. van Gorkom.* 372, L13, 79-B11 (1991)

A Redshift Survey of *IRAS* Galaxies. II. Methods for Determining Self-consistent Velocity and Density Fields. *Amos Yahil, Michael A. Strauss, Marc Davis, & John P. Huchra.* 372, 380, 80-E5 (1991)

Evolution of the Luminosity Function of Quasar Accretion Disks. *David M. Caditz, Vahé Petrosian, & Amri Wandel.* 372, L63, 85-C1 (1991)

The Luminosity Distribution of Globular Clusters in Three Giant Virgo Ellipticals. *William E. Harris, J. W. B. Allwright, Christopher J. Pritchet, & Sidney van den Bergh.* 76, 115, 25-D11 (1991)

The Properties of X-Ray–selected Active Galactic Nuclei. I. Luminosity Function, Cosmological Evolution, and Contribution to the Diffuse X-Ray Background. *Tommaso Maccacaro, Roberto Della Ceca, Isabella M. Gioia, Simon L. Morris, John T. Stocke, & Anna Wolter.* 374, 117, 99-D11 (1991)

Infrared Emission in Paired Galaxies. II. Luminosity Functions and Far-Infrared Properties. *Cong Xu & Jack W. Sulentic.* 374, 407, 104-C5 (1991)

The Complete Sample of 1 Jansky BL Lacertae Objects. I. Summary Properties. *M. Stickel, P. Padovani, C. M. Urry, J. W. Fried, & H. Kühr.* 374, 431, 104-E1 (1991)

The CO Luminosity Function of Galaxies. *Frances Verter.* 375, 95, 112-B11 (1991)

The Luminosity Function of Compact Groups of Galaxies. *Cláudia Mendes de Oliveira & Paul Hickson.* 380, 30, 176-D5 (1991)

Enrichment and Heating of the Intracluster Medium through Galactic Winds. *L. P. David, W. Forman, & C. Jones.* 380, 39, 176-E1 (1991)

The Stellar Content and Structure of the Globular Cluster NGC 5053. *Gregory G. Fahlman, Harvey B. Richer, & James Nemec.* 380, 124, 177-E11 (1991)

Tidally Triggered Galaxy Formation. I. Evolution of the Galaxy Luminosity Function. *Cedric Lacey & Joseph Silk.* 381, 14, 189-C1 (1991)

Globular Cluster Mass Functions. *Harvey B. Richer, Gregory G. Fahlman, Roberto Buonanno, Flavio Fusi Pecci, Leonard Searle, & Ian B. Thompson.* 381, 147, 190-G7 (1991)

Fanaroff-Riley I Galaxies as the Parent Population of BL Lacertae Objects. III. Radio Constraints. *C. M. Urry, P. Padovani, & M. Stickel.* 382, 501, 207-F13 (1991)

Evolution of Clusters of Galaxies. *N. Kaiser.* 383, 104, 213-C11 (1991)

Planetary Nebulae as Standard Candles. VII. A Test versus Hubble Type in the NGC 1023 Group. *Robin Ciardullo, George H. Jacoby, & William E. Harris.* 383, 487, 220-D1 (1991)

MAGNETIC FIELDS

Formulae for the Cyclotron Luminosity of Magnetized Plasma Slabs. *G. Chanmugam & Steven H. Langer.* 368, 580, 32-C11 (1991)

Polarimetric Mapping of Orion Using MILLIPOL: Magnetic Activity in BN/KL. *Robert W. Leach, Dan P. Clemens, Brian D. Kane, & Richard Barvainis.* 370, 257, 50-D1 (1991)

Solar Cycle Variation of the Interplanetary Magnetic Field Spiral. *Charles W. Smith & John W. Bieber.* 370, 435, 52-F4 (1991)

Current Sheet Formation and Rapid Reconnection in the Solar Corona. *A. Bhattacharjee & Xiogang Wang.* 372, 321, 78-A1 (1991)

Magnetic Confinement, Alfvén Wave Reflection, and the Origins of X-Ray and Mass-Loss "Dividing Lines" for Late-Type Giants and Supergiants. *R. Rosner, C.-H. An, Z. E. Musielak, R. L. Moore, & S. T. Suess.* 372, L91, 85-E5 (1991)

Transverse Conductivity of a Relativistic Plasma in Oblique Electric and Magnetic Fields. *Fulvio Melia & Marco Fatuzzo.* 373, 198, 88-D8 (1991)

The Expansion of the Crab Nebula. *M. F. Bietenholz, P. P. Kronberg, D. E. Hogg, & A. S. Wilson.* 373, L59, 97-D5 (1991)

Multipolar Magnetic Fields in Neutron Stars. *Julian H. Krolik.* 373, L69, 97-E4 (1991)

Suppression of Turbulent Transport by a Weak Magnetic Field. *Fausto Cattaneo & Samuel I. Vainshtein.* 376, L21, 130-C6 (1991)

Transient Particle Acceleration in Strongly Magnetized Neutron Stars. *Fulvio Melia & Marco Fatuzzo.* 376, 673, 134-F7 (1991)

Detection of Excess Rotation Measure Due to Intracluster Magnetic Fields in Clusters of Galaxies. *K.-T. Kim, Peter C. Tribble, & P. P. Kronberg.* 379, 80, 164-A5 (1991)

Turbulently Generated Magnetic Fields in Clusters of Galaxies. *Itzhak Goldman & Yoel Rephaeli.* 380, 344, 182-E8 (1991)

Radiative Widths and Splitting of Cyclotron Lines in Superstrong Magnetic Fields. *G. G. Pavlov, V. G. Bezchastnov, P. Mészáros, & S. G. Alexander.* 380, 541, 185-A1 (1991)

Avalanches and the Distribution of Solar Flares. *Edward T. Lu & Russell J. Hamilton.* 380, L89, 188-F5 (1991)

Magnetoacoustic Heating of the Solar Chromosphere. *Joseph M. Davila & S. M. Chitre.* 381, L31, 194-D12 (1991)

Existence of Scattering Atmospheres near Luminous, Magnetized Compact Objects. *Charles D. Dermer & Steven J. Sturner.* 382, L23, 205-C11 (1991)

Transient Particle Acceleration in Strongly Magnetized Neutron Stars. II. Effects Due to a Dipole Field Geometry. *Marco Fatuzzo & Fulvio Melia.* 382, 570, 208-E10 (1991)

Gamma-Ray Bursts from Sheared Alfvén Waves. *Fulvio Melia & Marco Fatuzzo.* 383, L57, 226-D1 (1991)

A Torsional Oscillation in the Rotation of the Solar Magnetic Field. *Herschel B. Snodgrass.* 383, L85, 226-F10 (1991)

Galaxy-driven Turbulence and the Growth of Intracluster Magnetic Fields. *David S. De Young.* 386, 464, 31-B8 (1992)

Where Have All the Cluster Halos Gone? *Jack O. Burns, Martin E. Sulkanen, Galen R. Gisler, & Rick A. Perley.* 388, L49, 59-B1 (1992)

X-Ray–emitting Filaments in the Cooling Flow Cluster A2029. *Craig L. Sarazin, Robert W. O'Connell, & Brian R. McNamara.* 389, L59, 73-C8 (1992)

The Braided Jets in the Spiral Galaxy NGC 4258. *Gerald Cecil, Andrew S. Wilson, & R. Brent Tully.* 390, 365, 79-G1 (1992)

A True-Field Magnetogram in a Solar Plage Region. *Douglas Rabin.* 390, L103, 85-D1 (1992)

Formation of Very Strongly Magnetized Neutron Stars: Implications for Gamma-Ray Bursts. *Robert C. Duncan & Christopher Thompson.* 392, L9, 106-B7 (1992)

Gamma-Ray Bursts as the Death Throes of Massive Binary Stars. *Ramesh Narayan, Bohdan Paczyński, & Tsvi Piran.* 395, L83, 153-G10 (1992)

X-Ray and Optical Emission-Line Filaments in the Cooling Flow Cluster 2A 0335+096. *Craig L. Sarazin, Robert W. O'Connell, & Brian R. McNamara.* 397, L31, 173-D10 (1992)

Three-dimensional Magnetic Field Configurations in Relativistic Magnetohydrodynamic Outflows. *Yu-Qing Lou.* 397, L67, 174-A10 (1992)

Kinematics of W3(OH): First Proper Motions of OH Masers from VLBI Measurements. *E. E. Bloemhof, M. J. Reid, & J. M. Moran.* 397, 500, 177-A12 (1992)

Gamma-Ray Bursts from Extragalactic Radio Pulsars. *Fulvio Melia & Marco Fatuzzo.* 398, L85, 194-B10 (1992)

Photoionization of the Hydrogen Atom in Strong Magnetic Fields. *Alexander Yu. Potekhin & George G. Pavlov.* 407, 330, 73-B11 (1993)

Cosmic-Ray Modulation, Merged Interaction Regions, and Multifractals. *L. F. Burlaga, J. Perko, & J. Pirraglia.* 407, 347, 73-D3 (1993)

Understanding Soft Gamma-Ray Repeaters in the Context of the Extragalactic Radio Pulsar Origin of Gamma-Ray Bursts. *Fulvio Melia & Marco Fatuzzo.* 408, L9, 88-F1 (1993)

Models for the Magnetic Field of M81. *David Moss, Axel Brandenburg, Karl Johan Donner, & Magnus Thomasson.* 409, 179, 99-B10 (1993)

Magnetic Field Power Density Spectra during "Scatter-free" Solar Particle Events. *L. C. Tan & G. M. Mason.* 409, L29, 104-E1 (1993)

The Discovery of Variable Polarization over the 13.9 Minute Spin Period of the Intermediate Polar RE 0751+14. *V. Piirola, P. Hakala, & G. V. Coyne, S.J.* 410, L107, 126-C3 (1993)

Turbulent Generation of Intracluster Magnetic Fields and Faraday Rotation Measurements. *Oleg Goldshmidt & Yoel Rephaeli.* 411, 518, 136-B1 (1993)

A Limitation on the Generation of Magnetic Fields. *Steven A. Balbus.* 413, L137, 169-C11 (1993)

Magnetic Fields in the Hydra A Cluster. *Gregory B. Taylor & Richard A. Perley.* 416, 554, 210-C3 (1993)

Finite-Velocity Effects on Atoms in Strong Magnetic Fields and Implications for Neutron Star Atmospheres. *G. G. Pavlov & P. Mészáros.* 416, 752, 212-F8 (1993)

Electron Impact Broadening Parameters Predictions from Regularities: Fe I, Fe II, Fe III, Fe IV, C IV, and Si IV. *J. Purić, M. H. Miller, & A. Lesage.* 416, 825, 213-F7 (1993)

Interstellar Magnetic Bubbles. *J. P. Vallée.* 419, 670, 256-A12 (1993)

Dynamics of the Magnetic Shearing Instability and Magnetohydrodynamic Turbulence in Accretion Disks. I. Vertical Magnetic Field. *W. Zhang, P. H. Diamond, & E. T. Vishniac.* 420, 705, 11-F2 (1994)

The Magnetic Fields, Ages, and Original Spin Periods of Millisecond Pulsars. *F. Camilo, S. E. Thorsett, & S. R. Kulkarni.* 421, L15, 21-E1 (1994)

Self-similar Evolution of Magnetized Plasmas. II. Nonequilibrium Solutions and Hubble's Expansion. *Wei-Hong Yang.* 425, 439, 87-B10 (1994)

Magnetic Fields in Young Supernova Remnants. *Yu-Qing Lou.* 428, L21, 134-D2 (1994)

OSSE Search for High-Energy X-Ray Emission from the Coma Cluster. *Yoel Rephaeli, Mel Ulmer, & Duane Gruber.* 429, 554, 152-E10 (1994)

Charged-Particle Motion in Multidimensional Magnetic Field Turbulence. *J. Giacalone & J. R. Jokipii.* 430, L137, 175-B10 (1994)

Evidence from Gravitational Lensing for a Nonthermal Pressure Support in the Cluster of Galaxies Abell 2218. *Abraham Loeb & Shude Mao.* 435, L109, 259-F10 (1994)

The Gravitomagnetic Dynamo Effect in Accretion Disks of Rotating Black Holes. *Ramon Khanna & Max Camenzind.* 435, L129, 260-B3 (1994)

On the Correlation of Solar Surface Magnetic Flux with Solar Neutrino Capture Rate. *David S. Oakley, Herschel B. Snodgrass, Roger K. Ulrich, & Toni L. VanDeKop.* 437, L63, 292-C7 (1994)

A Dynamical Model of Magnetic Clouds. *Tyan Yeh.* 438, 975, 17-E7 (1995)

On the Current Status of Maser Polarization Theory. *Moshe Elitzur.* 440, 345, 45-G13 (1995)

Photon-Splitting Limits to the Hardness of Emission in Strongly Magnetized Soft Gamma Repeaters. *Matthew G. Baring.* 440, L69, 57-G1 (1995)

Coronal Loop Formation Resulting from Photospheric Convection. *G. Van Hoven, Y. Mok, & Z. Mikić.* 440, L105, 58-D8 (1995)

The Polarization and Depolarization of Radio Emission from Supernova Remnant Cassiopeia A. *M. C. Anderson, J. W. Keohane, & L. Rudnick.* 441, 300, 63-D7 (1995)

A Numerical Study of Resonant Absorption in a Magnetohydrodynamic Cavity Driven by a Broadband Spectrum. *Andrew N. Wright & Graham J. Rickard.* 444, 458, 119-G13 (1995)

Constraints on Hydrostatic Models of Soft Gamma-Ray Repeaters. *M. Coleman Miller.* 448, L29, 199-F5 (1995)

General Relativistic Effects on the Induced Electric Field Exterior to Pulsars. *S. Sengupta.* 449, 224, 213-C6 (1995)

Bound-Bound Transitions in Strongly Magnetized Hydrogen Plasma. *George G. Pavlov & Alexander Y. Potekhin.* 450, 883, 243-B6 (1995)

A Numerical Study of Rayleigh-Taylor Instability in Magnetic Fluids. *Byung-Il Jun, Michael L. Norman, & James M. Stone.* 453, 332, 285-F9 (1995)

Detection of Inverse-Compton X-Rays from Lobes of the Radio Galaxy Fornax A. *H. Kaneda, M. Tashiro, Y. Ikebe, Y. Ishisaki, H. Kubo, K. Makishima, T. Ohashi, Y. Saito, H. Tabara, & T. Takahashi.* 453, L13, 289-D1 (1995)

Ohmic Decay of Magnetic Fields Generated by Currents in the Crusts of Neutron Stars. *C. J. Pethick & M. Sahrling.* 453, L29, 289-F2 (1995)

Extragalactic Magnetic Field and the Highest Energy Cosmic Rays. *Sangjin Lee, Angela V. Olinto, & Günter Sigl.* 455, L21, 324-E8 (1995)

Photon Splitting in Strongly Magnetized Cosmic Objects—Revisited. *Günter Wunner, Robert Sang, & Dagmar Berg.* 455, L51, 325-B8 (1995)

MAGNETOHYDRODYNAMICS: MHD

Quasi-static Evolution of Coronal Magnetic Fields. *D. W. Longcope & R. N. Sudan.* 384, 305, 4-F12 (1992)

The Theory of Magnetohydrodynamic Wave Generation by Localized Sources. III. Efficiency of Plasma Heating by Dissipation of Far-Field Waves. *William Collins.* 384, 319, 5-A1 (1992)

Magnetohydrodynamic Equilibria and Cusp Formation at an X-Type Neutral Line by Footpoint Shearing. *G. E. Vekstein & E. R. Priest.* 384, 333, 5-B3 (1992)

Linear Resistive Magnetohydrodynamic Computations of Resonant Absorption of Acoustic Oscillations in Sunspots. *Marcel Goossens & Stefaan Poedts.* 384, 348, 5-C8 (1992)

Microflare Heating of the Galactic Halo. *John C. Raymond.* 384, 502, 8-D1 (1992)

The Effects of Radiation Drag on Radial, Relativistic Hydromagnetic Winds. *Zhi-yun Li, Mitchell C. Begelman, & Tzihong Chiueh.* 384, 567, 9-C1 (1992)

The Practical Application of the Magnetic Virial Theorem. *J. A. Klimchuk, R. C. Canfield, & J. E. Rhoads.* 385, 327, 16-A1 (1992)

Three-dimensional Force-free Magnetic Fields and Flare Energy Buildup. *J. A. Klimchuk & P. A. Sturrock.* 385, 344, 16-B6 (1992)

Emergence of Magnetic Flux from the Convection Zone into the Solar Atmosphere. I. Linear and Nonlinear Adiabatic Evolution of the Convective-Parker Instability. *S. Nozawa, K. Shibata, R. Matsumoto, A. C. Sterling, T. Tajima, Y. Uchida, A. Ferrari, & R. Rosner.* 78, 267, 5-D5 (1992)

Prominence Sheets Supported by Constant-Current Force-free Fields. II. Imposition of Normal Photospheric Field Component and Prominence Surface Current. *C. Ridgway, T. Amari, & E. R. Priest.* 385, 718, 22-A10 (1992)

Cylindrically Symmetric Force-free Magnetic Fields. *Lisa J. Porter, James A. Klimchuk, & Peter A. Sturrock.* 385, 738, 22-C6 (1992)

Equilibrium of a Magnetic Flux Tube in a Compressible Flow. *Richard Kerswell & Stephen Childress.* 385, 746, 22-D1 (1992)

Magnetic Interchange Instability of Accretion Disks. *M. Kaisig, T. Tajima, & R. V. E. Lovelace.* 386, 83, 25-B7 (1992)

Accretion in a Kerr Black Hole Magnetosphere: Energy and Angular Momentum Transport between the Magnetic Field and the Matter. *Kouichi Hirotani, Masaaki Takahashi, Shin-ya Nitta, & Akira Tomimatsu.* 386, 455, 31-A11 (1992)

Inhibition of Electron Thermal Conduction by Electromagnetic Instabilities. *Amir Levinson & David Eichler.* 387, 212, 39-E5 (1992)

Large Electric Fields in Acoustic Waves and the Stimulation of Lightning Discharges. *W. Pilipp, T. W. Hartquist, & G. E. Morfill.* 387, 364, 41-D13 (1992)

Weighted Current Sheets Supported in Normal and Inverse Configurations: A Model for Prominence Observations. *P. Démoulin & T. G. Forbes.* 387, 394, 41-G5 (1992)

Energy Propagation into a Flare Kernel during a Solar Flare. *D. B. Melrose.* 387, 403, 42-A1 (1992)

Angular Momentum Transport in Magnetized Stellar Radiative Zones. I. Numerical Solutions to the Core Spin-up Model Problem. *P. Charbonneau & K. B. MacGregor.* 387, 639, 46-E11 (1992)

Proton Acceleration in Neutron Star Magnetospheres. *I. A. Smith, J. I. Katz, & P. H. Diamond.* 388, 148, 50-G7 (1992)

Structure of Sunspot Penumbrae: Fallen Magnetic Flux Tubes. *Donat G. Wentzel.* 388, 211, 51-E11 (1992)

A Test Suite for Magnetohydrodynamical Simulations. *James M. Stone, John F. Hawley, Charles R. Evans, & Michael L. Norman.* 388, 415, 55-E1 (1992)

Photon Bubbles: Overstability in a Magnetized Atmosphere. *Jonathan Arons.* 388, 561, 57-C1 (1992)

Alfvén Wave Transmission through the Solar Atmosphere. *Philippe L. Similon & Shahrokh Zargham.* 388, 644, 58-C1 (1992)

Magnetic Fields and Radiative Shocks in Protogalaxies and the Origin of Globular Clusters. *Paul R. Shapiro, Alejandro Clocchiatti, & Hyesung Kang.* 389, 269, 63-C11 (1992)

Effect of an Ensemble of Explosions on the Galactic Dynamo. I. General Formulation. *Katia Ferrière.* 389, 286, 63-E1 (1992)

Taylor Relaxation of a Gold-Hoyle Flux Tube. *G. J. Rickard.* 389, 413, 65-A10 (1992)

Magnetohydrodynamic Waves in Sharply and Smoothly Bounded Cylinders. *Bonnie Jean Shulman & Ellen G. Zweibel.* 389, 428, 65-C1 (1992)

Alfvénically Driven Slow Shocks in the Solar Chromosphere and Corona. *Joseph V. Hollweg.* 389, 731, 70-D10 (1992)

High-Energy Gamma-Ray Emission from Pion Decay in a Solar Flare Magnetic Loop. *Natalie Mandzhavidze & Reuven Ramaty.* 389, 739, 70-E6 (1992)

Steady Siphon Flows in Closed Coronal Structures: Comparison with Extreme-Ultraviolet Observations. *G. Peres, D. Spadaro, & G. Noci.* 389, 777, 71-A8 (1992)

Intrinsically Asymmetric Astrophysical Jets. *J. C. L. Wang, M. E. Sulkanen, & R. V. E. Lovelace.* 390, 46, 74-F1 (1992)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. II. Results and a Length Scale for Protostellar Cores. *Telemachos Ch. Mouschovias & Scott A. Morton.* 390, 144, 75-G1 (1992)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. III. A Further Parameter Study and Magnetically Controlled Accretion Rate. *Telemachos Ch. Mouschovias & Scott A. Morton.* 390, 166, 76-A11 (1992)

Solar Active Regions as a Percolation Phenomenon. *Donat G. Wentzel & Philip E. Seiden.* 390, 280, 77-D10 (1992)

Vortex Attraction and the Formation of Sunspots. *E. N. Parker.* 390, 290, 77-E8 (1992)

A Self-consistent Turbulent Model for Solar Coronal Heating. *J. Heyvaerts & E. R. Priest.* 390, 297, 77-F3 (1992)

On the Origin of Cosmological Magnetic Fields. *T. Tajima, S. Cable, K. Shibata, & R. M. Kulsrud.* 390, 309, 79-B1 (1992)

Switch Shocks in Molecular Clouds. I. Plane-parallel Magnetohydrodynamic Analysis. *Michael D. Smith.* 390, 447, 81-A1 (1992)

Nonresonant Resistive Dissipation of Compressible Magnetohydrodynamic Waves. *Francesco Califano, Claudio Chiuderi, & Giorgio Einaudi.* 390, 560, 82-C8 (1992)

Self-similar Magnetohydrodynamics. V. Gravitating Spheres and Spheroids. *B. C. Low.* 390, 567, 82-D1 (1992)

Magnetic Reconnection in Incompressible Fluids. *Edward E. DeLuca & Ian J. D. Craig.* 390, 679, 83-F7 (1992)

Effect of the Explosion of Supernovae and Superbubbles on the Galactic Dynamo. *Katia Ferrière.* 391, 188, 88-C13 (1992)

Ambipolar Diffusion and Star Formation: Formation and Contraction of Axisymmetric Cloud Cores. I. Formulation of the Problem and Method of Solution. *Robert A. Fiedler & Telemachos Ch. Mouschovias.* 391, 199, 88-D12 (1992)

Energy Buildup in Sheared Force-free Magnetic Fields. *Richard Wolfson & Boon Chye Low.* 391, 353, 90-C6 (1992)

The Influence of the Large-Scale Interplanetary Shock Structure on a Low-Energy Particle Event. *A. M. Heras, B. Sanahuja, Z. K. Smith, T. Detman, & M. Dryer.* 391, 359, 90-C13 (1992)

The Conversion of p-Modes to Slow Modes and the Absorption of Acoustic Waves by Sunspots. *H. C. Spruit & T. J. Bogdan.* 391, L109, 100-B7 (1992)

On Neutralized Currents in the Solar Corona. *Ladye Kathryn Wilkinson, A. Gordon Emslie, & G. Allen Gary.* 392, L39, 106-E7 (1992)

Large-Scale Rotational Perturbations of a Friedmann Universe with Collisionless Matter and Primordial Magnetic Fields. *Anton Rebhan.* 392, 385, 107-B6 (1992)

Self-similar Evolution of Magnetized Plasmas. I. Quasi-static Solution. *Wei-Hong Yang.* 392, 465, 108-B1 (1992)

Initiation of Bipolar Flows by Magnetic Field Twisting in Protostellar Nebulae. *William I. Newman, Alice L. Newman, & Richard V. E. Lovelace.* 392, 622, 110-A1 (1992)

The Nonexponential Evolution of Pulsar Magnetic Fields. *Shigeto Wakatsuki, Atsushi Hikita, Naohiro Sato, & Naoki Itoh.* 392, 628, 110-A10 (1992)

Two-dimensional Slow Shock Reconnection. *Y. C. Whang.* 392, 637, 110-B9 (1992)

Dynamo Action in Stratified Convection with Overshoot. *Åke Nordlund, Axel Brandenburg, Richard L. Jennings, Michel Rieutord, Juha Ruokolainen, Robert F. Stein, & Ilkka Tuominen.* 392, 647, 110-C6 (1992)

Is the Oort A-Value a Universal Growth Rate Limit for Accretion Disk Shear Instabilities? *Steven A. Balbus & John F. Hawley.* 392, 662, 110-D12 (1992)

A Regularization Method for Extrapolation of Solar Potential Magnetic Fields. *G. Allen Gary & Z. E. Musielak.* 392, 722, 111-C1 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. I. The Hydrodynamic Algorithms and Tests. *James M. Stone & Michael L. Norman.* 80, 753, 33-G3 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. II. The Magnetohydrodynamic Algorithms and Tests. *James M. Stone & Michael L. Norman.* 80, 791, 34-C5 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. III. The Radiation Hydrodynamic Algorithms and Tests. *James M. Stone, Dimitri Mihalas, & Michael L. Norman.* 80, 819, 34-E11 (1992)

Nonlinear Restrictions on Dynamo Action. *Samuel I. Vainshtein & Fausto Cattaneo.* 393, 165, 116-B5 (1992)

Fast Dynamic Reconnection at X-Type Neutral Points. *I. J. D. Craig & P. G. Watson.* 393, 385, 118-G11 (1992)

Coronal Loops: Current-based Heating Processes. *P. Beaufumé, B. Coppi, & L. Golub.* 393, 396, 119-A11 (1992)

Swinging Spiral Waves and Alfvén Turbulence in Accretion Disks. *M. Tagger, R. Pellat, & F. V. Coroniti.* 393, 708, 124-F1 (1992)

Stochastic Gyroresonant Electron Acceleration in a Low-Beta Plasma. I. Interaction with Parallel Transverse Cold Plasma Waves. *Jürgen Steinacker & James A. Miller.* 393, 764, 125-C10 (1992)

Fast Plasmoid Formation in Double Arcades. *J. M. Finn, P. N. Guzdar, & J. Chen.* 393, 800, 125-G7 (1992)

Giant Molecular Cloud Formation through the Parker Instability in a Skewed Magnetic Field. *Tomoyuki Hanawa, Ryoji Matsumoto, & Kazunari Shibata.* 393, L71, 127-E1 (1992)

Hydromagnetic Disk Winds in Young Stellar Objects and Active Galactic Nuclei. *Guy Pelletier & Ralph E. Pudritz.* 394, 117, 129-D13 (1992)

Dissipation of Magnetic Energy in the Solar Corona. *Allen H. Boozer.* 394, 357, 132-D4 (1992)

Electromagnetically Driven Relativistic Jets: A Class of Self-similar Solutions. *Zhi-Yun Li, Tzihong Chiueh, & Mitchell C. Begelman.* 394, 459, 135-B1 (1992)

The Formation of Magnetic Cavities in Comets. *Z. Klopman, A. Eviatar, & R. Goldstein.* 394, 652, 137-E10 (1992)

Development of Magnetohydrodynamic Turbulence in Coronal Loops. *Daniel O. Gómez & Constantino Ferro Fontán.* 394, 662, 137-F8 (1992)

Effect of Magnetic Helicity upon Rectilinear Propagation of Charged Particles in Random Magnetic Fields. *James A. Earl.* 395, 185, 142-E1 (1992)

The Velocity-Distance Relation for Galaxies on a Bubble. *Gregory D. Bothun, Margaret J. Geller, Michael J. Kurtz, John P. Huchra, & Rudolph E. Schild.* 395, 347, 146-E5 (1992)

Hydrodynamics of the Hot Component of the Galactic Halo. II. Radiative and Dynamical Instabilities. *A. Ferrara & G. Einaudi.* 395, 475, 148-D9 (1992)

Magnetized Stimulated Scattering in Pulsar Winds. *Mark W. Sincell & Julian H. Krolik.* 395, 553, 149-F7 (1992)

On the Process of Resistive Heating Instability and the Formation of Coronal Loop Structures. *Yu-Qing Lou.* 395, 682, 151-F13 (1992)

Enhanced Damping of Alfvén Waves in the Solar Corona by a Turbulent Wave Spectrum. *Robert G. Kleva & J. F. Drake.* 395, 697, 152-A5 (1992)

The Thermal and Plasma-physical Evolution of Laminar Current Sheets Formed in the Solar Atmosphere by Emerging Flux. *T. N. LaRosa.* 396, 289, 158-F3 (1992)

Incompressible Disturbances in Nonuniform Media: Formation of Small Scales. *Francesco Malara, Pierluigi Veltri, Claudio Chiuderi, & Giorgio Einaudi.* 396, 297, 158-F13 (1992)

The Influence of a Vertical Magnetic Field on Oscillations in an Isothermal Stratified Atmosphere. *S. S. Hasan & J. Christensen-Dalsgaard.* 396, 311, 159-A1 (1992)

Multiple Periodicities in the Solar Magnetic Field: Possible Origin in a Multiple-Mode Solar Dynamo. *D. W. Boyer & E. H. Levy.* 396, 340, 159-C6 (1992)

The Spectrum of Random Magnetic Fields in the Mean Field Dynamo Theory of the Galactic Magnetic Field. *Russell M. Kulsrud & Stephen W. Anderson.* 396, 606, 165-A1 (1992)

An Axisymmetric Magnetohydrodynamic Model for the Crab Pulsar Wind Bubble. *Mitchell C. Begelman & Zhi-yun Li.* 397, 187, 170-C11 (1992)

Steady and Nonsteady Siphon Flow in Hot Coronal Loops. *T. D. Robb & P. S. Cally.* 397, 329, 172-A1 (1992)

The Galactic Center Wind. *Roger A. Chevalier.* 397, L39, 173-E12 (1992)

A New Way to Convert Alfvén Waves into Heat in Solar Coronal Holes: Intermittent Magnetic Levitation. *R. L. Moore, R. Hammer, Z. E. Musielak, S. T. Suess, & C.-H. An.* 397, L55, 173-G5 (1992)

Three-dimensional Magnetic Field Configurations in Relativistic Magnetohydrodynamic Outflows. *Yu-Qing Lou.* 397, L67, 174-A10 (1992)

Local Magnetohydrodynamic Instabilities and the Wave-driven Dynamo in Accretion Disks. *Ethan T. Vishniac & Patrick Diamond.* 398, 561, 191-B5 (1992)

Reconnection of Stressed Magnetic Fields. *A. B. Hassam.* 399, 159, 197-B10 (1992)

Implications of $^3P_2$ Superfluidity in the Interior of Neutron Stars. *H. F. Chau, K. S. Cheng, & K. Y. Ding.* 399, 213, 197-G9 (1992)
Stochastic Gyroresonant Electron Acceleration in a Low-Beta Plasma. II. Implications of Thermal Effects in a Solar Flare Plasma. *James A. Miller & Jürgen Steinacker.* 399, 284, 198-F12 (1992)
Helioseismology Data and the Solar Dynamo. *P. R. Wilson.* 399, 294, 198-G11 (1992)
Three-dimensional Structures of Magnetostatic Atmospheres. IV. Magnetic Structures over a Solar Active Region. *B. C. Low.* 399, 300, 199-A6 (1992)
Spatial Stability of the Magnetized Slab Jet. *Philip E. Hardee, Michael A. Cooper, Michael L. Norman, & James M. Stone.* 399, 478, 203-G11 (1992)
Diagnostics of Electron-heated Solar Flare Models. III. Effects of Tapered Loop Geometry and Preheating. *A. Gordon Emslie, Peng Li, & John T. Mariska.* 399, 714, 206-G7 (1992)
Nonlinear Dissipation of Surface Alfvén Waves in the Solar Corona. *M. S. Ruderman.* 399, 724, 207-A5 (1992)
Formation of the Dark Bays in the Crab Optical Synchrotron Nebula: Is the Crab Pulsar Wind Bubble Interacting with Its Progenitor's Wind? *Zhi-Yun Li & Mitchell C. Begelman.* 400, 186, 211-C1 (1992)
A Parameter Study of the Two-Fluid Solar Wind. *Ørnulf Sandbæk, Egil Leer, & Thomas E. Holzer.* 400, 362, 213-D8 (1992)
Magnetohydrodynamic Waves in a Solar Prominence. *R. Oliver, J. L. Ballester, A. W. Hood, & E. R. Priest.* 400, 369, 213-E1 (1992)
On the Amplification of Large-Scale Magnetic Fields in Spiral Galaxies by Galactic Winds. *S. J. Spencer & L. E. Cram.* 400, 484, 216-C12 (1992)
A Powerful Local Shear Instability in Weakly Magnetized Disks. III. Long-Term Evolution in a Shearing Sheet. *John F. Hawley & Steven A. Balbus.* 400, 595, 217-F12 (1992)
A Powerful Local Shear Instability in Weakly Magnetized Disks. IV. Nonaxisymmetric Perturbations. *Steven A. Balbus & John F. Hawley.* 400, 610, 218-A1 (1992)
Magnetohydrodynamic Wave Damping by Cosmic-Ray Viscosity. *Ahmed Boulares & Gregor Morfill.* 400, 622, 218-B6 (1992)
Magnetohydrodynamic Models for Extragalactic Jets. I. General Method Based on Conservation Laws. *Paola Pietrini & Guidetta Torricelli-Ciamponi.* 401, 60, 221-G1 (1992)
Fast Dynamos, Cosmic Rays, and the Galactic Magnetic Field. *E. N. Parker.* 401, 137, 222-F7 (1992)
Forced Reconnection, Current Sheets, and Coronal Heating. *Xiaogang Wang & A. Bhattacharjee.* 401, 371, 225-F1 (1992)
High-Energy Particle Acceleration by Explosive Electromagnetic Interaction in an Accretion Disk. *C. A. Haswell, T. Tajima, & J.-I. Sakai.* 401, 495, 228-G5 (1992)
The Evolution of Compact Steep Spectrum Sources. *David S. De Young.* 402, 95, 2-C6 (1993)
Siphon Flows in Isolated Magnetic Flux Tubes. V. Radiative Flows with Variable Ionization. *Benjamin Montesinos & John H. Thomas.* 402, 314, 5-A13 (1993)
An Instability Associated with a Magnetosphere-Disk Interaction. *H. C. Spruit & Ronald E. Taam.* 402, 593, 10-A5 (1993)
Solar p-Modes in a Vertical Magnetic Field: Trapped and Damped π-Modes. *P. S. Cally & T. J. Bogdan.* 402, 721, 11-E3 (1993)
Nonlinear Waves and Solitons in Molecular Clouds. *Fred C. Adams & Marco Fatuzzo.* 403, 142, 15-F13 (1993)
Theory of Jets from Young Stars. *R. V. E. Lovelace, M. M. Romanova, & J. Contopoulos.* 403, 158, 16-A1 (1993)
Wiggled Structure of Herbig-Haro Objects: Helical Kink Instability of Jets from Young Stellar Objects. *Yasushi Todo, Yutaka Uchida, Tetsuya Sato, & Robert Rosner.* 403, 164, 16-A9 (1993)
Parker Instability in a Realistic Gravitational Field. *Ahmet T. Giz & Frank H. Shu.* 404, 185, 30-C3 (1993)
A Three-dimensional Magnetohydrodynamic Formalism for Coronal Helmet Streamers. *P. Cuperman, C. Bruma, T. Detman, & M. Dryer.* 404, 356, 32-C7 (1993)
Wave Generation in a Sunspot. *Jeongwoo W. Lee.* 404, 372, 32-D11 (1993)
The Magnetohydrodynamics of Umbral Flux Tubes. I. Theoretical Model. *Detlev Degenhardt & Bruce W. Lites.* 404, 383, 32-E9 (1993)
On the Generation of "Strong" Magnetic Fields. *S. I. Vainshtein, E. N. Parker, & R. Rosner.* 404, 773, 38-E5 (1993)
A New Class of Exact, Nonlinear Solutions to the Grad-Shafranov Equation. *George Roumeliotis.* 404, 781, 38-F1 (1993)
A Numerical Simulation of Two-dimensional Radiative Equilibrium in Magnetostatic Flux Tubes. I. The Model. *V. J. Pizzo, K. B. MacGregor, & P. B. Kunasz.* 404, 788, 38-F10 (1993)
Linear Theory of Fast Reconnection at an X-Type Neutral Point. *I. J. D. Craig & A. N. McClymont.* 405, 207, 43-F5 (1993)
Normal Incidence X-Ray Telescope Power Spectra of X-Ray Emission from Solar Active Regions. I. Observations. *Daniel O. Gómez, Petrus C. H. Martens, & Leon Golub.* 405, 767, 52-E9 (1993)
Normal Incidence X-Ray Telescope Power Spectra of X-Ray Emission from Solar Active Regions. II. Theory. *Daniel O. Gómez, Petrus C. H. Martens, & Leon Golub.* 405, 773, 52-F3 (1993)
Magnetohydrodynamic Models for Extragalactic Jets. II. Multistep Structures. *Guidetta Torricelli-Ciamponi & Paola Pietrini.* 406, 36, 55-E1 (1993)
Switch Shocks in Molecular Clouds. II. Implications. *Michael D. Smith.* 406, 520, 64-C7 (1993)
Parametric Instabilities of Circularly Polarized Alfvén Waves in High-β Plasmas. *Hiromitsu Hamabata.* 406, 563, 64-G5 (1993)
Nonlinear Plasma Mechanisms of Pulsar Eclipse in Binary Systems. *M. Gedalin & D. Eichler.* 406, 629, 65-F4 (1993)
Resistive Dissipation and Magnetic Field Topology in the Stellar Corona. *E. N. Parker.* 407, 342, 73-C11 (1993)
Can Equipartition Fields Produce the Tilts of Bipolar Magnetic Regions? *Sydney D'Silva.* 407, 385, 73-G3 (1993)
A Siphon-Flow Model of the Photospheric Evershed Flow in a Sunspot. *John H. Thomas & Benjamin Montesinos.* 407, 398, 74-A3 (1993)
Turbulent Magnetohydrodynamic Dynamo for Accretion Disks Using the Cross-Helicity Effect. *Akira Yoshizawa & Nobumitsu Yokoi.* 407, 540, 77-C8 (1993)
On the Nonlinear Instability of a Thermal Field. *Miguel H. Ibáñez S., Antonio Parravano, & César A. Mendoza B.* 407, 611, 78-B13 (1993)
A Detailed Study of Sheared Alfvén Waves and Their Possible Application to Gamma-Ray Bursts. *Marco Fatuzzo & Fulvio Melia.* 407, 680, 79-A8 (1993)
Centrifugally Driven Winds from Protostellar Disks. I. Wind Model and Thermal Structure. *Pedro N. Safier.* 408, 115, 84-E6 (1993)
Centrifugally Driven Winds from Protostellar Disks. II. Forbidden-Line Emission in T Tauri Stars. *Pedro N. Safier.* 408, 148, 85-A1 (1993)
Magnetic Field Decay from the Core of Neutron Stars: Effects of Interpinning of $^3P_2$ Neutron Superfluid and $^1S_0$ Proton Superconducting Fluid. *K. Y. Ding, K. S. Cheng, & H. F. Chau.* 408, 167, 85-B11 (1993)
Neutron Star Dynamos and the Origins of Pulsar Magnetism. *Christopher Thompson & Robert C. Duncan.* 408, 194, 85-E4 (1993)
On the Thermal Stability of a Radiating Plasma Subject to Nonlocal Thermal Conduction. I. Linear Analysis. *E. Chun & R. Rosner.* 408, 678, 93-F1 (1993)
Three-dimensional Structures of Magnetostatic Atmospheres. V. Coupled Electric Current Systems. *B. C. Low.* 408, 689, 93-G1 (1993)
Three-dimensional Structures of Magnetostatic Atmospheres. VI. Examples of Coupled Electric Current Systems. *B. C. Low.* 408, 693, 93-G7 (1993)
A Solar Dynamo Surface Wave at the Interface between Convection and Nonuniform Rotation. *E. N. Parker.* 408, 707, 94-A9 (1993)
Models for the Magnetic Field of M81. *David Moss, Axel Brandenburg, Karl Johan Donner, & Magnus Thomasson.* 409, 179, 99-B10 (1993)
Magnetic Diffusion Due to Supernova Explosions and Superbubbles in the Galactic Disk. *Katia Ferrière.* 409, 248, 100-C1 (1993)
Detection of Magnetohydrodynamic Shocks in the L1551 Outflow. *M. Barsony, N. Z. Scoville, & C. J. Chandler.* 409, 275, 100-E4 (1993)
Particle Dynamics in Spherical Wave Fields of Rotating Magnets: Acceleration Boundary, Plasma Border, and $1/r_0^2$ Law of Asymptotic Energy. *K. O. Thielheim.* 409, 333, 101-C1 (1993)
The Cutoff Frequency for Fast-Mode Magnetohydrodynamic Waves in an Isothermal Atmosphere with a Uniform Horizontal Magnetic Field. *B. A. Stark & Z. E. Musielak.* 409, 450, 102-E5 (1993)
Large-Scale Explosions and Superbubbles in the Galactic Disk and Halo. I. Magnetohydrodynamic Simulations. *Shin Mineshige, Kazunari Shibata, & Paul R. Shapiro.* 409, 663, 107-C1 (1993)
Numerical Solution of Wave Equations for the Stability of the Inner Cometo-Sheath. *Krishna M. Srivastava, Bruce T. Tsurutani, & Bruce E. Goldstein.* 409, 782, 108-G7 (1993)
Force-free Magnetic Fields with Singular Current-Density Surfaces. *B. C. Low.* 409, 798, 109-A12 (1993)
A Similarity Solution to the Kinematic $\alpha^2\omega$ Dynamo Equation with Time-dependent Coefficients. *Chung-Ming Ko.* 410, 128, 113-F8 (1993)

The Structure of Protostellar Accretion Disks and the Origin of Bipolar Flows. *Mark Wardle & Arieh Königl.* 410, 218, 114-G6 (1993)

A Model of Nonthermal Radiation from Accreting X-Ray Pulsars. *P. P. Leung, K. S. Cheng, & P. C. W. Fung.* 410, 309, 115-G12 (1993)

The Free Energies of Partially Open Coronal Magnetic Fields. *B. C. Low & D. F. Smith.* 410, 412, 117-B10 (1993)

Magnetohydrodynamic Flows in Be Stars: Variable Energy Flux and Heat Input Distribution. *María Elena Iglesias & Adela E. Ringuelet.* 411, 342, 131-E3 (1993)

The Morphology of Flare Phenomena, Magnetic Fields, and Electric Currents in Active Regions. I. Introduction and Methods. *Richard C. Canfield, J.-F. de La Beaujardière, Yuhong Fan, K. D. Leka, A. N. McClymont, Thomas R. Metcalf, Donald L. Mickey, Jean-Pierre Wülser, & Bruce W. Lites.* 411, 362, 131-G1 (1993)

The Morphology of Flare Phenomena, Magnetic Fields, and Electric Currents in Active Regions. II. NOAA Active Region 5747 (1989 October). *K. D. Leka, Richard C. Canfield, A. N. McClymont, J.-F. de La Beaujardière, Yuhong Fan, & F. Tang.* 411, 370, 131-G12 (1993)

The Morphology of Flare Phenomena, Magnetic Fields, and Electric Currents in Active Regions. III. NOAA Active Region 6233 (1990 August). *J.-F. de La Beaujardière, Richard C. Canfield, & K. D. Leka.* 411, 378, 132-A10 (1993)

The Dynamics of Magnetic Flux Rings. *E. E. DeLuca, G. H. Fisher, & B. M. Patten.* 411, 383, 132-B4 (1993)

Turbulent Generation of Intracluster Magnetic Fields and Faraday Rotation Measurements. *Oleg Goldshmidt & Yoel Rephaeli.* 411, 518, 136-B1 (1993)

Is It Justified to Assume that "Everywhere in the Sun's Photosphere-Corona Domain the Electric Conductivity Is High"?; or, What Drives the Solar Upper Atmosphere? *Uri Feldman.* 411, 896, 141-A5 (1993)

A Turbulent Model of Time Variability in X-Ray Binary Pulsars. *Masahiro Hoshino & Toshiaki Takeshima.* 411, L79, 142-D9 (1993)

Magnetohydrodynamic Wave Propagation in One-dimensional Nonhomogeneous, Self-gravitating Clouds. *Marco Fatuzzo & Fred C. Adams.* 412, 146, 143-G10 (1993)

On the Structure of Solar and Stellar Coronae: Loops and Loop Heat Transport. *Christof Litwin & Robert Rosner.* 412, 375, 146-F13 (1993)

Oscillatory Instability of Radiative Shocks with Transverse Magnetic Field: Linear Analysis and Nonlinear Simulations. *G. Tóth & B. T. Draine.* 413, 176, 158-C8 (1993)

Formation, Levitation, and Stability of Prominences in the Magnetized Solar Atmosphere. *J. F. Drake, Y. Mok, & G. Van Hoven.* 413, 416, 161-D9 (1993)

A Numerical Simulation of Two-dimensional Radiative Equilibrium in Magnetostatic Flux Tubes. II. Computational Results. *V. J. Pizzo, K. B. MacGregor, & P. B. Kunasz.* 413, 764, 166-A1 (1993)

Energy Transport to the Solar Corona by Magnetic Kink Waves. *Arnab Rai Choudhuri, Mausumi Dikpati, & Dipankar Banerjee.* 413, 811, 166-E1 (1993)

A Limitation on the Generation of Magnetic Fields. *Steven A. Balbus.* 413, L137, 169-C11 (1993)

Three-dimensional Magnetohydrodynamics of the Emerging Magnetic Flux in the Solar Atmosphere. *R. Matsumoto, T. Tajima, K. Shibata, & M. Kaisig.* 414, 357, 174-D8 (1993)

Anomalous Resistivity and the Evolution of Magnetic Field Topology. *E. N. Parker.* 414, 389, 174-G5 (1993)

Alfvénic Fluctuations in a Relativistic Wind with a Spiral Magnetic Field and Random Magnetic Field Structures in the Crab Nebula. *Yu-Qing Lou.* 414, 656, 179-D2 (1993)

Long-Term Containment of Energetic Particles in Coronal Loops. *Yun-Tung Lau, Theodore G. Northrop, & John M. Finn.* 414, 908, 182-E10 (1993)

Focusing of Alfvénic Wave Power in the Context of Gamma-Ray Burst Emissivity. *Marco Fatuzzo & Fulvio Melia.* 414, L89, 185-F7 (1993)

Electromagnetically Driven Relativistic Jets: A Class of Self-consistent Numerical Solutions. *Zhi-Yun Li.* 415, 118, 186-E4 (1993)

Propagation of Hydrodynamic Waves in Optically Thin Plasmas. *Miguel H. Ibáñez S., & Orlando B. Escalona T.* 415, 335, 189-B7 (1993)

Ion Acceleration in Impulsive Solar Flares. *Jürgen Steinacker, Uwe Jaekel, & Reinhard Schlickeiser.* 415, 342, 189-C1 (1993)

Coronal Heating by the Resonant Absorption of Alfvén Waves: Importance of the Global Mode and Scaling Laws. *Richard S. Steinolfson & Joseph M. Davila.* 415, 354, 189-D1 (1993)

Ambipolar Diffusion and Star Formation: Formation and Contraction of Axisymmetric Cloud Cores. II. Results. *Robert A. Fiedler & Telemachos Ch. Mouschovias.* 415, 680, 196-C7 (1993)

The Crab Nebula's Cosmic-Ray Acceleration Zone Revealed. *P. P. Kronberg, H. Lesch, P. F. Ortiz, & M. F. Bietenholz.* 416, 251, 204-B13 (1993)

A Class of Three-dimensional Isothermal Laminated Equilibria and Their Stability. *Y. P. Chou, B. C. Low, & A. Bhattacharjee.* 416, 379, 205-F12 (1993)

A Linear Solution for Magnetic Reconnection Driven by Converging or Diverging Footpoint Motions. *George Roumeliotis & Ronald L. Moore.* 416, 386, 205-G7 (1993)

Magnetically Confined Plasma Columns with Helical Symmetry. *L. J. Palumbo & A. M. Platzeck.* 416, 656, 211-E8 (1993)

The Magnetohydrodynamics of Umbral Flux Tubes. II. Spectroscopic Properties. *Detlev Degenhardt & Bruce W. Lites.* 416, 875, 214-C11 (1993)

Collapse of Magnetized Molecular Cloud Cores. I. Semianalytical Solution. *Daniele Galli & Frank H. Shu.* 417, 220, 220-C1 (1993)

Collapse of Magnetized Molecular Cloud Cores. II. Numerical Results. *Daniele Galli & Frank H. Shu.* 417, 243, 220-D13 (1993)

Catastrophic Evolution of a Force-free Flux Rope: A Model for Eruptive Flares. *P. A. Isenberg, T. G. Forbes, & P. Démoulin.* 417, 368, 222-B7 (1993)

Magnetic Reconnection at Stressed X-Type Neutral Points. *L. Ofman, P. J. Morrison, & R. S. Steinolfson.* 417, 748, 228-F9 (1993)

Angular Momentum Transport in Magnetized Stellar Radiative Zones. II. The Solar Spin-down. *P. Charbonneau & K. B. MacGregor.* 417, 762, 228-G13 (1993)

On the Problem of Magnetic Coronal Heating by Turbulent Relaxation. *G. E. Vekstein, E. R. Priest, & C. D. C. Steele.* 417, 781, 229-B6 (1993)

Three-dimensional Propagation of Transverse Magnetohydrodynamic Perturbations in Relativistic Winds. *Yu-Qing Lou.* 418, 709, 241-C12 (1993)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. I. Basic Physics and Formulation of the Problem. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 418, 774, 242-B13 (1993)

A Mechanism for Bulk Energization in the Impulsive Phase of Solar Flares: MHD Turbulent Cascade. *T. N. LaRosa & R. L. Moore.* 418, 912, 244-A2 (1993)

Equilibrium Morphology of Slender Untwisted Flux Loops. *David Garren, James Chen, & Peter Cargill.* 418, 919, 244-A12 (1993)

Stokes Profile Analysis and Vector Magnetic Fields. VI. Fine Scale Structure of a Sunspot. *B. W. Lites, D. F. Elmore, P. Seagraves, & A. P. Skumanich.* 418, 928, 244-B10 (1993)

Magnetic Confinement of Jets. *David Eichler.* 419, 111, 247-E2 (1993)

An Application of the Narrow-Jet Model: The M87 Jet. *Theodoros Koupelis.* 419, 117, 247-E10 (1993)

Forbidden Line Formation in Hydromagnetic Disk Winds. I. Oblique Shocks. *Rachid Ouyed & Ralph E. Pudritz.* 419, 255, 249-C13 (1993)

The Propagation of Sound Waves in a Randomly Magnetized Medium. I. General Considerations. *M. P. Ryutova & E. R. Priest.* 419, 349, 250-E6 (1993)

The Propagation of Sound Waves in a Randomly Magnetized Medium. II. The Interaction of an Unsteady Wave Packet with an Ensemble of Magnetic Flux Tubes. *M. P. Ryutova & E. R. Priest.* 419, 371, 250-G2 (1993)

Energy Requirements for Opening the Solar Corona. *Richard Wolfson.* 419, 382, 251-A1 (1993)

A Possible Mechanism for Enhanced Absorption of p-Modes in Sunspot and Plage Regions. *Barry J. LaBonte & Margarita Ryutova.* 419, 388, 251-A9 (1993)

Generation of Electric Currents in Two-dimensional Magnetic Nulls. *Juan M. Fontenla.* 419, 837, 258-A11 (1993)

Proton and Electron Mean Free Paths: The Palmer Consensus Revisited. *John W. Bieber, William H. Matthaeus, Charles W. Smith, Wolfgang Wanner, May-Britt Kallenrode, & Gerd Wibberenz.* 420, 294, 4-E5 (1994)

Current Sheets and Reconnection Driven by Footpoint Motion in Two-dimensional Coronal Loops with X-Type Neutral Lines. *Xiaogang Wang & A. Bhattacharjee.* 420, 415, 6-A9 (1994)

The Magnetic Field of Solar Prominences. *S. K. Antiochos, R. B. Dahlburg, & J. A. Klimchuk.* 420, L41, 7-F1 (1994)

Dynamics of the Magnetic Shearing Instability and Magnetohydrodynamic Turbulence in Accretion Disks. I. Vertical Magnetic Field. *W. Zhang, P. H. Diamond, & E. T. Vishniac.* 420, 705, 11-F2 (1994)

Local Shear Instabilities in Weakly Ionized, Weakly Magnetized Disks. *Omer M. Blaes & Steven A. Balbus.* 421, 163, 18-A12 (1994)
Enhanced Cosmic-Ray Acceleration Rates in Highly Inclined Astrophysical Shocks. *R. Lieu, J. J. Quenby, B. Drolias, & K. Naidu.* 421, 211, 18-E11 (1994)
Magnetic Shaping of Planetary Nebulae and Other Stellar Wind Bubbles. *Roger A. Chevalier & Ding Luo.* 421, 225, 18-G1 (1994)
The Flow in the Cometosheath of Comet Halley. *M. C. Damas, K. R. Flammer, D. A. Mendis, & K. Altwegg.* 421, 355, 20-D1 (1994)
Coronal Heating by the Resonant Absorption of Alfvén Waves: The Effect of Viscous Stress Tensor. *L. Ofman, J. M. Davila, & R. S. Steinolfson.* 421, 360, 20-D8 (1994)
The Effects of Kelvin-Helmholtz Instability on Resonance Absorption Layers in Coronal Loops. *Judith T. Karpen, Russell B. Dahlburg, & Joseph M. Davila.* 421, 372, 20-E10 (1994)
The Dynamics of Charged Particles in Turbulent Astrophysical Plasmas. *Rüdiger Dung & Vahé Petrosian.* 421, 550, 25-A6 (1994)
Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. II. Numerical Method of Solution. *Scott A. Morton, Telemachos Ch. Mouschovias, & Glenn E. Ciolek.* 421, 561, 25-B6 (1994)
Two Populations and Models of Gamma-Ray Bursts. *J. I. Katz.* 422, 248, 33-B12 (1994)
Some Implications of the Nanoflare Concept. *Peter J. Cargill.* 422, 381, 34-G2 (1994)
Forces on Magnetic Flux Tubes Moving in Inhomogeneous Flows. *F. Moreno-Insertis, A. Ferriz-Mas, & M. Schüssler.* 422, 652, 40-A5 (1994)
Magnetogravitational Instability of Self-gravitating Dusty Plasma. *R. K. Chhajlani & A. K. Parihar.* 422, 746, 41-B6 (1994)
Interactions between Nested Sunspots. I. The Formation and Breakup of a Delta-Type Sunspot. *V. Gaizauskas, K. L. Harvey, & M. Proulx.* 422, 883, 42-G6 (1994)
A Theoretical Review of Diffusive Shock Acceleration. *Frank C. Jones.* 90, 561, 10-F10 (1994)
Transport of Solar Energetic Particles. *Wolfgang Dröge.* 90, 567, 10-G3 (1994)
Turbulent Acceleration in Solar Flares. *D. B. Melrose.* 90, 623, 11-E1 (1994)
Weightiness of the Dispersive Rate in Stochastic Acceleration Processes. *J. Pérez-Peraza & A. Gallegos-Cruz.* 90, 669, 12-B1 (1994)
Particle Orbits, Trapping, and Acceleration in a Filamentary Current Sheet Model. *Bernhard Kliem.* 90, 719, 12-F6 (1994)
Acceleration from Field-Aligned Potential Drops. *Gerhard Haerendel.* 90, 765, 13-C5 (1994)
Electrodynamics of Disk-accreting Magnetic Neutron Stars. *M. Coleman Miller, Frederick K. Lamb, & Russell J. Hamilton.* 90, 833, 14-B4 (1994)
Particle Acceleration and Nonthermal Energy Release as an Effect of Magnetoactive Disk Accretion onto Gravitating Center. *N. R. Ikhsanov & L. A. Pustil'nik.* 90, 959, 15-F12 (1994)
Effect of Advected Fields on Accretion Disk Dynamos. *Arun V. Mangalam & K. Subramanian.* 90, 963, 15-G3 (1994)
Time-dependent Simulation of Cosmic-Ray Shocks, Including Alfvén Transport. *T. W. Jones.* 90, 969, 15-G10 (1994)
Oblique Magnetohydrodynamic Cosmic-Ray–modified Shocks: Two-Fluid Numerical Simulations. *Adam Frank, T. W. Jones, & Dongsu Ryu.* 90, 975, 16-A4 (1994)
Plasma Mechanisms for Variability in Active Galactic Nuclei. *Vinod Krishan & Paul J. Wiita.* 423, 172, 48-B13 (1994)
A Necessary Condition for the Stability of a Class of Three-dimensional Laminated Equilibria. *A. W. Longbottom, J. P. Melville, & A. W. Hood.* 423, 496, 52-C11 (1994)
Dynamical Properties of the Chromosphere In and Out of the Solar Magnetic Network. *Karine Bocchialini, Jean-Claude Vial, & Serge Koutchmy.* 423, L67, 54-B8 (1994)
A Numerical Study of the Sudden Eruption of Sheared Magnetic Fields. *George Roumeliotis, Peter A. Sturrock, & Spiro K. Antiochos.* 423, 847, 59-D1 (1994)
Oscillations and Evolution of Curved Current-carrying Loops in the Solar Corona. *Peter J. Cargill, James Chen, & David A. Garren.* 423, 854, 59-D10 (1994)
Magnetic Activity in Thick Accretion Disks and Associated Observable Phenomena. II. Flux Storage. *Sydney D'Silva & Sandip K. Chakrabarti.* 424, 149, 63-G6 (1994)
Physics and Evolution of Constant Opening Angle Jets Using a Quasi–One-dimensional Magnetohydrodynamic Model. *Theodoros Koupelis.* 424, 645, 72-G12 (1994)
Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. III. Typical Axisymmetric Solutions. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 425, 142, 82-A6 (1994)
Numerical Study of Two-Fluid C-Type Shock Waves. *Gábor Tóth.* 425, 171, 82-C11 (1994)
New Description of Charged Particle Propagation in Random Magnetic Fields. *James A. Earl.* 425, 331, 84-D7 (1994)
A New Path for the Electron Bulk Energization in Solar Flares: Fermi Acceleration by Magnetohydrodynamic Turbulence in Reconnection Outflows. *T. N. LaRosa, R. L. Moore, & S. N. Shore.* 425, 856, 92-D8 (1994)
An Upper Limit to the Electrodynamic Power Output from a Thin Accretion Disk around a Black Hole. *Seok Jae Park & Ethan T. Vishniac.* 426, 131, 97-F11 (1994)
Asymptotic Domination of Cold Relativistic MHD Winds by Kinetic Energy Flux. *Mitchell C. Begelman & Zhi-Yun Li.* 426, 269, 99-D9 (1994)
General Analytic Results for Nonlinear Waves and Solitons in Molecular Clouds. *Fred C. Adams, Marco Fatuzzo, & Richard Watkins.* 426, 629, 106-C5 (1994)
Spontaneous Reconnection of Line-tied Flux Tubes. *D. W. Longcope & H. R. Strauss.* 426, 742, 107-F5 (1994)
Are Cosmic Rays Effective for Ionization of Protoplanetary Disks? *Arkady Z. Dolginov & Tomasz F. Stepinski.* 427, 377, 114-E3 (1994)
A Converging Flux Model of an X-Ray Bright Point and an Associated Canceling Magnetic Feature. *E. R. Priest, C. E. Parnell, & S. F. Martin.* 427, 459, 115-E9 (1994)
Three-dimensional Force-free Looplike Magnetohydrodynamic Equilibria. *John M. Finn, Parvez N. Guzdar, & Daniel Usikov.* 427, 475, 115-G1 (1994)
Magnetic Energy Dissipation via Reconnective Relaxation in Astrophysical Jets. *G. E. Vekstein, E. R. Priest, & C. D. C. Steele.* 92, 111, 32-F13 (1994)
Structure and Evolution of Magnetically Supported Molecular Clouds: Evidence for Ambipolar Diffusion in the Barnard 1 Cloud. *R. M. Crutcher, Telemachos Ch. Mouschovias, T. H. Troland, & Glenn E. Ciolek.* 427, 839, 123-A13 (1994)
On Dirac Equations for Linear Magnetoacoustic Waves Propagating in an Isothermal Atmosphere. *R. Alicki, Z. E. Musielak, J. Sikorski, & D. Makowiec.* 427, 919, 124-A13 (1994)
Eigenfunction Solution of Boltzmann's Equation for the Case of a Focusing Magnetic Field with Finite Helicity. *H. L. Pauls & R. A. Burger.* 427, 927, 124-B9 (1994)
The Formation of Sharp Structures by Ambipolar Diffusion. *Axel Brandenburg & Ellen G. Zweibel.* 427, L91, 127-A11 (1994)
Gravitational Instabilities in a Proto–Planetary Disk Including the Effects of Magnetic Fields. *Hyerim Noh, Ethan T. Vishniac, & William D. Cochran.* 428, 275, 131-E9 (1994)
Nonlinear Evolution of the Coronal Magnetic Field under Reconnective Relaxation. *R. Wolfson, G. E. Vekstein, & E. R. Priest.* 428, 345, 132-D11 (1994)
Magnetically Driven Jets and Winds: Exact Solutions. *J. Contopoulos & R. V. E. Lovelace.* 429, 139, 145-G7 (1994)
Multifractal Models of Small-Scale Solar Magnetic Fields. *A. C. Cadavid, J. K. Lawrence, A. A. Ruzmaikin, & A. Kayleng-Knight.* 429, 391, 149-A2 (1994)
Generation of Radiation in Solar Corona and Interplanetary Space by Energetic Electrons. *C. S. Wu, Peter H. Yoon, & G. C. Zhou.* 429, 406, 149-B8 (1994)
The Evolution of Cosmic-Ray–mediated Magnetohydrodynamic Shocks: A Two-Fluid Approach. *Byung-Il Jun, David A. Clarke, & Michael L. Norman.* 429, 748, 155-A3 (1994)
Magnetocentrifugally Driven Flows from Young Stars and Disks. I. A Generalized Model. *Frank Shu, Joan Najita, Eve Ostriker, Frank Wilkin, Steven Ruden, & Susana Lizano.* 429, 781, 155-D5 (1994)
Magnetocentrifugally Driven Flows from Young Stars and Disks. II. Formulation of the Dynamical Problem. *Frank H. Shu, Joan Najita, Steven P. Ruden, & Susana Lizano.* 429, 797, 155-E9 (1994)
Magnetocentrifugally Driven Flows from Young Stars and Disks. III. Numerical Solution of the Sub-Alfvénic Region. *Joan R. Najita & Frank H. Shu.* 429, 808, 155-F9 (1994)

Magnetostatic Structures of the Solar Corona. I. A Model Based on the Cauchy Boundary Value Problem. *J. R. Hundhausen & B. C. Low.* 429, 876, 156-E7 (1994)
Stellar Winds with Non-WKB Alfvén Waves. I. Wind Models for Solar Coronal Conditions. *K. B. MacGregor & P. Charbonneau.* 430, 387, 164-A9 (1994)
Dynamo Generation of a Magnetic Field in the White Dwarf GD 358. *J. Andrew Markiel, John H. Thomas, & H. M. Van Horn.* 430, 834, 172-C7 (1994)
Disruption of Coronal Magnetic Field Arcades. *Zoran Mikić & Jon A. Linker.* 430, 898, 173-B6 (1994)
Magnetic Structure of Pulsar Winds. *F. Curtis Michel.* 431, 397, 181-A6 (1994)
Stochastic Reacceleration of Cosmic Rays in the Interstellar Medium. *E. S. Seo & V. S. Ptuskin.* 431, 705, 187-C10 (1994)
The Relativistic Rotation Transformation and Pulsar Electrodynamics. *S. Kichenassamy & R. A. Krikorian.* 431, 715, 187-D8 (1994)
Stable Space Charge Configurations near the Force-free Surface of Rotating Magnets. *K. O. Thielheim & H. Wolfsteller.* 431, 718, 187-D13 (1994)
Asymptotic Forms for the Energy of Force-free Magnetic Field Configurations of Translational Symmetry. *P. A. Sturrock, S. K. Antiochos, J. A. Klimchuk, & G. Roumeliotis.* 431, 870, 189-D14 (1994)
Force-free Fields in Thin Coronal Loops. *A. Gordon Emslie & L. K. Wilkinson.* 431, 873, 189-E5 (1994)
Parasitic Instabilities in Magnetized, Differentially Rotating Disks. *Jeremy Goodman & Guohong Xu.* 432, 213, 195-G7 (1994)
Magnetically Driven Relativistic Jets and Winds: Exact Solutions. *J. Contopoulos.* 432, 508, 202-C7 (1994)
Toward a Theory of Interstellar Turbulence. I. Weak Alfvénic Turbulence. *S. Sridhar & P. Goldreich.* 432, 612, 203-E11 (1994)
Shock Propagation and the Generation of Magnetohydrodynamic Wave Fields in Inhomogeneous Molecular Clouds. *Mark S. Miesch & Ellen G. Zweibel.* 432, 622, 203-F9 (1994)
Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. I. Axisymmetric Solutions. *Shantanu Basu & Telemachos Ch. Mouschovias.* 432, 720, 205-A6 (1994)
Stability Criteria for Massive Current Sheets in Two-dimensional Potential Magnetic Fields. *J. J. Aly, S. Colombi, & T. Lepeltier.* 432, 793, 205-G9 (1994)
Gravitomagnetics in Stationary Media. *E. Woyk.* 433, 357, 212-F11 (1994)
Three-dimensional Simulation Study of the Magnetohydrodynamic Relaxation Process in the Solar Corona. I. Spontaneous Generation of the Taylor-Heyvaerts-Priest State. *K. Kusano, Y. Suzuki, H. Kubo, T. Miyoshi, & K. Nishikawa.* 433, 361, 212-G3 (1994)
Numerical Simulations of Magnetic Accretion Disks. *James M. Stone & Michael L. Norman.* 433, 746, 220-D1 (1994)
Shock Interactions with Magnetized Interstellar Clouds. I. Steady Shocks Hitting Nonradiative Clouds. *Mordecai-Mark Mac Low, Christopher F. McKee, Richard I. Klein, James M. Stone, & Michael L. Norman.* 433, 757, 220-E2 (1994)
Long-Term Evolution of Crustal Neutron Star Magnetic Fields. *V. A. Urpin, G. Chanmugam, & Yeming Sang.* 433, 780, 220-G5 (1994)
On Nonlinear Radial Adiabatic Oscillations in Magnetic Polytropes. *M. K. Das, O. J. Mollikutty, & R. K. Tavakol.* 433, 786, 220-G13 (1994)
Waves and Instabilities of a Toroidal Magnetic Flux Tube in a Rotating Star. *A. Ferriz-Mas & M. Schüssler.* 433, 852, 221-F10 (1994)
Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. I. Emerging Bipolar Magnetic Regions. *E. N. Parker.* 433, 867, 222-A1 (1994)
Steady State Magnetic Reconnection in Planar Geometries. *I. J. D. Craig & S. M. Henton.* 434, 192, 228-B1 (1994)
On the Effects of a Weak Magnetic Field on Turbulent Transport. *Fausto Cattaneo.* 434, 200, 228-B12 (1994)
On the Global Stability of Magnetized Accretion Disks. I. Axisymmetric Modes. *Charles Curry, Ralph E. Pudritz, & Peter G. Sutherland.* 434, 206, 228-C7 (1994)
Coalescence of Two Current Loops with a Kink Instability Simulated by a Three-dimensional Electromagnetic Particle Code. *Ken-Ichi Nishikawa, Jun-ichi Sakai, Jie Zhao, Torsten Neubert, & Oscar Buneman.* 434, 363, 230-D7 (1994)
Disk-driven Hydromagnetic Winds as a Key Ingredient of Active Galactic Nuclei Unification Schemes. *Arieh Königl & John F. Kartje.* 434, 446, 233-G9 (1994)
Dynamo Generation of Magnetic Fields in Accretion Disks. *Arun V. Mangalam & K. Subramanian.* 434, 509, 234-F10 (1994)
Transition to Turbulence in Solar Surges. *Russell B. Dahlburg & Judith T. Karpen.* 434, 766, 238-D1 (1994)
The Study of Coronal Plasma Structures and Fluctuations with Faraday Rotation Measurements. *Takayuki Sakurai & Steven R. Spangler.* 434, 773, 238-E6 (1994)
A Thermal/Nonthermal Model for Solar Hard X-Ray Bursts. *Stephen G. Benka & Gordon D. Holman.* 435, 469, 249-G11 (1994)
The Possible Role of MHD Waves in Heating the Solar Corona. *Lisa J. Porter, James A. Klimchuk, & Peter A. Sturrock.* 435, 482, 250-B1 (1994)
The Possible Role of High-Frequency Waves in Heating Solar Coronal Loops. *Lisa J. Porter, James A. Klimchuk, & Peter A. Sturrock.* 435, 502, 250-C10 (1994)
Acoustic Mode Mixing in Sunspots. *Sydney D'Silva.* 435, 881, 258-C6 (1994)
The Gravitomagnetic Dynamo Effect in Accretion Disks of Rotating Black Holes. *Ramon Khanna & Max Camenzind.* 435, L129, 260-B3 (1994)
Equilibrium Structure of Solar Magnetic Flux Tubes: Energy Transport with Multistream Radiative Transfer. *S. S. Hasan & W. Kalkofen.* 436, 355, 266-B7 (1994)
Multiple Scattering and Resonant Absorption of *p*-Modes by Fibril Sunspots. *R. Keppens, T. J. Bogdan, & M. Goossens.* 436, 372, 266-E2 (1994)
On the Relation between Coronal Heating, Flux Tube Divergence, and the Solar Wind Proton Flux and Flow Speed. *Ørnulf Sandbæk, Egil Leer, & Viggo H. Hansteen.* 436, 390, 266-F9 (1994)
Interactions between Magnetohydrodynamical Shocks and Denser Clouds. *Wenlong Dai & Paul R. Woodward.* 436, 776, 276-B13 (1994)
Dynamics of Emerging Active Region Flux Loops. *Y. Fan, G. H. Fisher, & A. N. McClymont.* 436, 907, 278-B13 (1994)
What is the Condition for Fast Magnetic Reconnection? *T. Yokoyama & K. Shibata.* 436, L197, 282-E7 (1994)
Evolution and Statistics of Current Sheets in Coronal Magnetic Loops. *D. W. Longcope & R. N. Sudan.* 437, 491, 289-G8 (1994)
Umbral Oscillations in Sunspots: Absorption of *p*-Modes and Active Region Heating by Mode Conversion. *P. S. Cally, T. J. Bogdan, & E. G. Zweibel.* 437, 505, 290-A11 (1994)
The Form of Ideal Current Layers in Line-tied Magnetic Fields. *D. W. Longcope & H. R. Strauss.* 437, 851, 297-C10 (1994)
Collapse and Fragmentation of Magnetized Cylindrical Clouds. *Kohji Tomisaka.* 438, 226, 4-E3 (1995)
Time-Distance Helioseismology in the Vicinity of Sunspots. *Sydney D'Silva & Thomas L. Duvall, Jr.* 438, 454, 7-G1 (1995)
Comparisons between Theory and Observation of Active Region Tilts. *G. H. Fisher, Y. Fan, & R. F. Howard.* 438, 463, 8-A1 (1995)
Evolution of Magnetized Protoplanetary Disks. *Mauricio Reyes-Ruiz & Tomasz F. Stepinski.* 438, 750, 14-E10 (1995)
Toward a Theory of Interstellar Turbulence. II. Strong Alfvénic Turbulence. *P. Goldreich & S. Sridhar.* 438, 763, 14-F12 (1995)
Physics of Magnetospheric Emission in Soft Gamma-Ray Repeaters. *Fulvio Melia & Marco Fatuzzo.* 438, 904, 16-E7 (1995)
A Dynamical Model of Magnetic Clouds. *Tyan Yeh.* 438, 975, 17-E7 (1995)
The Wall of Reconnection-driven Magnetohydrodynamic Turbulence in a Large Solar Flare. *R. L. Moore, T. N. LaRosa, & L. E. Orwig.* 438, 985, 17-F6 (1995)
Is the Solar Chromospheric Magnetic Field Force-free? *Thomas R. Metcalf, Litao Jiao, Alexander N. McClymont, Richard C. Canfield, & Han Uitenbroek.* 439, 474, 27-E11 (1995)
Relativistic, Hot Stellar Winds with Anisotropic Pressure. *Elgouja G. Tsikarishvili, Andria D. Rogava, & David G. Tsiklauri.* 439, 822, 36-A1 (1995)
Cooling of Solar Flare Plasmas. I. Theoretical Considerations. *Peter J. Cargill, John T. Mariska, & Spiro K. Antiochos.* 439, 1034, 39-A3 (1995)
Magnetohydrodynamic Simulations of Outflows from Accretion Disks. *G. V. Ustyugova, A. V. Koldoba, M. M. Romanova, V. M. Chechetkin, & R. V. E. Lovelace.* 439, L39, 40-C3 (1995)
Nonequilibrium in Sheared Axisymmetric Force-free Magnetic Fields. *J. J. Aly.* 439, L63, 40-F13 (1995)
Self-trapping of Superfluid Vortices and the Origin of Pulsar Glitches. *Yuko Mochizuki & Takeo Izuyama.* 440, 263, 44-G2 (1995)
The Bright Knots at the Tops of Soft X-Ray Loops: Quantitative Results from *Yohkoh*. *G. A. Doschek, K. T. Strong, & S. Tsuneta.* 440, 370, 46-C7 (1995)

Magnetic Merging in Colliding Flux Tubes. *Ellen G. Zweibel & James E. Rhoads.* 440, 407, 46-G3 (1995)

Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. II. The Origin of Enhanced Solar Irradiance. *E. N. Parker.* 440, 415, 47-A1 (1995)

Alfvén Waves in Interstellar Gasdynamics. *Christopher F. McKee & Ellen G. Zweibel.* 440, 686, 52-F2 (1995)

Local Three-dimensional Magnetohydrodynamic Simulations of Accretion Disks. *John F. Hawley, Charles F. Gammie, & Steven A. Balbus.* 440, 742, 53-D4 (1995)

Testing the DC-Electric Field Model in a Solar Flare Observed by *Yohkoh* and the *Compton Gamma-Ray Observatory*. *D. M. Zarro, J. T. Mariska, & B. R. Dennis.* 440, 888, 55-D8 (1995)

Coronal Loop Formation Resulting from Photospheric Convection. *G. Van Hoven, Y. Mok, & Z. Mikić.* 440, L105, 58-D8 (1995)

Pair Cascades in Extragalactic Jets. I. Gamma Rays. *R. D. Blandford & A. Levinson.* 441, 79, 60-D11 (1995)

Propagation of Galactic Cosmic Rays under Diffusive Reacceleration. *U. Heinbach & M. Simon.* 441, 209, 62-C4 (1995)

Time-dependent Simulation of Oblique MHD Cosmic-Ray Shocks Using the Two-Fluid Model. *Adam Frank, T. W. Jones, & Dongsu Ryu.* 441, 629, 70-F11 (1995)

Emerging Flux Tubes in the Solar Convection Zone. I. Asymmetry, Tilt, and Emergence Latitude. *P. Caligari, F. Moreno-Insertis, & M. Schüssler.* 441, 886, 74-B12 (1995)

Magnetoconvection Dynamics in a Stratified Layer. I. Two-dimensional Simulations and Visualization. *Steven R. Lantz & R. N. Sudan.* 441, 903, 74-D4 (1995)

Magnetoconvection Dynamics in a Stratified Layer. II. A Low-Order Model of the Tilting Instability. *Steven R. Lantz.* 441, 925, 74-F2 (1995)

A Solar Flare Triggering Mechanism Based on the Woltjer-Taylor Minimum Energy Principle. *K. Kusano, Y. Suzuki, & K. Nishikawa.* 441, 942, 74-G9 (1995)

Observations of Magnetic Fields in Diffuse Clouds. *P. C. Myers, A. A. Goodman, R. Güsten, & C. Heiles.* 442, 177, 79-E11 (1995)

On Magnetic Turbulence in Interstellar Clouds. *P. C. Myers & V. K. Khersonsky.* 442, 186, 79-F9 (1995)

Numerical Magnetohydrodynamics in Astrophysics: Algorithm and Tests for One-dimensional Flow. *Dongsu Ryu & T. W. Jones.* 442, 228, 80-C5 (1995)

Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. III. Extended Updrafts. *E. N. Parker.* 442, 405, 82-E8 (1995)

Incorporation of Ambipolar Diffusion into the ZEUS Magnetohydrodynamics Code. *Mordecai-Mark Mac Low, Michael L. Norman, Arieh Königl, & Mark Wardle.* 442, 726, 90-B10 (1995)

Brunt-Väisälä Growth Rate and the Radial Emergence of Equipartition Fields. *Sydney D'Silva.* 443, 444, 101-B11 (1995)

Heating of the Solar Middle Chromosphere by Large-Scale Electric Currents. *Michael L. Goodman.* 443, 450, 101-C7 (1995)

Asymptotic Analysis of Force-free Magnetic Fields of Cylindrical Symmetry. *P. A. Sturrock, S. K. Antiochos, & G. Roumeliotis.* 443, 804, 109-A1 (1995)

Shear-induced Opening of the Coronal Magnetic Field. *Richard Wolfson.* 443, 810, 109-A11 (1995)

Magnetostatic Structures of the Solar Corona. II. The Magnetic Topology of Quiescent Prominences. *B. C. Low & J. R. Hundhausen.* 443, 818, 109-B9 (1995)

Coronal Heating in Flare Stars: Resonant MHD Absorption? *D. J. Mullan & M. Johnson.* 444, 350, 118-C12 (1995)

A Numerical Study of Resonant Absorption in a Magnetohydrodynamic Cavity Driven by a Broadband Spectrum. *Andrew N. Wright & Graham J. Rickard.* 444, 458, 119-G13 (1995)

Coronal Heating by the Resonant Absorption of Alfvén Waves: Wavenumber Scaling Laws. *L. Ofman, J. M. Davila, & R. S. Steinolfson.* 444, 471, 120-B1 (1995)

Magnetohydrodynamic Disk-Wind Connection: Self-similar Solutions. *Zhi-Yun Li.* 444, 848, 128-B11 (1995)

Hydromagnetic Waves and the Linewidth-Size Relation in Interstellar Molecular Clouds. *Telemachos Ch. Mouschovias & Dimitrios Psaltis.* 444, L105, 131-A8 (1995)

Vacuum Zero-Point Field Pressure Instability in Astrophysical Plasmas and the Formation of Cosmic Voids. *Alfonso Rueda, Bernhard Haisch, & Daniel C. Cole.* 445, 7, 132-D10 (1995)

Magnetic Interchange Instability in Accretion Disks. *Stephen H. Lubow & Hendrik C. Spruit.* 445, 337, 137-B9 (1995)

Three Low-Energy Particle Events: Modeling the Influence of the Parent Interplanetary Shock. *A. M. Heras, B. Sanahuja, D. Lario, Z. K. Smith, T. Detman, & M. Dryer.* 445, 497, 139-D4 (1995)

Equilibrium in the Oblique Rotating Outer Pulsar Magnetosphere. *Geoffrey Endean.* 445, 762, 145-F7 (1995)

Magnetic Viscosity by Localized Shear Flow Instability in Magnetized Accretion Disks. *R. Matsumoto & T. Tajima.* 445, 767, 145-G1 (1995)

Force-free Self-similar Magnetically Driven Relativistic Jets. *J. Contopoulos.* 446, 67, 154-B9 (1995)

The Electrical Current Structure Associated with Solar Flare Electrons Accelerated by Large-Scale Electric Fields. *A. Gordon Emslie & Jean-Claude Hénoux.* 446, 371, 158-D1 (1995)

Photospheric Magnetic Field Evolution and Eruptive Flares. *T. G. Forbes & E. R. Priest.* 446, 377, 158-D10 (1995)

Alfvén Turbulence Dissipation in Proton Injection and Acceleration in Solar Flares. *Dean F. Smith & James A. Miller.* 446, 390, 158-E12 (1995)

The Dynamics of Flux Tubes in a High-β Plasma. I. A General Description. *Ethan T. Vishniac.* 446, 724, 166-B1 (1995)

Dynamo-generated Turbulence and Large-Scale Magnetic Fields in a Keplerian Shear Flow. *Axel Brandenburg, Åke Nordlund, Robert F. Stein, & Ulf Torkelsson.* 446, 741, 166-C7 (1995)

Superfluid Core Rotation in Pulsars. I. Vortex Cluster Dynamics. *Armen D. Sedrakian & David M. Sedrakian.* 447, 305, 176-F1 (1995)

Constraints on Energy Storage and Release Models for Astrophysical Transients and Solar Flares. *Edward T. Lu.* 447, 416, 178-B8 (1995)

Anisotropic Modal Energy Transfer in Interstellar Turbulence. *David Montgomery & William H. Matthaeus.* 447, 706, 185-F10 (1995)

Magnetocentrifugally Driven Flows from Young Stars and Disks. IV. The Accretion Funnel and Dead Zone. *Eve C. Ostriker & Frank H. Shu.* 447, 813, 187-B11 (1995)

Magnetohydrodynamic Waves in a Bounded Inhomogeneous Medium with Prominence-Corona Properties. *R. Oliver & J. L. Ballester.* 448, 444, 198-C8 (1995)

Flux Retraction and Recycling: Negative Buoyancy–induced Oscillations as an Alternative to Parker's Thermal Relaxation Oscillations. *Sydney D'Silva.* 448, 459, 198-D12 (1995)

Effects of Pressure and Resistivity on the Ambipolar Diffusion Singularity: Too Little, Too Late. *Axel Brandenburg & Ellen G. Zweibel.* 448, 734, 204-G12 (1995)

On the Generation of Flux-Tube Waves in Stellar Convection Zones. II. Improved Treatment of Longitudinal Tube Wave Generation. *Z. E. Musielak, R. Rosner, H. P. Gail, & P. Ulmschneider.* 448, 865, 206-G7 (1995)

Magnetic Buoyancy, Vorticity, and Three-dimensional Flux-Tube Formation. *P. C. Matthews, D. W. Hughes, & M. R. E. Proctor.* 448, 938, 207-G11 (1995)

Nonlinear Energy Transfer in Solar Magnetic Loops. *Daniel O. Gómez, Edward E. DeLuca, & Alexander N. McClymont.* 448, 954, 208-B8 (1995)

Destabilization of Strongly Magnetized Jets. *Philip E. Hardee & David A. Clarke.* 449, 119, 211-G4 (1995)

Self-Consistency Constraints on the Dynamo Mechanism. *A. Bhattacharjee & Y. Yuan.* 449, 739, 223-A6 (1995)

Magnetohydrodynamic Stellar Winds: A New Class of Solutions. *Néstor O. Rotstein & Constantino Ferro Fontán.* 449, 745, 223-B1 (1995)

Magnetohydrodynamic Stellar Wind Solutions in Curved Magnetic Fields. *Néstor O. Rotstein & Constantino Ferro Fontán.* 449, 764, 223-C9 (1995)

One-dimensional Merging of Magnetic Fields with Cooling. *Victoria L. Dorman & Russell M. Kulsrud.* 449, 777, 223-D11 (1995)

Structure of a Fluid Disk around a Magnetized Compact Object in the Presence of a Self-consistent Toroidal Magnetic Field. *D. Banerjee, J. R. Bhatt, A. C. Das, & A. R. Prasanna.* 449, 789, 223-E12 (1995)

Exact Solutions for Steady State Incompressible Magnetic Reconnection. *I. J. D. Craig & S. M. Henton.* 450, 280, 231-G9 (1995)

The Role of Magnetic Reconnection in Chromospheric Eruptions. *Judith T. Karpen, Spiro K. Antiochos, & C. Richard DeVore.* 450, 422, 233-G3 (1995)

A Model of Nonlinear Dynamo Action in Lenticular Galaxies. *Matthew R. Walker & Carlo F. Barenghi.* 450, 540, 238-B12 (1995)

Effects of Weak-to-Moderate Vertical Magnetic Fields on Solar *f*- and *p*-Modes. *P. S. Cally.* 451, 372, 251-A8 (1995)

The Effects on Mass Flows on the Dissipation of Alfvén Waves in the Upper Layers of the Solar Atmosphere. *Margarita P. Ryutova & Shadia R. Habbal.* 451, 381, 251-B7 (1995)

Current Paths in the Corona and Energy Release in Solar Flares. *D. B. Melrose.* 451, 391, 251-C6 (1995)

Emission and Dynamics of a Heavy Three-dimensional Magnetized Jet. *Philip E. Hardee & David A. Clarke.* 451, L25, 252-D11 (1995)

Parity Nonconservation and Neutrino Transport in Magnetic Fields. *Alexander Vilenkin.* 451, 700, 256-G4 (1995)

The Influence of a Vertical Magnetic Field on Oscillations in an Isothermal Stratified Atmosphere. II. *Dipankar Banerjee, S. S. Hasan, & J. Christensen-Dalsgaard.* 451, 825, 258-E11 (1995)

Triggered Magnetic Energy Release in Solar Flares. *Y. Q. Hu, X. Li, & G. X. Ai.* 451, 843, 258-G4 (1995)

Hot-Plasma Ejections Associated with Compact-Loop Solar Flares. *K. Shibata, S. Masuda, M. Shimojo, H. Hara, T. Yokoyama, S. Tsuneta, T. Kosugi, & Y. Ogawara.* 451, L83, 261-B2 (1995)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. II. A Parameter Study. *Shantanu Basu & Telemachos Ch. Mouschovias.* 452, 386, 267-D7 (1995)

Galactic Cosmic-Ray Mediation of a Spherical Solar Wind Flow. II. The Steady State Hydromagnetic Approximation. *J. A. le Roux & V. S. Ptuskin.* 452, 423, 267-G11 (1995)

Klein-Gordon Equation and the Local Critical Frequency for Alfvén Waves Propagating in an Isothermal Atmosphere. *Z. E. Musielak & R. L. Moore.* 452, 434, 268-A11 (1995)

Mass Flux and Terminal Velocities of Magnetically Driven Jets from Accretion Disks. *Takahiro Kudoh & Kazunari Shibata.* 452, L41, 270-B1 (1995)

Numerical Magnetohydrodynamics in Astrophysics: Algorithm and Tests for Multidimensional Flow. *Dongsu Ryu, T. W. Jones, & Adam Frank.* 452, 785, 275-D7 (1995)

"Explosion" and Intensification of Magnetic Flux Tubes. *F. Moreno-Insertis, P. Caligari, & M. Schüssler.* 452, 894, 277-A11 (1995)

Maxwell's Equations in the Einstein Universe and Chronometric Cosmology. *I. E. Segal & Z. Zhou.* 100, 307, 50-D1 (1995)

Magnetic Braking, Ambipolar Diffusion, and the Formation of Cloud Cores and Protostars. III. Effect of the Initial Mass-to-Flux Ratio. *Shantanu Basu & Telemachos Ch. Mouschovias.* 453, 271, 284-G9 (1995)

A Numerical Study of Rayleigh-Taylor Instability in Magnetic Fluids. *Byung-Il Jun, Michael L. Norman, & James M. Stone.* 453, 332, 285-F9 (1995)

General Local Stability Criteria for Stratified, Weakly Magnetized Rotating Systems. *Steven A. Balbus.* 453, 380, 286-C13 (1995)

Dynamo Generation of Magnetic Fields in White Dwarfs. *John H. Thomas, J. Andrew Markiel, & H. M. Van Horn.* 453, 403, 286-F3 (1995)

Coronal Loop Oscillations Driven by Footpoint Motions: Analytical Results for a Model Problem. *David Berghmans & Peter De Bruyne.* 453, 495, 287-G10 (1995)

On the Global Stability of Magnetized Accretion Disks. II. Vertical and Azimuthal Magnetic Fields. *Charles Curry & Ralph E. Pudritz.* 453, 697, 293-D6 (1995)

Pitch Angle Diffusion Coefficient in an Extended Quasi-linear Theory. *C. K. Ng & D. V. Reames.* 453, 890, 296-C3 (1995)

Jacket Modes: Solar Acoustic Oscillations Confined to Regions Surrounding Sunspots and Plage. *T. J. Bogdan & P. S. Cally.* 453, 919, 296-F1 (1995)

The Corrugation Instability in Slow Magnetosonic Shock Waves. *James M. Stone & Mark Edelman.* 454, 182, 301-G7 (1995)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. IV. Effect of Ultraviolet Ionization and Magnetically Controlled Infall Rate. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 454, 194, 302-A10 (1995)

Quadrupolar Force-free Magnetic Fields with Singular Current Density Surfaces. *Y. Q. Hu.* 454, 480, 305-G12 (1995)

Theoretical Properties of Ω-Loops in the Convective Zone of the Sun. V. Coriolis Force and the Centrifugal Potential Barrier. *E. N. Parker.* 454, 927, 314-E10 (1995)

Scaling Law of Solar Coronal Loops Obtained with *Yohkoh*. *Ryouhei Kano & Saku Tsuneta.* 454, 934, 314-F7 (1995)

Radiation Pressure–driven Magnetic Disk Winds in Broad Absorption Line Quasi-stellar Objects. *Martijn de Kool & Mitchell C. Begelman.* 455, 448, 328-B3 (1995)

The Damping of Compressional Alfvén Waves near Magnetic Cusp Configurations. *R. A. Scheper & A. B. Hassam.* 455, 693, 331-D11 (1995)

Magnetocentrifugally Driven Flows from Young Stars and Disks. V. Asymptotic Collimation into Jets. *Frank H. Shu, Joan Najita, Eve C. Ostriker, & Hsien Shang.* 455, L155, 334-C6 (1995)

An Exact Solution for Steady State Magnetic Reconnection in Three Dimensions. *I. J. D. Craig, R. B. Fabling, S. M. Henton, & G. J. Rickard.* 455, L197, 335-A11 (1995)

MASERS

Radiative Transfer in Astronomical Masers. III. Filamentary Masers. *Moshe Elitzur, Christopher F. McKee, & David J. Hollenbach.* 367, 333, 16-B10 (1991)

Spectral Line Profiles and Luminosities of Astrophysical Water Masers. *Gerald E. Nedoluha & William D. Watson.* 367, L63, 22-C11 (1991)

Excitation of Millimeter and Submillimeter Water Masers. *David A. Neufeld & Gary J. Melnick.* 368, 215, 25-F11 (1991)

Saturation of the Synchrotron Megamaser. *André R. Crusius-Wätzel.* 368, 390, 30-A1 (1991)

Circular Polarization in 1612 MHz OH Maser Emission from OH/IR Stars. *Philip J. Zell & John D. Fix.* 369, 506, 44-A9 (1991)

Polarization of Astronomical Maser Radiation. *Moshe Elitzur.* 370, 407, 52-C12 (1991)

The Cyclotron Maser Instability: Application to Low-Density Magnetoplasmas. *H. P. Ladreiter.* 370, 419, 52-D12 (1991)

Fluctuations in Astronomical Masers. *Moshe Elitzur.* 370, L45, 53-F6 (1991)

New OH Main-Line Detections of OH/IR Stars. *Dale F. Dickinson & B. E. Turner.* 75, 1323, 23-A9 (1991)

Solar and Stellar Radio Spikes: Limits on the Saturation of the Electron-Cyclotron Maser. *Donat G. Wentzel & Markus J. Aschwanden.* 372, 688, 84-C1 (1991)

VLBI Observations of Interstellar Ammonia Masers. *Preethi Pratap, Karl M. Menten, Mark J. Reid, James M. Moran, & C. Malcolm Walmsley.* 373, L13, 91-B12 (1991)

Collisional Pumping of H_2O Masers in Star-forming Regions. *Nikolaos D. Kylafis & Colin A. Norman.* 373, 525, 94-D13 (1991)

Variability of Interstellar Hydroxyl Masers. *Andrew W. Clegg & James M. Cordes.* 374, 150, 99-G11 (1991)

NGC 7538 IRS 1: Subarcsecond Resolution Recombination Line and $^{15}NH_3$ Maser Observations. *R. A. Gaume, K. J. Johnston, H. A. Nguyen, T. L. Wilson, H. R. Dickel, W. M. Goss, & M. C. H. Wright.* 376, 608, 133-G12 (1991)

321 GHz Submillimeter Water Masers around Evolved Stars. *Karl M. Menten & Gary J. Melnick.* 377, 647, 147-F8 (1991)

Kinematical Models of Maser Shells Formed by Aspherical Stellar Outflows (U Orionis; OH 231.8+4.2; Orion-IRc2). *P. F. Bowers.* 76, 1099, 40-G9 (1991)

Pumping the Interstellar (6,3) Ammonia Maser. *Ronald D. Brown & Dinah M. Cragg.* 378, 445, 156-D10 (1991)

Excitation of the Hydroxyl Maser in OH/IR Stars. *Dale F. Dickinson.* 379, L29, 169-C11 (1991)

The Discovery of a New, Very Strong, and Widespread Interstellar Methanol Maser Line. *Karl M. Menten.* 380, L75, 188-E1 (1991)

Molecular Line Survey of Sagittarius B2(M) from 330 to 355 GHz and Comparison with Sagittarius B2(N). *E. C. Sutton, P. A. Jaminet, W. C. Danchi, & Geoffrey A. Blake.* 77, 255, 47-F1 (1991)

The Zeeman Effect in Astrophysical Water Masers and the Observation of Strong Magnetic Fields in Regions of Star Formation. *Gerald E. Nedoluha & William D. Watson.* 384, 185, 3-C5 (1992)

The Distribution of the 6_2–6_1 and 5_2–5_1 *E*-Type Methanol Masers in OMC-1. *K. J. Johnston, R. Gaume, S. Stolovy, T. L. Wilson, C. M. Walmsley, & K. M. Menten.* 385, 232, 14-G3 (1992)

Positions of the Radio Recombination Line Masers in MWC 349. *P. Planesas, J. Martín-Pintado, & E. Serabyn.* 386, L23, 29-D1 (1992)

A Survey of CS $J = 7 \rightarrow 6$ in Regions of Massive Star Formation. *René Plume, D. T. Jaffe, & Neal J. Evans II.* 78, 505, 9-F5 (1992)

Are the NGC 7538 Formaldehyde Masers Really Unusual? *Preethi Pratap, Lewis E. Snyder, & Wolfgang Batrla.* 387, 241, 40-A1 (1992)

Time Variations in Millimeter-Wave Radio Recombination Lines from the Be Star MWC 349A. *M. A. Gordon.* 387, 701, 47-D5 (1992)

Radiative Instabilities and 1000 Second Fluctuations in Astrophysical Masers. *Gerardo A. Scappaticci & William D. Watson.* 387, L73, 48-C10 (1992)

Probing the Circumstellar Environments of Very Young Low-Mass Stars Using Water Masers. *S. Terebey, S. N. Vogel, & P. C. Myers.* 390, 181, 76-C1 (1992)

1612 MHz OH Maser Emission from Axisymmetric Circumstellar Envelopes: Miras. *Alan J. Collison & John D. Fix.* 390, 191, 76-C13 (1992)
Discovery of Bipolar OH Maser Emission from the High-Latitude Supergiant Star HD 101584. *P. te Lintel Hekkert, J. M. Chapman, & A. A. Zijlstra.* 390, L23, 78-D9 (1992)
Location of the Dust Formation Region for Mira Variables. *P. F. Bowers.* 390, L27, 78-E1 (1992)
VLA Observations of 1612 and 1665 MHz OH Masers Associated with IRC +10420. *G. E. Nedoluha & P. F. Bowers.* 392, 249, 104-A9 (1992)
The Powering Sources of the Molecular Outflows in the AFGL 437, AFGL 5142, and AFGL 5157 Regions. *José M. Torrelles, José F. Gómez, Guillem Anglada, Robert Estalella, Rainer Mauersberger, & Carlos Eiroa.* 392, 616, 109-G9 (1992)
Distance and Kinematics of the W49N H_2O Maser Outflow. *C. R. Gwinn, J. M. Moran, & M. J. Reid.* 393, 149, 116-A1 (1992)
Water Masers in W49N—The Youngest Stellar Jet? *Mordecai-Mark Mac Low & Moshe Elitzur.* 393, L33, 120-E6 (1992)
Problems with the Standard Theory of Three-dimensional Masers. *David A. Neufeld.* 393, L37, 120-F1 (1992)
Planar H_2O Masers in Star-forming Regions. *Moshe Elitzur, David J. Hollenbach, & Christopher F. McKee.* 394, 221, 130-F10 (1992)
OH/IR Star Color Mimics. *B. M. Lewis.* 396, 251, 158-B13 (1992)
Mid-Infrared Imaging of Orion BN/KL: Astrometry of IRc2 and the SiO Maser. *Daniel Y. Gezari.* 396, L43, 160-G8 (1992)
Interstellar Scattering toward the Galactic Center as Probed by OH/IR Stars. *Huib Jan van Langevelde, Dale A. Frail, James M. Cordes, & Philip J. Diamond.* 396, 686, 165-G9 (1992)
IRAS 14070+0525: An OH Gigamaser at $z = 0.265$. *Willem A. Baan, James Rhoads, Karl Fisher, Daniel R. Altschuler, & Aubrey Haschick.* 396, L99, 167-E1 (1992)
The Detection of a New, Nonmasing Transition of Methanol at 28.3 GHz. *V. I. Slysh, S. V. Kalenskii, & I. E. Val'tts.* 397, L43, 173-F3 (1992)
On the Nature of the Bipolar Molecular Outflow in AFGL 437. *J. F. Gómez, J. M. Torrelles, R. Estalella, G. Anglada, L. Verdes-Montenegro, & P. T. P. Ho.* 397, 492, 177-A1 (1992)
Kinematics of W3(OH): First Proper Motions of OH Masers from VLBI Measurements. *E. E. Bloemhof, M. J. Reid, & J. M. Moran.* 397, 500, 177-A12 (1992)
OH/IR Stars in the Magellanic Clouds. *P. R. Wood, J. B. Whiteoak, S. M. G. Hughes, M. S. Bessell, F. F. Gardner, & A. R. Hyland.* 397, 552, 177-G5 (1992)
Variation in the Near-Infrared Surface Brightness Distribution of the Bipolar Nebula OH 231.8+4.2. *Joel H. Kastner, David A. Weintraub, B. Zuckerman, E. E. Becklin, I. McLean, & I. Gatley.* 398, 552, 191-A8 (1992)
Modeling SiO Maser Emission from Late-Type Stars. *Philip Lockett & Moshe Elitzur.* 399, 704, 206-F9 (1992)
Interacting H_2O Masers in Star-forming Regions. *Nikolaos D. Kylafis & Konstantinos G. Pavlakis.* 400, 344, 213-B12 (1992)
Rapid Time Variations and Radiative Instabilities of Astrophysical Masers. *Gerardo A. Scappaticci & William D. Watson.* 400, 351, 213-C7 (1992)
VLBI Observations of the 6.7 GHz Methanol Masers toward W3(OH). *K. M. Menten, M. J. Reid, P. Pratap, J. M. Moran, & T. L. Wilson.* 401, L39, 227-F1 (1992)
High-Excitation ^{29}SiO and ^{30}SiO Maser Emission. *J. Cernicharo & V. Bujarrabal.* 401, L109, 233-E5 (1992)
OH and H_2O Masers in Sagittarius B1: Evidence for Ongoing Star Formation. *David M. Mehringer, Patrick Palmer, & W. M. Goss.* 402, L69, 13-A1 (1993)
Evidence for the Cospatial Origin of SiO Masers in Different Rotational Transitions. *G. C. McIntosh & C. Read Predmore.* 404, L71, 40-E11 (1993)
Near-Infrared Imaging of the Becklin-Neugebauer–IRc2 Region in Orion with Subarcsecond Resolution. *C. Dougados, P. Léna, S. T. Ridgway, J. C. Christou, & R. G. Probst.* 406, 112, 56-E5 (1993)
Microarcsecond Proper Motions of Extragalactic Water Vapor Masers in M33. *L. J. Greenhill, J. M. Moran, M. J. Reid, K. M. Menten, & H. Hirabayashi.* 406, 482, 63-F13 (1993)
Diagonalization of the Velocity Variance/Covariance Matrix as a Diagnostic of Maser Proper Motions. *E. E. Bloemhof.* 406, L75, 68-E9 (1993)
High-Excitation SiO Maser Emission in VY Canis Majoris: Detection of the $v = 4$ $J = 5$–4 Transition. *J. Cernicharo, V. Bujarrabal, & J. L. Santarén.* 407, L33, 75-D6 (1993)
Relaxation of Molecular Velocities and Spectral Line Profiles of Astrophysical Masers. *Nels Anderson & William D. Watson.* 407, 620, 78-C10 (1993)
Synthesis Images of 6.7 GHz Methanol Masers. *R. P. Norris, J. B. Whiteoak, J. L. Caswell, M. H. Wieringa, & R. G. Gough.* 412, 222, 144-G8 (1993)
Pumping of Main Line OH Masers in the Circumstellar Envelopes of Type I Mira Variables. *Alan J. Collison & Gerald E. Nedoluha.* 413, 735, 165-E10 (1993)
The Detection of a New Methanol Maser Transition at 9.9 GHz. *V. I. Slysh, S. V. Kalenskii, & I. E. Val'tts.* 413, L133, 169-C6 (1993)
Infrared Coronal Emission Lines and the Possibility of Their Laser Emission in Seyfert Nuclei. *Matthew A. Greenhouse, Uri Feldman, Howard A. Smith, Marcel Klapisch, Anand K. Bhatia, & Avi Bar-Shalom.* 88, 23, 40-C11 (1993)
A Masing [Fe XI] Line. *G. J. Ferland.* 88, 49, 40-F13 (1993)
Polarization of Astronomical Maser Radiation. II. Polarization Modes and Unsaturated Growth. *Moshe Elitzur.* 416, 256, 204-C7 (1993)
Discovery of Interstellar Water Lines at 437, 439, and 471 GHz: Strong Case for Water Maser Formation behind C-Type Shocks. *Gary J. Melnick, Karl M. Menten, Thomas G. Phillips, & Todd Hunter.* 416, L37, 207-E13 (1993)
High-Resolution Centimeter Radio Continuum and Ammonia Maser Observations of the W51 Region of Star Formation. *R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 417, 645, 227-D1 (1993)
Simulated Ratio Recombination Line Emission at 1.3 Centimeters toward MWC 349. *J. Martín-Pintado, R. Gaume, R. Bachiller, K. Johnston, & P. Planesas.* 418, L79, 245-E2 (1993)
Stimulated Raman Scattering as an Explanation for the Extreme High-Velocity Features of Water Maser Emission. *Shuji Deguchi.* 420, 551, 9-D11 (1994)
The Nature of the Radio Recombination Line Emission from MWC 349A. *M. A. Gordon.* 421, 314, 19-G7 (1994)
Pumping of Main Line OH Masers in the Circumstellar Envelopes of OH/Infrared Stars. *Alan J. Collison & Gerald E. Nedoluha.* 422, 193, 32-E1 (1994)
The Angular Structure and Intraday Variability of a Water Vapor Maser in IC 10. *A. L. Argon, L. J. Greenhill, J. M. Moran, M. J. Reid, K. M. Menten, C. Henkel, & M. Inoue.* 422, 586, 39-B7 (1994)
On the Theory of Astronomical Masers in Three Dimensions. *Moshe Elitzur.* 422, 751, 41-B13 (1994)
Intensity-dependent Circular Polarization and Circumstellar Magnetic Fields from the Observation of SiO Masers. *Gerald E. Nedoluha & William D. Watson.* 423, 394, 51-A11 (1994)
Star Formation in the Galactic Center Dust Ridge. *D. C. Lis, K. M. Menten, E. Serabyn, & R. Zylka.* 423, L39, 53-F1 (1994)
The Spatial Size of the SiO Masers in R Leonis Derived from Lunar Occultations. *J. Cernicharo, W. Brunswig, G. Paubert, & S. Liechti.* 423, L143, 61-C13 (1994)
The H_2O Masers in IC 10SE. *Willem A. Baan & Aubrey Haschick.* 424, L33, 69-E1 (1994)
Basic Theory for Polarized, Astrophysical Maser Radiation in a Magnetic Field. *William D. Watson.* 424, L37, 69-E8 (1994)
The W3 IRS 5 Cluster: Radio Continuum and Water Maser Observations. *M. J. Claussen, R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 424, L41, 69-E13 (1994)
Modeling of the Hydrogen Maser Disk in MWC 349. *Victor O. Ponomarev, Howard A. Smith, & Vladimir S. Strelnitski.* 424, 976, 77-A1 (1994)
Apparent Sizes and Spectral Line Profiles for Spherical ("Three-dimensional") Astrophysical Masers. *Robert T. Emmering & William D. Watson.* 424, 991, 77-B8 (1994)
Shock-excited Maser Emission from the Supernova Remnant W28. *D. A. Frail, W. M. Goss, & V. I. Slysh.* 424, L111, 79-C8 (1994)
Anisotropic Scattering of OH/IR Stars toward the Galactic Center. *Dale A. Frail, Philip J. Diamond, James M. Cordes, & Huib Jan Van Langevelde.* 427, L43, 117-F6 (1994)
Radio Continuum, Ammonia, and Water Maser Observations of Bright, Unassociated *IRAS* Point Sources. *Mari Paz Miralles, Luis F. Rodríguez, & Eugenio Scalise.* 92, 173, 33-F3 (1994)
VLA Positions and Distributions of H_2O Masers Associated with 15 Mira and Semiregular Variables. *P. F. Bowers & K. J. Johnston.* 92, 189, 33-G8 (1994)
A Protostellar Jet Model for the Water Masers in W49N. *Mordecai-Mark Mac Low, Moshe Elitzur, James M. Stone, & Arieh Königl.* 427, 914, 124-A7 (1994)

Circular and Linear Polarization of the SiO Masers in VY Canis Majoris. *G. C. McIntosh, C. Read Predmore, & Nimesh A. Patel.* 428, L29, 134-E1 (1994)

Discovery of $^{14}NH_3(3, 3)$ Maser Emission in the Interstellar Medium. *Jeffrey G. Mangum & Alwyn Wootten.* 428, L33, 134-E8 (1994)

Physical Structure of H_2O Masers in W49N. *C. R. Gwinn.* 429, 253, 147-C3 (1994)

Observation of a Ring Structure in SiO Maser Emission from Late-Type Stars. *P. J. Diamond, A. J. Kemball, W. Junor, A. Zensus, J. Benson, & V. Dhawan.* 430, L61, 166-A10 (1994)

Observations of the Acceleration Regions of OH/IR Stars. *John D. Fix & Mark G. Mulhern.* 430, 824, 172-B5 (1994)

Detection of Formaldehyde Maser Emission near the Ultracompact H II Region G29.96−0.02. *Preethi Pratap, Karl M. Menten, & Lewis E. Snyder.* 430, L129, 175-A13 (1994)

Water Masers Associated with Low-Mass Stars: A 13 Month Monitoring Survey. *Bruce A. Wilking, Mark J. Claussen, Priscilla J. Benson, Philip C. Myers, Susan Terebey, & Alwyn Wootten.* 431, L119, 192-B1 (1994)

Scattered Halos around H_2O Masers. *C. R. Gwinn.* 431, L123, 192-B7 (1994)

Evidence from Masers for a Rapidly Rotating Disk at the Nucleus of NGC 4258. *William D. Watson & Bradley K. Wallin.* 432, L35, 199-E8 (1994)

Laser Action in Far-Infrared Astrophysical Sources. *Jianfang Peng & Anil K. Pradhan.* 432, L123, 207-B7 (1994)

Pump Cycles and Population Flow Networks in Astrophysical Masers: An Application to Class II Methanol Masers with Different Saturation Degrees. *A. M. Sobolev & S. Deguchi.* 433, 719, 220-A6 (1994)

New Formaldehyde Masers in Sagittarius B2. *David M. Mehringer, W. M. Goss, & Patrick Palmer.* 434, 237, 228-F6 (1994)

Water Maser Emission from X-Ray–heated Circumnuclear Gas in Active Galaxies. *David A. Neufeld, Philip R. Maloney, & Sarah Conger.* 436, L127, 281-A13 (1994)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. I. The $7° < |B| < 8°$ Strips. *H. Izumiura, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, N. Ukita, & I. Yamamura.* 437, 419, 288-G11 (1994)

The Masering Torus in NGC 4258. *Aubrey D. Haschick, Willem A. Baan, & Eric W. Peng.* 437, L35, 291-F6 (1994)

The Discovery of Five New H_2O Megamasers in Active Galaxies. *J. A. Braatz, A. S. Wilson, & C. Henkel.* 437, L99, 299-A8 (1994)

Shock-excited NH_3 (3,3) Masers in the NGC 6334 Star-forming Region. *Kathleen E. Kraemer & James M. Jackson.* 439, L9, 29-F7 (1995)

On the Current Status of Maser Polarization Theory. *Moshe Elitzur.* 440, 345, 45-G13 (1995)

Detection of a Subparsec Diameter Disk in the Nucleus of NGC 4258. *L. J. Greenhill, D. R. Jiang, J. M. Moran, M. J. Reid, K. Y. Lo, & M. J. Claussen.* 440, 619, 51-F8 (1995)

HCN Emission from Bright Carbon Stars: The Ground State Masers and Peculiar Broad Features. *Hideyuki Izumiura, Nobuharu Ukita, & Takashi Tsuji.* 440, 728, 53-C1 (1995)

A Nonlocal Calculation of Circumstellar OH Maser Emission. *Alan J. Collison & Gerald E. Nedoluha.* 442, 311, 81-D6 (1995)

Detection of a Series of Methanol Maser Lines at 1.9 Millimeter Wavelength. *V. I. Slysh, S. V. Kalenskii, & I. E. Val'tts.* 442, 668, 89-C7 (1995)

Time Variations of H_2O Maser Emission at W31A and W75S. *E. E. Lekht, E. Mendoza-Torres, & R. L. Sorochenko.* 443, 222, 98-B8 (1995)

Synchrotron Emission from the H_2O Maser Source in W3(OH). *M. J. Reid, A. L. Argon, C. R. Masson, K. M. Menten, & J. M. Moran.* 443, 238, 98-D3 (1995)

Instabilities and the Transport of Polarized Astrophysical Maser Radiation. *Bradley K. Wallin & William D. Watson.* 445, 465, 139-A4 (1995)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. II. The $4° < |b| < 5°$ Strips. *H. Izumiura, R. Catchpole, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, K. Sekiguchi, N. Ukita, & I. Yamamura.* 98, 271, 25-E14 (1995)

What is Powering the Orion Kleinmann-Low Infrared Nebula? *Karl M. Menten & Mark J. Reid.* 445, L157, 152-A12 (1995)

Molecular Oxygen: A New Astrophysical Maser? *P. Bergman.* 445, L167, 152-D1 (1995)

The Mass Accretion Rate through the Masing Molecular Disk in the Active Galaxy NGC 4258. *David A. Neufeld & Philip R. Maloney.* 447, L17, 180-E11 (1995)

A Stringent Constraint on Alternatives to a Massive Black Hole at the Center of NGC 4258. *Eyal Maoz.* 447, L91, 190-F1 (1995)

A Circumstellar H_2O Maser Associated with the Circumnuclear Molecular Disk at the Galactic Center? *Deborah A. Levine, Donald F. Figer, Mark Morris, & Ian S. McLean.* 447, L101, 190-G7 (1995)

Newly Discovered Galactic H_2O Masers Associated with Outflows. *Delin Xiang & B. E. Turner.* 99, 121, 35-F10 (1995)

Radiative Instabilities in Three-dimensional Astrophysical Masers. *Gerardo A. Scappaticci & William D. Watson.* 448, 862, 206-G1 (1995)

Anomalously Excited OH and Competition between Maser Transitions toward Centaurus A. *Huib Jan van Langevelde, Ewine F. van Dishoeck, Maartje N. Sevenster, & Frank P. Israel.* 448, L123, 209-F2 (1995)

Interferometric Observations of the SiO Masers and Dust Shell of VX Sagittarii. *L. J. Greenhill, F. Colomer, J. M. Moran, D. C. Backer, W. C. Danchi, & M. Bester.* 449, 365, 215-B7 (1995)

Ammonia Maser in a Molecular Outflow toward W51. *Q. Zhang & Paul T. P. Ho.* 450, L63, 244-G1 (1995)

Discovery of Strong Vibrationally Excited Water Masers at 658 GHz toward Evolved Stars. *Karl M. Menten & Ken Young.* 450, L67, 244-G8 (1995)

Search for 6 Centimeter Formaldehyde Masers in 22 Galactic Star-forming Regions. *David M. Mehringer, W. M. Goss, & Patrick Palmer.* 452, 304, 266-C8 (1995)

An H_2O Maser near Sagittarius A East: Evidence for Active Massive Star Formation near the Galactic Center. *Farhad Yusef-Zadeh & David M. Mehringer.* 452, L37, 270-A4 (1995)

Dust Grains and the Luminosity of Circumnuclear Water Masers in Active Galaxies. *Alan J. Collison & William D. Watson.* 452, L103, 279-G3 (1995)

Thermal Jets and H_2O Masers: The Case of HH 80–81. *Y. Gómez, L. F. Rodríguez, & J. Martí.* 453, 268, 284-G3 (1995)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. III. Kinematics of the Bulge Stars. *H. Izumiura, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, N. Ukita, & I. Yamamura.* 453, 837, 295-D7 (1995)

Vibrational Ground-State SiO $J = 1–0$ Emission in Orion IRc2 Imaged with the VLA. *Claire J. Chandler & Christopher G. De Pree.* 455, L67, 325-E13 (1995)

The H_2O Megamasers in NGC 2639—Evidence for an Accretion Disk in a LINER Nucleus. *A. S. Wilson, J. A. Braatz, & C. Henkel.* 455, L127, 333-F12 (1995)

Spiral Structure in the Circumnuclear Disk at the Center of NGC 4258. *Eyal Maoz.* 455, L131, 333-G4 (1995)

SiO Emission from a 1000 AU Disk in Orion KL. *M. C. H. Wright, R. L. Plambeck, L. G. Mundy, & L. W. Looney.* 455, L185, 334-G3 (1995)

MASS-LUMINOSITY RELATION

Radius-Luminosity and Mass-Luminosity Relationships for Active Galactic Nuclei. *Anuradha P. Koratkar & C. Martin Gaskell.* 370, L61, 59-B1 (1991)

METEOROIDS

Large Electric Fields in Acoustic Waves and the Stimulation of Lightning Discharges. *W. Pilipp, T. W. Hartquist, & G. E. Morfill.* 387, 364, 41-D13 (1992)

Zodiacal Emission. III. Dust near the Asteroid Belt. *William T. Reach.* 392, 289, 104-E7 (1992)

SiC Particles from Asymptotic Giant Branch Stars: Mg Burning and the *s*-Process. *Lawrence E. Brown & Donald D. Clayton.* 392, L79, 113-E1 (1992)

^{26}Al and Time Scales of the Solar Nebula. *Kurt Lifman.* 398, L111, 194-F1 (1992)

Nonequilibrium Iron Oxide Formation in Some Low-Mass Post–Asymptotic Giant Branch Stars. *Frans J. M. Rietmeijer.* 400, L39, 214-E6 (1992)

s-Process Ba Isotopic Compositions in Presolar SiC from the Murchison Meteorite. *C. A. Prombo, F. A. Podosek, S. Amari, & R. S. Lewis.* 410, 393, 117-A1 (1993)

Carbon Stars and Isotopic Ba Anomalies in Meteoritic SiC Grains. *R. Gallino, C. M. Raiteri, & M. Busso.* 410, 400, 117-A10 (1993)

Origin of the Hydrocarbon Component of Carbonaceous Chondrites: The Star-Meteorite Connection. *Wei Lee & Thomas J. Wdowiak.* 417, L49, 223-D8 (1993)

The Puzzle of Silicon, Titanium, and Magnesium Anomalies in Meteoritic Silicon Carbide Grains. *Roberto Gallino, Claudia M. Raiteri, Maurizio Busso, & Francesca Matteucci.* 430, 858, 172-E13 (1994)

Carbon, Nitrogen, Magnesium, Silicon, and Titanium Isotopic Compositions of Single Interstellar Silicon Carbide Grains from the Murchison

Carbonaceous Chondrite. *Peter Hoppe, Sachiko Amari, Ernst Zinner, Trevor Ireland, & Roy S. Lewis.* 430, 870, 172-F12 (1994)

Isotopically Normal Zirconium in Murchison Hibonite 13-13: Implications for a Link between the *e*- and *r*-Processes. *Trevor R. Ireland.* 434, L79, 242-A1 (1994)

METEORS, METEOROIDS

Interstellar Grains within Interstellar Grains. *Thomas J. Bernatowicz, Sachiko Amari, Ernst K. Zinner, & Roy S. Lewis.* 373, L73, 97-E10 (1991)

^{26}Al and ^{16}O in the Early Solar System: Clues from Meteoritic Al_2O_3. *Edward Anders, Alois Virag, Ernst Zinner, & Roy S. Lewis.* 373, L77, 97-F6 (1991)

Isotopically Anomalous Ti in Presolar SiC from the Murchison Meteorite. *Trevor R. Ireland, Ernst K. Zinner, & Sachiko Amari.* 376, L53, 137-D7 (1991)

s-Process Ba, Nd, and Sm in Presolar SiC from the Murchison Meteorite. *Ernst Zinner, Sachiko Amari, & Roy S. Lewis.* 382, L47, 205-E11 (1991)

Isotopically Distinct Reservoirs in the Solar Nebula: Isotope Anomalies in Vigarano Meteorite Inclusions. *R. D. Loss, G. W. Lugmair, A. M. Davis, & G. J. MacPherson.* 436, L193, 282-D13 (1994)

On the Value of GEMS (Glass with Embedded Metal and Sulphides). *P. G. Martin.* 445, L63, 141-C8 (1995)

Carbon and Nitrogen Isotopes in Type II Supernova Diamonds. *Donald D. Clayton, Bradley S. Meyer, Chris I. Sanderson, Sara S. Russell, & C. T. Pillinger.* 447, 894, 188-C2 (1995)

Interpretation of ^{26}Al in Meteoritic Inclusions. *Donald D. Clayton & Liping Jin.* 451, L87, 261-B12 (1995)

Facts and Artifacts in Interstellar Diamond Spectra. *H. Mutschke, J. Dorschner, Th. Henning, C. Jäger, & U. Ott.* 454, L157, 316-G8 (1995)

METHODS: ANALYTICAL

A Topological/Geometrical Approach to the Study of Astrophysical Maps. *Fred C. Adams.* 387, 572, 45-G1 (1992)

On the Error Estimates of Correlation Functions. *H. J. Mo, Y. P. Jing, & G. Börner.* 392, 452, 107-G13 (1992)

The Potential Energy Tensors for Subsystems. *R. Caimmi & L. Secco.* 395, 119, 141-E11 (1992)

Stability of Scale-invariant Nonlinear Gravitational Clustering. *Laddawan Ruamsuwan & J. N. Fry.* 396, 416, 162-F1 (1992)

Confusion Noise and Source Clustering. *X. Barcons.* 396, 460, 163-B11 (1992)

First-Order Fermi Acceleration in Spherically Symmetric Flows: Solutions Including Quadratic Losses. *Peter A. Becker.* 397, 88, 169-B6 (1992)

Methods of Periodicity Analysis: Relationship between the Rayleigh Analysis and a Maximum Likelihood Method. *T. Bai.* 397, 584, 178-C6 (1992)

Angle-dependent Green's Functions for Relativistic Compton Reflection. *Xin-Min Hua & Richard E. Lingenfelter.* 397, 591, 178-D1 (1992)

A New Method for the Detection of a Periodic Signal of Unknown Shape and Period. *P. C. Gregory & Thomas J. Loredo.* 398, 146, 183-F11 (1992)

Interpolation, Realization, and Reconstruction of Noisy, Irregularly Sampled Data. *George B. Rybicki & William H. Press.* 398, 169, 184-A7 (1992)

Void Probability Function in the Southern Sky Redshift Survey. *Marc Lachièze-Rey, Luiz Nicolaci da Costa, & Sophie Maurogordato.* 399, 10, 195-B13 (1992)

An Efficient Method for the Calculation of Mean Extinction. I. The Analyticity of the Complex Extinction Efficiency of Homogeneous Spheres. *Zhang-fan Xing & J. Mayo Greenberg.* 399, 164, 197-C3 (1992)

Rational Function Approximations for Fermi-Dirac Integrals. *H. M. Antia.* 84, 101, 2-D9 (1993)

Variability of the Occurrence Frequency of Solar Flares as a Function of Peak Hard X-Ray Rate. *T. Bai.* 404, 805, 39-A1 (1993)

Solving the Bernoulli-Zel'dovich Equation. *M. Lachièze-Rey.* 407, 1, 69-B1 (1993)

Equidistribution of Energy and Other Quantities in Oscillating Systems. *Charles L. Wolff.* 414, 892, 182-D4 (1993)

Elliptic Mass Distributions versus Elliptic Potentials in Gravitational Lenses. *Aggeliki Kassiola & Israel Kovner.* 417, 450, 225-A1 (1993)

Applying the Zel'dovich Approximation to General Relativity. *K. M. Croudace, J. Parry, D. S. Salopek, & J. M. Stewart.* 423, 22, 46-D1 (1994)

An Iterative Method of Imaging. *L. W. Kebede.* 423, 878, 59-F11 (1994)

Stability against Phase Mixing of Collisionless Self-gravitating Matter. *Jens Hjorth.* 424, 106, 63-C11 (1994)

Green's Formula and Variational Principles for Cosmic-Ray Transport with Application to Rotating and Shearing Flows. *G. M. Webb, J. R. Jokipii, & G. E. Morfill.* 424, 158, 64-A1 (1994)

Gravitational Lens Inversion Using the Maximum Entropy Method. *Sylvanie Wallington, Ramesh Narayan, & Christopher S. Kochanek.* 426, 60, 96-G3 (1994)

Perturbative Growth of Cosmological Clustering. I. Formalism. *Somnath Bharadwaj.* 428, 419, 135-D4 (1994)

The Stability of Perfect Elliptic Disks. I. The Maximum Streaming Case. *Stephen E. Levine & Linda S. Sparke.* 428, 493, 136-D1 (1994)

Determining Structure in Molecular Clouds. *Jonathan P. Williams, Eugène J. de Geus, & Leo Blitz.* 428, 693, 139-A1 (1994)

Large Eddy Simulation of Turbulence: A Subgrid Scale Model Including Shear, Vorticity, Rotation, and Buoyancy. *V. M. Canuto.* 428, 729, 139-C13 (1994)

Multifractal Models of Small-Scale Solar Magnetic Fields. *A. C. Cadavid, J. K. Lawrence, A. A. Ruzmaikin, & A. Kayleng-Knight.* 429, 391, 149-A2 (1994)

The Evolution of Cosmic-Ray–mediated Magnetohydrodynamic Shocks: A Two-Fluid Approach. *Byung-Il Jun, David A. Clarke, & Michael L. Norman.* 429, 748, 155-A3 (1994)

On the Accurate Determination of the Clustering Hierarchy of Galaxies. *Péter Boschán, István Szapudi, & Alexander S. Szalay.* 93, 65, 42-G6 (1994)

On Determining the Spectrum of Primordial Inhomogeneity from the *COBE* DMR Sky Maps: Method. *Krzysztof M. Górski.* 430, L85, 174-D1 (1994)

Topological Analysis of Chaotic Orbits: Revisiting Hyperion. *Patricia T. Boyd, Gabriel B. Mindlin, Robert Gilmore, & Hernán G. Solari.* 431, 425, 181-C12 (1994)

The Analysis of Star Catalogs. I. An Intercomparison among the FK3, the FK4, and the FK5. *B. Bucciarelli, M. G. Lattanzi, & L. G. Taff.* 433, 831, 221-D13 (1994)

The Analysis of Star Catalogs. II. An Intercomparison among the GC, the N30, and the FK5 (B1950.0/FK4). *L. G. Taff & B. Bucciarelli.* 433, 845, 221-F1 (1994)

Is There Any Scaling in the Cluster Distribution? *Stefano Borgani, Vicent J. Martínez, Miguel A. Pérez, & Riccardo Valdarnini.* 435, 37, 243-F10 (1994)

Formal Results Regarding Metric Space Techniques for the Study of Astrophysical Maps. *Fred C. Adams & Jennifer J. Wiseman.* 435, 693, 255-E12 (1994)

A Quantitative Analysis of *IRAS* Maps of Molecular Clouds. *Jennifer J. Wiseman & Fred C. Adams.* 435, 708, 255-G3 (1994)

Weakly Nonlinear Gaussian Fluctuations and the Edgeworth Expansion. *Roman Juszkiewicz, David H. Weinberg, Piotr Amsterdamski, Michał Chodorowski, & François Bouchet.* 442, 39, 77-F10 (1995)

Nonperiodic Variations in Astrophysical Systems: Investigating Frequency Evolution. *Patricia T. Boyd, Patricia H. Carter, Robert Gilmore, & Joseph F. Dolan.* 445, 861, 147-A12 (1995)

Fokker-Planck Equations of Stochastic Acceleration: Green's Functions and Boundary Conditions. *Brian T. Park & Vahé Petrosian.* 446, 699, 165-F10 (1995)

Tomography/Power Spectrum Techniques for Removal of Fixed Pattern Noise from *Hubble Space Telescope* Spectra. *Cheng-Hsuan Lyu, Frederick C. Bruhweiler, & Andrew M. Smith.* 447, 880, 188-A10 (1995)

Astronomical Time Series Analysis. I. A Search for Periodicity Using Information Entropy. *Pablo M. Cincotta, Mariano Méndez, & Josué A. Núñez.* 449, 231, 213-D2 (1995)

The Intercomparison of Star Catalogs. III. Comparing the AGK3, the AGK3U, the ACRS (Part 1), and the PPM to the General Catalog. *D. Daou, J. E. Morrison, & L. G. Taff.* 451, 768, 257-F12 (1995)

Multidimensional Green's Functions and the Statistics of Diffusive Shock Acceleration. *G. M. Webb, G. P. Zank, C. M. Ko, & D. J. Donohue.* 453, 178, 283-F1 (1995)

Real-Space Cosmic Fields from Redshift-Space Distributions: A Green's Function Approach. *Max Tegmark & B. C. Bromley.* 453, 533, 291-C1 (1995)

An Intercomparison among Star Catalogs. IV. An Extension of the Theory. *J. E. Morrison & L. G. Taff.* 454, 361, 304-C4 (1995)

METHODS: DATA ANALYSIS

A Topological/Geometrical Approach to the Study of Astrophysical Maps. *Fred C. Adams.* 387, 572, 45-G1 (1992)

On the Ultimate Accuracy of Solar Oscillation Frequency Measurements. *K. G. Libbrecht.* 387, 712, 47-E7 (1992)

Interpolation, Realization, and Reconstruction of Noisy, Irregularly Sampled Data. *George B. Rybicki & William H. Press.* 398, 169, 184-A7 (1992)

The X-Ray Variability of NGC 6814: Power Spectrum. *C. Done, G. M. Madejski, R. F. Mushotzky, T. J. Turner, K. Koyama, & H. Kunieda.* 400, 138, 210-F1 (1992)

Two-dimensional Stochastic Processes in Astronomy. *B. Bucciarelli, M. G. Lattanzi, & L. G. Taff.* 84, 91, 2-C11 (1993)

A Method to Distinguish Two Gamma-Ray Bursts with Similar Time Profiles. *Joachim Wambsganss.* 406, 29, 55-D6 (1993)

Hierarchical Structure Analysis of Interstellar Clouds Using Nonorthogonal Wavelets. *William D. Langer, Robert W. Wilson, & Charles H. Anderson.* 408, L45, 89-C7 (1993)

The Quasi-periodic Oscillations and Very Low Frequency Noise of Scorpius X-1 as Transient Chaos: A Dripping Handrail? *Jeffrey D. Scargle, Thomas Steiman-Cameron, Karl Young, David L. Donoho, James P. Crutchfield, & James Imamura.* 411, L91, 142-E13 (1993)

The *Hubble Space Telescope* Quasar Absorption Line Key Project. II. Data Calibration and Absorption-Line Selection. *Donald P. Schneider, George F. Hartig, Buell T. Jannuzi, Sofia Kirhakos, David H. Saxe, Ray J. Weymann, John N. Bahcall, Jacqueline Bergeron, Alec Boksenberg, W. L. W. Sargent, Blair D. Savage, David A. Turnshek, & Arthur M. Wolfe.* 87, 45, 27-E9 (1993)

Scattered Light in the Echelle Modes of the Goddard High Resolution Spectrograph aboard the *Hubble Space Telescope*. II. Analysis of In-Flight Spectroscopic Observations. *Jason A. Cardelli, Dennis C. Ebbets, & Blair D. Savage.* 413, 401, 161-C5 (1993)

Restoration of Astronomical Images by Iterative Blind Deconvolution. *Stuart M. Jefferies & Julian C. Christou.* 415, 862, 198-F9 (1993)

Observing Stellar Coronae with the Goddard High Resolution Spectrograph. I. The dMe Star AU Microscopii. *S. P. Maran, R. D. Robinson, S. N. Shore, J. W. Brosius, K. G. Carpenter, B. E. Woodgate, J. L. Linsky, A. Brown, P. B. Byrne, M. R. Kundu, S. White, J. C. Brandt, R. A. Shine, & F. M. Walter.* 421, 800, 28-B10 (1994)

Solar Tomography. *Joseph M. Davila.* 423, 871, 59-F1 (1994)

The Variance of Correlation Function Estimates. *Gary M. Bernstein.* 424, 569, 71-F12 (1994)

Analysis Procedures for *ROSAT* XRT/PSPC Observations of Extended Objects and the Diffuse Background. *S. L. Snowden, D. McCammon, D. N. Burrows, & J. A. Mendenhall.* 424, 714, 73-F7 (1994)

Stellar Spectral Classification Using Automated Schemes. *R. K. Gulati, Ranjan Gupta, Pradeep Gothoskar, & Shyam Khobragade.* 426, 340, 100-D5 (1994)

Signal Detection amid Noise with Known Statistics. *A. F. Zepka, J. M. Cordes, & I. Wasserman.* 427, 438, 115-C10 (1994)

Statistical Bias in Distance and Peculiar Velocity Estimation. I. The "Calibration" Problem. *Jeffrey A. Willick.* 92, 1, 31-B1 (1994)

Imaging Spectroscopy with High Spatial Resolution. *Naoshi Baba, Susumu Kuwamura, Noriaki Miura, & Yuji Norimoto.* 431, L111, 192-A1 (1994)

Is a Data Set Distributed as a Power Law? A Test, with Application to Gamma-Ray Burst Brightnesses. *Ralph A. M. J. Wijers & Lori M. Lubin.* 432, 207, 195-F13 (1994)

Wiener Filtering of the *COBE* Differential Microwave Radiometer Data. *Emory F. Bunn, Karl B. Fisher, Yehuda Hoffman, Ofer Lahav, Joseph Silk, & Saleem Zaroubi.* 432, L75, 206-D1 (1994)

On the Analysis of Para-Ammonia Observations. *T. B. H. Kuiper.* 433, 712, 219-G11 (1994)

Stellar Photometry Including Saturated Images: Results on M67 with WFPC2. *Ronald L. Gilliland.* 435, L63, 252-E9 (1994)

Formal Results Regarding Metric Space Techniques for the Study of Astrophysical Maps. *Fred C. Adams & Jennifer J. Wiseman.* 435, 693, 255-E12 (1994)

A Quantitative Analysis of *IRAS* Maps of Molecular Clouds. *Jennifer J. Wiseman & Fred C. Adams.* 435, 708, 255-G3 (1994)

Statistical Uncertainties in Temperature Diagnostics for Hot Coronal Plasma Using the *ASCA* SIS. *Douglas A. Swartz, S. L. O'Dell, M. E. Sulkanen, & A. F. Tennant, Jr.* 435, L149, 260-D11 (1994)

Application of Cubic Splines to the Spectral Analysis of Unequally Spaced Data. *C. Akerlof, C. Alcock, R. Allsman, T. Axelrod, D. P. Bennett, K. H. Cook, K. Freeman, K. Griest, S. Marshall, H.-S. Park, S. Perlmutter, B. Peterson, P. Quinn, J. Reimann, A. Rodgers, C. W. Stubbs, & W. Sutherland.* 436, 787, 276-D9 (1994)

On the Nature of Gamma-Ray Burst Time Dilations. *Ralph A. M. J. Wijers & Bohdan Paczyński.* 437, L107, 299-B8 (1994)

BATSE Observations of Gamma-Ray Burst Spectra. II. Peak Energy Evolution in Bright, Long Bursts. *L. A. Ford, D. L. Band, J. L. Matteson, M. S. Briggs, G. N. Pendleton, R. D. Preece, W. S. Paciesas, B. J. Teegarden, D. M. Palmer, B. E. Schaefer, T. L. Cline, G. J. Fishman, C. Kouveliotou, C. A. Meegan, R. B. Wilson, & J. P. Lestrade.* 439, 307, 25-D6 (1995)

Inferring the Spatial and Energy Distribution of Gamma-Ray Burst Sources. I. Methodology. *Thomas J. Loredo & Ira M. Wasserman.* 96, 261, 5-A11 (1995)

Constraints on the Gamma-Ray Burst Luminosity Function from *Pioneer Venus Orbiter* and BATSE Observations. *Andrew Ulmer, Ralph A. M. J. Wijers, & Edward E. Fenimore.* 440, L9, 48-C1 (1995)

Noise Correlations in Cosmic Microwave Background Experiments. *Scott Dodelson, Arthur Kosowsky, & Steven T. Myers.* 440, L37, 57-B8 (1995)

Uncertainties for Two-dimensional Models of Solar Rotation from Helioseismic Eigenfrequency Splitting. *Christopher R. Genovese, Philip B. Stark, & Michael J. Thompson.* 443, 843, 109-D13 (1995)

Wavelet Transform Analysis of the Small-Scale X-Ray Structure of the Cluster Abell 1367. *S. A. Grebenev, W. Forman, C. Jones, & S. Murray.* 445, 607, 143-D12 (1995)

Stellar Variability in the Central Populations of 47 Tucanae from WF/PC Observations with the *Hubble Space Telescope*. I. Project Overview, Reduction Techniques, and First Results. *Ronald L. Gilliland, Peter D. Edmonds, Larry Petro, Abhijit Saha, & Michael M. Shara.* 447, 191, 174-G5 (1995)

Tomography/Power Spectrum Techniques for Removal of Fixed Pattern Noise from *Hubble Space Telescope* Spectra. *Cheng-Hsuan Lyu, Frederick C. Bruhweiler, & Andrew M. Smith.* 447, 880, 188-A10 (1995)

Solution to the Bivariate Integral Inversion Problem: The Determination of Emission Measures Differential in Temperature and Density. *Veronika Hubeny & Philip G. Judge.* 448, L61, 200-C13 (1995)

A Comparison of Active Region Temperatures and Emission Measures Observed in Soft X-Rays and Microwaves and Implications for Coronal Heating. *J. A. Klimchuk & D. E. Gary.* 448, 925, 207-F6 (1995)

Dead-Time Modifications to Fast Fourier Transform Power Spectra. *W. Zhang, K. Jahoda, J. H. Swank, E. H. Morgan, & A. B. Giles.* 449, 930, 225-E9 (1995)

Zeeman Effect Observations of H I Emission Profiles. II. Results of an Attempt to Confirm Previous Claims of Field Detections. *Gerrit L. Verschuur.* 451, 645, 256-B6 (1995)

Automated Source Classification Using a Kohonen Network. *P. H. Mähönen & P. J. Hakala.* 452, L77, 270-G1 (1995)

The X-Ray Emission of 3C 58 Revisited. *David J. Helfand, Robert H. Becker, & Richard L. White.* 453, 741, 294-A12 (1995)

Galactic Gamma-Ray Burst Models: Constraints on the Intrinsic Luminosity Function. *Jon Hakkila, Charles A. Meegan, Geoffrey N. Pendleton, John M. Horack, Michael S. Briggs, William S. Paciesas, & A. Gordon Emslie.* 454, 134, 301-B3 (1995)

A Method for Extracting Maximum Resolution Power Spectra from Galaxy Surveys. *Max Tegmark.* 455, 429, 327-G1 (1995)

The Second EGRET Catalog of High-Energy Gamma-Ray Sources. *D. J. Thompson, D. L. Bertsch, B. L. Dingus, J. A. Esposito, A. Etienne, C. E. Fichtel, D. P. Friedlander, R. C. Hartman, S. D. Hunter, D. J. Kendig, J. R. Mattox, L. M. McDonald, C. von Montigny, R. Mukherjee, P. V. Ramanamurthy, P. Sreekumar, J. M. Fierro, Y. C. Lin, P. F. Michelson, P. L. Nolan, S. K. Shriver, T. D. Willis, G. Kanbach, H. A. Mayer-Hasselwander, M. Merck, H.-D. Radecke, D. A. Kniffen, & E. J. Schneid.* 101, 259, 57-B11 (1995)

METHODS: LABORATORY

Laboratory Measurement of Rotational Spectrum of the ^{18}OH Radical Using a Tunable Far-Infrared Spectrometer. *Isamu Morino, Hitoshi Odashima, Fusakazu Matsushima, Shozo Tsunekawa, & Kojiro Takagi.* 442, 907, 92-F3 (1995)

On the Value of GEMS (Glass with Embedded Metal and Sulphides). *P. G. Martin.* 445, L63, 141-C8 (1995)

Interpretation of Anomalous Ultraviolet Transitions of Fe II Observed in Laboratory Fourier Transform Spectra and Stellar *HST* and *IUE* Spectra. *Sveneric Johansson, Tomas Brage, David S. Leckrone, Gillian Nave, & Glenn M. Wahlgren.* 446, 361, 158-C1 (1995)

Correlation between the Spectral Index and the Degree of Crystallization of Carbon and Graphite Grains. *C. Koike, S. Kimura, C. Kaito, H. Suto, H. Shibai, T. Nagata, T. Tanabe, & Y. Saito.* 446, 902, 168-F1 (1995)

On the Electronic Structure of Small Carbon Grains of Astrophysical Interest. *V. Mennella, L. Colangeli, E. Bussoletti, G. Monaco, P. Palumbo, & A. Rotundi.* 100, 149, 47-G9 (1995)

Fine-Structure Branching in N_2 c_4' $^1\Sigma_u^+$ (0). *D. E. Shemansky, I. Kanik, & J. M. Ajello.* 452, 480, 268-F13 (1995)

The Millimeter/Submillimeter Spectrum and Rotational Rest Frequencies of $MgCH_3(\tilde{X}\ ^2A_1)$. *M. A. Anderson & L. M. Ziurys.* 452, L157, 280-G7 (1995)

Facts and Artifacts in Interstellar Diamond Spectra. *H. Mutschke, J. Dorschner, Th. Henning, C. Jäger, & U. Ott.* 454, L157, 316-G8 (1995)

High-Density Amorphous Ice, the Frost on Interstellar Grains. *P. Jenniskens, D. F. Blake, M. A. Wilson, & A. Pohorille.* 455, 389, 323-D10 (1995)

Far-Ultraviolet Emission Cross Sections of Ne II and Ne III Excited by Electron Impact. *Geoffrey K. James, Isik Kanik, & Joseph M. Ajello.* 455, 769, 332-D13 (1995)

High-Resolution Electron-Impact Study of the Far-Ultraviolet Emission Spectrum of Molecular Hydrogen. *Xianming Liu, Syed M. Ahmed, Rosalie A. Multari, Geoffrey K. James, & Joseph M. Ajello.* 101, 375, 59-A3 (1995)

METHODS: MISCELLANEOUS

Diagonalization of the Velocity Variance/Covariance Matrix as a Diagnostic of Maser Proper Motions. *E. E. Bloemhof.* 406, L75, 68-E9 (1993)

METHODS: NUMERICAL

Relaxation-driven Binary Mergers. *Sergio Gelato, David F. Chernoff, & Ira Wasserman.* 384, 15, 1-C1 (1992)

Ambiguities in the Identification of Giant Molecular Cloud Complexes from Longitude-Velocity Diagrams. *David S. Adler & William W. Roberts, Jr.* 384, 95, 2-B12 (1992)

The Inverse Planckian Transform and Temperature Spectra. *Luis Salas.* 385, 288, 15-D12 (1992)

The Time Delay of Gravitational Lens 0957+561. I. Methodology and Analysis of Optical Photometric Data. *William H. Press, George B. Rybicki, & Jacqueline N. Hewitt.* 385, 404, 18-C4 (1992)

The Time Delay of Gravitational Lens 0957+561. II. Analysis of Radio Data and Combined Optical-Radio Analysis. *William H. Press, George B. Rybicki, & Jacqueline N. Hewitt.* 385, 416, 18-D4 (1992)

Numerical Simulations of Hydrodynamical Jets Crossing a Galactic Halo/Intracluster Medium Interface. *Paul J. Wiita & Michael L. Norman.* 385, 478, 19-B7 (1992)

Gravitational Clustering of Galaxies: Comparison between Thermodynamic Theory and *N*-Body Simulations. III. Velocity Distributions for Different Mass Components. *Shogo Inagaki, Makoto Itoh, & William C. Saslaw.* 386, 9, 24-B10 (1992)

Caustic-induced Features in Microlensing Magnification Probability Distributions. *Kevin P. Rauch, Shude Mao, Joachim Wambsganss, & Bohdan Paczyński.* 386, 30, 24-D10 (1992)

A Self-consistent Field Method for Galactic Dynamics. *Lars Hernquist & Jeremiah P. Ostriker.* 386, 375, 30-B6 (1992)

Optical and Radio Variability in Blazars. *Beth R. Hufnagel & Joel N. Bregman.* 386, 473, 31-C5 (1992)

On the Sensitivity of the *N*-Body Problem to Small Changes in Initial Conditions. II. *Henry E. Kandrup & Haywood Smith, Jr.* 386, 635, 33-C1 (1992)

A Hydrodynamic Approach to Cosmology: Methodology. *Renyue Cen.* 78, 341, 7-B1 (1992)

The Topology of Large-Scale Structure. VI. Slices of the Universe. *Changbom Park, J. Richard Gott III, Adrian L. Melott, & I. D. Karachentsev.* 387, 1, 37-A11 (1992)

Instabilities in Astrophysical Jets. I. Linear Analysis of Body and Surface Waves. *Jun-Hui Zhao, Jack O. Burns, Philip E. Hardee, & Michael L. Norman.* 387, 69, 37-G7 (1992)

Instabilities in Astrophysical Jets. II. Numerical Simulations of Slab Jets. *Jun-Hui Zhao, Jack O. Burns, Michael L. Norman, & Martin E. Sulkanen.* 387, 83, 38-B1 (1992)

Large-Scale Structure in Isocurvature Baryon Models. *Tatsushi Suginohara & Yasushi Suto.* 387, 431, 44-B1 (1992)

A Topological/Geometrical Approach to the Study of Astrophysical Maps. *Fred C. Adams.* 387, 572, 45-G1 (1992)

Angular Momentum Transport in Magnetized Stellar Radiative Zones. I. Numerical Solutions to the Core Spin-up Model Problem. *P. Charbonneau & K. B. MacGregor.* 387, 639, 46-E11 (1992)

Wavelet Analysis of Subclustering: An Illustration, Abell 754. *Eric Escalera & Alain Mazure.* 388, 23, 49-C12 (1992)

Time Variability Studies with Photon-counting Imaging Detectors. I. A Maximum Likelihood Technique. *S. Sciortino & G. Micela.* 388, 595, 57-E11 (1992)

The GDDSYN Light Curve Synthesis Method. *Paul D. Hendry & Stefan W. Mochnacki.* 388, 603, 57-F7 (1992)

Clustering of Galaxy Clusters. I. Is the Spatial Cluster-Cluster Correlation Function Enhanced Significantly by Contaminations? *Yi-Peng Jing, Manolis Plionis, & Riccardo Valdarnini.* 389, 499, 67-F3 (1992)

Three-dimensional Hydrodynamical Simulations of Colliding Stars. III. Collisions and Tidal Captures of Unequal-Mass Main-Sequence Stars. *W. Benz & J. G. Hills.* 389, 546, 68-C8 (1992)

Cooling and the Longevity of Polar Rings. *Neal Katz & Hans-Walter Rix.* 389, L55, 73-C3 (1992)

The Three-dimensional Interaction of a Supernova Remnant with an Interstellar Cloud. *James M. Stone & Michael L. Norman.* 390, L17, 78-C11 (1992)

Cluster Correlations from *N*-Point Correlation Amplitudes. *I. Szapudi, A. S. Szalay, & P. Boschán.* 390, 350, 79-E7 (1992)

Application of the Improved Hartle Method for the Construction of General Relativistic Rotating Neutron Star Models. *F. Weber & N. K. Glendenning.* 390, 541, 82-B1 (1992)

Ambipolar Diffusion and Star Formation: Formation and Contraction of Axisymmetric Cloud Cores. I. Formulation of the Problem and Method of Solution. *Robert A. Fiedler & Telemachos Ch. Mouschovias.* 391, 199, 88-D12 (1992)

The Rate of Gravitational Galaxy Clustering. *William C. Saslaw.* 391, 423, 93-B4 (1992)

Tracing Large-Scale Fluctuations Back in Time. *Adi Nusser & Avishai Dekel.* 391, 443, 93-D4 (1992)

Statistics of Pencil Beams in Voronoi Foams. *Mark U. SubbaRao & Alexander S. Szalay.* 391, 483, 93-G12 (1992)

A General Analytical Solution to the Problem of Malmquist Bias Due to Lognormal Distance Errors. *Stephen D. Landy & Alexander S. Szalay.* 391, 494, 94-A11 (1992)

Dissipational Galaxy Formation. II. Effects of Star Formation. *Neal Katz.* 391, 502, 94-B7 (1992)

Time Series Analysis in Astronomy: An Application to Quasar Variability Studies. *R. Vio, S. Cristiani, O. Lessi, & A. Provenzale.* 391, 518, 94-D5 (1992)

On the Error Estimates of Correlation Functions. *H. J. Mo, Y. P. Jing, & G. Börner.* 392, 452, 107-G13 (1992)

Catalog-to-Catalog Reductions: Results for the FK, N30, and GC Catalogs. *L. G. Taff, B. Bucciarelli, & M. G. Lattanzi.* 392, 746, 111-E9 (1992)

Adiabatic Properties of Pulsating DA White Dwarfs. III. A Finite-Element Code for Solving Nonradial Pulsation Equations. *P. Brassard, C. Pelletier, G. Fontaine, & F. Wesemael.* 80, 725, 33-D11 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. I. The Hydrodynamic Algorithms and Tests. *James M. Stone & Michael L. Norman.* 80, 753, 33-G3 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. II. The Magnetohydrodynamic Algorithms and Tests. *James M. Stone & Michael L. Norman.* 80, 791, 34-C5 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. III. The Radiation Hydrodynamic Algorithms and Tests. *James M. Stone, Dimitri Mihalas, & Michael L. Norman.* 80, 819, 34-E11 (1992)

Statistical Methods for Investigating Periodicities in Double-Galaxy Redshifts. *W. J. Cocke.* 393, 59, 114-G1 (1992)

The Void Spectrum in Two-dimensional Numerical Simulations of Gravitational Clustering. *Guinevere Kauffmann & Adrian L. Melott.* 393, 415, 121-B1 (1992)

The Three-Point Function in an Ensemble of Numerical Simulations. *J. N. Fry, Adrian L. Melott, & Sergei F. Shandarin.* 393, 431, 121-C5 (1992)

Percolation Analysis of Nonlinear Structures in Scale-free Two-dimensional Simulations. *Kurt G. Dominik & Sergei F. Shandarin.* 393, 450, 121-E1 (1992)

Transformations of Galaxies. I. Mergers of Equal-Mass Stellar Disks. *Joshua E. Barnes.* 393, 484, 121-G9 (1992)

Off-Center Nuclei in Galaxies. *R. H. Miller & B. F. Smith.* 393, 508, 122-B7 (1992)

Three-dimensional Hydrodynamic Simulations of Narrow-Angle–Tail Radio Sources. I. The Begelman, Rees, and Blandford Model. *Dinshaw S. Balsara & Michael L. Norman.* 393, 631, 123-F3 (1992)

Predicting Wolf's Sunspot Numbers with and without the Assumption of Periodicity. *Patricia B. Cerrito.* 393, 795, 125-G1 (1992)

Large-Scale Radial Velocity Correlations as a Test of Gaussian Initial Conditions. *Stephen D. Landy & Alexander S. Szalay.* 394, 25, 128-D1 (1992)

Higher Order Correlations of *IRAS* Galaxies. *Avery Meiksin, Istvan Szapudi, & Alexander Szalay.* 394, 87, 129-B6 (1992)

The Mass Function of Galaxy Halos in a Cold Dark Matter Universe. *T. G. Brainerd & J. V. Villumsen.* 394, 409, 134-D5 (1992)

Multifractal Properties of Cosmological *N*-Body Simulations. *Riccardo Valdarnini, Stefano Borgani, & Antonello Provenzale.* 394, 422, 134-E7 (1992)

The Angular Three-Point Function of Galaxy Clusters. *Stefano Borgani, Yi-Peng Jing, & Manolis Plionis.* 395, 339, 146-D5 (1992)

Properties of Galactic Halos in Spatially Flat Universes Dominated by Cold Dark Matter: Effects of Nonvanishing Cosmological Constant. *Tatsushi Suginohara & Yasushi Suto.* 396, 395, 162-C11 (1992)

Stability of Scale-invariant Nonlinear Gravitational Clustering. *Laddawan Ruamsuwan & J. N. Fry.* 396, 416, 162-F1 (1992)

Confusion Noise and Source Clustering. *X. Barcons.* 396, 460, 163-B11 (1992)

Linear Regression in Astronomy. II. *Eric D. Feigelson & Gutti Jogesh Babu.* 397, 55, 168-F9 (1992)

Two-dimensional Viscous Accretion Disk Models. I. On Meridional Circulations in Radiative Regions. *W. Kley & D. N. C. Lin.* 397, 600, 178-D13 (1992)

Clustering of Galaxy Clusters. II. Rare Events in the Cluster Distribution. *Manolis Plionis, Riccardo Valdarnini, & Yi-Peng Jing.* 398, 12, 182-C1 (1992)

A New Method for the Detection of a Periodic Signal of Unknown Shape and Period. *P. C. Gregory & Thomas J. Loredo.* 398, 146, 183-F11 (1992)

Interpolation, Realization, and Reconstruction of Noisy, Irregularly Sampled Data. *George B. Rybicki & William H. Press.* 398, 169, 184-A7 (1992)

Mass Segregation, Relaxation, and the Coulomb Logarithm in *N*-Body Systems. *Haywood Smith, Jr.* 398, 519, 190-E10 (1992)

Determining the Nuclear Equation of State from Neutron-Star Masses and Radii. *Lee Lindblom.* 398, 569, 191-C1 (1992)

Galaxy Clusters and Cold Dark Matter: A Low-Density Unbiased Universe? *Neta A. Bahcall & Renyue Cen.* 398, L81, 194-B6 (1992)

Mass Transfer and Loss in Interacting Disk Galaxies. *J. F. Wallin & B. V. Stuart.* 399, 29, 195-D10 (1992)

An Efficient Method for the Calculation of Mean Extinction. I. The Analyticity of the Complex Extinction Efficiency of Homogeneous Spheres. *Zhang-fan Xing & J. Mayo Greenberg.* 399, 164, 197-C3 (1992)

Filamentary and Hierarchical Pictures: Kinetic Energy Criterion. *Anatoly A. Klypin & Adrian L. Melott.* 399, 397, 203-A1 (1992)

Dark Halos Formed via Dissipationless Collapse. I. Shapes and Alignment of Angular Momentum. *Michael S. Warren, Peter J. Quinn, John K. Salmon, & Wojciech H. Zurek.* 399, 405, 203-A11 (1992)

On the Sensitivity of the *N*-Body Problem to Small Changes in Initial Conditions. III. *Henry E. Kandrup, Haywood Smith, Jr., & David E. Willmes.* 399, 627, 205-F9 (1992)

Diagnostics of Electron-heated Solar Flare Models. III. Effects of Tapered Loop Geometry and Preheating. *A. Gordon Emslie, Peng Li, & John T. Mariska.* 399, 714, 206-G7 (1992)

Bar-Spheroid Interaction in Galaxies. *Lars Hernquist & Martin D. Weinberg.* 400, 80, 210-A6 (1992)

Models of Star Formation in Interacting and Merging Disk Galaxies. *J. Christopher Mihos, Douglas O. Richstone, & Gregory D. Bothun.* 400, 153, 210-G4 (1992)

A Parameter Study of the Two-Fluid Solar Wind. *Ørnulf Sandbæk, Egil Leer, & Thomas E. Holzer.* 400, 362, 213-D8 (1992)

The Scaling Analysis as a Tool to Compare *N*-Body Simulations with Observations: Application to a Low-Bias Cold Dark Matter Model. *G. Yepes, R. Domínguez-Tenreiro, & H. M. P. Couchman.* 401, 40, 221-E3 (1992)

Enhancement of Diffusive Transport in Oscillatory Flows. *E. Knobloch & W. J. Merryfield.* 401, 196, 223-E3 (1992)

A Simple Multifractal Model of Nonlinear Gravitational Clustering. *Antonello Provenzale, Piero Galeotti, Giuseppe Murante, & Barbara Villone.* 401, 455, 228-D1 (1992)

LensClean: An Algorithm for Inverting Extended, Gravitationally Lensed Images with Application to the Radio Ring Lens PKS 1830−211. *Christopher S. Kochanek & Ramesh Narayan.* 401, 461, 228-D8 (1992)

Detection of Correlation among Galaxies within Clusters from Their Two-dimensional Number Density Profiles. *Eduard Salvador-Solé, Manuel Sanromà, & Guillermo González-Casado.* 402, 398, 7-E5 (1993)

Discreteness Noise versus Force Errors in *N*-Body Simulations. *Lars Hernquist, Piet Hut, & Jun Makino.* 402, L85, 13-C1 (1993)

Dynamical Evolution of Gaseous Disks in Halo Potentials. I. Massless Rings in Static, Spheroidal Halos. *Dimitris M. Christodoulou & Joel E. Tohline.* 403, 110, 15-D5 (1993)

Wiggled Structure of Herbig-Haro Objects: Helical Kink Instability of Jets from Young Stellar Objects. *Yasushi Todo, Yutaka Uchida, Tetsuya Sato, & Robert Rosner.* 403, 164, 16-A9 (1993)

Two-dimensional Stochastic Processes in Astronomy. *B. Bucciarelli, M. G. Lattanzi, & L. G. Taff.* 84, 91, 2-C11 (1993)

Gravitational Clustering of Galaxies: Comparison between Thermodynamic Theory and *N*-Body Simulations. IV. The Effects of Continuous Mass Spectra. *Makoto Itoh, Shogo Inagaki, & William C. Saslaw.* 403, 476, 21-E1 (1993)

An Efficient Method to Compute Microlensed Light Curves for Point Sources. *Hans J. Witt.* 403, 530, 22-B11 (1993)

Dependence of the Interstellar Propagation of Ultraheavy Cosmic-Ray Nuclei on Various Parameters. *Robert R. Clinton & C. Jake Waddington.* 403, 644, 23-F1 (1993)

Multifractal Analysis of Cluster Distribution in Two Dimensions. *Stefano Borgani, Manolis Plionis, & Riccardo Valdarnini.* 404, 21, 28-C11 (1993)

Orbital Deflections in *N*-Body Systems. *Siqin Huang, John Dubinski, & R. G. Carlberg.* 404, 73, 29-A1 (1993)

Three-Point Correlation Functions and the Hierarchical Clustering *Ansatz* in Low-Density Cold Dark Matter Universes. *Yasushi Suto.* 404, L1, 33-C7 (1993)

Smoothed Particle Hydrodynamics near a Black Hole. *Pablo Laguna, Warner A. Miller, & Wojciech H. Zurek.* 404, 678, 37-D3 (1993)

Relativistic Frequency-dependent Transfer in Spherical Flows. I. Method and Numerical Tests. *Luciano Nobili, Roberto Turolla, & Luca Zampieri.* 404, 686, 37-D12 (1993)

Numerical Simulations of Two-dimensional and Three-dimensional Wind Accretion Flows of an Isothermal Gas. *Takanori Ishii, Takuya Matsuda, Eiji Shima, Mario Livio, Ulrich Anzer, & Gerhard Börner.* 404, 706, 37-F9 (1993)

Some Cautionary Remarks about Smoothed Particle Hydrodynamics. *Lars Hernquist.* 404, 717, 37-G7 (1993)

Large-Eddy Simulations of Compressible Convection on Massively Parallel Computers. *Xin Xie & Juri Toomre.* 405, 747, 52-D1 (1993)

A Method to Distinguish Two Gamma-Ray Bursts with Similar Time Profiles. *Joachim Wambsganss.* 406, 29, 55-D6 (1993)

Clusters and Groups of Galaxies as Cosmological Probes. *Haruhiko Ueda, Makoto Itoh, & Yasushi Suto.* 408, 3, 83-B5 (1993)

Higher Order Statistics of the Galaxy Distribution Using Generating Functions. *István Szapudi & Alexander S. Szalay.* 408, 43, 83-E13 (1993)

Softening in *N*-Body Simulations of Collisionless Systems. *Charles C. Dyer & Peter S. S. Ip.* 409, 60, 97-F7 (1993)

Tests of Smoothing Methods for Topological Study of Galaxy Redshift Surveys. *Adrian L. Melott & Kurt G. Dominik.* 86, 1, 14-B1 (1993)

Nonlinear Properties and Time Evolution of Gravitational Galaxy Clustering. *William C. Saslaw & Ravi K. Sheth.* 409, 504, 105-B13 (1993)

Structure of Merger Remnants. II. Progenitors with Rotating Bulges. *Lars Hernquist.* 409, 548, 105-F12 (1993)

The Interacting System NGC 7753–7752 (Arp 86). II. *N*-Body Modeling. *Heikki Salo & Eija Laurikainen.* 410, 586, 121-A6 (1993)

Tidal Disruptions by Supermassive Black Holes: Hydrodynamic Evolution of Stars on a Schwarzschild Background. *Pablo Laguna, Warner A. Miller, Wojciech H. Zurek, & Melvyn B. Davies.* 410, L83, 125-G9 (1993)

N-Body Realizations of Compound Galaxies. *Lars Hernquist.* 86, 389, 19-F7 (1993)

The Formation of Protostellar Disks. I. 1 $M_{\odot}$. *Harold W. Yorke, Peter Bodenheimer, & Gregory Laughlin.* 411, 274, 130-E13 (1993)

Encounters between Binaries and Neutron Stars. *M. B. Davies, W. Benz, & J. G. Hills.* 411, 285, 130-F13 (1993)

The Cluster-Cluster Correlation in Hybrid Models. *Y. P. Jing, H. J. Mo, G. Börner, & L. Z. Fang.* 411, 450, 135-C1 (1993)

The Two-Point Correlation Function in Pancake Models and the Fair Sample Hypothesis. *Thomas Buchert & Vicent J. Martínez.* 411, 485, 135-F1 (1993)

Data Analysis of the Cosmic Background Radiation Anisotropy Experiments. *Juan Betancort-Rijo.* 411, 534, 136-C8 (1993)

Spatial and Temporal Distributed Acceleration of Cosmic Rays by Supernova Remnants: Three-dimensional Simulations. *G. A. Medina Tanco & R. Opher.* 411, 690, 138-C8 (1993)

Bias and Variance of Angular Correlation Functions. *Stephen D. Landy & Alexander S. Szalay.* 412, 64, 142-G6 (1993)

Studies of Galaxy Clustering through the Use of Binary Tree Hierarchies. I. Multipoint Correlation Functions. *Gregory J. Ruffa & David H. Porter.* 87, 179, 29-D11 (1993)

The Three-Point Correlation Function in an Ensemble of Three-dimensional Simulations. *J. N. Fry, A. L. Melott, & S. F. Shandarin.* 412, 504, 149-G12 (1993)

An Implicit Method for Two-dimensional Hydrodynamics. *Eli Livne.* 412, 634, 151-F4 (1993)

Spectrum Formation in Supernovae: Numerical Techniques. *Ronald G. Eastman & Philip A. Pinto.* 412, 731, 152-G12 (1993)

Percolation Technique for Galaxy Clustering. *Anatoly Klypin & Sergei F. Shandarin.* 413, 48, 156-F3 (1993)

The Angular Momentum Behavior in the Dissipationless Collapse of Triaxial Systems. *Anna Curir, Antonaldo Diaferio, & Fernando de Felice.* 413, 70, 157-A6 (1993)

Numerical Simulations of Protostellar Jets with Nonequilibrium Cooling. I. Method and Two-dimensional Results. *James M. Stone & Michael L. Norman.* 413, 198, 158-E6 (1993)

Nonlinear Inversion for Solar Oscillation Frequencies. *Yeming Gu.* 413, 422, 161-E4 (1993)

Simulations of the Ca XIX Spectral Emission from a Flaring Solar Coronal Loop. II. Impulsive Heating by Accelerated Electrons. *E. Antonucci, M. A. Dodero, R. Martin, G. Peres, F. Reale, & S. Serio.* 413, 786, 166-B11 (1993)

A Cosmological Hydrodynamic Code Based on the Total Variation Diminishing Scheme. *Dongsu Ryu, Jeremiah P. Ostriker, Hyesung Kang, & Renyue Cen.* 414, 1, 170-B1 (1993)

An $O(N \log N)$ Integration Scheme for Collisional Stellar Systems. *Stephen L. W. McMillan & Sverre J. Aarseth.* 414, 200, 172-E1 (1993)

Amplification of Cluster Correlations: The Effect of Sharp Clipping. *István Szapudi & Alexander S. Szalay.* 414, 493, 177-C12 (1993)

Improving the Reconstruction of the Velocity Potential and Primordial Density Fluctuations by Choice of Smoothing Windows. *Adrian L. Melott.* 414, L73, 185-D8 (1993)

On the Exponential Instability of N-Body Systems. *Jeremy Goodman, Douglas C. Heggie, & Piet Hut.* 415, 715, 196-F11 (1993)

Structure Formation with Cold plus Hot Dark Matter. *Anatoly Klypin, Jon Holtzman, Joel Primack, & Enikő Regős.* 416, 1, 201-B1 (1993)

Simulations of Compact Groups of Galaxies: The Effect of the Dark Matter Distribution. *Paul W. Bode, Haldan N. Cohn, & Phyllis M. Lugger.* 416, 17, 201-C5 (1993)

Ballistic Models for Radio Jets in Colliding Galaxies: 3C 278 (NGC 4782/4783). *Kirk D. Borne & Luis Colina.* 416, 157, 203-A8 (1993)

A Hydrodynamic Approach to Cosmology: Nonlinear Effects on Cosmic Backgrounds in the Cold Dark Matter Model. *Roberto Scaramella, Renyue Cen, & Jeremiah P. Ostriker.* 416, 399, 208-B9 (1993)

Structure of Merger Remnants. III. Phase-Space Constraints. *Lars Hernquist, David N. Spergel, & Jeremy S. Heyl.* 416, 415, 208-E4 (1993)

Smoothed Nonparametric Estimation of the Luminosity Function for Flux-limited Samples. *David Caditz & Vahé Petrosian.* 416, 450, 209-A1 (1993)

Structure Function Analysis of High Radio Frequency Variability in the Metsähovi Monitoring Sample of Active Galactic Nuclei. *M. Lainela & E. Valtaoja.* 416, 485, 209-C12 (1993)

Using the Schrödinger Equation to Simulate Collisionless Matter. *Lawrence M. Widrow & Nick Kaiser.* 416, L71, 216-D6 (1993)

The Piecewise-Linear Predictor-Corrector Code: A Lagrangian-Remap Method for Astrophysical Flows. *Eric A. Lufkin & John F. Hawley.* 88, 569, 47-F9 (1993)

A Simulation Atlas of Tidal Features in Galaxies. *Sethanne Howard, William C. Keel, Gene Byrd, & Jordan Burkey.* 417, 502, 225-E8 (1993)

Smoothed Particle Hydrodynamics Confronts Theory: Formation of Standing Shocks in Accretion Disks and Winds around Black Holes. *Sandip K. Chakrabarti & Diego Molteni.* 417, 671, 227-F7 (1993)

Numerical Simulations of Shock-driven Accretion. *M. Różyczka & H. C. Spruit.* 417, 677, 227-G1 (1993)

Resonance Scattering by Mercurian Sodium. *Donald M. Hunten & Lloyd V. Wallace.* 417, 757, 228-G6 (1993)

Velocity Fields and Alignments of Clusters in Gravitational Instability Scenarios. *Michiel van Haarlem & Rien van de Weygaert.* 418, 544, 239-C1 (1993)

Linear Evolution of the Gravitational Potential: A New Approximation for the Nonlinear Evolution of Large-Scale Structure. *Tereasa G. Brainerd, Robert J. Scherrer, & Jens V. Villumsen.* 418, 570, 239-E6 (1993)

An Improved Numerical Method for Nonadiabatic Nonradial Oscillations: An Application to White Dwarf Stars. *Umin Lee & P. A. Bradley.* 418, 855, 243-C1 (1993)

Ion Thermalization in the Inner Coma of a Comet. *P. Puhl, T. E. Cravens, & J. Lindgren.* 418, 899, 243-G1 (1993)

A Morphology-Cosmology Connection for X-Ray Clusters. *August E. Evrard, Joseph J. Mohr, Daniel G. Fabricant, & Margaret J. Geller.* 419, L9, 252-B13 (1993)

Correlation Functions from the Perseus-Pisces Redshift Survey. *S. A. Bonometto, A. Iovino, L. Guzzo, R. Giovanelli, & M. Haynes.* 419, 451, 253-D4 (1993)

Flame Modeling in Supernovae. *A. Khokhlov.* 419, L77, 259-E1 (1993)

Protostellar Hydrodynamics: Constructing and Testing a Spatially and Temporally Second-Order Accurate Method. II. Cartesian Coordinates. *Elizabeth A. Myhill & Alan P. Boss.* 89, 345, 54-C12 (1993)

Higher Order Godunov Schemes for Isothermal Hydrodynamics. *Dinshaw S. Balsara.* 420, 197, 3-D1 (1994)

Scale Dependence of Three-Point Correlation Functions: Model Predictions and Redshift-Space Contamination. *Takahiko Matsubara & Yasushi Suto.* 420, 497, 8-G2 (1994)

Departure from Hierarchical Clustering Relations for Two-, Three-, and Four-Point Correlation Functions: Analysis of Cosmological N-Body Simulations. *Yasushi Suto & Takahiko Matsubara.* 420, 504, 8-G11 (1994)

The Minimal Power Spectrum: Higher Order Contributions. *J. N. Fry.* 421, 21, 16-C11 (1994)

Penetration below a Convection Zone. *Neal E. Hurlburt, Juri Toomre, Josep M. Massaguer, & Jean-Paul Zahn.* 421, 245, 19-A12 (1994)

A New Method of Spectral Analysis of Unevenly Spaced Astrophysical Data. I. The Single-Period Case. *F. Barone, L. Milano, & G. Russo.* 421, 284, 19-E1 (1994)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. II. Numerical Method of Solution. *Scott A. Morton, Telemachos Ch. Mouschovias, & Glenn E. Ciolek.* 421, 561, 25-B6 (1994)

A New Radiation Hydrodynamics Code and Application to the Calculation of Type Ia Supernovae Light Curves and Continuum Spectra. *Xiao-he Zhang & Peter Sutherland.* 422, 719, 40-G1 (1994)

Oblique Magnetohydrodynamic Cosmic-Ray–modified Shocks: Two-Fluid Numerical Simulations. *Adam Frank, T. W. Jones, & Dongsu Ryu.* 90, 975, 16-A4 (1994)

Peculiar Velocity Effect on Galaxy Correlation Functions in Nonlinear Clustering Regime. *Takahiko Matsubara.* 424, 30, 62-D4 (1994)

On Jet Response to a Driving Frequency and the Jets in 3C 449. *Philip E. Hardee, Michael A. Cooper, & David A. Clarke.* 424, 126, 63-E7 (1994)

Test Problems for Radiation and Radiation-Hydrodynamics Codes. *Lisa Ensman.* 424, 275, 65-C9 (1994)

The Variance of Correlation Function Estimates. *Gary M. Bernstein.* 424, 569, 71-F12 (1994)

Self-Gravity and Dissipation in Polar Rings. *John Dubinski & Dimitris M. Christodoulou.* 424, 615, 72-E3 (1994)

Close Encounters of the Third-Body Kind. *M. B. Davies, W. Benz, & J. G. Hills.* 424, 870, 75-E8 (1994)

Redshift Distortions of Galaxy Correlation Functions. *J. N. Fry & Enrique Gaztañaga.* 425, 1, 80-B1 (1994)

Dark Matter in Hierarchical Cluster Evolution. *Mark J. Henriksen.* 425, 35, 80-E8 (1994)

Numerical Study of Two-Fluid C-Type Shock Waves. *Gábor Tóth.* 425, 171, 82-C11 (1994)

New Description of Charged Particle Propagation in Random Magnetic Fields. *James A. Earl.* 425, 331, 84-D7 (1994)

The Effects of Incomplete Sky Coverage on the Analysis of Large Angular Scale Microwave Background Anisotropy. *Emory Bunn, Yehuda Hoffman, & Joseph Silk.* 425, 359, 86-B8 (1994)

The Three-Point Function as a Probe of Models for Large-Scale Structure. *Joshua A. Frieman & Enrique Gaztañaga.* 425, 392, 86-E8 (1994)

Instabilities of Counterrotating Stellar Disks. *J. A. Sellwood & David Merritt.* 425, 530, 88-C5 (1994)

VLA Stereoscopy of Solar Active Regions. I. Method and Tests. *Markus J. Aschwanden & T. S. Bastian.* 426, 425, 101-E2 (1994)

VLA Stereoscopy of Solar Active Regions. II. Altitude, Relative Motion, and Center-to-Limb Darkening of 20 Centimeter Emission. *Markus J. Aschwanden & T. S. Bastian.* 426, 434, 101-E13 (1994)

Structure of Merger Remnants. IV. Isophotal Shapes. *Jeremy S. Heyl, Lars Hernquist, & David N. Spergel.* 427, 165, 112-B1 (1994)

The Distribution of *IRAS* Galaxies on Linear and Nonlinear Scales. *Ravi K. Sheth, H. J. Mo, & William C. Saslaw.* 427, 562, 119-F11 (1994)

Mass Segregation, Relaxation, and the Coulomb Logarithm in N-Body Systems (Again). *R. T. Farouki & E. E. Salpeter.* 427, 676, 121-B5 (1994)

Star Cluster Evolution with Primordial Binaries. III. Effect of the Galactic Tidal Field. *Steve McMillan & Piet Hut.* 427, 793, 122-E3 (1994)

A Test of the Adhesion Approximation for Gravitational Clustering. *Adrian L. Melott, Sergei F. Shandarin, & David H. Weinberg.* 428, 28, 128-E6 (1994)

The Zero-Point of the Cluster-Cluster Correlation Function: A Key Test of Cosmological Power Spectra. *Anatoly Klypin & George Rhee.* 428, 399, 135-B9 (1994)

X-Ray Clusters from a High-Resolution Hydrodynamic PPM Simulation of the Cold Dark Matter Universe. *Greg L. Bryan, Renyue Cen, Michael L. Norman, Jeremiah P. Ostriker, & James M. Stone.* 428, 405, 135-C1 (1994)

The Stability of Perfect Elliptic Disks. I. The Maximum Streaming Case. *Stephen E. Levine & Linda S. Sparke.* 428, 493, 136-D1 (1994)

Luminosity Variations of 3C 345: Is There Any Evidence of Low-dimensional Chaos? *A. Provenzale, R. Vio, & S. Cristiani.* 428, 591, 137-E9 (1994)

Large Eddy Simulation of Turbulence: A Subgrid Scale Model Including Shear, Vorticity, Rotation, and Buoyancy. *V. M. Canuto.* 428, 729, 139-C13 (1994)

X-Ray Clusters in a Cold Dark Matter + Λ Universe: A Direct, Large-Scale, High-Resolution, Hydrodynamic Simulation. *Renyue Cen & Jeremiah P. Ostriker.* 429, 4, 144-C6 (1994)

A Calculation of the Full Neutrino Phase Space in Cold + Hot Dark Matter Models. *Chung-Pei Ma & Edmund Bertschinger.* 429, 22, 144-D12 (1994)

Multifractal Models of Small-Scale Solar Magnetic Fields. *A. C. Cadavid, J. K. Lawrence, A. A. Ruzmaikin, & A. Kayleng-Knight.* 429, 391, 149-A2 (1994)

Cross-Correlation of Point Series Using a New Method. *Richard B. Stothers.* 429, 415, 149-C5 (1994)

Nonlinear Hydrodynamics of Cosmological Sheets. I. Numerical Techniques and Tests. *Wenbo Y. Anninos & Michael L. Norman.* 429, 434, 151-B10 (1994)

The Fraction of Matter in Voids. *Jaan Einasto, Enn Saar, Maret Einasto, Wolfram Freudling, & Mirt Gramann.* 429, 465, 151-E2 (1994)

The Evolution of Cosmic-Ray–mediated Magnetohydrodynamic Shocks: A Two-Fluid Approach. *Byung-Il Jun, David A. Clarke, & Michael L. Norman.* 429, 748, 155-A3 (1994)

A Comparison of Cosmological Hydrodynamic Codes. *Hyesung Kang, Jeremiah P. Ostriker, Renyue Cen, Dongsu Ryu, Lars Hernquist, August E. Evrard, Greg L. Bryan, & Michael L. Norman.* 430, 83, 160-A12 (1994)

High-Resolution Simulations of Compressible Convection Using the Piecewise-parabolic Method. *David H. Porter & Paul R. Woodward.* 93, 309, 45-G1 (1994)

The Evolution of Voids in the Adhesion Approximation. *Varun Sahni, B. S. Sathyaprakash, & Sergei F. Shandarin.* 431, 20, 176-D10 (1994)

The Structure and Evolution of Lyman-Alpha Forest Clouds in the Minihalo Model. *Avery Meiksin.* 431, 109, 177-E3 (1994)

On the Evolution of Clustering and the Biased Galaxy Formation Scenario. *Tereasa G. Brainerd & Jens V. Villumsen.* 431, 477, 184-E1 (1994)

Large-Scale Structure after *COBE*: Peculiar Velocities and Correlations of Cold Dark Matter Halos. *Wojciech H. Zurek, Peter J. Quinn, John K. Salmon, & Michael S. Warren.* 431, 559, 185-E1 (1994)

Power Spectrum, Correlation Function, and Tests for Luminosity Bias in the CfA Redshift Survey. *Changbom Park, Michael S. Vogeley, Margaret J. Geller, & John P. Huchra.* 431, 569, 185-F1 (1994)

The Effect of Dissipation on the Shapes of Dark Halos. *John Dubinski.* 431, 617, 186-C3 (1994)

Origin of Cluster-Cluster Correlation Functions in Biased Structure Formation Scenarios. *Takuya Watanabe, Takahiko Matsubara, & Yasushi Suto.* 432, 17, 193-D7 (1994)

Collapse of Primordial Gas Clouds and the Formation of Quasar Black Holes. *Abraham Loeb & Frederic A. Rasio.* 432, 52, 193-G8 (1994)

Diagnostics of Dust Content in Spiral Galaxies: Numerical Simulations of Radiative Transfer. *Y. I. Byun, K. C. Freeman, & N. D. Kylafis.* 432, 114, 194-F1 (1994)

An Implementation of a Tree Code on a SIMD Parallel Computer. *Kevin M. Olson & John E. Dorband.* 94, 117, 53-D5 (1994)

Velocity Bias in Clusters. *R. G. Carlberg.* 433, 468, 216-G1 (1994)

The Dynamical Evolution of Poor Clusters of Galaxies: Growth and Properties of the First-ranked Galaxy. *Paul W. Bode, Robert C. Berrington, Haldan N. Cohn, & Phyllis M. Lugger.* 433, 479, 217-A2 (1994)

A Numerical Simulation of a Variable Velocity Jet. *S. Biro & A. C. Raga.* 434, 221, 228-D11 (1994)

Numerical Study of Rotating Core Collapse in Supernova Explosions. *Shoichi Yamada & Katsuhiko Sato.* 434, 268, 229-B6 (1994)

The Cosmological Dependence of Cluster Density Profiles. *Mary M. Crone, August E. Evrard, & Douglas O. Richstone.* 434, 402, 233-C9 (1994)

A Spectrum Synthesis Program for Binary Stars. *Albert P. Linnell & Ivan Hubeny.* 434, 738, 238-A4 (1994)

A Three-dimensional Hydrodynamics Code for Modeling Sources of Gravitational Radiation. *Scott C. Smith, Joan M. Centrella, & Sean P. Clancy.* 94, 789, 62-G3 (1994)

Searches for Millisecond Pulsations in Low-Mass X-Ray Binaries. II. *B. A. Vaughan, M. van der Klis, K. S. Wood, J. P. Norris, P. Hertz, P. F. Michelson, J. van Paradijs, W. H. G. Lewin, K. Mitsuda, & W. Penninx.* 435, 362, 248-D1 (1994)

The Cosmological Mass Distribution from Cayley Trees with Disorder. *A. Cavaliere & N. Menci.* 435, 528, 253-D3 (1994)

Hierarchical Numerical Cosmology with Hydrodynamics: Methods and Code Tests. *Peter Anninos, Michael L. Norman, & David A. Clarke.* 436, 11, 261-D3 (1994)

Simulation of Interactions of an Orbiting Compact Star with an Accretion Disk by Smoothed Particle Hydrodynamics. *Diego Molteni, G. Gerardi, & Sandip K. Chakrabarti.* 436, 249, 264-F1 (1994)

Slingshot Ejections from Clusters of Three and Four Black Holes. *M. J. Valtonen, S. Mikkola, P. Heinämäki, & H. Valtonen.* 95, 69, 65-B1 (1994)

Cold Dark Matter. I. The Formation of Dark Halos. *James M. Gelb & Edmund Bertschinger.* 436, 467, 272-A5 (1994)

On the Peculiar Velocity Field of a CDM Universe. *Tereasa G. Brainerd & Jens V. Villumsen.* 436, 528, 272-F11 (1994)

Reconstruction of Initial Cosmological Density Fluctuations by the Pseudospectral Method. *Naoteru Gouda.* 436, 542, 273-A1 (1994)

Merging Rates inside Large-Scale Structures. *Nicola Menci & Riccardo Valdarnini.* 436, 559, 273-C1 (1994)

Interactions between Magnetohydrodynamical Shocks and Denser Clouds. *Wenlong Dai & Paul R. Woodward.* 436, 776, 276-B13 (1994)

Application of Cubic Splines to the Spectral Analysis of Unequally Spaced Data. *C. Akerlof, C. Alcock, R. Allsman, T. Axelrod, D. P. Bennett, K. H. Cook, K. Freeman, K. Griest, S. Marshall, H.-S. Park, S. Perlmutter, B. Peterson, P. Quinn, J. Reimann, A. Rodgers, C. W. Stubbs, & W. Sutherland.* 436, 787, 276-D9 (1994)

Synthesizing the Observed Distribution of Galaxies. *Ravi K. Sheth & William C. Saslaw.* 437, 35, 283-F3 (1994)

Correlations in Cosmic Density Fields. *B. C. Bromley.* 437, 541, 293-C1 (1994)

Star-forming Galaxy Models: Blending Star Formation into TREESPH. *J. Christopher Mihos & Lars Hernquist.* 437, 611, 294-B9 (1994)

Non-LTE Effects on the Strength of the Lyman Edge in Quasar Accretion Disks. *H. Störzer, P. H. Hauschildt, & F. Allard.* 437, L91, 298-G8 (1994)

Gasdynamical Approach to a Face-on View of the Milky Way. *Keiichi Wada, Yoshiaki Taniguchi, Asao Habe, & Tetsuo Hasegawa.* 437, L123, 299-D8 (1994)

High-Order Correlations of Rich Galaxy Clusters. *Alberto Cappi & Sophie Maurogordato.* 438, 507, 11-C1 (1995)

Smoothed Particle Interpolation. *Pablo Laguna.* 439, 814, 35-G2 (1995)

Non-LTE Line-blanketed Model Atmospheres of Hot Stars. I. Hybrid Complete Linearization/Accelerated Lambda Iteration Method. *I. Hubeny & T. Lanz.* 439, 875, 36-F8 (1995)

A Comparison of Two Algorithms for Simulating Collisionless Systems. *Shunsuke Hozumi & Lars Hernquist.* 440, 60, 42-A10 (1995)

Reverberation Mapping by Regularized Linear Inversion. *Julian H. Krolik & Christine Done.* 440, 166, 43-D13 (1995)

A Method of Smoothed Particle Hydrodynamics Using Spheroidal Kernels. *Michael S. Fulbright, Willy Benz, & Melvyn B. Davies.* 440, 254, 44-F4 (1995)

A Count Probability Cookbook: Spurious Effects and the Scaling Model. *S. Colombi, F. R. Bouchet, & R. Schaeffer.* 96, 401, 7-F13 (1995)

Convergence Properties of Finite-Difference Hydrodynamics Schemes in the Presence of Shocks. *Paul A. Kimoto & David F. Chernoff.* 96, 627, 10-D9 (1995)

Scale Invariance and Self-Similar Behavior of Dark Matter Halos. *F. Moutarde, J.-M. Alimi, F. R. Bouchet, & R. Pellat.* 441, 10, 59-D1 (1995)

Simulation of the Instability of Mach 2 and Mach 4 Gaseous Jets in Two and Three Dimensions. *Gene M. Bassett & Paul R. Woodward.* 441, 582, 70-B1 (1995)

Emerging Flux Tubes in the Solar Convection Zone. I. Asymmetry, Tilt, and Emergence Latitude. *P. Caligari, F. Moreno-Insertis, & M. Schüssler.* 441, 886, 74-B12 (1995)

Weakly Nonlinear Gaussian Fluctuations and the Edgeworth Expansion. *Roman Juszkiewicz, David H. Weinberg, Piotr Amsterdamski, Michał Chodorowski, & François Bouchet.* 442, 39, 77-F10 (1995)

Physically Detached "Compact Groups." *Lars Hernquist, Neal Katz, & David H. Weinberg.* 442, 57, 78-A3 (1995)

Femtolensing: Beyond the Semiclassical Approximation. *Andrew Ulmer & Jeremy Goodman.* 442, 67, 78-B4 (1995)

Numerical Magnetohydrodynamics in Astrophysics: Algorithm and Tests for One-dimensional Flow. *Dongsu Ryu & T. W. Jones.* 442, 228, 80-C5 (1995)

Hydrodynamic Simulations of Galaxy Formation. I. Dissipation and the Maximum Mass of Galaxies. *Anne A. Thoul & David H. Weinberg.* 442, 480, 86-E5 (1995)

The Settling of Warped Disks in Oblate Dark Halos. *John Dubinski & Konrad Kuijken.* 442, 492, 86-F7 (1995)

Incorporation of Ambipolar Diffusion into the ZEUS Magnetohydrodynamics Code. *Mordecai-Mark Mac Low, Michael L. Norman, Arieh Königl, & Mark Wardle.* 442, 726, 90-B10 (1995)

Window Functions for Cosmic Microwave Background Experiments. *Martin White & Mark Srednicki.* 443, 6, 95-C9 (1995)

Computing Supernova Collapse to Neutron Stars and Black Holes. *Thomas W. Baumgarte, Stuart L. Shapiro, & Saul A. Teukolsky.* 443, 717, 107-F13 (1995)

A First Map of the Cosmic Microwave Background at 0.5° Resolution. *Martin White & Emory F. Bunn.* 443, L53, 111-D1 (1995)

Softened Lagrangian Hydrodynamics for Cosmology. *Nickolay Y. Gnedin.* 97, 231, 15-B1 (1995)

Testing the Accuracy of Redshift-Space Group-finding Algorithms. *James J. Frederic.* 97, 259, 15-D3 (1995)

Assessing the Accuracy of Masses and Spatial Correlations of Galaxy Groups. *James J. Frederic.* 97, 275, 15-E8 (1995)

Competition of Supermassive Black Holes and Galactic Spheroids in the Destruction of Globular Clusters. *Jane C. Charlton & Pablo Laguna.* 444, 193, 116-A11 (1995)

Comparing Models of Rapidly Rotating Relativistic Stars Constructed by Two Numerical Methods. *Nikolaos Stergioulas & John L. Friedman.* 444, 306, 117-F1 (1995)

Can Standard Cosmological Models Explain the Observed Abell Cluster Bulk Flow? *Michael A. Strauss, Renyue Cen, Jeremiah P. Ostriker, Tod R. Lauer, & Marc Postman.* 444, 507, 123-D8 (1995)

Higher Order Correlation Functions for Quasars. *M. J. Pons-Borderia & S. A. Bonometto.* 444, 548, 124-A2 (1995)

Neural Network Prediction of Solar Activity. *R. A. Calvo, H. A. Ceccatto, & R. D. Piacentini.* 444, 916, 129-A8 (1995)

Radio Jet Propagation and Wide-Angle Tailed Radio Sources in Merging Galaxy Cluster Environments. *Chris Loken, Kurt Roettiger, Jack O. Burns, & Michael Norman.* 445, 80, 133-D11 (1995)

Numerical Simulations of Stratified Compressible Convection with Internal Heating and Disklike Variable Gravity. *W. Cabot, K. W. Thompson, & J. B. Pollack.* 98, 315, 26-C4 (1995)

A New Parallel *N*-Body Gravity Solver: TPM. *Guohong Xu.* 98, 355, 26-F12 (1995)

Implicit General Relativistic Hydrodynamic Methods for Modeling the Late-Time Explosion Mechanism in Core Collapse Supernovae. *F. Douglas Swesty.* 445, 811, 146-D4 (1995)

Models of Galaxies with Central Black Holes: Simulation Methods. *Steinn Sigurdsson, Lars Hernquist, & Gerald D. Quinlan.* 446, 75, 154-C6 (1995)

An Axisymmetric Distribution Function for the Galactic Bulge. *Konrad Kuijken.* 446, 194, 155-G8 (1995)

A Parallel Self-consistent Field Code. *Lars Hernquist, Steinn Sigurdsson, & Greg L. Bryan.* 446, 717, 166-A4 (1995)

Cosmological Constraints from Observed Cluster X-Ray Morphologies. *Joseph J. Mohr, August E. Evrard, Daniel G. Fabricant, & Margaret J. Geller.* 447, 8, 172-C12 (1995)

Precessing Jets and Point-Symmetric Nebulae. *J. A. Cliffe, A. Frank, M. Livio, & T. W. Jones.* 447, L49, 181-C10 (1995)

Destabilization of Compressible Convection by Radiation: Quantitative Evaluation. *Q. Q. Cheng, Murshed Hossain, & D. J. Mullan.* 447, 789, 186-G6 (1995)

Diffusive Shock Acceleration Simulations: Comparison with Particle Methods and Bow Shock Measurements. *Hyesung Kang & T. W. Jones.* 447, 944, 188-G13 (1995)

Two-dimensional Decomposition of Bulge and Disk. *Y. I. Byun & K. C. Freeman.* 448, 563, 202-D12 (1995)

Modeling Line Profiles of Protostellar Collapse in B335 with the Monte Carlo Method. *Minho Choi, Neal J. Evans II, Erik M. Gregersen, & Yangsheng Wang.* 448, 742, 204-A9 (1995)

Numerical Techniques for Three-dimensional Smoothed Particle Hydrodynamics Simulations: Applications to Accretion Disks. *James C. Simpson.* 448, 822, 206-C1 (1995)

Astronomical Time Series Analysis. I. A Search for Periodicity Using Information Entropy. *Pablo M. Cincotta, Mariano Méndez, & Josué A. Núñez.* 449, 231, 213-D2 (1995)

Comparison of *N*-Body Simulations to Statistical Observations of Galaxy Pairs. *Roger E. Bartlett & Jane C. Charlton.* 449, 497, 219-F4 (1995)

Nuclear Rings and Mass Inflow in Hydrodynamic Simulations of Barred Galaxies. *B. Glenn Piner, James M. Stone, & Peter J. Teuben.* 449, 508, 219-G5 (1995)

Numerical Analysis of the Dynamic Stability of Radiative Shocks. *Russell Strickland & John M. Blondin.* 449, 727, 222-G5 (1995)

Exact and Approximate Radiative Transfer in Differentially Moving Media. *Wei-Wei Yin & Guy S. Miller.* 449, 826, 224-B8 (1995)

Dynamics and Interactions of Binaries and Neutron Stars in Globular Clusters. *Steinn Sigurdsson & E. S. Phinney.* 99, 609, 43-D7 (1995)

Nonlinear Hydrodynamics of Cosmological Sheets. II. Fragmentation and the Gravitational, Cooling, and Thin-Shell Instabilities. *Wenbo Y. Anninos, Michael L. Norman, & Peter Anninos.* 450, 1, 228-B1 (1995)

The Role of Magnetic Reconnection in Chromospheric Eruptions. *Judith T. Karpen, Spiro K. Antiochos, & C. Richard DeVore.* 450, 422, 233-G3 (1995)

Iteration Profiles in Radiative Transfer Problems. I. From Vectorial to Scalar Coupling. *L. Crivellari & E. Simonneau.* 451, 328, 250-D6 (1995)

A Linear Moving Adaptive Particle-Mesh *N*-Body Algorithm. *Ue-Li Pen.* 100, 269, 49-F1 (1995)

Matter Distribution for Power Spectra with Broken Scale Invariance. *Luca Amendola, Stefan Gottlöber, Jan Peter Mücket, & Volker Müller.* 451, 444, 253-D10 (1995)

Mergers of Dissipationless Systems: Clues about the Fundamental Plane. *H. V. Capelato, R. R. de Carvalho, & R. G. Carlberg.* 451, 525, 254-E1 (1995)

The Optimal *N*-Body Method for Stability Studies of Galaxies. *David J. D. Earn & J. A. Sellwood.* 451, 533, 254-E12 (1995)

Sequential Star Formation in OB Associations: The Role of Molecular Cloud Turbulence. *Bruce G. Elmegreen, Toshiya Kimura, & Makoto Tosa.* 451, 675, 256-E1 (1995)

Some Remarks about Nova Spectroscopy and Photometry. *Shlomi Pistinner, Giora Shaviv, Peter H. Hauschildt, & Sumner Starrfield.* 451, 724, 257-B12 (1995)

Stable and Unstable Accretion Flows with Angular Momentum near a Point Mass. *Dongsu Ryu, Garry L. Brown, Jeremiah P. Ostriker, & Abraham Loeb.* 452, 364, 267-B7 (1995)

Automated Source Classification Using a Kohonen Network. *P. H. Mähönen & P. J. Hakala.* 452, L77, 270-G1 (1995)

Microscopic Instabilities of Nuclear Flames in Type Ia Supernovae. *J. C. Niemeyer & W. Hillebrandt.* 452, 779, 275-C12 (1995)

Numerical Magnetohydrodynamics in Astrophysics: Algorithm and Tests for Multidimensional Flow. *Dongsu Ryu, T. W. Jones, & Adam Frank.* 452, 785, 275-D7 (1995)

Hydra: An Adaptive-Mesh Implementation of P^3M-SPH. *H. M. P. Couchman, P. A. Thomas, & F. R. Pearce.* 452, 797, 275-E11 (1995)

A Numerical Study of Rayleigh-Taylor Instability in Magnetic Fluids. *Byung-Il Jun, Michael L. Norman, & James M. Stone.* 453, 332, 285-F9 (1995)

Cosmological Simulations Using Special Purpose Computers: Implementing P^3M on GRAPE. *Philippe P. Brieu, F. J. Summers, & Jeremiah P. Ostriker.* 453, 566, 291-F6 (1995)

Galaxy Tracers and Velocity Bias. *F. J. Summers, Marc Davis, & August E. Evrard.* 454, 1, 299-C1 (1995)

Action Principle Solutions for Galaxy Motions within 3000 Kilometers per Second. *Edward J. Shaya, P. J. E. Peebles, & R. Brent Tully.* 454, 15, 299-D4 (1995)

Comparison of Three Numerical Treatments of Charged Particle Transport. *J. A. Earl, D. Ruffolo, H. L. Pauls, & J. W. Bieber.* 454, 749, 312-A13 (1995)

A Novel Iterative Scheme for the Very Fast and Accurate Solution of Non-LTE Radiative Transfer Problems. *J. Trujillo Bueno & P. Fabiani Bendicho.* 455, 646, 330-G6 (1995)

Genetic Algorithms in Astronomy and Astrophysics. *P. Charbonneau.* 101, 309, 58-B5 (1995)

METHODS: OBSERVATIONAL

Ten New BL Lacertae Objects Discovered by an Efficient X-Ray/Radio/Optical Technique. *Jonathan F. Schachter, John T. Stocke, Eric Perlman, Martin Elvis, Ron Remillard, Arno Granados, Jane Luu, John P. Huchra, Roberta Humphreys, C. Megan Urry, & John Wallin.* 412, 541, 150-D9 (1993)

Radio Dispersion as a Diagnostic of Gamma-Ray Burst Distances. *David M. Palmer.* 417, L25, 223-A9 (1993)

The On-Orbit Performance of WFPC2. *John T. Trauger, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, John S. Gallagher III, Richard E. Griffiths, J. Jeff Hester, John G. Hoessel, Jon A. Holtzman, John E. Krist, Jeremy R. Mould, Paul A. Scowen, Karl R. Stapelfeldt, Alan M. Watson, & James A. Westphal.* 435, L3, 251-B5 (1994)

Adaptive Optics Experiments Using Sodium Laser Guide Stars. *M. Lloyd-Hart, J. R. P. Angel, B. Jacobsen, D. Wittman, R. Dekany, D. McCarthy, E. Kibblewhite, W. Wild, B. Carter, & J. Beletic.* 439, 455, 27-D2 (1995)

Adaptive Optics Imaging of Proto–Planetary Nebulae: Frosty Leo and the Red Rectangle. *F. Roddier, C. Roddier, J. E. Graves, & M. J. Northcott.* 443, 249, 98-E7 (1995)

Naked-Eye Observable Microlensing Events. *Wesley N. Colley & J. Richard Gott III.* 452, 82, 263-C4 (1995)

Detection of a Faint Optical Jet in 3C 120. *Jens Hjorth, Marianne Vestergaard, Anton N. Sørensen, & Frank Grundahl.* 452, L17, 269-E3 (1995)

Optimization and Performance of Adaptive Optics for Imaging Extrasolar Planets. *Steven M. Stahl & David G. Sandler.* 454, L153, 316-F13 (1995)

The Canada-France Redshift Survey. IV. Spectroscopic Selection Effects and 0300+00 Field Spectroscopic Data. *Francois Hammer, David Crampton, Olivier Le Fèvre, & Simon J. Lilly.* 455, 88, 319-D10 (1995)

METHODS: STATISTICAL

Time Variability Studies with Photon-counting Imaging Detectors. I. A Maximum Likelihood Technique. *S. Sciortino & G. Micela.* 388, 595, 57-E11 (1992)

Transient Periodicities in X-Ray–active Red Dwarfs: First Results from Mount Cuba and Interpretation with an Oscillating Loop Model. *D. J. Mullan, R. B. Herr, & S. Bhattacharyya.* 391, 265, 89-C1 (1992)

A Simple Test of Independence for Truncated Data with Applications to Redshift Surveys. *Bradley Efron & Vahé Petrosian.* 399, 345, 202-C1 (1992)

COBE Differential Microwave Radiometers: Preliminary Systematic Error Analysis. *A. Kogut, G. F. Smoot, C. L. Bennett, E. L. Wright, J. Aymon, G. De Amici, G. Hinshaw, P. D. Jackson, E. Kaita, P. Keegstra, C. Lineweaver, K. Loewenstein, L. Rokke, L. Tenorio, N. W. Boggess, E. S. Cheng, S. Gulkis, M. G. Hauser, M. A. Janssen, T. Kelsall, J. C. Mather, S. Meyer, S. H. Moseley, T. L. Murdock, R. A. Shafer, R. F. Silverberg, R. Weiss, & D. T. Wilkinson.* 401, 1, 221-B1 (1992)

Non-Gaussian Signatures from Gaussian Initial Fluctuations: Evolution of Skewness and Kurtosis from Cosmological Simulations in the Highly Nonlinear Regime. *Ofer Lahav, Makoto Itoh, Shogo Inagaki, & Yasushi Suto.* 402, 387, 7-D7 (1993)

Gravitational Radiation, Inspiraling Binaries, and Cosmology. *David F. Chernoff & Lee Samuel Finn.* 411, L5, 133-D8 (1993)

Can Extra Power Explain Periodicity on Large Scales? *Shan Luo & Ethan T. Vishniac.* 415, 450, 193-D9 (1993)

Toward Better Ways to Measure the Galaxy Correlation Function. *A. J. S. Hamilton.* 417, 19, 217-C11 (1993)

"Sample Variance" in Small-Scale Cosmic Microwave Background Anisotropy Experiments. *Douglas Scott, Mark Srednicki, & Martin White.* 421, L5, 21-D1 (1994)

A Maximum Entropy Method When Prior Information Consists of Inexact Constraints. *R. Lieu & R. B. Hicks.* 422, 845, 42-D1 (1994)

Wiener Reconstruction of All-Sky Galaxy Surveys in Spherical Harmonics. *O. Lahav, K. B. Fisher, Y. Hoffman, C. A. Scharf, & S. Zaroubi.* 423, L93, 60-C13 (1994)

Power-Spectrum Analysis of Three-dimensional Redshift Surveys. *Hume A. Feldman, Nick Kaiser, & John A. Peacock.* 426, 23, 96-D2 (1994)

Orientation Modeling of Radio Galaxy and Quasar Properties: Evidence for a Unified Model. *Matthew L. Lister, J. B. Hutchings, & Ann C. Gower.* 427, 125, 111-D13 (1994)

Signal Detection amid Noise with Known Statistics. *A. F. Zepka, J. M. Cordes, & I. Wasserman.* 427, 438, 115-C10 (1994)

Statistical Bias in Distance and Peculiar Velocity Estimation. I. The "Calibration" Problem. *Jeffrey A. Willick.* 92, 1, 31-B1 (1994)

Bookmakers' Odds for the Sky Distribution of Gamma-Ray Bursts. *D. Syer & P. Saha.* 427, 714, 121-E11 (1994)

Cross-Correlation of Point Series Using a New Method. *Richard B. Stothers.* 429, 415, 149-C5 (1994)

Conspicuous Tangential Alignment of Faint Blue and Red Objects in Cluster 0024+1654. *Aggeliki Kassiola, Israel Kovner, Bernard Fort, & Yannick Mellier.* 429, L9, 150-B9 (1994)

Bias Properties of Extragalactic Distance Indicators. I. The Hubble Constant Does Not Increase Outward. *Allan Sandage.* 430, 1, 159-B1 (1994)

Bias Properties of Extragalactic Distance Indicators. II. Bias Corrections to Tully-Fisher Distances for Field Galaxies. *Allan Sandage.* 430, 13, 159-C1 (1994)

Bias Properties of Extragalactic Distance Indicators. III. Analysis of Tully-Fisher Distances for the Mathewson-Ford-Buchhorn Sample of 1355 Galaxies. *Martin Federspiel, Allan Sandage, & G. A. Tammann.* 430, 29, 159-D5 (1994)

Redshift Data and Statistical Inference. *William I. Newman, Martha P. Haynes, & Yervant Terzian.* 431, 147, 178-A6 (1994)

Statistics of Cosmological Gamma-Ray Bursts: Source Evolution, Cosmological Geometry, and Relativistic Beaming. *Insu Yi.* 431, 543, 185-C10 (1994)

Is a Data Set Distributed as a Power Law? A Test, with Application to Gamma-Ray Burst Brightnesses. *Ralph A. M. J. Wijers & Lori M. Lubin.* 432, 207, 195-F13 (1994)

Constraints on the Fraction of Repeating Gamma-Ray Burst Sources from BATSE Measurements. *Tod E. Strohmayer, Edward E. Fenimore, & Juan A. Miralles.* 432, 665, 204-C8 (1994)

Wiener Filtering of the *COBE* Differential Microwave Radiometer Data. *Emory F. Bunn, Karl B. Fisher, Yehuda Hoffman, Ofer Lahav, Joseph Silk, & Saleem Zaroubi.* 432, L75, 206-D1 (1994)

BATSE Gamma-Ray Burst Line Search. II. Bayesian Consistency Methodology. *D. L. Band, L. A. Ford, J. L. Matteson, M. Briggs, W. Paciesas, G. Pendleton, R. Preece, D. Palmer, B. Teegarden, & B. Schaefer.* 434, 560, 235-E8 (1994)

Hot Gas in the Interstellar Medium: A Reanalysis of O VI Absorption Data. *R. L. Shelton & D. P. Cox.* 434, 599, 236-B2 (1994)

Optimal Galaxy Distance Estimators. *M. A. Hendry & J. F. L. Simmons.* 435, 515, 253-C1 (1994)

Can We Identify Lensed Gamma-Ray Bursts? *Michael A. Nowak & Scott A. Grossman.* 435, 557, 253-G4 (1994)

On Periodicity Tests and Flux Limit Calculations for Gamma-Ray Pulsars. *O. C. de Jager.* 436, 239, 264-E1 (1994)

Correlated Noise in the *COBE* DMR Sky Maps. *C. H. Lineweaver, G. F. Smoot, C. L. Bennett, E. L. Wright, L. Tenorio, A. Kogut, P. B. Keegstra, G. Hinshaw, & A. J. Banday.* 436, 452, 271-F11 (1994)

Two-Sample Discrimination of Poisson Means. *M. Lampton.* 436, 784, 276-D2 (1994)

Application of Cubic Splines to the Spectral Analysis of Unequally Spaced Data. *C. Akerlof, C. Alcock, R. Allsman, T. Axelrod, D. P. Bennett, K. H. Cook, K. Freeman, K. Griest, S. Marshall, H.-S. Park, S. Perlmutter, B. Peterson, P. Quinn, J. Reimann, A. Rodgers, C. W. Stubbs, & W. Sutherland.* 436, 787, 276-D9 (1994)

Statistics and Topology of the *COBE* Differential Microwave Radiometer First-Year Sky Maps. *G. F. Smoot, L. Tenorio, A. J. Banday, A. Kogut, E. L. Wright, G. Hinshaw, & C. L. Bennett.* 437, 1, 283-C1 (1994)

On the Nature of Gamma-Ray Burst Time Dilations. *Ralph A. M. J. Wijers & Bohdan Paczyński.* 437, L107, 299-B8 (1994)

The Fundamental Plane Correlations for Globular Clusters. *S. Djorgovski.* 438, L29, 10-B3 (1995)

The Width of the Gamma-Ray Burst Luminosity Function. *Andrew Ulmer & Ralph A. M. J. Wijers.* 439, 303, 25-C13 (1995)

Young Oxygen-rich Supernova Remnants. I. Observations of Three Southern Remnants. *Ralph S. Sutherland & Michael A. Dopita.* 439, 365, 26-B12 (1995)

Inferring the Spatial and Energy Distribution of Gamma-Ray Burst Sources. I. Methodology. *Thomas J. Loredo & Ira M. Wasserman.* 96, 261, 5-A11 (1995)

Gaussian Statistics of the Cosmic Microwave Background: Correlation of Temperature Extrema in the *COBE* DMR Two-Year Sky Maps. *A. Kogut, A. J. Banday, C. L. Bennett, G. Hinshaw, P. M. Lubin, & G. F. Smoot.* 439, L29, 40-B1 (1995)

Estimating the Cramér-Rao Bound for Restored Astronomical Observations. *T. S. Zaccheo, R. A. Gonsalves, S. M. Ebstein, & P. Nisenson.* 439, L43, 40-C11 (1995)

Constraints on the Gamma-Ray Burst Luminosity Function from *Pioneer Venus Orbiter* and BATSE Observations. *Andrew Ulmer, Ralph A. M. J. Wijers, & Edward E. Fenimore.* 440, L9, 48-C1 (1995)

Analytic Error Estimates. *Andrew Gould.* 440, 510, 50-C10 (1995)

A Count Probability Cookbook: Spurious Effects and the Scaling Model. *S. Colombi, F. R. Bouchet, & R. Schaeffer.* 96, 401, 7-F13 (1995)

Combinatorics and Companion Galaxies: Paradox Lost. *William I. Newman & Yervant Terzian.* 441, 505, 69-A8 (1995)

Repeating Sources of Classical Gamma-Ray Bursts. *V. C. Wang & R. E. Lingenfelter.* 441, 747, 72-C1 (1995)

Bayesian Approaches to Testing the Nature of Primordial Density Fluctuation. *Shan Luo & Ethan Vishniac.* 443, 469, 104-D1 (1995)

The Spatial Distribution of Blue Compact Galaxies in the Second Byurakan Survey. *Simon A. Pustil'nik, Andrei V. Ugryumov, Valentin A. Lipovetsky, Trinh X. Thuan, & Natalia G. Guseva.* 443, 499, 104-F11 (1995)

Uncertainties for Two-dimensional Models of Solar Rotation from Helioseismic Eigenfrequency Splitting. *Christopher R. Genovese, Philip B. Stark, & Michael J. Thompson.* 443, 843, 109-D13 (1995)

Higher Order Statistics from the APM Galaxy Survey. *István Szapudi, Gavin B. Dalton, George Efstathiou, & Alexander S. Szalay.* 444, 520, 123-E10 (1995)

Another Look at the *UBV* Variability of T Tauri Stars. *Pedro N. Safier.* 444, 818, 127-F12 (1995)

BATSE Gamma-Ray Burst Line Search. III. Line Detectability. *D. L. Band, L. A. Ford, J. L. Matteson, M. S. Briggs, W. S. Paciesas, G. N. Pendleton, R. D. Preece, D. M. Palmer, B. J. Teegarden, & B. E. Schaefer.* 447, 289, 176-D4 (1995)

Probability Distribution of the Hubble Constant and the Age of the Universe Inferred from Local Observations. *Takahiro T. Nakamura & Yasushi Suto.* 447, L65, 190-B8 (1995)

Testing Isotropy versus Clustering of Gamma-Ray Bursts. *Bradley Efron & Vahé Petrosian.* 449, 216, 213-B9 (1995)

A Simple Test for Non-Gaussianity in Cosmic Microwave Background Radiation Measurements. *Paul Graham, Neil Turok, P. M. Lubin, & J. A. Schuster.* 449, 404, 218-C9 (1995)

Statistics of Microlensing Optical Depth. *Cheongho Han & Andrew Gould.* 449, 521, 220-A7 (1995)

The *COBE* Normalization of CMB Anisotropies. *Martin White & Emory F. Bunn.* 450, 477, 237-C1 (1995)

Matched Filter Source Detection Applied to the *ROSAT* PSPC and the Determination of the Number-Flux Relation. *A. Vikhlinin, W. Forman, C. Jones, & S. Murray.* 451, 542, 254-F10 (1995)

Bias Properties of Extragalactic Distance Indicators. IV. Demonstration of the Population Incompleteness Bias Inherent in the Tully-Fisher Method Applied to Clusters. *Allan Sandage, G. A. Tammann, & Martin Federspiel.* 452, 1, 262-C2 (1995)

The Slope of the BATSE Number-Flux Distribution. *David Caditz.* 452, 140, 264-A4 (1995)

Diagrammatic Methods in Statistics and Biasing in the Large-Scale Structure of the Universe. *Takahiko Matsubara.* 101, 1, 53-B1 (1995)

The Underlying Distribution of Optical to X-Ray Spectral Index for Quasars in the Presence of Detection Thresholds. *Y. Avni, D. M. Worrall, & W. A. Morgan, Jr.* 454, 673, 311-A1 (1995)

MINOR PLANETS

Collision and Tidal Interaction between Planetesimals. *Sei-ichiro Watanabe & Shoken M. Miyama.* 391, 318, 89-G11 (1992)

Zodiacal Emission. III. Dust near the Asteroid Belt. *William T. Reach.* 392, 289, 104-E7 (1992)

The Size Distribution of the Earth-approaching Asteroids. *D. L. Rabinowitz.* 407, 412, 74-B7 (1993)

On the Nature of the Polarization Opposition Effect Exhibited by Saturn's Rings. *Michael I. Mishchenko.* 411, 351, 131-F1 (1993)

Restoration of Astronomical Images by Iterative Blind Deconvolution. *Stuart M. Jefferies & Julian C. Christou.* 415, 862, 198-F9 (1993)

MISCELLANEOUS

Centennial Challenge Essay: Quo Vadis, Astronomia? *George W. Collins II.* 449, 399, 218-C1 (1995)

MOLECULAR DATA

Temperature Dependence of Infrared Bands Produced by Polycyclic Aromatic Hydrocarbons. *L. Colangeli, V. Mennella, & E. Bussoletti.* 385, 577, 20-C10 (1992)

Accurate Far-Infrared Rotational Frequencies of Carbon Monoxide. *Thomas D. Varberg & Kenneth M. Evenson.* 385, 763, 22-E8 (1992)

The Rotational Spectrum of the Carbon Chain Radical HCCCO. *A. L. Cooksy, J. K. G. Watson, C. A. Gottlieb, & P. Thaddeus.* 386, L27, 29-D7 (1992)

The Comet-Tail (A–X) System of CO^+: Precise Molecular Constants of Its $X\ ^2\Sigma^+$, $A\ ^2\Pi_i$, and $B\ ^2\Sigma^+$ States. *C. Haridass, C. V. V. Prasad, & S. Paddi Reddy.* 388, 669, 58-E1 (1992)

Thermal Emission Spectra from Polycyclic Aromatic Hydrocarbon Molecules of Astrophysical Interest. *V. Mennella, L. Colangeli, & E. Bussoletti.* 391, L45, 92-D1 (1992)

Submillimeter Spectrum of Low-Temperature Hydrogen: The Pure Translational Band of H_2 and the $R(0)$ Line of HD. *E. H. Wishnow, I. Ozier, & H. P. Gush.* 392, L43, 106-F1 (1992)

Improved Laboratory Rest Frequency Measurements and Pressure Shift and Broadening Parameters for the $J = 2 \leftarrow 1$ and $J = 3 \leftarrow 2$ Rotational Transitions of CO. *S. P. Belov, M. Yu. Tretyakov, & R. D. Suenram.* 393, 848, 126-D9 (1992)

Contribution of Polycyclic Aromatic Hydrocarbon Molecules to the Interstellar Extinction Curve. *C. Joblin, A. Léger, & P. Martin.* 393, L79, 127-F1 (1992)

Polycyclic Aromatic Hydrocarbons and Molecular Equilibria in Carbon-rich Stars. *Isabelle Cherchneff & John R. Barker.* 394, 703, 138-C4 (1992)

The Ultraviolet and Visible Spectrum of the Polycyclic Aromatic Hydrocarbon $C_{10}H_8^+$: Possible Contributions to the Diffuse Interstellar Bands and to the Ultraviolet–Visible Extinction. *F. Salama & L. J. Allamandola.* 395, 301, 143-G9 (1992)

High-Resolution Photoabsorption Cross Sections of $E^1\Pi$–$X^1\Sigma^+$ Vibrational Bands of ^{12}CO and ^{13}CO. *G. Stark, P. L. Smith, K. Ito, & K. Yoshino.* 395, 705, 152-B5 (1992)

Radiative Lifetimes of the CN ($A^2\Pi_i$) Electronic State. *Richang Lu, Yuhui Huang, & Joshua B. Halpern.* 395, 710, 152-C1 (1992)

Raman and Infrared Spectra of Polycyclic Aromatic Hydrocarbon Molecules of Possible Astrophysical Interest. *L. Colangeli, V. Mennella, G. A. Baratta, E. Bussoletti, & G. Strazzulla.* 396, 369, 159-F5 (1992)

An Extension of the High-Resolution Millimeter- and Submillimeter-Wave Spectrum of Methanol to High Angular Momentum Quantum Numbers.

Todd Anderson, Eric Herbst, & Frank C. De Lucia. 82, 405, 55-A9 (1992)

Laboratory Measurement of the Rotational Spectrum of HCCS. *J. M. Vrtilek, C. A. Gottlieb, E. W. Gottlieb, W. Wang, & P. Thaddeus.* 398, L73, 188-C7 (1992)

Theoretical Vibration-Rotation Spectrum of Si_2C. *W. Gabriel, G. Chambaud, P. Rosmus, A. Spielfiedel, & N. Feautrier.* 398, 706, 192-G7 (1992)

Microwave Spectra and Electric Dipole Moments for Low-J Levels of Interstellar Radicals: SO, C_2S, C_3S, c-HC_3, CH_2CC, and c-C_3H_2. *F. J. Lovas, R. D. Suenram, T. Ogata, & S. Yamamoto.* 399, 325, 199-D7 (1992)

Laboratory Measurement of the Millimeter and Submillimeter Wave Spectrum of $C_2H_3^+$. *M. Bogey, M. Cordonnier, C. Demuynck, & J. L. Destombes.* 399, L103, 201-E3 (1992)

Far-Infrared Spectral Studies of Phase Changes in Water Ice Induced by Proton Irradiation. *Mala H. Moore & Reggie L. Hudson.* 401, 353, 225-D5 (1992)

The Millimeter-Wave Spectrum of the MgH and MgD Radicals. *L. M. Ziurys, W. L. Barclay, Jr., & M. A. Anderson.* 402, L21, 6-D8 (1993)

Laboratory Detection of HNCCC and DNCCC by Pulsed Discharge Nozzle Fourier-Transform Microwave Spectroscopy. *Yasuhiro Hirahara, Yasuhiro Ohshima, & Yasuki Endo.* 403, L83, 27-F1 (1993)

Laboratory Spectroscopy of MgNC: The First Radioastronomical Identification of Mg-bearing Molecule. *Kentarou Kawaguchi, Eriko Kagi, Tsuneo Hirano, Shuro Takano, & Shuji Saito.* 406, L39, 61-B1 (1993)

Improved Collisional Excitation Rates for Interstellar Water. *Sheldon Green, Sergio Maluendes, & A. D. McLean.* 85, 181, 8-E9 (1993)

Rotational Spectra of the $X\ ^2\Sigma^+$ States of CaH and CaD. *C. I. Frum, J. J. Oh, E. A. Cohen, & H. M. Pickett.* 408, L61, 89-F1 (1993)

The Millimeter-Wave Spectrum of CaH ($X\ ^2\Sigma^+$). *W. L. Barclay, Jr., M. A. Anderson, & L. M. Ziurys.* 408, L65, 89-F8 (1993)

Laboratory Detection of a New Free Radical C_4S ($^3\Sigma^-$). *Yasuhiro Hirahara, Yasuhiro Ohshima, & Yasuki Endo.* 408, L113, 95-F13 (1993)

On the Carrier of the Band at 700 Nanometers in the Iron Hydride Spectrum. *John G. Phillips & Sumner P. Davis.* 409, 860, 109-G9 (1993)

Laboratory Detection of C_5S by Pulsed–Discharge-Nozzle Fourier Transform Microwave Spectroscopy. *Yasuko Kasai, Kinichi Obi, Yasuhiro Ohshima, Yasuhiro Hirahara, Yasuki Endo, Kentarou Kawaguchi, & Akinori Murakami.* 410, L45, 118-D11 (1993)

Laboratory Measurements of the Millimeter-Wave Spectra of Calcium Isocyanide. *Timothy C. Steimle, Shuji Saito, & Shuro Takano.* 410, L49, 118-C2 (1993)

Laboratory Submillimeter-Wave Observation of the $N = 1$–0 Transition of the ND($^3\Sigma^-$) Radical. *Shuji Saito & Masahiro Goto.* 410, L53, 118-C7 (1993)

High-Resolution Absorption Cross Section Measurements of Carbon Monoxide at 20 K between 96.7 and 98.8 Nanometers. *G. Stark, K. Yoshino, P. L. Smith, J. R. Esmond, K. Ito, & M. H. Stevens.* 410, 837, 124-B8 (1993)

Laboratory Spectra of Polycyclic Aromatic Hydrocarbon Ions and the Interstellar Extinction Curve. *Wei Lee & Thomas J. Wdowiak.* 410, L127, 126-E5 (1993)

Mid- and Far-Infrared Spectroscopy of Ices: Optical Constants and Integrated Absorbances. *D. M. Hudgins, S. A. Sandford, L. J. Allamandola, & A. G. G. M. Tielens.* 86, 713, 23-E13 (1993)

The Meinel System ($A^2\Pi_i$–$X^2\Sigma^+$) of $^{14}N_2^+$, $^{14}N^{15}N^+$, and $^{15}N_2^+$. *A. Bernard, M. Larzilliere, C. Effantin, & A. J. Ross.* 413, 829, 166-F7 (1993)

Infrared Frequencies and Intensities for Astrophysically Important Polycyclic Aromatic Hydrocarbon Cations. *Jan Szczepanski & Martin Vala.* 414, 646, 179-C4 (1993)

Rotational Frequencies of Transition Metal Hydrides for Astrophysical Searches in the Far-Infrared. *John M. Brown, Stuart P. Beaton, & Kenneth M. Evenson.* 414, L125, 186-C6 (1993)

The Millimeter-Wave Spectrum of AlOH. *A. J. Apponi, W. L. Barclay, Jr., & L. M. Ziurys.* 414, L129, 186-C11 (1993)

Detection of Interstellar $^{12}C^{15}N$. *A. H. Saleck, R. Simon, N. Schneider, & G. Winnewisser.* 414, L133, 186-D3 (1993)

Calculated Rotational Constants of Interstellar Species: Hydrogenated Derivatives of HCN and HC_3N. *A. Arnau, E. Silla, & I. Tuñon.* 88, 595, 48-A11 (1993)

New Observations of the Optical Spectrum of SiO^+ and the Prediction of Its Rotational Spectrum. *L. Zhang, R. Cameron, R. A. Holt, T. J. Scholl, & S. D. Rosner.* 418, 307, 234-G5 (1993)

A High-Resolution ^{13}C Isotope Study in the Vacuum Ultraviolet of Spectra of CO($A \rightarrow X$), C I, and C II. *C. Haridass & K. P. Huber.* 420, 433, 6-C1 (1994)

Detection of a New Molecular Ion HC_3NH^+ in TMC-1. *Kentarou Kawaguchi, Yasuko Kasai, Shin-ichi Ishikawa, Masatoshi Ohishi, Norio Kaifu, & Takayoshi Amano.* 420, L95, 15-F12 (1994)

Interstellar Carbon Chemistry: Reaction Rates of Neutral Atomic Carbon with Organic Molecules. *D. C. Clary, N. Haider, D. Husain, & M. Kabir.* 422, 416, 35-C6 (1994)

The Millimeter-Wave Spectrum of the CaF Radical ($X\ ^2\Sigma^+$). *M. A. Anderson, M. D. Allen, & L. M. Ziurys.* 424, 503, 68-A13 (1994)

Laboratory Measurements of Rotational Transitions of Lithium Hydride in the Far-Infrared. *M. Bellini, P. de Natale, M. Inguscio, E. Fink, D. Galli, & F. Palla.* 424, 507, 68-B4 (1994)

Calculation of $^{12}C^{16}O$ and $^{13}C^{16}O$ $X\ ^1\Sigma^+$ Rovibrational Intensities for $v \leq 20$ and $J \leq 150$. *D. Goorvitch & C. Chackerian, Jr.* 91, 483, 25-B1 (1994)

On the Carrier of the Band at 700 Nanometers in the Iron Hydride Spectrum of Phillips and Davis: Evidence Favoring Calcium Hydride. *Walter J. Balfour & Lennart Klynning.* 424, 1049, 78-A1 (1994)

Millimeter and Submillimeter Rest Frequencies for the MgF Radical. *M. A. Anderson, M. D. Allen, & L. M. Ziurys.* 425, L53, 85-G9 (1994)

The Influence of H_2O Line Blanketing on the Spectra of Cool Dwarf Stars. *F. Allard, P. H. Hauschildt, S. Miller, & J. Tennyson.* 426, L39, 103-E7 (1994)

Fourier Transform Spectroscopy of the Swan ($d\ ^3\Pi_g$–$a\ ^3\Pi_u$) System of the Jet-cooled C_2 Molecule. *C. V. V. Prasad & P. F. Bernath.* 426, 812, 108-E9 (1994)

Accurate Determination of Predissociation Rates and Transition Frequencies for Carbon Monoxide. *W. Ubachs, K. S. E. Eikema, P. F. Levelt, W. Hogervorst, M. Drabbels, W. L. Meerts, & J. J. ter Meulen.* 427, L55, 117-G10 (1994)

Rovibrational Intensities of the Minor Isotopes of the CO $X\ ^1\Sigma^+$ State for $v \leq 20$ and $J \leq 150$. *D. Goorvitch & C. Chackerian, Jr.* 92, 311, 35-C1 (1994)

Discovery of $^{14}NH_3(3, 3)$ Maser Emission in the Interstellar Medium. *Jeffrey G. Mangum & Alwyn Wootten.* 428, L33, 134-E8 (1994)

Line Strength and Self-broadening Coefficient of the Pure Rotational $S(1)$ Quadrupole Line in H_2. *Dennis C. Reuter & J. Marcos Sirota.* 428, L77, 143-A1 (1994)

The Millimeter and Submillimeter Rotational Spectrum of the MgCN Radical ($X\ ^2\Sigma^+$). *M. A. Anderson, T. C. Steimle, & L. M. Ziurys.* 429, L41, 150-F1 (1994)

Electric Dipole Moment of C_3S. *R. D. Suenram & F. J. Lovas.* 429, L89, 158-D7 (1994)

Continuous Absorption by He_2^+ and H_2^+ in Cool White Dwarfs. *P. C. Stancil.* 430, 360, 163-F3 (1994)

A Millimeter-Wave Study and Astronomical Search for the HCCCS Radical. *M. C. McCarthy, J. M. Vrtilek, E. W. Gottlieb, F.-M. Tao, C. A. Gottlieb, & P. Thaddeus.* 431, L127, 192-B13 (1994)

High-Resolution Oscillator Strength Measurements for the $A(v')$–$X(0)$ Bands of Carbon Monoxide with $11 \leq v' \leq 14$. *Peter L. Smith, G. Stark, K. Yoshino, & K. Ito.* 431, L143, 192-D11 (1994)

Highly Unsaturated Hydrocarbons as Potential Carriers of Some Diffuse Interstellar Bands. *P. Freivogel, J. Fulara, & J. P. Maier.* 431, L151, 192-E7 (1994)

The Submillimeter-Wave Spectrum of Propionitrile (C_2H_5CN). *J. C. Pearson, K. V. L. N. Sastry, Eric Herbst, & F. C. De Lucia.* 93, 589, 51-A6 (1994)

Excitation of Interstellar Hydrogen Chloride. *David A. Neufeld & Sheldon Green.* 432, 158, 195-B11 (1994)

The C_4H Radical and the Diffuse Interstellar Bands: An Ab Initio Study. *M. Kolbuszewski.* 432, L63, 200-A13 (1994)

Intersystem Transitions of Interstellar Carbon Monoxide toward ζ Ophiuchi. *S. R. Federman, Jason A. Cardelli, Yaron Sheffer, David L. Lambert, & D. C. Morton.* 432, L139, 207-D5 (1994)

Theoretical Oscillator Strengths for Infrared Electronic Transitions of Si_2 and SiC. *Fouad L. Sefyani & Joël Schamps.* 434, 816, 239-B11 (1994)

Interstellar CN Rotational Spectra: $^{12}C^{15}N$. *A. H. Saleck, R. Simon, & G. Winnewisser.* 436, 176, 263-E11 (1994)

Ab Initio Rotational Constants of the Nitriles Derived from Cyanodiacetylene (HC_4CN). *Raúl Moreno, Estanislao Silla, Iñaki Tuñon, & Arturo Arnau.* 437, 532, 290-D9 (1994)

Homologous Series of Diffuse Interstellar Bands. *James K. G. Watson.* 437, 678, 295-B1 (1994)

Low-Temperature Rosseland Opacities. *D. R. Alexander & J. W. Ferguson.* 437, 879, 297-F8 (1994)

Infrared CO Line List for the $X\ ^1\Sigma^+$ State. *D. Goorvitch.* 95, 535, 71-F1 (1994)

Precise Laboratory Measurements of Methanol Rotational Transition Frequencies in the 5 to 13 GHz Region. *S. M. Breckenridge & S. G. Kukolich.* 438, 504, 8-E11 (1995)

High-Resolution Absorption Cross Section Measurements of Supersonic Jet-cooled Carbon Monoxide between 92.5 and 97.4 Nanometers. *K. Yoshino, G. Stark, J. R. Esmond, P. L. Smith, K. Ito, & T. Matsui.* 438, 1013, 18-A13 (1995)

Laboratory Detection and Millimeter Spectrum of the MgCCH Radical. *M. A. Anderson & L. M. Ziurys.* 439, L25, 30-B5 (1995)

Theoretical Determination of the Electronic Ground State of the MgC Molecule. *Clarissa O. da Silva, Edilson C. da Silva, & Marco Antonio Chaer Nascimento.* 439, 1044, 39-B3 (1995)

Rototranslational Collision-induced Absorption by H_2–H_2 Pairs at Temperatures from 600 to 7000 K. *Chunguang Zheng & Aleksandra Borysow.* 441, 960, 75-B6 (1995)

Laboratory Measurement of Rotational Spectrum of the ^{18}OH Radical Using a Tunable Far-Infrared Spectrometer. *Isamu Morino, Hitoshi Odashima, Fusakazu Matsushima, Shozo Tsunekawa, & Kojiro Takagi.* 442, 907, 92-F3 (1995)

The Millimeter/Submillimeter Rotational Spectrum of CaCCH($X\ ^2\Sigma^+$). *M. A. Anderson & L. M. Ziurys.* 444, L57, 122-B1 (1995)

Model Atmospheres for M (Sub)Dwarf Stars. I. The Base Model Grid. *France Allard & Peter H. Hauschildt.* 445, 433, 138-E2 (1995)

Laboratory Millimeter-Wave Spectrum of Chromium Monochloride. *Tomoko Oike, Toshiaki Okabayashi, & Mitsutoshi Tanimoto.* 445, L67, 141-D1 (1995)

Microwave Spectrum of the NS Radical in the $^2\Pi_r$ Ground Electronic State. *Sang K. Lee, Hiroyuki Ozeki, & Shuji Saito.* 98, 351, 26-F5 (1995)

Assignment of Omitted Ultraviolet Systems of Zirconium Oxide. *M. Afaf.* 447, 980, 189-D2 (1995)

Microwave Spectra of the Isotopomers of HCS^+ and Its Substitution Structure. *Jian Tang & Shuji Saito.* 451, L93, 261-C7 (1995)

Laboratory Submillimeter-Wave Spectroscopy of the CH_2 ($^3B_1$) Radical. *Hiroyuki Ozeki & Shuji Saito.* 451, L97, 261-C13 (1995)

Electron Excitation Function of the N_2 Second Positive System. *D. E. Shemansky, J. M. Ajello, & I. Kanik.* 452, 472, 268-F1 (1995)

Fine-Structure Branching in N_2 $c_4'\ ^1\Sigma_u^+$ (0). *D. E. Shemansky, I. Kanik, & J. M. Ajello.* 452, 480, 268-F13 (1995)

Laboratory Measurement of the $J = 1$–0 Transition of AlH near 387 GHz. *Masahiro Goto & Shuji Saito.* 452, L147, 280-F1 (1995)

The Millimeter/Submillimeter Spectrum and Rotational Rest Frequencies of $MgCH_3$($\tilde{X}\ ^2A_1$). *M. A. Anderson & L. M. Ziurys.* 452, L157, 280-G7 (1995)

Infrared Absorption and Emission Spectra of SiO. *J. M. Campbell, D. Klapstein, M. Dulick, P. F. Bernath, & L. Wallace.* 101, 237, 55-G10 (1995)

A High-Temperature Partition Function for H_3^+. *Liesl Neale & Jonathan Tennyson.* 454, L169, 317-B3 (1995)

High-Density Amorphous Ice, the Frost on Interstellar Grains. *P. Jenniskens, D. F. Blake, M. A. Wilson, & A. Pohorille.* 455, 389, 323-D10 (1995)

Radio-astronomical Spectroscopy of the Hyperfine Structure of N_2H^+. *P. Caselli, P. C. Myers, & P. Thaddeus.* 455, L77, 325-G1 (1995)

Analytic Temperature Dependences for a Complete Set of Rate Coefficients for Collisional Excitation and Dissociation of H_2 Molecules by H Atoms. *P. G. Martin & M. E. Mandy.* 455, L89, 326-A9 (1995)

Microwave Spectra, Hyperfine Structure, and Electric Dipole Moments for Conformers I and II of Glycine. *F. J. Lovas, Y. Kawashima, J.-U. Grabow, R. D. Suenram, G. T. Fraser, & E. Hirota.* 455, L201, 335-B3 (1995)

MOLECULAR PROCESSES

The *In Situ* Formation of Large Molecules in Dense Interstellar Clouds. *Eric Herbst.* 366, 133, 2-F4 (1991)

CO Fundamental Bands in Late-Type Stars. II. Spectrum Simulations for F–K Stars. *Gunter Wiedemann & Thomas R. Ayres.* 366, 277, 4-D9 (1991)

Nitrogen Abundance in Comet Halley. *Susan Wyckoff, Stephen C. Tegler, & Lisa Engel.* 367, 641, 21-C1 (1991)

Search for H_2-He Alloy Formation at Low Pressures and Cosmic Snowballs. *M. Leventhal & A. P. Mills, Jr.* 368, 178, 25-C7 (1991)

Ammonia Abundances in Four Comets. *Susan Wyckoff, Stephen C. Tegler, & Lisa Engel.* 368, 279, 26-E5 (1991)

The Millimeter-Wave Spectrum of Highly Vibrationally Excited SiO. *R. Mollaaghababa, C. A. Gottlieb, J. M. Vrtilek, & P. Thaddeus.* 368, L19, 28-D1 (1991)

New Ultraviolet Spectroscopic Features Found in Comet Brorsen-Metcalf (1989o). *C. R. O'Dell, Christopher O. Miller, Anita L. Cochran, William D. Cochran, Chet B. Opal, & Edwin S. Barker.* 368, 616, 32-G1 (1991)

Astronomical Detection of H_2CCC. *J. Cernicharo, C. A. Gottlieb, M. Guélin, T. C. Killian, G. Paubert, P. Thaddeus, & J. M. Vrtilek.* 368, L39, 35-C7 (1991)

Astronomical Detection of H_2CCCC. *J. Cernicharo, C. A. Gottlieb, M. Guélin, T. C. Killian, P. Thaddeus, & J. M. Vrtilek.* 368, L43, 35-C11 (1991)

The Formation of Oxygen-containing Organic Molecules in the Orion Compact Ridge. *T. J. Millar, Eric Herbst, & S. B. Charnley.* 369, 147, 37-F11 (1991)

Electron Densities and the Excitation of CN in Molecular Clouds. *John H. Black & Ewine F. van Dishoeck.* 369, L9, 40-B5 (1991)

High-Resolution Absorption Cross Sections of Carbon Monoxide Bands at 295 K between 91.7 and 100.4 Nanometers. *G. Stark, K. Yoshino, Peter L. Smith, K. Ito, & W. H. Parkinson.* 369, 574, 44-G13 (1991)

Far-Infrared Fourier Transform Spectroscopy of $^{12}C^{18}O$. *P. De Natale, M. Inguscio, C. Rois Orza, & L. R. Zink.* 370, L53, 53-G5 (1991)

Theoretical Vibrations of Carbon Chains C_3, C_4, C_5, C_6, C_7, C_8, and C_9. *Joe Kurtz & Ludwik Adamowicz.* 370, 784, 58-C5 (1991)

The Ultraviolet Continuum and the Fluorescent H_2 Lines in Low-Excitation Herbig-Haro Objects. *K.-H. Böhm, D. M. Scott, & J. Solf.* 371, 248, 63-C1 (1991)

Cross Sections for Production of H($2p$, $2s$, $1s$) by Electron Collisional Dissociation of H_2. *J. M. Ajello, D. E. Shemansky, & G. K. James.* 371, 422, 65-D5 (1991)

Laboratory Detection of HC_9N Using a Fourier Transform Microwave Spectrometer. *Minoru Iida, Yasuhiro Ohshima, & Yasuki Endo.* 371, L45, 66-F7 (1991)

Molecular Hydrogen Formation by Excited Atom Radiative Association. *William B. Latter & John H. Black.* 372, 161, 76-A4 (1991)

Detection of Low-J Pure-Rotational Emission from H_2 in the Orion Bar Region: Evidence for Small-Scale Clumpiness. *Parvinder S. Parmar, John H. Lacy, & Jeffrey M. Achtermann.* 372, L25, 79-D1 (1991)

The Gas-Phase Chemistry of Organic Molecules in Interstellar Clouds with Dynamical Mixing. *J.-P. Chièze, G. Pineau des Forêts, & Eric Herbst.* 373, 110, 87-D4 (1991)

The Formation of Molecules in Protostellar Winds. *A. E. Glassgold, G. A. Mamon, & P. J. Huggins.* 373, 254, 89-B7 (1991)

Synthetic Profile Analysis of the Observed (0,0) Swan Band of Comet Halley. *K. S. Krishna Swamy.* 373, 266, 89-C7 (1991)

The SiH Vibrational Stretch as an Indicator of the Chemical State of Interstellar Grains. *Marla H. Moore, Toshihiko Tanabé, & Joseph A. Nuth.* 373, L31, 91-D7 (1991)

Calculations Concerning the Reaction $C + H_3^+ \rightarrow CH^+ + H_2$. *D. Talbi, D. J. DeFrees, D. A. Egolf, & Eric Herbst.* 374, 390, 103-A1 (1991)

Infrared Fluorescence of H_2 in NGC 6240: A Starburst Origin for the H_2 Luminosity. *Masuo Tanaka, Tetsuo Hasegawa, & Ian Gatley.* 374, 516, 105-E9 (1991)

A Molecular Line Survey of Sagittarius B2 and Orion–KL from 70 to 115 GHz. II. Analysis of the Data. *B. E. Turner.* 76, 617, 33-D1 (1991)

Formaldehyde in Envelopes of Interstellar Dark Clouds. *S. R. Federman & M. Allen.* 375, 157, 113-A1 (1991)

Probing Shock Models of CH^+ Formation. *Isabel Hawkins & Nahide Craig.* 375, 642, 120-F1 (1991)

Association of CH_3^+ and H_2: Conflicting Results. *David R. Bates.* 375, 833, 123-A5 (1991)

Theoretical Study of the Spectroscopy of FeH^+. *Stephen R. Langhoff & Charles W. Bauschlicher, Jr.* 375, 843, 123-B1 (1991)

Collisional Excitation of Formaldehyde in "Hot" Interstellar Molecular Regions. *Sheldon Green.* 76, 979, 38-E3 (1991)

Can Phase Space Theory Reproduce Experimental Neutral Product Branching Ratios for Dissociative Recombination Reactions? *E. T. Galloway & Eric Herbst.* 376, 531, 133-A8 (1991)

Observations and Chemistry of Interstellar Refractory Elements. *B. E. Turner.* 376, 573, 133-E1 (1991)

Large Molecule Production by Mass-losing Carbon Stars: The Primary Source of Interstellar Polycyclic Aromatic Hydrocarbons? *William B. Latter.* 377, 187, 140-C5 (1991)

Partially Dissociative Jump Shocks in Molecular Hydrogen. *C. A. Chang & P. G. Martin.* 378, 202, 153-E1 (1991)

Pumping the Interstellar (6,3) Ammonia Maser. *Ronald D. Brown & Dinah M. Cragg.* 378, 445, 156-D10 (1991)

Sulfur-bearing Ions in the Ionosphere of Comet Halley. *M. L. Marconi, D. A. Mendis, D. L. Mitchell, R. P. Lin, A. Korth, & H. Réme.* 378, 756, 161-F7 (1991)

SiS in Outflow Regions: More High-Temperature Silicon Chemistry. *L. M. Ziurys.* 379, 260, 166-C7 (1991)

Millimeter- and Submillimeter-Wave Spectrum of Highly Excited States of Water. *J. C. Pearson, Todd Anderson, Eric Herbst, Frank C. De Lucia, & Paul Helminger.* 379, L41, 169-D12 (1991)

Observations of Solar Wind Ion Charge Exchange in the Comet Halley Coma. *S. A. Fuselier, E. G. Shelley, B. E. Goldstein, R. Goldstein, M. Neugebauer, W.-H. Ip, H. Balsiger, & H. Rème.* 379, 734, 173-G8 (1991)

Interstellar Photodissociation and Photoionization Rates. *W. G. Roberge, D. Jones, S. Lepp, & A. Dalgarno.* 77, 287, 48-B1 (1991)

A Table of Astronomically Important Ro-vibrational Transitions for the H_3^+ Molecular Ion. *Lancelot Kao, Takeshi Oka, Steven Miller, & Jonathan Tennyson.* 77, 317, 48-E1 (1991)

Molecules and Chains in a Strong Magnetic Field: Statistical Treatment. *Andrew M. Abrahams & Stuart L. Shapiro.* 382, 233, 203-B5 (1991)

Laboratory Infrared Spectra of CH_2D^+ and $HCCD^+$ and Predicted Microwave Transitions. *Matthias Rösslein, Mary-Frances Jagod, Charles M. Gabrys, & Takeshi Oka.* 382, L51, 205-F1 (1991)

The Formation and Role of Water Dimers in a Cometary Atmosphere, with Application to Comet P/Halley. *J. F. Crifo & Z. Slanina.* 383, 351, 216-F1 (1991)

Comet P/Halley: Spatial Distributions and Scale Lengths for C_2, CN, NH_2, and H_2O. *Uwe Fink, Michael R. Combi, & Michael A. DiSanti.* 383, 356, 216-F9 (1991)

New Photoionization Models of Intergalactic Clouds. *Megan Donahue & J. Michael Shull.* 383, 511, 220-F1 (1991)

NH_3 and NH_2 in the Coma of Comet Brorsen-Metcalf. *Stephen C. Tegler, Luke F. Burke, Susan Wyckoff, Maria Womack, Uwe Fink, & Michael DiSanti.* 384, 292, 4-E6 (1992)

Structure, Chemistry, and Clumping in the NGC 2071 (North) Molecular Cloud. *Paul F. Goldsmith, Michael Margulis, Ronald L. Snell, & Y. Fukui.* 385, 522, 19-F3 (1992)

Accurate Far-Infrared Rotational Frequencies of Carbon Monoxide. *Thomas D. Varberg & Kenneth M. Evenson.* 385, 763, 22-E8 (1992)

An Extended Search for Extragalactic O_2. *H. S. Liszt.* 386, 139, 25-G9 (1992)

The Contribution of Methanol to the 3.4 Micron Emission Feature in Comets. *Dennis C. Reuter.* 386, 330, 28-C11 (1992)

The Rotational Spectrum of the Carbon Chain Radical HCCCO. *A. L. Cooksy, J. K. G. Watson, C. A. Gottlieb, & P. Thaddeus.* 386, L27, 29-D7 (1992)

Radiative Shocks and Hydrogen Molecules in Pregalactic Gas: The Effects of Postshock Radiation. *Hyesung Kang & Paul R. Shapiro.* 386, 432, 30-F13 (1992)

The Effect of Electron Collisions on Rotational Populations of Cometary Water. *Xingfa Xie & Michael J. Mumma.* 386, 720, 34-C4 (1992)

A Survey of N_2H^+ in Dense Clouds: Implications for Interstellar Nitrogen and Ion-Molecule Chemistry. *M. Womack, L. M. Ziurys, & S. Wyckoff.* 387, 417, 42-B6 (1992)

Detection of SiN in IRC +10216. *B. E. Turner.* 388, L35, 52-D1 (1992)

Near-Ultraviolet Spectroscopy of Comet Austin (1989c1). *Jacobus H. Valk, C. R. O'Dell, Anita L. Cochran, William D. Cochran, Chet B. Opal, & Edwin S. Barker.* 388, 621, 58-A1 (1992)

Orion B (NGC 2024). III. BIMA SO $J_K = 2_2 \rightarrow 1_1$ Observations: Evidence for Peculiar Sulfur Chemistry. *Peter J. Barnes & Richard M. Crutcher.* 389, 325, 64-A5 (1992)

Near-Infrared Observations of the Proto–Planetary Nebula AFGL 618. *William B. Latter, Philip R. Maloney, Douglas M. Kelly, John H. Black, G. H. Rieke, & M. J. Rieke.* 389, 347, 64-C3 (1992)

Formaldehyde Reactions in Dark Clouds. *A. D. Sen, V. G. Anicich, & S. R. Federman.* 391, 141, 87-F10 (1992)

Cometary Gas-Phase Chemistry Taking into Account Homogeneous and Ion-induced Water Recondensation. *J. F. Crifo.* 391, 336, 90-B1 (1992)

The Molecular-Metallic Transition of Hydrogen and the Structure of Jupiter and Saturn. *Gilles Chabrier, Didier Saumon, William B. Hubbard, & Jonathan I. Lunine.* 391, 817, 98-B1 (1992)

The Role of the Molecular-metallic Transition of Hydrogen in the Evolution of Jupiter, Saturn, and Brown Dwarfs. *Didier Saumon, William B. Hubbard, Gilles Chabrier, & Hugh M. Van Horn.* 391, 827, 98-B13 (1992)

Electron Energy Loss Spectra of Polycyclic Aromatic Hydrocarbons. *John W. Keller, M. A. Coplan, & R. Goruganthu.* 391, 872, 98-G1 (1992)

A Survey of CCS, HC_3N, HC_5N, and NH_3 toward Dark Cloud Cores and Their Production Chemistry. *Hiroko Suzuki, Satoshi Yamamoto, Masatoshi Ohishi, Norio Kaifu, Shin-ichi Ishikawa, Yasuhiro Hirahara, & Shuro Takano.* 392, 551, 109-B4 (1992)

Estimates of N_2 Abundances in Dense Molecular Clouds. *M. Womack, L. M. Ziurys, & S. Wyckoff.* 393, 188, 116-D6 (1992)

Problems with the Standard Theory of Three-dimensional Masers. *David A. Neufeld.* 393, L37, 120-F1 (1992)

SO and SO_2 in Mass-Loss Envelopes of Red Giants: Probes of Nonequilibrium Circumstellar Chemistry and Mass-Loss Rates. *Raghvendra Sahai & Peter G. Wannier.* 394, 320, 132-A3 (1992)

Mapping Observations of Sulfur-containing Carbon-Chain Molecules in Taurus Molecular Cloud 1 (TMC-1). *Yasuhiro Hirahara, Hiroko Suzuki, Satoshi Yamamoto, Kentarou Kawaguchi, Norio Kaifu, Masatoshi Ohishi, Shuro Takano, Shin-ichi Ishikawa, & Akimasa Masuda.* 394, 539, 136-B1 (1992)

Polycyclic Aromatic Hydrocarbons and Molecular Equilibria in Carbon-rich Stars. *Isabelle Cherchneff & John R. Barker.* 394, 703, 138-C4 (1992)

Protonated Acetylene: An Important Circumstellar and Interstellar Ion. *A. E. Glassgold, A. Omont, & M. Guélin.* 396, 115, 156-E5 (1992)

Extremely High Velocity CO Emission from NGC 2071. *Lawrence M. Chernin & Colin R. Masson.* 396, L35, 160-F8 (1992)

Carbon Monoxide in SN 1987A. *Weihong Liu, A. Dalgarno, & S. Lepp.* 396, 679, 165-G1 (1992)

Simultaneous Visible and Near-Infrared Spectrophotometry of Comet Austin $1989c_1$. *Stephen C. Tegler, Humberto Campins, Stephen Larson, Marvin Kleine, Douglas Kelly, & Marcia Rieke.* 396, 711, 166-B9 (1992)

Detection of Interstellar SO^+: A Diagnostic of Dissociative Shock Chemistry. *B. E. Turner.* 396, L107, 167-F1 (1992)

Models of Gas-Grain Chemistry in Dense Interstellar Clouds with Complex Organic Molecules. *Tatsuhiko I. Hasegawa, Eric Herbst, & Chun Ming Leung.* 82, 167, 51-D13 (1992)

An Extension of the High-Resolution Millimeter- and Submillimeter-Wave Spectrum of Methanol to High Angular Momentum Quantum Numbers. *Todd Anderson, Eric Herbst, & Frank C. De Lucia.* 82, 405, 55-A9 (1992)

Calculations of Ion-Molecule Deuterium Fractionation Reactions Involving HD. *Sergio A. Maluendes, A. D. McLean, & Eric Herbst.* 397, 477, 176-F10 (1992)

Comet Outbursts and Polymers of HCN. *Terrence W. Rettig, Stephen C. Tegler, Daniel J. Pasto, & Michael J. Mumma.* 398, 293, 185-D5 (1992)

Laboratory Measurement of the Rotational Spectrum of HCCS. *J. M. Vrtilek, C. A. Gottlieb, E. W. Gottlieb, W. Wang, & P. Thaddeus.* 398, L73, 188-C7 (1992)

Theoretical Vibration-Rotation Spectrum of Si_2C. *W. Gabriel, G. Chambaud, P. Rosmus, A. Spielfiedel, & N. Feautrier.* 398, 706, 192-G7 (1992)

Tests of Shock Chemistry in IC 443G. *B. E. Turner, Kin-Wing Chan, S. Green, & D. A. Lubowich.* 399, 114, 196-E12 (1992)

On the Molecular Complexity of the Hot Cores in Orion A: Grain Surface Chemistry as "The Last Refuge of the Scoundrel." *S. B. Charnley, A. G. G. M. Tielens, & T. J. Millar.* 399, L71, 201-A8 (1992)

Interstellar H_3O^+ and Its Relation to the O_2 and H_2O Abundances. *T. G. Phillips, Ewine F. van Dishoeck, & Jocelyn Keene.* 399, 533, 204-E1 (1992)

Mid-Infrared Rotational Line Emission from Interstellar Molecular Hydrogen. *Michael G. Burton, D. J. Hollenbach, & A. G. G. M. Tielens.* 399, 563, 204-G7 (1992)

Modeling SiO Maser Emission from Late-Type Stars. *Philip Lockett & Moshe Elitzur.* 399, 704, 206-F9 (1992)

Polycyclic Aromatic Hydrocarbon Formation in Carbon-rich Stellar Envelopes. *Isabelle Cherchneff, John R. Barker, & Alexander G. G. M. Tielens.* 401, 269, 224-D1 (1992)

Observational Constraints on Solar Nebula Nitrogen Chemistry: N_2/NH_3. *Maria Womack, Susan Wyckoff, & L. M. Ziurys.* 401, 728, 231-E6 (1992)

CO (J = 1–0) Line Emission from Giant Molecular Clouds. *Mark G. Wolfire, David Hollenbach, & A. G. G. M. Tielens.* 402, 195, 3-E1 (1993)

Molecular Line Emission from Circumstellar Disks. *Steven V. W. Beckwith & Anneila I. Sargent.* 402, 280, 4-E9 (1993)

Line-resolved Spectroscopy of the Jovian H_3^+ Auroral Emission at 3.5 Micrometers. *Pierre Drossart, Jean-Pierre Maillard, John Caldwell, & Jan Rosenqvist.* 402, L25, 6-E1 (1993)

Observations of SO and SiO in the Outflow from NGC 2071. *Lawrence Chernin & Colin Masson.* 403, L21, 20-C6 (1993)

Laboratory Detection of HNCCC and DNCCC by Pulsed Discharge Nozzle Fourier-Transform Microwave Spectroscopy. *Yasuhiro Hirahara, Yasuhiro Ohshima, & Yasuki Endo.* 403, L83, 27-F1 (1993)

The Abundance of Ammonia in Comet P/Halley Derived from Ultraviolet Spectrophotometry of NH by *ASTRON* and *IUE*. *P. D. Feldman, K. B. Fournier, V. P. Grinin, & A. M. Zvereva.* 404, 348, 32-B11 (1993)

Transition Rates for ZrO from a Laboratory Absorption Spectrum. *J. E. Littleton, Sumner P. Davis, & Mei Song.* 404, 412, 33-A1 (1993)

Far-Infrared Investigations of a Methanol Clathrate Hydrate: Implications for Astronomical Observations. *Reggie L. Hudson & Marla H. Moore.* 404, L29, 33-G1 (1993)

A Survey of Bimolecular Ion-Molecule Reactions for Use in Modeling the Chemistry of Planetary Atmospheres, Cometary Comae, and Interstellar Clouds: 1993 Supplement. *V. G. Anicich.* 84, 215, 4-C11 (1993)

On the Nature of the Molecular Cores in High-Latitude Cirrus Clouds. III. ^{13}CO Observations and Tests of CO Chemistry Models. *B. E. Turner.* 405, 229, 44-A3 (1993)

Structure and Chemistry of Orion S. *Joseph P. McMullin, Lee G. Mundy, & Geoffrey A. Blake.* 405, 599, 50-E5 (1993)

Rate Coefficients for Momentum Transfer, Charge Transfer, and Radiative Association Processes in Collisions of H^+ with He below 10^5 K. *M. Kimura, N. F. Lane, A. Dalgarno, & R. G. Dixson.* 405, 801, 53-A11 (1993)

Improved Collisional Excitation Rates for Interstellar Water. *Sheldon Green, Sergio Maluendes, & A. D. McLean.* 85, 181, 8-E9 (1993)

Interstellar Deuterium in Cold Dense Clouds. *Michael Opendak.* 406, 548, 64-E12 (1993)

The Ultraviolet Spectrum of Annealed Hydrogenated Amorphous Carbon Grains. *A. Blanco, E. Bussoletti, L. Colangeli, S. Fonti, V. Mennella, & J. R. Stephens.* 406, 739, 67-B12 (1993)

Warm Neutral Halos around Molecular Clouds. V. OH (1665 and 1667 MHz) Observations. *Peter G. Wannier, B-G Andersson, S. R. Federman, B. M. Lewis, Y. P. Viala, & E. Shaya.* 407, 163, 71-B1 (1993)

Ion Abundances and Implications for Photochemistry in Comets Halley (1986 III) and Bradfield (1987 XXIX). *Barry L. Lutz, Maria Womack, & R. Mark Wagner.* 407, 402, 74-A9 (1993)

The Abundance Distribution of C_4H in IRC +10216. *Aditya Dayal & John H. Bieging.* 407, L37, 75-E1 (1993)

Relaxation of Molecular Velocities and Spectral Line Profiles of Astrophysical Masers. *Nels Anderson & William D. Watson.* 407, 620, 78-C10 (1993)

Electron Excitation of the $H_2a\ ^3\Sigma_g^+ \rightarrow b\ ^3\Sigma_u^+$) Continuum in the Vacuum Ultraviolet. *J. M. Ajello & D. E. Shemansky.* 407, 820, 80-F1 (1993)

Theoretical Infrared Spectra of Some Model Polycyclic Aromatic Hydrocarbons: Effect of Ionization. *D. J. De Frees, M. D. Miller, D. Talbi, F. Pauzat, & Y. Ellinger.* 408, 530, 91-G5 (1993)

Chemical Differentiation between Star-forming Regions: The Orion Hot Core and Compact Ridge. *P. Caselli, T. I. Hasegawa, & Eric Herbst.* 408, 548, 92-A11 (1993)

The OH Distribution in Cometary Atmospheres: A Collisional Monte Carlo Model for Heavy Species. *Michael R. Combi, Brent J. Bos, & William H. Smyth.* 408, 668, 93-E1 (1993)

Detection of H_3^+ Infrared Emission Lines in Saturn. *T. R. Geballe, M.-F. Jagod, & T. Oka.* 408, L109, 95-F7 (1993)

Laboratory Detection of a New Free Radical C_4S ($^3\Sigma^-$). *Yasuhiro Hirahara, Yasuhiro Ohshima, & Yasuki Endo.* 408, L113, 95-F13 (1993)

Collisional Excitation of H_2 Molecules by H Atoms. *M. E. Mandy & P. G. Martin.* 86, 199, 16-E1 (1993)

P/Halley: Effects of Time-dependent Production Rates on Spatial Emission Profiles. *Michael R. Combi & Uwe Fink.* 409, 790, 109-A1 (1993)

H_2 in Interstellar and Extragalactic Ices: Infrared Characteristics, Ultraviolet Production, and Implications. *Scott A. Sandford & Louis J. Allamandola.* 409, L65, 111-F1 (1993)

The Formation of Cyanopolyyne Molecules in IRC +10216. *Isabelle Cherchneff, Alfred E. Glassgold, & Gary A. Mamon.* 410, 188, 114-D12 (1993)

Laboratory Detection of C_5S by Pulsed–Discharge-Nozzle Fourier Transform Microwave Spectroscopy. *Yasuko Kasai, Kinichi Obi, Yasuhiro Ohshima, Yasuhiro Hirahara, Yasuki Endo, Kentarou Kawaguchi, & Akinori Murakami.* 410, L45, 118-D11 (1993)

The H to H_2 Transition in Galaxies: Totally Molecular Galaxies. *B. G. Elmegreen.* 411, 170, 129-C3 (1993)

On the Nature of the Molecular Cores in High-Latitude Cirrus Clouds. V. NH_3 and Its Chemistry. *B. E. Turner.* 411, 219, 129-G13 (1993)

Collisional Excitation of CO by H_2O: An Astrophysicist's Guide to Obtaining Rate Constants from Coherent Anti-Stokes Raman Line Shape Data. *Sheldon Green.* 412, 436, 147-E6 (1993)

A Study of Circumstellar Envelopes around Bright Carbon Stars. II. Molecular Abundances. *H. Olofsson, K. Eriksson, B. Gustafsson, & U. Carlström.* 87, 305, 31-A5 (1993)

Emission of HeH^+ in Nebulae. *C. Cecchi-Pestellini & A. Dalgarno.* 413, 611, 164-B5 (1993)

Pumping of Main Line OH Masers in the Circumstellar Envelopes of Type I Mira Variables. *Alan J. Collison & Gerald E. Nedoluha.* 413, 735, 165-E10 (1993)

Analysis of Hydrogen Hα Observations of the Coma of Comet P/Halley. *William H. Smyth, M. L. Marconi, Frank Scherb, & Fred L. Roesler.* 413, 756, 165-G6 (1993)

Polycyclic Aromatic Hydrocarbons in the Atmospheres of Titan and Jupiter. *Carl Sagan, B. N. Khare, W. R. Thompson, G. D. McDonald, Michael R. Wing, Jeffrey L. Bada, Tuan Vo-Dinh, & E. T. Arakawa.* 414, 399, 175-A3 (1993)

The Radiative Association of He^+ and He and H^+ and H. *P. C. Stancil, J. F. Babb, & A. Dalgarno.* 414, 672, 179-E8 (1993)

Molecular Line Emission Models of Herbig-Haro Objects. II. HCO^+ Emission. *Mark G. Wolfire & Arieh Königl.* 415, 204, 187-E6 (1993)

Theoretical Modeling of the Infrared Fluorescence from Interstellar Polycyclic Aromatic Hydrocarbons. *W. A. Schutte, A. G. G. M. Tielens, & L. J. Allamandola.* 415, 397, 189-G12 (1993)

Polarization of Astronomical Maser Radiation. II. Polarization Modes and Unsaturated Growth. *Moshe Elitzur.* 416, 256, 204-C7 (1993)

Refrigeration of the 18.3 GHz C_3H_2 Transition in Dark Cloud G1.6−0.25. *T. B. H. Kuiper, J. B. Whiteoak, R.-S. Peng, W. L Peters III, & J. E. Reynolds.* 416, L33, 207-E7 (1993)

Discovery of Interstellar Water Lines at 437, 439, and 471 GHz: Strong Case for Water Maser Formation behind C-Type Shocks. *Gary J. Melnick, Karl M. Menten, Thomas G. Phillips, & Todd Hunter.* 416, L37, 207-E13 (1993)

Detection of the Interstellar NH_2 Radical. *Ewine F. van Dishoeck, David J. Jansen, Peter Schilke, & T. G. Phillips.* 416, L83, 216-E10 (1993)

Bistability in Dark Cloud Chemistry. *J. Le Bourlot, G. Pineau des Forêts, E. Roueff, & P. Schilke.* 416, L87, 216-F1 (1993)

Calculations Concerning Interstellar Isomeric Abundance Ratios for C_3H and C_3H_2. *Sergio A. Maluendes, A. D. McLean, & Eric Herbst.* 417, 181, 219-F3 (1993)

Condensation and Vaporization Studies of CH_3OH and NH_3 Ices: Major Implications for Astrochemistry. *Scott A. Sandford & Louis J. Allamandola.* 417, 815, 229-E7 (1993)

Radiative Cooling of Warm Molecular Gas. *David A. Neufeld & Michael J. Kaufman.* 418, 263, 234-C11 (1993)

Formaldehyde as a Probe of Physical Conditions in Dense Molecular Clouds. *Jeffrey G. Mangum & Alwyn Wootten.* 89, 123, 50-E5 (1993)

The Formation of Carbon Chain Molecules in IRC +10216. *Isabelle Cherchneff & Alfred E. Glassgold.* 419, L41, 252-F9 (1993)

Detection of the Carbon Monoxide Ion (CO^+) in the Interstellar Medium and a Planetary Nebula. *William B. Latter, Christopher K. Walker, & Philip R. Maloney.* 419, L97, 259-F14 (1993)

Radio Observations of D I and Fractionation. *Carl Heiles, Peter R. McCullough, & Alfred E. Glassgold.* 89, 271, 53-C11 (1993)

Detection of Water Vapor in T Tauri Stars. *H. Shiba, S. Sato, T. Yamashita, Y. Kobayashi, & H. Takami.* 89, 299, 53-F1 (1993)

Size Effects on Dissociation Rates of Polycyclic Aromatic Hydrocarbon Cations: Laboratory Studies and Astrophysical Implications. *H. W. Jochims, E. Rühl, H. Baumgärtel, S. Tobita, & S. Leach.* 420, 307, 4-F6 (1994)

Observations of 13.5 Micron Rotation-Vibration Lines of SiS in IRC +10216. *R. J. Boyle, J. J. Keady, D. E. Jennings, K. L. Hirsch, & G. R. Wiedemann.* 420, 863, 13-E12 (1994)

The Production of Condensed Phase CO in Quiescent Molecular Clouds. *P. Caselli, T. I. Hasegawa, & Eric Herbst.* 421, 206, 18-E5 (1994)

High-Resolution Images of Shocked Molecular Clumps in the Supernova Remnant IC 443. *Jan A. Tauber, Ronald L. Snell, Robert L. Dickman, & L. M. Ziurys.* 421, 570, 25-C4 (1994)

Detection of CO Cameron Band Emission in Comet P/Hartley 2 (1991 XV) with the *Hubble Space Telescope*. *H. A. Weaver, P. D. Feldman, J. B. McPhate, M. F. A'Hearn, C. Arpigny, & T. E. Smith.* 422, 374, 34-F7 (1994)

Interstellar Carbon Chemistry: Reaction Rates of Neutral Atomic Carbon with Organic Molecules. *D. C. Clary, N. Haider, D. Husain, & M. Kabir.* 422, 416, 35-C6 (1994)

The Trend of Production Rates with Heliocentric Distance for Comet P/Halley. *Uwe Fink.* 423, 461, 51-G12 (1994)

A Molecular Jet from LkHα 234. *George F. Mitchell & Henry E. Matthews.* 423, L55, 53-G8 (1994)

Structure and Chemistry in the Northwestern Condensation of the Serpens Molecular Cloud Core. *Joseph P. McMullin, Lee G. Mundy, Bruce A. Wilking, T. Hezel, & Geoff A. Blake.* 424, 222, 64-F1 (1994)

The Photodissociation of Circumstellar HCN and SiS. *J. Wirsich.* 424, 370, 66-D14 (1994)

A Non-LTE Model for the Jovian Methane Infrared Emissions at High Spectral Resolution. *Rangasayi N. Halthore, J. E. Allen, Jr., & Philip L. DeCola.* 424, L61, 70-A4 (1994)

Chemical Transitions for Interstellar C_2 and CN in Cloud Envelopes. *S. R. Federman, C. J. Strom, D. L. Lambert, Jason A. Cardelli, V. V. Smith, & C. L. Joseph.* 424, 772, 74-D7 (1994)

Dissociative Recombination of H_3^+ Molecular Ions in Hydrogen Plasmas between 20 K and 4000 K. *I. F. Schneider, O. Dulieu, A. Giusti-Suzor, & E. Roueff.* 424, 983, 77-A10 (1994)

Molecules in the Postrecombination Universe and Microwave Background Anisotropies. *Roberto Maoli, Francesco Melchiorri, & Danilo Tosti.* 425, 372, 86-C12 (1994)

A Statistical Equilibrium Analysis of Interstellar CO toward ζ Ophiuchi as Recorded by the Goddard High Resolution Spectrograph. *Cheng-Hsuan Lyu, Andrew M. Smith, & Frederick C. Bruhweiler.* 426, 254, 99-C7 (1994)

Detection of a New Interstellar Molecule, H_2CN. *Masatoshi Ohishi, Douglas McGonagle, William M. Irvine, Satoshi Yamamoto, & Shuji Saito.* 427, L51, 117-G5 (1994)

Rovibrational Intensities of the Minor Isotopes of the CO $X\ ^1\Sigma^+$ State for $v \leq 20$ and $J \leq 150$. *D. Goorvitch & C. Chackerian, Jr.* 92, 311, 35-C1 (1994)

Molecular Hydrogen Emission in Galaxies: Determination of Excitation Mechanism. *Hideaki Mouri.* 427, 777, 122-C12 (1994)

The Photoelectric Heating Mechanism for Very Small Graphitic Grains and Polycyclic Aromatic Hydrocarbons. *E. L. O. Bakes & A. G. G. M. Tielens.* 427, 822, 122-G8 (1994)

Rotational Excitation of H_2 in Collision with H. *Y. Sun & A. Dalgarno.* 427, 1053, 125-F9 (1994)

Discovery of $^{14}NH_3(3, 3)$ Maser Emission in the Interstellar Medium. *Jeffrey G. Mangum & Alwyn Wootten.* 428, L33, 134-E8 (1994)

Silicon Monoxide in SN 1987A. *Weihong Liu & A. Dalgarno.* 428, 769, 139-G5 (1994)

Induced Nucleation of Carbon Dust in Red Giant Stars. *Brian J. Cadwell, Hai Wang, Eric D. Feigelson, & Michael Frenklach.* 429, 285, 147-E10 (1994)

Overtone Emission from Interstellar Polycyclic Aromatic Hydrocarbons. *W. W. Duley.* 429, L91, 158-D11 (1994)

Continuous Absorption by He_2^+ and H_2^+ in Cool White Dwarfs. *P. C. Stancil.* 430, 360, 163-F3 (1994)

High-Resolution Fourier Transform Spectroscopy of the Meinel System of OH. *Mark C. Abrams, Sumner P. Davis, M. L. P. Rao, Rolf Engleman, Jr., & James W. Brault.* 93, 351, 46-C10 (1994)

Interstellar SO^+. *B. E. Turner.* 430, 727, 170-G9 (1994)

The Nature of CO and H_2O Ices in the Corona Australis Molecular Cloud. *Masuo Tanaka, Tetsuya Nagata, Shuji Sato, & Tetsuo Yamamoto.* 430, 779, 171-E8 (1994)

CH_3C_2H as a Temperature Probe in Dense Giant Molecular Cloud Cores. *Edwin A. Bergin, Paul F. Goldsmith, Ronald L. Snell, & Hans Ungerechts.* 431, 674, 187-A3 (1994)

A Millimeter-Wave Study and Astronomical Search for the HCCCS Radical. *M. C. McCarthy, J. M. Vrtilek, E. W. Gottlieb, F.-M. Tao, C. A. Gottlieb, & P. Thaddeus.* 431, L127, 192-B13 (1994)

3 Millimeter $J = 1$–0 HCO^+ Emission from the Diffuse Cloud toward ζ Ophiuchi. *Harvey S. Liszt & Robert Lucas.* 431, L131, 192-C5 (1994)

Interpretation of the 4141 Inverse Centimeters (2.415 Microns) Interstellar Infrared Absorption Feature. *V. Buch & J. P. Devlin.* 431, L135, 192-C11 (1994)

Excitation of Interstellar Hydrogen Chloride. *David A. Neufeld & Sheldon Green.* 432, 158, 195-B11 (1994)

Radiative Excitation of Molecules near Powerful Compact Radio Sources. *Philip R. Maloney, Mitchell C. Begelman, & Martin J. Rees.* 432, 606, 203-E3 (1994)

The CO/SiO Radiative Instability in Cool Star Atmospheres Revisited. *M. Cuntz & D. O. Muchmore.* 433, 303, 212-B3 (1994)

Pre- and Postperihelion Abundances of Gas and Dust in Comet Halley. *Maria Womack, Barry L. Lutz, & R. Mark Wagner.* 433, 886, 222-B11 (1994)

Vibrational Excitation in the Products of Electron-Ion Recombination: A Test of Theory for Ions of Interstellar Significance. *Nigel G. Adams & Lucia M. Babcock.* 434, 184, 228-A1 (1994)

Collisional Excitation of Interstellar Sulfur Monoxide. *Sheldon Green.* 434, 188, 228-A8 (1994)

Theoretical Oscillator Strengths for Infrared Electronic Transitions of Si_2 and SiC. *Fouad L. Sefyani & Joël Schamps.* 434, 816, 239-B11 (1994)

H_2-rich Interstellar Grain Mantles: An Equilibrium Description. *Richard W. Dissly, Mark Allen, & Vincent G. Anicich.* 435, 685, 255-E1 (1994)

Molecular Rotational Line Profiles from Oxygen-rich Red Giant Winds. *K. Justtanont, C. J. Skinner, & A. G. G. M. Tielens.* 435, 852, 257-G6 (1994)

Electron Energy Deposition in Carbon Monoxide Gas. *Weihong Liu & G. A. Victor.* 435, 909, 258-F3 (1994)

Associative Ionization Processes within Interstellar Clouds. *Simon Petrie & Diethard K. Bohme.* 436, 411, 267-A8 (1994)

A Compilation of Electronic Transitions in the CO Molecule and the Interpretation of Some Puzzling Interstellar Absorption Features. *Donald C. Morton & Louis Noreau.* 95, 301, 67-F11 (1994)

High-Velocity Sulfur Monoxide Emission from Protostellar Outflows. *Lawrence M. Chernin, Colin R. Masson, & Gary A. Fuller.* 436, 741, 275-F3 (1994)

The Cometary Fluorescence Spectrum of Cyanogen: A Model. *Marvin Kleine, Susan Wyckoff, Peter A. Wehinger, & Bruce A. Peterson.* 436, 885, 278-A1 (1994)

Water Maser Emission from X-Ray–heated Circumnuclear Gas in Active Galaxies. *David A. Neufeld, Philip R. Maloney, & Sarah Conger.* 436, L127, 281-A13 (1994)

HCN and CO in the Nucleus of NGC 1068. *A. Sternberg, R. Genzel, & L. Tacconi.* 436, L131, 281-B7 (1994)

A Molecular Outflow Driven by an Optical Jet. *George F. Mitchell, Tatsuhiko I. Hasegawa, William R. F. Dent, & Henry E. Matthews.* 436, L177, 282-A11 (1994)

Photon-dominated Regions around Cool Stars: The Effects of the Color Temperature of the Radiation Field. *Marco Spaans, A. G. G. M. Tielens, Ewine F. van Dishoeck, & E. L. O. Bakes.* 437, 270, 286-G7 (1994)

The Near-Infrared Structure and Spectra of the Bipolar Nebulae M2-9 and AFGL 2688: The Role of Ultraviolet Pumping and Shocks in Molecular Hydrogen Excitation. *Joseph L. Hora & William B. Latter.* 437, 281, 287-A8 (1994)

Observations of Molecular Envelopes of Late-Type Stars: CRL 618, CRL 2688, CRL 3068, and CIT 6. *Sadafumi Fukasaku, Yasuhiro Hirahara, Akimasa Masuda, Kentarou Kawaguchi, Shin-ichi Ishikawa, Norio Kaifu, & William M. Irvine.* 437, 410, 288-F13 (1994)

Time-dependent Fluorescent H_2 Emission. *O. Goldshmidt & A. Sternberg.* 439, 256, 24-F3 (1995)

The Distribution of HCN, $H^{13}CN$, and CN in IRC +10216. *Aditya Dayal & John H. Bieging.* 439, 996, 38-D7 (1995)

The Carbon Isotope Abundance Ratio in Comet Halley. *Marvin Kleine, Susan Wyckoff, Peter A. Wehinger, & Bruce A. Peterson.* 439, 1021, 38-F13 (1995)

Theoretical Determination of the Electronic Ground State of the MgC Molecule. *Clarissa O. da Silva, Edilson C. da Silva, & Marco Antonio Chaer Nascimento.* 439, 1044, 39-B3 (1995)

Observations and Analysis of O(^1D) and NH_2 Line Profiles for the Coma of Comet P/Halley. *William H. Smyth, Michael R. Combi, Fred L. Roesler, & Frank Scherb.* 440, 349, 46-A6 (1995)

Turbulent Diffusion and Its Effects on the Chemistry of Molecular Clouds. *Taoling Xie, Mark Allen, & William D. Langer.* 440, 674, 52-E1 (1995)

Gas-Phase Chemistry in Dense Interstellar Clouds Including Grain Surface Molecular Depletion and Desorption. *E. A. Bergin, W. D. Langer, & P. F. Goldsmith.* 441, 222, 62-D7 (1995)

Hydrogen Chloride in OMC-1. *Peter Schilke, T. G. Phillips, & Ning Wang.* 441, 334, 64-A1 (1995)

Rototranslational Collision-induced Absorption by H_2–H_2 Pairs at Temperatures from 600 to 7000 K. *Chunguang Zheng & Aleksandra Borysow.* 441, 960, 75-B6 (1995)

Large HCO^+ and HCN Abundances in the Translucent Cloud toward PKS 0528+134. *Michiel R. Hogerheijde, Eugène J. de Geus, Marco Spaans, Huib Jan van Langevelde, & Ewine F. van Dishoeck.* 441, L93, 76-D4 (1995)

The Relationship of Dense Gas to Star Formation in the Monoceros OB1 Dark Cloud. *Grace A. Wolf-Chase, Christopher K. Walker, & Charles J. Lada.* 442, 197, 79-G9 (1995)

A Nonlocal Calculation of Circumstellar OH Maser Emission. *Alan J. Collison & Gerald E. Nedoluha.* 442, 311, 81-D6 (1995)

3.4 Micron Emission from Ultraviolet Excitation of Alkanes. *G. P. Pinho & W. W. Duley.* 442, L41, 85-C1 (1995)

Detection of a Series of Methanol Maser Lines at 1.9 Millimeter Wavelength. *V. I. Slysh, S. V. Kalenskii, & I. E. Val'tts.* 442, 668, 89-C7 (1995)

A New Method for Determining the CO to H_2 Conversion Factor for Translucent Clouds. *Loris Magnani & Joseph S. Onello.* 443, 169, 97-D9 (1995)

Ammonia Formation from the Reactions of H Atoms with N Atoms Trapped in a Solid N_2 Matrix at 10–30 K. *Kenzo Hiraoka, Akihiro Yamashita, Yasunori Yachi, Kazuo Aruga, Tetsuya Sato, & Hachizo Muto.* 443, 363, 100-B7 (1995)

The Importance of Classes of Neutral-Neutral Reactions in the Production of Complex Interstellar Molecules. *R. P. A. Bettens, H.-H. Lee, & Eric Herbst.* 443, 664, 107-A12 (1995)

Laboratory Studies of 3.3 Micron Emission from Naphthalene Induced by 193 and 248 Nanometer Excitation. *Richard M. Williams & Stephen R. Leone.* 443, 675, 107-B13 (1995)

New Model Atmospheres for Very Cool White Dwarfs with Mixed H/He and Pure He Compositions. *P. Bergeron, D. Saumon, & F. Wesemael.* 443, 764, 108-D1 (1995)

A New Desorption Mechanism for Condensed Phase Interstellar CO. *Fedor Dzegilenko & Eric Herbst.* 443, L81, 112-A11 (1995)

Capture Calculations for the Rates of Important Neutral-Neutral Reactions in Dense Interstellar Clouds: $C + C_2H_2$ and $CN + C_2H_2$. *Qing Liao & Eric Herbst.* 444, 694, 125-G12 (1995)

The Physics and Chemistry of Small Molecular Clouds in the Galactic Plane. III. NH_3. *B. E. Turner.* 444, 708, 126-B4 (1995)

Delayed Detonation Models for Normal and Subluminous Type Ia Supernovae: Absolute Brightness, Light Curves, and Molecule Formation. *P. Höflich, A. M. Khokhlov, & J. C. Wheeler.* 444, 831, 128-A1 (1995)

Collisional Excitation of H_2 Molecules by H Atoms. *S. Lepp, V. Buch, & A. Dalgarno.* 98, 345, 26-E8 (1995)

Molecular Oxygen: A New Astrophysical Maser? *P. Bergman.* 445, L167, 152-D1 (1995)

Infrared Response of H_2 to X-Rays. *R. Gredel & A. Dalgarno.* 446, 852, 167-G7 (1995)

The Dense Gas Component of Outflows in the Monoceros OB1 Dark Cloud. *Grace A. Wolf-Chase & Christopher K. Walker.* 447, 244, 175-F4 (1995)

High-Resolution Ultraviolet Spectroscopy of Jupiter's Aurora with the *Hubble Space Telescope*. *Y. H. Kim, J. J. Caldwell, & J. L. Fox.* 447, 906, 188-D3 (1995)

Interstellar Alcohols. *S. B. Charnley, M. E. Kress, A. G. G. M. Tielens, & T. J. Millar.* 448, 232, 195-D1 (1995)

Anomalously Excited OH and Competition between Maser Transitions toward Centaurus A. *Huib Jan van Langevelde, Ewine F. van Dishoeck, Maartje N. Sevenster, & Frank P. Israel.* 448, L123, 209-F2 (1995)

The H_2 Excitation by Formation Pumping in the Merging Galaxy NGC 6240? *Hideaki Mouri & Yoshiaki Taniguchi.* 449, 134, 212-A8 (1995)

The 11 Micron Emissions of Carbon Stars. *J. H. Goebel, P. Cheeseman, & F. Gerbault.* 449, 246, 213-E9 (1995)

The Physics and Chemistry of Translucent Molecular Clouds. IV. HCO^+ and N_2H^+. *B. E. Turner.* 449, 635, 221-D12 (1995)

Solid Carbonyl Sulphide (OCS) in W33A. *M. E. Palumbo, A. G. G. M. Tielens, & A. T. Tokunaga.* 449, 674, 222-A10 (1995)

Chemistry in Dense Photon-dominated Regions. *A. Sternberg & A. Dalgarno.* 99, 565, 43-A3 (1995)

The Formation of Condensates on Dust in Interstellar Clouds. *W. W. Duley & R. G. Smith.* 450, 179, 230-D13 (1995)

The Oscillator Strengths of the C_2 Phillips System. *P. Erman & A. Iwamae.* 450, L31, 236-A3 (1995)

Thermal Balance in Dense Molecular Clouds: Radiative Cooling Rates and Emission-Line Luminosities. *David A. Neufeld, Stephen Lepp, & Gary J. Melnick.* 100, 132, 47-F2 (1995)

R_V-dependent Interstellar Photodestruction Rates. *Cesare Cecchi-Pestellini, Santi Aiello, & Bruno Barsella.* 100, 187, 48-E2 (1995)

Collisional Excitation of Interstellar Sulfur Dioxide. *Sheldon Green.* 100, 213, 49-A9 (1995)

The Radiative Association of C and S, C^+ and S, Si and O, and Si^+ and O. *C. M. Andreazza, P. D. Singh, & G. C. Sanzovo.* 451, 889, 259-D7 (1995)

Fine-Structure Branching in N_2 $c'_4\,{}^1\Sigma_u^+$ (0). *D. E. Shemansky, I. Kanik, & J. M. Ajello.* 452, 480, 268-F13 (1995)

Molecular H_2 Emission in HH 47A: *Hubble Space Telescope* GHRS and FOC Observations. *Salvador Curiel, John C. Raymond, Mark Wolfire, Patrick Hartigan, Jon Morse, Richard D. Schwartz, & Peter Nisenson.* 453, 322, 285-E10 (1995)

Organic Compounds Produced by Photolysis of Realistic Interstellar and Cometary Ice Analogs Containing Methanol. *Max P. Bernstein, Scott A. Sandford, Louis J. Allamandola, Sherwood Chang, & Maureen A. Scharberg.* 454, 327, 303-G1 (1995)

The Oxygen Temperature of SN 1987A. *Weihong Liu & A. Dalgarno.* 454, 472, 305-G1 (1995)

Can Gas-Phase Radical/Neutral Reactions Account for Observed Abundances of Propynal within Dense Interstellar Clouds? *Simon Petrie.* 454, L165, 317-A9 (1995)

Hydrogen Molecules in SN 1987A. *Michael Culhane & Richard McCray.* 455, 335, 322-F7 (1995)

Analytic Temperature Dependences for a Complete Set of Rate Coefficients for Collisional Excitation and Dissociation of H_2 Molecules by H Atoms. *P. G. Martin & M. E. Mandy.* 455, L89, 326-A9 (1995)

Photon Heating of Envelopes around Young Stellar Objects: An Explanation for CO $J = 6$–5. *Marco Spaans, Michiel R. Hogerheijde, Lee G. Mundy, & Ewine F. van Dishoeck.* 455, L167, 334-D12 (1995)

High-Resolution Electron-Impact Study of the Far-Ultraviolet Emission Spectrum of Molecular Hydrogen. *Xianming Liu, Syed M. Ahmed, Rosalie A. Multari, Geoffrey K. James, & Joseph M. Ajello.* 101, 375, 59-A3 (1995)

MOON

Testing Einstein's Theory of Gravity by Analyzing Lunar Laser Ranging Data. *J. Müller, M. Schneider, M. Soffel, & H. Ruder.* 382, L101, 211-E12 (1991)

Cosmic Acceleration of Earth and the Moon by Dark Matter. *Kenneth L. Nordtvedt.* 437, 529, 290-D2 (1994)

Theoretical Overview and Modeling of the Sodium and Potassium Atmospheres of the Moon. *William H. Smyth & M. L. Marconi.* 443, 371, 100-C4 (1995)

Fractionation of Xe, Kr, and Ar in the Solar Corpuscular Radiation Deduced by Closed System Etching of Lunar Soils. *Rainer Wieler & Heinrich Baur.* 453, 987, 297-E7 (1995)

Ultraviolet Albedo of the Moon with the Hopkins Ultraviolet Telescope. *Richard C. Henry, Paul D. Feldman, Jeffrey W. Kruk, Arthur F. Davidsen, & Samuel T. Durrance.* 454, L69, 308-E11 (1995)

NEBULAE: ABUNDANCES

Far-Infrared Lines from G45.13+0.14 A and K3-50 A: Density Fluctuations in Compact H II Regions. *Sean W. J. Colgan, J. P. Simpson, Robert H. Rubin, Edwin F. Erickson, M. R. Haas, & Jürgen Wolf.* 366, 172, 3-B13 (1991)

Abundances of Hydrogen Sulfide in Star-forming Regions. *Y. C. Minh, L. M. Ziurys, W. M. Irvine, & D. McGonagle.* 366, 192, 3-D9 (1991)

Nitrogen Recombination Lines and Abundance in Nova Shells. *Vladimir Escalante & Alexander Dalgarno.* 369, 213, 38-E7 (1991)

Observations of ^{12}CO and ^{13}CO $J = 9–8$ in Galactic Molecular Clouds. *R. T. Boreiko & A. L. Betz.* 369, 382, 42-E1 (1991)

Molecular Hydrogen in the Vicinity of NGC 7538 IRS 1 and IRS 2: Temperature and Ortho-to-Para Ratio. *Susan Hoban, Dennis C. Reuter, Michael J. Mumma, & Alex D. Storrs.* 370, 228, 50-A10 (1991)

The Ionization Structure of Planetary Nebulae. X. NGC 2392. *Timothy Barker.* 371, 217, 62-G5 (1991)

The Young Supernova Remnants N132D and 1E 0102.2−7219: Limits on the Presence of Rapidly Moving Sulfur. *Barry M. Lasker & David A. Golimowski.* 371, 568, 68-E8 (1991)

Ne V in Planetary Nebulae. *F. P. Keenan, V. M. Burke, & K. M. Aggarwal.* 371, 636, 69-D13 (1991)

Nitrogen Abundances in Carbon-rich Stars That Are Progenitors to Planetary Nebulae. *M. Jura.* 372, 208, 76-E7 (1991)

CS Multitransitional Studies of Density Distribution in Star-forming Regions. I. The NGC 2071 Region. *Shudong Zhou, Neal J. Evans II, Rolf Güsten, Lee G. Mundy, & Marc L. Kutner.* 372, 518, 82-C1 (1991)

Nitric Oxide in Star-forming Regions: Further Evidence for Interstellar N-O Bonds. *L. M. Ziurys, D. McGonagle, Y. Minh, & W. M. Irvine.* 373, 535, 94-E11 (1991)

Axisymmetric Model of the Ionized Gas in the Orion Nebula. *R. H. Rubin, J. P. Simpson, M. R. Haas, & E. F. Erickson.* 374, 564, 106-B12 (1991)

Physical Conditions in the Orion Nebula and an Assessment of Its Helium Abundance. *Jack A. Baldwin, Gary J. Ferland, P. G. Martin, Michael R. Corbin, Stephen A. Cota, Bradley M. Peterson, & Arne Slettebak.* 374, 580, 106-D1 (1991)

Theoretical H II Region Models: The Effects of Stellar Atmosphere Models. *I. N. Evans.* 76, 985, 38-E13 (1991)

Photoionization Modeling of Magellanic Cloud Planetary Nebulae. II. *M. A. Dopita & S. J. Meatheringham.* 377, 480, 145-F6 (1991)

A Grain-heated, Dusty Planetary Nebula in M22. *Kazimierz J. Borkowski & J. Patrick Harrington.* 379, 168, 165-B1 (1991)

H II Region Abundances: Model Oxygen Line Ratios. *Stacy S. McGaugh.* 380, 140, 177-G1 (1991)

The 0.46–1.3 Micron Spectrum of the Planetary Nebula BD +30°3639. *Richard J. Rudy, Ross D. Cohen, George S. Rossano, Peter Erwin, R. C. Puetter, & David K. Lynch.* 380, 151, 178-A1 (1991)

CO $J = 3–2$ and $J = 2–1$ Observations of NGC 7027. *P. A. Jaminet, W. C. Danchi, E. C. Sutton, A. P. G. Russell, Göran Sandell, J. H. Bieging, & D. Wilner.* 380, 461, 184-A4 (1991)

Core Masses and Abundances of Low-Excitation Planetary Nebulae in the Magellanic Clouds. *James B. Kaler & George H. Jacoby.* 382, 134, 201-G7 (1991)

NEBULAE: CRAB NEBULA

Faraday Rotation and Physical Conditions in the Crab Nebula. *M. F. Bietenholz & P. P. Kronberg.* 368, 231, 26-A1 (1991)

Observation of a Pulsar Wind: CCD Polarimetry of the Crab Nebula. *F. C. Michel, P. A. Scowen, R. J. Dufour, & J. J. Hester.* 368, 463, 30-G1 (1991)

Hard X-Ray Variability of NGC 4151. *F. Perotti, P. Maggioli, E. Quadrini, A. Bazzano, P. Ubertini, L. Bassani, J. B. Stephen, A. J. Court, A. J. Dean, N. A. Dipper, & R. A. Lewis.* 373, 75, 87-A1 (1991)

The Expansion of the Crab Nebula. *M. F. Bietenholz, P. P. Kronberg, D. E. Hogg, & A. S. Wilson.* 373, L59, 97-D5 (1991)

Gamma-Ray Observations of the Crab Nebula at TeV Energies. *G. Vacanti, M. F. Cawley, E. Colombo, D. J. Fegan, A. M. Hillas, P. W. Kwok, M. J. Lang, R. C. Lamb, D. A. Lewis, D. J. Macomb, K. S. O'Flaherty, P. T. Reynolds, & T. C. Weekes.* 377, 467, 145-E4 (1991)

Locating Very High Energy Gamma-Ray Sources with Arcminute Accuracy. *C. W. Akerlof, M. F. Cawley, M. Chantell, D. J. Fegan, K. Harris, A. M. Hillas, D. G. Jennings, R. C. Lamb, M. A. Lawrence, M. J. Lang, D. A. Lewis, D. I. Meyer, G. Mohanty, K. S. O'Flaherty, M. Punch, P. T. Reynolds, M. S. Schubnell, T. C. Weekes, & T. Whitaker.* 377, L97, 150-E6 (1991)

A Model of Unpulsed Very High Energy Gamma Rays from the Crab Nebula and Pulsar. *P. W. Kwok, K. S. Cheng, & M. M. Lau.* 379, 653, 172-G1 (1991)

NEBULAE: GENERAL

Relative Populations for Levels in the $3d^2$ Ground Configuration of Fe VII. *F. P. Keenan & P. H. Norrington.* 368, 486, 31-B7 (1991)

Bok Globules and Small Molecular Clouds: Deep *IRAS* Photometry and ^{12}CO Spectroscopy. *Dan P. Clemens, João Lin Yun, & Mark H. Heyer.* 75, 877, 13-E1 (1991)

HH 5, HH 6, and Their Exciting Stars. *Martin Cohen, Burton F. Jones, & Mark Hereld.* 371, 237, 63-B1 (1991)

Spectra of Two Very Old Supernovae: SN 1986J and SN 1980K. *Bruno Leibundgut, Robert P. Kirshner, Philip A. Pinto, Michael P. Rupen, R. Chris Smith, James E. Gunn, & Donald P. Schneider.* 372, 531, 82-D1 (1991)

Size and Density Distribution of Very Small Dust Grains in the Barnard 5 Cloud. *Dariusz C. Lis & Chun Ming Leung.* 372, L107, 85-F9 (1991)

Fragmentation of Elongated Cylindrical Clouds. III. Formation of Binary and Multiple Systems. *Ian Bonnell, Hugo Martel, Pierre Bastien, Jean-Pierre Arcoragi, & Willy Benz.* 377, 553, 146-E5 (1991)

Fragmentation of Elongated Cylindrical Clouds. I. Isothermal Clouds. *Pierre Bastien, Jean-Pierre Arcoragi, Willy Benz, Ian Bonnell, & Hugo Martel.* 378, 255, 154-B5 (1991)

Radiation Transport in Dust in Disk Geometry. I. Application to Externally Heated Interstellar Clouds. *George F. Spagna, Jr., Chun Ming Leung, & Michael P. Egan.* 379, 232, 166-A5 (1991)

Fragmentation of Elongated Cylindrical Clouds. II. Polytropic Clouds. *Jean-Pierre Arcoragi, Ian Bonnell, Hugo Martel, Willy Benz, & Pierre Bastien.* 380, 476, 184-B7 (1991)

N III Line Emission in Planetary Nebulae: Not Bowen Fluorescence. *S. O. Kastner & A. K. Bhatia.* 381, L59, 199-D7 (1991)

Molecular Line Emission Models of Herbig-Haro Objects. I. H_2 Emission. *Mark G. Wolfire & Arieh Königl.* 383, 205, 214-E9 (1991)

NEBULAE: H II REGIONS

Abundances in H II Regions at the Edge of the Galaxy. *Michel Fich & Mariabeth Silkey.* 366, 107, 2-D1 (1991)

Far-Infrared Lines from G45.13+0.14 A and K3-50 A: Density Fluctuations in Compact H II Regions. *Sean W. J. Colgan, J. P. Simpson, Robert H. Rubin, Edwin F. Erickson, M. R. Haas, & Jürgen Wolf.* 366, 172, 3-B13 (1991)

H II Regions in M82: High-Resolution Millimeter Continuum Observations. *J. E. Carlstrom & Philipp P. Kronberg.* 366, 422, 8-B1 (1991)

Superbubble Blowout in the Giant H II Region NGC 2363? *Jean-René Roy, J. Boulesteix, Gilles Joncas, & B. Grundseth.* 367, 141, 13-F8 (1991)

Ultraviolet Interstellar Lines in the Spectrum of π Scorpii Recorded at 2 Kilometers per Second Resolution. *Charles L. Joseph & Edward B. Jenkins.* 368, 201, 25-E9 (1991)

Bow Shock Models of Ultracompact H II Regions. *Mordecai-Mark Mac Low, Dave Van Buren, Douglas O. S. Wood, & Ed Churchwell.* 369, 395, 42-F1 (1991)

Radio Recombination Lines from Diffuse Interstellar Gas in the Galaxy. *J. C. Cersosimo & J. S. Onello.* 370, 225, 50-A5 (1991)

Molecular Hydrogen in the Vicinity of NGC 7538 IRS 1 and IRS 2: Temperature and Ortho-to-Para Ratio. *Susan Hoban, Dennis C. Reuter, Michael J. Mumma, & Alex D. Storrs.* 370, 228, 50-A10 (1991)

IRAS 23545+6508, a Dissociating Star: Prototype for a New Observational Class? *P. E. Dewdney, R. S. Roger, C. R. Purton, & W. H. McCutcheon.* 370, 243, 50-C1 (1991)

Polarimetric Mapping of Orion Using MILLIPOL: Magnetic Activity in BN/KL. *Robert W. Leach, Dan P. Clemens, Brian D. Kane, & Richard Barvainis.* 370, 257, 50-D1 (1991)

A Search for Embedded Young Stellar Objects in and near the IC 1396 Complex. *Richard D. Schwartz, Armen L. Gyulbudaghian, & Bruce A. Wilking.* 370, 263, 50-D9 (1991)

A Study of Star Formation in the Disks of Sa Galaxies. *Nelson Caldwell, Robert Kennicutt, Andrew C. Phillips, & Robert A. Schommer.* 370, 526, 54-G12 (1991)

An X-Ray Image of the Violent Interstellar Medium in 30 Doradus. *Q. Wang & D. J. Helfand.* 370, 541, 55-B9 (1991)

A Large Supershell H II Region Complex in the Large Magellanic Cloud and the Interstellar Environment of SN 1987A. *Frederick C. Bruhweiler, Michelle A. Fitzurka, & Theodore R. Gull.* 370, 551, 55-C9 (1991)

Protostellar Condensations in the Core of NGC 2024. *D. C. Lis, J. E. Carlstrom, & T. G. Phillips.* 370, 583, 55-F5 (1991)

High Chemical Abundances in Virgo Spiral Galaxies? *Gregory A. Shields, Evan D. Skillman, & Robert C. Kennicutt, Jr.* 371, 82, 61-B1 (1991)

Far-Infrared Properties of NGC 6822. *John S. Gallagher III, Deidre A. Hunter, Fred C. Gillett, & Walter L. Rice.* 371, 142, 61-G1 (1991)

The Infrared Properties of Compact Galactic Radio Sources: The Young and the Restless. *Richard L. White, Robert H. Becker, & David J. Helfand.* 371, 148, 62-A1 (1991)

The Spectral Signatures of Collapse and Outflow around Young Stars. *E. R. Keto.* 371, 163, 62-B3 (1991)

Multifrequency VLA Observations of Radio Continuum from IRAS 16293−2422. *R. Estalella, G. Anglada, L. F. Rodríguez, & G. Garay.* 371, 626, 69-C12 (1991)

VLBI Observations of Interstellar Ammonia Masers. *Preethi Pratap, Karl M. Menten, Mark J. Reid, James M. Moran, & C. Malcolm Walmsley.* 373, L13, 91-B12 (1991)

He II Emission in Extragalactic H II Regions. *Donald R. Garnett, Robert C. Kennicutt, Jr., You-Hua Chu, & Evan D. Skillman.* 373, 458, 93-E14 (1991)

The Hydrodynamics of Relict Cosmological H II Regions and the Formation of Objects at High Redshift. *Piero Madau & Avery Meiksin.* 374, 6, 98-B7 (1991)

Infrared Images of M17. *Charles J. Lada, D. L. DePoy, K. M. Merrill, & Ian Gatley.* 374, 533, 105-G1 (1991)

Physical Conditions in the Orion Nebula and an Assessment of Its Helium Abundance. *Jack A. Baldwin, Gary J. Ferland, P. G. Martin, Michael R. Corbin, Stephen A. Cota, Bradley M. Peterson, & Arne Slettebak.* 374, 580, 106-D1 (1991)

Near-Infrared Emission of Neutral Carbon from Photon-dominated Regions. *V. Escalante, A. Sternberg, & A. Dalgarno.* 375, 630, 120-E1 (1991)

Theoretical H II Region Models: The Effects of Stellar Atmosphere Models. *I. N. Evans.* 76, 985, 38-E13 (1991)

The Dissipation of Magnetohydrodynamic Turbulence Responsible for Interstellar Scintillation and the Heating of the Interstellar Medium. *Steven R. Spangler.* 376, 540, 133-B5 (1991)

NGC 7538 IRS 1: Subarcsecond Resolution Recombination Line and $^{15}NH_3$ Maser Observations. *R. A. Gaume, K. J. Johnston, H. A. Nguyen, T. L. Wilson, H. R. Dickel, W. M. Goss, & M. C. H. Wright.* 376, 608, 133-G12 (1991)

The Origin of the Quasi-stellar Object Absorption Lines. *S. M. Viegas & R. B. Gruenwald.* 377, 39, 138-E5 (1991)

Ultraviolet and Optical Spectroscopy of the R Aquarii Symmetrical Jet. *J. M. Hollis, R. J. Oliversen, M. Kafatos, A. G. Michalitsianos, & R. M. Wagner.* 377, 227, 140-F11 (1991)

Two Micron Spectroscopy of Infrared Sources in NGC 2071. *D. M. Walther, T. R. Geballe, & E. I. Robson.* 377, 246, 141-A9 (1991)

The Dense Molecular Envelope around the Compact H II Region G5.89−0.39 (W28 A2). *Yolanda Gómez, Luis F. Rodríguez, Guido Garay, & James M. Moran.* 377, 519, 146-B9 (1991)

A Statistical Study of the Correlation of Galactic Supernova Remnants and Spiral Arms. *Zongwei Li, J. Craig Wheeler, Frank N. Bash, & W. H. Jefferys.* 378, 93, 152-B9 (1991)

First Results from the Faint Object Camera: High-Resolution Observations of the Central Object R136 in the 30 Doradus Nebula. *G. Weigelt, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, & W. B. Sparks.* 378, L21, 157-C7 (1991)

Synthesis Imaging of the DR 21(OH) Cluster. I. Dust Continuum and $C^{18}O$ Emission. *Jeffrey G. Mangum, Alwyn Wootten, & Lee G. Mundy.* 378, 576, 159-E3 (1991)

SiS in Outflow Regions: More High-Temperature Silicon Chemistry. *L. M. Ziurys.* 379, 260, 166-C7 (1991)

A Catalog of Bright-rimmed Clouds with *IRAS* Point Sources: Candidates for Star Formation by Radiation-driven Implosion. I. The Northern Hemisphere. *Koji Sugitani, Yasuo Fukui, & Katsuo Ogura.* 77, 59, 44-B1 (1991)

IUE Observations of NGC 1068: The Extremely Luminous Starburst Knots. *F. C. Bruhweiler, K. Q. Truong, & B. Altner.* 379, 596, 172-B1 (1991)

IUE Observations of NGC 1068: The Extended High-Ionization Emission Region. *K. Q. Truong & F. C. Bruhweiler.* 379, 609, 172-C1 (1991)

H II Region Abundances: Model Oxygen Line Ratios. *Stacy S. McGaugh.* 380, 140, 177-G1 (1991)

The Upper Bound to the Primordial Abundance of Helium and the Consistency of the Hot Big Bang Model. *Keith A. Olive, Gary Steigman, & Terry P. Walker.* 380, L1, 181-B1 (1991)

The Discovery of a New, Very Strong, and Widespread Interstellar Methanol Maser Line. *Karl M. Menten.* 380, L75, 188-E1 (1991)

H II Regions in Seven Dwarf Irregular Galaxies. *Nicolas V. Strobel, Paul Hodge, & Robert C. Kennicutt, Jr.* 383, 148, 213-G3 (1991)

Two Planetary Nebulae in the Direction of the Galactic Center. *A. Gutiérrez-Moreno, H. Moreno, & G. Cortés.* 383, 174, 214-C1 (1991)

Gravitational Fragmentation: A Comparison with W49A. *Eric R. Keto, John C. Lattanzio, & Joe J. Monaghan.* 383, 639, 222-B12 (1991)

High-Resolution Spectroscopy of Partially Ionized Gas around H II Regions. *Joseph S. Onello, J. A. Phillips, & Yervant Terzian.* 383, 693, 222-G6 (1991)

A Model for the Infrared Emission from an OB Star Cluster Environment. *D. Leisawitz.* 77, 451, 51-B1 (1991)

NEBULAE: INDIVIDUAL

Messier Number: M17

Infrared Images of M17. *Charles J. Lada, D. L. DePoy, K. M. Merrill, & Ian Gatley.* 374, 533, 105-G1 (1991)

NGC Number: NGC 1977

Parsec-Scale Penetration of Ultraviolet Photons into Molecular Clouds: [C II] 158 Micron Mapping of W3, NGC 1977, and NGC 2023. *J. E. Howe, D. T. Jaffe, R. Genzel, & G. J. Stacey.* 373, 158, 88-A5 (1991)

NGC Number: NGC 2023

Parsec-Scale Penetration of Ultraviolet Photons into Molecular Clouds: [C II] 158 Micron Mapping of W3, NGC 1977, and NGC 2023. *J. E. Howe, D. T. Jaffe, R. Genzel, & G. J. Stacey.* 373, 158, 88-A5 (1991)

NGC Number: NGC 2024

Protostellar Condensations in the Core of NGC 2024. *D. C. Lis, J. E. Carlstrom, & T. G. Phillips.* 370, 583, 55-F5 (1991)

NGC Number: NGC 2071

CS Multitransitional Studies of Density Distribution in Star-forming Regions. I. The NGC 2071 Region. *Shudong Zhou, Neal J. Evans II, Rolf Güsten, Lee G. Mundy, & Marc L. Kutner.* 372, 518, 82-C1 (1991)

NGC Number: NGC 2245

Emission from Dust in Visual Reflection Nebulae at Infrared and Submillimeter Wavelengths. *Sean C. Casey.* 371, 183, 62-D1 (1991)

NGC Number: NGC 2247

Emission from Dust in Visual Reflection Nebulae at Infrared and Submillimeter Wavelengths. *Sean C. Casey.* 371, 183, 62-D1 (1991)

NGC Number: NGC 2363

Superbubble Blowout in the Giant H II Region NGC 2363? *Jean-René Roy, J. Boulesteix, Gilles Joncas, & B. Grundseth.* 367, 141, 13-F8 (1991)

NGC Number: NGC 2392

The Ionization Structure of Planetary Nebulae. X. NGC 2392. *Timothy Barker.* 371, 217, 62-G5 (1991)

NGC Number: NGC 2440

Neutral Oxygen in Planetary Nebulae: Probing Radiative Transfer and Nebular Structure. *Michael G. Richer, Marshall L. McCall, & Peter G. Martin.* 377, 210, 140-E1 (1991)

NGC Number: NGC 3918

Neutral Oxygen in Planetary Nebulae: Probing Radiative Transfer and Nebular Structure. *Michael G. Richer, Marshall L. McCall, & Peter G. Martin.* 377, 210, 140-E1 (1991)

NGC Number: NGC 6302

NGC 6302: Ionized by a Very Hot Star or by a Wind? *N. J. Lame & G. J. Ferland.* 367, 208, 14-F1 (1991)

NGC Number: NGC 6572

Near-Infrared Spectroscopy of the Planetary Nebula NGC 6572. *Richard J. Rudy, George S. Rossano, Peter Erwin, & R. C. Puetter.* 368, 468, 30-G13 (1991)

NGC Number: NGC 6751

The Multiple-Shell Structure of the Planetary Nebula NGC 6751. *You-Hua Chu, Arturo Manchado, George H. Jacoby, & Karen B. Kwitter.* 376, 150, 126-F13 (1991)

NGC Number: NGC 7023

Emission from Dust in Visual Reflection Nebulae at Infrared and Submillimeter Wavelengths. *Sean C. Casey.* 371, 183, 62-D1 (1991)

NGC Number: NGC 7027

Emission Features in the Spectrum of NGC 7027 near 3.3 Microns at Very High Resolution. *R. P. Lowe, J. M. Moorhead, W. H. Wehlau, & J.-P. Maillard.* 368, 195, 25-E1 (1991)

Relative Populations for Levels in the $3d^2$ Ground Configuration of Fe VII. *F. P. Keenan & P. H. Norrington.* 368, 486, 31-B7 (1991)

The Spectrum of NGC 7027 from 3080 to 2630 Wavenumbers (3.25–3.80 Microns): Detection of New Atomic and Molecular Hydrogen Lines and New Constraints on the Chemical Sidegroups on Polycyclic Aromatic Hydrocarbons. *Scott A. Sandford.* 376, 599, 133-G1 (1991)

The Molecular Envelope of NGC 7027. *John H. Bieging, David Wilner, & Harley A. Thronson, Jr.* 379, 271, 166-D9 (1991)

CO $J = 3–2$ and $J = 2–1$ Observations of NGC 7027. *P. A. Jaminet, W. C. Danchi, E. C. Sutton, A. P. G. Russell, Göran Sandell, J. H. Bieging, & D. Wilner.* 380, 461, 184-A4 (1991)

NGC Number: NGC 7538

Molecular Hydrogen in the Vicinity of NGC 7538 IRS 1 and IRS 2: Temperature and Ortho-to-Para Ratio. *Susan Hoban, Dennis C. Reuter, Michael J. Mumma, & Alex D. Storrs.* 370, 228, 50-A10 (1991)

The Spectral Signatures of Collapse and Outflow around Young Stars. *E. R. Keto.* 371, 163, 62-B3 (1991)

NGC 7538 IRS 1: Subarcsecond Resolution Recombination Line and $^{15}NH_3$ Maser Observations. *R. A. Gaume, K. J. Johnston, H. A. Nguyen, T. L. Wilson, H. R. Dickel, W. M. Goss, & M. C. H. Wright.* 376, 608, 133-G12 (1991)

Name: R Aquarii

First Results from the Faint Object Camera: Imaging the Core of R Aquarii. *F. Paresce, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, & W. B. Sparks.* 369, L67, 46-B7 (1991)

Narrow-Band Imaging of the Inner R Aquarii Nebula: Further Evidence for Shock Excitation. *Denis Burgarella & Francesco Paresce.* 370, 590, 55-G1 (1991)

Ultraviolet and Optical Spectroscopy of the R Aquarii Symmetrical Jet. *J. M. Hollis, R. J. Oliversen, M. Kafatos, A. G. Michalitsianos, & R. M. Wagner.* 377, 227, 140-F11 (1991)

Name: Barnard 5

Anatomy of the Barnard 5 Core. *G. A. Fuller, P. C. Myers, W. J. Welch, P. F. Goldsmith, W. D. Langer, B. G. Campbell, S. Guilloteau, & R. W. Wilson.* 376, 135, 126-E10 (1991)

Name: Cassiopeia A

New Clues to the Cassiopeia A Supernova Progenitor. *Robert A. Fesen & Robert H. Becker.* 371, 621, 69-C4 (1991)

VLA Observations of 21 Centimeter H I Absorption toward Cassiopeia A. *John H. Bieging, W. Miller Goss, & Eric M. Wilcots.* 75, 999, 16-F5 (1991)

Relativistic Electron Populations in Cassiopeia A. *M. Anderson, L. Rudnick, P. Leppik, R. Perley, & R. Braun.* 373, 146, 87-G4 (1991)

Name: Cygnus Loop

The H_2 Line Profiles in the Cygnus Loop: Evidence for J-Shocks with Magnetic Precursors. *James R. Graham, Gillian S. Wright, & T. R. Geballe.* 372, L21, 79-C7 (1991)

Far-Ultraviolet Mapping of the Cygnus Loop with the *Voyager 2* Ultraviolet Spectrometer. *William P. Blair, Knox S. Long, Olaf Vancura, & J. B. Holberg.* 374, 202, 100-E5 (1991)

A Kinematic and Proper-Motion Survey of the Cygnus Loop. *Peter Shull, Jr., & Hans Hippelein.* 383, 714, 223-B3 (1991)

Name: 30 Doradus

An X-Ray Image of the Violent Interstellar Medium in 30 Doradus. *Q. Wang & D. J. Helfand.* 370, 541, 55-B9 (1991)

Name: Kepler's Supernova

A Detailed Optical Study of Kepler's Supernova Remnant. *William P. Blair, Knox S. Long, & Olaf Vancura.* 366, 484, 9-A1 (1991)

Changes in the Optical Remnant of Kepler's Supernova during the Period 1942–1989. *Rino Bandiera & Sidney van den Bergh.* 374, 186, 100-C11 (1991)

Name: Monoceros R2

The Structure and Kinematics of Bipolar Outflows: Observations and Models of the Monoceros R2 Outflow. *Barry A. Meyers-Rice & Charles J. Lada.* 368, 445, 30-E10 (1991)

Name: ρ Ophiuchi

Direct VLBI Detection of the Magnetosphere Surrounding the Young Star S1 in ρ Ophiuchi. *Philippe André, Robert B. Phillips, Jean-François Lestrade, & Karl-Ludwig Klein.* 376, 630, 134-B12 (1991)

A Rich Cluster of Radio Stars in the ρ Ophiuchi Cloud Cores. *James A. Leous, Eric D. Feigelson, Philippe André, & Thierry Montmerle.* 379, 683, 173-B10 (1991)

Name: Orion A

Infrared Dust and Millimeter-Wave Carbon Monoxide Emission in the Orion Region. *John Bally, William D. Langer, & Weihong Liu.* 383, 645, 222-C6 (1991)

Name: Orion B

Protostellar Condensations in the Core of NGC 2024. *D. C. Lis, J. E. Carlstrom, & T. G. Phillips.* 370, 583, 55-F5 (1991)

A 2.2 Micron Survey in the L1630 Molecular Cloud. *Elizabeth A. Lada, D. L. DePoy, Neal J. Evans II, & Ian Gatley.* 371, 171, 62-C1 (1991)

Infrared Dust and Millimeter-Wave Carbon Monoxide Emission in the Orion Region. *John Bally, William D. Langer, & Weihong Liu.* 383, 645, 222-C6 (1991)

Name: Puppis A

An Infrared Analysis of Puppis A. *Richard G. Arendt, Eli Dwek. & Robert Petre.* 368, 474, 31-A7 (1991)

The O VII Soft X-Ray Spectrum and Its Application to Hot Plasmas in Astrophysics. *A. H. Gabriel, F. Bely-Dubau, P. Faucher, & L. W. Acton.* 378, 438, 156-D1 (1991)

Name: Red Rectangle

X Marks the Spot: Distribution and Excitation of Unidentified Molecules in the Red Rectangle. *Gary D. Schmidt & Adolf N. Witt.* 383, 698, 222-G12 (1991)

Name: Sagittarius B2

High-Density Gas in the Core of the Sagittarius B2 Molecular Cloud. *Dariusz C. Lis & Paul F. Goldsmith.* 369, 157, 37-G11 (1991)

A Molecular Line Survey of Sagittarius B2 and Orion–KL from 70 to 115 GHz. II. Analysis of the Data. *B. E. Turner.* 76, 617, 33-D1 (1991)

Millimeter Continuum Observations of Galactic Center Giant Molecular Cloud Cores. *D. C. Lis, J. E. Carlstrom, & Jocelyn Keene.* 380, 429, 183-E7 (1991)

Molecular Line Survey of Sagittarius B2(M) from 330 to 355 GHz and Comparison with Sagittarius B2(N). *E. C. Sutton, P. A. Jaminet, W. C. Danchi, & Geoffrey A. Blake.* 77, 255, 47-F1 (1991)

Name: Sagittarius C

Millimeter Continuum Observations of Galactic Center Giant Molecular Cloud Cores. *D. C. Lis, J. E. Carlstrom, & Jocelyn Keene.* 380, 429, 183-E7 (1991)

Name: Sagittarius D

Millimeter Continuum Observations of Galactic Center Giant Molecular Cloud Cores. *D. C. Lis, J. E. Carlstrom, & Jocelyn Keene.* 380, 429, 183-E7 (1991)

Name: Taurus Dark Cloud

Two Micron Morphology of Candidate Protostars. *Motohide Tamura, Ian Gatley, William Waller, & Michael W. Werner.* 374, L25, 103-E7 (1991)

Name: Vela Supernova Remnant

Variable Interstellar Absorption toward HD 72127A. II. 1981–1988. *L. M. Hobbs, R. Ferlet, D. E. Welty, & G. Wallerstein.* 378, 586, 159-F1 (1991)

Evidence for a Thermally Unstable Shock Wave in the Vela Supernova Remnant. *John C. Raymond, George Wallerstein, & Bruce Balick.* 383, 226, 214-G5 (1991)

Alphanumeric: B335

Observations of HCO$^+$ in B335. *Tatsuhiko I. Hasegawa, C. Rogers, & Saeko Suzuki Hayashi.* 374, 177, 100-C1 (1991)

Alphanumeric: BD +30°3639

The 0.46–1.3 Micron Spectrum of the Planetary Nebula BD +30°3639. *Richard J. Rudy, Ross D. Cohen, George S. Rossano, Peter Erwin, R. C. Puetter, & David K. Lynch.* 380, 151, 178-A1 (1991)

Alphanumeric: 3C 400.2

W28 and 3C 400.2: Two Shell-like Radio Supernova Remnants with Centrally Peaked X-Ray Morphologies. *Knox S. Long, William P. Blair, Richard L. White, & Yutaka Matsui.* 373, 567, 95-A10 (1991)

Alphanumeric: CED 201

Emission from Dust in Visual Reflection Nebulae at Infrared and Submillimeter Wavelengths. *Sean C. Casey.* 371, 183, 62-D1 (1991)

Alphanumeric: DR 21

A Spectroscopic Study of the DR 21 Outflow Source. II. The Vibrational H_2 Line Emission. *R. P. Garden, T. R. Geballe, I. Gatley, & D. Nadeau.* 366, 474, 8-G1 (1991)

The Extinction to the H_2 Line Emission in the DR 21 Outflow Source. *Daniel Nadeau, Martin Riopel, & T. R. Geballe.* 372, L103, 85-F5 (1991)

A Spectroscopic Study of the DR 21 Outflow Source. III. The CO Line Emission. *R. P. Garden, M. Hayashi, I. Gatley, T. Hasegawa, & N. Kaifu.* 374, 540, 105-G11 (1991)

Alphanumeric: DR 21(OH)

Synthesis Imaging of the DR 21(OH) Cluster. I. Dust Continuum and $C^{18}O$ Emission. *Jeffrey G. Mangum, Alwyn Wootten, & Lee G. Mundy.* 378, 576, 159-E3 (1991)

Alphanumeric: 1E 0102−7219

The Young Supernova Remnants N132D and 1E 0102.2−7219: Limits on the Presence of Rapidly Moving Sulfur. *Barry M. Lasker & David A. Golimowski.* 371, 568, 68-E8 (1991)

Alphanumeric: G29.96−0.02

The Dynamics and Physical Properties of the Cometary Nebula G29.96−0.02. *Douglas O. S. Wood & Ed Churchwell.* 372, 199, 76-D8 (1991)

Alphanumeric: G45.13+0.14

Far-Infrared Lines from G45.13+0.14 A and K3-50 A: Density Fluctuations in Compact H II Regions. *Sean W. J. Colgan, J. P. Simpson, Robert H. Rubin, Edwin F. Erickson, M. R. Haas, & Jürgen Wolf.* 366, 172, 3-B13 (1991)

Alphanumeric: G348+0

A New Look at the "Jet" in the CTB 37A/B Supernova Remnant Complex. *Namir E. Kassim, Stefi A. Baum, & Kurt W. Weiler.* 374, 212, 100-F9 (1991)

Alphanumeric: GGD 27

The Dense, Inner Part of the Protostellar Disk: Protostar Candidates in GGD 27 IRS. *Takuya Yamashita, Yasuhiro Murata, Ryohei Kawabe, Norio Kaifu, & Motohide Tamura.* 373, 560, 95-A1 (1991)

Alphanumeric: GL 618

Proto–Planetary Nebulae. II. The Shock-heated Bipolar Nebulae GL 618 and M2-56. *Robert W. Goodrich.* 376, 654, 134-D12 (1991)

Alphanumeric: HH 12

Near-Infrared Emission-Line Images of Three Herbig-Haro Objects. *Karl R. Stapelfeldt, Charles A. Beichman, J. Jeff Hester, Nicholas Z. Scoville, & Thomas N. Gautier III.* 371, 226, 63-A1 (1991)

Alphanumeric: HH 34

Near-Infrared Emission-Line Images of Three Herbig-Haro Objects. *Karl R. Stapelfeldt, Charles A. Beichman, J. Jeff Hester, Nicholas Z. Scoville, & Thomas N. Gautier III.* 371, 226, 63-A1 (1991)

Alphanumeric: HH 7–11

Near-Infrared Emission-Line Images of Three Herbig-Haro Objects. *Karl R. Stapelfeldt, Charles A. Beichman, J. Jeff Hester, Nicholas Z. Scoville, & Thomas N. Gautier III.* 371, 226, 63-A1 (1991)

Alphanumeric: IC 443

H_2CO in IC 443G: Unusual Excitation and a Diagnostic of Shock Astrochemistry. *B. E. Turner & D. A. Lubowich.* 381, 173, 191-B9 (1991)

Forbidden Iron Emission on the North Rim of IC 443. *Richard G. Teske.* 383, 233, 215-A1 (1991)

Alphanumeric: IC 446

Emission from Dust in Visual Reflection Nebulae at Infrared and Submillimeter Wavelengths. *Sean C. Casey.* 371, 183, 62-D1 (1991)

Alphanumeric: IC 1396

A Search for Embedded Young Stellar Objects in and near the IC 1396 Complex. *Richard D. Schwartz, Armen L. Gyulbudaghian, & Bruce A. Wilking.* 370, 263, 50-D9 (1991)

Alphanumeric: IRAS 22272+5435

The Carbon-rich Proto–Planetary Nebula IRAS 22272+5435. *Bruce J. Hrivnak & Sun Kwok.* 371, 631, 69-D6 (1991)

Alphanumeric: K3-50

Far-Infrared Lines from G45.13+0.14 A and K3-50 A: Density Fluctuations in Compact H II Regions. *Sean W. J. Colgan, J. P. Simpson, Robert H. Rubin, Edwin F. Erickson, M. R. Haas, & Jürgen Wolf.* 366, 172, 3-B13 (1991)

Alphanumeric: L134 (Lynds 134)

IRAS Detection of Very Cold Dust in the Lynds 134 Cloud Complex. *R. J. Laureijs, F. O. Clark, & T. Prusti.* 372, 185, 76-C4 (1991)

Alphanumeric: L1221 (Lynds 1221)

U-shaped Outflow in the Lynds 1221 Dark Cloud: An Example of Interaction of Outflows with Ambient Molecular Clouds. *Tomofumi Umemoto, Naomi Hirano, Osamu Kameya, Yasuo Fukui, Nario Kuno, & Keiya Takakubo.* 377, 510, 146-A13 (1991)

Alphanumeric: L723 (Lynds 723)

A Double Radio Source at the Center of the Outflow in L723. *Guillem Anglada, Robert Estalella, Luis F. Rodríguez, José M. Torrelles, Rosario López, & Jorge Cantó.* 376, 615, 134-A7 (1991)

Molecular Observations of the L723 Region: Interaction between the Clumpy Outflow and the Gaseous Core? *Saeko S. Hayashi, Tetsuo Hasegawa, & Norio Kaifu.* 377, 492, 145-G5 (1991)

Alphanumeric: L1287 (Lynds 1287)

A Millimeter-Wave Line Study of L1287: A Case of Induced Star Formation by Stellar Wind Compression? *Ji Yang, Tomofumi Umemoto, Takahiro Iwata, & Yasuo Fukui.* 373, 137, 87-F7 (1991)

Alphanumeric: L1457 (Lynds 1457)

An X-Ray Pulsator in the Direction of Molecular Cloud MBM 12 (Lynds 1457). *K. Koyama, S. Takano, Y. Tawara, T. Matsumoto, K. Noguchi, Y. Fukui, T. Iwata, N. Ohashi, K. Tatematsu, N. Takahashi, T. Umemoto, K. W. Hodapp, J. Rayner, & K. Makishima.* 377, 240, 141-A1 (1991)

Alphanumeric: L1489 (Lynds 1489)

Two Micron Morphology of Candidate Protostars. *Motohide Tamura, Ian Gatley, William Waller, & Michael W. Werner.* 374, L25, 103-E7 (1991)

Alphanumeric: L1536 (Lynds 1536)

Two Micron Morphology of Candidate Protostars. *Motohide Tamura, Ian Gatley, William Waller, & Michael W. Werner.* 374, L25, 103-E7 (1991)

Alphanumeric: L1551 (Lynds 1551)

Two Micron Morphology of Candidate Protostars. *Motohide Tamura, Ian Gatley, William Waller, & Michael W. Werner.* 374, L25, 103-E7 (1991)

Testing Models of Low-Mass Star Formation: High-Resolution Far-Infrared Observations of L1551 IRS 5. *Harold M. Butner, Neal J. Evans II, Daniel F. Lester, Russell M. Levreault, & Stephen E. Strom.* 376, 636, 134-C6 (1991)

Two New Molecular Outflows in L1551? *Marc W. Pound & John Bally.* 383, 705, 223-A7 (1991)

Alphanumeric: L1551 IRS 5 (Lynds 1551 IRS 5)

A Second Outflow from L1551/IRS 5? *G. H. Moriarty-Schieven & P. G. Wannier.* 373, L23, 91-C8 (1991)

Alphanumeric: L1563 (Lynds 1563)

Dust and Molecular Properties of the Low-Opacity Cloud Lynds 1563. *Frank O. Clark, R. J. Laureijs, & Lauri L. Wardell.* 370, 237, 50-B7 (1991)

Alphanumeric: L1630 (Lynds 1630)

An Unbiased Survey for Dense Cores in the Lynds 1630 Molecular Cloud. *Elizabeth A. Lada, John Bally, & Antony A. Stark.* 368, 432, 30-D9 (1991)

A 2.2 Micron Survey in the L1630 Molecular Cloud. *Elizabeth A. Lada, D. L. DePoy, Neal J. Evans II, & Ian Gatley.* 371, 171, 62-C1 (1991)

Alphanumeric: L1641 (Lynds 1641)

Molecular Outflows in the L1641 Region of Orion. *James A. Morgan & John Bally.* 372, 505, 82-B1 (1991)

Molecular Outflows Associated with Young Stellar Objects in the L1641 Region of Orion. *James A. Morgan, F. Peter Schloerb, Ronald L. Snell, & John Bally.* 376, 618, 134-A12 (1991)

Alphanumeric: LMC N132D

The Young Supernova Remnants N132D and 1E 0102.2−7219: Limits on the Presence of Rapidly Moving Sulfur. *Barry M. Lasker & David A. Golimowski.* 371, 568, 68-E8 (1991)

Alphanumeric: M1-91

Proto–Planetary Nebulae. I. The Extreme Bipolar Nebulae M2-9 and M1-91. *Robert W. Goodrich.* 366, 163, 3-B1 (1991)

Alphanumeric: M1-92

OH Emission and the Nature of Minkowski's Footprint (M1-92). *E. R. Seaquist, René Plume, & L. E. Davis.* 367, 200, 14-E5 (1991)

Alphanumeric: M2-9

Proto–Planetary Nebulae. I. The Extreme Bipolar Nebulae M2-9 and M1-91. *Robert W. Goodrich.* 366, 163, 3-B1 (1991)

Alphanumeric: M2-19

Two Planetary Nebulae in the Direction of the Galactic Center. *A. Gutiérrez-Moreno, H. Moreno, & G. Cortés.* 383, 174, 214-C1 (1991)

Alphanumeric: M2-56

Proto–Planetary Nebulae. II. The Shock-heated Bipolar Nebulae GL 618 and M2-56. *Robert W. Goodrich.* 376, 654, 134-D12 (1991)

Alphanumeric: M3-44

Two Planetary Nebulae in the Direction of the Galactic Center. *A. Gutiérrez-Moreno, H. Moreno, & G. Cortés.* 383, 174, 214-C1 (1991)

Alphanumeric: SN 1987A

Supernova Remnant 1987A. *Ding Luo & Richard McCray.* 372, 194, 76-D1 (1991)

The Circumstellar Shell of SN 1987A. *Ding Luo & Richard McCray.* 379, 659, 172-G9 (1991)

Alphanumeric: TMC-1

Detection of a New Carbon-Chain Molecule, CCO. *Masatoshi Ohishi, Hiroko Suzuki, Shin-ichi Ishikawa, Chikashi Yamada, Hideto Kanamori, William M. Irvine, Ronald D. Brown, Peter D. Godfrey, & Norio Kaifu.* 380, L39, 181-E11 (1991)

Alphanumeric: W3

Parsec-Scale Penetration of Ultraviolet Photons into Molecular Clouds: [C II] 158 Micron Mapping of W3, NGC 1977, and NGC 2023. *J. E. Howe, D. T. Jaffe, R. Genzel, & G. J. Stacey.* 373, 158, 88-A5 (1991)

Alphanumeric: W28

W28 and 3C 400.2: Two Shell-like Radio Supernova Remnants with Centrally Peaked X-Ray Morphologies. *Knox S. Long, William P. Blair, Richard L. White, & Yutaka Matsui.* 373, 567, 95-A10 (1991)

Alphanumeric: W49

A Simulation of the Collapse and Fragmentation of Cooling Molecular Clouds. *Joe J. Monaghan & John C. Lattanzio.* 375, 177, 113-C1 (1991)

Gravitational Fragmentation: A Comparison with W49A. *Eric R. Keto, John C. Lattanzio, & Joe J. Monaghan.* 383, 639, 222-B12 (1991)

Alphanumeric: W51

Pumping the Interstellar (6,3) Ammonia Maser. *Ronald D. Brown & Dinah M. Cragg.* 378, 445, 156-D10 (1991)

NEBULAE: INTERNAL MOTIONS

Proto–Planetary Nebulae. I. The Extreme Bipolar Nebulae M2-9 and M1-91. *Robert W. Goodrich.* 366, 163, 3-B1 (1991)

A Spectroscopic Study of the DR 21 Outflow Source. II. The Vibrational H_2 Line Emission. *R. P. Garden, T. R. Geballe, I. Gatley, & D. Nadeau.* 366, 474, 8-G1 (1991)

A Detailed Optical Study of Kepler's Supernova Remnant. *William P. Blair, Knox S. Long, & Olaf Vancura.* 366, 484, 9-A1 (1991)

Superbubble Blowout in the Giant H II Region NGC 2363? *Jean-René Roy, J. Boulesteix, Gilles Joncas, & B. Grundseth.* 367, 141, 13-F8 (1991)

OH Emission and the Nature of Minkowski's Footprint (M1-92). *E. R. Seaquist, René Plume, & L. E. Davis.* 367, 200, 14-E5 (1991)

The Structure and Kinematics of Bipolar Outflows: Observations and Models of the Monoceros R2 Outflow. *Barry A. Meyers-Rice & Charles J. Lada.* 368, 445, 30-E10 (1991)

Star Formation and the Nature of Bipolar Outflows. *Frank H. Shu, Steven P. Ruden, Charles J. Lada, & Susana Lizano.* 370, L31, 53-E1 (1991)

The Spectral Signatures of Collapse and Outflow around Young Stars. *E. R. Keto.* 371, 163, 62-B3 (1991)

Episodic Outflows from High-Mass Protostars. *G. F. Mitchell, J.-P. Maillard, & T. I. Hasegawa.* 371, 342, 64-D1 (1991)

The Dynamics and Physical Properties of the Cometary Nebula G29.96−0.02. *Douglas O. S. Wood & Ed Churchwell.* 372, 199, 76-D8 (1991)

Molecular Outflows in the L1641 Region of Orion. *James A. Morgan & John Bally.* 372, 505, 82-B1 (1991)

CS Multitransitional Studies of Density Distribution in Star-forming Regions. I. The NGC 2071 Region. *Shudong Zhou, Neal J. Evans II, Rolf Güsten, Lee G. Mundy, & Marc L. Kutner.* 372, 518, 82-C1 (1991)

Dynamical Evolution and Molecular Abundances of Interstellar Clouds. *Sheo S. Prasad, Karen R. Heere, & Shankar P. Tarafdar.* 373, 123, 87-E5 (1991)

A Second Outflow from L1551/IRS 5? *G. H. Moriarty-Schieven & P. G. Wannier.* 373, L23, 91-C8 (1991)

W28 and 3C 400.2: Two Shell-like Radio Supernova Remnants with Centrally Peaked X-Ray Morphologies. *Knox S. Long, William P. Blair, Richard L. White, & Yutaka Matsui.* 373, 567, 95-A10 (1991)

Observations of HCO^+ in B335. *Tatsuhiko I. Hasegawa, C. Rogers, & Saeko Suzuki Hayashi.* 374, 177, 100-C1 (1991)

Changes in the Optical Remnant of Kepler's Supernova during the Period 1942–1989. *Rino Bandiera & Sidney van den Bergh.* 374, 186, 100-C11 (1991)

A Spectroscopic Study of the DR 21 Outflow Source. III. The CO Line Emission. *R. P. Garden, M. Hayashi, I. Gatley, T. Hasegawa, & N. Kaifu.* 374, 540, 105-G11 (1991)

Spectroscopic Study of Direct and Dust-scattered Line Emission in the HH 1–HH 2 System. *J. Solf & K.-H. Böhm.* 375, 618, 120-D3 (1991)

The Smoothness of CO Line Profiles in Orion: Implications for Clumpiness. *Jan A. Tauber, Paul F. Goldsmith, & Robert L. Dickman.* 375, 635, 120-E7 (1991)

Six Balmer-dominated Supernova Remnants. *R. Chris Smith, Robert P. Kirshner, William P. Blair, & P. Frank Winkler.* 375, 652, 120-G1 (1991)

Anatomy of the Barnard 5 Core. *G. A. Fuller, P. C. Myers, W. J. Welch, P. F. Goldsmith, W. D. Langer, B. G. Campbell, S. Guilloteau, & R. W. Wilson.* 376, 135, 126-E10 (1991)

The Multiple-Shell Structure of the Planetary Nebula NGC 6751. *You-Hua Chu, Arturo Manchado, George H. Jacoby, & Karen B. Kwitter.* 376, 150, 126-F13 (1991)

Molecular Observations of the L723 Region: Interaction between the Clumpy Outflow and the Gaseous Core? *Saeko S. Hayashi, Tetsuo Hasegawa, & Norio Kaifu.* 377, 492, 145-G5 (1991)

U-shaped Outflow in the Lynds 1221 Dark Cloud: An Example of Interaction of Outflows with Ambient Molecular Clouds. *Tomofumi Umemoto, Naomi Hirano, Osamu Kameya, Yasuo Fukui, Nario Kuno, & Keiya Takakubo.* 377, 510, 146-A13 (1991)

Kinematical Models of Maser Shells Formed by Aspherical Stellar Outflows (U Orionis; OH 231.8+4.2; Orion-IRc2). *P. F. Bowers.* 76, 1099, 40-G9 (1991)

The Velocity Dispersion of Giant Molecular Clouds. II. Mathematical and Numerical Refinements. *Charles F. Gammie, Jeremiah P. Ostriker, & Chanda J. Jog.* 378, 565, 159-D5 (1991)

SiS in Outflow Regions: More High-Temperature Silicon Chemistry. *L. M. Ziurys.* 379, 260, 166-C7 (1991)

CO J = 3–2 and J = 2–1 Observations of NGC 7027. *P. A. Jaminet, W. C. Danchi, E. C. Sutton, A. P. G. Russell, Göran Sandell, J. H. Bieging, & D. Wilner.* 380, 461, 184-A4 (1991)

X Marks the Spot: Distribution and Excitation of Unidentified Molecules in the Red Rectangle. *Gary D. Schmidt & Adolf N. Witt.* 383, 698, 222-G12 (1991)

Two New Molecular Outflows in L1551? *Marc W. Pound & John Bally.* 383, 705, 223-A7 (1991)

NEBULAE: ORION NEBULA

Water Vapor in the Orion Molecular Cloud. *R. F. Knacke & H. P. Larson.* 367, 162, 14-A10 (1991)

Fossil DCN in Orion-KL. *Jeffrey G. Mangum, Richard L. Plambeck, & Alwyn Wootten.* 369, 169, 38-A11 (1991)

Ionization Fronts and Shocked Flows: The Structure of the Orion Nebula at 0.1″. *J. Jeff Hester, R. Gilmozzi, C. R. O'Dell, S. M. Faber, Bel Campbell, Arthur Code, Douglas G. Currie, G. Edward Danielson, S. P. Ewald, Edward J. Groth, Jon A. Holtzman, T. Kelsall, Tod R. Lauer, Robert M. Light, Roger Lynds, Earl J. O'Neil, Jr., Edward J. Shaya, & James A. Westphal.* 369, L75, 46-C7 (1991)

Polarimetric Mapping of Orion Using MILLIPOL: Magnetic Activity in BN/KL. *Robert W. Leach, Dan P. Clemens, Brian D. Kane, & Richard Barvainis.* 370, 257, 50-D1 (1991)

N_2H^+ in Orion: Chemical Clues to the Dynamics of the Quiescent Gas. *M. Womack, L. M. Ziurys, & S. Wyckoff.* 370, L99, 59-F1 (1991)

Detection of Low-J Pure-Rotational Emission from H_2 in the Orion Bar Region: Evidence for Small-Scale Clumpiness. *Parvinder S. Parmar, John H. Lacy, & Jeffrey M. Achtermann.* 372, L25, 79-D1 (1991)

Observations of [Si II] (35 Micron) and [S I] (25 Micron) in Orion: Evidence for a Wind Shock near IRc2. *Michael R. Haas, David Hollenbach, & Edwin F. Erickson.* 374, 555, 106-B1 (1991)

Axisymmetric Model of the Ionized Gas in the Orion Nebula. *R. H. Rubin, J. P. Simpson, M. R. Haas, & E. F. Erickson.* 374, 564, 106-B12 (1991)

Physical Conditions in the Orion Nebula and an Assessment of Its Helium Abundance. *Jack A. Baldwin, Gary J. Ferland, P. G. Martin, Michael R. Corbin, Stephen A. Cota, Bradley M. Peterson, & Arne Slettebak.* 374, 580, 106-D1 (1991)

A Molecular Line Survey of Sagittarius B2 and Orion–KL from 70 to 115 GHz. II. Analysis of the Data. *B. E. Turner.* 76, 617, 33-D1 (1991)

Molecular Hydrogen Polarization Images of OMC-1. *Michael G. Burton, N. R. Minchin, J. H. Hough, C. Aspin, D. J. Axon, & J. A. Bailey.* 375, 611, 120-C9 (1991)

The Optical Depth of the 158 Micron [^{12}C II] Line: Detection of the $F = 1 \rightarrow 0$ [^{13}C II] Hyperfine-Structure Component. *G. J. Stacey, C. H. Townes, A. Poglitsch, S. C. Madden, J. M. Jackson, F. Herrmann, R. Genzel, & N. Geis.* 382, L37, 205-E1 (1991)

NEBULAE: PLANETARY

Proto–Planetary Nebulae. I. The Extreme Bipolar Nebulae M2-9 and M1-91. *Robert W. Goodrich.* 366, 163, 3-B1 (1991)

Photoionization Modeling of Magellanic Cloud Planetary Nebulae. I. *M. A. Dopita & S. J. Meatheringham.* 367, 115, 13-D6 (1991)

NGC 6302: Ionized by a Very Hot Star or by a Wind? *N. J. Lame & G. J. Ferland.* 367, 208, 14-F1 (1991)

Emission Features in the Spectrum of NGC 7027 near 3.3 Microns at Very High Resolution. *R. P. Lowe, J. M. Moorhead, W. H. Wehlau, & J.-P. Maillard.* 368, 195, 25-E1 (1991)

The Dynamic Instability of Adiabatic Blast Waves. *Dongsu Ryu & Ethan T. Vishniac.* 368, 411, 30-B12 (1991)

Near-Infrared Spectroscopy of the Planetary Nebula NGC 6572. *Richard J. Rudy, George S. Rossano, Peter Erwin, & R. C. Puetter.* 368, 468, 30-G13 (1991)

Relative Populations for Levels in the $3d^2$ Ground Configuration of Fe VII. *F. P. Keenan & P. H. Norrington.* 368, 486, 31-B7 (1991)

Optical Spectroscopy of Magellanic Cloud Planetary Nebulae. I. *Stephen J. Meatheringham & Michael A. Dopita.* 75, 407, 6-C9 (1991)

The Infrared Properties of Compact Galactic Radio Sources: The Young and the Restless. *Richard L. White, Robert H. Becker, & David J. Helfand.* 371, 148, 62-A1 (1991)

The Ionization Structure of Planetary Nebulae. X. NGC 2392. *Timothy Barker.* 371, 217, 62-G5 (1991)

Echelle Spectroscopy of CD −41° 13967: The Young Central Star of a New Planetary Nebula. *James K. McCarthy, R. Michael Rich, S. R. Becker, K. Butler, D. Husfeld, & H. G. Groth.* 371, 380, 64-G1 (1991)

The Carbon-rich Proto–Planetary Nebula IRAS 22272+5435. *Bruce J. Hrivnak & Sun Kwok.* 371, 631, 69-D6 (1991)

Ne V in Planetary Nebulae. *F. P. Keenan, V. M. Burke, & K. M. Aggarwal.* 371, 636, 69-D13 (1991)

Nitrogen Abundances in Carbon-rich Stars That Are Progenitors to Planetary Nebulae. *M. Jura.* 372, 208, 76-E7 (1991)

Central Star Temperatures of Low-Excitation Planetary Nebulae. *James B. Kaler & George H. Jacoby.* 372, 215, 76-F1 (1991)

Ultraviolet High-Excitation Fe II Fluorescence Lines Excited by O VI, C IV, and H I Resonance Emission As Seen in *IUE* Spectra. *Walter A. Feibelman, Frederick C. Bruhweiler, & Sveneric Johansson.* 373, 649, 96-A8 (1991)

Spatial Studies of Planetary Nebulae with *IRAS*. *G. W. Hawkins & B. Zuckerman.* 374, 227, 100-G11 (1991)

LMC SMP 64: The Youngest Planetary Nebula? *M. A. Dopita & S. J. Meatheringham.* 374, L21, 103-E1 (1991)

Chemical Abundances in Planetary Nebulae: Basic Data and Correlations between Elements. *M. Perinotto.* 76, 687, 34-C9 (1991)

Near-Infrared Emission of Neutral Carbon from Photon-dominated Regions. *V. Escalante, A. Sternberg, & A. Dalgarno.* 375, 630, 120-E1 (1991)

The Multiple-Shell Structure of the Planetary Nebula NGC 6751. *You-Hua Chu, Arturo Manchado, George H. Jacoby, & Karen B. Kwitter.* 376, 150, 126-F13 (1991)

The Spectrum of NGC 7027 from 3080 to 2630 Wavenumbers (3.25–3.80 Microns): Detection of New Atomic and Molecular Hydrogen Lines and New Constraints on the Chemical Sidegroups on Polycyclic Aromatic Hydrocarbons. *Scott A. Sandford.* 376, 599, 133-G1 (1991)

Proto–Planetary Nebulae. II. The Shock-heated Bipolar Nebulae GL 618 and M2-56. *Robert W. Goodrich.* 376, 654, 134-D12 (1991)

Neutral Oxygen in Planetary Nebulae: Probing Radiative Transfer and Nebular Structure. *Michael G. Richer, Marshall L. McCall, & Peter G. Martin.* 377, 210, 140-E1 (1991)

Ultraviolet Fe VII Absorption and Fe II Emission Lines of Central Stars of Planetary Nebulae. *Kwang-Ping Cheng, Walter A. Feibelman, & Frederick C. Bruhweiler.* 377, 235, 140-G7 (1991)

Photoionization Modeling of Magellanic Cloud Planetary Nebulae. II. *M. A. Dopita & S. J. Meatheringham.* 377, 480, 145-F6 (1991)

Optical Spectroscopy of Magellanic Cloud Planetary Nebulae. II. *Stephen J. Meatheringham & Michael A. Dopita.* 76, 1085, 40-F7 (1991)

High-Resolution Radio Continuum Observations of Compact Planetary Nebulae. *O. B. Aaquist & Sun Kwok.* 378, 599, 159-G1 (1991)

A Grain-heated, Dusty Planetary Nebula in M22. *Kazimierz J. Borkowski & J. Patrick Harrington.* 379, 168, 165-B1 (1991)

The Molecular Envelope of NGC 7027. *John H. Bieging, David Wilner, & Harley A. Thronson, Jr.* 379, 271, 166-D9 (1991)

The 0.46–1.3 Micron Spectrum of the Planetary Nebula BD +30°3639. *Richard J. Rudy, Ross D. Cohen, George S. Rossano, Peter Erwin, R. C. Puetter, & David K. Lynch.* 380, 151, 178-A1 (1991)

CO $J = 3$–2 and $J = 2$–1 Observations of NGC 7027. *P. A. Jaminet, W. C. Danchi, E. C. Sutton, A. P. G. Russell, Göran Sandell, J. H. Bieging, & D. Wilner.* 380, 461, 184-A4 (1991)

Core Masses and Abundances of Low-Excitation Planetary Nebulae in the Magellanic Clouds. *James B. Kaler & George H. Jacoby.* 382, 134, 201-G7 (1991)

Deep VLA Images of Globular Clusters. *Helen M. Johnston, Shrinivas R. Kulkarni, & W. M. Goss.* 382, L89, 211-D11 (1991)

Two Planetary Nebulae in the Direction of the Galactic Center. *A. Gutiérrez-Moreno, H. Moreno, & G. Cortés.* 383, 174, 214-C1 (1991)

Planetary Nebulae as Standard Candles. VII. A Test versus Hubble Type in the NGC 1023 Group. *Robin Ciardullo, George H. Jacoby, & William E. Harris.* 383, 487, 220-D1 (1991)

About the Stage of Evolution of Wolf-Rayet Stars. *Anne B. Underhill.* 383, 729, 223-C6 (1991)

NEBULAE: REFLECTION

IRAS 23545+6508, a Dissociating Star: Prototype for a New Observational Class? *P. E. Dewdney, R. S. Roger, C. R. Purton, & W. H. McCutcheon.* 370, 243, 50-C1 (1991)

Emission from Dust in Visual Reflection Nebulae at Infrared and Submillimeter Wavelengths. *Sean C. Casey.* 371, 183, 62-D1 (1991)

Two Micron Morphology of Candidate Protostars. *Motohide Tamura, Ian Gatley, William Waller, & Michael W. Werner.* 374, L25, 103-E7 (1991)

Infrared Polarization Images of Star-forming Regions. I. The Ubiquity of Bipolar Structure. *M. Tamura, Ian Gatley, R. R. Joyce, M. Ueno, H. Suto, & M. Sekiguchi.* 378, 611, 160-A1 (1991)

X Marks the Spot: Distribution and Excitation of Unidentified Molecules in the Red Rectangle. *Gary D. Schmidt & Adolf N. Witt.* 383, 698, 222-G12 (1991)

NEBULAE: STRUCTURE

Proto–Planetary Nebulae. I. The Extreme Bipolar Nebulae M2-9 and M1-91. *Robert W. Goodrich.* 366, 163, 3-B1 (1991)

Far-Infrared Observations and the Structure of Wolf-Rayet Ring Nebulae. *A. P. Marston.* 366, 181, 3-C9 (1991)

Faraday Rotation and Physical Conditions in the Crab Nebula. *M. F. Bietenholz & P. P. Kronberg.* 368, 231, 26-A1 (1991)

An Unbiased Survey for Dense Cores in the Lynds 1630 Molecular Cloud. *Elizabeth A. Lada, John Bally, & Antony A. Stark.* 368, 432, 30-D9 (1991)

Observations of ^{12}CO and ^{13}CO $J = 9$–8 in Galactic Molecular Clouds. *R. T. Boreiko & A. L. Betz.* 369, 382, 42-E1 (1991)

Ionization Fronts and Shocked Flows: The Structure of the Orion Nebula at 0.1″. *J. Jeff Hester, R. Gilmozzi, C. R. O'Dell, S. M. Faber, Bel Campbell, Arthur Code, Douglas G. Currie, G. Edward Danielson, S. P. Ewald, Edward J. Groth, Jon A. Holtzman, T. Kelsall, Tod R. Lauer, Robert M. Light, Roger Lynds, Earl J. O'Neil, Jr., Edward J. Shaya, & James A. Westphal.* 369, L75, 46-C7 (1991)

An X-Ray Image of the Violent Interstellar Medium in 30 Doradus. *Q. Wang & D. J. Helfand.* 370, 541, 55-B9 (1991)

Narrow-Band Imaging of the Inner R Aquarii Nebula: Further Evidence for Shock Excitation. *Denis Burgarella & Francesco Paresce.* 370, 590, 55-G1 (1991)

New Clues to the Cassiopeia A Supernova Progenitor. *Robert A. Fesen & Robert H. Becker.* 371, 621, 69-C4 (1991)

CS Multitransitional Studies of Density Distribution in Star-forming Regions. I. The NGC 2071 Region. *Shudong Zhou, Neal J. Evans II, Rolf Güsten, Lee G. Mundy, & Marc L. Kutner.* 372, 518, 82-C1 (1991)

Dynamical Evolution and Molecular Abundances of Interstellar Clouds. *Sheo S. Prasad, Karen R. Heere, & Shankar P. Tarafdar.* 373, 123, 87-E5 (1991)

Probing the Core of Cepheus A: Millimeter and Submillimeter Observations. *G. H. Moriarty-Schieven, R. L. Snell, & V. A. Hughes.* 374, 169, 100-B3 (1991)

Observations of HCO^+ in B335. *Tatsuhiko I. Hasegawa, C. Rogers, & Saeko Suzuki Hayashi.* 374, 177, 100-C1 (1991)

A New Look at the "Jet" in the CTB 37A/B Supernova Remnant Complex. *Namir E. Kassim, Stefi A. Baum, & Kurt W. Weiler.* 374, 212, 100-F9 (1991)

Axisymmetric Model of the Ionized Gas in the Orion Nebula. *R. H. Rubin, J. P. Simpson, M. R. Haas, & E. F. Erickson.* 374, 564, 106-B12 (1991)

A Simulation of the Collapse and Fragmentation of Cooling Molecular Clouds. *Joe J. Monaghan & John C. Lattanzio.* 375, 177, 113-C1 (1991)

Spectroscopic Study of Direct and Dust-scattered Line Emission in the HH 1–HH 2 System. *J. Solf & K.-H. Böhm.* 375, 618, 120-D3 (1991)

Anatomy of the Barnard 5 Core. *G. A. Fuller, P. C. Myers, W. J. Welch, P. F. Goldsmith, W. D. Langer, B. G. Campbell, S. Guilloteau, & R. W. Wilson.* 376, 135, 126-E10 (1991)

The Multiple-Shell Structure of the Planetary Nebula NGC 6751. *You-Hua Chu, Arturo Manchado, George H. Jacoby, & Karen B. Kwitter.* 376, 150, 126-F13 (1991)

Dense Cores in Dark Clouds. VI. Shapes. *P. C. Myers, G. A. Fuller, A. A. Goodman, & P. J. Benson.* 376, 561, 133-D1 (1991)

Neutral Oxygen in Planetary Nebulae: Probing Radiative Transfer and Nebular Structure. *Michael G. Richer, Marshall L. McCall, & Peter G. Martin.* 377, 210, 140-E1 (1991)

Ultraviolet and Optical Spectroscopy of the R Aquarii Symmetrical Jet. *J. M. Hollis, R. J. Oliversen, M. Kafatos, A. G. Michalitsianos, & R. M. Wagner.* 377, 227, 140-F11 (1991)

The Edges of Molecular Clouds: Fractal Boundaries and Density Structure. *E. Falgarone, T. G. Phillips, & C. K. Walker.* 378, 186, 153-C8 (1991)

High-Resolution Radio Continuum Observations of Compact Planetary Nebulae. *O. B. Aaquist & Sun Kwok.* 378, 599, 159-G1 (1991)

Infrared Polarization Images of Star-forming Regions. I. The Ubiquity of Bipolar Structure. *M. Tamura, Ian Gatley, R. R. Joyce, M. Ueno, H. Suto, & M. Sekiguchi.* 378, 611, 160-A1 (1991)

The Collimation of a Time-dependent Stellar Wind. *S.-H. Kim & A. C. Raga.* 379, 689, 173-C4 (1991)

Radial Dust Density Profiles in Small Molecular Clouds. *João Lin Yun & Dan P. Clemens.* 381, 474, 196-E7 (1991)

A Study of ^{13}CO Cloud Cores in Ophiuchus. *S. Nozawa, A. Mizuno, Y. Teshima, H. Ogawa, & Y. Fukui.* 77, 647, 53-E6 (1991)

NEBULAE: SUPERNOVA REMNANTS

A Detailed Optical Study of Kepler's Supernova Remnant. *William P. Blair, Knox S. Long, & Olaf Vancura.* 366, 484, 9-A1 (1991)

The Proper Motion of the Soft X-Ray–emitting Radio Pulsar PSR 0656+14. *R. J. Thompson, Jr., F. A. Córdova, R. M. Hjellming, & E. B. Fomalont.* 366, L83, 11-E1 (1991)

Simulations of the Supernova-dominated Interstellar Medium in Disk Galaxies. *Denis F. Cioffi & J. Michael Shull.* 367, 96, 13-B13 (1991)

An Infrared Analysis of Puppis A. *Richard G. Arendt, Eli Dwek, & Robert Petre.* 368, 474, 31-A7 (1991)

Magnetic Focusing of Precessing Jets. *Christopher S. Kochanek.* 371, 289, 63-F7 (1991)

The Young Supernova Remnants N132D and 1E 0102.2−7219: Limits on the Presence of Rapidly Moving Sulfur. *Barry M. Lasker & David A. Golimowski.* 371, 568, 68-E8 (1991)

New Clues to the Cassiopeia A Supernova Progenitor. *Robert A. Fesen & Robert H. Becker.* 371, 621, 69-C4 (1991)

Supernova Remnant 1987A. *Ding Luo & Richard McCray.* 372, 194, 76-D1 (1991)

Spectra of Two Very Old Supernovae: SN 1986J and SN 1980K. *Bruno Leibundgut, Robert P. Kirshner, Philip A. Pinto, Michael P. Rupen, R. Chris Smith, James E. Gunn, & Donald P. Schneider.* 372, 531, 82-D1 (1991)

Discovery of a Young, 267 Millisecond Pulsar in the Supernova Remnant W44. *A. Wolszczan, J. M. Cordes, & R. J. Dewey.* 372, L99, 85-F1 (1991)

Relativistic Electron Populations in Cassiopeia A. *M. Anderson, L. Rudnick, P. Leppik, R. Perley, & R. Braun.* 373, 146, 87-G4 (1991)

The Detection of X-Ray Emission from the OB Associations of the Large Magellanic Cloud. *Q. Wang & D. J. Helfand.* 373, 497, 94-B7 (1991)

Supernova Remnant Evolution in an Interstellar Medium with Evaporating Clouds. *Richard L. White & Knox S. Long.* 373, 543, 94-F7 (1991)

W28 and 3C 400.2: Two Shell-like Radio Supernova Remnants with Centrally Peaked X-Ray Morphologies. *Knox S. Long, William P. Blair, Richard L. White, & Yutaka Matsui.* 373, 567, 95-A10 (1991)

The Expansion of the Crab Nebula. *M. F. Bietenholz, P. P. Kronberg, D. E. Hogg, & A. S. Wilson.* 373, L59, 97-D5 (1991)

Changes in the Optical Remnant of Kepler's Supernova during the Period 1942–1989. *Rino Bandiera & Sidney van den Bergh.* 374, 186, 100-C11 (1991)

Far-Ultraviolet Mapping of the Cygnus Loop with the *Voyager 2* Ultraviolet Spectrometer. *William P. Blair, Knox S. Long, Olaf Vancura, & J. B. Holberg.* 374, 202, 100-E5 (1991)

A New Look at the "Jet" in the CTB 37A/B Supernova Remnant Complex. *Namir E. Kassim, Stefi A. Baum, & Kurt W. Weiler.* 374, 212, 100-F9 (1991)

HEAO 1 A-2 Low-Energy Detector X-Ray Spectra of the Lupus Loop and SN 1006. *D. A. Leahy, J. Nousek, & A. J. S. Hamilton.* 374, 218, 100-G1 (1991)

Six Balmer-dominated Supernova Remnants. *R. Chris Smith, Robert P. Kirshner, William P. Blair, & P. Frank Winkler.* 375, 652, 120-G1 (1991)

Does the Vela Pulsar Have "Wisps"? *M. F. Bietenholz, D. A. Frail, & T. H. Hankins.* 376, L41, 137-C1 (1991)

A Statistical Study of the Correlation of Galactic Supernova Remnants and Spiral Arms. *Zongwei Li, J. Craig Wheeler, Frank N. Bash, & W. H. Jefferys.* 378, 93, 152-B9 (1991)

Cosmic-Ray Transport and Gamma-Ray Emission in Supernova Shells. *A. K. Harding, A. Mastichiadis, R. J. Protheroe, & A. P. Szabo.* 378, 163, 153-A9 (1991)

The O VII Soft X-Ray Spectrum and Its Application to Hot Plasmas in Astrophysics. *A. H. Gabriel, F. Bely-Dubau, P. Faucher, & L. W. Acton.* 378, 438, 156-D1 (1991)

Variable Interstellar Absorption toward HD 72127A. II. 1981–1988. *L. M. Hobbs, R. Ferlet, D. E. Welty, & G. Wallerstein.* 378, 586, 159-F1 (1991)

The Radio Recovery of SN 1970G in M101. *John J. Cowan, W. M. Goss, & R. A. Sramek.* 379, L49, 175-B5 (1991)

The 10 Year Radio Light Curves for SN 1979C. *Kurt W. Weiler, Schuyler D. Van Dyk, Nino Panagia, Richard A. Sramek, & Jennifer L. Discenna.* 380, 161, 178-B1 (1991)

A Survey of H I 21 Centimeter Emission Lines toward Supernova Remnants. *Bon-Chul Koo & Carl Heiles.* 382, 204, 202-F11 (1991)

Electron Acceleration in a Nonlinear Shock Model with Applications to Supernova Remnants. *Donald C. Ellison & Stephen P. Reynolds.* 382, 242, 203-C1 (1991)

Evidence for a Thermally Unstable Shock Wave in the Vela Supernova Remnant. *John C. Raymond, George Wallerstein, & Bruce Balick.* 383, 226, 214-G5 (1991)

Forbidden Iron Emission on the North Rim of IC 443. *Richard G. Teske.* 383, 233, 215-A1 (1991)

Magnetized Supernova Remnants with Cosmic Rays. *Katia M. Ferrière & Ellen G. Zweibel.* 383, 602, 221-F11 (1991)

Supernova Remnants in Dense Clouds. I. Blast-Wave Dynamics and X-Ray Irradiation. *B. T. Draine & D. T. Woods.* 383, 621, 222-A6 (1991)

A Kinematic and Proper-Motion Survey of the Cygnus Loop. *Peter Shull, Jr., & Hans Hippelein.* 383, 714, 223-B3 (1991)

NEUTRINOS

Hollow Galactic Halos of Fermionic Dark Matter. *John P. Ralston & Lesley L. Smith.* 367, 54, 12-F4 (1991)

Zero Central Density Solutions of the Anisotropic Jeans Equation and Neutrino Dark Matter. *Jes Madsen.* 367, 507, 19-F1 (1991)

Neutrino Oscillations and the Leptonic Charge of the Universe. *Martin J. Savage, Robert A. Malaney, & George M. Fuller.* 368, 1, 23-B1 (1991)

Window for the Dark Matter Solution to the Solar Neutrino Problem. *David Dearborn, Kim Griest, & Georg Raffelt.* 368, 626, 33-A1 (1991)

Solar-Cycle Modulation of Event Rates in the Chlorine Solar Neutrino Experiment. *John N. Bahcall & William H. Press.* 370, 730, 57-E1 (1991)

Numerical Solution of the General Relativistic Boltzmann Equation for Massive and Massless Particles. *Hugh Harleston & Katherine A. Holcomb.* 372, 225, 76-F13 (1991)

Oscillations of Rotating Neutron Stars. *Tod E. Strohmayer.* 372, 573, 82-G5 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

Voids in a Neutrino-dominated Universe. *Ning Zeng & Simon D. M. White.* 374, 1, 98-B1 (1991)

High-Temperature Neutrino-Nucleus Processes in Stellar Collapse. *George M. Fuller & Bradley S. Meyer.* 376, 701, 135-A12 (1991)

Does the Solar Interior Rotate Rigidly? *Andrew Gould.* 377, 707, 148-D7 (1991)

Neutrino Oscillations and Solar Models. *C.-X. Chen & M. L. Cherry.* 377, L105, 150-F5 (1991)

Neutrino-heated Stars and Broad-Line Emission from Active Galactic Nuclei. *James MacDonald, Todor Stanev, & Peter L. Biermann.* 378, 30, 151-D4 (1991)

A Critical Look at Cosmions. *Jean Kaplan, François Martin de Volnay, Charling Tao, & Sylvaine Turck-Chièze.* 378, 315, 154-G11 (1991)

Vacuum Ultraviolet Imagery of the Virgo Cluster Region. III. Diffuse Far-Ultraviolet Radiation at High Galactic Latitudes. *Takashi Onaka & Keiichi Kodaira.* 379, 532, 171-C5 (1991)

Search for High-Energy Neutrinos from Celestial Sources in the Kolar Gold Fields Experiment. *H. Adarkar, S. R. Dugad, Y. Hayashi, N. Ito, S. Kawakami, M. R. Krishnaswamy, M. G. K. Menon, S. Miyake, N. K. Mondal, T. Nakamura, V. S. Narasimham, B. V. Sreekantan, & K. Tanaka.* 380, 235, 179-A1 (1991)

Large Solar Flares: Analysis of the Events Recorded by the Mont Blanc Neutrino Detector. *M. Aglietta, G. Badino, G. Bologna, C. Castagnoli, A. Castellina, V. L. Dadykin, W. Fulgione, P. Galeotti, F. F. Kalchukov, I. V. Korolkova, P. V. Kortchaguin, V. A. Kudryavtsev, A. S. Malguin, L. Periale, V. G. Ryassny, O. G. Ryazhskaya, O. Saavedra, G. Trinchero, S. Vernetto, V. F. Yakushev, & G. T. Zatsepin.* 382, 344, 204-D9 (1991)

Signatures of Cosmic-Ray Interactions on the Solar Surface. *D. Seckel, Todor Stanev, & T. K. Gaisser.* 382, 652, 209-F8 (1991)

Spectral Signatures of the MeV–PeV Radiation from Accreting Neutron Stars. *B. Rudak & P. Mészáros.* 383, 269, 215-E3 (1991)

NUCLEAR REACTIONS

The *s*-Process Branchings at ^{185}W and ^{186}Re. *F. Käppeler, S. Jaag, Z. Y. Bao, & G. Reffo.* 366, 605, 10-E5 (1991)

s-Process Nucleosynthesis in Massive Stars and the Weak Component. I. Evolution and Neutron Captures in a 25 $M_{\odot}$ Star. *C. M. Raiteri, M. Busso, R. Gallino, G. Picchio, & L. Pulone.* 367, 228, 14-G13 (1991)

Cold Nuclear Fusion in Dense Metallic Hydrogen. *Charles J. Horowitz.* 367, 288, 15-E13 (1991)

^{57}Co and ^{44}Ti Production in SN 1987A. *S. E. Woosley & Robert D. Hoffman.* 368, L31, 35-B10 (1991)

Nuclear Reaction Rates in Dense Carbon-Oxygen Mixtures. *Shuji Ogata, Hiroshi Iyetomi, & Setsuo Ichimaru.* 372, 259, 77-B9 (1991)

Measurement of the Neutron Capture Rate of the ^{12}C(n,γ)^{13}C Reaction at Stellar Energy. *Y. Nagai, M. Igashira, K. Takeda, N. Mukai, S. Motoyama, F. Uesawa, H. Kitazawa, & T. Fukuda.* 372, 683, 84-B7 (1991)

Photoerosion and the Abundances of ^{7}Li, ^{9}Be, ^{10}B, and ^{11}B near Active Galactic Nuclei. *R. N. Boyd & H. S. Fencl.* 373, 84, 87-A13 (1991)

A New Site for the Astrophysical Gamma-Process. *W. Michael Howard, Bradley S. Meyer, & S. E. Woosley.* 373, L5, 91-B1 (1991)

Thermonuclear Reactions in Dense Stellar Matter: Electron Screening Revisited. *Setsuo Ichimaru & Shuji Ogata.* 374, 647, 107-B5 (1991)

Capture Cross Section Measurements of Krypton and Xenon Isotopes and the Fundamental Parameters of the *s*-Process. *Hermann Beer.* 375, 823, 122-G7 (1991)

Neutrino-Nucleus Interactions in Core-Collapse Supernovae. *Stephen W. Bruenn & W. C. Haxton.* 376, 678, 134-G1 (1991)

High-Temperature Neutrino-Nucleus Processes in Stellar Collapse. *George M. Fuller & Bradley S. Meyer.* 376, 701, 135-A12 (1991)

The ^{54}Mn Clock and Its Implications for Cosmic-Ray Propagation and Fe Isotope Studies. *J. E. Grove, B. T. Hayes, R. A. Mewaldt, & W. R. Webber.* 377, 680, 148-B3 (1991)

An Analytical Formulation of the Double-Pulse *s*-Process Model. *Hermann Beer.* 379, 409, 168-B1 (1991)

A Measurement of the ^{22}Ne(n,γ)^{23}Ne Capture Cross Section at a Stellar Temperature of kT = 25 keV. *Hermann Beer, G. Rupp, F. Voss, & F. Käppeler.* 379, 420, 168-C1 (1991)

On the Sodium Excess in the Atmospheres of Yellow Supergiants. *N. Prantzos, A. Coc, & J. P. Thibaud.* 379, 729, 173-G1 (1991)

Capture Rate of the ^{7}Li(n,γ)^{8}Li Reaction by Prompt Gamma-Ray Detection. *Y. Nagai, M. Igashira, N. Mukai, T. Ohsaki, F. Uesawa, K. Takeda, T. Ando, H. Kitazawa, S. Kubono, & T. Fukuda.* 381, 444, 196-C1 (1991)

Barrier Penetration at Astrophysical Energies. *N. Rowley & A. C. Merchant.* 381, 591, 198-B1 (1991)

NUCLEAR REACTIONS, NUCLEOSYNTHESIS, ABUNDANCES

The Fate of Accreted CNO Elements in Neutron Star Atmospheres: X-Ray Bursts and Gamma-Ray Lines. *Lars Bildsten, Edwin E. Salpeter, & Ira Wasserman.* 384, 143, 2-G1 (1992)

Abundances of the Heavy Elements in the Magellanic Clouds. III. Interpretation of Results. *Stephen C. Russell & Michael A. Dopita.* 384, 508, 8-D9 (1992)

The Energy Sources Powering the Late-Time Bolometric Evolution of SN 1987A. *Nicholas B. Suntzeff, M. M. Phillips, J. H. Elias, D. L. DePoy, & A. R. Walker.* 384, L33, 11-B6 (1992)

Thermal Evolution of Phases during the Cosmological Quark-Hadron Transition. *Michele Mariani & Silvio A. Bonometto.* 385, 393, 18-B5 (1992)

Possible Models for the Type Ia Supernova 1990N. *Toshikazu Shigeyama, Ken'ichi Nomoto, Hitoshi Yamaoka, & Friedrich-Karl Thielemann.* 386, L13, 29-C1 (1992)

The Evolution through H and He Burning of Galactic Cluster Stars. *Vittorio Castellani, Alessandro Chieffi, & Oscar Straniero.* 78, 517, 9-G11 (1992)

Evolution of Spiral Galaxies. I. Halo-Disk Connection for the Evolution of the Solar Neighborhood. *Federico Ferrini, Francesca Matteucci, Chiara Pardi, & Umberto Penco.* 387, 138, 38-F5 (1992)

A Measurement of the ^{14}C(n,γ)^{15}C Cross Section at a Stellar Temperature of kT = 23.3 keV. *Hermann Beer, M. Wiescher, F. Käppeler, J. Görres, & P. E. Koehler.* 387, 258, 40-B8 (1992)

s-Processing in Massive Stars as a Function of Metallicity and Interpretation of Observational Trends. *C. M. Raiteri, R. Gallino, & M. Busso.* 387, 263, 40-C1 (1992)

HEAO 3 Limits on the ^{44}Ti Yield in Galactic Supernovae. *W. A. Mahoney, J. C. Ling, W. A. Wheaton, & J. C. Higdon.* 387, 314, 40-G5 (1992)

Evolution of Beryllium Abundances in the Galactic Halo. *Sean G. Ryan, John E. Norris, M. S. Bessell, & Constantine P. Deliyannis.* 388, 184, 51-C6 (1992)

Cosmological Density of WIMPs from Solar and Terrestrial Annihilations. *Andrew Gould.* 388, 338, 54-E5 (1992)

CNO Destruction by Spallation and Type I X-Ray Bursts. *Jason C. Tillett & James MacDonald.* 388, 555, 57-B7 (1992)

Limits on a Possible Violation of the Strong Equivalence Principle from Primordial Nucleosynthesis. *A. Serna & R. Domínguez-Tenreiro.* 389, 1, 60-B1 (1992)

Possible Sources of the Population I Lithium Abundance and Light-Element Evolution. *Lawrence E. Brown.* 389, 251, 63-B1 (1992)

Dust and Gas Contributions to the Energy Output of SN 1987A on Day 1153. *E. Dwek, S. H. Moseley, W. Glaccum, J. R. Graham, R. F. Loewenstein, R. F. Silverberg, & R. K. Smith.* 389, L21, 66-C11 (1992)

Measurement of the ^{76}Se(n,γ) Capture Cross Section and Phenomenological *s*-Process Studies: The Weak Component. *Hermann Beer, G. Walter, & F. Käppeler.* 389, 784, 71-B1 (1992)

The Chemical Composition of Magellanic Cloud Cepheids and Nonvariable Supergiants. *R. Earle Luck & David L. Lambert.* 79, 303, 18-E3 (1992)

The Interstellar Deuterium-to-Hydrogen Ratio: A Reevaluation of Lyman Absorption-Line Measurements. *Peter R. McCullough.* 390, 213, 76-E10 (1992)

The Collapse of White Dwarfs to Neutron Stars. *S. E. Woosley & E. Baron.* 391, 228, 88-G1 (1992)

On the Calculation of Maxwellian-averaged Capture Cross Sections. *Hermann Beer, F. Voss, & R. R. Winters.* 80, 403, 27-G13 (1992)

Primordial Nucleosynthesis Bounds on the Brans-Dicke Theory. *A. Serna, R. Domínguez-Tenreiro, & G. Yepes.* 391, 433, 93-C4 (1992)

Evolution of Heavy-Element Abundances as a Constraint on Sites for Neutron-Capture Nucleosynthesis. *G. J. Mathews, G. Bazan, & J. J. Cowan.* 391, 719, 97-A1 (1992)

A Prediction of the γ-Ray Flux from Nova Herculis 1991. *Sumner Starrfield, Steven N. Shore, Warren M. Sparks, George Sonneborn, James W. Truran, & Michael Politano.* 391, L71, 99-E5 (1992)

On the Form of the 1987 Hydrogen Spectrum in the Outer Heliosphere. *J. P. L. Reinecke & H. Moraal.* 392, 272, 104-D1 (1992)

Origin of ^{180m}Ta and the Temperature of the *s*-Process. *Zs. Németh, F. Käppeler, & G. Reffo.* 392, 277, 104-D7 (1992)

The Fate of ^{7}Be in the Sun. *C. W. Johnson, E. Kolbe, S. E. Koonin, & K. Langanke.* 392, 320, 105-A1 (1992)

SiC Particles from Asymptotic Giant Branch Stars: Mg Burning and the *s*-Process. *Lawrence E. Brown & Donald D. Clayton.* 392, L79, 113-E1 (1992)

Minimum Mass for D and H Burning during Slow Accretion. *E. E. Salpeter.* 393, 258, 117-C12 (1992)

The Diffuse Gamma-Ray Background, Light Element Abundances, and Signatures of Early Massive Star Formation. *Joseph Silk & David N. Schramm.* 393, L9, 120-B7 (1992)

A Solvable Model of Fusion Rates in Dense Stars. *Magnus Jändel & Mikael Sahrling.* 393, 679, 124-C5 (1992)

Late Detonation Models for the Type Ia Supernovae SN 1991T and SN 1990N. *Hitoshi Yamaoka, Ken'ichi Nomoto, Toshikazu Shigeyama, & Friedrich-Karl Thielemann.* 393, L55, 127-C1 (1992)

On the Role of Radioactive Decays in Powering Gamma Rays and X-Rays from Novae. *Mario Livio, Apostolos Mastichiadis, Hakki Ögelman, & James W. Truran.* 394, 217, 130-F5 (1992)

Interstellar SiC with Unusual Isotopic Compositions: Grains from a Supernova? *Sachiko Amari, Peter Hoppe, Ernst Zinner, & Roy S. Lewis.* 394, L43, 139-C1 (1992)

The α-Process and the *r*-Process. *S. E. Woosley & Robert D. Hoffman.* 395, 202, 142-F7 (1992)

A Rapid Decline in the Optical Emission from SN 1957D in M83. *Knox S. Long, P. Frank Winkler, & William P. Blair.* 395, 632, 151-A5 (1992)

The Conductive Propagation of Nuclear Flames. I. Degenerate C + O and O + Ne + Mg White Dwarfs. *F. X. Timmes & S. E. Woosley.* 396, 649, 165-D9 (1992)

Some Remarks on Luminosity Distance and Nucleosynthesis in Higher Dimensional Cosmology. *S. Chatterjee.* 397, 1, 168-B1 (1992)

Diffuse 0.511 MeV Line Emission and the Distribution of Positron Annihilation in the Galaxy. *J. G. Skibo, R. Ramaty, & M. Leventhal.* 397, 135, 169-F3 (1992)

Pycnonuclear Triple-α Fusion Rates. *S. Schramm, K. Langanke, & S. E. Koonin.* 397, 579, 178-B12 (1992)

A Limit on the ^{57}Co Gamma-Ray Flux from SN 1987A. *S. Gunji, T. Kamae, S. Miyazaki, Y. Sekimoto, T. Takahashi, T. Tamura, M. Tanaka, N. Yamaoka, T. Yamagami, M. Nomachi, H. Murakami, J. Braga, & J. A. Neri.* 397, L83, 181-A8 (1992)

The Neutrino Process and ^{9}Be in the Early Universe. *R. A. Malaney.* 398, L45, 187-G1 (1992)

Nucleosynthesis and Mixing on the Asymptotic Giant Branch. I. MS and S Stars with and without Tc. *M. Busso, R. Gallino, D. L. Lambert, C. M. Raiteri, & V. V. Smith.* 399, 218, 198-A1 (1992)

On the Evolution of Slowly Accreting Neutron Stars. *O. M. Blaes, R. D. Blandford, P. Madau, & L. Yan.* 399, 634, 205-G3 (1992)

Constraints on Element Mixing in Classical Novae. *Masayuki Y. Fujimoto & Icko Iben, Jr.* 399, 646, 206-A1 (1992)

r-Process Nucleosynthesis in the High-Entropy Supernova Bubble. *B. S. Meyer, G. J. Mathews, W. M. Howard, S. E. Woosley, & R. D. Hoffman.* 399, 656, 206-B1 (1992)

Oriented Scintillation Spectrometer Experiment Observations of ^{57}Co in SN 1987A. *J. D. Kurfess, W. N. Johnson, R. L. Kinzer, R. A. Kroeger, M. S. Strickman, J. E. Grove, M. D. Leising, D. D. Clayton, D. A. Grabelsky, W. R. Purcell, M. P. Ulmer, R. A. Cameron, & G. V. Jung.* 399, L137, 208-B7 (1992)

The ^{57} Co Abundance in SN 1987A. *Donald D. Clayton, Mark D. Leising, Lih-Sin The, W. N. Johnson, & J. D. Kurfess.* 399, L141, 208-C1 (1992)

Light Element Nucleosynthesis: A False Clue? *N. Yu. Gnedin & J. P. Ostriker.* 400, 1, 209-A13 (1992)

Nebular Spectra of Type Ia Supernovae as Probes for Extragalactic Distances, Reddening, and Nucleosynthesis. *P. Ruiz-Lapuente & L. B. Lucy.* 400, 127, 210-E1 (1992)

Reaction Rate and Energy-Loss Rate for Photopair Production by Relativistic Nuclei. *Michał J. Chodorowski, Andrzej A. Zdziarski, & Marek Sikora.* 400, 181, 211-B9 (1992)

Galactic Evolution of D and ^{3}He. *Gary Steigman & Monica Tosi.* 401, 150, 222-G8 (1992)

On Determining the Primordial Helium Abundance from the Spectra of H II Galaxies. *Alison Campbell.* 401, 157, 223-A1 (1992)

Pycnonuclear Reaction Rates for Binary Ionic Mixtures. *S. Ichimaru, S. Ogata, & H. M. Van Horn.* 401, L35, 227-E7 (1992)

The Abundance of Boron in Three Halo Stars. *Douglas K. Duncan, David L. Lambert, & Michael Lemke.* 401, 584, 229-G6 (1992)

Deposition of Mass, Momentum, and Energy by Massive Stars into the Interstellar Medium. *Claus Leitherer, Carmelle Robert, & Laurent Drissen.* 401, 596, 230-A6 (1992)

Strange Quark Contributions to the Nucleon and Neutrino Nucleosynthesis. *E. Kolbe, K. Langanke, S. Krewald, & F. K. Thielemann.* 401, L89, 233-C1 (1992)

On ^{9}Be Production in the Nonuniform Density Model of Big Bang Nucleosynthesis. *A. Coc, P. Delbourgo-Salvador, F. de Oliveira, P. Aguer, S. Barhoumi, G. Bogaert, J. Kiener, A. Lefebvre, & J. P. Thibaud.* 402, 62, 1-G6 (1993)

Companions to Bright S and MS Stars: Technetium Deficiency and Binarity. *Hollis R. Johnson, Thomas B. Ake, & Mudhaffer M. Ameen.* 402, 667, 10-G11 (1993)

The Cosmic Gamma-Ray Background from Type Ia Supernovae. *Lih-Sin The, Mark D. Leising, & Donald D. Clayton.* 403, 32, 14-D12 (1993)

Chemical Evolution of Irregular Galaxies and the Primordial ^{4}He Abundance. *G. J. Mathews, R. N. Boyd, & G. M. Fuller.* 403, 65, 14-G7 (1993)

Isotopic *r*-Process Abundances and Nuclear Structure Far from Stability: Implications for the *r*-Process Mechanism. *Karl-Ludwig Kratz, Jean-Philippe Bitouzet, Friedrich-Karl Thielemann, Peter Möller, & Bernd Pfeiffer.* 403, 216, 16-E13 (1993)

Production and Evolution of LiBeB Isotopes in the Galaxy. *N. Prantzos, M. Casse, & E. Vangioni-Flam.* 403, 630, 23-D12 (1993)

Oxygen, Sulfur, Argon, and the Chemical Evolution of the Galactic Disk. *J. A. de Freitas Pacheco.* 403, 673, 24-A10 (1993)

Protogalactic Mergers and Cosmochronology. *G. J. Mathews & D. N. Schramm.* 404, 468, 34-G1 (1993)

Limits to the Primordial Helium Abundance in the Baryon-inhomogeneous Big Bang. *G. J. Mathews, D. N. Schramm, & B. S. Meyer.* 404, 476, 34-G11 (1993)

The ^{8}Li$(n,\gamma)^{9}$Li and ^{8}B$(p,\gamma)^{9}$C Mirror Reactions in a Microscopic Cluster Model. *P. Descouvemont.* 405, 518, 49-E1 (1993)

Beryllium and Boron Constraints on an Early Galactic Bright Phase. *Brian D. Fields, David N. Schramm, & James W. Truran.* 405, 559, 50-A7 (1993)

Positrons from Supernovae. *Kai-wing Chan & Richard E. Lingenfelter.* 405, 614, 50-G1 (1993)

Radioactive ^{26}Al from Massive Stars: Production and Distribution in the Galaxy. *N. Prantzos.* 405, L55, 54-C1 (1993)

Primordial Nucleosynthesis and the Abundances of Beryllium and Boron. *David Thomas, David N. Schramm, Keith A. Olive, & Brian D. Fields.* 406, 569, 65-A1 (1993)

Heavy-Element Abundances and Massive Star Formation. *Boqi Wang & Joseph Silk.* 406, 580, 65-B1 (1993)

Determination of ^{12}C/^{13}C in the Interstellar Medium toward ζ Ophiuchi and ξ Persei. *Isabel Hawkins, Nahide Craig, & David M. Meyer.* 407, 185, 71-D1 (1993)

Mass Loss in Globular Cluster Red Giants: An Evolutionary Investigation. *M. Castellani & V. Castellani.* 407, 649, 78-F1 (1993)

Evolution of Cosmic Rays in the Early Galaxy. *R. A. Malaney & M. N. Butler.* 407, L73, 82-D11 (1993)

Experimental, Computational, and Observational Analysis of Primordial Nucleosynthesis. *Michael S. Smith, Lawrence H. Kawano, & Robert A. Malaney.* 85, 219, 10-B1 (1993)

The ^{6}Li/^{7}Li Ratio in the Metal-poor Halo Dwarfs HD 19445 and HD 84937. *Verne V. Smith, David L. Lambert, & Poul E. Nissen.* 408, 262, 86-D1 (1993)

Toward a Unified Classical Model of the Sun: On the Sensitivity of Neutrinos and Helioseismology to the Microscopic Physics. *Sylvaine Turck-Chièze & Ilidio Lopes.* 408, 347, 87-D10 (1993)

The Freeze-out Phase of SN 1987A: Implications for the Light Curve. *Claes Fransson & Cecilia Kozma.* 408, L25, 89-A1 (1993)

Ar/S. *Christopher C. Stevenson, Marshall L. McCall, & Douglas L. Welch.* 408, 460, 90-G11 (1993)

Helium Destruction and Gamma-Ray Line Emission in Accreting Neutron Stars. *Lars Bildsten, Edwin E. Salpeter, & Ira Wasserman.* 408, 615, 92-G9 (1993)

Energy Generation in Convective Shells of Low-Mass, Low-Metallicity Asymptotic Giant Branch Stars. *Grant Bazan & John C. Lattanzio.* 409, 762, 108-E6 (1993)

The Interstellar ^{7}Li/^{6}Li Isotope Ratio toward ζ Ophiuchi and ζ Persei. *David M. Meyer, Isabel Hawkins, & Edward L. Wright.* 409, L61, 111-E8 (1993)

Evolution of Elliptical Galaxies. I. The Multiphase Model. *Federico Ferrini & Bianca Maria Poggianti.* 410, 44, 112-F4 (1993)

The *s*-Process between A = 120 and 124: Signature of Neutron Density and Temperature in Red Giants. *F. Käppeler, W. Schanz, K. Wisshak, & G. Reffo.* 410, 370, 116-F3 (1993)

s-Process Ba Isotopic Compositions in Presolar SiC from the Murchison Meteorite. *C. A. Prombo, F. A. Podosek, S. Amari, & R. S. Lewis.* 410, 393, 117-A1 (1993)

Carbon Stars and Isotopic Ba Anomalies in Meteoritic SiC Grains. *R. Gallino, C. M. Raiteri, & M. Busso.* 410, 400, 117-A10 (1993)

A Quasi–Steady State Cosmological Model with Creation of Matter. *F. Hoyle, G. Burbidge, & J. V. Narlikar.* 410, 437, 119-B7 (1993)

The Interstellar Abundances of Tin and Four Other Heavy Elements. *L. M. Hobbs, D. E. Welty, D. C. Morton, L. Spitzer, & D. G. York.* 411, 750, 139-A13 (1993)

The Effect of Helium Breakup on Two-Temperature Accretion Disks including Cooling Processes. *Cesar Meirelles Filho.* 412, 288, 145-F5 (1993)

The Cosmic-Ray ^{3}He/^{4}He Ratio from 100 to 1600 MeV amu^{-1}. *J. J. Beatty, D. J. Ficenec, S. Tobias, J. W. Mitchell, S. McKee, S. Nutter, G. Tarlé, A. Tomasch, J. Clem, T. G. Guzik, M. Lijowski, J. P. Wefel, C. R. Bower, R. M. Heinz, S. L. Mufson, J. Musser, J. J. Pitts, G. M. Spiczak, S. P. Ahlen, & B. Zhou.* 413, 268, 159-E8 (1993)

The Boron-to-Beryllium Ratio in Halo Stars: A Signature of Cosmic-Ray Nucleosynthesis in the Early Galaxy. *T. P. Walker, G. Steigman, D. N. Schramm, K. A. Olive, & B. Fields.* 413, 562, 163-D12 (1993)

^{17}O$(n,\alpha)^{14}$C: Closure of a Primordial CNO Bi-Cycle? *H. Schatz, F. Käppeler, P. E. Koehler, M. Wiescher, & H.-P. Trautvetter.* 413, 750, 165-F13 (1993)

OSSE Observations of Galactic 511 keV Positron Annihilation Radiation: Initial Phase I Results. *W. R. Purcell, D. A. Grabelsky, M. P. Ulmer, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, & G. V. Jung.* 413, L85, 168-E4 (1993)

A Hydrodynamical Model for the Explosion of a Neutron Star Just below the Minimum Mass. *Monica Colpi, Stuart L. Shapiro, & Saul A. Teukolsky.* 414, 717, 180-B10 (1993)

Reaction Rates of the *s*-Process Neutron Sources ^{22}Ne$(\alpha, n)^{25}$Mg and ^{13}C$(\alpha, n)^{16}$O. *H. W. Drotleff, A. Denker, H. Knee, M. Soiné, G. Wolf, J. W. Hammer, U. Greife, C. Rolfs, & H. P. Trautvetter.* 414, 735, 180-D3 (1993)

Evidence for a Dispersion in the Lithium Abundances of Extreme Halo Stars. *Constantine P. Deliyannis, M. H. Pinsonneault, & Douglas K. Duncan.* 414, 740, 180-D10 (1993)

Type II Supernovae from 8–10 $M_{\odot}$ Asymptotic Giant Branch Stars. *Masaaki Hashimoto, Kohichi Iwamoto, & Ken'ichi Nomoto.* 414, L105, 186-A1 (1993)

Neutrino Energy Loss in Stellar Interiors. V. Recombination Neutrino Process. *Yasuharu Kohyama, Naoki Itoh, Akihiko Obama, & Haruhiko Mutoh.* 415, 267, 188-C9 (1993)

On ^{26}Al and Other Short-lived Interstellar Radioactivity. *Donald D. Clayton, Dieter H. Hartmann, & Mark D. Leising.* 415, L25, 192-A1 (1993)

Population II ^{6}Li as a Probe of Nucleosynthesis and Stellar Structure and Evolution. *Gary Steigman, Brian D. Fields, Keith A. Olive, David N. Schramm, & Terry P. Walker.* 415, L35, 192-B1 (1993)

Abundances of Four Ultra–Metal-Deficient Stars. *John E. Norris, Ruth C. Peterson, & Timothy C. Beers.* 415, 797, 197-F13 (1993)

Thermonuclear Reaction Rates for Dense Binary-Ionic Mixtures. *Shuji Ogata, Setsuo Ichimaru, & Hugh M. Van Horn.* 417, 265, 220-F12 (1993)

Cooling and Spin-down of Pulsars with Evolving Rotating Equilibrium Configuration. II. Effects of Equations of State. *N. Chong & K. S. Cheng.* 417, 279, 221-A3 (1993)

Neutron-rich α-rich Freeze-out and the *r*-Process in the High-Entropy Neutrino-energized Supernova Bubble. *W. M. Howard, S. Goriely, M. Rayet, & M. Arnould.* 417, 713, 228-C5 (1993)

The Primordial Helium Abundance as Determined from Chemical Evolution of Irregular Galaxies. *M. J. Balbes, R. N. Boyd, & G. J. Mathews.* 418, 229, 233-G8 (1993)

Nova Herculis 1991: Thermonuclear Runaway on a Massive ONeMg White Dwarf. *Thomas Matheson, Alexei V. Filippenko, & Luis C. Ho.* 418, L29, 238-D6 (1993)

Lithium Abundances and Other Clues to Envelope Burning in Small Magellanic Cloud Asymptotic Giant Branch Stars. *Bertrand Plez, Verne V. Smith, & David L. Lambert.* 418, 812, 242-F3 (1993)

Stability of Detonations in Supernovae. *A. M. Khokhlov.* 419, 200, 248-F5 (1993)

The Weak *s*-Component and Nucleosynthesis in Massive Stars. *C. M. Raiteri, R. Gallino, M. Busso, D. Neuberger, & F. Käppeler.* 419, 207, 248-G1 (1993)

Theoretical Light Curves of Type IIb Supernova 1993J. *Toshikazu Shigeyama, Tomoharu Suzuki, Shiomi Kumagai, Ken'ichi Nomoto, Hideyuki Saio, & Hitoshi Yamaoka.* 420, 341, 5-B5 (1994)

The Conductive Propagation of Nuclear Flames. II. Convectively Bounded Flames in C+O and O+Ne+Mg Cores. *F. X. Timmes, S. E. Woosley, & Ronald E. Taam.* 420, 348, 5-B13 (1994)

Observational Prospects for Massive Stars with Degenerate Neutron Cores. *Garrett T. Biehle.* 420, 364, 5-D6 (1994)

The Rate of the Proton-Proton Reaction. *Marc Kamionkowski & John N. Bahcall.* 420, 884, 13-G11 (1994)

The Primordial Lithium Abundance from Extreme Subdwarfs: New Observations. *J. A. Thorburn.* 421, 318, 19-G12 (1994)

Cross Section Parameterizations for Cosmic-Ray Nuclei. II. Double Nucleon Removal. *John W. Norbury & Cindy M. Mueller.* 90, 115, 2-D11 (1994)

An Observational Estimate of the Probability of Encounters between Mass-losing Evolved Stars and Molecular Clouds. *Joel H. Kastner & P. C. Myers.* 421, 605, 25-G3 (1994)

Elemental Abundances of the Supernova Remnant G292.0+1.8: Evidence for a Massive Progenitor. *John P. Hughes & K. P. Singh.* 422, 126, 31-F1 (1994)

Enhanced Heavy-Element Formation in Baryon-inhomogeneous Big Bang Models. *K. Jedamzik, G. M. Fuller, G. J. Mathews, & T. Kajino.* 422, 423, 37-B9 (1994)

The Annihilation of Positrons in the Cold Phase of the Interstellar Medium Revisited. *P. Wallyn, Ph. Durouchoux, C. Chapuis, & M. Leventhal.* 422, 610, 39-D7 (1994)

New Measurement of the ^{12}C$(n, \gamma)^{13}$C Reaction Cross Section. *T. Ohsaki, Y. Nagai, M. Igashira, T. Shima, K. Takeda, S. Seino, & T. Irie.* 422, 912, 43-C9 (1994)

Positron Annihilation Radiation from the 1991 November 15 Flare. *K. Kawabata, M. Yoshimori, K. Suga, K. Morimoto, T. Hiraoka, J. Sato, & K. Ohki.* 90, 701, 12-D13 (1994)

Inhomogeneous Primordial Nucleosynthesis: Coupled Nuclear Reactions and Hydrodynamic Dissipation Processes. *Karsten Jedamzik, George M. Fuller, & Grant J. Mathews.* 423, 50, 46-F9 (1994)

The Production of Beryllium in the Early Galaxy. *Sofia Feltzing & Bengt Gustafsson.* 423, 68, 47-A6 (1994)

Sub–Chandrasekhar Mass Models for Type Ia Supernovae. *S. E. Woosley & Thomas A. Weaver.* 423, 371, 50-F10 (1994)

Lithium Abundances in the Most Metal-deficient Stars. *John E. Norris, Sean G. Ryan, & Guy S. Stringfellow.* 423, 386, 51-A1 (1994)

A Scenario for a Large Number of Low-Mass Black Holes in the Galaxy. *G. E. Brown & H. A. Bethe.* 423, 659, 56-F11 (1994)

On the Acceleration of Nuclear Flame Fronts in White Dwarfs. *F. X. Timmes.* 423, L131, 61-B5 (1994)

Gamma-Ray Limits on Galactic ^{60}Fe and ^{44}Ti Nucleosynthesis. *Mark D. Leising & Gerald H. Share.* 424, 200, 64-D7 (1994)

A New Urca Process. *Maurice B. Aufderheide, Ikko Fushiki, George M. Fuller, & Thomas A. Weaver.* 424, 257, 65-B1 (1994)

Asymptotic Giant Branch Stars as a Source of Short-lived Radioactive Nuclei in the Solar Nebula. *G. J. Wasserburg, M. Busso, R. Gallino, & C. M. Raiteri.* 424, 412, 67-A6 (1994)

Search for Important Weak Interaction Nuclei in Presupernova Evolution. *Maurice B. Aufderheide, Ikko Fushiki, Stanford E. Woosley, & Dieter H. Hartmann.* 91, 389, 23-F3 (1994)

Neutrino Process Nucleosynthesis and the ^{11}B/^{10}B Ratio. *Keith A. Olive, Nikos Prantzos, Sean Scully, & Elisabeth Vangioni-Flam.* 424, 666, 73-B7 (1994)

Nickel Bubble Instability and Mixing in SN 1987A. *Mikhail Basko.* 425, 264, 83-E5 (1994)

Extreme ^{26}Mg and ^{17}O Enrichments in an Orgueil Corundum: Identification of a Presolar Oxide Grain. *I. D. Hutcheon, G. R. Huss, A. J. Fahey, & G. J. Wasserburg.* 425, L97, 94-F7 (1994)

Nucleosynthesis in the Cd-In-Sn Region. *Zs. Németh, F. Käppeler, C. Theis, T. Belgya, & S. W. Yates.* 426, 357, 100-E12 (1994)

The Delayed-Detonation Model of Type Ia Supernovae I. The Deflagration Phase. *David Arnett & Eli Livne.* 427, 314, 113-G4 (1994)

The Delayed-Detonation Model of Type Ia Supernovae. II. The Detonation Phase. *David Arnett & Eli Livne.* 427, 330, 114-A7 (1994)

On the Galactic Evolution of D and ^{3}He. *Elisabeth Vangioni-Flam, Keith A. Olive, & Nikos Prantzos.* 427, 618, 120-D5 (1994)

Oxygen-burning Hydrodynamics. I. Steady Shell Burning. *David Arnett.* 427, 932, 124-C2 (1994)

Can Conformal Weyl Gravity Be Considered a Viable Cosmological Theory? *D. Elizondo & G. Yepes.* 428, 17, 128-D5 (1994)

The Oxygen Mass in SN 1987A: Making Use of Fluctuations in the [O I] $\lambda\lambda$6300, 6364 Profile. *Nikolai N. Chugai.* 428, L17, 143-C11 (1994)

Implications of ^{26}Al Emission at 1.8 MeV from the Vela Region. *U. Oberlack, R. Diehl, T. Montmerle, N. Prantzos, & P. von Ballmoos.* 92, 433, 37-E7 (1994)

Observation of the 1.8 MeV Emission Line from ^{26}Al and the Chemical Evolution of the Galaxy. *Georges Meynet.* 92, 441, 37-F2 (1994)

Gamma-Ray Constraints on Supernova Nucleosynthesis. *Mark D. Leising.* 92, 495, 38-D7 (1994)

The Properties of Ni $\rightarrow$ Co $\rightarrow$ Fe Decay. *D. K. Nadyozhin.* 92, 527, 38-G6 (1994)

The Lithium Problem with IRAM, OSSE, and *INTEGRAL*. *M. Signore, G. Vedrenne, P. de Bernardis, V. Dubrovich, P. Encrenaz, R. Maoli, S. Masi, G. Mastrantonio, B. Melchiorri, F. Melchiorri, & P. E. Tanzilli.* 92, 535, 39-A3 (1994)

The Positronium Fraction before Thermalization in Helium. *C. G. L. Chapuis, P. Wallyn, & P. Durouchoux.* 92, 545, 39-B1 (1994)

Charge Exchange Reaction Rates of Thermal Positrons in H, H_2, and He. *P. Wallyn, C. Chapuis, & Ph. Durouchoux.* 92, 551, 39-B10 (1994)

Cosmic Rays and Gamma Rays in Early Galaxian Phases and the Cosmic Gamma-Ray Background. *N. Prantzos & M. Casse.* 92, 575, 39-D12 (1994)

Production of Heavy Elements in Inhomogeneous Cosmologies. *Thomas Rauscher, James H. Applegate, John J. Cowan, Friedrich-Karl Thielemann, & Michael Wiescher.* 429, 499, 152-A1 (1994)

Production of Lithium, Beryllium, and Boron from Baryon Inhomogeneous Primordial Nucleosynthesis. *David Thomas, David N. Schramm, Keith A. Olive, Grant J. Mathews, Bradley S. Meyer, & Brian D. Fields.* 430, 291, 162-F11 (1994)

Predictions of Oxygen Isotope Ratios in Stars and of Oxygen-rich Interstellar Grains in Meteorites. *Arnold I. Boothroyd, I.-Juliana Sackmann, & G. J. Wasserburg.* 430, L77, 166-C7 (1994)

Oxygen Isotopes in Circumstellar Al_2O_3 Grains from Meteorites and Stellar Nucleosynthesis. *Gary R. Huss, Albert J. Fahey, Roberto Gallino, & G. J. Wasserburg.* 430, L81, 166-C13 (1994)

The Cosmic Abundance of ^{3}He. III. Improved Line Parameters for Selected Sources. *Dana S. Balser, T. M. Bania, Charles J. Brockway, Robert T. Rood, & T. L. Wilson.* 430, 667, 170-B8 (1994)

The Puzzle of Silicon, Titanium, and Magnesium Anomalies in Meteoritic Silicon Carbide Grains. *Roberto Gallino, Claudia M. Raiteri, Maurizio Busso, & Francesca Matteucci.* 430, 858, 172-E13 (1994)

Carbon, Nitrogen, Magnesium, Silicon, and Titanium Isotopic Compositions of Single Interstellar Silicon Carbide Grains from the Murchison Carbonaceous Chondrite. *Peter Hoppe, Sachiko Amari, Ernst Zinner, Trevor Ireland, & Roy S. Lewis.* 430, 870, 172-F12 (1994)

Ultra–Metal-poor Halo Stars: The Remarkable Spectrum of CS 22892−052. *Christopher Sneden, George W. Preston, Andrew McWilliam, & Leonard Searle.* 431, L27, 182-E13 (1994)

^{41}Ca in the Early Solar System. *G. Srinivasan, A. A. Ulyanov, & J. N. Goswami.* 431, L67, 183-C9 (1994)

Reaction Rates and Reaction Sequences in the rp-Process. *L. Van Wormer, J. Görres, C. Iliadis, M. Wiescher, & F.-K. Thielemann.* 432, 326, 197-C1 (1994)

A Seismic Model of the Sun's Interior. *W. A. Dziembowski, Philip R. Goode, A. A. Pamyatnykh, & R. Sienkiewicz.* 432, 417, 198-C13 (1994)

The Primordial Abundance of ^{6}Li and ^{9}Be. *Brian Chaboyer.* 432, L47, 199-G1 (1994)

Widespread Water Vapor Emission in Orion. *J. Cernicharo, E. González-Alfonso, J. Alcolea, R. Bachiller, & D. John.* 432, L59, 200-A5 (1994)

Recent Deuterium Observations and Big Bang Nucleosynthesis Constraints. *Lawrence M. Krauss & Peter J. Kernan.* 432, L79, 206-D10 (1994)

A Possible Solution to the Problem of the Galactic Evolution of D and ^{3}He. *Daniele Galli, Francesco Palla, Oscar Straniero, & Federico Ferrini.* 432, L101, 206-G1 (1994)

Thermonuclear Runaways in Nova Outbursts. II. Effect of Strong, Instantaneous, Local Fluctuations. *Anurag Shankar & David Arnett.* 433, 216, 211-A8 (1994)

The *r*-Process and Neutrino-heated Supernova Ejecta. *S. E. Woosley, J. R. Wilson, G. J. Mathews, R. D. Hoffman, & B. S. Meyer.* 433, 229, 211-B9 (1994)

Convection, Nucleosynthesis, and Core Collapse. *Grant Bazan & David Arnett.* 433, L41, 215-B9 (1994)

^{7}Li Abundances in Halo Stars: Testing Stellar Evolution Models and the Primordial ^{7}Li Abundance. *Brian Chaboyer & P. Demarque.* 433, 510, 217-C11 (1994)

On the Formation and Evolution of Super–Asymptotic Giant Branch Stars with Cores Processed by Carbon Burning. I. Spica to Antares. *Enrique García-Berro & Icko Iben, Jr.* 434, 306, 229-F4 (1994)

Beta-Decay Rates of *fp* Shell Nuclei with $A > 60$ in Massive Stars at the Presupernova Stage. *K. Kar, A. Ray, & S. Sarkar.* 434, 662, 237-A1 (1994)

s-Process Abundances for ^{122,123,124}Tellurium. *J. R. De Laeter.* 434, 695, 237-C12 (1994)

Isotopically Normal Zirconium in Murchison Hibonite 13-13: Implications for a Link between the *e*- and *r*-Processes. *Trevor R. Ireland.* 434, L79, 242-A1 (1994)

Cosmic-Ray Models for Early Galactic Lithium, Beryllium, and Boron Production. *Brian D. Fields, Keith A. Olive, & David N. Schramm.* 435, 185, 245-G9 (1994)

Possible Detection of ^{14}CO in the Carbon Star IRC +10216. *Gregory A. Wright.* 436, L157, 281-F1 (1994)

Isotopically Distinct Reservoirs in the Solar Nebula: Isotope Anomalies in Vigarano Meteorite Inclusions. *R. D. Loss, G. W. Lugmair, A. M. Davis, & G. J. MacPherson.* 436, L193, 282-D13 (1994)

Ensemble-averaged Thermonuclear Reaction Rates for Turbulent Convection in Stellar Interiors. *Lawrence D. Cloutman.* 437, 384, 288-D9 (1994)

Reaction Rates for ^{18}O$(\alpha,\gamma)^{22}$Ne, ^{22}Ne$(\alpha,\gamma)^{26}$Mg, and ^{22}Ne$(\alpha,n)^{25}$Mg in Stellar Helium Burning and *s*-Process Nucleosynthesis in Massive Stars. *F. Käppeler, M. Wiescher, U. Giesen, J. Görres, I. Baraffe, M. El Eid, C. M. Raiteri, M. Busso, R. Gallino, M. Limongi, & A. Chieffi.* 437, 396, 288-E10 (1994)

The Heating of Nova Ejecta by Radioactive Decays of the β-unstable Nuclei. *Shlomi Pistinner, Giora Shaviv, & Sumner Starrfield.* 437, 794, 296-E4 (1994)

Theoretical Light Curves for the Type Ic Supernova SN 1994I. *Kohichi Iwamoto, Ken'ichi Nomoto, Peter Höflich, Hitoshi Yamaoka, Shiomi Kumagai, & Toshikazu Shigeyama.* 437, L115, 299-C8 (1994)

Massive Black Holes and Light-Element Nucleosynthesis in a Baryonic Universe. *Nickolay Y. Gnedin, Jeremiah P. Ostriker, & Martin J. Rees.* 438, 40, 1-G8 (1995)

Pycnonuclear Reaction Rates in Stellar Interiors: Thermal Enhancement. *Hikaru Kitamura & Setsuo Ichimaru.* 438, 300, 5-E9 (1995)

Gamma-Ray Lines from the Orion Complex. *Reuven Ramaty, Benzion Kozlovsky, & Richard E. Lingenfelter.* 438, L21, 10-A1 (1995)

Propagation of Nuclear Burning Fronts on Accreting Neutron Stars: X-Ray Bursts and Sub-Hertz Noise. *Lars Bildsten.* 438, 852, 16-A2 (1995)

Implications of a High Population II B/Be Ratio. *Brian D. Fields, Keith A. Olive, & David N. Schramm.* 439, 854, 36-D7 (1995)

Evidence of Heavy Element Nucleosynthesis Early in the History of the Galaxy: The Ultra–metal-poor Star CS 22892−052. *John J. Cowan, Debra L. Burris, Christopher Sneden, Andrew McWilliam, & George W. Preston.* 439, L51, 40-E3 (1995)

First Measurement of a $p(n,\gamma)d$ Reaction Cross Section between 10 and 80 keV. *T. S. Suzuki, Y. Nagai, T. Shima, T. Kikuchi, H. Sato, T. Kii, & M. Igashira.* 439, L59, 40-F5 (1995)

On the Formation of Globular Clusters. II. Early Dynamical Evolution. *J. H. Brown, A. Burkert, & J. W. Truran.* 440, 666, 52-D4 (1995)

Radiative ^{13}C Burning in Asymptotic Giant Branch Stars and *s*-Processing. *O. Straniero, R. Gallino, M. Busso, A. Chieffi, C. M. Raiteri, M. Limongi, & M. Salaris.* 440, L85, 58-B3 (1995)

Injection of Freshly Synthesized ^{41}Ca in the Early Solar Nebula by an Asymptotic Giant Branch Star. *G. J. Wasserburg, R. Gallino, M. Busso, J. N. Goswami, & C. M. Raiteri.* 440, L101, 58-D1 (1995)

Absence of a Lower Limit on Ω_b in Inhomogeneous Primordial Nucleosynthesis. *Karsten Jedamzik, Grant J. Mathews, & George M. Fuller.* 441, 465, 68-D9 (1995)

Cosmological and Astrophysical Consequences of a High Primordial Deuterium Abundance. *Elisabeth Vangioni-Flam & Michel Cassé.* 441, 471, 68-E4 (1995)

The Sodium/Aluminum–Oxygen Anticorrelation in ω Centauri and Other Clusters. *John E. Norris & G. S. Da Costa.* 441, L81, 76-B11 (1995)

Measurement of the $^{16}O(n,\gamma)^{17}O$ Reaction Cross Section at Stellar Energy and the Critical Role of Nonresonant *p*-Wave Neutron Capture. *M. Igashira, Y. Nagai, K. Masuda, T. Ohsaki, & H. Kitazawa.* 441, L89, 76-C11 (1995)

Hot Bottom Burning in Asymptotic Giant Branch Stars and Its Effect on Oxygen Isotopic Abundances. *Arnold I. Boothroyd, I.-Juliana Sackmann, & G. J. Wasserburg.* 442, L21, 84-G4 (1995)

On the Abundance of Primordial Helium. *Keith A. Olive & Gary Steigman.* 97, 49, 11-E9 (1995)

Deviations from Chemical Equilibrium Due to Spin-down as an Internal Heat Source in Neutron Stars. *Andreas Reisenegger.* 442, 749, 90-E3 (1995)

Galactic Evolution of D and ^3He. *Daniele Galli, Francesco Palla, Federico Ferrini, & Umberto Penco.* 443, 536, 105-C3 (1995)

Parameterization of Spectral Distributions for Pion and Kaon Production in Proton-Proton Collisions. *John P. Schneider, John W. Norbury, & Frank A. Cucinotta.* 97, 571, 20-A1 (1995)

CGRO/OSSE Observations of the Cassiopeia A Supernova Remnant. *L.-S. The, M. D. Leising, D. D. Clayton, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, M. S. Strickman, G. V. Jung, D. A. Grabelsky, W. R. Purcell, & M. P. Ulmer.* 444, 244, 116-G4 (1995)

What Is the Problem with ^3He? *Keith A. Olive, Robert T. Rood, David N. Schramm, James Truran, & Elisabeth Vangioni-Flam.* 444, 680, 125-F6 (1995)

Delayed Detonation Models for Normal and Subluminous Type Ia Supernovae: Absolute Brightness, Light Curves, and Molecule Formation. *P. Höflich, A. M. Khokhlov, & J. C. Wheeler.* 444, 831, 128-A1 (1995)

ASCA Observations of the Large Magellanic Cloud Supernova Remnant Sample: Typing Supernovae from Their Remnants. *John P. Hughes, Ichizo Hayashi, David Helfand, Una Hwang, Masayuki Itoh, Robert Kirshner, Katsuji Koyama, Thomas Markert, Hiroshi Tsunemi, & Jonathan Woo.* 444, L81, 130-E1 (1995)

Heavy Element Abundances in a New Sample of Low-Metallicity Blue Compact Galaxies. *Trinh X. Thuan, Yuri I. Izotov, & Valentin A. Lipovetsky.* 445, 108, 133-G5 (1995)

The Deuterium Abundance and Nucleocosmochronology. *Sean Thomas Scully & Keith A. Olive.* 446, 272, 157-A6 (1995)

Gamma-Ray Transfer and Energy Deposition in Supernovae. *Douglas A. Swartz, Peter G. Sutherland, & Robert P. Harkness.* 446, 766, 166-F1 (1995)

Nucleosynthesis and Mixing on the Asymptotic Giant Branch. II. Carbon and Barium Stars in the Galactic Disk. *M. Busso, D. L. Lambert, L. Beglio, R. Gallino, C. M. Raiteri, & V. V. Smith.* 446, 775, 166-F13 (1995)

Galactic Chemical Evolution: Hydrogen through Zinc. *F. X. Timmes, S. E. Woosley, & Thomas A. Weaver.* 98, 617, 32-A6 (1995)

The Screened Nuclear Reaction Rates and the Solar Neutrino Puzzle. *H. Dzitko, S. Turck-Chièze, P. Delbourgo-Salvador, & C. Lagrange.* 447, 428, 178-D2 (1995)

Deep Circulation in Red Giant Stars: A Solution to the Carbon and Oxygen Isotope Puzzles? *G. J. Wasserburg, Arnold I. Boothroyd, & I.-Juliana Sackmann.* 447, L37, 181-A11 (1995)

Metal Abundances and Physical Conditions in Two Damped Lyα Systems toward HS 1946+7658. *Limin Lu, Blair D. Savage, Todd M. Tripp, & David M. Meyer.* 447, 597, 184-D2 (1995)

The Giant Branch of ω Centauri. IV. Abundance Patterns Based on Echelle Spectra of 40 Red Giants. *John E. Norris & G. S. Da Costa.* 447, 680, 185-D9 (1995)

The Dynamics of Two-dimensional Local and Finite Perturbations in Envelopes of Rotating White Dwarfs. I. *Patrick Godon & Giora Shaviv.* 447, 797, 187-A3 (1995)

Carbon and Nitrogen Isotopes in Type II Supernova Diamonds. *Donald D. Clayton, Bradley S. Meyer, Chris I. Sanderson, Sara S. Russell, & C. T. Pillinger.* 447, 894, 188-C2 (1995)

Large ^{18}O Excesses in Circumstellar Graphite Grains from the Murchison Meteorite: Indication of a Massive-Star Origin. *Sachiko Amari, Ernst Zinner, & Roy S. Lewis.* 447, L147, 191-F4 (1995)

The Presupernova Evolution and Explosion of Helium Stars That Experience Mass Loss. *S. E. Woosley, Norbert Langer, & Thomas A. Weaver.* 448, 315, 196-E7 (1995)

Effects of Neutrino Degeneracy on the Primordial Abundances of ^9Be and ^{11}B. *Jong Bock Kim & Hyun Kyu Lee.* 448, 510, 201-F9 (1995)

Hydrodynamic Studies of Accretion onto Massive White Dwarfs: ONeMg-enriched Nova Outbursts. I. Dependence on White Dwarf Mass. *M. Politano, S. Starrfield, J. W. Truran, A. Weiss, & W. M. Sparks.* 448, 807, 206-A11 (1995)

^{26}Al and ^{60}Fe from Supernova Explosions. *F. X. Timmes, S. E. Woosley, D. H. Hartmann, R. D. Hoffman, T. A. Weaver, & F. Matteucci.* 449, 204, 213-A4 (1995)

Neutrino Reactions on ^4He and the *r*-Process. *Bradley S. Meyer.* 449, L55, 216-G11 (1995)

Baryonic Dark Matter and Big Bang Nucleosynthesis. *Arnon Dar.* 449, 550, 220-D1 (1995)

A Search for *r*-Process Elements in the Vela Supernova Remnant. *George Wallerstein, Andrew D. Vanture, Edward B. Jenkins, & George M. Fuller.* 449, 688, 222-C10 (1995)

Propagation of Turbulent Flames in Supernovae. *Alexei M. Khokhlov.* 449, 695, 222-D7 (1995)

Interstellar Lead. *D. E. Welty, L. M. Hobbs, J. T. Lauroesch, D. C. Morton, & D. G. York.* 449, L135, 227-C8 (1995)

The Chemical Composition of Red Giants. IV. The Neutron Density at the *s*-Process Site. *David L. Lambert, Verne V. Smith, Maurizio Busso, Roberto Gallino, & Oscar Straniero.* 450, 302, 232-B9 (1995)

Compton Gamma Ray Observatory OSSE Observations of SN 1991T. *M. D. Leising, W. N. Johnson, J. D. Kurfess, D. D. Clayton, D. A. Grabelsky, G. V. Jung, R. L. Kinzer, W. R. Purcell, M. S. Strickman, L.-S. The, & M. P. Ulmer.* 450, 805, 241-G1 (1995)

On the Nature of Core-Collapse Supernova Explosions. *Adam Burrows, John Hayes, & Bruce A. Fryxell.* 450, 830, 242-B9 (1995)

Deuterium in the Universe. *Francesco Palla, Daniele Galli, & Joseph Silk.* 451, 44, 246-F11 (1995)

Large-Scale Baryon Isocurvature Inhomogeneities. *Craig J. Copi, Keith A. Olive, & David N. Schramm.* 451, 51, 246-G9 (1995)

Energy Degradation in Cosmic-Ray Nuclear Spallation Reactions: Relaxing the Straight-ahead Approximation. *C. H. Tsao, R. Silberberg, A. F. Barghouty, & L. Sihver.* 451, 275, 249-F8 (1995)

Sodium Enrichment in A–F Type Supergiants. *Mounib F. El Eid & Arthur E. Champagne.* 451, 298, 250-A9 (1995)

Reaction Rates for ^{146}Sm Production in Supernovae. *Thomas Rauscher, Friedrich-Karl Thielemann, & Heinz Oberhummer.* 451, L37, 252-F4 (1995)

Gamma Rays, Cosmic Rays, and Extinct Radioactivity in Molecular Clouds. *Donald D. Clayton & Liping Jin.* 451, 681, 256-E10 (1995)

Interpretation of ^{26}Al in Meteoritic Inclusions. *Donald D. Clayton & Liping Jin.* 451, L87, 261-B12 (1995)

Nucleosynthesis in the Presence of Primordial Isocurvature Baryon Fluctuations. *Karsten Jedamzik & George M. Fuller.* 452, 33, 262-F2 (1995)

Explosions of Sub–Chandrasekhar Mass White Dwarfs in Two Dimensions. *Eli Livne & David Arnett.* 452, 62, 263-A6 (1995)

Baryon Density Contrast in a Quark-Hadron Phase Transition in the Early Universe. *Ashok Goyal, Saurav Pathak, V. K. Gupta, & J. D. Anand.* 452, 501, 271-E8 (1995)

Electromagnetic Cascade in the Early Universe and Its Application to the Big Bang Nucleosynthesis. *M. Kawasaki & T. Moroi.* 452, 506, 271-F3 (1995)

Turbulent Nuclear Flames in Type Ia Supernovae. *J. C. Niemeyer & W. Hillebrandt.* 452, 769, 275-B13 (1995)

Generic Evolution of Deuterium and ^3He. *Gary Steigman & Monica Tosi.* 453, 173, 283-E7 (1995)

Silicon Nitride from Supernovae. *Larry R. Nittler, Peter Hoppe, Conel M. O'D. Alexander, Sachiko Amari, Peter Eberhardt, Xia Gao, Roy S. Lewis, Roger Strebel, Robert M. Walker, & Ernst Zinner.* 453, L25, 289-E9 (1995)

A Consistent Explanation for $^{12}C/^{13}C$, ^{7}Li, and ^{3}He Anomalies in Red Giant Stars. *C. Charbonnel.* 453, L41, 289-G10 (1995)

The *r*-Process Element Europium in Galactic Disk F and G Dwarf Stars. *Vincent M. Woolf, Jocelyn Tomkin, & David L. Lambert.* 453, 660, 293-A1 (1995)

Neutrino Capture and Supernova Nucleosynthesis. *George M. Fuller & Bradley S. Meyer.* 453, 792, 294-G7 (1995)

Cosmic Chemical Evolution. *Yichuan C. Pei & S. Michael Fall.* 454, 69, 300-B10 (1995)

The Evolution and Explosion of Massive Stars. II. Explosive Hydrodynamics and Nucleosynthesis. *S. E. Woosley & Thomas A. Weaver.* 101, 181, 55-B1 (1995)

Type Ia Supernovae: The Flame Is Born. *D. Garcia-Senz & S. E. Woosley.* 454, 895, 314-B7 (1995)

Neutrino Capture on Heavy Nuclei. *Gail C. McLaughlin & George M. Fuller.* 455, 202, 321-A1 (1995)

Big Bang Nucleosynthesis and a New Approach to Galactic Chemical Evolution. *Craig J. Copi, David N. Schramm, & Michael S. Turner.* 455, L95, 333-C1 (1995)

Solar Atmopheric Abundances and Energy Content in Flare Accelerated Ions from Gamma-Ray Spectroscopy. *Reuven Ramaty, Natalie Mandzhavidze, Benzion Kozlovsky, & Ronald J. Murphy.* 455, L193, 335-A4 (1995)

NUCLEOSYNTHESIS

On the [O/Fe] versus [Fe/H] Relationship and the Progenitors of Type I Supernovae. *C. Abia, R. Canal, & J. Isern.* 366, 198, 3-E1 (1991)

Evidence for CNO Processed Material in the Accretion Disk of GP Comae. *T. R. Marsh, Keith Horne, & Simon Rosen.* 366, 535, 9-F1 (1991)

The *s*-Process Branchings at ^{185}W and ^{186}Re. *F. Käppeler, S. Jaag, Z. Y. Bao, & G. Reffo.* 366, 605, 10-E5 (1991)

s-Process Nucleosynthesis in Massive Stars and the Weak Component. I. Evolution and Neutron Captures in a 25 $M_{\odot}$ Star. *C. M. Raiteri, M. Busso, R. Gallino, G. Picchio, & L. Pulone.* 367, 228, 14-G13 (1991)

Neutrino Oscillations and the Leptonic Charge of the Universe. *Martin J. Savage, Robert A. Malaney, & George M. Fuller.* 368, 1, 23-B1 (1991)

Gamma-Ray Lines from Type I Supernovae. *K. W. Chan & R. E. Lingenfelter.* 368, 515, 31-E1 (1991)

^{57}Co and ^{44}Ti Production in SN 1987A. *S. E. Woosley & Robert D. Hoffman.* 368, L31, 35-B10 (1991)

The Formation of ^{26}Al Nova Explosions. *Irit Nofar, Giora Shaviv, & Sumner Starrfield.* 369, 440, 43-B11 (1991)

Theoretical Light Curve for the Recurrent Nova RS Ophiuchi—Determination of the White Dwarf Mass, Composition, and Distance. *Mariko Kato.* 369, 471, 43-E6 (1991)

Shock Waves and Nucleosynthesis in Type II Supernovae. *M. B. Aufderheide, E. Baron, & F.-K. Thielemann.* 370, 630, 56-C8 (1991)

Solar-Cycle Modulation of Event Rates in the Chlorine Solar Neutrino Experiment. *John N. Bahcall & William H. Press.* 370, 730, 57-E1 (1991)

Primordial ^{4}He as a Test of Big Bang Nucleosynthesis. *G. M. Fuller, R. N. Boyd, & J. D. Kalen.* 371, L11, 66-B7 (1991)

The Shock Process and Light-Element Production in Supernova Envelopes. *Lawrence E. Brown, David S. Dearborn, David N. Schramm, Jon T. Larsen, & Shin Kurokawa.* 371, 648, 69-F1 (1991)

s-Process Nucleosynthesis in Massive Stars and the Weak Component. II. Carbon Burning and Galactic Enrichment. *C. M. Raiteri, M. Busso, R. Gallino, & G. Picchio.* 371, 665, 69-G6 (1991)

Signatures of Inhomogeneity in the Early Universe. *Lawrence H. Kawano, William A. Fowler, Ralph W. Kavanagh, & Robert A. Malaney.* 372, 1, 74-A11 (1991)

Measurement of the Neutron Capture Rate of the $^{12}C(n,\gamma)^{13}C$ Reaction at Stellar Energy. *Y. Nagai, M. Igashira, K. Takeda, N. Mukai, S. Motoyama, F. Uesawa, H. Kitazawa, & T. Fukuda.* 372, 683, 84-B7 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

Interstellar Grains within Interstellar Grains. *Thomas J. Bernatowicz, Sachiko Amari, Ernst K. Zinner, & Roy S. Lewis.* 373, L73, 97-E10 (1991)

^{26}Al and ^{16}O in the Early Solar System: Clues from Meteoritic Al_2O_3. *Edward Anders, Alois Virag, Ernst Zinner, & Roy S. Lewis.* 373, L77, 97-F6 (1991)

A Search for the 478 keV Line from the Decay of Nucleosynthetic ^{7}Be. *Michael J. Harris, Mark D. Leising, & Gerald H. Share.* 375, 216, 113-F5 (1991)

Capture Cross Section Measurements of Krypton and Xenon Isotopes and the Fundamental Parameters of the *s*-Process. *Hermann Beer.* 375, 823, 122-G7 (1991)

Primordial Nucleosynthesis Redux. *Terry P. Walker, Gary Steigman, David N. Schramm, Keith A. Olive, & Ho-Shik Kang.* 376, 51, 125-F1 (1991)

Inhomogeneous Halo Collapse and Early Galactic Chemical Evolution: Globular Cluster Metallicities. *G. Malinie, D. H. Hartmann, & G. J. Mathews.* 376, 520, 132-G9 (1991)

Isotopically Anomalous Ti in Presolar SiC from the Murchison Meteorite. *Trevor R. Ireland, Ernst K. Zinner, & Sachiko Amari.* 376, L53, 137-D7 (1991)

Our Sun. II. Early Mass Loss of 0.1 $M_{\odot}$ and the Case of the Missing Lithium. *Arnold I. Boothroyd, I.-Juliana Sackmann, & William A. Fowler.* 377, 318, 141-G11 (1991)

Lithium Abundances in Carbon Stars. *Grant R. Denn, R. Earle Luck, & David L. Lambert.* 377, 657, 147-G5 (1991)

Abundance Gradients and Galaxy Formation. *M. Stiavelli & F. Matteucci.* 377, L79, 150-C9 (1991)

Primordial Nucleosynthesis without a Computer. *Rahim Esmailzadeh, Glenn D. Starkman, & Savas Dimopoulos.* 378, 504, 158-F7 (1991)

An Analytical Formulation of the Double-Pulse *s*-Process Model. *Hermann Beer.* 379, 409, 168-B1 (1991)

A Measurement of the $^{22}Ne(n,\gamma)^{23}Ne$ Capture Cross Section at a Stellar Temperature of kT = 25 keV. *Hermann Beer, G. Rupp, F. Voss, & F. Käppeler.* 379, 420, 168-C1 (1991)

On the Sodium Excess in the Atmospheres of Yellow Supergiants. *N. Prantzos, A. Coc, & J. P. Thibaud.* 379, 729, 173-G1 (1991)

On the Distribution of the Diffuse Galactic Gamma-Ray Line Emissions at 1809 keV and 511 keV. *P. von Ballmoos.* 380, 98, 177-C1 (1991)

High-Mass Stars with Degenerate Neutron Cores. *Garrett T. Biehle.* 380, 167, 178-B9 (1991)

The Galactic Globular Cluster System: Theoretical Constraints for α-enhanced Compositions. *D. Bencivenni, F. Caputo, M. Manteiga, & M. L. Quarta.* 380, 484, 184-C1 (1991)

Abundances of Tc and Related Elements in Stars of Type M, MS, and S. *Andrew D. Vanture, George Wallerstein, Jeffery A. Brown, & Grant Bazan.* 381, 278, 192-D7 (1991)

Capture Rate of the $^{7}Li(n,\gamma)^{8}Li$ Reaction by Prompt Gamma-Ray Detection. *Y. Nagai, M. Igashira, N. Mukai, T. Ohsaki, F. Uesawa, K. Takeda, T. Ando, H. Kitazawa, S. Kubono, & T. Fukuda.* 381, 444, 196-C1 (1991)

s-Process Ba, Nd, and Sm in Presolar SiC from the Murchison Meteorite. *Ernst Zinner, Sachiko Amari, & Roy S. Lewis.* 382, L47, 205-E11 (1991)

Nonthermal Excitation of Helium in Type Ib Supernovae. *L. B. Lucy.* 383, 308, 216-A8 (1991)

NUMERICAL METHODS

Galaxy Velocity Dispersions Using a Cross-Correlation Method. *Cristina Dalle Ore, S. M. Faber, J. Jesús Gonzalez, Roland Stoughton, & David Burstein.* 366, 38, 1-E5 (1991)

N-Body Simulation of Large-Scale Structures in $\Lambda \neq 0$ Friedmann Models. *Hugo Martel.* 366, 353, 7-C1 (1991)

Abel Integral Equation Inversion and Deconvolution by Multi-Gaussian Approximation. *O. Bendinelli.* 366, 599, 10-D11 (1991)

Statistical Procedure and the Significance of Periodicities in Double-Galaxy Redshifts. *W. J. Cocke & W. G. Tifft.* 368, 383, 29-G6 (1991)

Light-Curve Inversion Formalism. *Walter J. Wild.* 368, 622, 32-G9 (1991)

Mesh-refined P^3M: A Fast Adaptive *N*-Body Algorithm. *H. M. P. Couchman.* 368, L23, 35-A11 (1991)

Application of the Ewald Method to Cosmological *N*-Body Simulations. *Lars Hernquist, François R. Bouchet, & Yasushi Suto.* 75, 231, 4-B1 (1991)

Models of White Dwarfs under Rapid Uniform or Differential Rotation: Numerical Results. II. *V. S. Geroyannis & A. A. Hadjopoulos.* 75, 499, 7-D11 (1991)

Optimal Order and Time-Step Criterion for Aarseth-Type *N*-Body Integrators. *Junichiro Makino.* 369, 200, 38-D7 (1991)

Numerical Simulations of a Restarting Jet. *David A. Clarke & Jack O. Burns.* 369, 308, 41-E4 (1991)

The Imaging Performance of the *Hubble Space Telescope*. *Christopher J. Burrows, Jon A. Holtzman, S. M. Faber, Pierre Y. Bely, Hashima Hasan, C. R. Lynds, & Daniel Schroeder.* 369, L21, 45-C1 (1991)

Redshift-Space Correlation Functions in the Cold Dark Matter Scenario. *Yasushi Suto & Tatsushi Suginohara.* 370, L15, 53-C7 (1991)

Cosmological *N*-Body Simulations with a Tree Code: Fluctuations in the Linear and Nonlinear Regimes. *Tatsushi Suginohara, Yasushi Suto, François R. Bouchet, & Lars Hernquist.* 75, 631, 10-B1 (1991)

Gravity in One Dimension: A Correction for Ensemble Averaging. *Charles J. Reidl, Jr., & Bruce N. Miller.* 371, 260, 63-D1 (1991)

A Redshift Survey of *IRAS* Galaxies. III. Reconstruction of the Velocity and Density Fields in *N*-Body Model Universes. *Marc Davis, Michael A. Strauss, & Amos Yahil.* 372, 394, 80-F7 (1991)

On the Sensitivity of the *N*-Body Problem to Small Changes in Initial Conditions. *Henry E. Kandrup & Haywood Smith, Jr.* 374, 255, 101-C9 (1991)

Determination of Confidence Limits for Experiments with Low Numbers of Counts. *Ralph P. Kraft, David N. Burrows, & John A. Nousek.* 374, 344, 102-D1 (1991)

Fourier Spectra of Three-dimensional Data. *David J. Baumgart & J. N. Fry.* 375, 25, 111-C11 (1991)

Linear and Circular Digital Spectral Analysis of Serial Data. *Richard B. Stothers.* 375, 423, 116-B6 (1991)

Shot Model Parameters for Cygnus X-1 through Phase Portrait Fitting. *James C. Lochner, J. H. Swank, & A. E. Szymkowiak.* 376, 295, 128-E9 (1991)

On the Evaluation of the Fermi-Dirac Integrals. *Robin P. Sagar.* 376, 364, 129-D8 (1991)

The Fragmentation of "Pancakes" in a Dark Matter–dominated Universe. *Wenbo Yuan, Joan M. Centrella, & Michael L. Norman.* 376, L29, 137-A11 (1991)

The Evolution of Void-filled Cosmological Structures. *Enikő Regős & Margaret J. Geller.* 377, 14, 138-C1 (1991)

A Quantitative Measure of Phase Correlations in Density Fields. *Robert J. Scherrer, Adrian L. Melott, & Sergei F. Shandarin.* 377, 29, 138-D5 (1991)

First Results from the Goddard High-Resolution Spectrograph: A Demonstration of Spectral Resolution and Experiments with Deconvolution. *Glenn M. Wahlgren, David S. Leckrone, Steven N. Shore, Don J. Lindler, Ronald L. Gilliland, & Dennis C. Ebbets.* 377, L41, 143-E6 (1991)

Dissipational Galaxy Formation. I. Effects of Gasdynamics. *Neal Katz & James E. Gunn.* 377, 365, 144-D1 (1991)

Fragmentation of Elongated Cylindrical Clouds. III. Formation of Binary and Multiple Systems. *Ian Bonnell, Hugo Martel, Pierre Bastien, Jean-Pierre Arcoragi, & Willy Benz.* 377, 553, 146-E5 (1991)

Fragmentation of Elongated Cylindrical Clouds. I. Isothermal Clouds. *Pierre Bastien, Jean-Pierre Arcoragi, Willy Benz, Ian Bonnell, & Hugo Martel.* 378, 255, 154-B5 (1991)

The Structure of Cold Dark Matter Halos. *John Dubinski & R. G. Carlberg.* 378, 496, 158-E11 (1991)

Searches for Millisecond Pulsations in Low-Mass X-Ray Binaries. *K. S. Wood, J. P. Norris, P. Hertz, B. A. Vaughan, P. F. Michelson, K. Mitsuda, W. H. G. Lewin, J. van Paradijs, W. Penninx, & M. van der Klis.* 379, 295, 166-F9 (1991)

Application of the Continuous Orthonormalization and Adjoint Methods to the Computation of Solar Eigenfrequencies and Eigenfrequency Sensitivities. *R. D. Rosenwald & G. F. Rabaey.* 77, 97, 44-G1 (1991)

Excursion Set Mass Functions for Hierarchical Gaussian Fluctuations. *J. R. Bond, S. Cole, G. Efstathiou, & N. Kaiser.* 379, 440, 170-C1 (1991)

Fragmentation of Elongated Cylindrical Clouds. II. Polytropic Clouds. *Jean-Pierre Arcoragi, Ian Bonnell, Hugo Martel, Willy Benz, & Pierre Bastien.* 380, 476, 184-B7 (1991)

Three-dimensional Compressible Hydrodynamic Convection in the Sun and Stars. *Murshed Hossain & D. J. Mullan.* 380, 631, 186-A10 (1991)

On Equation of State Interpolation Errors in Stellar Interior Calculations. *Ben Dorman, Alan W. Irwin, & Brian B. Pedersen.* 381, 228, 191-G4 (1991)

Integral and Differential Cross Sections for Electron Impact Ionization. *R. E. H. Clark, J. Abdallah, Jr., & J. B. Mann.* 381, 597, 198-B9 (1991)

Precollapse Scale Invariance in Gravitational Instability. *F. Moutarde, J.-M. Alimi, F. R. Bouchet, R. Pellat, & A. Ramani.* 382, 377, 206-C5 (1991)

Influence of a Dark Halo on the Stability of Elliptical Galaxies. *M. Stiavelli & L. S. Sparke.* 382, 466, 207-D1 (1991)

Simultaneous Correlation Analysis of Combined Gamma-Ray Data. *K. N. Yu.* 382, 647, 209-F1 (1991)

The Three-Point Correlation Function for Abell Clusters: Observations and Simulations. *J. Richard Gott III, Bin Gao, & Changbom Park.* 383, 90, 213-B10 (1991)

The Piecewise-Parabolic Method in Curvilinear Coordinates. *John M. Blondin & Eric A. Lufkin.* 88, 589, 48-A3 (1993)

Multiparameter Linear Least-Squares Fitting to Poisson Data One Count at a Time. *Wm. A. Wheaton, Alfred L. Dunklee, Allan S. Jacobson, James C. Ling, William A. Mahoney, & Robert G. Radocinski.* 438, 322, 6-A1 (1995)

OBITUARIES, BIOGRAPHIES

Founded in 1895 by George E. Hale and James E. Keeler: The *Astrophysical Journal* Centennial. *Donald E. Osterbrock.* 438, 1, 1-C1 (1995)

Subrahmanyan Chandrasekhar (1910–1995), Managing Editor, 1952–1971. *Helmut A. Abt.* 454, 551, 309-B1 (1995)

The *Astrophysical Journal*: A New Journal for a New Science. *R. S. Brashear.* 455, 403, 327-D1 (1995)

OCCULTATIONS

Stellar Occultation of Polarized Light from Circumstellar Electrons. II. Flat Envelopes Viewed at Arbitrary Inclination. *Geoffrey K. Fox & John C. Brown.* 375, 300, 114-F1 (1991)

Stellar Occultation of Polarized Light from Circumstellar Electrons. III. General Axisymmetric Envelopes. *Geoffrey K. Fox.* 379, 663, 173-A1 (1991)

Multiplicity among the Young Stars in Taurus. *M. Simon, W. P. Chen, R. R. Howell, J. A. Benson, & D. Slowik.* 384, 212, 3-E8 (1992)

10 AU Scale Halo Structure around DG Tauri. *Wen Ping Chen, R. R. Howell, M. Simon, & J. A. Benson.* 387, L43, 43-E8 (1992)

The Spatial Size of the SiO Masers in R Leonis Derived from Lunar Occultations. *J. Cernicharo, W. Brunswig, G. Paubert, & S. Liechti.* 423, L143, 61-C13 (1994)

Stellar Occultation of Polarized Light from Circumstellar Electrons. IV. Detached Binary Systems. *G. K. Fox.* 432, 262, 196-D10 (1994)

A Lunar Occultation and Direct Imaging Survey of Multiplicity in the Ophiuchus and Taurus Star-forming Regions. *M. Simon, A. M. Ghez, Ch. Leinert, L. Cassar, W. P. Chen, R. R. Howell, R. F. Jameson, K. Matthews, G. Neugebauer, & A. Richichi.* 443, 625, 106-E1 (1995)

OPACITIES

Mixing Length and Opacity Effects: Deep Convective Envelopes on the Asymptotic Giant Branch. *I.-Juliana Sackmann & Arnold I. Boothroyd.* 366, 529, 9-E7 (1991)

Opacities for the Solar Radiative Interior. *C. A. Iglesias & F. J. Rogers.* 371, 408, 65-C1 (1991)

Opacity Tables for Cepheid Variables. *Carlos A. Iglesias & Forrest J. Rogers.* 371, L73, 73-D1 (1991)

Ionization by High-Energy Particles and the Electron Scattering Opacity in Supernovae. *Douglas A. Swartz.* 373, 604, 95-D11 (1991)

Rosseland and Planck Mean Opacities of a Zero-Metallicity Gas. *Paolo Lenzuni, David F. Chernoff, & Edwin E. Salpeter.* 76, 759, 35-B13 (1991)

Lyman-Alpha Depression of the Continuum from High-Redshift Quasars: A New Technique Applied in Search of the Gunn-Peterson Effect. *Edward B. Jenkins & Jeremiah P. Ostriker.* 376, 33, 125-D9 (1991)

Continuum Opacity Produced by Spectral Lines in Supernovae and Similar Expansions. *Robert V. Wagoner, Christopher A. Perez, & Mary Vasu.* 377, 639, 147-E12 (1991)

The Effect of the Mihalas, Hummer, and Däppen Equation of State and the Molecular Opacity on the Standard Solar Model. *Y.-C. Kim, P. Demarque, & D. B. Guenther.* 378, 407, 156-A10 (1991)

Galactic Bulge M Giants. IV. 0.5–2.5 Micron Spectrophotometry and Abundances for Stars in Baade's Window. *D. M. Terndrup, Jay A. Frogel, & A. E. Whitford.* 378, 742, 161-E5 (1991)

Effects of Opacity and Equation of State on Solar Structure and Oscillations. *Joyce A. Guzik & Arthur N. Cox.* 381, 333, 193-B5 (1991)

Metal Opacities and Convective Core Overshooting in Population I Stars. *Richard B. Stothers & Chao-wen Chin.* 381, L67, 199-E7 (1991)

Masses of RR*d* Variables Using Livermore OPAL Opacities. *Arthur N. Cox.* 381, L71, 199-F1 (1991)

The Rosseland Mean Free-Free Gaunt Factor of the Dense High-Temperature Stellar Plasma. *Naoki Itoh, Fumiyoshi Kuwashima, Koki Ichihashi, & Haruhiko Mutoh.* 382, 636, 209-E1 (1991)

PARTICLE ACCELERATION

Oblique Mixed Shocks in Extragalactic Jets. *D. Fraix-Burnet & G. Pelletier.* 367, 86, 13-B1 (1991)

Heliospheric Effects on Cosmic-Ray Electrons. *H. Moraal, J. R. Jokipii, & R. A. Mewaldt.* 367, 191, 14-D8 (1991)

Universal Particle Acceleration. *J. I. Katz.* 367, 407, 18-E1 (1991)
On the Transport and Acceleration of Solar Flare Particles in a Coronal Loop. *James M. Ryan & Martin A. Lee.* 368, 316, 26-A7 (1991)
Problems of Ultra–High-Energy Particle Acceleration in Cygnus X-3: A Critical Reappraisal. *Abhas Mitra.* 370, 345, 51-E7 (1991)
Viscosity and Inertia in Cosmic-Ray Transport: Effects of an Average Magnetic Field. *L. L. Williams & J. R. Jokipii.* 371, 639, 69-E3 (1991)
Relativistic Electron Populations in Cassiopeia A. *M. Anderson, L. Rudnick, P. Leppik, R. Perley, & R. Braun.* 373, 146, 87-G4 (1991)
Transverse Conductivity of a Relativistic Plasma in Oblique Electric and Magnetic Fields. *Fulvio Melia & Marco Fatuzzo.* 373, 198, 88-D8 (1991)
A Slingshot Model for Solar Flares. *Gregory Benford.* 373, 671, 96-C9 (1991)
Cosmic-Ray Distribution and the Dynamic Balance in the Large Magellanic Cloud. *Carl E. Fichtel, Mehmet E. Özel, Robert G. Stone, & P. Sreekumar.* 374, 134, 99-F7 (1991)
Consequences of Strong Pitch-Angle Diffusion of Particles in Solar Flares. *P. A. Bespalov, V. V. Zaitsev, & A. V. Stepanov.* 374, 369, 102-F5 (1991)
Energy Degradation of Fast Electrons in Hydrogen Gas. *Yueming Xu & Richard McCray.* 375, 190, 113-D1 (1991)
Interrelation of Soft and Hard X-Ray Emissions during Solar Flares. I. Observations. *R. M. Winglee, A. L. Kiplinger, D. M. Zarro, G. A. Dulk, & J. R. Lemen.* 375, 366, 115-D13 (1991)
Interrelation of Soft and Hard X-Ray Emissions during Solar Flares. II. Simulation Model. *R. M. Winglee, G. A. Dulk, P. L. Bornmann, & J. C. Brown.* 375, 382, 115-F1 (1991)
Magnetohydrodynamic Turbulence Dissipation and Stochastic Proton Acceleration in Solar Flares. *James A. Miller.* 376, 342, 129-B11 (1991)
Transient Particle Acceleration in Strongly Magnetized Neutron Stars. *Fulvio Melia & Marco Fatuzzo.* 376, 673, 134-F7 (1991)
The Interaction of Collisionless Shocks in Astrophysical Plasmas. *P. J. Cargill.* 376, 771, 136-A1 (1991)
Particle Injection following Solar Flares on 1980 May 28 and June 8: Evidence for Different Injection Time Histories in Impulsive and Gradual Events? *M.-B. Kallenrode & G. Wibberenz.* 376, 787, 136-B8 (1991)
Cosmic-Ray Transport and Gamma-Ray Emission in Supernova Shells. *A. K. Harding, A. Mastichiadis, R. J. Protheroe, & A. P. Szabo.* 378, 163, 153-A9 (1991)
A Mechanism for Gamma-Ray Bursts by Alfvén-Wave Acceleration in a Nonuniform Atmosphere. *K. A. Holcomb & T. Tajima.* 378, 682, 160-G10 (1991)
Measurement of Cosmic-Ray Proton and Helium Spectra during the 1987 Solar Minimum. *E. S. Seo, J. F. Ormes, R. E. Streitmatter, S. J. Stochaj, W. V. Jones, S. A. Stephens, & T. Bowen.* 378, 763, 161-G1 (1991)
Center-to-Limb Variations of Characteristics of Solar Flare Hard X-Ray and Gamma-Ray Emission. *James M. McTiernan & Vahé Petrosian.* 379, 381, 167-F11 (1991)
A Measurement of the Cosmic-Ray ^{2}H and ^{3}He Spectra and ^{2}H/^{4}He and ^{3}He/^{4}He Ratios in 1989. *W. R. Webber, R. L. Golden, S. J. Stochaj, J. F. Ormes, & R. E. Strittmatter.* 380, 230, 178-G9 (1991)
Subthreshold Stochastic Diffusion with Application to Selective Acceleration of ^{3}He in Solar Flares. *Spilios Riyopoulos.* 381, 578, 197-G5 (1991)
Inverse-Compton Gamma-Ray Emission from Chaotic, Early-Type Stellar Winds and Its Detectability by *Gamma Ray Observatory*. *Wan Chen & Richard L. White.* 381, L63, 199-E1 (1991)
Electron Acceleration in a Nonlinear Shock Model with Applications to Supernova Remnants. *Donald C. Ellison & Stephen P. Reynolds.* 382, 242, 203-C1 (1991)
Outflows Driven by Cosmic-Ray Pressure in Broad Absorption Line QSOs. *Mitchell C. Begelman, Martijn de Kool, & Marek Sikora.* 382, 416, 206-F9 (1991)
Transient Particle Acceleration in Strongly Magnetized Neutron Stars. II. Effects Due to a Dipole Field Geometry. *Marco Fatuzzo & Fulvio Melia.* 382, 570, 208-E10 (1991)
Magnetized Supernova Remnants with Cosmic Rays. *Katia M. Ferrière & Ellen G. Zweibel.* 383, 602, 221-F11 (1991)
Formation of Dense Charged Bunches in Vacuum Gaps. *F. Curtis Michel.* 383, 808, 224-C6 (1991)
Gamma-Ray Bursts from Sheared Alfvén Waves. *Fulvio Melia & Marco Fatuzzo.* 383, L57, 226-D1 (1991)
High-Energy Gamma Rays from Polars. *P. Barrett, E. Schlegel, O. C. de Jager, & G. Chanmugam.* 450, 334, 232-E6 (1995)
Accuracy, Uncertainties, and Delay Distribution of Electron Time-of-Flight Measurements in Solar Flares. *Markus J. Aschwanden & Richard A. Schwartz.* 455, 699, 331-E6 (1995)

PHOTOMETRY

ESO 207-61: A Brown Dwarf Candidate in the Hyades Moving Group. *María Teresa Ruiz, Marianne Y. Takamiya, & Miguel Roth.* 367, L59, 22-C7 (1991)
The Brightness, Albedo, and Temporal Variability of Neptune. *G. W. Lockwood, D. T. Thompson, B. L. Lutz, & E. S. Howell.* 368, 287, 26-F1 (1991)
Light-Curve Inversion Formalism. *Walter J. Wild.* 368, 622, 32-G9 (1991)
The Imaging Performance of the *Hubble Space Telescope*. *Christopher J. Burrows, Jon A. Holtzman, S. M. Faber, Pierre Y. Bely, Hashima Hasan, C. R. Lynds, & Daniel Schroeder.* 369, L21, 45-C1 (1991)
Stellar Photometry with the *Hubble Space Telescope* Wide-Field/Planetary Camera: A Progress Report. *Jon A. Holtzman, Edward J. Groth, Robert M. Light, S. M. Faber, Deidre Hunter, Earl J. O'Neil, Jr., Edward J. Shaya, William A. Baum, Bel Campbell, Arthur Code, Douglas G. Currie, S. P. Ewald, J. Jeff Hester, T. Kelsall, Tod R. Lauer, Roger Lynds, Donald P. Schneider, P. Kenneth Seidelmann, & James A. Westphal.* 369, L35, 45-E1 (1991)
Bok Globules and Small Molecular Clouds: Deep *IRAS* Photometry and ^{12}CC Spectroscopy. *Dan P. Clemens, João Lin Yun, & Mark H. Heyer.* 75, 877, 13-E1 (1991)
Multicolor CCD Photometry of Globular Clusters in Two Virgo Elliptical Galaxies. *Jean Couture, William E. Harris, & J. W. B. Allwright.* 372, 97, 75-C1 (1991)
Rapid Ultraviolet Variability in the BL Lacertae Object PKS 2155−304. *R. A. Edelson, J. Saken, G. Pike, C. M. Urry, I. M. George, R. S. Warwick, H. R. Miller, M. T. Carini, & J. R. Webb.* 372, L9, 79-B5 (1991)
The Extraordinary 1989 December 14/15 Optical Flare Events on V711 Tauri. *Gregory W. Henry & Douglas S. Hall.* 373, L9, 91-B7 (1991)
The Structure and Evolution of Rich Star Clusters in the Large Magellanic Cloud. *Rebecca A. W. Elson.* 76, 185, 26-E9 (1991)
Diameters of Galactic Globular Clusters. *Sidney van den Bergh, Christopher Morbey, & John Pazder.* 375, 594, 120-B1 (1991)
Photoelectric *UBV* Photometry of Stars Selected in the HK Objective-Prism Survey. *George W. Preston, Stephen A. Shectman, & Timothy C. Beers.* 76, 1001, 38-G5 (1991)
UBV Photometry of OB$^+$ Stars in the Southern Milky Way. *J. S. Drilling.* 76, 1033, 39-C11 (1991)
UBVRI Photometry of Stars in the Fields of X-Ray Selected BL Lacertae Objects. *Paul S. Smith, Buell T. Jannuzi, & Richard Elston.* 77, 67, 44-D1 (1991)
Infrared Images, Virgo Spirals, and the Tully-Fisher Law. *R. F. Peletier & S. P. Willner.* 382, 382, 206-C13 (1991)
Optical Polarimetry of PKS 2155−304 and Constraints on Accretion Disk Models for BL Lacertae Objects. *Paul S. Smith & Michael L. Sitko.* 383, 580, 221-D9 (1991)

PLANETS: ABUNDANCES

Detection of ^{13}C-Ethane in Jupiter's Atmosphere. *Günter Wiedemann, Gordon L. Bjoraker, & Donald E. Jennings.* 383, L29, 219-D7 (1991)

PLANETS: ATMOSPHERES

What Maintains the Zonal Circulation in Planetary Atmospheres? *H. G. Mayr, K. L. Chan, I. Harris, & K. Schatten.* 367, 361, 16-E1 (1991)
Atomic Oxygen Fine-Structure Splittings with Tunable Far-Infrared Spectroscopy. *Lyndon R. Zink, Kenneth M. Evenson, Fusakazu Matsushima, Thomas Nelis, & Ruth L. Robinson.* 371, L85, 73-E3 (1991)
First Absolute Wind Measurements in the Middle Atmosphere of Mars. *Emmanuel Lellouch, Jeffrey J. Goldstein, Stephen W. Bougher, Gabriel Paubert, & Jan Rosenqvist.* 383, 401, 217-C5 (1991)
Detection of ^{13}C-Ethane in Jupiter's Atmosphere. *Günter Wiedemann, Gordon L. Bjoraker, & Donald E. Jennings.* 383, L29, 219-D7 (1991)

PLANETS: CHARGED PARTICLES

Determination of Ionic Abundances in the Io Torus Using the Hopkins Ultraviolet Telescope. *H. W. Moos, P. D. Feldman, S. T. Durrance, W. P. Blair, C. W. Bowers, A. F. Davidsen, W. V. Dixon, H. C. Ferguson, R. C. Henry, R. A. Kimble, G. A. Kriss, J. W. Kruk, K. S. Long, & O. Vancura.* 382, L105, 211-F3 (1991)

PLANETS: FORMATION

The Dynamical Evolution of the Protosolar Nebula. *Steven P. Ruden & James B. Pollack.* 375, 740, 121-G11 (1991)

Dynamo Magnetic Field Modes in Thin Astrophysical Disks: An Adiabatic Computational Approximation. *T. F. Stepinski & E. H. Levy.* 379, 343, 167-C9 (1991)

The Origin of the Planet around PSR 1829−10. *Takashi Nakamura & Tsvi Piran.* 382, L81, 211-C13 (1991)

Gravitational Instabilities in a Proto–Planetary Disk. *Hyerim Noh, Ethan T. Vishniac, & William D. Cochran.* 383, 372, 217-A1 (1991)

PLANETS: GENERAL

Gravitational Microlensing by Double Stars and Planetary Systems. *Shude Mao & Bohdan Paczyński.* 374, L37, 110-B11 (1991)

A Model for Tidally Driven Eccentric Instabilities in Fluid Disks. *Stephen H. Lubow.* 381, 259, 192-B12 (1991)

PLANETS: INTERIORS

Cold Nuclear Fusion in Dense Metallic Hydrogen. *Charles J. Horowitz.* 367, 288, 15-E13 (1991)

What Maintains the Zonal Circulation in Planetary Atmospheres? *H. G. Mayr, K. L. Chan, I. Harris, & K. Schatten.* 367, 361, 16-E1 (1991)

PLANETS: JUPITER

What Maintains the Zonal Circulation in Planetary Atmospheres? *H. G. Mayr, K. L. Chan, I. Harris, & K. Schatten.* 367, 361, 16-E1 (1991)

The Structure of Io's Corona. *N. M. Schneider, D. M. Hunten, W. K. Wells, A. B. Schultz, & U. Fink.* 368, 298, 27-G1 (1991)

The Cyclotron Maser Instability: Application to Low-Density Magnetoplasmas. *H. P. Ladreiter.* 370, 419, 52-D12 (1991)

Dielectronic Recombination Rate Coefficients for S^{q+} (q = 1–5) Ions. *N. R. Badnell.* 379, 356, 167-D9 (1991)

Detection of ^{13}C-Ethane in Jupiter's Atmosphere. *Günter Wiedemann, Gordon L. Bjoraker, & Donald E. Jennings.* 383, L29, 219-D7 (1991)

PLANETS: MAGNETOSPHERES

The Cyclotron Maser Instability: Application to Low-Density Magnetoplasmas. *H. P. Ladreiter.* 370, 419, 52-D12 (1991)

Determination of Ionic Abundances in the Io Torus Using the Hopkins Ultraviolet Telescope. *H. W. Moos, P. D. Feldman, S. T. Durrance, W. P. Blair, C. W. Bowers, A. F. Davidsen, W. V. Dixon, H. C. Ferguson, R. C. Henry, R. A. Kimble, G. A. Kriss, J. W. Kruk, K. S. Long, & O. Vancura.* 382, L105, 211-F3 (1991)

PLANETS: MARS

First Absolute Wind Measurements in the Middle Atmosphere of Mars. *Emmanuel Lellouch, Jeffrey J. Goldstein, Stephen W. Bougher, Gabriel Paubert, & Jan Rosenqvist.* 383, 401, 217-C5 (1991)

PLANETS: NEPTUNE

What Maintains the Zonal Circulation in Planetary Atmospheres? *H. G. Mayr, K. L. Chan, I. Harris, & K. Schatten.* 367, 361, 16-E1 (1991)

The Brightness, Albedo, and Temporal Variability of Neptune. *G. W. Lockwood, D. T. Thompson, B. L. Lutz, & E. S. Howell.* 368, 287, 26-F1 (1991)

PLANETS: PLUTO

Light-Curve Inversion Formalism. *Walter J. Wild.* 368, 622, 32-G9 (1991)

First Results from the Faint Object Camera: High-Resolution Imaging of the Pluto-Charon System. *R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, & W. B. Sparks.* 374, L65, 110-E5 (1991)

PLANETS: SATELLITES

The Structure of Io's Corona. *N. M. Schneider, D. M. Hunten, W. K. Wells, A. B. Schultz, & U. Fink.* 368, 298, 27-G1 (1991)

Dielectronic Recombination Rate Coefficients for S^{q+} (q = 1–5) Ions. *N. R. Badnell.* 379, 356, 167-D9 (1991)

Determination of Ionic Abundances in the Io Torus Using the Hopkins Ultraviolet Telescope. *H. W. Moos, P. D. Feldman, S. T. Durrance, W. P. Blair, C. W. Bowers, A. F. Davidsen, W. V. Dixon, H. C. Ferguson, R. C. Henry, R. A. Kimble, G. A. Kriss, J. W. Kruk, K. S. Long, & O. Vancura.* 382, L105, 211-F3 (1991)

Non–LTE Models of Titan's Upper Atmosphere. *Roger V. Yelle.* 383, 380, 217-A10 (1991)

PLANETS: SATURN

On the Radial Structure of Saturn's B Ring. *Lin-Hua Shan & C. K. Goertz.* 367, 350, 16-D1 (1991)

Hubble Space Telescope Wide-Field/Planetary Camera Images of Saturn. *James A. Westphal, William A. Baum, Tod R. Lauer, G. Edward Danielson, Douglas G. Currie, S. P. Ewald, S. M. Faber, Edward J. Groth, J. Jeff Hester, Robert M. Light, Roger Lynds, Earl J. O'Neil, Jr., P. Kenneth Seidelmann, Edward J. Shaya, & Bradford A. Smith.* 369, L51, 45-G1 (1991)

The Cyclotron Maser Instability: Application to Low-Density Magnetoplasmas. *H. P. Ladreiter.* 370, 419, 52-D12 (1991)

Non–LTE Models of Titan's Upper Atmosphere. *Roger V. Yelle.* 383, 380, 217-A10 (1991)

PLANETS: SPECTRA

The Brightness, Albedo, and Temporal Variability of Neptune. *G. W. Lockwood, D. T. Thompson, B. L. Lutz, & E. S. Howell.* 368, 287, 26-F1 (1991)

Discovery of a Doppler-limited CO Line in the Upper Mesosphere of Venus: A New Dynamical Probe. *David Buhl, Gordon Chin, & Jeffrey J. Goldstein.* 369, L17, 40-C1 (1991)

Detection of ^{13}C-Ethane in Jupiter's Atmosphere. *Günter Wiedemann, Gordon L. Bjoraker, & Donald E. Jennings.* 383, L29, 219-D7 (1991)

PLANETS: VENUS

What Maintains the Zonal Circulation in Planetary Atmospheres? *H. G. Mayr, K. L. Chan, I. Harris, & K. Schatten.* 367, 361, 16-E1 (1991)

Discovery of a Doppler-limited CO Line in the Upper Mesosphere of Venus: A New Dynamical Probe. *David Buhl, Gordon Chin, & Jeffrey J. Goldstein.* 369, L17, 40-C1 (1991)

PLANETS AND SATELLITES: GENERAL

Occurrence of Global-Scale Emissions on Jupiter: Proposed Identification of Jovian Dimer H_2 Emission. *L. M. Trafton & J. K. G. Watson.* 385, 320, 15-G8 (1992)

Gamma-Ray Bursts from Planet-Magnetosphere Systems around Neutron Stars. *Hitoshi Hanami.* 389, L71, 73-D11 (1992)

VLA Imaging of a Possible Circumstellar Disk around HL Tauri. *L. F. Rodríguez, J. Cantó, J. M. Torrelles, J. F. Gómez, & P. T. P. Ho.* 393, L29, 120-E1 (1992)

Probing the Heliosphere with Energetic Hydrogen Atoms. *K. C. Hsieh, K. L. Shih, J. R. Jokipii, & S. Grzedzielski.* 393, 756, 125-C1 (1992)

Evidence for Unseen Companions around T Tauri Stars. *Kenneth A. Marsh & Michael J. Mahoney.* 395, L115, 154-D1 (1992)

On the Detectability of the Gas of Other Solar Nebulae. *Toshihiro Omodaka, Yoshimi Kitamura, & Eiko Kawazoe.* 396, L87, 167-C7 (1992)

γ Cephei: Rotation or Planetary Companion? *Gordon A. H. Walker, David A. Bohlender, Andrew R. Walker, Alan W. Irwin, Stephenson L. S. Yang, & Ana Larson.* 396, L91, 167-D1 (1992)

A Survey of Bimolecular Ion-Molecule Reactions for Use in Modeling the Chemistry of Planetary Atmospheres, Cometary Comae, and Interstellar Clouds: 1993 Supplement. *V. G. Anicich.* 84, 215, 4-C11 (1993)

Gravitational Tides in the Outer Planets. I. Implications of Classical Tidal Theory. *Petros J. Ioannou & Richard S. Lindzen.* 406, 252, 58-B12 (1993)

Genesis of a Planet in Messier 4. *Steinn Sigurdsson.* 415, L43, 192-B13 (1993)

Disk-Satellite Interaction via Density Waves and the Eccentricity Evolution of Bodies Embedded in Disks. *Paweł Artymowicz.* 419, 166, 248-C1 (1993)

Thermal Behavior of Rocky Material in Contact with Ice. *Norbert I. Kömle, Gerhard Steiner, & Eberhard Grün.* 421, 350, 20-C9 (1994)

Sources and Acceleration of Energetic Particles in Planetary Magnetospheres. *Eberhard Möbius.* 90, 521, 10-C1 (1994)

Gravitational Instabilities in a Proto–Planetary Disk Including the Effects of Magnetic Fields. *Hyerim Noh, Ethan T. Vishniac, & William D. Cochran.* 428, 275, 131-E9 (1994)

Hubble Space Telescope Goddard High-Resolution Spectrograph H_2 Rotational Spectra of Jupiter's Aurora. *John T. Clarke, Lotfi Ben Jaffel, Alfred Vidal-Madjar, G. Randall Gladstone, J. Hunter Waite, Jr., Renee Prangé, Jean-Claude Gérard, Joe Ajello, & Geoffrey James.* 430, L73, 166-C1 (1994)

Disk Tides and Accretion Runaway. *William R. Ward & Joseph M. Hahn.* 440, L25, 48-E1 (1995)

Magnetic Moments and Angular Momenta of Stars and Planets. *C. N. Arge, D. J. Mullan, & A. Z. Dolginov.* 443, 795, 108-G1 (1995)

Improved Bounds on Nonluminous Matter in Solar Orbit. *John D. Anderson, Eunice L. Lau, Timothy P. Krisher, Duane A. Dicus, Doris C. Rosenbaum, & Vigdor L. Teplitz.* 448, 885, 207-B7 (1995)

Optimization and Performance of Adaptive Optics for Imaging Extrasolar Planets. *Steven M. Stahl & David G. Sandler.* 454, L153, 316-F13 (1995)

PLANETS AND SATELLITES: INDIVIDUAL

Charon

High-Resolution Imaging of the Pluto-Charon System with the Faint Object Camera of the *Hubble Space Telescope*. *R. Albrecht, C. Barbieri, H.-M. Adorf, G. Corrain, A. Gemmo, P. Greenfield, O. Hainaut, R. N. Hook, D. J. Tholen, J. C. Blades, & W. B. Sparks.* 435, L75, 252-G3 (1994)

Hyperion

Topological Analysis of Chaotic Orbits: Revisiting Hyperion. *Patricia T. Boyd, Gabriel B. Mindlin, Robert Gilmore, & Hernán G. Solari.* 431, 425, 181-C12 (1994)

Io

Detection of [O III] λ5007 Emission from the Io Plasma Torus. *Nicolas Thomas.* 414, L41, 175-G2 (1993)

Detection of [O II] λ2471 from the Io Plasma Torus. *M. A. McGrath, P. D. Feldman, D. F. Strobel, H. W. Moos, & G. E. Ballester.* 415, L55, 192-D7 (1993)

Resonance Scattering by Mercurian Sodium. *Donald M. Hunten & Lloyd V. Wallace.* 417, 757, 228-G6 (1993)

Hopkins Ultraviolet Telescope Determination of the Io Torus Electron Temperature. *D. T. Hall, C. J. Bednar, S. T. Durrance, P. D. Feldman, M. A. McGrath, H. W. Moos, & D. F. Strobel.* 420, L45, 7-F7 (1994)

Extreme Ultraviolet Explorer Satellite Observation of Jupiter's Io Plasma Torus. *D. T. Hall, G. R. Gladstone, H. W. Moos, F. Bagenal, J. T. Clarke, P. D. Feldman, M. A. McGrath, N. M. Schneider, D. E. Shemansky, D. F. Strobel, & J. H. Waite.* 426, L51, 103-G1 (1994)

Fabry-Perot Imaging of O III λ = 5007 Å Emission in the Io Plasma Torus. *M. Küppers & K. Jockers.* 441, L101, 76-E4 (1995)

Neutral Sulfur Emission from the Io Torus Measured with the Hopkins Ultraviolet Telescope. *Samuel T. Durrance, Paul D. Feldman, William P. Blair, Arthur F. Davidsen, Gerard A. Kriss, Jeffrey W. Kruk, Knox S. Long, & H. Warren Moos.* 447, 408, 178-A10 (1995)

The Structure of the Io Torus. *Nicholas M. Schneider & John T. Trauger.* 450, 450, 234-B13 (1995)

Jupiter

Methane Band Photometry of the Faded South Equatorial Belt of Jupiter. *Takehiko Satoh & Kiyoshi Kawabata.* 384, 298, 4-F1 (1992)

Occurrence of Global-Scale Emissions on Jupiter: Proposed Identification of Jovian Dimer H_2 Emission. *L. M. Trafton & J. K. G. Watson.* 385, 320, 15-G8 (1992)

The Abundance and Distribution of Water Vapor in the Jovian Troposphere as Inferred from *Voyager* IRIS Observations. *Barbara E. Carlson, Andrew A. Lacis, & William B. Rossow.* 388, 648, 58-C7 (1992)

The Molecular-Metallic Transition of Hydrogen and the Structure of Jupiter and Saturn. *Gilles Chabrier, Didier Saumon, William B. Hubbard, & Jonathan I. Lunine.* 391, 817, 98-B1 (1992)

The Role of the Molecular-metallic Transition of Hydrogen in the Evolution of Jupiter, Saturn, and Brown Dwarfs. *Didier Saumon, William B. Hubbard, Gilles Chabrier, & Hugh M. Van Horn.* 391, 827, 98-B13 (1992)

Ortho-para–Hydrogen Equilibration on Jupiter. *Barbara E. Carlson, Andrew A. Lacis, & William B. Rossow.* 393, 357, 118-E6 (1992)

On the Inclusion of the Hydrogen Dimer in the Analysis of *Voyager* IRIS Spectra. *Barbara E. Carlson, Qiancheng Ma, & Andrew A. Lacis.* 394, L29, 133-D10 (1992)

Inertial Mode Oscillations of Jupiter. *Umin Lee, Tod E. Strohmayer, & H. M. Van Horn.* 397, 674, 179-D10 (1992)

Line-resolved Spectroscopy of the Jovian H_3^+ Auroral Emission at 3.5 Micrometers. *Pierre Drossart, Jean-Pierre Maillard, John Caldwell, & Jan Rosenqvist.* 402, L25, 6-E1 (1993)

Acoustic Oscillations of Jupiter. *Umin Lee.* 405, 359, 45-E12 (1993)

Gravitational Tides in the Outer Planets. II. Interior Calculations and Estimation of the Tidal Dissipation Factor. *Petros J. Ioannou & Richard S. Lindzen.* 406, 266, 58-D1 (1993)

The Spectrum of the Jovian Dayglow Observed at 3 Å Resolution with the Hopkins Ultraviolet Telescope. *P. D. Feldman, M. A. McGrath, H. W. Moos, S. T. Durrance, D. F. Strobel, & A. F. Davidsen.* 406, 279, 58-E1 (1993)

Polycyclic Aromatic Hydrocarbons in the Atmospheres of Titan and Jupiter. *Carl Sagan, B. N. Khare, W. R. Thompson, G. D. McDonald, Michael R. Wing, Jeffrey L. Bada, Tuan Vo-Dinh, & E. T. Arakawa.* 414, 399, 175-A3 (1993)

Detection of [O II] λ2471 from the Io Plasma Torus. *M. A. McGrath, P. D. Feldman, D. F. Strobel, H. W. Moos, & G. E. Ballester.* 415, L55, 192-D7 (1993)

Hopkins Ultraviolet Telescope Determination of the Io Torus Electron Temperature. *D. T. Hall, C. J. Bednar, S. T. Durrance, P. D. Feldman, M. A. McGrath, H. W. Moos, & D. F. Strobel.* 420, L45, 7-F7 (1994)

High-Resolution Spectra of Jupiter's Northern Auroral Ultraviolet Emission with the *Hubble Space Telescope*. *L. M. Trafton, J. C. Gérard, G. Munhoven, & J. H. Waite, Jr.* 421, 816, 28-D3 (1994)

Jupiter Radio Bursts and Particle Acceleration. *Michael D. Desch.* 90, 541, 10-D10 (1994)

A Non-LTE Model for the Jovian Methane Infrared Emissions at High Spectral Resolution. *Rangasayi N. Halthore, J. E. Allen, Jr., & Philip L. DeCola.* 424, L61, 70-A4 (1994)

Gravitational Tides on Jupiter. III. Atmospheric Response and Mean Flow Acceleration. *Petros J. Ioannou & Richard S. Lindzen.* 424, 1005, 77-C10 (1994)

Extreme Ultraviolet Explorer Satellite Observation of Jupiter's Io Plasma Torus. *D. T. Hall, G. R. Gladstone, H. W. Moos, F. Bagenal, J. T. Clarke, P. D. Feldman, M. A. McGrath, N. M. Schneider, D. E. Shemansky, D. F. Strobel, & J. H. Waite.* 426, L51, 103-G1 (1994)

Seismological Consequences of the Collision of Shoemaker-Levy/9 with Jupiter. *Mark S. Marley.* 427, L63, 118-A9 (1994)

Global Oscillation Amplitudes Excited by the Jupiter-Comet Collision. *U. Lee & H. M. Van Horn.* 428, L41, 134-F5 (1994)

Explosions of Infalling Comets in Jupiter's Atmosphere. *Roger A. Chevalier & Craig L. Sarazin.* 429, 863, 156-D6 (1994)

Neutral Cloud Theory of the Jovian Nebula: Anomalous Ionization Effect of Superthermal Electrons. *D. D. Barbosa.* 430, 376, 163-G10 (1994)

Hubble Space Telescope Goddard High-Resolution Spectrograph H_2 Rotational Spectra of Jupiter's Aurora. *John T. Clarke, Lotfi Ben Jaffel, Alfred Vidal-Madjar, G. Randall Gladstone, J. Hunter Waite, Jr., Renee Prangé, Jean-Claude Gérard, Joe Ajello, & Geoffrey James.* 430, L73, 166-C1 (1994)

Explosion of Comet Shoemaker-Levy 9 on Entry into the Jovian Atmosphere. *Mordecai-Mark Mac Low & Kevin Zahnle.* 434, L33, 232-E11 (1994)

The Behavior of Fragments of Comet Shoemaker-Levy 9 in the Atmosphere of Jupiter. *G. B. Field & A. Ferrara.* 438, 957, 17-C11 (1995)

On the Injection of Fine Dust from the Jovian Magnetosphere. *D. Maravilla, K. R. Flammer, & D. A. Mendis.* 438, 968, 17-D11 (1995)

Excitation of Low-Order Jovian *p*-Modes by Cometary Impacts. *Andrew J. Dombard & Stephen P. Boughn.* 443, L89, 112-B11 (1995)

High-Resolution Ultraviolet Spectroscopy of Jupiter's Aurora with the *Hubble Space Telescope*. *Y. H. Kim, J. J. Caldwell, & J. L. Fox.* 447, 906, 188-D3 (1995)

The Structure of the Io Torus. *Nicholas M. Schneider & John T. Trauger.* 450, 450, 234-B13 (1995)

Effect of Radiative Transport on the Evolution of Jupiter and Saturn. *T. Guillot, G. Chabrier, D. Gautier, & P. Morel.* 450, 463, 234-D4 (1995)

Detection of $H_2{}^{18}O$ in Jupiter. *Keith S. Noll, T. R. Geballe, & Roger F. Knacke.* 453, L49, 290-A11 (1995)

The Ultraviolet Reflectivity of Jupiter at 3.5 Å Resolution from Astro-1 and Astro-2. *Patrick F. Morrissey, Paul D. Feldman, Melissa A. McGrath, Brian C. Wolven, & H. Warren Moos.* 454, L65, 308-E2 (1995)

Mercury

Subsurface Emissions from Mercury: VLA Radio Observations at 2 and 6 Centimeters. *Michael J. Ledlow, Jack O. Burns, Galen R. Gisler, Jun-Hui Zhao, Michael Zeilik, & Daniel N. Baker.* 384, 640, 10-B1 (1992)

Resonance Scattering by Mercurian Sodium. *Donald M. Hunten & Lloyd V. Wallace.* 417, 757, 228-G6 (1993)

On the Surface Sputtering Effects of Magnetospheric Charged Particles at Mercury. *W.-H. Ip.* 418, 451, 236-E12 (1993)

Theoretical Overview and Modeling of the Sodium and Potassium Atmospheres of Mercury. *William H. Smyth & M. L. Marconi.* 441, 839, 73-E12 (1995)

Neptune

Millimeter-Wave Observations of Saturn, Uranus, and Neptune: CO and HCN on Neptune. *Jan Rosenqvist, Emmanuel Lellouch, Paul N. Romani, Gabriel Paubert, & Thérèse Encrenaz.* 392, L99, 113-G1 (1992)

First Observations of CO and HCN on Neptune and Uranus at Millimeter Wavelengths and Their Implications for Atmospheric Chemistry. *A. Marten, D. Gautier, T. Owen, D. B. Sanders, H. E. Matthews, S. K. Atreya, R. P. J. Tilanus, & J. R. Deane.* 406, 285, 58-E9 (1993)

Pluto

High-Resolution Imaging of the Pluto-Charon System with the Faint Object Camera of the *Hubble Space Telescope*. *R. Albrecht, C. Barbieri, H.-M. Adorf, G. Corrain, A. Gemmo, P. Greenfield, O. Hainaut, R. N. Hook, D. J. Tholen, J. C. Blades, & W. B. Sparks.* 435, L75, 252-G3 (1994)

Saturn

The Molecular-Metallic Transition of Hydrogen and the Structure of Jupiter and Saturn. *Gilles Chabrier, Didier Saumon, William B. Hubbard, & Jonathan I. Lunine.* 391, 817, 98-B1 (1992)

The Role of the Molecular-metallic Transition of Hydrogen in the Evolution of Jupiter, Saturn, and Brown Dwarfs. *Didier Saumon, William B. Hubbard, Gilles Chabrier, & Hugh M. Van Horn.* 391, 827, 98-B13 (1992)

Millimeter-Wave Observations of Saturn, Uranus, and Neptune: CO and HCN on Neptune. *Jan Rosenqvist, Emmanuel Lellouch, Paul N. Romani, Gabriel Paubert, & Thérèse Encrenaz.* 392, L99, 113-G1 (1992)

Detection of H_3^+ Infrared Emission Lines in Saturn. *T. R. Geballe, M.-F. Jagod, & T. Oka.* 408, L109, 95-F7 (1993)

On the Nature of the Polarization Opposition Effect Exhibited by Saturn's Rings. *Michael I. Mishchenko.* 411, 351, 131-F1 (1993)

Topological Analysis of Chaotic Orbits: Revisiting Hyperion. *Patricia T. Boyd, Gabriel B. Mindlin, Robert Gilmore, & Hernán G. Solari.* 431, 425, 181-C12 (1994)

Effect of Radiative Transport on the Evolution of Jupiter and Saturn. *T. Guillot, G. Chabrier, D. Gautier, & P. Morel.* 450, 463, 234-D4 (1995)

Titan

Polycyclic Aromatic Hydrocarbons in the Atmospheres of Titan and Jupiter. *Carl Sagan, B. N. Khare, W. R. Thompson, G. D. McDonald, Michael R. Wing, Jeffrey L. Bada, Tuan Vo-Dinh, & E. T. Arakawa.* 414, 399, 175-A3 (1993)

Uranus

Millimeter-Wave Observations of Saturn, Uranus, and Neptune: CO and HCN on Neptune. *Jan Rosenqvist, Emmanuel Lellouch, Paul N. Romani, Gabriel Paubert, & Thérèse Encrenaz.* 392, L99, 113-G1 (1992)

Detection of H_3^+ from Uranus. *L. M. Trafton, T. R. Geballe, S. Miller, J. Tennyson, & G. E. Ballester.* 405, 761, 52-E1 (1993)

First Observations of CO and HCN on Neptune and Uranus at Millimeter Wavelengths and Their Implications for Atmospheric Chemistry. *A. Marten, D. Gautier, T. Owen, D. B. Sanders, H. E. Matthews, S. K. Atreya, R. P. J. Tilanus, & J. R. Deane.* 406, 285, 58-E9 (1993)

PLASMAS

Three-dimensional Kinematic Reconnection of Plasmoids. *Yun-Tung Lau & John M. Finn.* 366, 577, 10-B11 (1991)

Saturation of the Synchrotron Megamaser. *André R. Crusius-Wätzel.* 368, 390, 30-A1 (1991)

Formulae for the Cyclotron Luminosity of Magnetized Plasma Slabs. *G. Chanmugam & Steven H. Langer.* 368, 580, 32-C11 (1991)

Luminosity Enhancement Factor for Thermal Comptonization and the Electron Energy Balance. *C. D. Dermer, E. P. Liang, & E. Canfield.* 369, 410, 42-G5 (1991)

The Finite-Amplitude Behavior of the Joule Mode under Astrophysical Conditions. *G. Bodo, S. Massaglia, R. Rosner, & A. Ferrari.* 370, 398, 52-C1 (1991)

The Cyclotron Maser Instability: Application to Low-Density Magnetoplasmas. *H. P. Ladreiter.* 370, 419, 52-D12 (1991)

Mechanisms for Pulsar Eclipse. *David Eichler.* 370, L27, 53-D11 (1991)

On the Thermal Stability of Slabs, Cylinders, and Spheres. *Miguel H. Ibáñez S., & Florencio P. Plachco M.* 370, 743, 57-F1 (1991)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. I. The Issues, Formulation of the Problem, and Method of Solution. *Telemachos Ch. Mouschovias & Scott A. Morton.* 371, 296, 63-G1 (1991)

Densities and Abundances of Hot Cometary Ions in the Coma of P/Halley. *M. Neugebauer, R. Goldstein, B. E. Goldstein, S. A. Fuselier, H. Balsiger, & W.-H. Ip.* 372, 291, 77-E6 (1991)

Solar and Stellar Radio Spikes: Limits on the Saturation of the Electron-Cyclotron Maser. *Donat G. Wentzel & Markus J. Aschwanden.* 372, 688, 84-C1 (1991)

Magnetic Braking, Ambipolar Diffusion, Cloud Cores, and Star Formation: Natural Length Scales and Protostellar Masses. *Telemachos Ch. Mouschovias.* 373, 169, 88-B3 (1991)

Direct Radiation from a Strong DC Electric Field. *Donat G. Wentzel.* 373, 285, 89-E3 (1991)

Accurate Collision Integrals for the Attractive Static Screened Coulomb Potential with Application to Electrical Conductivity. *James MacDonald.* 76, 369, 29-F3 (1991)

Rosseland and Planck Mean Opacities of a Zero-Metallicity Gas. *Paolo Lenzuni, David F. Chernoff, & Edwin E. Salpeter.* 76, 759, 35-B13 (1991)

Siphon Flows in Isolated Magnetic Flux Tubes. IV. Critical Flows with Standing Tube Shocks. *John H. Thomas & Benjamin Montesinos.* 375, 404, 115-G11 (1991)

The Dissipation of Magnetohydrodynamic Turbulence Responsible for Interstellar Scintillation and the Heating of the Interstellar Medium. *Steven R. Spangler.* 376, 540, 133-B5 (1991)

The Interaction of Collisionless Shocks in Astrophysical Plasmas. *P. J. Cargill.* 376, 771, 136-A1 (1991)

Asymptotic Structure of Hydromagnetically Driven Relativistic Winds. *Tzihong Chiueh, Zhi-yun Li, & Mitchell C. Begelman.* 377, 462, 145-D11 (1991)

The O VII Soft X-Ray Spectrum and Its Application to Hot Plasmas in Astrophysics. *A. H. Gabriel, F. Bely-Dubau, P. Faucher, & L. W. Acton.* 378, 438, 156-D1 (1991)

Coherent Radiation from Energetic Electron Streams via Collisionless Bremsstrahlung in Strong Plasma Turbulence. *James C. Weatherall & Gregory Benford.* 378, 543, 159-B8 (1991)

Joule Heating as an Explanation for the Differential Emission Measure Structure and Systematic Redshifts in the Sun's Lower Transition Region. *George Roumeliotis.* 379, 392, 167-G9 (1991)

Propagation of Magnetoacoustic Waves in the Solar Atmosphere with Random Inhomogeneities of Density and Magnetic Fields. *M. Ryutova, M. Kaisig, & T. Tajima.* 380, 268, 179-D1 (1991)

Magnetic Field–aligned Electric Potentials in Nonideal Plasma Flows. *K. Schindler, M. Hesse, & J. Birn.* 380, 293, 179-G9 (1991)

Collisional Rates and Cooling within Atomic Hydrogen Plasmas. *T. T. Scholz & H. R. J. Walters.* 380, 302, 180-A5 (1991)

Avalanches and the Distribution of Solar Flares. *Edward T. Lu & Russell J. Hamilton.* 380, L89, 188-F5 (1991)

Magnetoacoustic Heating of the Solar Chromosphere. *Joseph M. Davila & S. M. Chitre.* 381, L31, 194-D12 (1991)

The Rosseland Mean Free-Free Gaunt Factor of the Dense High-Temperature Stellar Plasma. *Naoki Itoh, Fumiyoshi Kuwashima, Koki Ichihashi, & Haruhiko Mutoh.* 382, 636, 209-E1 (1991)

Coronal Evolution Due to Shear Motion. *R. S. Steinolfson.* 382, 677, 210-A13 (1991)

Level Populations for Fe III Applicable to Astrophysical Plasmas and a Comparison with Planetary Nebula Observations. *F. P. Keenan, K. A. Berrington, P. G. Burke, C. J. Zeippen, M. Le Dourneuf, & R. E. S. Clegg.* 384, 385, 5-F7 (1992)

Resonance Line Radiation Instability in Fully Ionized Plasmas. *William G. Mathews.* 386, 90, 25-C1 (1992)

Connection between Ambient Density Fluctuations and Clumpy Langmuir Waves in Type III Radio Sources. *P. A. Robinson, I. H. Cairns, & D. A. Gurnett.* 387, L101, 48-F1 (1992)

Close Encounters in Coulomb and Gravitational Scattering. I. Relaxation of Isotropic Test-Particle Distributions by Like-Particle Collisions. *Edward C. Shoub.* 389, 558, 68-D8 (1992)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. II. Results and a Length Scale for Protostellar Cores. *Telemachos Ch. Mouschovias & Scott A. Morton.* 390, 144, 75-G1 (1992)

Ambipolar Diffusion, Cloud Cores, and Star Formation: Two-dimensional, Cylindrically Symmetric Contraction. III. A Further Parameter Study and Magnetically Controlled Accretion Rate. *Telemachos Ch. Mouschovias & Scott A. Morton.* 390, 166, 76-A11 (1992)

On the Thermal Conductivity due to Collisions between Relativistic Degenerate Electrons. *F. X. Timmes.* 390, L107, 85-D9 (1992)

Relativistic, Perpendicular Shocks in Electron-Positron Plasmas. *Yves A. Gallant, Masahiro Hoshino, A. Bruce Langdon, Jonathan Arons, & Claire E. Max.* 391, 73, 87-A1 (1992)

X-Ray Emission-Line Spectra of Photoionized Plasmas: Density Sensitivity of the Fe L-Shell Series. *Duane A. Liedahl, Steven M. Kahn, Albert L. Osterheld, & William H. Goldstein.* 391, 306, 89-F11 (1992)

The Production of ^{3}He and Heavy Ion Enrichments in ^{3}He-rich Flares by Electromagnetic Hydrogen Cyclotron Waves. *M. Temerin & I. Roth.* 391, L105, 100-B1 (1992)

Neutrino Emissivity of an Ultrarelativistic Plasma from Positron and Plasmino Annihilation. *Eric Braaten.* 392, 70, 101-G7 (1992)

Self-similar Evolution of Magnetized Plasmas. I. Quasi-static Solution. *Wei-Hong Yang.* 392, 465, 108-B1 (1992)

Stochastic Gyroresonant Electron Acceleration in a Low-Beta Plasma. I. Interaction with Parallel Transverse Cold Plasma Waves. *Jürgen Steinacker & James A. Miller.* 393, 764, 125-C10 (1992)

Microwave Transition Radiation in Solar Flares and in Astrophysics. *G. D. Fleishman & S. W. Kahler.* 394, 688, 138-A11 (1992)

Magnetized Stimulated Scattering in Pulsar Winds. *Mark W. Sincell & Julian H. Krolik.* 395, 553, 149-F7 (1992)

Incompressible Disturbances in Nonuniform Media: Formation of Small Scales. *Francesco Malara, Pierluigi Veltri, Claudio Chiuderi, & Giorgio Einaudi.* 396, 297, 158-F13 (1992)

Propagation of Sound and Thermal Waves in a Plasma with Solar Abundances. *Miguel H. Ibáñez S., & Néstor M. Sánchez D.* 396, 717, 166-C1 (1992)

First-Order Fermi Acceleration in Spherically Symmetric Flows: Solutions Including Quadratic Losses. *Peter A. Becker.* 397, 88, 169-B6 (1992)

On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. I. General Results. *Miguel H. Ibáñez S., Antonio Parravano, & César A. Mendoza B.* 398, 177, 184-B1 (1992)

On the Causes of Temperature Change in Inhomogeneous Low-Density Astrophysical Plasmas. *Jack D. Scudder.* 398, 299, 185-E1 (1992)

A Burst Model for Line Emission in the Solar Atmosphere. II. Coronal Extreme Ultraviolet Lines. *U. Feldman, J. M. Laming, P. Mandelbaum, W.H. Goldstein, & A. Osterheld.* 398, 692, 192-F3 (1992)

Stochastic Gyroresonant Electron Acceleration in a Low-Beta Plasma. II. Implications of Thermal Effects in a Solar Flare Plasma. *James A. Miller & Jürgen Steinacker.* 399, 284, 198-F12 (1992)

The Effect of Line Tying on Parker's Instability. *Ellen G. Zweibel & David L. Bruhwiler.* 399, 318, 199-C11 (1992)

A Hybrid Thermal/Nonthermal Model for the Energetic Emissions from Solar Flares. *Gordon D. Holman & Stephen G. Benka.* 400, L79, 220-F8 (1992)

Electron Injection in Collisionless Shocks. *Amir Levinson.* 401, 73, 222-A1 (1992)

A Flux-limited Treatment for the Conductive Evaporation of Spherical Interstellar Gas Clouds. *William W. Dalton & Steven A. Balbus.* 404, 625, 36-F11 (1993)

Nonlinear Plasma Mechanisms of Pulsar Eclipse in Binary Systems. *M. Gedalin & D. Eichler.* 406, 629, 65-F4 (1993)

A New Explanation of Solar Radio Millisecond "Spikes." *Donat G. Wentzel.* 407, 380, 73-F11 (1993)

On the Nonlinear Instability of a Thermal Field. *Miguel H. Ibáñez S., Antonio Parravano, & César A. Mendoza B.* 407, 611, 78-B13 (1993)

Clumpy Langmuir Waves in Type III Radio Sources: Comparison of Stochastic-Growth Theory with Observations. *P. A. Robinson, I. H. Cairns, & D. A. Gurnett.* 407, 790, 80-C9 (1993)

Centrifugally Driven Winds from Protostellar Disks. I. Wind Model and Thermal Structure. *Pedro N. Safier.* 408, 115, 84-E6 (1993)

On the Thermal Stability of a Radiating Plasma Subject to Nonlocal Thermal Conduction. I. Linear Analysis. *E. Chun & R. Rosner.* 408, 678, 93-F1 (1993)

Particle Dynamics in Spherical Wave Fields of Rotating Magnets: Acceleration Boundary, Plasma Border, and $1/r_0^2$ Law of Asymptotic Energy. *K. O. Thielheim.* 409, 333, 101-C1 (1993)

Ion Acceleration and Abundance Enhancements by Electron Beam Instabilities in Impulsive Solar Flares. *James A. Miller & Adolfo F. Viñas.* 412, 386, 146-G12 (1993)

On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. II. Application to the Interstellar Medium. *Antonio Parravano, Miguel H. Ibáñez S., & César A. Mendoza B.* 412, 625, 151-E6 (1993)

Solar Flares and Avalanches in Driven Dissipative Systems. *Edward T. Lu, Russell J. Hamilton, J. M. McTiernan, & Kenneth R. Bromund.* 412, 841, 154-C9 (1993)

A Limitation on the Generation of Magnetic Fields. *Steven A. Balbus.* 413, L137, 169-C11 (1993)

Detection of [O III] λ5007 Emission from the Io Plasma Torus. *Nicolas Thomas.* 414, L41, 175-G2 (1993)

Propagation of Hydrodynamic Waves in Optically Thin Plasmas. *Miguel H. Ibáñez S., & Orlando B. Escalona T.* 415, 335, 189-B7 (1993)

Detection of [O II] λ2471 from the Io Plasma Torus. *M. A. McGrath, P. D. Feldman, D. F. Strobel, H. W. Moos, & G. E. Ballester.* 415, L55, 192-D7 (1993)

Cooling Functions for Low-Density Astrophysical Plasmas. *Ralph S. Sutherland & M. A. Dopita.* 88, 253, 43-D9 (1993)

Polarization Changes of Radiation through Stimulated Raman Scattering. *R. T. Gangadhara & V. Krishan.* 415, 505, 194-B6 (1993)

Ambipolar Diffusion and Star Formation: Formation and Contraction of Axisymmetric Cloud Cores. II. Results. *Robert A. Fiedler & Telemachos Ch. Mouschovias.* 415, 680, 196-C7 (1993)

Electromagnetic Radiation from a Strong DC Electric Field. *Manuel Güdel & Donat G. Wentzel.* 415, 750, 197-B10 (1993)

A Class of Three-dimensional Isothermal Laminated Equilibria and Their Stability. *Y. P. Chou, B. C. Low, & A. Bhattacharjee.* 416, 379, 205-F12 (1993)

Magnetically Confined Plasma Columns with Helical Symmetry. *L. J. Palumbo & A. M. Platzeck.* 416, 656, 211-E8 (1993)

Stochastic Growth Theory of Type III Solar Radio Emission. *P. A. Robinson & I. H. Cairns.* 418, 506, 237-C8 (1993)

Temperatures of Enhanced Stability in Hot Thin Plasmas. *Neil Gehrels & Ellen D. Williams.* 418, L25, 238-D1 (1993)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. I. Basic Physics and Formulation of the Problem. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 418, 774, 242-B13 (1993)

Ion Thermalization in the Inner Coma of a Comet. *P. Puhl, T. E. Cravens, & J. Lindgren.* 418, 899, 243-G1 (1993)

The Propagation of Sound Waves in a Randomly Magnetized Medium. I. General Considerations. *M. P. Ryutova & E. R. Priest.* 419, 349, 250-E6 (1993)

The Propagation of Sound Waves in a Randomly Magnetized Medium. II. The Interaction of an Unsteady Wave Packet with an Ensemble of Magnetic Flux Tubes. *M. P. Ryutova & E. R. Priest.* 419, 371, 250-G2 (1993)

The Dynamics of Charged Particles in Turbulent Astrophysical Plasmas. *Rüdiger Dung & Vahé Petrosian.* 421, 550, 25-A6 (1994)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. II. Numerical Method of Solution. *Scott A. Morton, Telemachos Ch. Mouschovias, & Glenn E. Ciolek.* 421, 561, 25-B6 (1994)

Magnetogravitational Instability of Self-gravitating Dusty Plasma. *R. K. Chhajlani & A. K. Parihar.* 422, 746, 41-B6 (1994)

Dynamics and Efficiency of Type III Solar Radio Emission. *P. A. Robinson, I. H. Cairns, & A. J. Willes.* 422, 870, 42-F5 (1994)

Foreword. *Edward Chupp.* 90, 151, 10-B1 (1994)

A Theoretical Review of Diffusive Shock Acceleration. *Frank C. Jones.* 90, 561, 10-F10 (1994)

Strong Double Layers, Existence Criteria, and Annihilation: An Application to Solar Flares. *Martin Volwerk & Jan Kuijpers.* 90, 589, 11-B2 (1994)

Particle Orbits, Trapping, and Acceleration in a Filamentary Current Sheet Model. *Bernhard Kliem.* 90, 719, 12-F6 (1994)

Electron-Beam Evolution in Partially Ionized Hydrogenic Plasma with Return Currents. *D. V. Syniavskii & V. V. Zharkova.* 90, 729, 12-G4 (1994)

Acceleration from Field-Aligned Potential Drops. *Gerhard Haerendel.* 90, 765, 13-C5 (1994)

Disk-Accreting Magnetic Neutron Stars as High-Energy Particle Accelerators. *Russell J. Hamilton, Frederick K. Lamb, & M. Coleman Miller.* 90, 837, 14-B9 (1994)

Linear Wave Propagation in Mildly Relativistic Thermal Pair Plasmas. *Paola Pietrini & Julian H. Krolik.* 423, 693, 57-B13 (1994)

Dissociative Recombination of H_2^+ Molecular Ions in Hydrogen Plasmas between 20 K and 4000 K. *I. F. Schneider, O. Dulieu, A. Giusti-Suzor, & E. Roueff.* 424, 983, 77-A10 (1994)

A Model of the Proton Heat Flux Appropriate for Collisionless Plasmas. *L. L. Williams.* 424, L143, 79-G3 (1994)

Ambipolar Diffusion, Interstellar Dust, and the Formation of Cloud Cores and Protostars. III. Typical Axisymmetric Solutions. *Glenn E. Ciolek & Telemachos Ch. Mouschovias.* 425, 142, 82-A6 (1994)

Standard and Nonstandard Plasma Neutrino Emission Revisited. *Martin Haft, Georg Raffelt, & Achim Weiss.* 425, 222, 83-A8 (1994)

Comparison between Cool and Hot Plasma Behaviors of Surges. *B. Schmieder, L. Golub, & S. K. Antiochos.* 425, 326, 84-C6 (1994)

Self-similar Evolution of Magnetized Plasmas. II. Nonequilibrium Solutions and Hubble's Expansion. *Wei-Hong Yang.* 425, 439, 87-B10 (1994)

Asymptotic Domination of Cold Relativistic MHD Winds by Kinetic Energy Flux. *Mitchell C. Begelman & Zhi-Yun Li.* 426, 269, 99-D9 (1994)

Extreme Ultraviolet Explorer Satellite Observation of Jupiter's Io Plasma Torus. *D. T. Hall, G. R. Gladstone, H. W. Moos, F. Bagenal, J. T. Clarke, P. D. Feldman, M. A. McGrath, N. M. Schneider, D. E. Shemansky, D. F. Strobel, & J. H. Waite.* 426, L51, 103-G1 (1994)

Streaming Instability in Relativistically Hot Pulsar Magnetospheres. *James C. Weatherall.* 428, 261, 131-D5 (1994)

Charge Transfer in Helium-rich Supernova Plasma. *Douglas A. Swartz.* 428, 267, 131-D13 (1994)

Hot Plasmas and the Generation of Gamma Rays. *A. C. Fabian.* 92, 555, 39-C1 (1994)

On Thermal Comptonization in $e^{\pm}$ Pair Plasmas. *Gabriele Ghisellini & Francesco Haardt.* 429, L53, 157-G7 (1994)

Stable Space Charge Configurations near the Force-free Surface of Rotating Magnets. *K. O. Thielheim & H. Wolfsteller.* 431, 718, 187-D13 (1994)

Stability Criteria for Massive Current Sheets in Two-dimensional Potential Magnetic Fields. *J. J. Aly, S. Colombi, & T. Lepeltier.* 432, 793, 205-G9 (1994)

A Model for the X-Ray and Ultraviolet Emission from Seyfert Galaxies and Galactic Black Holes. *Francesco Haardt, Laura Maraschi, & Gabriele Ghisellini.* 432, L95, 206-F7 (1994)

On a Thermodynamic Origin of the Cometary Ion Rays. *W.-H. Ip.* 432, L143, 207-D11 (1994)

Hard X-Rays from NGC 4151: A Thermal Origin? *Lev Titarchuk & Apostolos Mastichiadis.* 433, L33, 215-A7 (1994)

Linear Stability of Spherical Collisionless Stellar Systems. *G. Bertin, F. Pegoraro, F. Rubini, & E. Vesperini.* 434, 94, 226-D8 (1994)

Steady State Magnetic Reconnection in Planar Geometries. *I. J. D. Craig & S. M. Henton.* 434, 192, 228-B1 (1994)

Coalescence of Two Current Loops with a Kink Instability Simulated by a Three-dimensional Electromagnetic Particle Code. *Ken-Ichi Nishikawa, Jun-ichi Sakai, Jie Zhao, Torsten Neubert, & Oscar Buneman.* 434, 363, 230-D7 (1994)

On the Absence of a Relationship between the Properties of the $T_e \geq 10^6$ K and the Properties of the $T_e \leq 7 \times 10^5$ K Solar Plasmas. *U. Feldman & J. M. Laming.* 434, 370, 230-E13 (1994)

Generalized Comptonization Models and Application to the Recent High-Energy Observations. *Lev Titarchuk.* 434, 570, 235-F7 (1994)

Flare Plasma Dynamics Observed with the *Yohkoh* Bragg Crystal Spectrometer. II. Properties of the Fe XXV, Ca XIX, and S XV Resonance Lines. *John T. Mariska.* 434, 756, 238-C1 (1994)

Electron Energy Loss in Oxygen Plasmas. *G. A. Victor, John C. Raymond, & J. L. Fox.* 435, 864, 258-A7 (1994)

What is the Condition for Fast Magnetic Reconnection? *T. Yokoyama & K. Shibata.* 436, L197, 282-E7 (1994)

Temperature Dependence of Nonthermal Motions in Solar Flare Plasmas Observed with the Flat Crystal Spectrometer on *SMM*. *Ester Antonucci & Maria Adele Dodero.* 438, 480, 8-C3 (1995)

Cooling of Solar Flare Plasmas. I. Theoretical Considerations. *Peter J. Cargill, John T. Mariska, & Spiro K. Antiochos.* 439, 1034, 39-A3 (1995)

Coronal Loop Formation Resulting from Photospheric Convection. *G. Van Hoven, Y. Mok, & Z. Mikić.* 440, L105, 58-D8 (1995)

Cosmic Dust Synthesis by Accretion and Coagulation. *G. Praburam & J. Goree.* 441, 830, 73-D4 (1995)

Fabry-Perot Imaging of O III $\lambda = 5007$ Å Emission in the Io Plasma Torus. *M. Küppers & K. Jockers.* 441, L101, 76-E4 (1995)

High-Resolution Measurements of the Kα Spectra of Low-Ionization Species of Iron: A New Spectral Signature of Nonequilibrium Ionization Conditions in Young Supernova Remnants. *V. Decaux, P. Beiersdorfer, A. Osterheld, M. Chen, & S. M. Kahn.* 443, 464, 101-D13 (1995)

Flare Plasma Dynamics Observed with the *Yohkoh* Bragg Crystal Spectrometer. III. Spectral Signatures of Electron-Beam–heated Atmospheres. *John T. Mariska.* 444, 478, 120-B12 (1995)

Nonlinear Alfvén Wave Propagation in Nonhomogeneous Collisionless Media. *Ildar K. Khabibrakhmanov & Danny Summers.* 444, 796, 127-D9 (1995)

Vacuum Zero-Point Field Pressure Instability in Astrophysical Plasmas and the Formation of Cosmic Voids. *Alfonso Rueda, Bernhard Haisch, & Daniel C. Cole.* 445, 7, 132-D10 (1995)

Thermal Cyclotron Absorption Coefficients. II. Opacities in the Stokes Formalism. *H. M. Väth & G. Chanmugam.* 98, 295, 26-A9 (1995)

Magnetic Viscosity by Localized Shear Flow Instability in Magnetized Accretion Disks. *R. Matsumoto & T. Tajima.* 445, 767, 145-G1 (1995)

Thermal Comptonization in Mildly Relativistic Pair Plasmas. *J. G. Skibo, C. D. Dermer, R. Ramaty, & J. M. McKinley.* 446, 86, 154-D6 (1995)

Derivation of Analytical Particle Spectra from the Solution of the Transport Equation by the WKBJ Method. *A. Gallegos-Cruz & J. Pérez-Peraza.* 446, 400, 158-F11 (1995)

Fokker-Planck Equations of Stochastic Acceleration: Green's Functions and Boundary Conditions. *Brian T. Park & Vahé Petrosian.* 446, 699, 165-F10 (1995)

The Dynamics of Flux Tubes in a High-β Plasma. I. A General Description. *Ethan T. Vishniac.* 446, 724, 166-B1 (1995)

The Statistical Physics of Solar Active Regions and the Fundamental Nature of Solar Flares. *Edward T. Lu.* 446, L109, 171-E3 (1995)

The Inverse Compton Thermostat in Hot Plasmas near Accreting Black Holes. *Paola Pietrini & Julian H. Krolik.* 447, 526, 183-B1 (1995)

Comptonization Models and Spectroscopy of X-Ray and Gamma-Ray Sources: A Combined Study by Monte Carlo and Analytical Methods. *Xin-Min Hua & Lev Titarchuk.* 449, 188, 212-F13 (1995)

Detectability of Electrostatic Decay Products in *Ulysses* and *Galileo* Observations of Type III Solar Radio Sources. *Iver H. Cairns.* 449, L95, 217-E8 (1995)

Self-Consistency Constraints on the Dynamo Mechanism. *A. Bhattacharjee & Y. Yuan.* 449, 739, 223-A6 (1995)

Magnetohydrodynamic Stellar Winds: A New Class of Solutions. *Néstor O. Rotstein & Constantino Ferro Fontán.* 449, 745, 223-B1 (1995)

Magnetohydrodynamic Stellar Wind Solutions in Curved Magnetic Fields. *Néstor O. Rotstein & Constantino Ferro Fontán.* 449, 764, 223-C9 (1995)

One-dimensional Merging of Magnetic Fields with Cooling. *Victoria L. Dorman & Russell M. Kulsrud.* 449, 777, 223-D11 (1995)

Compton Heating and Superthermal Electrons in Gamma-loud Active Galactic Nuclei. *Andrei M. Beloborodov & Andrei F. Illarionov.* 450, 64, 229-A3 (1995)

Exact Solutions for Steady State Incompressible Magnetic Reconnection. *I. J. D. Craig & S. M. Henton.* 450, 280, 231-G9 (1995)

The Role of Magnetic Reconnection in Chromospheric Eruptions. *Judith T. Karpen, Spiro K. Antiochos, & C. Richard DeVore.* 450, 422, 233-G3 (1995)

The Structure of the Io Torus. *Nicholas M. Schneider & John T. Trauger.* 450, 450, 234-B13 (1995)

Power-Law Spectra as a Result of Comptonization of the Soft Radiation in a Plasma Cloud. *Lev Titarchuk & Yurij Lyubarskij.* 450, 876, 243-A10 (1995)

Bound-Bound Transitions in Strongly Magnetized Hydrogen Plasma. *George G. Pavlov & Alexander Y. Potekhin.* 450, 883, 243-B6 (1995)

Satellites on Lyman Alpha Due to H-H and H-H^+ Collisions. *John F. Kielkopf & Nicole F. Allard.* 450, L75, 245-A8 (1995)

The Effects on Mass Flows on the Dissipation of Alfvén Waves in the Upper Layers of the Solar Atmosphere. *Margarita P. Ryutova & Shadia R. Habbal.* 451, 381, 251-B7 (1995)

Differential Emission Measure and Iron-to-Calcium Abundance in Solar Flare Plasmas. *Ester Antonucci & Renato Martin.* 451, 402, 251-D6 (1995)

The Dynamics of Flux Tubes in a High-β Plasma. II. Buoyancy in Stars and Accretion Disks. *Ethan T. Vishniac.* 451, 816, 258-D12 (1995)

A Comparison of Thermal Comptonization Models. *Lev Titarchuk & Xin-Min Hua.* 452, 226, 265-B9 (1995)

DC Electric Field Acceleration of Ions in Solar Flares. *Gordon D. Holman.* 452, 451, 268-C6 (1995)

Stochastic Proton Acceleration by Cascading Alfvén Waves in Impulsive Solar Flares. *James A. Miller & D. Aaron Roberts.* 452, 912, 277-C7 (1995)

General Local Stability Criteria for Stratified, Weakly Magnetized Rotating Systems. *Steven A. Balbus.* 453, 380, 286-C13 (1995)

The Effect of Degeneracy on the Scattering Contribution to the Radiative Opacity. *S. J. Rose.* 453, L45, 290-A4 (1995)

Ion Acoustic Wave Frequencies and Onset Times during Type III Solar Radio Bursts. *Iver H. Cairns & P. A. Robinson.* 453, 959, 297-C1 (1995)

An Exact Solution for Steady State Magnetic Reconnection in Three Dimensions. *I. J. D. Craig, R. B. Fabling, S. M. Henton, & G. J. Rickard.* 455, L197, 335-A11 (1995)

POLARIZATION

Detection of Polarized Ultraviolet Emission from the High-Redshift Radio Galaxy 3C 265. *Buell T. Jannuzi & Richard Elston.* 366, L69, 11-C5 (1991)

A Technique for Using Radio Jets as Extended Gravitational Lensing Probes. *Philipp P. Kronberg, Charles C. Dyer, E. Margaret Burbidge, & Vesa T. Junkkarinen.* 367, L1, 17-B1 (1991)

Extinction and Polarization of Transmitted Light by Partially Aligned Nonspherical Grains. *Mikhail I. Mishchenko.* 367, 561, 20-C8 (1991)

Faraday Rotation and Physical Conditions in the Crab Nebula. *M. F. Bietenholz & P. P. Kronberg.* 368, 231, 26-A1 (1991)

Observation of a Pulsar Wind: CCD Polarimetry of the Crab Nebula. *F. C. Michel, P. A. Scowen, R. J. Dufour, & J. J. Hester.* 368, 463, 30-G1 (1991)

Infrared Polarimetry of Quasars. *Michael L. Sitko & Yudong Zhu.* 369, 106, 37-C5 (1991)

Continuum Polarization by Electron Scattering in Rotationally Distorted, Radiation-driven Stellar Winds: B[e] Supergiants. *Cameron J. Boyd & J. M. Marlborough.* 369, 191, 38-C11 (1991)

Thomson Scattering in a Magnetic Field. II. Arbitrary Field Orientation. *Barbara A. Whitney.* 369, 451, 43-C10 (1991)

Circular Polarization in 1612 MHz OH Maser Emission from OH/IR Stars. *Philip J. Zell & John D. Fix.* 369, 506, 44-A9 (1991)

Polarimetric Mapping of Orion Using MILLIPOL: Magnetic Activity in BN/KL. *Robert W. Leach, Dan P. Clemens, Brian D. Kane, & Richard Barvainis.* 370, 257, 50-D1 (1991)

Polarization of Astronomical Maser Radiation. *Moshe Elitzur.* 370, 407, 52-C12 (1991)

Fluctuations in Astronomical Masers. *Moshe Elitzur.* 370, L45, 53-F6 (1991)

A Relativistic Model of Pulsar Polarization. *M. Blaskiewicz, J. M. Cordes, & I. Wasserman.* 370, 643, 56-D9 (1991)

Synchrotron Radiation with Radiation Reaction. *Robert W. Nelson & Ira Wasserman.* 371, 265, 63-D7 (1991)

Multifrequency VLA, VLBI, and Single-Dish Observations of the Quasar 4C 39.25. *Alan P. Marscher, Yun Fei Zhang, David B. Shaffer, Hugh D. Aller, & Margo F. Aller.* 371, 491, 67-E12 (1991)

Synchronization of the Magnetic Nova V1500 Cygni. *Gary D. Schmidt & H. S. Stockman.* 371, 749, 70-G7 (1991)

Thomson Scattering in a Magnetic Field. I. Field along z. *Barbara A. Whitney.* 75, 1293, 22-F1 (1991)

Optical and Near-Infrared Polarimetry of the Infrared Luminous Galaxy IRAS 23060+0505. *J. H. Hough, C. Brindle, Beverley J. Wills, D. Wills, & J. Bailey.* 372, 478, 81-F9 (1991)

On the Dispersion in Direction of Interstellar Polarization. *P. C. Myers & A. A. Goodman.* 373, 509, 94-C9 (1991)

Broad-Band Linear Polarization in Cool Stars. I. Models and Spatial Effects for Magnetic and Scattering Regions. *Juhani Huovelin & Steven H. Saar.* 374, 319, 102-B1 (1991)

Optical Polarization of a Complete Sample of Radio Sources. *C. D. Impey, C. R. Lawrence, & S. Tapia.* 375, 46, 111-E10 (1991)

Scattering-induced Optical Polarization in Thick Accretion Disks. *John F. Kartje & Arieh Königl.* 375, 69, 111-G6 (1991)

Analysis of SN 1987A Polarimetry. *David J. Jeffery.* 375, 264, 114-C5 (1991)

Stellar Occultation of Polarized Light from Circumstellar Electrons. II. Flat Envelopes Viewed at Arbitrary Inclination. *Geoffrey K. Fox & John C. Brown.* 375, 300, 114-F1 (1991)

Molecular Hydrogen Polarization Images of OMC-1. *Michael G. Burton, N. R. Minchin, J. H. Hough, C. Aspin, D. J. Axon, & J. A. Bailey.* 375, 611, 120-C9 (1991)

Direct VLBI Detection of the Magnetosphere Surrounding the Young Star S1 in ρ Ophiuchi. *Philippe André, Robert B. Phillips, Jean-François Lestrade, & Karl-Ludwig Klein.* 376, 630, 134-B12 (1991)

Multidirectional Views of the Active Nucleus of NGC 1068. *J. S. Miller, R. W. Goodrich, & William G. Mathews.* 378, 47, 151-E13 (1991)

Infrared Polarization Images of Star-forming Regions. I. The Ubiquity of Bipolar Structure. *M. Tamura, Ian Gatley, R. R. Joyce, M. Ueno, H. Suto, & M. Sekiguchi.* 378, 611, 160-A1 (1991)

Detection of Excess Rotation Measure Due to Intracluster Magnetic Fields in Clusters of Galaxies. *K.-T. Kim, Peter C. Tribble, & P. P. Kronberg.* 379, 80, 164-A5 (1991)

Stellar Occultation of Polarized Light from Circumstellar Electrons. III. General Axisymmetric Envelopes. *Geoffrey K. Fox.* 379, 663, 173-A1 (1991)

What Are the Gigahertz Peaked-Spectrum Radio Sources? *C. P. O'Dea, S. A. Baum, & C. Stanghellini.* 380, 66, 176-G5 (1991)

Polarimetric Imaging of the Galactic Center at 12.4 Microns: The Detailed Magnetic Field Structure in the Northern Arm and East-West Bar. *David K. Aitken, Daniel Gezari, Craig H. Smith, Mark McCaughrean, & Patrick F. Roche.* 380, 419, 183-D10 (1991)

Depolarization Asymmetry in the Quasar 3C 47. *Ilias Fernini, J. Patrick Leahy, Jack O. Burns, & John P. Basart.* 381, 63, 189-G1 (1991)

Polarized Radio Emission from the Edge-on Spiral Galaxies NGC 891 and NGC 4565. *S. Sukumar & R. J. Allen.* 382, 100, 201-D1 (1991)

Polarization Properties of Emission Lines from Relativistic Accretion Disks. *Kaiyou Chen & Douglas M. Eardley.* 382, 125, 201-F10 (1991)

On the Wind Geometry of the Wolf-Rayet Star EZ Canis Majoris. *R. E. Schulte-Ladbeck, K. H. Nordsieck, M. Taylor, M. A. Nook, K. S. Bjorkman, A. M. Magalhães, & C. M. Anderson.* 382, 301, 204-A1 (1991)

Catalog of SN 1987A Polarimetry Corrected for Interstellar Polarization. *David J. Jeffery.* 77, 405, 50-B5 (1991)

Vector Magnetic Fields in Sunspots. I. Stokes Profile Analysis Using the Marshall Space Flight Center Magnetograph. *K. S. Balasubramaniam & E. A. West.* 382, 699, 210-C11 (1991)

First Ultraviolet Spectropolarimetry of Hot Supergiants. *M. Taylor, A. D. Code, K. H. Nordsieck, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, R. E. Schulte-Ladbeck, & B. A. Whitney.* 382, L85, 211-D5 (1991)

Discrete Ordinate Solution of the Radiative Transfer Equation in the "Polarization Normal Wave Representation." *A. Kylling.* 383, 243, 215-C1 (1991)

Optical Polarimetry of PKS 2155−304 and Constraints on Accretion Disk Models for BL Lacertae Objects. *Paul S. Smith & Michael L. Sitko.* 383, 580, 221-D9 (1991)

First Ultraviolet Spectropolarimetry of Be Stars from the Wisconsin Ultraviolet Photo-Polarimeter Experiment. *K. S. Bjorkman, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, G. C. Clayton, A. M. Magalhães, M. R. Meade, M. A. Nook, R. E. Schulte-Ladbeck, M. Taylor, & B. A. Whitney.* 383, L67, 226-E1 (1991)

The Zeeman Effect in Astrophysical Water Masers and the Observation of Strong Magnetic Fields in Regions of Star Formation. *Gerald E. Nedoluha & William D. Watson.* 384, 185, 3-C5 (1992)

A Reanalysis of the Orbital Inclination of Cygnus XR-1 Determined Polarimetrically. *Joseph F. Dolan.* 384, 249, 4-A9 (1992)

Origin of the Structures and Polarization in the Classical Double 3C 219. *David A. Clarke, Alan H. Bridle, Jack O. Burns, Richard A. Perley, & Michael L. Norman.* 385, 173, 14-B1 (1992)

The Practical Application of the Magnetic Virial Theorem. *J. A. Klimchuk, R. C. Canfield, & J. E. Rhoads.* 385, 327, 16-A1 (1992)

The First Spectropolarimetric Study of the Wavelength Dependence of Interstellar Polarization in the Ultraviolet. *Geoffrey C. Clayton, Christopher M. Anderson, Antonio Mario Magalhães, Arthur D. Code, Kenneth H. Nordsieck, Marilyn R. Meade, Michael J. Wolff, Brian Babler, Karen S. Bjorkman, Regina E. Schulte-Ladbeck, MaryJane Taylor, & Barbara A. Whitney.* 385, L53, 23-D7 (1992)

Rotation Measures of Low-Latitude Extragalactic Sources and the Magnetoionic Structure of the Galaxy. *Andrew W. Clegg, James M. Cordes, John H. Simonetti, & Shrinivas R. Kulkarni.* 386, 143, 26-A1 (1992)

Polarization Variability among Wolf-Rayet Stars. VII. The Single Stars WR 14, WR 25, and WR 69. *Laurent Drissen, Carmelle Robert, & Anthony F. J. Moffat.* 386, 288, 27-F11 (1992)

Systematic Variations in the Wavelength Dependence of Interstellar Linear Polarization. *D. C. B. Whittet, P. G. Martin, J. H. Hough, M. F. Rouse, J. A. Bailey, & D. J. Axon.* 386, 562, 32-C14 (1992)

The Wind Geometry of the Wolf-Rayet Star HD 191765. *R. E. Schulte-Ladbeck, K. H. Nordsieck, M. Taylor, K. S. Bjorkman, A. M. Magalhães, & M. J. Wolff.* 387, 347, 41-C6 (1992)

Discovery of Extended Faraday Rotation Compatible with Spiral Structure in an Intervening Galaxy at $z = 0.395$: New Observations of PKS 1229−021. *Philipp P. Kronberg, Judith J. Perry, & Edwin L. H. Zukowski.* 387, 528, 45-C1 (1992)

A Survey of the Milliarcsecond Polarization Properties of BL Lacertae Objects at 5 GHz. *D. C. Gabuzda, T. V. Cawthorne, D. H. Roberts, & J. F. C. Wardle.* 388, 40, 49-E5 (1992)

Dust within Globular Clusters: A Large Bubble in NGC 6624? *Juan C. Forte, Sergio A. Cellone, Mariano Méndez, & E. Irene Vega.* 388, 383, 55-B4 (1992)

Where Have All the Cluster Halos Gone? *Jack O. Burns, Martin E. Sulkanen, Galen R. Gisler, & Rick A. Perley.* 388, L49, 59-B1 (1992)

Infrared Polarimetry and the Galactic Magnetic Field. II. Improved Models. *Terry Jay Jones, Dimitri Klebe, & John M. Dickey.* 389, 602, 69-A1 (1992)

Spectral Evolution of Accretion Disks of Dwarf Novae. III. Outburst Cycle of SS Cygni. *F. H. Cheng & D. N. C. Lin.* 389, 714, 70-C5 (1992)

On the Rotation of Polarization by a Gravitational Lens. *C. C. Dyer & Eric G. Shaver.* 390, L5, 78-B1 (1992)

The First Linear Polarization Spectra of Wolf-Rayet Stars in the Ultraviolet: EZ Canis Majoris and θ Muscae. *R. E. Schulte-Ladbeck, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, D. Shepherd, M. Taylor, & B. A. Whitney.* 391, L37, 92-C6 (1992)

Polarization in the Radio Galaxy 3C 109—An Obscured Quasar. *Robert W. Goodrich & Marshall H. Cohen.* 391, 623, 95-F12 (1992)

Near-Infrared Polarized Images of a Nebula around T Tauri. *David A. Weintraub, Joel H. Kastner, B. Zuckerman, & Ian Gatley.* 391, 784, 97-F7 (1992)

VLA Observations of 1612 and 1665 MHz OH Masers Associated with IRC +10420. *G. E. Nedoluha & P. F. Bowers.* 392, 249, 104-A9 (1992)

Electron Impact Polarization of Atomic Spectral Lines. I. A General Theoretical Scheme. *Silvano Fineschi & Egidio Landi Degl'Innocenti.* 392, 337, 105-B6 (1992)

Interstellar Polarization from 3 to 5 Microns in Reddened Stars. *P. G. Martin, A. J. Adamson, D. C. B. Whittet, J. H. Hough, J. A. Bailey, S.-H. Kim, S. Sato, M. Tamura, & T. Yamashita.* 392, 691, 110-G3 (1992)

Using Electron Scattering to Probe the Environment of Cluster Cooling Flows. *Michael W. Wise & Craig L. Sarazin.* 395, 387, 147-B5 (1992)

Model Scattering Envelopes of Young Stellar Objects. I. Method and Application to Circumstellar Disks. *Barbara A. Whitney & Lee Hartmann.* 395, 529, 149-D1 (1992)

Intermediate-Resolution Spectropolarimetry of 3C 273. *J. A. de Diego, E. Pérez, M. R. Kidger, & L. O. Takalo.* 396, L19, 160-D10 (1992)

The University of Michigan Radio Astronomy Data Base. I. Structure Function Analysis and the Relation between BL Lacertae Objects and Quasi-stellar Objects. *P. A. Hughes, H. D. Aller, & M. F. Aller.* 396, 469, 163-C9 (1992)

Photometry, Polarimetry, Spectroscopy, and Spectropolarimetry of the Enigmatic Wolf-Rayet Star EZ Canis Majoris. *Carmelle Robert, Anthony F. J. Moffat, Laurent Drissen, Robert Lamontagne, Wilhelm Seggewiss, Virpi S. Niemela, Miguel A. Cerruti, Paul Barrett, Jeremy Bailey, Jorge Garcia, & Santiago Tapia.* 397, 277, 171-D1 (1992)

Detection of Obscured Broad-Line Regions in Four Seyfert 2 Galaxies. *Hien D. Tran, Joseph S. Miller, & Laura E. Kay.* 397, 452, 176-C12 (1992)

Polarization and the Envelopes of B[e] Supergiants in the Magellanic Clouds. *A. M. Magalhães.* 398, 286, 185-C11 (1992)

Observation and Interpretation of the Asymmetric Stokes *Q*, *U*, and *V* Line Profiles in Sunspots. *J. Sánchez Almeida & B. W. Lites.* 398, 359, 186-C1 (1992)

Inversion of Stokes Profiles. *B. Ruiz Cobo & J. C. del Toro Iniesta.* 398, 375, 186-D11 (1992)

Spectropolarimetry of the 5797 Å Diffuse Interstellar Band. *A. J. Adamson & D. C. B. Whittet.* 398, L69, 188-C1 (1992)

A Survey for High Optical Polarization in Quasars with Core-dominant Radio Structure: Is There a Beamed Optical Continuum? *Beverley J. Wills, D. Wills, Michel Breger, R. R. J. Antonucci, & Richard Barvainis.* 398, 454, 189-F10 (1992)

Pearson-Readhead Survey Sources: Properties of the Centimeter-Wavelength Flux and Polarization of a Complete Radio Sample. *M. F. Aller, H. D. Aller, & P. A. Hughes.* 399, 16, 195-C8 (1992)

Polarization in the Narrow [O III] Lines in Seyfert 2 Galaxies. *Robert W. Goodrich.* 399, 50, 195-F8 (1992)

The Structure of Magnetic Fields in Dark Clouds: Infrared Polarimetry in B216–217. *Alyssa A. Goodman, Terry J. Jones, Elizabeth A. Lada, & Philip C. Myers.* 399, 108, 196-E3 (1992)

Polarization of the Far-Infrared Emission from the Thermal Filaments of the Galactic Center Arc. *M. Morris, J. A. Davidson, M. Werner, J. Dotson, D. F. Figer, R. Hildebrand, G. Novak, & S. Platt.* 399, L63, 200-G6 (1992)

Polarimetry and Spectrophotometry of the QSO IRAS 13349+2438 and the Unification of Active Galaxies. *Beverley J. Wills, D. Wills, Neal J. Evans II, A. Natta, K. L. Thompson, M. Breger, & M. L. Sitko.* 400, 96, 210-B10 (1992)

Intensive Optical Monitoring of the BL Lacertae Object PKS 2155−304. *Paul S. Smith, Patrick B. Hall, Richard G. Allen, & Michael L. Sitko.* 400, 115, 210-D1 (1992)

Scattering of Infrared Radiation by Dust in NGC 7023 and NGC 2023. *K. Sellgren, M. W. Werner, & H. L. Dinerstein.* 400, 238, 211-G9 (1992)

The BL Lacertae Object PKS 1413+135: Is It within or behind a Spiral Galaxy? *John T. Stocke, Ron Wurtz, Qingde Wang, Richard Elston, & Buell T. Jannuzi.* 400, L17, 214-C5 (1992)

Polarization Cancellation in the Two-Component Winds from Wolf-Rayet Stars. *M. Taylor & J. P. Cassinelli.* 401, 311, 224-G5 (1992)

A Search for Circular Polarization in Cataclysmic Variables. *H. S. Stockman, Gary D. Schmidt, G. Berriman, James Liebert, R. L. Moore, & D. T. Wickramasinghe.* 401, 628, 230-C13 (1992)

Evidence for a Bipolar Nebula around the Peculiar B[e] Star HD 45677 from Ultraviolet Spectropolarimetry. *R. E. Schulte-Ladbeck, D. S. Shepherd, K. H. Nordsieck, A. D. Code, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, M. Taylor, & B. A. Whitney.* 401, L105, 233-D12 (1992)

Infrared Polarimetry of Galaxies. III. Global Comparisons. *Terry Jay Jones.* 403, 135, 15-F5 (1993)

Ultraviolet Polarimetry and Spectroscopy of the BL Lacertae Object PKS 2155−304. *Richard G. Allen, Paul S. Smith, J. R. P. Angel, Bryan W. Miller, Scott F. Anderson, & Bruce Margon.* 403, 610, 23-C1 (1993)

Ultraviolet Interstellar Linear Polarization. I. Applicability of Current Dust Grain Models. *Michael J. Wolff, Geoffrey C. Clayton, & Marilyn R. Meade.* 403, 722, 24-F7 (1993)

The First Ultraviolet Spectropolarimetric Study of NGC 1068. *Arthur D. Code, Marilyn R. Meade, Christopher M. Anderson, Kenneth H. Nordsieck, Geoffrey C. Clayton, Barbara A. Whitney, Antonio Mario Magalhães, Brian Babler, Karen S. Bjorkman, Regina E. Schulte-Ladbeck, & MaryJane Taylor.* 403, L63, 27-C8 (1993)

Limits to Cosmic Background Radiation Fluctuations at 8.44 GHz between Angular Scales $10''$ and $200''$. *Edward B. Fomalont, R. Bruce Partridge, James D. Lowenthal, & Rogier A. Windhorst.* 404, 8, 28-B9 (1993)

An Optical Polarization Survey for BL Lacertae Objects and Highly Polarized Quasars. *Buell T. Jannuzi, Richard F. Green, & Howard French.* 404, 100, 29-C5 (1993)

Magnetic Field in a Low-Mass Protostar Disk: Millimeter Polarimetry of IRAS 16293−2422. *Motohide Tamura, Saeko S. Hayashi, Takuya Yamashita, William D. Duncan, & James H. Hough.* 404, L21, 33-F1 (1993)

Imaging Polarimetry of High-Redshift Radio Galaxies. *S. di Serego Alighieri, A. Cimatti, & R. A. E. Fosbury.* 404, 584, 36-C3 (1993)

Broad-band Linear Polarization in Cool Stars. II. Amplitude and Wavelength Dependence for Magnetic and Scattering Regions. *Steven H. Saar & Juhani Huovelin.* 404, 739, 38-B7 (1993)

Evidence for the Cospatial Origin of SiO Masers in Different Rotational Transitions. *G. C. McIntosh & C. Read Predmore.* 404, L71, 40-E11 (1993)

Beyond Clausius-Mossotti: Wave Propagation on a Polarizable Point Lattice and the Discrete Dipole Approximation. *B. T. Draine & Jeremy Goodman.* 405, 685, 51-E11 (1993)

The Strong Magnetic Field in G227-35. *Marshall H. Cohen, Angela Putney, & Robert W. Goodrich.* 405, L67, 54-D5 (1993)

Parametric Instabilities of Circularly Polarized Alfvén Waves in High-β Plasmas. *Hiromitsu Hamabata.* 406, 563, 64-G5 (1993)

PKS 1830−211 as a Gravitationally Lensed System. *Sunita Nair, D. Narasimha, & A. Pramesh Rao.* 407, 46, 69-F5 (1993)

The Asymmetric Wind of R127. *R. E. Schulte-Ladbeck, C. Leitherer, G. C. Clayton, C. Robert, M. R. Meade, L. Drissen, A. Nota, & W. Schmutz.* 407, 723, 79-E1 (1993)

Optical Polarimetry and Photometry of X-Ray Selected BL Lacertae Objects. *Buell T. Jannuzi, Paul S. Smith, & Richard Elston.* 85, 265, 10-F1 (1993)

Circularly Polarized Radio Emission from the T Tauri Star Hubble 4. *Stephen L. Skinner.* 408, 660, 93-D6 (1993)

Solar Magnetic Field Studies Using the 12 Micron Emission Lines. II. Stokes Profiles and Vector Field Samples in Sunspots. *Tilak Hewagama, Drake Deming, Donald E. Jennings, Vladimir Osherovich, Gunter Wiedemann, David Zipoy, Donald L. Mickey, & Howard Garcia.* 86, 313, 18-B7 (1993)

Optical and *Hubble Space Telescope* Ultraviolet Spectropolarimetry of 3C 273 and PG 1114+445. *Paul S. Smith, Gary D. Schmidt, & Richard G. Allen.* 409, 604, 106-D13 (1993)

Polarization Eclipse Model of the Wolf-Rayet Binary V444 Cygni with Constraints on the Stellar Radii and an Estimate of the Wolf-Rayet Mass-Loss Rate. *N. St-Louis, A. F. J. Moffat, L. Lapointe, Yu. S. Efimov, N. M. Shakhovskoy, G. K. Fox, & V. Piirola.* 410, 342, 116-C10 (1993)

Elliptical Polarimetry of the Interacting Binary Star V367 Cygni. *Nicholas M. Elias II.* 410, 785, 123-E1 (1993)

The Discovery of Variable Polarization over the 13.9 Minute Spin Period of the Intermediate Polar RE 0751+14. *V. Piirola, P. Hakala, & G. V. Coyne, S.J.* 410, L107, 126-C3 (1993)

IRC +10420: A Cool Hypergiant near the Top of the H-R Diagram. *Terry Jay Jones, Roberta M. Humphreys, Robert D. Gehrz, Geoffrey F. Lawrence, Franz-Josef Zickgraf, Harvey Moseley, Sean Casey, William J. Glaccum, Carol J. Koch, Robert Pina, Barbara Jones, Kim Venn, Otmar Stahl, & Sumner G. Starrfield.* 411, 323, 131-C6 (1993)

On the Nature of the Polarization Opposition Effect Exhibited by Saturn's Rings. *Michael I. Mishchenko.* 411, 351, 131-F1 (1993)

A Spectroscopic Method for the Solution of the 180° Azimuth Ambiguity in Magnetograms. *Egidio Landi Degl'Innocenti & Véronique Bommier.* 411, L49, 134-C8 (1993)

Magnetic Fields in Massive Cloud Cores: Comparison of MILLIPOL and *IRAS* Results. *Brian D. Kane, Dan P. Clemens, Richard Barvainis, & Robert W. Leach.* 411, 708, 138-E1 (1993)

The Exciting Young Stellar Object for the Molecular Outflow at the Core of L1287. *David A. Weintraub & Joel Kastner.* 411, 767, 139-C9 (1993)

The Radio Properties of High-Redshift Quasars. I. Dual-Frequency Observations of 79 Steep-Spectrum Quasars at $z > 1.5$. *C. J. Lonsdale, P. D. Barthel, & G. K. Miley.* 87, 63, 27-G1 (1993)

Ultraviolet Spectropolarimetry of the Be Star PP Carinae with the Wisconsin Ultraviolet Photo-Polarimeter Experiment. *K. S. Bjorkman, M. R. Meade, K. H. Nordsieck, C. M. Anderson, B. L. Babler, G. C. Clayton, A. D. Code, A. M. Magalhães, R. E. Schulte-Ladbeck, M. Taylor, & B. A. Whitney.* 412, 810, 153-G11 (1993)

Quantitative Modeling and Impersonal Fitting of Algol Polarization Curves. *R. E. Wilson & Jer-Chyi Liou.* 413, 670, 164-G1 (1993)

Polarization Variability among Wolf-Rayet Stars. VIII. Emission Lines versus Continuum in WR+O Binaries. *Anthony F. J. Moffat & Vilppu Piirola.* 413, 724, 165-D8 (1993)

Hubble Space Telescope Ultraviolet Spectroscopy of the Highly Polarized but Quiescent Quasar OI 287. *Robert Antonucci, Anne L. Kinney, & Todd Hurt.* 414, 506, 177-E1 (1993)

A New Method to Calculate the Extinction Properties of Irregularly Shaped Particles. *François Rouleau & P. G. Martin.* 414, 803, 181-C2 (1993)

Disks around Pre–Main-Sequence Binary Systems: The Case of Haro 6-10. *François Ménard, Jean-Louis Monin, Françoise Angelucci, & Daniel Rouan.* 414, L117, 186-B5 (1993)

The Highly Polarized Hidden Quasar IRAS 09104+4109: A Double-lobed Radio Source in a Rich Cluster. *Dean C. Hines & Beverley J. Wills.* 415, 82, 186-A10 (1993)

Polarization Changes of Radiation through Stimulated Raman Scattering. *R. T. Gangadhara & V. Krishan.* 415, 505, 194-B6 (1993)

Further Observations of the Peculiar Galactic Radio Source G318.9+0.4. *Jonathan B. Z. Whiteoak.* 415, 701, 196-E3 (1993)

First Ultraviolet Spectropolarimetry of Radio-selected BL Lacertae Objects. *Paul S. Smith, Richard G. Allen, & J. R. P. Angel.* 415, L83, 199-F6 (1993)

Polarization of Compact Radio Sources. *C.-I. Björnsson.* 416, 104, 202-C11 (1993)

Polarization of Astronomical Maser Radiation. II. Polarization Modes and Unsaturated Growth. *Moshe Elitzur.* 416, 256, 204-C7 (1993)

Milliarcsecond Polarization Structure of 24 Objects from the Pearson-Readhead Sample of Bright Extragalactic Radio Sources. I. The Images. *T. V. Cawthorne, J. F. C. Wardle, D. H. Roberts, D. C. Gabuzda, & L. F. Brown.* 416, 496, 209-D11 (1993)

Milliarcsecond Polarization Structure of 24 Objects from the Pearson-Readhead Sample of Bright Extragalactic Radio Sources. II. Discussion. *T. V. Cawthorne, J. F. C. Wardle, D. H. Roberts, & D. C. Gabuzda.* 416, 519, 209-G5 (1993)

Magnetic Fields in the Hydra A Cluster. *Gregory B. Taylor & Richard A. Perley.* 416, 554, 210-C3 (1993)

Polarization of the Thermal Emission from the Dust Ring at the Center of the Galaxy. *R. H. Hildebrand, J. A. Davidson, J. Dotson, D. F. Figer, G. Novak, S. R. Platt, & L. Tao.* 417, 565, 226-D1 (1993)

Spectrum of the "Invisible" Companion of Z Canis Majoris Revealed in Polarized Light. *Barbara A. Whitney, Geoffrey C. Clayton, Regina E. Schulte-Ladbeck, Nuria Calvet, Lee Hartmann, & Scott J. Kenyon.* 417, 687, 228-A1 (1993)

Polarized Scattering in the Vicinity of Galaxies. *Brian W. Murphy & David F. Chernoff.* 418, 60, 231-G7 (1993)

The Langevin Equation and Its Application to Grain Alignment in Molecular Clouds. *W. G. Roberge, T. A. DeGraff, & J. E. Flaherty.* 418, 287, 234-E11 (1993)

J H K L Imaging and *K* Polarimetry of the Bipolar Outflow NGC 2071. *D. M. Walther, E. I. Robson, C. Aspin, & W. R. F. Dent.* 418, 310, 234-G9 (1993)

The Faraday Rotation and Linear Polarization of Light in Stellar Atmospheres. *N. A. Silant'ev.* 419, 294, 249-G6 (1993)

Magnetospheres of Solar Active Regions Inferred from Spectral-Polarization Observations with High Spatial Resolution. *K. R. Lang, R. F. Willson, J. N. Kile, J. Lemen, K. T. Strong, V. L. Bogod, G. B. Gelfreikh, B. I. Ryabov, S. R. Hafizov, V. E. Abramov, & S. V. Svetkov.* 419, 398, 251-B7 (1993)

The Wavelength Dependence of Polarization of Active Galaxies and Quasars. *Wayne Webb, Matthew Malkan, Gary Schmidt, & Chris Impey.* 419, 494, 253-G12 (1993)

Discovery of a Deeply Embedded Companion to LkHα 234. *David A. Weintraub, Joel H. Kastner, & Ashwin Mahesh.* 420, L87, 15-F1 (1994)

Discovery of a Dwarf Carbon Star with a White Dwarf Companion and of a Highly Magnetic Degenerate Star. *James Liebert, Gary D. Schmidt, M. Lesser, J. A. Stepanian, V. A. Lipovetsky, Frederic H. Chaffee, Craig B. Foltz, & P. Bergeron.* 421, 733, 27-C12 (1994)

Stellar and Scattered Light in a Radio Galaxy at $z = 2.63$. *Andrea Cimatti, Sperello di Serego Alighieri, George B. Field, & Robert A. E. Fosbury.* 422, 562, 38-G1 (1994)

Polarized One-Quantum Annihilation in Strong Magnetic Fields as a Process for Particle Deceleration in Neutron Star Atmospheres. *D. Berg, M. Mentzel, & G. Wunner.* 90, 905, 15-A10 (1994)

Intensity-dependent Circular Polarization and Circumstellar Magnetic Fields from the Observation of SiO Masers. *Gerald E. Nedoluha & William D. Watson.* 423, 394, 51-A11 (1994)

Modeling Composite and Fluffy Grains: The Effects of Porosity. *Michael J. Wolff, Geoffrey C. Clayton, P. G. Martin, & Regina E. Schulte-Ladbeck.* 423, 412, 51-C3 (1994)

New Infrared Observations of Seyfert 2 Galaxies and Unification Theories. *M. Ruiz, G. H. Rieke, & G. D. Schmidt.* 423, 608, 56-A11 (1994)

Infrared Spectroscopy and Imaging Polarimetry of the Disk around the T Tauri Star RNO 91. *David A. Weintraub, Stephen C. Tegler, Joel H. Kastner, & Terrence Rettig.* 423, 674, 57-A3 (1994)

Spectropolarimetry of Five Objects toward the Galactic Center from 1.4 to 4.2 Microns. *Tetsuya Nagata, Naoto Kobayashi, & Shuji Sato.* 423, L113, 60-F11 (1994)

Intermediate-Resolution Spectropolarimetry of a Small Sample of Quasars. *J. A. de Diego, M. R. Kidger, E. Pérez, & L. O. Takalo.* 424, 76, 63-A4 (1994)

Basic Theory for Polarized, Astrophysical Maser Radiation in a Magnetic Field. *William D. Watson.* 424, L37, 69-E8 (1994)

A Broad Observational Study of the Eclipsing Magnetic Cataclysmic Variable RE 2107−05. *Jason Glenn, Steve B. Howell, Gary D. Schmidt, James Liebert, Albert D. Grauer, & R. Mark Wagner.* 424, 967, 76-G3 (1994)

The Inclination of Network Magnetic Fields. *J. Sánchez Almeida & V. Martínez Pillet.* 424, 1014, 77-D7 (1994)

Spectropolarimetry of Nova Cygni 1992: Evidence for an Asymmetric Geometry. *K. S. Bjorkman, K. A. Johansen, K. H. Nordsieck, J. S. Gallagher, & A. J. Barger.* 425, 247, 83-C12 (1994)

Light Scattering by Porous Dust Particles in the Discrete-Dipole Approximation. *K. Lumme & J. Rahola.* 425, 653, 89-F12 (1994)

Multifrequency Studies of Bright Radio Supernova Remnants. I. 3C 391. *David A. Moffett & Stephen P. Reynolds.* 425, 668, 90-A1 (1994)

Evidence for Supersonic Downflows in the Photosphere of a Delta Sunspot. *V. Martínez Pillet, B. W. Lites, A. Skumanich, & D. Degenhardt.* 425, L113, 95-A1 (1994)

Is the High-Energy Emission from Centaurus A Compton-scattered Jet Radiation? *J. G. Skibo, C. D. Dermer, & R. L. Kinzer.* 426, L23, 103-C11 (1994)

The Synchrotron Continuum of the Highly Polarized Quasar PKS 1546+027. *Paul S. Smith, Gary D. Schmidt, Buell T. Jannuzi, & Richard Elston.* 426, 535, 105-A12 (1994)

Polarization Profiles of Scattered Emission Lines. I. General Formalism for Optically Thin Rayleigh Scattering. *W. J. Henney.* 427, 288, 113-E1 (1994)

Polarization Profiles of Scattered Emission Lines. II. Upstream Dust Scattering in the HH 1 Jet. *W. J. Henney, A. C. Raga, & D. J. Axon.* 427, 305, 113-F6 (1994)

Linear Polarization Radio Imaging at Milliarcsecond Resolution. *D. H. Roberts, J. F. C. Wardle, & L. F. Brown.* 427, 718, 121-F2 (1994)

The Optical Polarization Properties of X-Ray–selected BL Lacertae Objects. *Buell T. Jannuzi, Paul S. Smith, & Richard Elston.* 428, 130, 129-G3 (1994)

Geometry and Physical Conditions in the Stellar Wind of AG Carinae. *Claus Leitherer, Richard Allen, Bruce Altner, Augusto Damineli, Laurent Drissen, Thais Idiart, Olivia Lupie, Antonella Nota, Carmelle Robert, Werner Schmutz, & Steven N. Shore.* 428, 292, 131-G4 (1994)

Circular and Linear Polarization of the SiO Masers in VY Canis Majoris. *G. C. McIntosh, C. Read Predmore, & Nimesh A. Patel.* 428, L29, 134-E1 (1994)

Detection of Linear Polarization in the Microwave Emission of Solar Active Regions. *C. E. Alissandrakis & F. Chiuderi-Drago.* 428, L73, 142-G8 (1994)

Relativistic Jets in Blazars: Polarization of Radiation. *Juri Poutanen.* 92, 607, 40-A2 (1994)

The Polarization Sensitivity of the Liquid Xenon Imaging Telescope. *E. Aprile, A. Bolotnikov, D. Chen, R. Mukherjee, & F. Xu.* 92, 689, 41-A13 (1994)

The Axisymmetric Stellar Wind of AG Carinae. *Regina E. Schulte-Ladbeck, Geoffrey C. Clayton, D. John Hillier, Tim J. Harries, & Ian D. Howarth.* 429, 846, 156-B13 (1994)

The Hidden Nuclear Spectrum of the Luminous *IRAS* Source FSC 10214+4724. *Buell T. Jannuzi, Richard Elston, Gary D. Schmidt, Paul S. Smith, & H. S. Stockman.* 429, L49, 157-G1 (1994)

Blue Spectropolarimetry of Seyfert 2 Galaxies. I. Analysis and Basic Results. *Laura E. Kay.* 430, 196, 161-E3 (1994)

HST Ultraviolet Spectropolarimetry of NGC 1068. *Robert Antonucci, Todd Hurt, & Joseph Miller.* 430, 210, 161-F5 (1994)

Directivity of the Radio Emission from the K1 Dwarf Star AB Doradus. *Jeremy Lim, Stephen M. White, Graham J. Nelson, & Arnold O. Benz.* 430, 332, 163-C9 (1994)

Magnetic Field Structure in Monoceros R2. *T. H. Jarrett, G. Novak, T. Xie, & P. F. Goldsmith.* 430, 743, 171-B6 (1994)

Misdirected Quasars and Evolved Stars in Distant Radio Galaxies. *Sperello di Serego Alighieri, Andrea Cimatti, & Robert A. E. Fosbury.* 431, 123, 177-F5 (1994)

COBE DIRBE Near-Infrared Polarimetry of the Zodiacal Light: Initial Results. *G. B. Berriman, N. W. Boggess, M. G. Hauser, T. Kelsall, C. M. Lisse, S. H. Moseley, W. T. Reach, & R. F. Silverberg.* 431, L63, 183-C1 (1994)

The Size Distribution of Interstellar Dust Particles as Determined from Polarization: Infinite Cylinders. *Sang-Hee Kim & P. G. Martin.* 431, 783, 188-D1 (1994)

Stellar Occultation of Polarized Light from Circumstellar Electrons. IV. Detached Binary Systems. *G. K. Fox.* 432, 262, 196-D10 (1994)

Resonance Line Polarization in Spherical Atmospheres: Partial Redistribution Effects Studied with the Domke-Hubeny Redistribution Matrix. *K. N. Nagendra.* 432, 274, 196-E10 (1994)

The Linear Polarization of 3C 345 in the Ultraviolet. *Joseph F. Dolan, Patricia T. Boyd, Karen G. Wolinski, Paul S. Smith, C. D. Impey, Robert C. Bless, M. J. Nelson, J. W. Percival, M. J. Taylor, J. L. Elliot, Edward L. Robinson, & G. W. van Citters.* 432, 560, 203-A1 (1994)

Spectropolarimetry of High-Polarization Seyfert 1 Galaxies: Geometry and Kinematics of the Scattering Regions. *R. W. Goodrich & J. S. Miller.* 434, 82, 226-C7 (1994)

Broken Symmetry: The Structure of the Dust Envelope of IRC +10216. *Joel H. Kastner & David A. Weintraub.* 434, 719, 237-F7 (1994)

Coronal Magnetic Structures Observing Campaign. III. Coronal Plasma and Magnetic Field Diagnostics Derived from Multiwaveband Active Region Observations. *J. T. Schmelz, G. D. Holman, J. W. Brosius, & R. F. Willson.* 434, 786, 238-F8 (1994)

The Polarization and Nuclear Structure of the Broad Absorption Line QSO CSO 755. *Jason Glenn, Gary D. Schmidt, & Craig B. Foltz.* 434, L47, 241-D1 (1994)

Unusual Evolution in the VLBI Structure of 0735+178. *D. C. Gabuzda, J. F. C. Wardle, D. H. Roberts, M. F. Aller, & H. D. Aller.* 435, 128, 245-B3 (1994)

Evolution of the Millarcsecond Total Intensity and Polarization Structures of BL Lacertae Objects. *D. C. Gabuzda, C. M. Mullan, T. V. Cawthorne, J. F. C. Wardle, & D. H. Roberts.* 435, 140, 245-C5 (1994)

The Theoretical Polarization of Pure Scattering Axisymmetric Circumstellar Envelopes. *G. K. Fox.* 435, 372, 248-E1 (1994)

The Effects of Gravity Darkening on the Ultraviolet Continuum Polarization Produced by Circumstellar Disks. *J. E. Bjorkman & K. S. Bjorkman.* 436, 818, 277-A1 (1994)

Evolution of the Parsec-Scale Linear Polarization Structure of the Superluminal Quasar 3C 345. *L. F. Brown, D. H. Roberts, & J. F. C. Wardle.* 437, 108, 284-F7 (1994)

Interpretation of VLBI Kinematic and Polarization Data: Application to 3C 345. *J. F. C. Wardle, T. V. Cawthorne, D. H. Roberts, & L. F. Brown.* 437, 122, 284-G10 (1994)

The Effect of Grain Mantles and Grain Shape upon the 9.7 and 18 Micron Silicate Features. *James E. O'Donnell.* 437, 262, 286-F10 (1994)

Transient Microwave Brightenings in Solar Active Regions: Comparison between VLA and *Yohkoh* Observations. *N. Gopalswamy, T. E. W. Payne, E. J. Schmahl, M. R. Kundu, J. R. Lemen, K. T. Strong, R. C. Canfield, & J. de La Beaujardiere.* 437, 522, 290-C3 (1994)

Multifrequency Studies of Bright Radio Supernova Remnants. II. W49B. *David A. Moffett & Stephen P. Reynolds.* 437, 705, 295-D9 (1994)

Multiwavelength Monitoring of the BL Lacertae Object PKS 2155−304. III. Ground-based Observations in 1991 November. *T. J.-L. Courvoisier, A. Blecha, P. Bouchet, P. Bratschi, M. T. Carini, M. Donahue, R. Edelson, E. D. Feigelson, A. V. Filippenko, I. S. Glass, J. Heidt, R. I. Kollgaard, T. Matheson, H. R. Miller, J. C. Noble, K. Sekiguchi, P. S. Smith, C. M. Urry, & S. J. Wagner.* 438, 108, 2-G2 (1995)

Gamma-Ray Pulsars: Emission Zones and Viewing Geometries. *Roger W. Romani & I.-A. Yadigaroglu.* 438, 314, 5-G3 (1995)

Interstellar Scattering toward Cygnus X-3: Measurements of Anisotrophy and of the Inner Scale. *L. A. Molnar, R. L. Mutel, M. J. Reid, & K. J. Johnston.* 438, 708, 14-A2 (1995)

Is the Solar Chromospheric Magnetic Field Force-free? *Thomas R. Metcalf, Litao Jiao, Alexander N. McClymont, Richard C. Canfield, & Han Uitenbroek.* 439, 474, 27-E11 (1995)

Polarization of Thermal Emission from Aspherical Dust Grains in an Anisotropic Radiation Field. *Takashi Onaka.* 439, L21, 30-A10 (1995)

Ultraviolet Spectropolarimetry of High-Redshift Quasars with the *Hubble Space Telescope*. *C. D. Impey, Matthew A. Malkan, Wayne Webb, & C. E. Petry.* 440, 80, 42-C8 (1995)

Rapid Polarization Variability in Intense Sources. *R. T. Gangadhara & V. Krishan.* 440, 116, 42-G1 (1995)

Dust in the Broad-Line Regions of Seyfert Galaxies. *Robert W. Goodrich.* 440, 141, 43-B7 (1995)

On the Current Status of Maser Polarization Theory. *Moshe Elitzur.* 440, 345, 45-G13 (1995)

Solar Coronal Dust Scattering in the Infrared. *R. M. MacQueen & Bradford W. Greeley.* 440, 361, 46-B8 (1995)

The Nature of Seyfert 2 Galaxies with Obscured Broad-Line Regions. I. Observations. *Hien D. Tran.* 440, 565, 51-A8 (1995)

The Nature of Seyfert 2 Galaxies with Obscured Broad-Line Regions. II. Individual Objects. *Hien D. Tran.* 440, 578, 51-B10 (1995)

The Nature of Seyfert 2 Galaxies with Obscured Broad-Line Regions. III. Interpretation. *Hien D. Tran.* 440, 597, 51-D4 (1995)

A Near-Infrared Reflection Nebula Associated with NGC 2024 FIR 4. *T. J. T. Moore & T. Yamashita.* 440, 722, 53-B6 (1995)

HCN Emission from Bright Carbon Stars: The Ground State Masers and Peculiar Broad Features. *Hideyuki Izumiura, Nobuharu Ukita, & Takashi Tsuji.* 440, 728, 53-C1 (1995)

Remarks on the Polarization Observed in SN 1993J. *Peter Höflich.* 440, 821, 54-D4 (1995)

Photon-Splitting Limits to the Hardness of Emission in Strongly Magnetized Soft Gamma Repeaters. *Matthew G. Baring.* 440, L69, 57-G1 (1995)

The Polarization and Depolarization of Radio Emission from Supernova Remnant Cassiopeia A. *M. C. Anderson, J. W. Keohane, & L. Rudnick.* 441, 300, 63-D7 (1995)

Polarization from Scattering in Blobs. *Arthur D. Code & Barbara A. Whitney.* 441, 400, 64-G4 (1995)

Can the Variability of Solar-like Spotted Stars be Detected Polarimetrically? *Geoffrey K. Fox.* 441, 408, 65-A1 (1995)

Detection of the Hot White Dwarf in the Magnetic Nova V1500 Cygni with the *Hubble Space Telescope*. *Gary D. Schmidt, James Liebert, & H. S. Stockman.* 441, 414, 65-A11 (1995)

Polarization Properties of Two Pulsars. *R. N. Manchester & Simon Johnston.* 441, L65, 75-G6 (1995)

The Gravitational Lens System Q0957+561 in the Ultraviolet. *J. F. Dolan, A. G. Michalitsianos, R. W. Thompson, P. T. Boyd, K. G. Wolinski, R. C. Bless, M. J. Nelson, J. W. Percival, M. J. Taylor, J. L. Elliot, & G. W. van Citters.* 442, 87, 78-D5 (1995)

Can We Improve upon Astronomical Silicate? *Sang-Hee Kim & P. G. Martin.* 442, 172, 79-E6 (1995)

On the Nature of the Spectral Features in Peculiar "DQ" White Dwarfs. *Gary D. Schmidt, P. Bergeron, & Bruce Fegley, Jr.* 443, 274, 99-A10 (1995)

Effects of Prescattering Attenuation on Spectropolarimetric Line Profiles. *Kenneth Wood & J. E. Bjorkman.* 443, 348, 100-A3 (1995)

The Magnetic Field in Lynds 1457: Multiband Photopolarimetry. *B-G Andersson & Peter G. Wannier.* 443, L49, 103-B2 (1995)

The Polarization and Ultraviolet Spectrum of Markarian 231. *Paul S. Smith, Gary D. Schmidt, Richard G. Allen, & J. R. P. Angel.* 444, 146, 115-D1 (1995)

The Size Distribution of Interstellar Dust Particles as Determined from Polarization: Spheroids. *Sang-Hee Kim & P. G. Martin.* 444, 293, 117-D13 (1995)

Circular Polarization in the Radio Emission of RS Canum Venaticorum Binaries. *Stephen M. White & Elena Franciosini.* 444, 342, 118-C1 (1995)

Magnetic Fields around Bok Globules: CCD Polarimetry of CB 4. *Brian D. Kane, Dan P. Clemens, Robert W. Leach, & Richard Barvainis.* 445, 269, 136-C2 (1995)

Instabilities and the Transport of Polarized Astrophysical Maser Radiation. *Bradley K. Wallin & William D. Watson.* 445, 465, 139-A4 (1995)

On the Value of GEMS (Glass with Embedded Metal and Sulphides). *P. G. Martin.* 445, L63, 141-C8 (1995)

Gravity Wave–induced Polarization of the Cosmic Microwave Background Radiation. *Ka Lok Ng & Kin-Wang Ng.* 445, 521, 142-C1 (1995)

A Faraday Rotation Search for Magnetic Fields in Quasar-damped Lyα Absorption Systems. *Abraham L. Oren & Arthur M. Wolfe.* 445, 624, 143-F7 (1995)

Ultraviolet Interstellar Linear Polarization. II. The Wavelength Dependence. *Geoffrey C. Clayton, Michael J. Wolff, R. G. Allen, & O. L. Lupie.* 445, 947, 148-C11 (1995)

The Magnetic Fields in the Galactic Center: Detection of H I Zeeman Splitting. *R. L. Plante, K. Y. Lo, & R. M. Crutcher.* 445, L113, 151-B4 (1995)

HST Imaging Polarimetry of NGC 1068. *A. Capetti, D. J. Axon, F. Macchetto, W. B. Sparks, & A. Boksenberg.* 446, 155, 155-C9 (1995)

Optical Structure and Polarization of the Western Hot Spot of Pictor A. *R. C. Thomson, P. Crane, & C. D. Mackay.* 446, L93, 171-B12 (1995)

The Visual and Ultraviolet Polarimetric Data of α Camelopardalis and κ Cassiopeia: Evidence of Shocked Regions. *Geoffrey K. Fox, John C. Brown, & Karen S. Bjorkman.* 447, 889, 188-B8 (1995)

Multifrequency Radio Studies of G359.1−00.2. *Andrew D. Gray, Jenniger Nicholls, Ron D. Ekers, & Lawrence E. Cram.* 448, 164, 194-D4 (1995)

A Search for Magnetic Fields among DA White Dwarfs. *Gary D. Schmidt & Paul S. Smith.* 448, 305, 196-D7 (1995)

1 Millimeter Polarimetry of Young Stellar Objects: Low-Mass Protostars and T Tauri Stars. *Motohide Tamura, J. H. Hough, & Saeko S. Hayashi.* 448, 346, 197-A2 (1995)

A Search for Polarization in Diffuse Interstellar Bands toward HD 197770. *A. J. Adamson & D. C. B. Whittet.* 448, L49, 200-B3 (1995)

Does Near-Infrared Polarimetry Reveal the Magnetic Field in Cold Dark Clouds? *Alyssa A. Goodman, Terry J. Jones, Elizabeth A. Lada, & Philip C. Myers.* 448, 748, 205-B4 (1995)

The Polarized Spectrum of the Fe II–rich Broad Absorption Line QSO IRAS 07598+6508. *Dean C. Hines & Beverley J. Wills.* 448, L69, 208-F8 (1995)

Polarization Clues to the Structure of Broad Absorption Line Quasi-stellar Objects. *Robert W. Goodrich & Joseph S. Miller.* 448, L73, 208-G1 (1995)

Spectropolarimetry of Two Broad Absorption Line Quasars with the W. M. Keck Telescope. *M. H. Cohen, P. M. Ogle, H. D. Tran, R. C. Vermeulen, J. S. Miller, R. W. Goodrich, & A. R. Martel.* 448, L77, 208-G8 (1995)

The Distribution of Warm Dust in the Star-forming Region Cepheus A: Infrared Constraints. *Cecilia Colomé & Paul M. Harvey.* 449, 656, 221-F8 (1995)

Off-centered Dipole Models for Three Isolated Magnetic White Dwarfs. *Angela Putney & Stefan Jordan.* 449, 863, 224-E10 (1995)

The Buried QSO in IRAS F15307+3252 and the Nature of Hyperluminous Infrared Galaxies. *Dean C. Hines, Gary D. Schmidt, Paul S. Smith, Roc M. Cutri, & Frank J. Low.* 450, L1, 235-D1 (1995)

Quasar Lyman Edge Regions in Polarized Light. *A. Koratkar, R. R. J. Antonucci, R. W. Goodrich, H. Bushouse, & A. L. Kinney.* 450, 501, 237-F1 (1995)

The Shapes and Alignment Properties of Interstellar Dust Grains. *Roger H. Hildebrand & Mark Dragovan.* 450, 663, 239-G13 (1995)

Zeeman Effect Observations of H I Emission Profiles. I. Magnetic Field Limits for Three Regions Based on Observations Corrected for Polarized Beam Structure. *Gerrit L. Verschuur.* 451, 624, 255-G10 (1995)

Mechanical Alignment of Suprathermally Rotating Grains. *A. Lazarian.* 451, 660, 256-C11 (1995)

Three New Magnetic White Dwarf Stars. *Angela Putney.* 451, L67, 260-F7 (1995)

Detection of a Faint Optical Jet in 3C 120. *Jens Hjorth, Marianne Vestergaard, Anton N. Sørensen, & Frank Grundahl.* 452, L17, 269-E3 (1995)

Models of the Optical/Ultraviolet Continuum Polarization in Active Galactic Nuclei: Implications for Unification Schemes. *John F. Kartje.* 452, 565, 272-D8 (1995)

The Massive Post–Red Supergiants IRC +10420 and HD 179821. *Joel H. Kastner & David A. Weintraub.* 452, 833, 276-B7 (1995)

Hubble Space Telescope Imaging Polarimetry of the Inner Nuclear Region of NGC 1068. *A. Capetti, F. Macchetto, D. J. Axon, W. B. Sparks, & A. Boksenberg.* 452, L87, 279-D9 (1995)

In Search of HL Tauri. *David A. Weintraub, Joel H. Kastner, & Barbara A. Whitney.* 452, L141, 280-E6 (1995)

Davis-Greenstein Alignment of Nonspherical Grains. *A. Lazarian.* 453, 229, 284-C5 (1995)

Grain Alignment by Ambipolar Diffusion in Molecular Clouds. *W. G. Roberge, S. Hanany, & D. W. Messinger.* 453, 238, 284-D3 (1995)

Polarization Profiles of Scattered Emission Lines. III. Effects of Multiple Scattering and Non-Rayleigh Phase Functions. *W. J. Henney & D. J. Axon.* 454, 233, 302-E4 (1995)

Detection of Extended Polarized Ultraviolet Radiation from the $z = 1.82$ Radio Galaxy 3C 256. *Buell T. Jannuzi, Richard Elston, Gary D. Schmidt, Paul S. Smith, & H. S. Stockman.* 454, L111, 316-A1 (1995)

Optical Detection of the Hidden Nuclear Engine in NGC 4258. *Belinda J. Wilkes, Gary D. Schmidt, Paul S. Smith, Smita Mathur, & Kim K. McLeod.* 455, L13, 324-D8 (1995)

Grain Alignment in the Taurus Dark Cloud. *P. A. Gerakines, D. C. B. Whittet, & A. Lazarian.* 455, L171, 334-E7 (1995)

A Point in Favor of the Superparamagnetic Grain Hypothesis. *A. A. Goodman & D. C. B. Whittet.* 455, L181, 334-F8 (1995)

PULSARS

Neutron Star Crustal Plate Tectonics. I. Magnetic Dipole Evolution in Millisecond Pulsars and Low-Mass X-Ray Binaries. *M. Ruderman.* 366, 261, 4-C5 (1991)

A New X-Ray Pulsar GS 2138+56 (Cepheus X-4). *Katsuji Koyama, Mitsunobu Kawada, Yuzuru Tawara, Kazuhiro Kimura, Shunji Kitamoto, Sigenori*

Miyamoto, Hiroshi Tsunemi, Ken Ebisawa, & Fumiaki Nagase. 366, L19, 6-C5 (1991)
Birthrates of Galactic Millisecond Pulsars and Their Low-Mass X-Ray Binary Precursors. *Marco Tavani.* 366, L27, 6-D1 (1991)
Refractive Interstellar Scintillation and Millisecond Pulsar Timing. *Wayne Hu, Roger W. Romani, & Daniel R. Stinebring.* 366, L33, 6-D9 (1991)
On the Orbital Period Change of the Binary Pulsar PSR 1913+16. *Thibault Damour & J. H. Taylor.* 366, 501, 9-C1 (1991)
The Proper Motion of the Soft X-Ray–emitting Radio Pulsar PSR 0656+14. *R. J. Thompson, Jr., F. A. Córdova, R. M. Hjellming, & E. B. Fomalont.* 366, L83, 11-E1 (1991)
Optical and Radio Observations of the Binary Pulsar 1855+09: Evolution of Pulsar Magnetic Fields and Low-Mass White Dwarf Cooling. *S. R. Kulkarni, S. Djorgovski, & A. R. Klemola.* 367, 221, 14-G4 (1991)
Conditions for Accretion-induced Collapse of White Dwarfs. *Ken'ichi Nomoto & Yoji Kondo.* 367, L19, 17-D1 (1991)
Accretion Powered Pulsars: Continuum Spectra and Light Curves of Settling Accretion Mounds. *David J. Burnard, Jonathan Arons, & Richard I. Klein.* 367, 575, 20-D10 (1991)
Observation of a Pulsar Wind: CCD Polarimetry of the Crab Nebula. *F. C. Michel, P. A. Scowen, R. J. Dufour, & J. J. Hester.* 368, 463, 30-G1 (1991)
On the Detectability of Pulsars in Close Binary Systems. *Helen M. Johnston & Shrinivas R. Kulkarni.* 368, 504, 31-D1 (1991)
No Evidence for TeV Gamma Radiation from 2CG 006−00. *H. I. Nel, B. C. Raubenheimer, O. C. de Jager, R. Buccheri, M. Busetta, A. R. North, & C. Brink.* 368, 585, 32-D4 (1991)
Dynamic Effects on Cyclotron Scattering in Pulsar Accretion Columns. *J. J. Brainerd & P. Mészáros.* 369, 179, 38-B11 (1991)
HEAO 3 Upper Limits to Pulsed Gamma-Ray Emission from PSR 1509−58 and PSR 0833−45. *M. P. Ulmer, W. R. Purcell, W. A. Wheaton, & W. A. Mahoney.* 369, 485, 43-F12 (1991)
Accretion Mechanisms in the Be/X-Ray Transient System A0535+26. *C. Motch, L. Stella, E. Janot-Pacheco, & M. Mouchet.* 369, 490, 43-G5 (1991)
Problems of Ultra–High-Energy Particle Acceleration in Cygnus X-3: A Critical Reappraisal. *Abhas Mitra.* 370, 345, 51-E7 (1991)
Mechanisms for Pulsar Eclipse. *David Eichler.* 370, L27, 53-D11 (1991)
A Relativistic Model of Pulsar Polarization. *M. Blaskiewicz, J. M. Cordes, & I. Wasserman.* 370, 643, 56-D9 (1991)
Multimission Observations of 4U 1538−52. *L. R. Cominsky & F. Moraes.* 370, 670, 56-F10 (1991)
Discovery of 111 Second Pulsation from the X-Ray Source Scutum X-1. *K. Koyama, H. Kunieda, Y. Takeuchi, & Y. Tawara.* 370, L77, 59-D1 (1991)
The Relativistic Rotation Transformation and the Corotating Source Model. *S. Kichenassamy & R. A. Krikorian.* 371, 277, 63-E7 (1991)
The Discovery of an X-Ray Burst and a Study of Aperiodic Variability from SMC X-1. *L. Angelini, L. Stella, & N. E. White.* 371, 332, 64-C1 (1991)
High-Precision Timing of Millisecond Pulsars. I. Astrometry and Masses of the PSR 1855+09 System. *M. F. Ryba & J. H. Taylor.* 371, 739, 70-F9 (1991)
Line Integrals of n_e and n_e^2 at High Galactic Latitude. *R. J. Reynolds.* 372, L17, 79-C1 (1991)
Magnetic Two-Photon Scattering and Two-Photon Emission: Cross Sections and Redistribution Functions. *S. G. Alexander & P. Mészáros.* 372, 554, 82-E11 (1991)
Cyclotron Harmonics in Accreting Pulsars and Gamma-Ray Bursters: Effect of Two-Photon Processes. *S. G. Alexander & P. Mészáros.* 372, 565, 82-F9 (1991)
Oscillations of Rotating Neutron Stars. *Tod E. Strohmayer.* 372, 573, 82-G5 (1991)
Discovery of a Young, 267 Millisecond Pulsar in the Supernova Remnant W44. *A. Wolszczan, J. M. Cordes, & R. J. Dewey.* 372, L99, 85-F1 (1991)
Stationary Accelerators around Keplerian Disks of Aligned Magnetized Collapsed Objects: Pair Production and Gamma-Ray Emission. *K. S. Cheng & M. Ruderman.* 373, 187, 88-C9 (1991)
Transverse Conductivity of a Relativistic Plasma in Oblique Electric and Magnetic Fields. *Fulvio Melia & Marco Fatuzzo.* 373, 198, 88-D8 (1991)
Rotation of the Neutron-Drip Superfluid in Pulsars: The Interaction and Pinning of Vortices. *P. B. Jones.* 373, 208, 88-E6 (1991)
Microstructure-determined Pulsar Dispersion Measures and the Problem of Profile Alignment. *Timothy H. Hankins, Vera A. Izvekova, Valerii M. Malofeev, Joanna M. Rankin, Yuri P. Shitov, & Daniel R. Stinebring.* 373, L17, 91-C1 (1991)
Mechanics and Energetics of Vortex Unpinning in Neutron Stars. *Bennett K. Link & Richard I. Epstein.* 373, 592, 95-C11 (1991)
Pulsar Timing at Low Radio Frequencies: Evidence for Superdispersion? *J. A. Phillips.* 373, L63, 97-D11 (1991)
Multipolar Magnetic Fields in Neutron Stars. *Julian H. Krolik.* 373, L69, 97-E4 (1991)
Timing Observations of the 8 Hour Binary Pulsar 2127+11C in the Globular Cluster M15. *T. A. Prince, S. B. Anderson, S. R. Kulkarni, & A. Wolszczan.* 374, L41, 110-C1 (1991)
Cyclotron Line Features in the Spectrum of the Transient X-Ray Pulsar X0115+634. *F. Nagase, T. Dotani, Y. Tanaka, K. Makishima, T. Mihara, T. Sakao, H. Tsunemi, S. Kitamoto, K. Tamura, A. Yoshida, & H. Nakamura.* 375, L49, 124-B11 (1991)
The X-Ray Properties of GX 301−2 (4U 1223−62). *F. Haberl.* 376, 245, 128-A5 (1991)
Detection of a Feature at 0.44 MeV in the Crab Pulsar Spectrum with FIGARO II: A Redshifted Positron Annihilation Line? *E. Massaro, G. Matt, M. Salvati, E. Costa, P. Mandrou, M. Niel, J. F. Olive, T. Mineo, B. Sacco, L. Scarsi, G. Gerardi, B. Agrinier, E. Barouch, R. Comte, B. Parlier, & J. L. Masnou.* 376, L11, 130-B7 (1991)
Transient Particle Acceleration in Strongly Magnetized Neutron Stars. *Fulvio Melia & Marco Fatuzzo.* 376, 673, 134-F7 (1991)
Search for TeV Emission from 4U 0115+63. *D. J. Macomb, M. F. Cawley, D. J. Fegan, A. M. Hillas, P. W. Kwok, R. C. Lamb, M. J. Lang, D. A. Lewis, P. T. Reynolds, G. Vacanti, & T. C. Weekes.* 376, 738, 135-D12 (1991)
Does the Vela Pulsar Have "Wisps"? *M. F. Bietenholz, D. A. Frail, & T. H. Hankins.* 376, L41, 137-C1 (1991)
An X-Ray Pulsator in the Direction of Molecular Cloud MBM 12 (Lynds 1457). *K. Koyama, S. Takano, Y. Tawara, T. Matsumoto, K. Noguchi, Y. Fukui, T. Iwata, N. Ohashi, K. Tatematsu, N. Takahashi, T. Umemoto, K. W. Hodapp, J. Rayner, & K. Makishima.* 377, 240, 141-A1 (1991)
Frequency Dependence of Pulsar Integrated Profiles. *S. E. Thorsett.* 377, 263, 141-C1 (1991)
Asymptotic Structure of Hydromagnetically Driven Relativistic Winds. *Tzihong Chiueh, Zhi-yun Li, & Mitchell C. Begelman.* 377, 462, 145-D11 (1991)
Gamma-Ray Observations of the Crab Nebula at TeV Energies. *G. Vacanti, M. F. Cawley, E. Colombo, D. J. Fegan, A. M. Hillas, P. W. Kwok, M. J. Lang, R. C. Lamb, D. A. Lewis, D. J. Macomb, K. S. O'Flaherty, P. T. Reynolds, & T. C. Weekes.* 377, 467, 145-E4 (1991)
Collisions of Giant Stars with Compact Objects: Hydrodynamical Calculations. *Frederic A. Rasio & Stuart L. Shapiro.* 377, 559, 146-F1 (1991)
PSR 0540+23 Revisited: Three Components, Drifting Subpulses, and Mode Switching. *Leszek A. Nowakowski.* 377, 581, 147-A1 (1991)
On the Nature and Evolution of the Windy Binary Pulsar PSR 1744−24A. *Jacob Shaham & Marco Tavani.* 377, 588, 147-A11 (1991)
The Contribution of Light Bending and Redshift to the Pulse Characteristics of a Pulsar in the Case of Smaller Neutron Stars. *R. C. Kapoor.* 378, 227, 153-G1 (1991)
Magnetosphere of the Rotation-powered Pulsar: A DC Circuit Model. *Shinpei Shibata.* 378, 239, 154-A1 (1991)
A Spectral Study of Four Millisecond Pulsars. *R. S. Foster, L. Fairhead, & D. C. Backer.* 378, 687, 161-A1 (1991)
Very High Energy Gamma-Ray Emission from Accreting X-Ray Pulsars. *K. S. Cheng, K. N. Yu, T. Cheung, & M. M. Lau.* 379, 290, 166-F1 (1991)
Searches for Millisecond Pulsations in Low-Mass X-Ray Binaries. *K. S. Wood, J. P. Norris, P. Hertz, B. A. Vaughan, P. F. Michelson, K. Mitsuda, W. H. G. Lewin, J. van Paradijs, W. Penninx, & M. van der Klis.* 379, 295, 166-F9 (1991)
Neutron Star and Black Hole Binaries in the Galaxy. *Ramesh Narayan, Tsvi Piran, & Amotz Shemi.* 379, L17, 169-B11 (1991)
A Model of Unpulsed Very High Energy Gamma Rays from the Crab Nebula and Pulsar. *P. W. Kwok, K. S. Cheng, & M. M. Lau.* 379, 653, 172-G1 (1991)
Discovery of Periodic Eclipses in the X-Ray Pulsar 1H 0253+193. *Yuichi Kamata, Yuzuru Tawara, & Katsuji Koyama.* 379, L65, 175-C13 (1991)
"Hidden" Millisecond Pulsars. *Marco Tavani.* 379, L69, 175-D5 (1991)
The Rate of Neutron Star Binary Mergers in the Universe: Minimal Predictions for Gravity Wave Detectors. *E. S. Phinney.* 380, L17, 181-C6 (1991)

The *K* Parameter and Evolution of the Radio Pulsars. *Wen Xu & Xinji Wu.* 380, 550, 185-A12 (1991)

High-Precision Timing of Millisecond Pulsars. II. Astrometry, Orbital Evolution, and Eclipses of PSR 1957+20. *M. F. Ryba & J. H. Taylor.* 380, 557, 185-B7 (1991)

LMC X-4: *Ginga* Observations and Search for Orbital Period Changes. *A. Levine, S. Rappaport, A. Putney, R. Corbet, & F. Nagase.* 381, 101, 190-C7 (1991)

A Model of Pulsed Gamma Radiation from the X-Ray Binary Hercules X-1/HZ Herculis. *F. A. Aharonian & A. M. Atoyan.* 381, 220, 191-F8 (1991)

Outflow Hydrodynamics in the Eclipsing Millisecond Pulsar Binaries PSR 1957+20 and PSR 1744−24A. *Marco Tavani & Leigh Brookshaw.* 381, L21, 194-C13 (1991)

H I Absorption Measurements toward 15 Pulsars and the Radial Distribution of Diffuse Ionized Gas in the Galaxy. *D. A. Frail, J. M. Cordes, T. H. Hankins, & J. M. Weisberg.* 382, 168, 202-C10 (1991)

Time Variability of Pulsar Dispersion Measures. *J. A. Phillips & A. Wolszczan.* 382, L27, 205-D1 (1991)

Transient Particle Acceleration in Strongly Magnetized Neutron Stars. II. Effects Due to a Dipole Field Geometry. *Marco Fatuzzo & Fulvio Melia.* 382, 570, 208-E10 (1991)

Neutron Star Crustal Plate Tectonics. II. Evolution of Radio Pulsar Magnetic Fields. *M. Ruderman.* 382, 576, 208-F4 (1991)

Neutron Star Crustal Plate Tectonics. III. Cracking, Glitches, and Gamma-Ray Bursts. *M. Ruderman.* 382, 587, 208-G3 (1991)

The Origin of the Planet around PSR 1829−10. *Takashi Nakamura & Tsvi Piran.* 382, L81, 211-C13 (1991)

Deep VLA Images of Globular Clusters. *Helen M. Johnston, Shrinivas R. Kulkarni, & W. M. Goss.* 382, L89, 211-D11 (1991)

Decrease in the Orbital Period of Hercules X-1. *John E. Deeter, Paul E. Boynton, Sigenori Miyamoto, Shunji Kitamoto, Fumiaki Nagase, & Nobuyuki Kawai.* 383, 324, 216-C1 (1991)

Evolution of Compact Binary Systems with X-Ray Heating. *Amos Harpaz & Saul Rappaport.* 383, 739, 223-D3 (1991)

Formation of Dense Charged Bunches in Vacuum Gaps. *F. Curtis Michel.* 383, 808, 224-C6 (1991)

Gamma-Ray Bursts from Sheared Alfvén Waves. *Fulvio Melia & Marco Fatuzzo.* 383, L57, 226-D1 (1991)

X-Ray and Radio Pulse Phase Comparison for PSR 1509−58. *N. Kawai, R. Okayasu, W. Brinkmann, R. Manchester, A. G. Lyne, & N. D'Amico.* 383, L65, 226-D12 (1991)

QUANTUM MECHANICS

Theoretical Determination of the Spectroscopic Constants of the MgC Molecule. *Marcos A. Castro, Sylvio Canuto, & Florian Müller-Plathe.* 367, L69, 22-D3 (1991)

Recalculation of Radial Matrix Integrals for the Electric Dipole Transitions in Hydrogen. *G. P. Malik, Usha Malik, & Vijaya S. Varma.* 371, 418, 65-D1 (1991)

Transverse Conductivity of a Relativistic Plasma in Oblique Electric and Magnetic Fields. *Fulvio Melia & Marco Fatuzzo.* 373, 198, 88-D8 (1991)

A New Gravitational Interaction of Cosmological Importance. *David F. Crawford.* 377, 1, 138-B1 (1991)

Gamma-Ray Bursts from Sheared Alfvén Waves. *Fulvio Melia & Marco Fatuzzo.* 383, L57, 226-D1 (1991)

QUASARS

Galaxies Clustering around QSOs with $z = 0.9$–1.5 and the Origin of Blue Field Galaxies. *Paul Hintzen, W. Romanishin, & Francisco Valdes.* 366, 7, 1-B5 (1991)

Comparison of VLBI Radio-Core and X-Ray Flux Densities of Extragalactic Radio Sources. *Steven D. Bloom & Alan P. Marscher.* 366, 16, 1-C5 (1991)

Southern *IRAS* Quasar with Extreme Fe II Emission. *S. Lípari, F. D. Macchetto, & D. Golombek.* 366, L65, 11-C1 (1991)

A Change in the Cluster Environments of Radio Galaxies with Cosmic Epoch. *G. J. Hill & S. J. Lilly.* 367, 1, 12-A13 (1991)

The Redshift Distribution of Lyα Clouds and the Proximity Effect. *Limin Lu, Arthur M. Wolfe, & David A. Turnshek.* 367, 19, 12-C5 (1991)

Accretion Disk Emission from a BL Lacertae Object. *Amri Wandel & C. Megan Urry.* 367, 78, 13-A5 (1991)

A Technique for Using Radio Jets as Extended Gravitational Lensing Probes. *Philipp P. Kronberg, Charles C. Dyer, E. Margaret Burbidge, & Vesa T. Junkkarinen.* 367, L1, 17-B1 (1991)

Universal Particle Acceleration. *J. I. Katz.* 367, 407, 18-E1 (1991)

X-Ray Continuum and Evidence for an Iron Emission Line from the Quasar E1821+643. *T. Kii, O. R. Williams, T. Ohashi, H. Awaki, K. Hayashida, H. Inoue, H. Kondo, K. Koyama, F. Makino, K. Makishima, R. D. Saxton, G. C. Stewart, S. Takano, Y. Tanaka, & M. J. L. Turner.* 367, 455, 19-A11 (1991)

Effect of a QSO on the Interstellar Medium of Its Host Galaxy. *Smita Shanbhag.* 367, 462, 19-B5 (1991)

Dark Matter Decay and the Temperature of Lyman-Alpha Clouds. *D. W. Sciama.* 367, L39, 22-A11 (1991)

Lyman-α Companions to High-z Quasars. *Esther M. Hu, Antoinette Songaila, Lennox L. Cowie, & Alan Stockton.* 368, 28, 23-D9 (1991)

A Study of Two Absorption-Line Complexes in the Quasar UM 402 ≡ Q0207−003. *E. Joseph Wampler.* 368, 40, 23-E11 (1991)

Expansion-cooled Lyman-Alpha Clouds. *Robert C. Duncan, Ethan T. Vishniac, & Jeremiah P. Ostriker.* 368, L1, 28-B1 (1991)

BL Lacertae Objects and Radio-loud Quasars within an Evolutionary Unified Scheme. *F. Vagnetti, E. Giallongo, & A. Cavaliere.* 368, 366, 29-E11 (1991)

A New Survey for Quasar Clustering. *Patrick S. Osmer & Paul C. Hewett.* 75, 273, 4-E9 (1991)

An Optical Catalog of Extragalactic Emission-Line Objects Similar to Quasi-stellar Objects. *A. Hewitt & G. Burbidge.* 75, 297, 5-A5 (1991)

Infrared Polarimetry of Quasars. *Michael L. Sitko & Yudong Zhu.* 369, 106, 37-C5 (1991)

First Results from the Faint Object Camera: Images of the Gravitational Lens System G2237+0305. *P. Crane, R. Albrecht, C. Barbieri, J. C. Blades, A. Bokensenberg, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, & W. B. Sparks.* 369, L59, 46-A7 (1991)

Spatially Resolved Optical Images of High-Redshift Quasi-stellar Objects. *Timothy M. Heckman, Matthew D. Lehnert, Wil van Breugel, & George K. Miley.* 370, 78, 48-A7 (1991)

An Ultraviolet Atlas of Quasar and Blazar Spectra. *A. L. Kinney, R. C. Bohlin, J. C. Blades, & D. G. York.* 75, 645, 10-C7 (1991)

Structure and Kinematics of the Broad-Line Regions in Active Galaxies from *IUE* Variability Data. *Anuradha P. Koratkar & C. Martin Gaskell.* 75, 719, 11-B5 (1991)

The Shape of the Ultraviolet Continuum of Quasars and Intergalactic Dust. *F. H. Cheng, C. Martin Gaskell, & Anuradha P. Koratkar.* 370, 487, 54-D9 (1991)

High-Resolution Spectroscopy of Q1100−264 Again. *R. F. Carswell, K. M. Lanzetta, H. C. Parnell, & J. K. Webb.* 371, 36, 60-E1 (1991)

Quasars and Active Galactic Nuclei in Rich Environments. II. The Evolution of Radio-loud Quasars. *E. Ellingson, H. K. C. Yee, & R. F. Green.* 371, 49, 60-F7 (1991)

Correlated Radio and Optical Asymmetries in Powerful Radio Sources. *Patrick J. McCarthy, Wil van Breugel, & Vijay K. Kapahi.* 371, 478, 67-D11 (1991)

Multifrequency VLA, VLBI, and Single-Dish Observations of the Quasar 4C 39.25. *Alan P. Marscher, Yun Fei Zhang, David B. Shaffer, Hugh D. Aller, & Margo F. Aller.* 371, 491, 67-E12 (1991)

OX 169: Evidence for a Recent Merger. *Alan Stockton & Tony Farnham.* 371, 525, 68-A13 (1991)

A Comparison of C IV and Hβ Broad Emission-Line Profiles in Low-Redshift Active Galactic Nuclei. *Michael R. Corbin.* 371, L51, 73-B1 (1991)

The Formation of Galaxies and Quasars in a Texture-seeded Cold Dark Matter Cosmogony. *Andrew K. Gooding, David N. Spergel, & Neil Turok.* 372, L5, 79-A13 (1991)

Evidence for Structure in the Distribution of Active Galactic Nuclei with $z < 0.05$. *Michael J. Longo.* 372, L59, 85-B11 (1991)

Evolution of the Luminosity Function of Quasar Accretion Disks. *David M. Caditz, Vahé Petrosian, & Amri Wandel.* 372, L63, 85-C1 (1991)

Discovery of an Infrared Nucleus in Cygnus A: An Obscured Quasar Revealed? *S. Djorgovski, N. Weir, K. Matthews, & J. R. Graham.* 372, L67, 85-C5 (1991)

Correlated Radio and Optical Variability in the BL Lacertae Object 0716+714. *A. Quirrenbach, A. Witzel, S. Wagner, F. Sanchez-Pons, T. P. Krichbaum,*

R. Wegner, K. Anton, U. Erkens, M. Haehnelt, J. A. Zensus, & K. J. Johnston. 372, L71, 85-C9 (1991)

Comparisons of the Emission-Line and Continuum Properties of Broad Absorption Line and Normal Quasi-stellar Objects. *Ray J. Weymann, Simon L. Morris, Craig B. Foltz, & Paul C. Hewett.* 373, 23, 86-C13 (1991)

Physical Models for the Hypothesized $F(\nu) \propto \nu^{-1}$ Infrared to X-Ray Continuum of Quasi-stellar Objects. *Wayne A. Stein.* 373, 54, 86-F4 (1991)

The Ultraviolet Spectrum and Continuum Energy Distribution of the Bright Quasar H1821+643. *Michiel Kolman, Jules P. Halpern, Chris R. Shrader, & Alexei V. Filippenko.* 373, 57, 86-F8 (1991)

A Wide-Field Multicolor Survey for High-Redshift Quasars, $z \geq 2.2$. I. Photometric Catalog and Survey Selection Function. *Stephen J. Warren, Paul C. Hewett, Michael J. Irwin, & Patrick S. Osmer.* 76, 1, 24-B1 (1991)

A Wide-Field Multicolor Survey for High-Redshift Quasars, $z \geq 2.2$. II. The Quasar Catalog. *Stephen J. Warren, Paul C. Hewett, & Patrick S. Osmer.* 76, 23, 24-D3 (1991)

A High Signal-to-Noise Ratio Composite Quasar Spectrum. *Paul J. Francis, Paul C. Hewett, Craig B. Foltz, Frederic H. Chaffee, Ray J. Weymann, & Simon L. Morris.* 373, 465, 93-F10 (1991)

Analysis of C IV Absorption Lines from Clouds at High Redshifts. *Wei Peng & Jon C. Weisheit.* 373, 471, 93-G4 (1991)

Emission from the $z = 2$ Damped Lyα Absorber toward Q1215+333. *Richard Elston, Jill Bechtold, James Lowenthal, & Marcia Rieke.* 373, L39, 97-B1 (1991)

Synchrotron Emission from Shocked Relativistic Jets. III. Models for the Centimeter Wave Band Quiescent and Burst Emission from 3C 279 and OT 081. *P. A. Hughes, H. D. Aller, & M. F. Aller.* 374, 57, 98-F5 (1991)

New Observations of the Gas Cloud Associated with the Quasar-Galaxy Pair 3C 232/NGC 3067. *John T. Stocke, James Case, Megan Donahue, J. Michael Shull, & Theodore P. Snow.* 374, 72, 98-G7 (1991)

Gravitational Lens Interference. *J. B. Peterson & Toby Falk.* 374, L5, 103-C1 (1991)

Broad Paschen-Alpha Emission in Two Extremely Infrared Luminous Seyfert 2 Galaxies. *Dean C. Hines.* 374, L9, 103-C7 (1991)

The CfA *Einstein Observatory* Extended Deep X-Ray Survey. *F. A. Primini, S. S. Murray, J. Huchra, R. Schild, R. Burg, & R. Giacconi.* 374, 440, 104-E12 (1991)

Broad Na D Emission in QSOs and the Profile of He I λ5876. *Keith L. Thompson.* 374, 496, 105-C7 (1991)

Quasars and Active Galactic Nuclei in Rich Environments. I. Fields Surrounding Optically Faint Quasars. *E. Ellingson, H. K. C. Yee, & R. F. Green.* 76, 455, 31-D2 (1991)

Evolution of High-Redshift Lyman-Limit Absorption Systems. *Kenneth M. Lanzetta.* 375, 1, 111-A11 (1991)

Optical Polarization of a Complete Sample of Radio Sources. *C. D. Impey, C. R. Lawrence, & S. Tapia.* 375, 46, 111-E10 (1991)

Infrared Broad Emission Lines from an Obscured Quasar, IRAS 23060+0505. *Tadashi Nakajima, Nathaniel P. Carleton, & Minoru Nishida.* 375, L1, 117-A7 (1991)

Gravitational Lensing and the Lyman-Alpha Forest. *Satoru Ikeuchi & Edwin L. Turner.* 375, 499, 119-A5 (1991)

The Emission-Line Properties of Steep Radio Spectrum Quasars. *Michael R. Corbin.* 375, 503, 119-A11 (1991)

Evidence for a Massive, Dark Gravitational Lensing Object in Q2345+007. *Robert C. Duncan.* 375, L41, 124-B1 (1991)

Lyman-Alpha Depression of the Continuum from High-Redshift Quasars: A New Technique Applied in Search of the Gunn-Peterson Effect. *Edward B. Jenkins & Jeremiah P. Ostriker.* 376, 33, 125-D9 (1991)

Bounds on the Enhancement of Quasar Counts by Lenses. *Israel Kovner.* 376, 70, 125-G8 (1991)

The *Einstein Observatory* Extended Medium-Sensitivity Survey. II. The Optical Identifications. *John T. Stocke, Simon L. Morris, I. M. Gioia, T. Maccacaro, R. Schild, A. Wolter, Thomas A. Fleming, & J. Patrick Henry.* 76, 813, 36-B1 (1991)

Infrared and Visible Photometry of the Gravitational Lens System 2237+030. *Daniel Nadeau, H. K. C. Yee, W. J. Forrest, J. D. Garnett, Z. Ninkov, & J. L. Pipher.* 376, 430, 131-G1 (1991)

QSO Absorption Systems and the Origin of the Ionizing Background at High Redshift. *Piero Madau.* 376, L33, 137-B4 (1991)

Radio Source Orientation and the Angular Diameter–Redshift Relation. *L. I. Onuora.* 377, 36, 138-E1 (1991)

The Origin of the Quasi-stellar Object Absorption Lines. *S. M. Viegas & R. B. Gruenwald.* 377, 39, 138-E5 (1991)

Far-Ultraviolet Spectroscopy of the Quasar UM 675 with the Faint Object Spectrograph on the *Hubble Space Telescope*. *E. A. Beaver, E. M. Burbidge, Ross D. Cohen, Vesa T. Junkkarinen, Ronald W. Lyons, E. I. Rosenblatt, George F. Hartig, Bruce Margon, & A. F. Davidsen.* 377, L1, 143-B1 (1991)

The Ultraviolet Absorption Spectrum of 3C 273. *J. N. Bahcall, B. T. Jannuzi, D. P. Schneider, G. F. Hartig, R. Bohlin, & V. Junkkarinen.* 377, L5, 143-B6 (1991)

First Results from the Goddard High-Resolution Spectrograph: The Galactic Halo and the Lyα Forest at Low Redshift in 3C 273. *Simon L. Morris, Ray J. Weymann, Blair D. Savage, & Ronald L. Gilliland.* 377, L21, 143-C11 (1991)

Optical Variability of Quasars: Statistics and Cosmological Properties. *E. Giallongo, D. Trevese, & F. Vagnetti.* 377, 345, 144-B6 (1991)

Asymptotic Structure of Hydromagnetically Driven Relativistic Winds. *Tzihong Chiueh, Zhi-yun Li, & Mitchell C. Begelman.* 377, 462, 145-D11 (1991)

A $\sim$10 Mpc Void in the Lyα Forest at $z = 3.17$. *Adam Dobrzycki & Jill Bechtold.* 377, L69, 150-B10 (1991)

Discovery of a Lyα Galaxy near a Damped Lyα Absorber at $z = 2.3$. *James D. Lowenthal, Craig J. Hogan, Richard F. Green, Adeline Caulet, Bruce E. Woodgate, Larry Brown, & Craig B. Foltz.* 377, L73, 150-C1 (1991)

The Case Low-Dispersion Northern Sky Survey. XII. A Region in Southern Canes Venatici. *Peter Pesch, N. Sanduleak, & C. B. Stephenson.* 76, 1043, 40-B1 (1991)

Confirmation of Dust in Damped Lyman-Alpha Systems. *Yichuan C. Pei, S. Michael Fall, & Jill Bechtold.* 378, 6, 151-B4 (1991)

Neutrino-heated Stars and Broad-Line Emission from Active Galactic Nuclei. *James MacDonald, Todor Stanev, & Peter L. Biermann.* 378, 30, 151-D4 (1991)

The *EXOSAT* High Galactic Latitude Survey. *P. Giommi, G. Tagliaferri, K. Beuermann, G. Branduardi-Raymont, R. Brissenden, U. Graser, K. O. Mason, J. D. P. Mittaz, P. Murdin, G. Pooley, H.-C. Thomas, & I. Tuohy.* 378, 77, 152-A5 (1991)

Origin of Cosmic X-Ray Background Radiation. *Nobuo Terasawa.* 378, L11, 157-B8 (1991)

Attenuation of Lyman-Alpha Emission by Dust in Damped Lyman-Alpha Systems. *Stéphane Charlot & S. Michael Fall.* 378, 471, 158-C7 (1991)

Clusters of Galaxies Associated with Quasars. II. Galaxy Cluster Dynamics. *E. Ellingson, R. F. Green, & H. K. C. Yee.* 378, 476, 158-D1 (1991)

First- and Second-Epoch VLBI Observations of the Gravitational Lens System 2016+112. *M. B. Heflin, M. V. Gorenstein, C. R. Lawrence, & B. F. Burke.* 378, 519, 158-G9 (1991)

Persistence and Change in the Soft X-Ray Spectrum of the Quasar PG 1211+143. *Martin Elvis, P. Giommi, Belinda J. Wilkes, & Jonathan McDowell.* 378, 537, 159-B1 (1991)

Superclustering at High Redshifts. *Michael J. West.* 379, 19, 163-C7 (1991)

The Carbon Abundance of the Lyman-Alpha Clouds. *Limin Lu.* 379, 99, 164-C1 (1991)

The Visual Wavelength Continua of Quasars: A Reexamination. *W. A. Stein.* 379, 107, 164-C11 (1991)

Massive Star Formation and Superwinds in IRAS 19254−7245 (The "Superantennae"). *Luis Colina, Sebastian Lípari, & F. Macchetto.* 379, 113, 164-D5 (1991)

X-Ray Irradiation of Interstellar Grains in Active Galaxies: Evaporation and Infrared Spectra. *G. Mark Voit.* 379, 122, 164-E1 (1991)

A New Spectroscopic Survey for Damped Lyα Absorption Lines from High-Redshift Galaxies. *Kenneth M. Lanzetta, Arthur M. Wolfe, David A. Turnshek, Limin Lu, Richard G. McMahon, & Cyril Hazard.* 77, 1, 43-B1 (1991)

Atomic Data for Resonance Absorption Lines. I. Wavelengths Longward of the Lyman Limit. *Donald C. Morton.* 77, 119, 45-B1 (1991)

Small-Scale Fluctuations and Angular Correlations of the X-Ray Background in the *HEAO 1* A-2 Energy Band: Constraints on Clustering of X-Ray Sources. *J. M. Martín-Mirones, G. De Zotti, E. A. Boldt, F. E. Marshall, L. Danese, A. Franceschini, & M. Persic.* 379, 507, 171-A4 (1991)

Selection Effects in Optical Surveys for Gravitational Lenses. *Christopher S. Kochanek.* 379, 517, 171-B1 (1991)

Statistics of Gravitational Lenses: The Uncertainties. *Shude Mao.* 380, 9, 176-B9 (1991)

What Are the Gigahertz Peaked-Spectrum Radio Sources? *C. P. O'Dea, S. A. Baum, & C. Stanghellini.* 380, 66, 176-G5 (1991)

The Origin of Quasar Correlations. *Neta A. Bahcall & Arati Chokshi.* 380, L9, 181-B11 (1991)

3C 345: Is the Variability of Quasars Nonlinear? *R. Vio, S. Cristiani, O. Lessi, & L. Salvadori.* 380, 351, 182-F1 (1991)

A Catalog of Absorption in the Spectra of Quasi-stellar Objects. *V. Junkkarinen, A. Hewitt, & G. Burbidge.* 77, 203, 47-B1 (1991)

Probing the Galactic Halo along the 3C 273 Sight Line Using *IUE*. *Geoffrey S. Burks, Donald G. York, J. Chris Blades, Ralph C. Bohlin, & Willem Wamsteker.* 381, 55, 189-F5 (1991)

Depolarization Asymmetry in the Quasar 3C 47. *Ilias Fernini, J. Patrick Leahy, Jack O. Burns, & John P. Basart.* 381, 63, 189-G1 (1991)

The Evolution of the Diffuse Cosmic Ultraviolet Background Constrained by *Hubble Space Telescope* Observations of 3C 273. *Satoru Ikeuchi & Edwin L. Turner.* 381, L1, 194-A9 (1991)

The Systemic Redshift of the Quasar 1331+170. *R. F. Carswell, C. M. Mountain, D. J. Robertson, S. M. Beard, A. R. Glendinning, D. C. Laird, L. C. Lawrence, D. Montgomery, G. Pentland, D. A. Pickup, I. A. Smith, J. A. Bailey, A. Bridger, M. M. Casali, T. R. Geballe, P. Puxley, M. G. Smith, G. S. Wright, S. K. Ramsay, A. C. Baker, B. R. Espey, & M. J. Ward.* 381, L5, 194-B1 (1991)

Spectroscopy of Spatially Extended Material around High-Redshift Radio-loud Quasars. *Timothy M. Heckman, Matthew D. Lehnert, George K. Miley, & Wil van Breugel.* 381, 373, 195-D1 (1991)

Spatially Resolved Spectroscopy of Lyman-Alpha and C IV in the Gravitational Lens 2237+030. *H. K. C. Yee & M. M. De Robertis.* 381, 386, 195-E1 (1991)

Microlensing and the Structure of Active Galactic Nucleus Accretion Disks. *Kevin P. Rauch & Roger D. Blandford.* 381, L39, 199-B1 (1991)

Near-Infrared Observations of the $z \sim 2.3$ *IRAS* Source FSC 10214+4724. *B. T. Soifer, G. Neugebauer, J. R. Graham, K. Matthews, J. M. Mazzarella, C. J. Lonsdale, M. Rowan-Robinson, T. Broadhurst, A. Lawrence, & R. McMahon.* 381, L55, 199-D1 (1991)

A Radio-quiet Galaxy at Redshift $z = 3.409$. *D. A. Turnshek, F. Macchetto, M. V. Bencke, C. Hazard, W. B. Sparks, & R. G. McMahon.* 382, 26, 200-D1 (1991)

Are Quasar Redshifts Cosmological? *Arnon Dar.* 382, L1, 205-A7 (1991)

Outflows Driven by Cosmic-Ray Pressure in Broad Absorption Line QSOs. *Mitchell C. Begelman, Martijn de Kool, & Marek Sikora.* 382, 416, 206-F9 (1991)

Emission-Line and Continuum Properties of 92 Bright QSOs: Luminosity Dependence and Differences between Radio-selected and Optically Selected Samples. *Charles C. Steidel & Wallace L. W. Sargent.* 382, 433, 207-A1 (1991)

Inference of the Extreme-Ultraviolet Continuum Shape of Quasars. *Wei Zheng.* 382, L55, 211-A11 (1991)

IRAS 02366−3101: An Accretion Disk Candidate among Luminous *IRAS* Galaxies. *Luis Colina, Sebastian Lípari, & F. Macchetto.* 382, L63, 211-B7 (1991)

The Confinement and Cosmological Evolution of Extragalactic Radio Source Components. *A. A. Ubachukwu, S. E. Okoye, & L. I. Onuora.* 383, 56, 212-F7 (1991)

New Photoionization Models of Intergalactic Clouds. *Megan Donahue & J. Michael Shull.* 383, 511, 220-F1 (1991)

Observations of Ca II Absorption along the Nearly Parallel Lines of Sight toward 3C 273 and SN 1991T. *David M. Meyer & Katherine C. Roth.* 383, L41, 226-B11 (1991)

Luminous Quasars in Luminous Early-Type Host Galaxies. *K. K. McLeod & G. H. Rieke.* 454, L77, 315-C9 (1995)

RADAR ASTRONOMY

Voyager 2 Test of the Radar Time-Delay Effect. *Timothy P. Krisher, John D. Anderson, & Anthony H. Taylor.* 373, 665, 96-C1 (1991)

Radio Range Measurements of Coronal Electron Densities at 13 and 3.6 Centimeter Wavelengths during the 1988 Solar Conjunction of *Voyager 2*. *T. P. Krisher, J. D. Anderson, D. D. Morabito, S. W. Asmar, S. E. Borutzki, M. L. Delitsky, A. C. Densmore, P. M. Eshe, G. D. Lewis, M. J. Maurer, D. C. Roth, Y. H. Son, T. R. Spilker, D. N. Sweetnam, A. H. Taylor, G. L. Tyler, D. L. Gresh, & P. A. Rosen.* 375, L57, 124-C6 (1991)

RADIAL VELOCITIES

Radial Velocity Distribution and Line Strengths of 33 Carbon Stars in the Galactic Bulge. *Neil D. Tyson & R. Michael Rich.* 367, 547, 20-B6 (1991)

The Halo of the Large Magellanic Cloud: Kinematics of the CH Stars. *A. P. Cowley & F. D. A. Hartwick.* 373, 80, 87-A8 (1991)

Radial Velocities of 26 Northern Milky Way Cepheids. *Mark R. Metzger, John A. R. Caldwell, James K. McCarthy, & Paul L. Schechter.* 76, 803, 35-G3 (1991)

Probing Shock Models of CH^+ Formation. *Isabel Hawkins & Nahide Craig.* 375, 642, 120-F1 (1991)

Dynamics of the Microwave-Decrement Cluster Abell 665. *William R. Oegerle, Michael J. Fitchett, John M. Hill, & Paul Hintzen.* 376, 46, 125-E10 (1991)

Radial Velocity Measurements in the Pleiades. *T. Liu, Kenneth A. Janes, & T. M. Bania.* 377, 141, 139-F7 (1991)

RADIATION MECHANISMS

Comparison of VLBI Radio-Core and X-Ray Flux Densities of Extragalactic Radio Sources. *Steven D. Bloom & Alan P. Marscher.* 366, 16, 1-C5 (1991)

Cosmic X-Ray Background from Hot Gas. *R. D. Rogers & G. B. Field.* 366, 22, 1-C13 (1991)

Ginga Observations of Three X-Ray–luminous Galaxies: NGC 4472, NGC 4636, and NGC 3998. *H. Awaki, K. Koyama, H. Kunieda, S. Takano, Y. Tawara, & T. Ohashi.* 366, 88, 2-B8 (1991)

Far-Infrared Observations and the Structure of Wolf-Rayet Ring Nebulae. *A. P. Marston.* 366, 181, 3-C9 (1991)

Compton Scattering of Gamma Rays in Optically Thick Media. *Magda Zbyszewska & Andrzej A. Zdziarski.* 366, 233, 3-G13 (1991)

On the Nature of Soft Gamma Repeaters. *J. P. Norris, P. Hertz, K. S. Wood, & C. Kouveliotou.* 366, 240, 4-A8 (1991)

Coronal Loop Heating by Wave-Particle Interactions. *Altair S. de Assis & King H. Tsui.* 366, 324, 5-B1 (1991)

Bursts of Gamma Rays from Compton Scattering at Cosmological Distances. *Andrzej A. Zdziarski, Roland Svensson, & Bohdan Paczyński.* 366, 343, 7-B3 (1991)

H II Regions in M82: High-Resolution Millimeter Continuum Observations. *J. E. Carlstrom & Philipp P. Kronberg.* 366, 422, 8-B1 (1991)

A Detailed Optical Study of Kepler's Supernova Remnant. *William P. Blair, Knox S. Long, & Olaf Vancura.* 366, 484, 9-A1 (1991)

Monte Carlo Simulation of Comptonization in Plasma Accreting onto Neutron Stars. *Tomoyuki Hanawa.* 366, 495, 9-B9 (1991)

Nonthermal X-Ray Emission from Winds of OB Supergiants. *Wan Chen & Richard L. White.* 366, 512, 9-D1 (1991)

Universal Particle Acceleration. *J. I. Katz.* 367, 407, 18-E1 (1991)

Cosmic Backgrounds from Primeval Dust. *J. R. Bond, B. J. Carr, & C. J. Hogan.* 367, 420, 18-F1 (1991)

Structure of Thermal Pair Clouds around Gamma-Ray–emitting Black Holes. *Edison P. Liang.* 367, 470, 19-C1 (1991)

Faraday Rotation and Physical Conditions in the Crab Nebula. *M. F. Bietenholz & P. P. Kronberg.* 368, 231, 26-A1 (1991)

Nonthermal Radio Emission from the X-Ray–Bright K5 IV Star 1E 1751+7046. *Stephen L. Skinner.* 368, 272, 26-D11 (1991)

Saturation of the Synchrotron Megamaser. *André R. Crusius-Wätzel.* 368, 390, 30-A1 (1991)

On the Observability of the Gamma-Ray Line Flux from Dark Matter Annihilation. *S. Rudaz & F. W. Stecker.* 368, 406, 30-B5 (1991)

An Infrared Analysis of Puppis A. *Richard G. Arendt, Eli Dwek, & Robert Petre.* 368, 474, 31-A7 (1991)

Formulae for the Cyclotron Luminosity of Magnetized Plasma Slabs. *G. Chanmugam & Steven H. Langer.* 368, 580, 32-C11 (1991)

Infrared Polarimetry of Quasars. *Michael L. Sitko & Yudong Zhu.* 369, 106, 37-C5 (1991)

A Nonthermal Radio Halo Surrounding M82. *E. R. Seaquist & Nils Odegard.* 369, 320, 41-F13 (1991)

Luminosity Enhancement Factor for Thermal Comptonization and the Electron Energy Balance. *C. D. Dermer, E. P. Liang, & E. Canfield.* 369, 410, 42-G5 (1991)

Problems of Ultra–High-Energy Particle Acceleration in Cygnus X-3: A Critical Reappraisal. *Abhas Mitra.* 370, 345, 51-E7 (1991)

Polarization of Astronomical Maser Radiation. *Moshe Elitzur.* 370, 407, 52-C12 (1991)

Synchrotron Radiation with Radiation Reaction. *Robert W. Nelson & Ira Wasserman.* 371, 265, 63-D7 (1991)

Ultraviolet Variability of NGC 5548: Dynamics of the Continuum Production Region and Geometry of the Broad-Line Region. *J. H. Krolik, Keith Horne, T. R. Kallman, M. A. Malkan, R. A. Edelson, & G. A. Kriss.* 371, 541, 68-C6 (1991)

Supernova Remnant 1987A. *Ding Luo & Richard McCray.* 372, 194, 76-D1 (1991)

Magnetic Two-Photon Scattering and Two-Photon Emission: Cross Sections and Redistribution Functions. *S. G. Alexander & P. Mészáros.* 372, 554, 82-E11 (1991)

Cyclotron Harmonics in Accreting Pulsars and Gamma-Ray Bursters: Effect of Two-Photon Processes. *S. G. Alexander & P. Mészáros.* 372, 565, 82-F9 (1991)

Physical Models for the Hypothesized $F(\nu) \propto \nu^{-1}$ Infrared to X-Ray Continuum of Quasi-stellar Objects. *Wayne A. Stein.* 373, 54, 86-F4 (1991)

Relativistic Electron Populations in Cassiopeia A. *M. Anderson, L. Rudnick, P. Leppik, R. Perley, & R. Braun.* 373, 146, 87-G4 (1991)

High-Energy X-Ray Production in a Boundary Layer of an Accreting Neutron Star. *Tomoyuki Hanawa.* 373, 222, 88-F9 (1991)

Relativistic Motion in Gamma-Ray Bursts. *Julian H. Krolik & Edward A. Pier.* 373, 277, 89-D8 (1991)

Direct Radiation from a Strong DC Electric Field. *Donat G. Wentzel.* 373, 285, 89-E3 (1991)

The Bumps in the Spectral Energy Distribution of Active Galactic Nuclei. *Marcella Contini & Sueli M. Viegas.* 373, 405, 93-A9 (1991)

He II Emission in Extragalactic H II Regions. *Donald R. Garnett, Robert C. Kennicutt, Jr., You-Hua Chu, & Evan D. Skillman.* 373, 458, 93-E14 (1991)

Supernova Remnant Evolution in an Interstellar Medium with Evaporating Clouds. *Richard L. White & Knox S. Long.* 373, 543, 94-F7 (1991)

Unsaturated Comptonization of Isotropic Photon Spectra by Relativistic Electrons. *Abraham Loeb, Christopher F. McKee, & Ofer Lahav.* 374, 44, 98-E5 (1991)

Synchrotron Emission from Shocked Relativistic Jets. III. Models for the Centimeter Wave Band Quiescent and Burst Emission from 3C 279 and OT 081. *P. A. Hughes, H. D. Aller, & M. F. Aller.* 374, 57, 98-F5 (1991)

Infrared Fluorescence of H_2 in NGC 6240: A Starburst Origin for the H_2 Luminosity. *Masuo Tanaka, Tetsuo Hasegawa, & Ian Gatley.* 374, 516, 105-E9 (1991)

A Theory of Gamma-Ray Bursts Based on Resonant Compton Scattering. *Peter Vitello & Charles D. Dermer.* 374, 668, 107-D1 (1991)

Cyclotron Resonant Scattering and Absorption. *Alice K. Harding & Joseph K. Daugherty.* 374, 687, 107-E8 (1991)

Bremsstrahlung and Energetic Electrons in Supernovae. *Donald D. Clayton & Lih-Sin The.* 375, 221, 113-F12 (1991)

Interrelation of Soft and Hard X-Ray Emissions during Solar Flares. I. Observations. *R. M. Winglee, A. L. Kiplinger, D. M. Zarro, G. A. Dulk, & J. R. Lemen.* 375, 366, 115-D13 (1991)

Interrelation of Soft and Hard X-Ray Emissions during Solar Flares. II. Simulation Model. *R. M. Winglee, G. A. Dulk, P. L. Bornmann, & J. C. Brown.* 375, 382, 115-F1 (1991)

Variable Soft X-Ray Excesses in Active Galactic Nuclei from Nonthermal Electron-Positron Pair Cascades. *Andrzej A. Zdziarski & Paolo S. Coppi.* 376, 480, 132-D5 (1991)

Gamma-Ray Observations of the Crab Nebula at TeV Energies. *G. Vacanti, M. F. Cawley, E. Colombo, D. J. Fegan, A. M. Hillas, P. W. Kwok, M. J. Lang, R. C. Lamb, D. A. Lewis, D. J. Macomb, K. S. O'Flaherty, P. T. Reynolds, & T. C. Weekes.* 377, 467, 145-E4 (1991)

Isothermal, Compton-heated Coronae above Accretion Disks. *Eve C. Ostriker, Christopher F. McKee, & Richard I. Klein.* 377, 593, 147-B3 (1991)

The O VII Soft X-Ray Spectrum and Its Application to Hot Plasmas in Astrophysics. *A. H. Gabriel, F. Bely-Dubau, P. Faucher, & L. W. Acton.* 378, 438, 156-D1 (1991)

Coherent Radiation from Energetic Electron Streams via Collisionless Bremsstrahlung in Strong Plasma Turbulence. *James C. Weatherall & Gregory Benford.* 378, 543, 159-B8 (1991)

The Visual Wavelength Continua of Quasars: A Reexamination. *W. A. Stein.* 379, 107, 164-C11 (1991)

Very High Energy Gamma-Ray Emission from Accreting X-Ray Pulsars. *K. S. Cheng, K. N. Yu, T. Cheung, & M. M. Lau.* 379, 290, 166-F1 (1991)

Center-to-Limb Variations of Characteristics of Solar Flare Hard X-Ray and Gamma-Ray Emission. *James M. McTiernan & Vahé Petrosian.* 379, 381, 167-F11 (1991)

What Are the Gigahertz Peaked-Spectrum Radio Sources? *C. P. O'Dea, S. A. Baum, & C. Stanghellini.* 380, 66, 176-G5 (1991)

Emission at Cyclotron Harmonics Due to Coalescence of z-Mode Waves. *D. B. Melrose.* 380, 256, 179-C1 (1991)

Radiative Widths and Splitting of Cyclotron Lines in Superstrong Magnetic Fields. *G. G. Pavlov, V. G. Bezchastnov, P. Mészáros, & S. G. Alexander.* 380, 541, 185-A1 (1991)

Einstein Observatory SSS and MPC Observations of the Complex X-Ray Spectra of Seyfert Galaxies. *T. J. Turner, K. A. Weaver, R. F. Mushotzky, S. S. Holt, & G. M. Madejski.* 381, 85, 190-B1 (1991)

Pair-Density Transitions in Accretion Disk Coronae. *Masaaki Kusunose & Shin Mineshige.* 381, 490, 196-G1 (1991)

Milliarcsecond Radio Structure of Weak-lined T Tauri Stars. *R. B. Phillips, C. J. Lonsdale, & E. D. Feigelson.* 382, 261, 203-D9 (1991)

Multifrequency Observations of BL Lacertae in 1988. *N. Kawai, M. Matsuoka, J. N. Bregman, H. D. Aller, M. F. Aller, P. A. Hughes, S. A. Balbus, T. J. Balonek, K. C. Chambers, R. E. S. Clegg, S. D. Clements, R. J. Leacock, A. G. Smith, R. Goodrich, J. S. Miller, M. Hereld, M. G. Hoare, V. A. Hughes, G. K. Miley, G. H. Moriarty-Schieven, K. Matthews, G. Neugebauer, T. Ohashi, P. F. Roche, H. A. Thronson, E. Valtaoja, H. Terasranta, J. R. Webb, B. J. Wills, & D. Wills.* 382, 508, 207-G8 (1991)

The Ultraviolet Spectra of Nearby Radio Galaxies. *William C. Keel & Rogier A. Windhorst.* 383, 135, 213-F3 (1991)

Spectral Signatures of the MeV–PeV Radiation from Accreting Neutron Stars. *B. Rudak & P. Mészáros.* 383, 269, 215-E3 (1991)

Multifrequency Radio Observations of Cygnus A: Spectral Aging in Powerful Radio Galaxies. *C. L. Carilli, R. A. Perley, J. W. Dreher, & J. P. Leahy.* 383, 554, 221-B9 (1991)

EXOSAT Observations of the Seyfert 1 Galaxy NGC 3516. *K. K. Ghosh & S. Soundararajaperumal.* 383, 574, 221-D1 (1991)

Supernova Remnants in Dense Clouds. I. Blast-Wave Dynamics and X-Ray Irradiation. *B. T. Draine & D. T. Woods.* 383, 621, 222-A6 (1991)

High-Resolution Spectroscopy of Partially Ionized Gas around H II Regions. *Joseph S. Onello, J. A. Phillips, & Yervant Terzian.* 383, 693, 222-G6 (1991)

X Marks the Spot: Distribution and Excitation of Unidentified Molecules in the Red Rectangle. *Gary D. Schmidt & Adolf N. Witt.* 383, 698, 222-G12 (1991)

Formation of Dense Charged Bunches in Vacuum Gaps. *F. Curtis Michel.* 383, 808, 224-C6 (1991)

RADIATION MECHANISMS: BREMSSTRAHLUNG

EXOSAT Observations of the Broad-Line Radio Galaxy 3C 382. *K. K. Ghosh & S. Soundararajaperumal.* 389, 179, 62-C1 (1992)

Stellar Wind Collision and X-Ray Generation in Massive Binaries. *V. V. Usov.* 389, 635, 69-C10 (1992)

Hot Pair-dominated Accretion Disks. *Gunnlaugur Björnsson & Roland Svensson.* 394, 500, 135-E9 (1992)

X-Ray Emission from Single Magnetic Early-Type Stars. *V. V. Usov & D. B. Melrose.* 395, 575, 150-B1 (1992)

A Determination of the Mass of Sagittarius A* from Its Radio Spectral and Source Size Measurements. *Fulvio Melia, J. R. Jokipii, & Ajay Narayanan.* 395, L87, 154-A1 (1992)

X-Ray Observations of the Seyfert 1 Galaxy MCG 2-58-22. *K. K. Ghosh & S. Soundararajaperumal.* 398, 501, 190-D1 (1992)

Noise-driven Radiative Shocks. II. Further Implications for the Quasi-periodic Oscillations of the AM Herculis Objects. *Kent S. Wood, James N. Imamura, & Michael T. Wolff.* 398, 593, 191-E1 (1992)

RADIATION MECHANISMS: CYCLOTRON AND SYNCHROTRON

Multifrequency Observations of a Remarkable Solar Radio Burst. *S. M. White, M. R. Kundu, T. S. Bastian, D. E. Gary, G. J. Hurford, T. Kucera, & J. H. Bieging.* 384, 656, 10-C5 (1992)

Relativistic Magnetosonic Shock Waves in Synchrotron Sources: Shock Structure and Nonthermal Acceleration of Positrons. *Masahiro Hoshino, Jonathan Arons, Yves A. Gallant, & A. Bruce Langdon.* 390, 454, 81-A9 (1992)

Steady, Periodic Gamma-Ray Emission from Accreting X-Ray Pulsars. *K. S. Cheng, M. M. Lau, T. Cheung, P. P. Leung, & K. Y. Ding.* 390, 480, 81-C8 (1992)

Relativistic, Perpendicular Shocks in Electron-Positron Plasmas. *Yves A. Gallant, Masahiro Hoshino, A. Bruce Langdon, Jonathan Arons, & Claire E. Max.* 391, 73, 87-A1 (1992)

The Synchro-Compton Limit of the Brightness Temperature of Nonstationary Radio Sources. *V. I. Slysh.* 391, 453, 93-E4 (1992)

A Thermal/Nonthermal Model for Solar Microwave Bursts. *Stephen G. Benka & Gordon D. Holman.* 391, 854, 98-E7 (1992)

Magnetized Stimulated Scattering in Pulsar Winds. *Mark W. Sincell & Julian H. Krolik.* 395, 553, 149-F7 (1992)

A Determination of the Mass of Sagittarius A* from Its Radio Spectral and Source Size Measurements. *Fulvio Melia, J. R. Jokipii, & Ajay Narayanan.* 395, L87, 154-A1 (1992)

X-Ray Spectra of Bright Core-dominant Quasars: NRAO 140 and 4C 34.47. *T. Ohashi, M. Tashiro, K. Makishima, T. Kii, F. Makino, M. J. L. Turner, & O. R. Williams.* 398, 87, 183-B1 (1992)

Importance of Synchrotron Cooling in Self-consistent Spherical Accretion Models. *A. Mason & R. Turolla.* 400, 170, 211-A10 (1992)

Formation of the Dark Bays in the Crab Optical Synchrotron Nebula: Is the Crab Pulsar Wind Bubble Interacting with Its Progenitor's Wind? *Zhi-Yun Li & Mitchell C. Begelman.* 400, 186, 211-C1 (1992)

Radio Observations of the 1989 Transient Event in V404 Cygni (= GS 2023+338). *Xiaohong Han & R. M. Hjellming.* 400, 304, 212-F6 (1992)

Radiative Acceleration by Synchrotron Sources. *G. Ghisellini, G. Bodo, & E. Trussoni.* 401, 87, 222-B5 (1992)

RADIATION MECHANISMS: COMPTON AND INVERSE COMPTON

Compton Scattering in a Converging Fluid Flow: Spherical Near-critical Accretion onto Neutron Stars. *Apostolos Mastichiadis & Nikolaos D. Kylafis.* 384, 136, 2-F7 (1992)

Multiple Resonant Scattering in the Compton Upscatter Model of Gamma-Ray Bursts. *J. J. Brainerd.* 384, 545, 9-A1 (1992)

Resonant Compton Cooling and Annihilation Line Production in Gamma-Ray Bursts. *R. D. Preece & A. K. Harding.* 386, 308, 28-B1 (1992)

Energy Dependence of Normal Branch Quasi-periodic Intensity Oscillations in Low-Mass X-Ray Binaries. *Guy S. Miller & Frederick K. Lamb.* 388, 541, 57-A5 (1992)

An Ionized Accretion Disk in Cygnus X-1. *C. Done, J. S. Mulchaey, R. F. Mushotzky, & K. A. Arnaud.* 395, 275, 143-E5 (1992)

The Expected High-Energy to Ultra–High-Energy Gamma-Ray Spectrum of the Crab Nebula. *O. C. de Jager & A. K. Harding.* 396, 161, 157-B6 (1992)

A Jet Model for the Gamma-Ray–emitting Blazar 3C 279. *L. Maraschi, G. Ghisellini, & A. Celotti.* 397, L5, 173-B4 (1992)

Angle-dependent Green's Functions for Relativistic Compton Reflection. *Xin-Min Hua & Richard E. Lingenfelter.* 397, 591, 178-D1 (1992)

Nonthermal Electron-Positron Pairs and the Break in the Hard X-Ray Spectrum of NGC 4151. *Paolo S. Coppi & Andrzej A. Zdziarski.* 398, L37, 187-F1 (1992)

Morphological Peculiarities of High-Redshift Radio Galaxies: The Role of Relativistic Electrons. *Ruth A. Daly.* 399, 426, 203-C9 (1992)

RADIATION MECHANISMS: GRAVITATIONAL

Post-Newtonian Frequencies for the Pulsations of Rapidly Rotating Neutron Stars. *Curt Cutler & Lee Lindblom.* 385, 630, 21-A1 (1992)

PSR 0655+64: An Astrophysical Laboratory for Testing Relativistic Gravity Theories. *Itzhak Goldman.* 390, 494, 81-D11 (1992)

Detectability of the Gravitational Wave Signal from a Close Neutron Star Binary with Mass Transfer. *Piotr Jaranowski & Andrzej Krolak.* 394, 586, 136-F1 (1992)

Gravitational Wave Burst Produced by Merging of Central Black Holes of Galaxies. *Toshiyuki Fukushige, Toshikazu Ebisuzaki, & Junichiro Makino.* 396, L61, 166-G7 (1992)

Coalescing Binary Neutron Stars. *Christopher S. Kochanek.* 398, 234, 184-F7 (1992)

Tidal Interactions of Inspiraling Compact Binaries. *Lars Bildsten & Curt Cutler.* 400, 175, 211-B1 (1992)

Hydrodynamical Evolution of Coalescing Binary Neutron Stars. *Frederic A. Rasio & Stuart L. Shapiro.* 401, 226, 223-G9 (1992)

Hydrodynamic Instability and Coalescence of Close Binary Systems. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 406, L63, 68-D3 (1993)

Upper Limits for Gravitational Radiation from Supermassive Coalescing Binaries. *J. D. Anderson, J. W. Armstrong, & E. L. Lau.* 408, 287, 86-F4 (1993)

Binary Black Holes in Stationary Orbits and a Test of the Active Galactic Nucleus Paradigm. *Sandip K. Chakrabarti.* 411, 610, 137-C2 (1993)

Gravitational Radiation from Nonaxisymmetric Collisions of Neutron Stars. *Joan M. Centrella & Stephen L. W. McMillan.* 416, 719, 212-C10 (1993)

RADIATION MECHANISMS: MISCELLANEOUS

Self-Organization of Cosmic Radiation Pressure Instability. II. One-dimensional Simulations. *Craig J. Hogan & Jorden Woods.* 384, 111, 2-D4 (1992)

A VLA 3.6 Centimeter Survey of N-Type Carbon Stars. *Donald G. Luttermoser & Alexander Brown.* 384, 634, 10-A7 (1992)

The Origin of the Far-Ultraviolet Continuum in Solar and Stellar Flares. *K. J. H. Phillips, G. E. Bromage, & J. G. Doyle.* 385, 731, 22-B11 (1992)

Resonance Line Radiation Instability in Fully Ionized Plasmas. *William G. Mathews.* 386, 90, 25-C1 (1992)

Flash Photoionization of Gamma-Ray Burst Environments. *David L. Band & Dieter H. Hartmann.* 386, 299, 28-A5 (1992)

High Dynamic Range Multifrequency Radio Observations of a Solar Active Region. *S. M. White, M. R. Kundu, & N. Gopalswamy.* 78, 599, 11-A13 (1992)

π^0-Decay Gamma-Ray Emission from Winds of Massive Stars. *Richard L. White & Wan Chen.* 387, L81, 48-D6 (1992)

Photodissociation in Strong Magnetic Fields and Application to Pulsars. *V. B. Bhatia, Namrata Chopra, & N. Panchapakesan.* 388, 131, 50-F1 (1992)

On the 440 keV Line in the Crab Nebula Pulsar. *W. Bednarek, O. Cremonesi, & A. Treves.* 390, 489, 81-D5 (1992)

The X-Ray Spectra of Galaxies. II. Average Spectral Properties and Emission Mechanisms. *D.-W. Kim, G. Fabbiano, & G. Trinchieri.* 393, 134, 115-F12 (1992)

The Stability of QSO/AGN Broad Emission Line Clouds. *I. S. Krinsky & R. C. Puetter.* 394, 472, 135-C1 (1992)

Microwave Transition Radiation in Solar Flares and in Astrophysics. *G. D. Fleishman & S. W. Kahler.* 394, 688, 138-A11 (1992)

Neutrino Energy Loss in Stellar Interiors. IV. Plasma Neutrino Process for Strongly Degenerate Electrons. *Naoki Itoh, Haruhiko Mutoh, Atsushi Hikita, & Yasuharu Kohyama.* 395, 622, 150-G5 (1992)

Effects of Evolving Rotating Equilibrium Configurations on the Cooling and Spin-down of Pulsars. *K. S. Cheng, W. Y. Chau, J. L. Zhang, & H. F. Chau.* 396, 135, 156-G3 (1992)

The Radio Properties of the Broad-Absorption-Line QSOs. *John T. Stocke, Simon L. Morris, Ray J. Weymann, & Craig B. Foltz.* 396, 487, 163-E5 (1992)

Reaction Rate and Energy-Loss Rate for Photopair Production by Relativistic Nuclei. *Michał J. Chodorowski, Andrzej A. Zdziarski, & Marek Sikora.* 400, 181, 211-B9 (1992)

New Results on the Radio–Far-Infrared Relation for Galaxies. *Rob Price & Nebojsa Duric.* 401, 81, 222-A11 (1992)

Gamma-Ray Line Afterglow from Burst Environments. *H. S. Fencl, R. N. Boyd, & Dieter Hartmann.* 401, 120, 222-E1 (1992)

Radiation-viscous Boundary Layers. *Nahum Arav & Mitchell C. Begelman.* 401, 125, 222-E7 (1992)

Radiation from a Relativistic Magnetized Star. *V. Belinsky & R. Ruffini.* 401, L27, 227-D7 (1992)

High-Energy Particle Acceleration by Explosive Electromagnetic Interaction in an Accretion Disk. *C. A. Haswell, T. Tajima, & J.-I. Sakai.* 401, 495, 228-G5 (1992)

Plasma Emission from Isotropic Langmuir Turbulence: Are Radio Microbursts Structureless? *N. Gopalswamy.* 402, 326, 5-B13 (1993)

Discovery of an Optical Synchrotron Jet in 3C 264. *P. Crane, R. Peletier, D. Baxter, W. B. Sparks, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, P. Greenfield, R. Jedrzejewski, & A. Nota.* 402, L37, 12-D1 (1993)

Radiation from Magnetized Accretion Disks in Active Galactic Nuclei. *G. B. Field & R. D. Rogers.* 403, 94, 15-C1 (1993)

Constraints on Vacuum Decay from the Microwave Background. *J. M. Overduin, P. S. Wesson, & S. Bowyer.* 404, 1, 28-B1 (1993)

The X-Ray Spectral Variability of the BL Lacertae Type Object PKS 2155−304. *S. Sembay, R. S. Warwick, C. Megan Urry, J. Sokoloski, I. M. George, F. Makino, T. Ohashi, & M. Tashiro.* 404, 112, 29-D5 (1993)

Positron Annihilation Radiation from X-Ray Binary Systems. *Mei Wu, Chun-sheng Zhang, & Ti-pei Li.* 404, 276, 31-C11 (1993)

On Compton Reflection in the Sources of the Cosmic X-Ray Background. *Andrzej A. Zdziarski, Piotr T. Życki, Roland Svensson, & Elihu Boldt.* 405, 125, 42-E8 (1993)

Comptonization Effects as a Test for Hot Intercloud Medium in the Broad-Line Region of Active Galactic Nuclei. *A. Ferrara & P. Pietrini.* 405, 130, 42-F1 (1993)

A New X-Ray Spectral Observation of NGC 1068. *F. E. Marshall, H. Netzer, K. A. Arnaud, E. A. Boldt, S. S. Holt, K. M. Jahoda, R. Kelley, R. F. Mushotzky, R. Petre, P. J. Serlemitsos, A. P. Smale, J. H. Swank, A. E. Szymkowiak, & K. A. Weaver.* 405, 168, 43-B7 (1993)

Relativistic Fireballs and Their Impact on External Matter: Models for Cosmological Gamma-Ray Bursts. *P. Mészáros & M. J. Rees.* 405, 278, 44-E9 (1993)

The Connection between Line Emission and Radio Power in Distant Radio Galaxies. *Ruth A. Daly.* 406, 47, 55-E13 (1993)

Detection of Radio Continuum Emission from Procyon. *Stephen A. Drake, Theodore Simon, & Alexander Brown.* 406, 247, 58-B5 (1993)

The Halo Radio Source Coma C and the Origin of Halo Sources. *G. Giovannini, L. Feretti, T. Venturi, K.-T. Kim, & P. P. Kronberg.* 406, 399, 62-F1 (1993)

Relativistic Bulk Motion in Active Galactic Nuclei. *G. Ghisellini, P. Padovani, A. Celotti, & L. Maraschi.* 407, 65, 70-A1 (1993)

Gamma Rays from Globular Clusters. *Marco Tavani.* 407, 135, 70-F11 (1993)

Photoionization of the Hydrogen Atom in Strong Magnetic Fields. *Alexander Yu. Potekhin & George G. Pavlov.* 407, 330, 73-B11 (1993)

Afterglows from Gamma-Ray Bursters: A Way to Estimate the Burster Distance Scale? *H. S. Fencl, R. N. Boyd, & Dieter H. Hartmann.* 407, L21, 75-C6 (1993)

Determining the Shape of Spectra in Extended Radio Sources. *Debora M. Katz-Stone, Lawrence Rudnick, & Martha C. Anderson.* 407, 549, 77-D5 (1993)

Spatial Spectral Index Variations in Galactic Shell Supernova Remnants G39.2−0.3 and G41.1−0.3. *Martha C. Anderson & Lawrence Rudnick.* 408, 514, 91-E9 (1993)

Flaring and Quiescent Radio Emission of UX Arietis: A Time-dependent Model. *F. Chiuderi Drago & E. Franciosini.* 410, 301, 115-G3 (1993)

A Model of Nonthermal Radiation from Accreting X-Ray Pulsars. *P. P. Leung, K. S. Cheng, & P. C. W. Fung.* 410, 309, 115-G12 (1993)

Relativistic Electron-Positron Beams in Gamma-Ray Bursters. *I. A. Smith & Richard I. Epstein.* 410, 315, 116-A6 (1993)

New 325 MHz Observations of H II Galaxies: The Mechanisms That Shape the Unusual Radio Spectra. *Hans-Jörg Deeg, Elias Brinks, Neb Duric, Uli Klein, & Evan Skillman.* 410, 626, 121-D13 (1993)

A Self-consistent Model for the Long-Term Gamma-Ray Spectral Variability of Cygnus X-1. *Fulvio Melia & Ranjeev Misra.* 411, 797, 139-F8 (1993)

High-Energy Spectrum of Cygnus X-1 Revisited. *F. Haardt, C. Done, G. Matt, & A. C. Fabian.* 411, L95, 142-F5 (1993)

A Model of an X-Ray–illuminated Accretion Disk and Corona. *John C. Raymond.* 412, 267, 145-D6 (1993)

The Effect of Helium Breakup on Two-Temperature Accretion Disks including Cooling Processes. *Cesar Meirelles Filho.* 412, 288, 145-F5 (1993)

Strong-Field Cyclotron Scattering. I. Scattering Amplitudes and Natural Line Width. *Carlo Graziani.* 412, 351, 146-D13 (1993)

The Case for an Optically Thin Thermal Big Blue Bump. *Richard Barvainis.* 412, 513, 150-A10 (1993)

The X-Ray Structure and Spectrum of NGC 6251. *M. Birkinshaw & D. M. Worrall.* 412, 568, 150-G4 (1993)

A Model of Solar Coronal Heating by Classical Inverse Bremsstrahlung and Generation of the Solar Wind. *A. H. Øien & G. Alendal.* 412, 827, 154-B6 (1993)

BATSE Observations of Gamma-Ray Burst Spectra. I. Spectral Diversity. *D. Band, J. Matteson, L. Ford, B. Schaefer, D. Palmer, B. Teegarden, T. Cline, M. Briggs, W. Paciesas, G. Pendleton, G. Fishman, C. Kouveliotou, C. Meegan, R. Wilson, & P. Lestrade.* 413, 281, 159-F9 (1993)

Anisotropic Comptonization in Thermal Plasmas: Spectral Distribution in Plane-Parallel Geometry. *Francesco Haardt.* 413, 680, 164-G12 (1993)

A Model of Unpulsed Gamma Rays from the Crab Pulsar. *W. M. Cheung & K. S. Cheng.* 413, 694, 165-B1 (1993)

Interaction of a Jet with a Radiation Pressure–dominated Atmosphere: The Case of SS 433. *Nahum Arav & Mitchell C. Begelman.* 413, 700, 165-B8 (1993)

Radiative Instability in Synchrotron-emitting Plasmas. *P. Rossi, G. Bodo, S. Massaglia, & A. Ferrari.* 414, 112, 171-D7 (1993)

Compton-backscattered Annihilation Radiation from the Galactic Center Region. *D. M. Smith, R. P. Lin, P. Feffer, S. Slassi, K. Hurley, J. Matteson, H. B. Bowman, R. M. Pelling, M. Briggs, D. Gruber, L. E. Peterson, R. E. Lingenfelter, P. von Ballmoos, I. Malet, M. Niel, G. Vedrenne, P. Durouchoux, P. Wallyn, C. Chapuis, C. Cork, D. Landis, P. Luke, N. Madden, D. Malone, & R. Pehl.* 414, 165, 172-B1 (1993)

Shock Excitation of the Emission-Line Filaments in Centaurus A. *Ralph S. Sutherland, Geoffrey V. Bicknell, & Michael A. Dopita.* 414, 510, 177-E7 (1993)

Active Galactic Nuclei Make the Cosmic X-Ray Background. *Andrzej A. Zdziarski, Piotr T. Życki, & Julian H. Krolik.* 414, L81, 185-E8 (1993)

Acceleration Efficiency in Nonthermal Sources and the Soft Gamma Rays from NGC 4151 Observed by OSSE and SIGMA. *Andrzej A. Zdziarski, Alan P. Lightman, & Andrzej Maciolek-Niedźwiecki.* 414, L93, 185-F13 (1993)

A Physical Model of the Infrared-to-Radio Correlation in Galaxies. *G. Helou & M. D. Bicay.* 415, 93, 186-B9 (1993)

Gasdynamics of Relativistically Expanding Gamma-Ray Burst Sources: Kinematics, Energetics, Magnetic Fields, and Efficiency. *P. Mészáros, P. Laguna, & M. J. Rees.* 415, 181, 187-C7 (1993)

The C^0/CO Ratio Problem: A Possible New Precision Test of the Decaying Neutrino Theory. *D. W. Sciama.* 415, L31, 192-A8 (1993)

Polarization Changes of Radiation through Stimulated Raman Scattering. *R. T. Gangadhara & V. Krishan.* 415, 505, 194-B6 (1993)

Electromagnetic Radiation from a Strong DC Electric Field. *Manuel Güdel & Donat G. Wentzel.* 415, 750, 197-B10 (1993)

Polarization of Compact Radio Sources. *C.-I. Björnsson.* 416, 104, 202-C11 (1993)

Radio and Near-Infrared [Fe II] Emission from Active Galaxies. *Duncan A. Forbes & Martin J. Ward.* 416, 150, 202-G12 (1993)

Compton Backscattered Annihilation Radiation and the Mass of Nova Muscae. *Xin-Min Hua & Richard E. Lingenfelter.* 416, L17, 207-C11 (1993)

Model for the High-Energy Emission from Blazars. *Charles D. Dermer & Reinhard Schlickeiser.* 416, 458, 209-A11 (1993)

Synchrotron Radiation: An Inverse Compton Effect. *Richard Lieu & W. Ian Axford.* 416, 700, 212-B1 (1993)

Evaluation of Emission Mechanisms at ω_{p_e} Using *Ulysses* Observations of Type III Bursts. *G. Thejappa, D. Lengyel-Frey, R. G. Stone, & M. L. Goldstein.* 416, 831, 213-G1 (1993)

Implications of the Soft X-Ray versus Hard X-Ray Temporal Relationship in Solar Flares. *Peng Li, A. Gordon Emslie, & John T. Mariska.* 417, 313, 221-D6 (1993)

Radio Dispersion as a Diagnostic of Gamma-Ray Burst Distances. *David M. Palmer.* 417, L25, 223-A9 (1993)

A Far-Ultraviolet Study of the Cygnus Loop Using the *Voyager* Ultraviolet Spectrometers. *Olaf Vancura, William P. Blair, Knox S. Long, John C. Raymond, & J. B. Holberg.* 417, 663, 227-E11 (1993)

Comptonization of the Cosmic Microwave Background by Gas in Superclusters of Galaxies. *Yoel Rephaeli.* 418, 1, 231-B1 (1993)

γ-γ Attenuation and Relativisitic Beaming in Gamma-Ray Bursts. *Matthew G. Baring.* 418, 391, 235-G8 (1993)

Nonthermal Cyclotron Emission from Low-Luminosity Accretion onto Magnetic Neutron Stars. *Robert W. Nelson, E. E. Salpeter, & Ira Wasserman.* 418, 874, 243-D12 (1993)

Gamma-Ray Bursts: Multiwaveband Spectral Predictions for Blast Wave Models. *P. Mészáros & M. J. Rees.* 418, L59, 245-B7 (1993)

Vertical Structure and Emission Spectrum of an Accretion Disk around a Massive Black Hole. *Toshiya Shimura & Fumio Takahara.* 419, 78, 247-B3 (1993)

Formation of a Jet in the Galactic Center Black Hole Candidate 1E 1740.7−2942. *Ranjeev Misra & Fulvio Melia.* 419, L25, 252-D9 (1993)

Confusion Limits to the Measurement of the Sunyaev-Zel'dovich Effects in Clusters of Galaxies at Millimeter Wavelengths. *Marc L. Fischer & Andrew E. Lange.* 419, 433, 253-B8 (1993)

Comptonization of Diffuse Ambient Radiation by a Relativistic Jet: The Source of Gamma Rays from Blazars? *Marek Sikora, Mitchell C. Begelman, & Martin J. Rees.* 421, 153, 18-A1 (1994)

Hot Accretion Disks with Pairs: Effects of Magnetic Field and Thermal Cyclosynchrotron Radiation. *Masaaki Kusunose & Andrzej A. Zdziarski.* 422, 737, 41-A9 (1994)

Electron Acceleration in Short-lived Radio Transients. *Lewis Ball.* 90, 889, 14-G4 (1994)

Standard and Nonstandard Plasma Neutrino Emission Revisited. *Martin Haft, Georg Raffelt, & Achim Weiss.* 425, 222, 83-A8 (1994)

General Relativistic Corrections in the Gamma-Ray Emission from Pulsars. *P. L. Gonthier & A. K. Harding.* 425, 767, 91-C10 (1994)

Multiple X-Ray Emission Components in Low-Power Radio Galaxies. *D. M. Worrall & M. Birkinshaw.* 427, 134, 111-E10 (1994)

The Role of Radiative Acceleration in Outflows from Broad Absorption Line QSOs. I. Comparison with O Star Winds. *Nahum Arav & Zhi-Yun Li.* 427, 700, 121-D7 (1994)

Neutral Cloud Theory of the Jovian Nebula: Anomalous Ionization Effect of Superthermal Electrons. *D. D. Barbosa.* 430, 376, 163-G10 (1994)

Gamma-Ray Emission and Electron Accleration in Solar Flares. *Vahé Petrosian, James M. McTiernan, & Holger Marschhäuser.* 434, 747, 238-B2 (1994)

RADIATION MECHANISMS: NONTHERMAL

Hydrodynamic Instability and Coalescence of Binary Neutron Stars. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 420, 811, 13-A10 (1994)

On the Energetics and Number of Gamma-Ray Pulsars. *Charles D. Dermer & Steven J. Sturner.* 420, L75, 15-D11 (1994)

On the Spectra and Pulse Profiles of Gamma-Ray Pulsars. *Steven J. Sturner & Charles D. Dermer.* 420, L79, 15-E3 (1994)

The Temporal Evolution of the 4–14 Micron Spectrum of V1974 Cygni (Nova Cygni 1992). *R. D. Gehrz, Charles E. Woodward, M. A. Greenhouse, S. Starrfield, D. H. Wooden, F. C. Witteborn, S. A. Sandford, L. J. Allamandola, J. D. Bregman, & M. Klapisch.* 421, 762, 27-F6 (1994)

Physical Processes in Eclipsing Pulsars: Eclipse Mechanisms and Diagnostics. *C. Thompson, R. D. Blandford, Charles R. Evans, & E. S. Phinney.* 422, 304, 33-G10 (1994)

Solar Simple Bursts Observed with High Spectral Resolution in the 18–23 GHz Range. *H. S. Sawant, R. R. Rosa, J. R. Cecatto. & N. Gopalswamy.* 90, 693, 12-D2 (1994)

Efficiency for Electron Acceleration in Solar Energy Release Region as Estimated in the Context of Plasma Mechanism of Radio Emission. *B. N. Levin, V. M. Fridman, & O. A. Sheiner.* 90, 713, 12-E13 (1994)

The Spectral Turnover of the "Filled-Center" Supernova Remnant 3C 58: Implications for When Acceleration Occurs. *D. A. Green.* 90, 817, 13-G12 (1994)

Unpulsed High-Energy Radiation from the Crab Pulsar and Nebula. *W. M. Cheung & K. S. Cheng.* 90, 827, 14-A11 (1994)

Disk-Accreting Magnetic Neutron Stars as High-Energy Particle Accelerators. *Russell J. Hamilton, Frederick K. Lamb, & M. Coleman Miller.* 90, 837, 14-B9 (1994)

Model Images of Radio Halos around Supernova Remnants. *Stephen P. Reynolds.* 90, 845, 14-C6 (1994)

Acceleration Processes for Gamma-Ray Bursts. *Igor G. Mitrofanov.* 90, 869, 14-E7 (1994)

Gamma-Ray Burst Spectral Breaks and Source Beaming. *Matthew G. Baring.* 90, 899, 15-A3 (1994)

Polarized One-Quantum Annihilation in Strong Magnetic Fields as a Process for Particle Deceleration in Neutron Star Atmospheres. *D. Berg, M. Mentzel, & G. Wunner.* 90, 905, 15-A10 (1994)

High-Energy Radiation from Active Galactic Nuclei. *Marek Sikora.* 90, 923, 15-C7 (1994)

On the Location of the Acceleration and Emission Sites in Gamma-Ray Blazars. *Charles D. Dermer & Reinhard Schlickeiser.* 90, 945, 15-E7 (1994)

Relativistic Particle Transport in Hot Accretion Disks. *Peter A. Becker, Menas Kafatos, & Michael Maisack.* 90, 949, 15-E13 (1994)

Do Relativistic Electrons either Gain or Lose Energy, outside of Extragalactic Nuclei? *Lawrence Rudnick, Debora M. Katz-Stone, & Martha C. Anderson.* 90, 955, 15-F6 (1994)

The Sunyaev-Zel'dovich Effect and Cluster Evolution. *James G. Bartlett & Joseph Silk.* 423, 12, 46-C1 (1994)

Reanalysis of X-Ray Emission from M87. I. The Single-Phase Medium. *John C. Tsai.* 423, 143, 47-G9 (1994)

Plasma Mechanisms for Variability in Active Galactic Nuclei. *Vinod Krishan & Paul J. Wiita.* 423, 172, 48-B13 (1994)

Very High Energy Gamma Rays from Active Galactic Nuclei: Cascading on the Cosmic Background Radiation Fields and the Formation of Pair Halos. *F. A. Aharonian, P. S. Coppi, & H. J. Völk.* 423, L5, 53-B7 (1994)

Two-Phase Model of Accretion Disks: Pressure Balance. *Masaaki Kusunose & Shin Mineshige.* 423, 600, 56-A1 (1994)

On the New Theory of Ultra–High-Energy Gamma-Ray Production in Cygnus X-3. *Abhas Mitra.* 425, 782, 91-E1 (1994)

ROSAT Observations of Cataclysmic Variables: A Search for the Boundary Layer Emission. *S. D. Vrtilek, A. Silber, J. C. Raymond, & J. Patterson.* 425, 787, 91-E8 (1994)

Concurrent X-Ray and Optical Observations of Two Dwarf Novae during Eruption. *A. Silber, S. D. Vrtilek, & J. C. Raymond.* 425, 829, 92-B1 (1994)

Equipartition Brightness Temperature and the Inverse Compton Catastrophe. *Anthony C. S. Readhead.* 426, 51, 96-F6 (1994)

Isolating the Physical Parameters of Synchrotron Sources. *Debora M. Katz-Stone & Lawrence Rudnick.* 426, 116, 97-E2 (1994)

An Upper Limit to the Electrodynamic Power Output from a Thin Accretion Disk around a Black Hole. *Seok Jae Park & Ethan T. Vishniac.* 426, 131, 97-F11 (1994)

Modeling and Interpretation of the Optical and *HST* UV Spectrum of SN 1993J. *E. Baron, P. H. Hauschildt, & D. Branch.* 426, 334, 100-C11 (1994)

π^0 Decay around Black Hole Candidates: A Spectral Component above 200 keV. *E. Jourdain & J. P. Roques.* 426, L11, 103-B6 (1994)

Is the High-Energy Emission from Centaurus A Compton-scattered Jet Radiation? *J. G. Skibo, C. D. Dermer, & R. L. Kinzer.* 426, L23, 103-C11 (1994)

The Synchrotron Continuum of the Highly Polarized Quasar PKS 1546+027. *Paul S. Smith, Gary D. Schmidt, Buell T. Jannuzi, & Richard Elston.* 426, 535, 105-A12 (1994)

Structure of Steady State Accretion Shocks with Several Cooling Functions: Closed Integral-Form Solution. *Kinwah Wu, G. Chanmugan, & G. Shaviv.* 426, 664, 106-F5 (1994)

Radiation from Vela-like Pulsars near the Death Line. *V. V. Usov.* 427, 394, 114-F11 (1994)

Neutrino Bursts from Gamma-Ray Bursts. *Bohdan Paczyński & Guohong Xu.* 427, 708, 121-E3 (1994)

Streaming Instability in Relativistically Hot Pulsar Magnetospheres. *James C. Weatherall.* 428, 261, 131-D5 (1994)

X-Ray Clusters from a High-Resolution Hydrodynamic PPM Simulation of the Cold Dark Matter Universe. *Greg L. Bryan, Renyue Cen, Michael L. Norman, Jeremiah P. Ostriker, & James M. Stone.* 428, 405, 135-C1 (1994)

Gamma Rays from Point Galactic Sources. *S. Karakula, G. Kociolek, I. V. Moskalenko, & W. Tkaczyk.* 92, 481, 38-C5 (1994)

The Nonthermal Pair Model for the X-Ray and Gamma-Ray Spectra from Active Galactic Nuclei. *Roland Svensson.* 92, 585, 39-E12 (1994)

Is the X-Ray Source of 3C 273 Really Compact? *Roland Walter.* 92, 619, 40-B3 (1994)

Spectral Characteristics of Gamma-Ray Bursts Observed by the Anticoincidence Shield of the SIGMA Telescope aboard *GRANAT*. *François Pelaez, Laurent Bouchet, Elisabeth Jourdain, Michel Niel, Arnaud Claret, Philippe Laurent, François Lebrun, Jacques Paul, O. Terekhov, R. Sunyaev, A. Kuznetsov, D. Denisenko, M. Gilfanov, E. Churazov, N. Khavenson, & A. Diachkov.* 92, 651, 40-E4 (1994)

X-Ray Clusters in a Cold Dark Matter + Λ Universe: A Direct, Large-Scale, High-Resolution, Hydrodynamic Simulation. *Renyue Cen & Jeremiah P. Ostriker.* 429, 4, 144-C6 (1994)

ROSAT PSPC Observations of Two X-Ray–faint Early-Type Galaxies: NGC 4365 and NGC 4382. *G. Fabbiano, D.-W. Kim, & G. Trinchieri.* 429, 94, 145-C12 (1994)

Polar Cap Models of Gamma-Ray Pulsars: Emission from Single Poles of Nearly Aligned Rotators. *Joseph K. Daugherty & Alice K. Harding.* 429, 325, 148-B1 (1994)

OSSE Search for High-Energy X-Ray Emission from the Coma Cluster. *Yoel Rephaeli, Mel Ulmer, & Duane Gruber.* 429, 554, 152-E10 (1994)

Energetic and Radiative Constraints on Highly Relativistic Jets. *Mitchell C. Begelman, Martin J. Rees, & Marek Sikora.* 429, L57, 157-G13 (1994)

The Optical–Ultraviolet–Gamma-Ray Spectrum of 3C 279. *Hagai Netzer, D. Kazanas, Beverley J. Wills, D. Wills, Mingsheng Han, M. S. Brotherton, J. A. Baldwin, G. J. Ferland, & I. W. A. Browne.* 430, 191, 161-D10 (1994)

Directivity of the Radio Emission from the K1 Dwarf Star AB Doradus. *Jeremy Lim, Stephen M. White, Graham J. Nelson, & Arnold O. Benz.* 430, 332, 163-C9 (1994)

Detection of a Flaring Low-Energy Gamma-Ray Source. *Dipen Bhattacharya & Alan Owens.* 430, 371, 163-G2 (1994)

Relativistic Induced Compton Scattering in Synchrotron Self-absorbed Sources. *Mark W. Sincell & Julian H. Krolik.* 430, 550, 168-E13 (1994)

Observations of 1E 1740.7−2942 with *ROSAT* and the VLA. *William A. Heindl, Thomas A. Prince, & John M. Grunsfeld.* 430, 829, 172-B12 (1994)

Gravitational Radiation from Pairs of Realistic, Nonaccreting Compact Stars. *N. K. Spyrou & K. D. Kokkotas.* 431, 254, 179-C8 (1994)

Compton Scattering in Jets: A Mechanism for $\sim$0.4 and $\leq$ 0.2 MeV Line Production. *J. G. Skibo, C. D. Dermer, & R. Ramaty.* 431, L39, 182-G5 (1994)

Relic Sources and Diffuse Cluster Radio Emission. *Oleg Goldshmidt & Yoel Rephaeli.* 431, 586, 185-G6 (1994)

Pulsed Gamma-Ray Emission from Short-Period Pulsars. *K. S. Cheng & Winnis K. Y. Ding.* 431, 724, 187-E7 (1994)

Energy Deposition and K-Shell Ionization of Supernovae. *Lih-Sin The, William T. Bridgman, & Donald D. Clayton.* 93, 531, 50-C3 (1994)

Inverse-Compton X-Ray Emission from the Superluminal Quasar 3C 345. *S. C. Unwin, A. E. Wehrle, C. M. Urry, D. M. Gilmore, E. J. Barton, B. C. Kjerulf, J. A. Zensus, & C. R. Rabaça.* 432, 103, 194-E1 (1994)

Spectral Properties of Blast-Wave Models of Gamma-Ray Burst Sources. *P. Mészáros, M. J. Rees, & H. Papathanassiou.* 432, 181, 195-D10 (1994)

Hydrodynamics of Binary Coalescence. I. Polytropes with Stiff Equations of State. *Frederic A. Rasio & Stuart L. Shapiro.* 432, 242, 196-C2 (1994)

The X-Ray Spectrum of the Soft Gamma Repeater 1806−20. *E. E. Fenimore, J. G. Laros, & A. Ulmer.* 432, 742, 205-C3 (1994)

Maximum Entropy Distribution and Closure for Bose-Einstein and Fermi-Dirac Radiation Transport. *J. Cernohorsky & S. A. Bludman.* 433, 250, 211-D6 (1994)

Winds from Neutron Stars and Strong Type I X-Ray Bursts. *Luciano Nobili, Roberto Turolla, & Iosif Lapidus.* 433, 276, 211-F11 (1994)

Pump Cycles and Population Flow Networks in Astrophysical Masers: An Application to Class II Methanol Masers with Different Saturation Degrees. *A. M. Sobolev & S. Deguchi.* 433, 719, 220-A6 (1994)

Star-Disk Collisions and the Origin of the Broad Lines in Quasars. *Wojciech H. Zurek, Aneta Siemiginowska, & Stirling A. Colgate.* 434, 46, 225-G2 (1994)

Simultaneous Optical and TeV Gamma-Ray Observations of the Cataclysmic Variable AE Aquarii. *P. J. Meintjes, O. C. de Jager, B. C. Raubenheimer, H. I. Nel, A. R. North, D. A. H. Buckley, & C. Koen.* 434, 292, 229-E1 (1994)

Simultaneous Synchrotron and Adiabatic Effects in Multiply Shocked Jets in Extended Extragalactic Radio Sources. *Ifeanyi E. Ekejiuba, Paul J. Wiita, & Richard A. Frazin.* 434, 503, 234-F1 (1994)

Generalized Comptonization Models and Application to the Recent High-Energy Observations. *Lev Titarchuk.* 434, 570, 235-F7 (1994)

The Nature of the Compact X-Ray Source in the Supernova Remnant G27.4+0.0. *David J. Helfand, R. H. Becker, G. Hawkins, & R. L. White.* 434, 627, 236-D9 (1994)

A Three-dimensional Hydrodynamics Code for Modeling Sources of Gravitational Radiation. *Scott C. Smith, Joan M. Centrella, & Sean P. Clancy.* 94, 789, 62-G3 (1994)

A Thermal/Nonthermal Model for Solar Hard X-Ray Bursts. *Stephen G. Benka & Gordon D. Holman.* 435, 469, 249-G11 (1994)

The X-Ray Spectrum of the Highly Polarized Quasar PKS 1502+106. *I. M. George, K. Nandra, T. J. Turner, & A. Celotti.* 436, L59, 269-C11 (1994)

An Outer Gap Model of High-Energy Emission from Rotation-powered Pulsars. *James Chiang & Roger W. Romani.* 436, 754, 275-G9 (1994)

Models of Pair Annihilation in 1E 1740.7−2942 and the *HEAO 1* A-4 Annihilation Source. *Andrzej Maciołek-Niedźwiecki & Andrzej A. Zdziarski.* 436, 762, 276-A6 (1994)

Multifrequency Observations of Blazars. V. Long-Term Millimeter, Submillimeter, and Infrared Monitoring. *J. A. Stevens, S. J. Litchfield, E. I. Robson, D. H. Hughes, W. K. Gear, H. Teräsranta, E. Valtaoja, & M. Tornikoski.* 437, 91, 284-F1 (1994)

Gamma-Ray Observations of NGC 253 and M82 with OSSE. *D. Bhattacharya, L.-S. The, J. D. Kurfess, D. D. Clayton, N. Gehrels, M. D. Leising, D. A. Grabelsky, W. N. Johnson, G. V. Jung, R. L. Kinzer, W. R. Purcell, M. S. Strickman, & M. P. Ulmer.* 437, 173, 285-E6 (1994)

X-Ray Emission from PSR 0355+54. *Patrick Slane.* 437, 458, 289-D4 (1994)

X-Ray Reflection from Photoionized Media in Active Galactic Nuclei. *Piotr T. Życki, Julian H. Krolik, Andrzej A. Zdziarski, & Timothy R. Kallman.* 437, 597, 294-A6 (1994)

Gravitational Radiation–driven Secular Instability of Rotating Polytropes. *Shin'ichirou Yoshida & Yoshiharu Eriguchi.* 438, 830, 15-F1 (1995)

Gamma-Ray Emission from Cataclysmic Variables. I. The *Compton* EGRET Survey. *Eric M. Schlegel, Paul E. Barrett, O. C. De Jager, G. Chanmugam, S. Hunter, & J. Mattox.* 439, 322, 25-E10 (1995)

Young Oxygen-rich Supernova Remnants. II. An Oxygen-rich Emission Mechanism. *Ralph S. Sutherland & Michael A. Dopita.* 439, 381, 26-D4 (1995)

Angular Scattering of Radio Waves: Implications for Mode Coupling in the Solar Corona. *T. S. Bastian.* 439, 494, 27-G9 (1995)

X-Ray Spectra from Neutron Stars Accreting at Low Rates. *Luca Zampieri, Roberto Turolla, Silvia Zane, & Aldo Treves.* 439, 849, 36-C12 (1995)

Ultraviolet Spectropolarimetry of High-Redshift Quasars with the *Hubble Space Telescope*. *C. D. Impey, Matthew A. Malkan, Wayne Webb, & C. E. Petry.* 440, 80, 42-C8 (1995)

Hot Accretion Disks with Nonthermal Pairs. *Masaaki Kusunose & Shin Mineshige.* 440, 100, 42-E7 (1995)

Rapid Polarization Variability in Intense Sources. *R. T. Gangadhara & V. Krishan.* 440, 116, 42-G1 (1995)

Emission Spectrum Integrated over an Accretion Disk: Comparison with Observations of Active Galactic Nuclei. *Toshiya Shimura & Fumio Takahara.* 440, 610, 51-E9 (1995)

Screening Effects on Nonrelativistic Bremsstrahlung in the Scattering of Electrons by Neutral Atoms. *Young-Dae Jung & Kun-Sang Lee.* 440, 830, 54-E2 (1995)

Photon-Splitting Limits to the Hardness of Emission in Strongly Magnetized Soft Gamma Repeaters. *Matthew G. Baring.* 440, L69, 57-G1 (1995)

Pair Cascades in Extragalactic Jets. I. Gamma Rays. *R. D. Blandford & A. Levinson.* 441, 79, 60-D11 (1995)

Detection of a Cosmic Ray with Measured Energy Well beyond the Expected Spectral Cutoff due to Cosmic Microwave Radiation. *D. J. Bird, S. C. Corbató, H. Y. Dai, J. W. Elbert, K. D. Green, M. A. Huang, D. B. Kieda, S. Ko, C. G. Larsen, E. C. Loh, M. Z. Luo, M. H. Salamon, J. D. Smith, P. Sokolsky, P. Sommers, J. K. K. Tang, & S. B. Thomas.* 441, 144, 61-C12 (1995)

Heating and Ionization of Stellar Chromospheres by Nonthermal Proton Beams: Implications for Impulsive Phase, Redshifted Lyman-α Radiation in Stellar Flares. *Jeffrey W. Brosius, Richard D. Robinson, & Stephen P. Maran.* 441, 385, 64-E13 (1995)

Phase Lags in Cygnus X-1. *M. Coleman Miller.* 441, 770, 72-E6 (1995)

Gravitational Radiation from Rapidly Rotating Nascent Neutron Stars. *Dong Lai & Stuart L. Shapiro.* 442, 259, 80-F11 (1995)

Large Hysteretic Behavior of Stellar Black Hole Candidate X-Ray Binaries. *Sigenori Miyamoto, Shunji Kitamoto, Kiyoshi Hayashida, & Wataru Egoshi.* 442, L13, 84-F1 (1995)

The Origin of the Soft X-Ray Excess in the Seyfert 2 Galaxy NGC 2110. *K. A. Weaver, R. F. Mushotzky, P. J. Serlemitsos, A. S. Wilson, M. Elvis, & U. Briel.* 442, 597, 88-B7 (1995)

The Parsec-Scale Jet in Quasar 3C 345. *J. Anton Zensus, Marshall H. Cohen, & Stephen C. Unwin.* 443, 35, 95-F9 (1995)

Synchrotron Emission from the H_2O Maser Source in W3(OH). *M. J. Reid, A. L. Argon, C. R. Masson, K. M. Menten, & J. M. Moran.* 443, 238, 98-D3 (1995)

A Star Trail Model of the Galactic Center Snake. *Jennifer Nicholls & E. T. Le Strange.* 443, 638, 106-F3 (1995)

Hydrodynamics of Coalescing Binary Neutron Stars: Ellipsoidal Treatment. *Dong Lai & Stuart L. Shapiro.* 443, 705, 107-E12 (1995)

Compton X-Ray Emission from NGC 253. *Oleg Goldshmidt & Yoel Rephaeli.* 444, 113, 114-G8 (1995)

Astro-1 and Ground-based Observations of Markarian 335: Evidence for an Accretion Disk. *W. Zheng, G. A. Kriss, A. F. Davidsen, G. Lee, A. D. Code, K. S. Bjorkman, P. S. Smith, D. Weistrop, M. A. Malkan, F. K. Baganoff, & B. M. Peterson.* 444, 632, 125-A10 (1995)

Does Gravitational Radiation Limit the Angular Velocities of Superfluid Neutron Stars? *Lee Lindblom & Gregory Mendell.* 444, 804, 127-E6 (1995)

Optical Continuum Signature of the Jet in the Spiral Galaxy NGC 4258. *Yvan Dutil, Dominique Beauchamp, & Jean-René Roy.* 444, L85, 130-E8 (1995)

Cosmic Microwave Background Comptonization by Hot Intracluster Gas. *Yoel Rephaeli.* 445, 33, 132-G1 (1995)

Thermal Cyclotron Absorption Coefficients. II. Opacities in the Stokes Formalism. *H. M. Väth & G. Chanmugam.* 98, 295, 26-A9 (1995)

ASCA and *ROSAT* Observations of NRAO 140 and IX Persei. *T. J. Turner, I. M. George, G. M. Madejski, S. Kitamoto, & T. Suzuki.* 445, 660, 144-B11 (1995)

An Unusual High-Energy Transient. *T. E. Strohmayer, E. E. Fenimore, T. Murakami, & A. Yoshida.* 445, 731, 145-C7 (1995)

Magnetic Compton-induced Pair Cascade Model for Gamma-Ray Pulsars. *Steven J. Sturner, Charles D. Dermer, & F. Curtis Michel.* 445, 736, 145-D1 (1995)

Thermal Comptonization in Mildly Relativistic Pair Plasmas. *J. G. Skibo, C. D. Dermer, R. Ramaty, & J. M. McKinley.* 446, 86, 154-D6 (1995)

Electron Energy Losses near Pulsar Polar Caps. *Steven J. Sturner.* 446, 292, 157-C4 (1995)

Ultra–Low-Frequency Gravitational Radiation from Massive Black Hole Binaries. *Mohan Rajagopal & Roger W. Romani.* 446, 543, 163-E11 (1995)

On the Beaming Statistics of Gamma-Ray Sources. *Charles D. Dermer.* 446, L63, 170-E8 (1995)

Optical Structure and Polarization of the Western Hot Spot of Pictor A. *R. C. Thomson, P. Crane, & C. D. Mackay.* 446, L93, 171-B12 (1995)

Quantum-limited Synchrotron Radiation in Inhomogeneous Magnetic Fields. *Richard Lieu & W. Ian Axford.* 447, 302, 176-E8 (1995)

A Model for the Radio Emission from SNR 1987A. *P. Duffy, Lewis Ball, & J. G. Kirk.* 447, 364, 177-D7 (1995)

Relativistic Electron Energy Spectra of Active Galactic Nuclei in the Thin Synchrotron Limit. I. The Method. *Luis Salas, Irene Cruz-González, & Luis Carrasco.* 447, 505, 182-G1 (1995)

Observable Properties of X-Ray–heated Winds in Active Galactic Nuclei: Warm Reflectors and Warm Absorbers. *Julian H. Krolik & Gerard A. Kriss.* 447, 512, 182-G11 (1995)

The Inverse Compton Thermostat in Hot Plasmas near Accreting Black Holes. *Paola Pietrini & Julian H. Krolik.* 447, 526, 183-B1 (1995)

Gamma-Ray Bursts from Minijets. *Nir J. Shaviv & Arnon Dar.* 447, 863, 187-G1 (1995)

Electron Time-of-Flight Differences in Solar Flares. *Markus J. Aschwanden, Richard A. Schwartz, & Daniel M. Alt.* 447, 923, 188-E12 (1995)

Neutrino Pair Synchrotron Radiation from Relativistic Electrons in Strong Magnetic Fields. *A. Vidaurre, A. Pérez, H. Sivak, J. Bernabéu, & J. Mª Ibáñez.* 448, 264, 195-G6 (1995)

The Synchrotron Self-Compton Model for X-Ray and γ-Ray Emission from Pulsars. *K. S. Cheng & D. M. Wei.* 448, 281, 196-B1 (1995)

Parsec-Scale Synchrotron Emission from Hydrodynamic Relativistic Jets in Active Galactic Nuclei. *J. L. Gómez, J. M^{a}. Martí, A. P. Marscher, J. Mª Ibáñez, & J. M. Marcaide.* 449, L19, 216-C3 (1995)

Spectral Variability of the X-Ray–bright BL Lacertae Object PKS 2005−489. *Rita M. Sambruna, C. Megan Urry, Gabriele Ghisellini, & Laura Maraschi.* 449, 567, 220-E12 (1995)

Hot Accretion Disks with Electron-Positron Pair Winds. *Ranjeev Misra & Fulvio Melia.* 449, 813, 224-A1 (1995)

Discovery of Inverse-Compton X-Rays in Radio Lobes. *E. D. Feigelson, S. A. Laurent-Muehleisen, R. I. Kollgaard, & E. B. Fomalont.* 449, L149, 227-E6 (1995)

Compton Heating and Superthermal Electrons in Gamma-loud Active Galactic Nuclei. *Andrei M. Beloborodov & Andrei F. Illarionov.* 450, 64, 229-A3 (1995)

Millisecond Pulsars: Detectable Sources of Continuous Gravitational Waves? *Kimberly C. B. New, G. Chanmugam, Warren W. Johnson, & Joel E. Tohline.* 450, 757, 241-B9 (1995)

Toward Understanding the Fanaroff-Riley Dichotomy in Radio Source Morphology and Power. *Stefi A. Baum, Esther L. Zirbel, & Christopher P. O'Dea.* 451, 88, 247-C13 (1995)

Multifrequency Spectra of *EXOSAT* Blazars. *K. K. Ghosh & S. Soundararajaperumal.* 100, 37, 46-D12 (1995)

Background X-Ray Emission from Hot Gas in CDM and CDM+Λ Universes: Spectral Signatures. *Renyue Cen, Hyesung Kang, Jeremiah P. Ostriker, & Dongsu Ryu.* 451, 436, 253-C11 (1995)

Detection of a Faint Optical Jet in 3C 120. *Jens Hjorth, Marianne Vestergaard, Anton N. Sørensen, & Frank Grundahl.* 452, L17, 269-E3 (1995)

Advection-dominated Accretion: Underfed Black Holes and Neutron Stars. *Ramesh Narayan & Insu Yi.* 452, 710, 274-D13 (1995)

Soft X-Ray Emission from Selected Isolated Pulsars. *Patrick Slane & Nicole Lloyd.* 452, L115, 280-A12 (1995)

Giant Pulses from the Crab Pulsar: A Joint Radio and Gamma-Ray Study. *S. C. Lundgren, J. M. Cordes, M. Ulmer, S. M. Matz, S. Lomatch, R. S. Foster, & T. Hankins.* 453, 433, 287-A13 (1995)

Disk-Corona Model of Active Galactic Nuclei with Nonthermal Pairs. *Sachiko Tsuruta & Michael Kellen.* 453, L9, 289-C7 (1995)

Detection of Inverse-Compton X-Rays from Lobes of the Radio Galaxy Fornax A. *H. Kaneda, M. Tashiro, Y. Ikebe, Y. Ishisaki, H. Kubo, K. Makishima, T. Ohashi, Y. Saito, H. Tabara, & T. Takahashi.* 453, L13, 289-D1 (1995)

Empirical Constraints on Source Properties and Host Galaxies of Cosmological Gamma-Ray Bursts. *Eric Woods & Abraham Loeb.* 453, 583, 292-A1 (1995)

The Nonthermal Radio, X-Ray, and TeV Gamma-Ray Spectra of MSH 15−52. *I. du Plessis, O. C. de Jager, S. Buchner, H. I. Nel, A. R. North, B. C. Raubenheimer, & D. J. van der Walt.* 453, 746, 294-B6 (1995)

A Signature of Relativistic Electron-Positron Beams in BL Lacertae Objects. *G. Z. Xie, B. F. Liu, & J. C. Wang.* 454, 50, 299-G9 (1995)

Modeling the Multiwavelength Accretion Disk Spectrum of X-Ray–selected Active Galactic Nuclei. *R. J. Thompson, Jr.* 454, 660, 310-F13 (1995)

The Gamma-Ray Galactic Diffuse Radiation and Cerenkov Telescopes. *P. Chardonnet, P. Salati, J. Silk, I. Grenier, & G. Smoot.* 454, 774, 312-D5 (1995)

High-Energy Gamma Rays from PKS 1406−076 and the Observation of Correlated Gamma-Ray and Optical Emission. *Stefan J. Wagner, John R. Mattox, Ulrich Hopp, H. Bock, J. Heidt, D. L. Bertsch, B. L. Dingus, C. E. Fichtel, R. C. Hartman, S. D. Hunter, G. Kanbach, D. A. Kniffen, Y. C. Lin, H. A. Mayer-Hasselwander, P. F. Michelson, C. von Montigny, P. L. Nolan, P. Sreekumar, & D. J. Thompson.* 454, L97, 315-F4 (1995)

Photon Splitting in Strongly Magnetized Cosmic Objects—Revisited. *Günter Wunner, Robert Sang, & Dagmar Berg.* 455, L51, 325-B8 (1995)

Einstein's Radiation Formula and Modifications to the Einstein Equation. *C. Y. Lo.* 455, 421, 327-F4 (1995)

Spectral Properties of Accretion Disks around Galactic and Extragalactic Black Holes. *Sandip Chakrabarti & Lev G. Titarchuk.* 455, 623, 330-E1 (1995)

Accuracy, Uncertainties, and Delay Distribution of Electron Time-of-Flight Measurements in Solar Flares. *Markus J. Aschwanden & Richard A. Schwartz.* 455, 699, 331-E6 (1995)

RADIATION MECHANISMS: THERMAL

An Infrared Study of Three Wolf-Rayet Ring Nebulae. *J. S. Mathis, J. P. Cassinelli, K. A. van der Hucht, T. Prusti, P. R. Wesselius, & P. M. Williams.* 384, 197, 3-D5 (1992)

Radiation Dynamics in X-Ray Binaries. I. Type I Bursts. *Mark A. Walker.* 385, 642, 21-B1 (1992)

Infrared Observations and Thermal Models of the β Pictoris Disk. *D. E. Backman, F. C. Gillett, & F. C. Witteborn.* 385, 670, 21-D8 (1992)

Mass Loss from OH/IR Stars: Models for the Infrared Emission of Circumstellar Dust Shells. *K. Justtanont & A. G. G. M. Tielens.* 389, 400, 64-G10 (1992)

Thermonuclear Flash Model for Long X-Ray Tails from Aquila X-1. *Ikko Fushiki, Ronald E. Taam, S. E. Woosley, & D. Q. Lamb.* 390, 634, 83-B9 (1992)

Impulsive Phase Fe Kα Emission in a Flare of 1989 March. *D. M. Zarro, B. R. Dennis, & G. L. Slater.* 391, 865, 98-F6 (1992)

Geometrically Thin, Hot Accretion Disks: Topology of the Thermal Equilibrium Curves. *Masaaki Kusunose & Shin Mineshige.* 392, 653, 110-D1 (1992)

Submillimeter Observations of Radio-quiet Quasars and a Luminous Seyfert 1 Galaxy Including the First Detections. *Richard Barvainis, Robert Antonucci, & Paul Coleman.* 399, L19, 200-B1 (1992)

Morphological Peculiarities of High-Redshift Radio Galaxies: The Role of Relativistic Electrons. *Ruth A. Daly.* 399, 426, 203-C9 (1992)

An Infrared Study of Hot Dust in Quasars Using Prism Spectrophotometry. *Yukiyasu Kobayashi, Shuji Sato, Takuya Yamashita, Hisashi Shiba, & Hideki Takami.* 404, 94, 29-B11 (1993)

Dust and Ionized Gas in NGC 3607. *K. P. Singh, T. P. Prabhu, A. K. Kembhavi, & P. N. Bhat.* 424, 638, 72-G2 (1994)

Molecular Hydrogen Emission in Galaxies: Determination of Excitation Mechanism. *Hideaki Mouri.* 427, 777, 122-C12 (1994)

ROSAT PSPC Observations of Two X-Ray–faint Early-Type Galaxies: NGC 4365 and NGC 4382. *G. Fabbiano, D.-W. Kim, & G. Trinchieri.* 429, 94, 145-C12 (1994)

The Very Soft X-Ray Emission of X-Ray–faint Early-Type Galaxies. *S. Pellegrini & G. Fabbiano.* 429, 105, 145-D11 (1994)

On Thermal Comptonization in $e^{\pm}$ Pair Plasmas. *Gabriele Ghisellini & Francesco Haardt.* 429, L53, 157-G7 (1994)

Neutrino Energy Loss in Stellar Interiors. VI. Axial Vector Contribution to the Plasma Neutrino Energy-Loss Rate for Strongly Degenerate Electrons. *Yasuharu Kohyama, Naoki Itoh, Akihiko Obama, & Hiroshi Hayashi.* 431, 761, 188-A11 (1994)

A Model for the X-Ray and Ultraviolet Emission from Seyfert Galaxies and Galactic Black Holes. *Francesco Haardt, Laura Maraschi, & Gabriele Ghisellini.* 432, L95, 206-F7 (1994)

Hard X-Rays from NGC 4151: A Thermal Origin? *Lev Titarchuk & Apostolos Mastichiadis.* 433, L33, 215-A7 (1994)

A Thermal/Nonthermal Model for Solar Hard X-Ray Bursts. *Stephen G. Benka & Gordon D. Holman.* 435, 469, 249-G11 (1994)

Photon-dominated Regions around Cool Stars: The Effects of the Color Temperature of the Radiation Field. *Marco Spaans, A. G. G. M. Tielens, Ewine F. van Dishoeck, & E. L. O. Bakes.* 437, 270, 286-G7 (1994)

Nonequilibria in Thermal Emission from Supernova Remnants. *Kuniaki Masai.* 437, 770, 296-C2 (1994)

Super-Eddington Radiation Transfer in Soft Gamma Repeaters. *Andrew Ulmer.* 437, L111, 299-C1 (1994)

A Multizone Model for Composite Disk-Corona Structure and Spectral Formation in Active Galactic Nuclei. *Toshiya Shimura, Shin Mineshige, & Fumio Takahara.* 439, 74, 22-B12 (1995)

Far-Infrared Thermal Emission from the Inner Cooling Flow Region of NGC 1275. *D. F. Lester, E. C. Zink, G. W. Doppmann, N. I. Gaffney, P. M. Harvey, B. J. Smith, & M. Malkan.* 439, 185, 23-G1 (1995)

Large Hysteretic Behavior of Stellar Black Hole Candidate X-Ray Binaries. *Sigenori Miyamoto, Shunji Kitamoto, Kiyoshi Hayashida, & Wataru Egoshi.* 442, L13, 84-F1 (1995)

Comptonization Models and Spectroscopy of X-Ray and Gamma-Ray Sources: A Combined Study by Monte Carlo and Analytical Methods. *Xin-Min Hua & Lev Titarchuk.* 449, 188, 212-F13 (1995)

On the Geometry of the X-Ray–Emitting Region in Seyfert Galaxies. *Boris E. Stern, Juri Poutanen, Roland Svensson, Marek Sikora, & Mitchell C. Begelman.* 449, L13, 216-B9 (1995)

Power-Law Spectra as a Result of Comptonization of the Soft Radiation in a Plasma Cloud. *Lev Titarchuk & Yurij Lyubarskij.* 450, 876, 243-A10 (1995)

A Comparison of Thermal Comptonization Models. *Lev Titarchuk & Xin-Min Hua.* 452, 226, 265-B9 (1995)

Soft X-Ray Emission from Selected Isolated Pulsars. *Patrick Slane & Nicole Lloyd.* 452, L115, 280-A12 (1995)

Testing Models for the Quasar Big Blue Bump via Color-Color Diagrams. *Aneta Siemiginowska, Olga Kuhn, Martin Elvis, Fabrizio Fiore, Jonathan McDowell, & Belinda J. Wilkes.* 454, 77, 300-C7 (1995)

X-Ray Spectra of Z Sources. *Dimitrios Psaltis, Frederick K. Lamb, & Guy S. Miller.* 454, L137, 316-D9 (1995)

High-Energy Spectral Complexity from Thermal Gradients in Black Hole Atmospheres. *J. G. Skibo & C. D. Dermer.* 455, L25, 324-F1 (1995)

RADIATIVE TRANSFER

Radiative Transfer in Astronomical Masers. III. Filamentary Masers. *Moshe Elitzur, Christopher F. McKee, & David J. Hollenbach.* 367, 333, 16-B10 (1991)

Extinction and Polarization of Transmitted Light by Partially Aligned Nonspherical Grains. *Mikhail I. Mishchenko.* 367, 561, 20-C8 (1991)

Accretion Powered Pulsars: Continuum Spectra and Light Curves of Settling Accretion Mounds. *David J. Burnard, Jonathan Arons, & Richard I. Klein.* 367, 575, 20-D10 (1991)

The Use of Iteration Factors for Temperature Correction in a Stellar Atmosphere When Convective Transport Is Present. *L. Crivellari & E. Simonneau.* 367, 612, 20-G10 (1991)

Instabilities in Line-driven Stellar Winds. V. Effect of an Optically Thick Continuum. *S. P. Owocki & G. B. Rybicki.* 368, 261, 26-C11 (1991)

Axisymmetric Models of Circumstellar Dust Shells. *Alan J. Collison & John D. Fix.* 368, 545, 31-G7 (1991)

The Appearance of Highly Relativistic, Spherically Symmetric Stellar Winds. *Marek A. Abramowicz, Igor D. Novikov, & Bohdan Paczyński.* 369, 175, 38-B5 (1991)

Dynamic Effects on Cyclotron Scattering in Pulsar Accretion Columns. *J. J. Brainerd & P. Mészáros.* 369, 179, 38-B11 (1991)

Scattering of Acoustic Waves from a Magnetic Flux Tube Embedded in a Radiating Fluid. *T. J. Bogdan & M. Knölker.* 369, 219, 38-F1 (1991)

Thomson Scattering in a Magnetic Field. II. Arbitrary Field Orientation. *Barbara A. Whitney.* 369, 451, 43-C10 (1991)

Opacity Effects on the Radiative Losses of Coronal Loops. *N. P. M. Kuin & A. I. Poland.* 370, 763, 57-G11 (1991)

The Escape of Lyman-Alpha Radiation from a Multiphase Interstellar Medium. *David A. Neufeld.* 370, L85, 59-D13 (1991)

Emission from Dust in Visual Reflection Nebulae at Infrared and Submillimeter Wavelengths. *Sean C. Casey.* 371, 183, 62-D1 (1991)

Comptonization of Gamma Rays by Cold Electrons. *Yueming Xu, Randy R. Ross, & Richard McCray.* 371, 280, 63-E11 (1991)

Aberration and Advection Effects in Expanding Spherically Symmetric Shells. *A. Peraiah.* 371, 673, 70-A1 (1991)

Thomson Scattering in a Magnetic Field. I. Field along z. *Barbara A. Whitney.* 75, 1293, 22-F1 (1991)

Stability, Structure, and Evolution of Cool Loops. *P. S. Cally & T. D. Robb.* 372, 329, 78-A11 (1991)

Cyclotron Harmonics in Accreting Pulsars and Gamma-Ray Bursters: Effect of Two-Photon Processes. *S. G. Alexander & P. Mészáros.* 372, 565, 82-F9 (1991)

Non–LTE Analysis of the Ofpe/WN9 Star HDE 269227 (R84). *Werner Schmutz, Claus Leitherer, Ivan Hubeny, Manfred Vogel, Wolf-Rainer Hamann, & Ulf Wessolowski.* 372, 664, 84-A1 (1991)

Heating Solar Coronal Holes. *E. N. Parker.* 372, 719, 84-E11 (1991)

Size and Density Distribution of Very Small Dust Grains in the Barnard 5 Cloud. *Dariusz C. Lis & Chun Ming Leung.* 372, L107, 85-F9 (1991)

Collisional Pumping of H_2O Masers in Star-forming Regions. *Nikolaos D. Kylafis & Colin A. Norman.* 373, 525, 94-D13 (1991)

Ionization by High-Energy Particles and the Electron Scattering Opacity in Supernovae. *Douglas A. Swartz.* 373, 604, 95-D11 (1991)

Bowen Fluorescence in AM Herculis Stars. *Jonathan Schachter, Alexei V. Filippenko, Steven M. Kahn, & Frits B. S. Paerels.* 373, 633, 95-G4 (1991)

Thermal and Mechanical Damping of Solar *p*-Modes. *Peter Goldreich & Pawan Kumar.* 374, 366, 102-F1 (1991)

Flux-limited Diffusion in a Scattering Medium. *Fulvio Melia & Gregory J. Zylstra.* 374, 732, 108-B9 (1991)

Stellar Occultation of Polarized Light from Circumstellar Electrons. II. Flat Envelopes Viewed at Arbitrary Inclination. *Geoffrey K. Fox & John C. Brown.* 375, 300, 114-F1 (1991)

Spectroscopic Study of Direct and Dust-scattered Line Emission in the HH 1–HH 2 System. *J. Solf & K.-H. Böhm.* 375, 618, 120-D3 (1991)

Model Atmospheres and X-Ray Spectra of Bursting Neutron Stars. *Jerzy Madej.* 376, 161, 127-A4 (1991)

The Phase Mixing of Alfvén Waves, Coordinated Modes, and Coronal Heating. *E. N. Parker.* 376, 355, 129-C11 (1991)

The Effects of Thermal Radiation on Some General Relativistic Stellar Models. *J. M. Aguirregabiria, J. Ibáñez, A. Di Prisco, & L. Herrera.* 376, 662, 134-E8 (1991)

Energy Deposition by X-Ray Photoelectrons into Interstellar Molecular Clouds. *G. Mark Voit.* 377, 158, 140-A1 (1991)

Low-Density Photodissociation Regions. *David J. Hollenbach, Takamasa Takahashi, & A. G. G. M. Tielens.* 377, 192, 140-C11 (1991)

Neutral Oxygen in Planetary Nebulae: Probing Radiative Transfer and Nebular Structure. *Michael G. Richer, Marshall L. McCall, & Peter G. Martin.* 377, 210, 140-E1 (1991)

Continuum Opacity Produced by Spectral Lines in Supernovae and Similar Expansions. *Robert V. Wagoner, Christopher A. Perez, & Mary Vasu.* 377, 639, 147-E12 (1991)

Energy Balance in the Solar Transition Region. II. Effects of Pressure and Energy Input on Hydrostatic Models. *J. M. Fontenla, E. H. Avrett, & R. Loeser.* 377, 712, 148-E1 (1991)

On Spectra of X-Ray Bursters in the Expansion Phase. *I. I. Lapidus.* 377, L93, 150-E1 (1991)

Radiative-hydrodynamical Simulations of Accretion Disk Coronae. *Fulvio Melia, Gregory J. Zylstra, & Bruce Fryxell.* 377, L101, 150-E11 (1991)

Constraints on the Physical Properties of Optical Bullets in SS 433. *John C. Brown, Joseph P. Cassinelli, & George W. Collins II.* 378, 307, 154-G1 (1991)

Attenuation of Lyman-Alpha Emission by Dust in Damped Lyman-Alpha Systems. *Stéphane Charlot & S. Michael Fall.* 378, 471, 158-C7 (1991)

Radiation Transport in Dust in Disk Geometry. I. Application to Externally Heated Interstellar Clouds. *George F. Spagna, Jr., Chun Ming Leung, & Michael P. Egan.* 379, 232, 166-A5 (1991)

Echo Images of Broad-Line Regions in Active Galactic Nuclei. *William F. Welsh & Keith Horne.* 379, 586, 172-A1 (1991)

Stellar Occultation of Polarized Light from Circumstellar Electrons. III. General Axisymmetric Envelopes. *Geoffrey K. Fox.* 379, 663, 173-A1 (1991)

Models for Light Scattering by Dust around Herbig-Haro Objects. *Alberto Noriega-Crespo, Nuria Calvet, & Karl-Heinz Böhm.* 379, 676, 173-B1 (1991)

Effects of Aberration and Advection on Line Formation. *A. Peraiah.* 380, 212, 178-F1 (1991)

Irradiation of Accretion Disks around Young Objects. I. Near-Infrared CO Bands. *Nuria Calvet, Alberto Patiño, Gladis Magris C., & Paola D'Alessio.* 380, 617, 185-G8 (1991)

Inferring Chromospheric Flare Heating from Hydrogen-Line Wings. *K. G. Gayley & R. C. Canfield.* 380, 660, 186-D1 (1991)

Nonequilibrium Ionization Effects in Asymmetrically Heated Loops. *D. Spadaro, S. K. Antiochos, & J. T. Mariska.* 382, 338, 204-D1 (1991)

The Temperature of the Circumstellar Envelope of Alpha Orionis. *Bernadette Rodgers & Alfred E. Glassgold.* 382, 606, 209-B1 (1991)

Discrete Ordinate Solution of the Radiative Transfer Equation in the "Polarization Normal Wave Representation." *A. Kylling.* 383, 243, 215-C1 (1991)

Spherical Accretion onto Black Holes: A Complete Analysis of Stationary Solutions. *Luciano Nobili, Roberto Turolla, & Luca Zampieri.* 383, 250, 215-C9 (1991)

The Vertical Structure of T Tauri Accretion Disks. I. Heating by the Central Star. *Fabien Malbet & Claude Bertout.* 383, 814, 224-D1 (1991)

A Model for the Infrared Emission from an OB Star Cluster Environment. *D. Leisawitz.* 77, 451, 51-B1 (1991)

Compton Scattering in a Converging Fluid Flow: Spherical Near-critical Accretion onto Neutron Stars. *Apostolos Mastichiadis & Nikolaos D. Kylafis.* 384, 136, 2-F7 (1992)

Multiple Resonant Scattering in the Compton Upscatter Model of Gamma-Ray Bursts. *J. J. Brainerd.* 384, 545, 9-A1 (1992)

The Effects of Radiation Drag on Radial, Relativistic Hydromagnetic Winds. *Zhi-yun Li, Mitchell C. Begelman, & Tzihong Chiueh.* 384, 567, 9-C1 (1992)

Dynamics of the Envelopes of Be Stars in the Equatorial Plane. *Haiqi Chen, J. M. Marlborough, & L. B. F. M. Waters.* 384, 605, 9-F1 (1992)

Fe II Emission Lines. II. Excitation Mechanisms in Cool Stars. *P. G. Judge, C. Jordan, & U. Feldman.* 384, 613, 9-F10 (1992)

Non–LTE, Line-blanketed Model Atmospheres for Late O- and Early B-Type Stars. *James A. Grigsby, Nancy D. Morrison, & Lawrence S. Anderson.* 78, 205, 4-D9 (1992)

Covariant Flux-limited Diffusion Theories. *A. M. Anile & V. Romano.* 386, 325, 28-C5 (1992)

Partially Coherent Scattering in Stellar Chromospheres. I. Effects on Resonance Line Thermalization. *Kenneth G. Gayley.* 78, 549, 10-D7 (1992)

X-Ray–heated Models of Stellar Flare Atmospheres: Theory and Comparison with Observations. *Suzanne L. Hawley & George H. Fisher.* 78, 565, 10-F1 (1992)

The Sobolev Approximation for Line Formation with Partial Frequency Redistribution. *D. G. Hummer & G. B. Rybicki.* 387, 248, 40-A10 (1992)

A New Scheme for Multidimensional Line Transfer. II. ETLA Method in One Dimension with Application to Iron Kα Lines. *John I. Castor, Pieter G. Dykema, & Richard I. Klein.* 387, 561, 45-F1 (1992)

Radiative Instabilities and 1000 Second Fluctuations in Astrophysical Masers. *Gerardo A. Scappaticci & William D. Watson.* 387, L73, 48-C10 (1992)

Ionization and Excitation in Cool Giant Stars. I. Hydrogen and Helium. *Donald G. Luttermoser & Hollis R. Johnson.* 388, 579, 57-D7 (1992)

X-Ray Scattering and Fluorescence in the Wind of a Massive X-Ray Binary. *W. Lewis, S. Rappaport, A. Levine, & F. Nagase.* 389, 665, 69-F3 (1992)

1612 MHz OH Maser Emission from Axisymmetric Circumstellar Envelopes: Miras. *Alan J. Collison & John D. Fix.* 390, 191, 76-C13 (1992)

Partially Coherent Scattering in Stellar Chromospheres. II. The First-Order Escape Probability Method. *K. G. Gayley.* 390, 573, 82-D8 (1992)

Partially Coherent Scattering in Stellar Chromospheres. III. A Second-Order Escape Probability Method. *K. G. Gayley.* 390, 583, 82-E5 (1992)

Incorporation of Density Fluctuations into Photoionization Calculations. *Robert E. Williams.* 392, 99, 102-C1 (1992)

A Modified Eddington-Barbier Relation in Highly Coherent Resonance-Line Wings. *K. G. Gayley.* 392, 353, 105-C9 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. I. The Hydrodynamic Algorithms and Tests. *James M. Stone & Michael L. Norman.* 80, 753, 33-G3 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. II. The Magnetohydrodynamic Algorithms and Tests. *James M. Stone & Michael L. Norman.* 80, 791, 34-C5 (1992)

ZEUS-2D: A Radiation Magnetohydrodynamics Code for Astrophysical Flows in Two Space Dimensions. III. The Radiation Hydrodynamic Algorithms and Tests. *James M. Stone, Dimitri Mihalas, & Michael L. Norman.* 80, 819, 34-E11 (1992)

Problems with the Standard Theory of Three-dimensional Masers. *David A. Neufeld.* 393, L37, 120-F1 (1992)

Dust and the Transfer of Stellar Radiation within Galaxies. *Adolf N. Witt, Harley A. Thronson, Jr., & John M. Capuano, Jr.* 393, 611, 123-D7 (1992)

Two-Stream, Second-Order, Probabilistic Radiative Transfer. *I. S. Krinsky & R. C. Puetter.* 393, 716, 124-F10 (1992)

In Search of Evidence for Protostellar Collapse: A Systematic Study of Line Formation in Low-Mass Dense Cores. *Shudong Zhou.* 394, 204, 130-E4 (1992)

A Flux-limited Model of Particle Diffusion and Viscosity. *Ramesh Narayan.* 394, 261, 131-C3 (1992)

The Stability of QSO/AGN Broad Emission Line Clouds. *I. S. Krinsky & R. C. Puetter.* 394, 472, 135-C1 (1992)

General Theory of the Purcell-Pennypacker Scattering Approach and Its Extension to Bianisotropic Scatterers. *Akhlesh Lakhtakia.* 394, 494, 135-E1 (1992)

Ultraviolet Imaging Telescope Images of the Reflection Nebula NGC 7023: Derivation of Ultraviolet Scattering Properties of Dust Grains. *Adolf N. Witt, Jens K. Petersohn, Ralph C. Bohlin, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 395, L5, 144-D1 (1992)

Model Scattering Envelopes of Young Stellar Objects. I. Method and Application to Circumstellar Disks. *Barbara A. Whitney & Lee Hartmann.* 395, 529, 149-D1 (1992)

Radiative-hydrodynamical Simulations of X-Ray Burst–induced Accretion Disk Coronae. *Fulvio Melia, Gregory J. Zylstra, & Bruce Fryxell.* 396, L27, 160-E8 (1992)

Two-dimensional Viscous Accretion Disk Models. I. On Meridional Circulations in Radiative Regions. *W. Kley & D. N. C. Lin.* 397, 600, 178-D13 (1992)

On the Thermal Structure and Stability of Configurations with Heat Diffusion and a Gain-Loss Function. I. General Results. *Miguel H. Ibáñez S., Antonio Parravano, & César A. Mendoza B.* 398, 177, 184-B1 (1992)

Radiative Equilibrium in Rapidly Expanding Shells. *P. H. Hauschildt.* 398, 224, 184-E9 (1992)

Inversion of Stokes Profiles. *B. Ruiz Cobo & J. C. del Toro Iniesta.* 398, 375, 186-D11 (1992)

An Interpretation of the Multipeaked Structure in X-Ray Bursts. *Fulvio Melia & Gregory J. Zylstra.* 398, L53, 188-A1 (1992)

Flux-limited Diffusion in Hydrodynamics. *J. Cooperstein & E. Baron.* 398, 531, 190-F11 (1992)

Radiation Transfer in Gamma-Ray Bursts. *B. J. Carrigan & J. I. Katz.* 399, 100, 196-D6 (1992)

Rapid Time Variations and Radiative Instabilities of Astrophysical Masers. *Gerardo A. Scappaticci & William D. Watson.* 400, 351, 213-C7 (1992)

Infrared Spectra of Obscuring Dust Tori around Active Galactic Nuclei. I. Calculational Method and Basic Trends. *Edward A. Pier & Julian H. Krolik.* 401, 99, 222-C5 (1992)

The Dynamics of Molecular Cloud Envelopes in a Varying Ultraviolet Radiation Field. *C. Bréart de Boisanger, J.-P. Chièze, & B. Meltz.* 401, 182, 223-D1 (1992)

Enhancement of Diffusive Transport in Oscillatory Flows. *E. Knobloch & W. J. Merryfield.* 401, 196, 223-E3 (1992)

Photon Escape Probabilities from Resolved Sources: Application to Solar C III Limb Emission. *S. O. Kastner & A. K. Bhatia.* 401, 416, 226-C1 (1992)

Heating of H II Regions with Application to the Galactic Center. *Philip R. Maloney, David J. Hollenbach, & Charles H. Townes.* 401, 559, 229-E5 (1992)

On the Photon Diffusion Time Scale for the Sun. *R. Mitalas & K. R. Sills.* 401, 759, 232-A1 (1992)

High-Excitation ^{29}SiO and ^{30}SiO Maser Emission. *J. Cernicharo & V. Bujarrabal.* 401, L109, 233-E5 (1992)

Siphon Flows in Isolated Magnetic Flux Tubes. V. Radiative Flows with Variable Ionization. *Benjamin Montesinos & John H. Thomas.* 402, 314, 5-A13 (1993)

Spectroscopic Constraints on the Properties of Dust in Active Galactic Nuclei. *Ari Laor & Bruce T. Draine.* 402, 441, 8-B5 (1993)

Equilibrium Slab Models of Lyman-Alpha Clouds. *Jane C. Charlton, Edwin E. Salpeter, & Craig J. Hogan.* 402, 493, 8-F8 (1993)

Model Scattering Envelopes of Young Stellar Objects. II. Infalling Envelopes. *Barbara A. Whitney & Lee Hartmann.* 402, 605, 10-B5 (1993)

A New Interpretation of the Redshift Observed in Optically Thin Transition Region Lines. *Viggo Hansteen.* 402, 741, 11-G1 (1993)

The Telegraph Equation in Charged Particle Transport. *T. I. Gombosi, J. R. Jokipii, J. Kota, K. Lorencz, & L. L. Williams.* 403, 377, 18-E1 (1993)

Covariant Flux-limited Diffusion Theory for an Anisotropic Source Term. *Alfio Bonanno & Vittorio Romano.* 404, 264, 31-B9 (1993)

Colliding Wind Binary Systems: Monte Carlo Simulations of Line-Profile Variability. *Ian R. Stevens.* 404, 281, 31-D3 (1993)

Relativistic Frequency-dependent Transfer in Spherical Flows. I. Method and Numerical Tests. *Luciano Nobili, Roberto Turolla, & Luca Zampieri.* 404, 686, 37-D12 (1993)

A Numerical Simulation of Two-dimensional Radiative Equilibrium in Magnetostatic Flux Tubes. I. The Model. *V. J. Pizzo, K. B. MacGregor, & P. B. Kunasz.* 404, 788, 38-F10 (1993)

Models of Clumpy Photodissociation Regions. *M. Meixner & A. G. G. M. Tielens.* 405, 216, 43-G2 (1993)

Multiline Transfer and the Dynamics of Wolf-Rayet Winds. *L. B. Lucy & D. C. Abbott.* 405, 738, 52-C5 (1993)

The Boltzmann Equation in General Relativistic Rotating Systems: Cooling of Rotating Neutron Stars. *Juan A. Miralles, Kenneth A. Van Riper, & James M. Lattimer.* 407, 687, 79-B1 (1993)

Solar Chromospheric and Transition Region Response to Energy Deposition in the Middle and Upper Chromosphere. *Alphonse C. Sterling, Kazunari Shibata, & John T. Mariska.* 407, 778, 80-B9 (1993)

The Spectral Energy Distribution of Star-forming Regions. *Ralf Siebenmorgen.* 408, 218, 85-G3 (1993)

Light-induced Drift and Abundance Anomalies. *F. LeBlanc & G. Michaud.* 408, 251, 86-C1 (1993)

An Implicit Integral Method to Solve Selected Radiative Transfer Problems. I. Non-LTE Line Formation. *E. Simonneau & L. Crivellari.* 409, 830, 109-D12 (1993)

Mass Loss from Wolf-Rayet Stars Due to Radiation Pressure and Alfvén Waves. *L. C. dos Santos, V. Jatenco-Pereira, & R. Opher.* 410, 732, 122-G11 (1993)

On the Nature of the Polarization Opposition Effect Exhibited by Saturn's Rings. *Michael I. Mishchenko.* 411, 351, 131-F1 (1993)

On the Source Function of the Soft X-Ray Diffuse Background. *David N. Burrows & Ralph P. Kraft.* 411, 685, 138-C1 (1993)

Rigorous Treatment of the Radiative Transfer Problem in Stellar Winds: Significance of the Velocity Law and the Chromosphere in the Hα Profile. *Lydia S. Cidale & Adela E. Ringuelet.* 411, 874, 140-F5 (1993)

The Atmospheres of T Tauri Stars. II. Chromospheric Line Fluxes and Veiling. *C. C. Batalha & Gibor Basri.* 412, 363, 146-E13 (1993)

Spectrum Formation in Supernovae: Numerical Techniques. *Ronald G. Eastman & Philip A. Pinto.* 412, 731, 152-G12 (1993)

Quantitative Modeling and Impersonal Fitting of Algol Polarization Curves. *R. E. Wilson & Jer-Chyi Liou.* 413, 670, 164-G1 (1993)

Anisotropic Comptonization in Thermal Plasmas: Spectral Distribution in Plane-Parallel Geometry. *Francesco Haardt.* 413, 680, 164-G12 (1993)

A Numerical Simulation of Two-dimensional Radiative Equilibrium in Magnetostatic Flux Tubes. II. Computational Results. *V. J. Pizzo, K. B. MacGregor, & P. B. Kunasz.* 413, 764, 166-A1 (1993)

Formation of Quasar Clouds by Thermal Instability in the Presence of Alfvén Wave Heating. *D. R. Gonçalves, V. Jatenco-Pereira, & R. Opher.* 414, 57, 170-F12 (1993)

Effects of Internal Dust on the Narrow-Line Region Lyman and Balmer Decrements. *Luc Binette, John Wang, Montserrat Villar-Martin, Peter G. Martin, & Gladis Magris C.* 414, 535, 177-G9 (1993)

The Embedded Young Stars in the Taurus-Auriga Molecular Cloud. I. Models for Spectral Energy Distributions. *Scott J. Kenyon, Nuria Calvet, & Lee Hartmann.* 414, 676, 179-F1 (1993)

The Embedded Young Stars in the Taurus-Auriga Molecular Cloud. II. Models for Scattered Light Images. *Scott J. Kenyon, Barbara A. Whitney, Mercedes Gomez, & Lee Hartmann.* 414, 773, 180-G9 (1993)

A Semi-Analytic Model for Cyclotron Line Formation. *J. C. L. Wang, I. Wasserman, & D. Q. Lamb.* 414, 815, 181-D2 (1993)

Cooling Functions for Low-Density Astrophysical Plasmas. *Ralph S. Sutherland & M. A. Dopita.* 88, 253, 43-D9 (1993)

On the Geometry, Covering Factor, and Scattering-Emission Properties of QSO Broad Absorption-Line Regions. *Fred Hamann, Kirk T. Korista, & Simon L. Morris.* 415, 541, 194-E11 (1993)

The Relativistic Sobolev Method Applied to Homologously Expanding Atmospheres. *David J. Jeffery.* 415, 734, 197-A5 (1993)

Polarization of Astronomical Maser Radiation. II. Polarization Modes and Unsaturated Growth. *Moshe Elitzur.* 416, 256, 204-C7 (1993)

Proximity Effects in Clusters of Particles. *François Rouleau & P. G. Martin.* 416, 707, 212-B10 (1993)

Formation of P Cygni Line Profiles in Relativistically Expanding Atmospheres. II. The Effect of the Continuum Frequency Shape and Limb Darkening of the Core. *Damien Hutsemékers.* 417, 97, 218-D12 (1993)

Resonance Scattering by Mercurian Sodium. *Donald M. Hunten & Lloyd V. Wallace.* 417, 757, 228-G6 (1993)

Polarized Scattering in the Vicinity of Galaxies. *Brian W. Murphy & David F. Chernoff.* 418, 60, 231-G7 (1993)

Expanding Atmospheric Model Including a Chromosphere. I. Study of the Infrared Excess in Be Stars. *Andrea C. Vázquez, Lydia S. Cidale, & Adela E. Ringuelet.* 419, 286, 249-F10 (1993)

The Faraday Rotation and Linear Polarization of Light in Stellar Atmospheres. *N. A. Silant'ev.* 419, 294, 249-G6 (1993)

Dynamically Comptonized Spectra from Near-critical Accretion onto Neutron Stars. *Luca Zampieri, Roberto Turolla, & Aldo Treves.* 419, 311, 250-B1 (1993)

Secondary Ionization in a Flat Universe. *F. Atrio-Barandela & A. G. Doroshkevich.* 420, 26, 1-D1 (1994)

On the Theory of Astronomical Masers in Three Dimensions. *Moshe Elitzur.* 422, 751, 41-B13 (1994)

Radiation-driven Acceleration in Photospheres of Nonaccreting Magnetic White Dwarfs. *Vladimir V. Zheleznyakov & A. V. Serber.* 90, 783, 13-D13 (1994)

The Evolution of Nonlinear Subhorizon-Scale Entropy Fluctuations in the Early Universe. *Karsten Jedamzik & George M. Fuller.* 423, 33, 46-E2 (1994)

Photoionization of Disk Galaxies: An Explanation of the Sharp Edges in the H I Distribution. *James B. Dove & J. Michael Shull.* 423, 196, 48-E3 (1994)

Very High Energy Gamma Rays from Active Galactic Nuclei: Cascading on the Cosmic Background Radiation Fields and the Formation of Pair Halos. *F. A. Aharonian, P. S. Coppi, & H. J. Völk.* 423, L5, 53-B7 (1994)

A Numerical Study of Viscous Flows in Axisymmetric α-Accretion Disks. *Michał Różyczka, Peter Bodenheimer, & K. R. Bell.* 423, 736, 57-F10 (1994)

The He I λ10830 Line in Classical Cepheids. I. Observations. *Dimitar D. Sasselov & John B. Lester.* 423, 777, 58-C11 (1994)

The He I λ10830 Line in Classical Cepheids. II. Mechanism of Formation. *Dimitar D. Sasselov & John B. Lester.* 423, 785, 58-D7 (1994)

The Chromospheric Structure of Classical Cepheids: Constraints from the He I λ10830 Line. *Dimitar D. Sasselov & John B. Lester.* 423, 795, 58-E6 (1994)

Basic Theory for Polarized, Astrophysical Maser Radiation in a Magnetic Field. *William D. Watson.* 424, L37, 69-E8 (1994)

A Critical Evaluation of Semianalytic Methods in the Study of Centrally Heated, Unresolved, Infrared Sources. *Steven D. Doty & Chun Ming Leung.* 424, 729, 73-G10 (1994)

Analysis of the Early Spectra and Light Curve of SN 1987A. *Peter H. Hauschildt & Lisa M. Ensman.* 424, 905, 76-A10 (1994)

Light Scattering by Porous Dust Particles in the Discrete-Dipole Approximation. *K. Lumme & J. Rahola.* 425, 653, 89-F12 (1994)

Solar Flare Model Atmospheres. *Suzanne L. Hawley & George H. Fisher.* 426, 387, 101-A9 (1994)

Angular Scattering of Solar Radio Emission by Coronal Turbulence. *T. S. Bastian.* 426, 774, 108-B3 (1994)

Polarization Profiles of Scattered Emission Lines. I. General Formalism for Optically Thin Rayleigh Scattering. *W. J. Henney.* 427, 288, 113-E1 (1994)

Observational Tests for Nonequilibrium Ionization in the Solar Corona. *D. Spadaro, P. Leto, & S. K. Antiochos.* 427, 453, 115-E1 (1994)

Circumstellar Dust Emission Models. *Mark G. Wolfire & Ed Churchwell.* 427, 889, 123-F6 (1994)

The Ionization of the Diffuse Ionized Gas. *H. Domgörgen & John S. Mathis.* 428, 647, 138-D1 (1994)

Photoevaporation of Disks around Massive Stars and Application to Ultracompact H II Regions. *David Hollenbach, Doug Johnstone, Susana Lizano, & Frank Shu.* 428, 654, 138-D10 (1994)

An Implicit Integral Method to Solve Selected Radiative Transfer Problems. III. Factorization versus Linearization. *E. Simonneau & L. Crivellari.* 428, 753, 139-E11 (1994)

An Implicit Integral Method to Solve Selected Radiative Transfer Problems. II. LTE Stellar Atmosphere Models. *L. Crivellari & E. Simonneau.* 429, 331, 148-B9 (1994)

On the Spectra of X-Ray Bursters: Expansion and Contraction Stages. *Lev Titarchuk.* 429, 340, 148-C6 (1994)

Photoionization of the Diffuse Interstellar Medium and Galactic Halo by OB Associations. *James B. Dove & J. Michael Shull.* 430, 222, 161-G7 (1994)

Spectroscopic Signatures of Infall in Young Protostellar Systems. *Christopher K. Walker, Gopal Narayanan, & Alan P. Boss.* 431, 767, 188-B5 (1994)

Analytic Lyman-Alpha Wing Diagnostics and the Chromospheric Excitation Balance in Cool Dwarfs. *K. G. Gayley.* 431, 806, 188-F4 (1994)

Diagnostics of Dust Content in Spiral Galaxies: Numerical Simulations of Radiative Transfer. *Y. I. Byun, K. C. Freeman, & N. D. Kylafis.* 432, 114, 194-F1 (1994)

Resonance Line Polarization in Spherical Atmospheres: Partial Redistribution Effects Studied with the Domke-Hubeny Redistribution Matrix. *K. N. Nagendra.* 432, 274, 196-E10 (1994)

The Role of Advection in the Quasi-static Approximation. *Shlomi Pistinner & Giora Shaviv.* 432, 302, 197-A1 (1994)

Dynamic Processes in Be Star Atmospheres. II. He I $2P$–nD Line Formation in λ Eridani (Outburst). *Myron A. Smith, Ivan Hubeny, Thierry Lanz, & Thomas Meylan.* 432, 392, 198-A10 (1994)

Lyα Emission and Absorption Features in the Spectra of Galaxies. *W. L. Chen & David A. Neufeld.* 432, 567, 203-A10 (1994)

The Far-Ultraviolet Dust Albedo in the Upper Scorpius Subgroup of the Scorpius OB2 Association. *Karl D. Gordon, Adolf N. Witt, George R. Carruthers, Susan A. Christensen, & Brian C. Dohne.* 432, 641, 204-A3 (1994)

Winds from Neutron Stars and Strong Type I X-Ray Bursts. *Luciano Nobili, Roberto Turolla, & Iosif Lapidus.* 433, 276, 211-F11 (1994)

Hard X-Rays from NGC 4151: A Thermal Origin? *Lev Titarchuk & Apostolos Mastichiadis.* 433, L33, 215-A7 (1994)

Acceleration Efficiency in Line-driven Flows. *Kenneth G. Gayley & Stanley P. Owocki.* 434, 684, 237-B12 (1994)

The Theoretical Polarization of Pure Scattering Axisymmetric Circumstellar Envelopes. *G. K. Fox.* 435, 372, 248-E1 (1994)

Acoustic Heating of the Chromosphere and Cool Corona in the F Star α Canis Minoris (Procyon). *D. J. Mullan & Q. Q. Cheng.* 435, 435, 249-D7 (1994)

Equilibrium Structure of Solar Magnetic Flux Tubes: Energy Transport with Multistream Radiative Transfer. *S. S. Hasan & W. Kalkofen.* 436, 355, 266-B7 (1994)

Effects of Photoionization on Galaxy Formation. *Masashi Chiba & Biman B. Nath.* 436, 618, 274-B1 (1994)

The Effects of Gravity Darkening on the Ultraviolet Continuum Polarization Produced by Circumstellar Disks. *J. E. Bjorkman & K. S. Bjorkman.* 436, 818, 277-A1 (1994)

An Analytic Solution of the Radiative Transfer Equation for a Gray Scattering Atmosphere in Motion. *Shlomi Pistinner & Giora Shaviv.* 436, 837, 277-B13 (1994)

Modeling Radiative Transfer in Molecular Clouds. I. HCO^+ in the Star-forming Region W49A North. *Hélène R. Dickel & Lawrence H. Auer.* 437, 222, 286-C4 (1994)

X-Ray–induced Ionization in the Winds of Near–Main-Sequence O and B Stars. *J. J. MacFarlane, D. H. Cohen, & P. Wang.* 437, 351, 288-A11 (1994)

X-Ray Reflection from Photoionized Media in Active Galactic Nuclei. *Piotr T. Życki, Julian H. Krolik, Andrzej A. Zdziarski, & Timothy R. Kallman.* 437, 597, 294-A6 (1994)

Non-LTE Effects on the Strength of the Lyman Edge in Quasar Accretion Disks. *H. Störzer, P. H. Hauschildt, & F. Allard.* 437, L91, 298-G8 (1994)

Theoretical Light Curves for the Type Ic Supernova SN 1994I. *Kohichi Iwamoto, Ken'ichi Nomoto, Peter Höflich, Hitoshi Yamaoka, Shiomi Kumagai, & Toshikazu Shigeyama.* 437, L115, 299-C8 (1994)

A Potential Cyclotron Line Signature in Low-Luminosity X-Ray Sources. *Robert W. Nelson, John C. L. Wang, E. E. Salpeter, & Ira Wasserman.* 438, L99, 20-B1 (1995)

Time-dependent Fluorescent H_2 Emission. *O. Goldshmidt & A. Sternberg.* 439, 256, 24-F3 (1995)

Critical Radiation Fluxes and Luminosities of Black Holes and Relativistic Stars. *Frederick K. Lamb & M. Coleman Miller.* 439, 828, 36-A11 (1995)

Non-LTE Line-blanketed Model Atmospheres of Hot Stars. I. Hybrid Complete Linearization/Accelerated Lambda Iteration Method. *I. Hubeny & T. Lanz.* 439, 875, 36-F8 (1995)

The Effect of Oblateness and Gravity Darkening on the Radiation Driving in Winds from Rapidly Rotating B Stars. *Steven R. Cranmer & Stanley P. Owocki.* 440, 308, 45-D6 (1995)

On the Current Status of Maser Polarization Theory. *Moshe Elitzur.* 440, 345, 45-G13 (1995)

Does a Nonmagnetic Solar Chromosphere Exist? *Mats Carlsson & Robert F. Stein.* 440, L29, 48-E8 (1995)

The Sobolev Optical Depth for Time-dependent Relativistic Systems. *David J. Jeffery.* 440, 810, 54-C1 (1995)

Remarks on the Polarization Observed in SN 1993J. *Peter Höflich.* 440, 821, 54-D4 (1995)

Radiative Transfer in a Clumpy Universe: The Colors of High-Redshift Galaxies. *Piero Madau.* 441, 18, 59-D13 (1995)

Polarization from Scattering in Blobs. *Arthur D. Code & Barbara A. Whitney.* 441, 400, 64-G4 (1995)

Infrared Properties of Circumstellar Dust Envelopes of Oxygen-rich Asymptotic Giant Branch Stars. *O. Hashimoto.* 442, 286, 81-B3 (1995)

Line Formation in Collapsing Cloud Cores with Rotation and Applications to B335 and IRAS 16293−2422. *Shudong Zhou.* 442, 685, 89-E11 (1995)

Analysis of the Type Ia Supernova SN 1994D. *P. Höflich.* 443, 89, 96-D9 (1995)

A New Estimate of the Uncertainties in the Primordial Helium Abundance: New Bounds on Ω Baryons. *Dimitar Sasselov & Dalia Goldwirth.* 444, L5, 121-B8 (1995)

Instabilities and the Transport of Polarized Astrophysical Maser Radiation. *Bradley K. Wallin & William D. Watson.* 445, 465, 139-A4 (1995)

On the Spectral Hardening Factor of the X-Ray Emission from Accretion Disks in Black Hole Candidates. *Toshiya Shimura & Fumio Takahara.* 445, 780, 146-A4 (1995)

Semianalytic Continuum Spectra of Type II Supernovae. *Marcos J. Montes & Robert V. Wagoner.* 445, 828, 146-E11 (1995)

Gamma-Ray Transfer and Energy Deposition in Supernovae. *Douglas A. Swartz, Peter G. Sutherland, & Robert P. Harkness.* 446, 766, 166-F1 (1995)

The Subarcsecond 10 Micron Size of LkHα 101: Constraints on Circumstellar Dust. *R. M. Danen, C. R. Gwinn, & E. E. Bloemhof.* 447, 391, 177-F13 (1995)

Destabilization of Compressible Convection by Radiation: Quantitative Evaluation. *Q. Q. Cheng, Murshed Hossain, & D. J. Mullan.* 447, 789, 186-G6 (1995)

The Physics of Early Nova Spectra. *Peter H. Hauschildt, Sumner Starrfield, Steven N. Shore, France Allard, & E. Baron.* 447, 829, 187-D2 (1995)

Constraints on Hydrostatic Models of Soft Gamma-Ray Repeaters. *M. Coleman Miller.* 448, L29, 199-F5 (1995)

Radiative Levitation in Hot White Dwarfs: Equilibrium Theory. *P. Chayer, G. Fontaine, & F. Wesemael.* 99, 189, 36-G5 (1995)

Radiative Instabilities in Three-dimensional Astrophysical Masers. *Gerardo A. Scappaticci & William D. Watson.* 448, 862, 206-G1 (1995)

On the Geometry of the X-Ray–Emitting Region in Seyfert Galaxies. *Boris E. Stern, Juri Poutanen, Roland Svensson, Marek Sikora, & Mitchell C. Begelman.* 449, L13, 216-B9 (1995)

Exact and Approximate Radiative Transfer in Differentially Moving Media. *Wei-Wei Yin & Guy S. Miller.* 449, 826, 224-B8 (1995)

CNO Abundances and the Evolutionary Status of Galactic, A-Type Supergiants. *Kim A. Venn.* 449, 839, 224-C11 (1995)

Radiative Transfer in Stochastic Media. *Yeming Gu, Charles Lindsey, & John T. Jefferies.* 450, 318, 232-D1 (1995)

Effect of Radiative Transport on the Evolution of Jupiter and Saturn. *T. Guillot, G. Chabrier, D. Gautier, & P. Morel.* 450, 463, 234-D4 (1995)

Power-Law Spectra as a Result of Comptonization of the Soft Radiation in a Plasma Cloud. *Lev Titarchuk & Yurij Lyubarskij.* 450, 876, 243-A10 (1995)

The Disruption of Molecular Cloud Cores by Photoionization. *J. A. Rodríguez-Gaspar, G. Tenorio-Tagle, & J. Franco.* 451, 210, 248-G10 (1995)

Iteration Profiles in Radiative Transfer Problems. I. From Vectorial to Scalar Coupling. *L. Crivellari & E. Simonneau.* 451, 328, 250-D6 (1995)

Thermal Balance in Dense Molecular Clouds: Radiative Cooling Rates and Emission-Line Luminosities. *David A. Neufeld, Stephen Lepp, & Gary J. Melnick.* 100, 132, 47-F2 (1995)

Some Remarks about Nova Spectroscopy and Photometry. *Shlomi Pistinner, Giora Shaviv, Peter H. Hauschildt, & Sumner Starrfield.* 451, 724, 257-B12 (1995)

A Comparison of Thermal Comptonization Models. *Lev Titarchuk & Xin-Min Hua.* 452, 226, 265-B9 (1995)

Models of the Optical/Ultraviolet Continuum Polarization in Active Galactic Nuclei: Implications for Unification Schemes. *John F. Kartje.* 452, 565, 272-D8 (1995)

Implications of Gamma-Ray Transparency Constraints in Blazars: Minimum Distances and Gamma-Ray Collimation. *Peter A. Becker & Menas Kafatos.* 453, 83, 282-C12 (1995)

Expanding Atmospheric Model Including a Chromosphere. II. Be Stars: Center-to-Limb Variation of the Emergent Intensity. *Lydia S. Cidale & Andrea C. Vázquez.* 453, 393, 286-E4 (1995)

Disk-Corona Model of Active Galactic Nuclei with Nonthermal Pairs. *Sachiko Tsuruta & Michael Kellen.* 453, L9, 289-C7 (1995)

The Effect of Degeneracy on the Scattering Contribution to the Radiative Opacity. *S. J. Rose.* 453, L45, 290-A4 (1995)

Polarization Profiles of Scattered Emission Lines. III. Effects of Multiple Scattering and Non-Rayleigh Phase Functions. *W. J. Henney & D. J. Axon.* 454, 233, 302-E4 (1995)

Are Wolf-Rayet Stellar Winds Driven by Radiation Forces? *Shlomi Pistinner & David Eichler.* 454, 404, 304-F8 (1995)

Radiative $He^+(1s) + He(1s^2)$ Processes as the Source of the DB White Dwarf Atmosphere Electromagnetic Continuous Spectra. *A. A. Mihajlov, M. S. Dimitrijević, Lj. M Ignjatović, & Z. Djurić.* 454, 420, 305-B3 (1995)

The Ultraviolet Reflectivity of Jupiter at 3.5 Å Resolution from Astro-1 and Astro-2. *Patrick F. Morrissey, Paul D. Feldman, Melissa A. McGrath, Brian C. Wolven, & H. Warren Moos.* 454, L65, 308-E2 (1995)

High-Resolution Far-Infrared Observations and Radiative-Transfer Models of W3 IRS 4 and IRS 5. *M. F. Campbell, H. M. Butner, P. M. Harvey, N. J. Evans II, M. B. Campbell, & C. N. Sabbey.* 454, 831, 313-C6 (1995)

Partial Redistribution in Multilevel Atoms. I. Method and Application to the Solar Hydrogen Line Formation. *I. Hubeny & B. W. Lites.* 455, 376, 323-C8 (1995)

A Novel Iterative Scheme for the Very Fast and Accurate Solution of Non-LTE Radiative Transfer Problems. *J. Trujillo Bueno & P. Fabiani Bendicho.* 455, 646, 330-G6 (1995)

RADIO CONTINUUM: GALAXIES

The Origin of the Optical Emission Lines Associated with Extragalactic Radio Sources. *S. M. Viegas & Elisabete M. de Gouveia Dal Pino.* 384, 467, 8-A1 (1992)

Infrared and Optical Morphologies of Distant Radio Galaxies. *M. A. Rigler, S. J. Lilly, A. Stockton, F. Hammer, & O. Le Fèvre.* 385, 61, 12-G1 (1992)

The Radio Source and Bipolar Nebulosity in the Seyfert Galaxy NGC 3516. *Takamitsu Miyaji, Andrew S. Wilson, & Ismael Pérez-Fournon.* 385, 137, 13-F1 (1992)

Origin of the Structures and Polarization in the Classical Double 3C 219. *David A. Clarke, Alan H. Bridle, Jack O. Burns, Richard A. Perley, & Michael L. Norman.* 385, 173, 14-B1 (1992)

An Improved Method to Derive H I Absorption Spectra through the Disks of Galaxies: Application to the Sculptor Group. *John M. Dickey, Elias Brinks, & Daniel Puche.* 385, 501, 19-D6 (1992)

The Clustering of Radio Galaxies. *Neta A. Bahcall & Arati Chokshi.* 385, L33, 23-B1 (1992)

Infrared Imaging of $z > 2$ Radio Galaxies. *P. J. McCarthy, S. E. Persson, & S. C. West.* 386, 52, 24-F7 (1992)

Rotation Measures of Low-Latitude Extragalactic Sources and the Magnetoionic Structure of the Galaxy. *Andrew W. Clegg, James M. Cordes, John H. Simonetti, & Shrinivas R. Kulkarni.* 386, 143, 26-A1 (1992)

Inverse Compton Scattering and the Alignments Observed in High-Redshift Radio Galaxies. *Ruth A. Daly.* 386, L9, 29-B9 (1992)

Compact Steep Spectrum Sources and Linear Size Evolution. *L. I. Onuora.* 386, 452, 31-A7 (1992)

Optical and Radio Variability in Blazars. *Beth R. Hufnagel & Joel N. Bregman.* 386, 473, 31-C5 (1992)

Luminosity Functions, Relativistic Beaming, and Unified Theories of High-Luminosity Radio Sources. *P. Padovani & C. M. Urry.* 387, 449, 44-C9 (1992)

Reconciling the Image Brightness Ratios in the Gravitational Lens System 0957+561. *Samuel R. Conner, Joseph Lehár, & Bernard F. Burke.* 387, L61, 48-B7 (1992)

A Survey of the Milliarcsecond Polarization Properties of BL Lacertae Objects at 5 GHz. *D. C. Gabuzda, T. V. Cawthorne, D. H. Roberts, & J. F. C. Wardle.* 388, 40, 49-E5 (1992)

Where Have All the Cluster Halos Gone? *Jack O. Burns, Martin E. Sulkanen, Galen R. Gisler, & Rick A. Perley.* 388, L49, 59-B1 (1992)

X-Ray–emitting Filaments in the Cooling Flow Cluster A2029. *Craig L. Sarazin, Robert W. O'Connell, & Brian R. McNamara.* 389, L59, 73-C8 (1992)

The Infrared Properties of Quasars and Radio Galaxies: Testing the Unification Schemes. *Timothy M. Heckman, Kenneth C. Chambers, & Marc Postman.* 391, 39, 86-E3 (1992)

The Structure of Southern Extragalactic Radio Sources. *Paul A. Jones & W. Bruce McAdam.* 80, 137, 24-C3 (1992)

Compact Radio Sources near the Galactic Plane. *D. J. Helfand, S. Zoonematkermani, R. H. Becker, & R. L. White.* 80, 211, 25-B1 (1992)

Statistics of Pencil Beams in Voronoi Foams. *Mark U. SubbaRao & Alexander S. Szalay.* 391, 483, 93-G12 (1992)

Radio Properties of Optically Selected Quasars. *K. L. Visnovsky, C. D. Impey, C. B. Foltz, P. C. Hewett, R. J. Weymann, & S. L. Morris.* 391, 560, 94-G11 (1992)

The Milliarcsecond Structure of Highly Variable Radio Sources. *Ann E. Wehrle, Marshall H. Cohen, Stephen C. Unwin, Hugh D. Aller, Margo F. Aller, & George Nicolson.* 391, 589, 95-C5 (1992)

Polarization in the Radio Galaxy 3C 109—An Obscured Quasar. *Robert W. Goodrich & Marshall H. Cohen.* 391, 623, 95-F12 (1992)

A VLBI Search for AGN Radio Cores in Starburst Galaxies. *Colin J. Lonsdale, Carol J. Lonsdale, & Harding E. Smith.* 391, 629, 95-G6 (1992)

Collective Emission from Rapidly Variable Quasars. *Gregory Benford.* 391, L59, 99-D1 (1992)

Ram-Pressure Confinement of a Hypersonic Jet. *Chris Loken, Jack O. Burns, David A. Clarke, & Michael L. Norman.* 392, 54, 101-F1 (1992)

A 20 Centimeter VLA Survey of Abell Clusters of Galaxies. II. Images and Optical Identifications. *Frazer N. Owen, Richard A. White, & Jack O. Burns.* 80, 501, 30-D13 (1992)

Multicolor Images of Spatially Resolved Structures around High-Redshift Quasars. *Matthew D. Lehnert, Timothy M. Heckman, Kenneth C. Chambers, & George K. Miley.* 393, 68, 114-G12 (1992)

Radio and Infrared Emission from Markarian Starburst Galaxies. *Peter C. Stine.* 81, 49, 35-F9 (1992)

A Compendium of Radio Spectra and Luminosities for Three Complete Samples of Radio Sources. *T. Herbig & A. C. S. Readhead.* 81, 83, 36-B11 (1992)

Using Electron Scattering to Probe the Environment of Cluster Cooling Flows. *Michael W. Wise & Craig L. Sarazin.* 395, 387, 147-B5 (1992)

VLA Observations of the Inner Lobes of Centaurus A. *David A. Clarke, Jack O. Burns, & Michael L. Norman.* 395, 444, 147-G7 (1992)

A Determination of the Mass of Sagittarius A* from Its Radio Spectral and Source Size Measurements. *Fulvio Melia, J. R. Jokipii, & Ajay Narayanan.* 395, L87, 154-A1 (1992)

The Compact Triples 0710+439 and 2352+495: A New Morphology of Radio Galaxy Nuclei. *J. E. Conway, T. J. Pearson, A. C. S. Readhead, S. C. Unwin, W. Xu, & R. L. Mutel.* 396, 62, 155-G7 (1992)

Confusion Noise and Source Clustering. *X. Barcons.* 396, 460, 163-B11 (1992)

The University of Michigan Radio Astronomy Data Base. I. Structure Function Analysis and the Relation between BL Lacertae Objects and Quasi-stellar Objects. *P. A. Hughes, H. D. Aller, & M. F. Aller.* 396, 469, 163-C9 (1992)

The Radio Properties of the Broad-Absorption-Line QSOs. *John T. Stocke, Simon L. Morris, Ray J. Weymann, & Craig B. Foltz.* 396, 487, 163-E5 (1992)

A New Theory for the Alignment Effect. *Stephen A. Eales.* 397, 49, 168-F1 (1992)

Optical Identification, Radio Galaxy Environment, and Statistical Properties for a Homogeneous Sample of 3196 Radio Sources from the Texas Survey. *Elizabeth P. Bozyan.* 82, 1, 49-B1 (1992)

Kinematics of the Parsec-Scale Relativistic Jet in 3C 345. *Stephen C. Unwin & Ann E. Wehrle.* 398, 74, 183-A1 (1992)

The Compactness of Far-Infrared Bright Galaxies. *Zhong Wang & George Helou.* 398, L33, 187-E7 (1992)

Pearson-Readhead Survey Sources: Properties of the Centimeter-Wavelength Flux and Polarization of a Complete Radio Sample. *M. F. Aller, H. D. Aller, & P. A. Hughes.* 399, 16, 195-C8 (1992)

How Old Is the $z = 3.4$ Radio Galaxy B2 0902+34. *Peter Eisenhardt & Mark Dickinson.* 399, L47, 200-E4 (1992)

Discovery of a Synchrotron-emitting Halo around NGC 253. *C. L. Carilli, M. A. Holdaway, P. T. P. Ho, & C. G. De Pree.* 399, L59, 200-F8 (1992)

Morphological Peculiarities of High-Redshift Radio Galaxies: The Role of Relativistic Electrons. *Ruth A. Daly.* 399, 426, 203-C9 (1992)

Hard X-Ray Emission from a Narrow-Line Radio Galaxy IC 5063 and Obscured Active Nucleus. *Katsuji Koyama, Hisamitu Awaki, Kazushi Iwasawa, & Martin J. Ward.* 399, L129, 208-A9 (1992)

New Results on the Radio–Far-Infrared Relation for Galaxies. *Rob Price & Nebojsa Duric.* 401, 81, 222-A11 (1992)

Hubble Space Telescope Imaging of Distant Galaxies: 4C 41.17 at $z = 3.8$. *G. K. Miley, K. C. Chambers, W. J. M. van Breugel, & F. Macchetto.* 401, L69, 232-G10 (1992)

The Evolution of Compact Steep Spectrum Sources. *David S. De Young.* 402, 95, 2-C6 (1993)

Simultaneous *ROSAT*, *GINGA*, VLA, *IUE*, and Optical Observations of the Bright Quasar H1821+643. *Michiel Kolman, Jules P. Halpern, Chris R. Shrader, Alexei V. Filippenko, Henner H. Fink, & Stephan G. Schaeidt.* 402, 514, 9-A1 (1993)

Mapping Cygnus A at 3 Millimeter Wavelength with the MIRIAD System. *M. C. H. Wright & R. J. Sault.* 402, 546, 9-C11 (1993)

The Evolution of Galaxies in Radio-selected Groups. *Jeremy R. Allington-Smith, Richard S. Ellis, Esther L. Zirbel, & Augustus Oemler, Jr.* 404, 521, 35-E1 (1993)

Imaging Polarimetry of High-Redshift Radio Galaxies. *S. di Serego Alighieri, A. Cimatti, & R. A. E. Fosbury.* 404, 584, 36-C3 (1993)

The Starburst-AGN Connection: A Sensitive VLBI Survey of Luminous *IRAS* Galaxies. *Colin J. Lonsdale, Harding E. Smith, & Carol J. Lonsdale.* 405, L9, 47-C1 (1993)

On the Relation between Fanaroff-Riley Types I and II Radio Galaxies. *David S. De Young.* 405, L13, 47-C8 (1993)

Microjansky Source Counts and Spectral Indices at 8.44 GHz. *Rogier A. Windhorst, Edward B. Fomalont, R. Bruce Partridge, & James D. Lowenthal.* 405, 498, 49-C5 (1993)

The Connection between Line Emission and Radio Power in Distant Radio Galaxies. *Ruth A. Daly.* 406, 47, 55-E13 (1993)

The Halo Radio Source Coma C and the Origin of Halo Sources. *G. Giovannini, L. Feretti, T. Venturi, K.-T. Kim, & P. P. Kronberg.* 406, 399, 62-F1 (1993)

The Radio Structure of X-Ray–selected BL Lacertae Objects. *Eric S. Perlman & John T. Stocke.* 406, 430, 63-A13 (1993)

Determining the Shape of Spectra in Extended Radio Sources. *Debora M. Katz-Stone, Lawrence Rudnick, & Martha C. Anderson.* 407, 549, 77-D5 (1993)

VLBI Observations of a Complete Sample of Radio Galaxies. II. The Parsec-Scale Structure of NGC 315. *T. Venturi, G. Giovannini, L. Feretti, G. Comoretto, & A. E. Wehrle.* 408, 81, 84-B4 (1993)

On the Separation of the Flaring Component's Emission in Variable Compact Extragalactic Radio Sources: Results from a Simple Shocked Relativistic Jet Model. *D. J. van der Walt.* 409, 126, 98-E3 (1993)

Molecular Gas in Powerful Radio Galaxies Detected by *IRAS*. *J. M. Mazzarella, J. R. Graham, D. B. Sanders, & S. Djorgovski.* 409, 170, 99-A13 (1993)

An Optically Luminous Radio Galaxy at $z = 3.22$ and the K-z Diagram at High Redshift. *Stephen A. Eales, Steve Rawlings, Mark Dickinson, Hyron Spinrad, Gary J. Hill, & Mark Lacy.* 409, 578, 106-B7 (1993)

A Search for Rapid Variability in the Broad Hα Profiles of Seyfert and Radio Galaxies. *Michael Eracleous & Jules P. Halpern.* 409, 584, 106-C1 (1993)

Quasar X-Ray Spectra Revisited. *P. Shastri, B. J. Wilkes, M. Elvis, & J. McDowell.* 410, 29, 112-D11 (1993)

Is 1308+326 a BL Lacertae Object or a Quasar? *D. C. Gabuzda, R. I. Kollgaard, D. H. Roberts, & J. F. C. Wardle.* 410, 39, 112-E12 (1993)

New 325 MHz Observations of H II Galaxies: The Mechanisms That Shape the Unusual Radio Spectra. *Hans-Jörg Deeg, Elias Brinks, Neb Duric, Uli Klein, & Evan Skillman.* 410, 626, 121-D13 (1993)

Submillimeter Continuum Emission from the Galactic Center Region. *W. R. F. Dent, H. E. Matthews, R. Wade, & W. D. Duncan.* 410, 650, 121-F11 (1993)

VLA Observations of 91 Quasars at $0.35 < z < 1$. *Rob Price, Ann C. Gower, J. B. Hutchings, S. Talon, D. Duncan, & G. Ross.* 86, 365, 19-D9 (1993)

Quasars and Active Galactic Nuclei in Rich Environments. III. The Rapid Evolution of Active Galactic Nucleus Activity in Rich Clusters. *H. K. C. Yee & E. Ellingson.* 411, 43, 127-E13 (1993)

Infrared Spectroscopy of 11 Radio Galaxies at $2 < z < 4$: Evidence That Some High-Redshift Radio Galaxies May Be Protogalaxies. *Stephen A. Eales & Steve Rawlings.* 411, 67, 127-G13 (1993)

Subparsec-Scale Radio Structure in NGC 1275: Complex Structure in the Vicinity of the Central Engine. *T. Venturi, A. C. S. Readhead, J. M. Marr, & D. C. Backer.* 411, 552, 136-E2 (1993)

[Fe II] 1.64 Micron Emission in High-Luminosity and Ultraluminous *IRAS* Galaxies. *Luis Colina.* 411, 565, 136-F3 (1993)

The Radio Properties of High-Redshift Quasars. I. Dual-Frequency Observations of 79 Steep-Spectrum Quasars at $z > 1.5$. *C. J. Lonsdale, P. D. Barthel, & G. K. Miley.* 87, 63, 27-G1 (1993)

A 20 Centimeter VLA Survey of Abell Clusters of Galaxies. III. Images and Optical Identifications. *Frazer N. Owen, Richard A. White, & JingPing Ge.* 87, 135, 28-E5 (1993)

Dynamical and Radiative Effects of Ultrarelativistic Hadronic Interactions in Active Galactic Nuclei. *I. E. Ekejiuba & P. N. Okeke.* 413, 110, 157-D11 (1993)

On the Redshift–Apparent Size Diagram of Double Radio Sources. *K. Nilsson, M. J. Valtonen, J. Kotilainen, & T. Jaakkola.* 413, 453, 162-C1 (1993)

Induced Star Formation in a Radio Lobe of 3C 285? *Wil J. M. van Breugel & Arjun Dey.* 414, 563, 178-C3 (1993)

Millimeter and Submillimeter Continuum Emission from Early-Type Galaxies. *Michel Fich & Paul Hodge.* 415, 75, 186-A1 (1993)

The Highly Polarized Hidden Quasar IRAS 09104+4109: A Double-lobed Radio Source in a Rich Cluster. *Dean C. Hines & Beverley J. Wills.* 415, 82, 186-A10 (1993)

A Physical Model of the Infrared-to-Radio Correlation in Galaxies. *G. Helou & M. D. Bicay.* 415, 93, 186-B9 (1993)

Radio-selected BL Lacertae Objects and Some Correlations. *J. H. Fan, G. Z. Xie, J. J. Li, J. Liu, S. L. Wen, R. R. Huang, Z. M. Tang, & Y. J. Wang.* 415, 113, 186-D12 (1993)

Optical CCD Imaging of GHz-peaked-Spectrum Radio Sources. *C. Stanghellini, C. P. O'Dea, S. A. Baum, & E. Laurikainen.* 88, 1, 40-B1 (1993)

Statistics of QSO Broad Emission-Line Profiles. I. The C IV λ1549 Line and the λ1400 Feature. *Beverley J. Wills, M. S. Brotherton, D. Fang, Charles C. Steidel, & Wallace L. W. Sargent.* 415, 563, 194-G8 (1993)

3C 317: An Amorphous Radio Source in the Cooling Flow Cluster Abell 2052. *Jun-Hui Zhao, Dean M. Sumi, J. O. Burns, & Nebojsa Duric.* 416, 51, 201-F7 (1993)

Polarization of Compact Radio Sources. *C.-I. Björnsson.* 416, 104, 202-C11 (1993)

Superluminal Motion in the Large, Strongly Lobe-dominated Quasar 3C 47. *R. C. Vermeulen, R. A. Bernstein, D. H. Hough, & A. C. S. Readhead.* 417, 541, 226-A11 (1993)

Flux Density of Sagittarius A at $\lambda = 3$ Millimeters. *M. C. H. Wright & D. C. Backer.* 417, 560, 226-C8 (1993)

The Association of Faint Radio Sources with Fluctuations in the X-Ray Background. *T. T. Hamilton & D. J. Helfand.* 418, 55, 231-G1 (1993)

New Evidence for an Anisotropic Radiation Field in NGC 5252. *M. Almudena Prieto & Wolfram Freudling.* 418, 668, 240-G2 (1993)

Confusion Limits to the Measurement of the Sunyaev-Zel'dovich Effects in Clusters of Galaxies at Millimeter Wavelengths. *Marc L. Fischer & Andrew E. Lange.* 419, 433, 253-B8 (1993)

Kiloparsec-Scale Radio Emission in Seyfert Galaxies: Evidence for Starburst-driven Superwinds? *S. A. Baum, C. P. O'Dea, D. Dallacassa, A. G. de Bruyn, & A. Pedlar.* 419, 553, 254-F1 (1993)

The Clumpy Galaxy Markarian 297 and Its Supernova Activity. *Q. F. Yin.* 420, 152, 2-G6 (1994)

Infrared Observations of the $z = 3.8$ Radio Galaxy 4C 41.17, with the W. M. Keck Telescope. *James R. Graham, K. Matthews, B. T. Soifer, J. E. Nelson, W. Harrison, J. G. Jernigan, S. Lin, G. Neugebauer, G. Smith, & C. Ziomkowski.* 420, L5, 7-B1 (1994)

Extended and Compact X-Ray Emission in Powerful Radio Galaxies. *D. M. Worrall, C. R. Lawrence, T. J. Pearson, & A. C. S. Readhead.* 420, L17, 7-C11 (1994)

Bright Radio Continuum Emission from Star Formation in the Cores of Nearby Spiral Galaxies. *Jean L. Turner & Paul T. P. Ho.* 421, 122, 17-E7 (1994)

Relic Radio Emission in 3C 388. *Kurt Roettiger, Jack O. Burns, David A. Clarke, & Wayne A. Christiansen.* 421, L23, 21-F1 (1994)

On the Relationship between BL Lacertae Objects and Fanaroff-Riley I Radio Galaxies. *Geoffrey V. Bicknell.* 422, 542, 38-E8 (1994)

Stellar and Scattered Light in a Radio Galaxy at $z = 2.63$. *Andrea Cimatti, Sperello di Serego Alighieri, George B. Field, & Robert A. E. Fosbury.* 422, 562, 38-G1 (1994)

The Multifrequency Spectral Evolution of Blazar 3C 345 during the 1991 Outburst. *J. R. Webb, C. R. Shrader, T. J. Balonek, D. M. Crenshaw, D. Kazanas, S. Clements, A. G. Smith, A. D. Nair, R. J. Leacock, P. P. Gombola, A. Sadun, H. R. Miller, I. Robson, R. Fujimoto, F. Makino, T. Kii, H. Aller, M. Aller, P. Hughes, E. Valtaoja, H. Teräsranta, E. Salonen, M. Tornikoski, & W. Chism.* 422, 570, 38-G11 (1994)

Do Relativistic Electrons either Gain or Lose Energy, outside of Extragalactic Nuclei? *Lawrence Rudnick, Debora M. Katz-Stone, & Martha C. Anderson.* 90, 955, 15-F6 (1994)

Clumped X-Ray Emission around Radio Galaxies in Abell Clusters. *Jack O. Burns, George Rhee, Frazer N. Owen, & Jason Pinkney.* 423, 94, 47-C9 (1994)

Long-Term Hydrodynamical Simulations of Extragalactic Radio Jets. *Jagbir S. Hooda, Arun V. Mangalam, & Paul J. Wiita.* 423, 116, 47-E5 (1994)

Statistics of QSO Broad Emission-Line Profiles. II. The C IV λ1549, C III] λ1909, and Mg II λ2798 Lines. *M. S. Brotherton, Beverley J. Wills, Charles C. Steidel, & Wallace L. W. Sargent.* 423, 131, 47-F9 (1994)

Complex Radio Structure in the Peculiar Pair of Interacting Starburst Galaxies NGC 3395 and NGC 3396. *Zhen-Ping Huang, Qi-Feng Yin, William C. Saslaw, & David S. Heeschen.* 423, 614, 56-B5 (1994)

Compact Radio Sources in the Starburst Galaxy M82 and the $\Sigma - D$ Relation for Supernova Remnants. *Z. P. Huang, T. X. Thuan, R. A. Chevalier, J. J. Condon, & Q. F. Yin.* 424, 114, 63-D7 (1994)

Do the Compact Radio Sources in NGC 253 and M82 Fade over Time? *James S. Ulvestad & Robert R. J. Antonucci.* 424, L29, 69-D10 (1994)

Apparent Milliarcsecond Sizes of Active Galactic Nuclei and the Geometry of the Universe. *L. I. Gurvits.* 425, 442, 87-C1 (1994)

Evidence for Two Classes of Parsec-Scale Radio Double Source in Active Galactic Nuclei. *J. E. Conway, S. T. Myers, T. J. Pearson, A. C. S. Readhead, S. C. Unwin, & W. Xu.* 425, 568, 88-F10 (1994)

The Radio Counterpart to the Luminous X-Ray Supernova Remnant in NGC 6946. *Schuyler D. Van Dyk, Richard A. Sramek, Kurt W. Weiler, Scott D. Hyman, & Rachel E. Virden.* 425, L77, 94-D1 (1994)

An Optical Study of Compact Steep-Spectrum Radio Sources. I. The Spectroscopic Data. *Richard Gelderman & Mark Whittle.* 91, 491, 26-B1 (1994)

Surface Photometry of Low-Luminosity Radio Galaxies. *Lourdes de Juan, Luis Colina, & Ismael Pérez-Fournon.* 91, 507, 26-C5 (1994)

Cluster Evolution and Microwave Source Counts. *M. Markevitch, G. R. Blumenthal, W. Forman, C. Jones, & R. A. Sunyaev.* 426, 1, 96-B1 (1994)

Cosmology with Powerful Extended Radio Sources. *Ruth A. Daly.* 426, 38, 96-E5 (1994)

Equipartition Brightness Temperature and the Inverse Compton Catastrophe. *Anthony C. S. Readhead.* 426, 51, 96-F6 (1994)

Isolating the Physical Parameters of Synchrotron Sources. *Debora M. Katz-Stone & Lawrence Rudnick.* 426, 116, 97-E2 (1994)

Orientation Modeling of Radio Galaxy and Quasar Properties: Evidence for a Unified Model. *Matthew L. Lister, J. B. Hutchings, & Ann C. Gower.* 427, 125, 111-D13 (1994)

Multiple X-Ray Emission Components in Low-Power Radio Galaxies. *D. M. Worrall & M. Birkinshaw.* 427, 134, 111-E10 (1994)

Luminosity Evolution and Dust Effects in Distant Galaxies: Implications for the Observability of the Early Evolutionary Phases. *Alberto Franceschini, Paola Mazzei, Gianfranco De Zotti, & Luigi Danese.* 427, 140, 111-F4 (1994)

Radio-emitting Dust in the Free Electron Layer of Spiral Galaxies: Testing the Disk/Halo Interface. *A. Ferrara & R.-J. Dettmar.* 427, 155, 111-G7 (1994)

Energetic and Radiative Constraints on Highly Relativistic Jets. *Mitchell C. Begelman, Martin J. Rees, & Marek Sikora.* 429, L57, 157-G13 (1994)

Statistically Efficient Parallel Testing of the Friedmann and Chronometric Flux-Redshift Predictions in the Radio Band. *I. E. Segal, J. F. Nicoll, & E. Blackman.* 430, 63, 159-G1 (1994)

Discovery of a Nuclear Counterjet in NGC 1275: A New Way to Probe the Parsec-Scale Environment. *R. C. Vermeulen, A. C. S. Readhead, & D. C. Backer.* 430, L41, 165-F7 (1994)

Detection of a VLBI Counterjet in NGC 1275: A Possible Probe of the Parsec-Scale Accretion Region. *R. C. Walker, J. D. Romney, & J. M. Benson.* 430, L45, 165-F13 (1994)

Superluminal Motion Statistics and Cosmology. *R. C. Vermeulen & M. H. Cohen.* 430, 467, 167-E3 (1994)

The Properties of X-Ray–selected Active Galactic Nuclei. III. The Radio-quiet versus Radio-loud Samples. *Roberto Della Ceca, Giovanni Zamorani, Tommaso Maccacaro, Anna Wolter, Richard Griffiths, John T. Stocke, & Giancarlo Setti.* 430, 533, 168-D1 (1994)

A Summary of Extreme Scattering Events and a Descriptive Model. *R. Fiedler, B. Dennison, K. J. Johnston, E. B. Waltman, & R. S. Simon.* 430, 581, 169-A13 (1994)

Galactic Structures Associated with Extreme Scattering Events in the Radio Light Curves of NRAO 140, 0954+658, and 2352+495. *R. Fiedler, T. Pauls, K. J. Johnston, & B. Dennison.* 430, 595, 169-C1 (1994)

Relic Sources and Diffuse Cluster Radio Emission. *Oleg Goldshmidt & Yoel Rephaeli.* 431, 586, 185-G6 (1994)

Results of a Five-Year Program of Multifrequency Monitoring of Low-Frequency Variable Radio Sources. *K. J. Mitchell, Brian Dennison, J. J. Condon, Daniel R. Altschuler, H. E. Payne, S. L. O'Dell, & J. J. Broderick.* 93, 441, 48-F6 (1994)

Radio and X-Ray Observations of the Gamma-Ray Bright Quasar PKS 0528+134. *Yun Fei Zhang, Alan P. Marscher, Hugh D. Aller, Margo F. Aller, Harri Teräsranta, & Esko Valtaoja.* 432, 91, 194-D1 (1994)

Inverse-Compton X-Ray Emission from the Superluminal Quasar 3C 345. *S. C. Unwin, A. E. Wehrle, C. M. Urry, D. M. Gilmore, E. J. Barton, B. C. Kjerulf, J. A. Zensus, & C. R. Rabaça.* 432, 103, 194-E1 (1994)

Gravitational Lensing and Superluminal Motions in Quasars: The Linear Approximation. *J. A. Muñoz & M. Portilla.* 432, 448, 201-D13 (1994)

Compact Radio Cores in Seyfert Galaxies. *A. L. Roy, R. P. Norris, M. J. Kesteven, E. R. Troup, & J. E. Reynolds.* 432, 496, 202-B7 (1994)

The Distribution and Nature of Star Formation Regions in NGC 1792. *Michael Dahlem, Dominik J. Bomans, & Jean-Marie Will.* 432, 590, 203-C10 (1994)

Radiative Excitation of Molecules near Powerful Compact Radio Sources. *Philip R. Maloney, Mitchell C. Begelman, & Martin J. Rees.* 432, 606, 203-E3 (1994)

Two-sided Ejection in Powerful Radio Sources: The Compact Symmetric Objects. *P. N. Wilkinson, A. G. Polatidis, A. C. S. Readhead, W. Xu, & T. J. Pearson.* 432, L87, 206-E4 (1994)

Luminosity Functions of BL Lacertae Objects. *Anna Wolter, Alessandro Caccianiga, Roberto Della Ceca, & Tommaso Maccacaro.* 433, 29, 208-E6 (1994)

Emergence of Double-peaked Emission Lines in the Broad-Line Radio Galaxy Pictor A. *Jules P. Halpern & Michael Eracleous.* 433, L17, 214-F5 (1994)

Radio Observations of M83 and Its Supernova Remnants. *John J. Cowan, Douglas A. Roberts, & David Branch.* 434, 128, 226-G10 (1994)

The Cosmic X-Ray Background–*IRAS* Galaxy Correlation and the Local X-Ray Volume Emissivity. *Takamitsu Miyaji, Ofer Lahav, Keith Jahoda, & Elihu Boldt.* 434, 424, 233-E9 (1994)

Simultaneous Synchrotron and Adiabatic Effects in Multiply Shocked Jets in Extended Extragalactic Radio Sources. *Ifeanyi E. Ekejiuba, Paul J. Wiita, & Richard A. Frazin.* 434, 503, 234-F1 (1994)

VLBI Observations of a Complete Sample of Radio Galaxies. IV. The Radio Galaxies NGC 2484, 3C 109, and 3C 382. *G. Giovannini, L. Feretti, T. Venturi, L. Lara, J. Marcaide, M. Rioja, S. R. Spangler, & A. E. Wehrle.* 435, 116, 245-A1 (1994)

Unusual Evolution in the VLBI Structure of 0735+178. *D. C. Gabuzda, J. F. C. Wardle, D. H. Roberts, M. F. Aller, & H. D. Aller.* 435, 128, 245-B3 (1994)

Evolution of the Millarcsecond Total Intensity and Polarization Structures of BL Lacertae Objects. *D. C. Gabuzda, C. M. Mullan, T. V. Cawthorne, J. F. C. Wardle, & D. H. Roberts.* 435, 140, 245-C5 (1994)

Why Do Head-Tail Sources Exist in Poor Clusters of Galaxies? *T. C. A. Venkatesan, David J. Batuski, Robert J. Hanisch, & Jack O. Burns.* 436, 67, 262-B8 (1994)

A Unified Relativistic Beaming Model for BL Lacertae Objects and Flat Spectrum Radio Quasars. *Laura Maraschi & Fausto Rovetti.* 436, 79, 262-C13 (1994)

The Radio Emission from the Ultraluminous Far-Infrared Galaxy NGC 6240. *Edward J. M. Colbert, Andrew S. Wilson, & Jonathan Bland-Hawthorn.* 436, 89, 262-D12 (1994)

Slingshot Ejections from Clusters of Three and Four Black Holes. *M. J. Valtonen, S. Mikkola, P. Heinämäki, & H. Valtonen.* 95, 69, 65-B1 (1994)

The Evolutionary Unified Scheme. I. Quasars and Radio Galaxies in the Viewing Angle–Redshift Plane. *F. Vagnetti & R. Spera.* 436, 611, 274-A4 (1994)

VLA Observations of the Rich X-Ray Cluster Abell 2256. *H. Röttgering, I. Snellen, G. Miley, J. P. de Jong, R. J. Hanisch, & R. Perley.* 436, 654, 274-E4 (1994)

Multifrequency Observations of Blazars. V. Long-Term Millimeter, Submillimeter, and Infrared Monitoring. *J. A. Stevens, S. J. Litchfield, E. I. Robson, D. H. Hughes, W. K. Gear, H. Teräsranta, E. Valtaoja, & M. Tornikoski.* 437, 91, 284-F1 (1994)

The Second Caltech–Jodrell Bank VLBI Survey. I. Observations of 91 of 193 Sources. *G. B. Taylor, R. C. Vermeulen, T. J. Pearson, A. C. S. Readhead, D. R. Henstock, I. W. A. Browne, & P. N. Wilkinson.* 95, 345, 69-B1 (1994)

The Difference between Radio-loud and Radio-quiet Active Galaxies. *A. S. Wilson & E. J. M. Colbert.* 438, 62, 2-B10 (1995)

Multiwavelength Monitoring of the BL Lacertae Object PKS 2155−304. IV. Multiwavelength Analysis. *R. Edelson, J. Krolik, G. Madejski, L. Maraschi, G. Pike, C. M. Urry, W. Brinkmann, T. J.-L. Courvoisier, J. Ellithorpe, K. Horne, A. Treves, S. Wagner, W. Wamsteker, R. Warwick, H. D. Aller, M. F. Aller, M. Ashley, A. Blecha, P. Bouchet, P. Bratschi, J. N. Bregman, M. Carini, A. Celotti, M. Donahue, E. Feigelson, A. V. Filippenko, H. Fink, I. George, I. Glass, J. Heidt, J. Hewitt, P. Hughes, R. Kollgaard, Y. Kondo, A. Koratkar, K. Leighly, A. Marscher, P. G. Martin, T. Matheson, H. R. Miller, J. C. Noble, P. O'Brien, E. Pian, G. Reichert, J. M. Saken, J. M. Shull, M. Sitko, P. S. Smith, W.-H. Sun, & G. Tagliaferri.* 438, 120, 3-A4 (1995)

Ultraluminous Infrared Galaxies and the Radio-optical Correlation for Quasars. *Carol J. Lonsdale, Harding E. Smith, & Colin J. Lonsdale.* 438, 632, 12-G8 (1995)

The Spectral Energy Distribution of the $z = 3$ Quasar: HS 1946+7658. *O. Kuhn, J. Bechtold, R. Cutri, M. Elvis, & M. Rieke.* 438, 643, 13-A8 (1995)

Keck Observations of the Most Distant Galaxy: 8C 1435+63 at $z = 4.25$. *Hyron Spinrad, Arjun Dey, & James R. Graham.* 438, L51, 19-B1 (1995)

A Helical Jet in the Orthogonally Misaligned BL Lacertae Object Markarian 501 (B1652+398). *J. E. Conway & J. M. Wrobel.* 439, 98, 22-E3 (1995)

Very Hot Ionized Material in Sagittarius B2 F. *David M. Mehringer, C. G. De Pree, Ralph A. Gaume, W. M. Goss, & Mark J. Claussen.* 442, L29, 85-A5 (1995)

The Parsec-Scale Jet in Quasar 3C 345. *J. Anton Zensus, Marshall H. Cohen, & Stephen C. Unwin.* 443, 35, 95-F9 (1995)

The Nature of the Stellar Continuum in the Radio Galaxy 3C 65. *Alan Stockton, Melinda Kellogg, & Susan E. Ridgway.* 443, L69, 111-F9 (1995)

Star Formation Activity in Spiral Galaxy Disks and the Properties of Radio Halos: Observational Evidence for a Direct Dependence. *Michael Dahlem, Ute Lisenfeld, & Götz Golla.* 444, 119, 115-A3 (1995)

New Superluminal Quasar 1633+382 and the Blazar–Gamma-Ray Connection. *P. D. Barthel, J. E. Conway, S. T. Myers, T. J. Pearson, & A. C. S. Readhead.* 444, L21, 121-D8 (1995)

Time Delay in the Einstein Ring PKS 1830−211. *T. D. van Ommen, D. L. Jones, R. A. Preston, & D. L. Jauncey.* 444, 561, 124-B7 (1995)

The Connection between X-Ray– and Radio-selected BL Lacertae Objects. *Paolo Padovani & Paolo Giommi.* 444, 567, 124-C2 (1995)

Radio Properties of Optically Selected Quasars. *Eric J. Hooper, Chris D. Impey, Craig B. Foltz, & Paul C. Hewett.* 445, 62, 133-C3 (1995)

The First Caltech–Jodrell Bank VLBI Survey. I. $\lambda = 18$ Centimeter Observations of 87 Sources. *A. G. Polatidis, P. N. Wilkinson, W. Xu, A. C. S. Readhead, T. J. Pearson, G. B. Taylor, & R. C. Vermeulen.* 98, 1, 21-B1 (1995)

The First Caltech–Jodrell Bank VLBI Survey. II. $\lambda = 18$ Centimeter Observations of 25 Sources. *D. D. Thakkar, W. Xu, A. C. S. Readhead, T. J. Pearson, G. B. Taylor, R. C. Vermeulen, A. G. Polatidis, & P. N. Wilkinson.* 98, 33, 21-D8 (1995)

The Spatial Variation of the Infrared-to-Radio Ratio in Spiral Galaxies. *K. A. Marsh & G. Helou.* 445, 599, 143-C9 (1995)

The Nature of Radio Emission in QSO 1821+643, A Radio-quiet Quasar with Radio-loud Properties. *Padeli P. Papadopoulos, E. R. Seaquist, J. M. Wrobel, & L. Binette.* 446, 150, 155-C1 (1995)

Evidence for an On-going Cluster/Group Merger in Abell 2255. *Jack O. Burns, Kurt Roettiger, Jason Pinkney, Rick A. Perley, Frazer N. Owen, & Wolfgang Voges.* 446, 583, 164-B8 (1995)

Radio Detection of a Double Nucleus in the Merging Galaxy NGC 3256. *R. P. Norris & Duncan A. Forbes.* 446, 594, 164-C8 (1995)

A Multifrequency Radio Continuum and *IRAS* Faint Source Survey of Markarian Galaxies. *M. D. Bicay, G. Kojoian, J. Seal, D. F. Dickinson, & M. A. Malkan.* 98, 369, 28-B1 (1995)

The Mass Distribution of the Lens Galaxy in MG 1131+0456. *G. H. Chen, C. S. Kochanek, & J. N. Hewitt.* 447, 62, 173-A13 (1995)

Comparison of the Radio, Optical, and X-Ray Structures of the cD Galaxy in Abell 2597. *Craig L. Sarazin, Jack O. Burns, Kurt Roettiger, & Brian R. McNamara.* 447, 559, 183-D13 (1995)

The *Hubble Space Telescope* Sample of Radio-loud Quasars: The Lyα/Hβ Ratio. *Hagai Netzer, M. S. Brotherton, Beverley J. Wills, Mingsheng Han, D. Wills, J. A. Baldwin, G. J. Ferland, & I. W. A. Browne.* 448, 27, 192-E10 (1995)

Two-Point Angular Correlation Function for the Green Bank 4.85 GHz Sky Survey. *Brian L. Kooiman, Jack O. Burns, & Anatoly A. Klypin.* 448, 500, 201-E10 (1995)

On the FR I/FR II Dichotomy in Powerful Radio Sources: Analysis of Their Emission-Line and Radio Luminosities. *Esther L. Zirbel & Stefi A. Baum.* 448, 548, 202-A1 (1995)

Collisions of Ellipticals and the Onset of Fanaroff-Riley Type I Radio Sources. *Luis Colina & Lourdes de Juan.* 448, 548, 202-C4 (1995)

Constraints on the Parsec-Scale Environment in NGC 1275. *A. Levinson, A. Laor, & R. C. Vermeulen.* 448, 589, 202-G4 (1995)

Discovery of Inverse-Compton X-Rays in Radio Lobes. *E. D. Feigelson, S. A. Laurent-Muehleisen, R. I. Kollgaard, & E. B. Fomalont.* 449, L149, 227-E6 (1995)

The First Caltech–Jodrell Bank VLBI Survey. III. VLBI and MERLIN Observations at 5 GHz and VLA Observations at 1.4 GHz. *W. Xu, A. C. S. Readhead, T. J. Pearson, A. G. Polatidis, & P. N. Wilkinson.* 99, 297, 39-B1 (1995)

VLA Maps of Radio Galaxies to $z = 1$. *S. G. Neff, L. Roberts, & J. B. Hutchings.* 99, 349, 39-F1 (1995)

Discovery of an Optical Synchrotron Jet in 3C 78. *William B. Sparks, Daniel Golombek, Stefi A. Baum, John Biretta, Sigrid de Koff, Ferdinando Macchetto, Patrick McCarthy, & George K. Miley.* 450, L55, 244-F1 (1995)

The Linear-Size Evolution of Classical Double Radio Sources. *Mark J. Neeser, Stephen A. Eales, J. Duncan Law-Green, J. Patrick Leahy, & Steve Rawlings.* 451, 76, 247-B12 (1995)

Toward Understanding the Fanaroff-Riley Dichotomy in Radio Source Morphology and Power. *Stefi A. Baum, Esther L. Zirbel, & Christopher P. O'Dea.* 451, 88, 247-C13 (1995)

Unusual Radio Structures in the Cooling Flow Cluster 2A 0335+096. *Craig L. Sarazin, Stefi A. Baum, & Christopher P. O'Dea.* 451, 125, 247-G4 (1995)

The Second Caltech–Jodrell Bank VLBI Survey. II. Observations of 102 of 193 Sources. *D. R. Henstock, I. W. A. Browne, P. N. Wilkinson, G. B. Taylor, R. C. Vermeulen, T. J. Pearson, & A. C. S. Readhead.* 100, 1, 46-B1 (1995)

The Examination of Optical Microvariability in Radio-quiet and Radio-loud Quasi-stellar Objects. *Minhwan Jang & H. Richard Miller.* 452, 582, 272-F1 (1995)

VLBI Observations of a Complete Sample of Radio Galaxies. V. 3C 346 and 4C 31.04: Two Unusual Compact Steep Spectrum Sources. *W. D. Cotton, L. Feretti, G. Giovannini, T. Venturi, L. Lara, J. Marcaide, & A. E. Wehrle.* 452, 605, 273-A6 (1995)

The Interaction between Spiral Galaxies IC 2163 and NGC 2207. I. Observations. *Debra Meloy Elmegreen, Michele Kaufman, Elias Brinks, Bruce G. Elmegreen, & Maria Sundin.* 453, 100, 282-E8 (1995)

The Interaction between Spiral Galaxies IC 2163 and NGC 2207. II. Models. *Bruce G. Elmegreen, Maria Sundin, Michele Kaufman, Elias Brinks, & Debra Meloy Elmegreen.* 453, 139, 283-B2 (1995)

Detection of Inverse-Compton X-Rays from Lobes of the Radio Galaxy Fornax A. *H. Kaneda, M. Tashiro, Y. Ikebe, Y. Ishisaki, H. Kubo, K. Makishima, T. Ohashi, Y. Saito, H. Tabara, & T. Takahashi.* 453, L13, 289-D1 (1995)

Radio and Emission-Line Jets in the Type 2 Seyfert Galaxy Markarian 1066 (UGC 2456). *Gary Bower, Andrew Wilson, Jon A. Morse, Richard Gelderman, Mark Whittle, & John Mulchaey.* 454, 106, 300-F4 (1995)

Powerful Extended Radio Sources as Tools to Estimate Ambient Gas Densities, Jet Luminosities, and Other Key Physical Parameters. *Ruth A. Daly.* 454, 580, 309-E1 (1995)

VLBI Observations of a Complete Sample of Radio Galaxies. VI. The Two FR I Radio Galaxies B2 0836+29 and 3C 465. *T. Venturi, C. Castaldini, W. D. Cotton, L. Feretti, G. Giovannini, L. Lara, J. M. Marcaide, & A. E. Wehrle.* 454, 735, 311-G7 (1995)

Detection of Extended Polarized Ultraviolet Radiation from the $z = 1.82$ Radio Galaxy 3C 256. *Buell T. Jannuzi, Richard Elston, Gary D. Schmidt, Paul S. Smith, & H. S. Stockman.* 454, L111, 316-A1 (1995)

Identification and Spectroscopy of Radio Sources from the B3VLA Survey. *S. G. Djorgovski, D. Thompson, L. Maxfield, M. Vigotti, & G. Grueff.* 101, 255, 57-B1 (1995)

RADIO CONTINUUM: GENERAL

A New Catalog of 30,239 1.4 GHz Sources. *Richard L. White & Robert H. Becker.* 79, 331, 18-G9 (1992)

Identification and Spectroscopy of Radio Sources from the Third Bologna Survey. *D. J. Thompson, S. Djorgovski, M. Vigotti, & G. Grueff.* 81, 1, 35-B1 (1992)

A Direct Gravitational Lensing Test for 10^6 $M_\odot$ Black Holes in Halos of Galaxies. *Joachim Wambsganss & Bohdan Paczyński.* 397, L1, 173-A8 (1992)

Electron Injection in Collisionless Shocks. *Amir Levinson.* 401, 73, 222-A1 (1992)

Limits on the Anisotropy of the Microwave Background Radiation on Arcminute Scales. II. The Ring Experiment. *S. T. Myers, A. C. S. Readhead, & C. R. Lawrence.* 405, 8, 41-B11 (1993)

Further Radio Investigations of Gravitational Lensing in MG 0414+0534. *C. A. Katz & J. N. Hewitt.* 409, L9, 104-B11 (1993)

Radio Transients from Gamma-Ray Bursters. *Bohdan Paczyński & James E. Rhoads.* 418, L5, 238-B1 (1993)

The Parkes-MIT-NRAO (PMN) Map Catalog of Radio Sources Covering $-88° < \delta < -37°$ at 4.85 GHz. *P. C. Gregory, J. D. Vavasour, W. K. Scott, & J. J. Condon.* 90, 173, 3-B12 (1994)

The Parkes-MIT-NRAO (PMN) Surveys. III. Source Catalog for the Tropical Survey ($-29° < \delta < -9.5°$). *Mark R. Griffith, Alan E. Wright, B. F. Burke, & R. D. Ekers.* 90, 179, 3-C6 (1994)

Electron Acceleration in Short-lived Radio Transients. *Lewis Ball.* 90, 889, 14-G4 (1994)

Separation of Foreground Radiation from Cosmic Microwave Background Anisotropy Using Multifrequency Measurements. *W. N. Brandt, C. R. Lawrence, A. C. S. Readhead, J. N. Pakianathan, & T. M. Fiola.* 424, 1, 62-A12 (1994)

The Parkes-MIT-NRAO (PMN) Surveys. II. Source Catalog for the Southern Survey ($-87.5° < \delta < -37°$). *Alan E. Wright, Mark R. Griffith, B. F. Burke, & R. D. Ekers.* 91, 111, 18-E13 (1994)

Absolute Measurement of the Cosmic Microwave Background at 2 GHz. *M. Bersanelli, M. Bensadoun, G. De Amici, S. Levin, M. Limon, G. F. Smoot, & W. Vinje.* 424, 517, 71-B5 (1994)

Cosmology with Powerful Extended Radio Sources. *Ruth A. Daly.* 426, 38, 96-E5 (1994)

A Sensitive 1.5 GHz Radio Survey around the North Ecliptic Pole. *Ronald I. Kollgaard, Wolfgang Brinkmann, Margaret McMath Chester, Eric D. Feigelson, Paul Hertz, Patricia Reich, & Richard Wielebinski.* 93, 145, 43-F10 (1994)

Giant Explosion at the Galactic Center and Huge Shocked Shells in the Halo. *Yoshiaki Sofue.* 431, L91, 191-E8 (1994)

Search for Unresolved Sources in the *COBE*-DMR Two-Year Sky Maps. *A. Kogut, A. J. Banday, C. L. Bennett, G. Hinshaw, K. Loewenstein, P. Lubin, G. F. Smoot, & E. L. Wright.* 433, 435, 216-D1 (1994)

A Sample of Gigahertz Peaked Spectrum Candidate Radio Sources Located South of $\delta = -9.5°$. *J. C. Cersosimo, M. Lebron Santos, S. I. Cintrón, & Z. M. Quiniento.* 95, 157, 66-C1 (1994)

A Search for the Radio Counterpart to the 1994 March 1 Gamma-Ray Burst. *D. A. Frail, S. R. Kulkarni, K. C. Hurley, G. J. Fishman, C. Kouveliotou, C. A. Meegan, M. Sommer, M. Boer, M. Niel, & T. Cline.* 437, L43, 291-G6 (1994)

The Parkes-MIT-NRAO (PMN) Surveys. VI. Source Catalog for the Equatorial Survey ($-9.5° < \delta < +10.0°$). *Mark R. Griffith, Alan E. Wright, B. F. Burke, & R. D. Ekers.* 97, 347, 16-D11 (1995)

The Weakening of the Termination Shocks of Isothermal Winds by Mass Loading. *R. J. R. Williams, T. W. Hartquist, & J. E. Dyson.* 446, 759, 166-E4 (1995)

An Improved Measure of Quasar Orientation. *Beverley J. Wills & M. S. Brotherton.* 448, L81, 209-A1 (1995)

The FIRST Survey: Faint Images of the Radio Sky at Twenty Centimeters. *Robert H. Becker, Richard L. White, & David J. Helfand.* 450, 559, 238-D12 (1995)

Directions for Future X-Ray, Optical, and Radio Follow-up Observations of Gamma-Ray Burst Counterparts. *B. J. McNamara, T. E. Harrison, & C. L. Williams.* 452, L25, 269-F6 (1995)

RADIO CONTINUUM: INTERSTELLAR

Gravitational Lensing by a Massive Black Hole at the Galactic Center. *Mark Wardle & Farhad Yusef-Zadeh.* 387, L65, 48-C1 (1992)

Galactic Worms. I. Catalog of Worm Candidates. *Bon-Chul Koo, Carl Heiles, & William T. Reach.* 390, 108, 75-D6 (1992)

The Optical Emission-Line Background and Accompanying Emissions at Ultraviolet, Infrared, and Millimeter Wavelengths. *R. J. Reynolds.* 392, L35, 106-E1 (1992)

Activity and Radio Spectral Index Variations near the Center of the Crab Nebula. *M. F. Bietenholz & P. P. Kronberg.* 393, 206, 116-F1 (1992)

Riddle and Puzzle of the Optical Region S122 = 2306+1439. *J. P. Vallée & A. G. de Bruyn.* 393, 674, 124-B10 (1992)

Radio Continuum from the Powering Sources of the RNO 43, Haro 4-255 FIR, B335, and PV Cephei Outflows and from the Herbig-Haro Object 32A. *G. Anglada, L. F. Rodríguez, J. Cantó, R. Estalella, & J. M. Torrelles.* 395, 494, 148-G1 (1992)

An *IRAS* Survey of Galactic Supernova Remnants. *Jon M. Saken, Robert A. Fesen, & J. Michael Shull.* 81, 715, 45-F9 (1992)

Electron Acceleration in Tycho's and Kepler's Supernova Remnants: Spectral Evidence of Fermi Shock Acceleration. *Stephen P. Reynolds & Donald C. Ellison.* 399, L75, 201-B1 (1992)

A Surface Brightness Correlation between Carbon Monoxide and Nonthermal Radio Continuum Emission in the Galaxy. *R. J. Allen.* 399, 573, 205-A5 (1992)

Radio Continuum and Radio Recombination Line Observations of Sagittarius B1 and G0.6−0.0. *David M. Mehringer, F. Yusef-Zadeh, Patrick Palmer, & W. M. Goss.* 401, 168, 223-B1 (1992)

The Radio Counterpart of the Hard X-Ray Source GRS 1758−258. *L. F. Rodríguez, I. F. Mirabel, & J. Martí.* 401, L15, 227-C1 (1992)

608 MHz VLBI Observations of the Compact Double Radio Source 2050+364: Constraints on Interstellar Scattering. *Alan L. Fey & Robert L. Mutel.* 404, 197, 30-D1 (1993)

Spatial Spectral Index Variations in Galactic Shell Supernova Remnants G39.2−0.3 and G41.1−0.3. *Martha C. Anderson & Lawrence Rudnick.* 408, 514, 91-E9 (1993)

Deep VLA Imaging of Pulsar-powered Nebulae and the Beaming Fraction of Young Pulsars. *Dale A. Frail & David A. Moffett.* 408, 637, 93-B5 (1993)

Further Studies on the Champagne Phase of GM 24 (IRAS 17136−3617). *J. F. Gómez, J. M. Torrelles, M. Tapia, Y. Gómez, L. F. Rodríguez, M. Roth, & P. T. P. Ho.* 409, 269, 100-D10 (1993)

Radio and X-Ray Observations of OH 231.8+4.2. *Gregory B. Taylor & Mark Morris.* 409, 720, 108-A9 (1993)

A VLA Survey of Optically Visible Galactic H II Regions. *Michel Fich.* 86, 475, 20-F7 (1993)

The Radio Structure of Supernova Remnant 0540−693. *R. N. Manchester, L. Staveley-Smith, & M. J. Kesteven.* 411, 756, 139-B8 (1993)

Radio Continuum and Radio Recombination Line Observations of Sagittarius B2. *David M. Mehringer, Patrick Palmer, W. M. Goss, & F. Yusef-Zadeh.* 412, 684, 152-C11 (1993)

The Triple Radio Continuum Source in Serpens: The Birth of a Herbig-Haro System? *S. Curiel, L. F. Rodríguez, J. M. Moran, & J. Cantó.* 415, 191, 187-D5 (1993)

Further Observations of the Peculiar Galactic Radio Source G318.9+0.4. *Jonathan B. Z. Whiteoak.* 415, 701, 196-E3 (1993)

HH 80–81: A Highly Collimated Herbig-Haro Complex Powered by a Massive Young Star. *J. Martí, L. F. Rodríguez, & B. Reipurth.* 416, 208, 203-F1 (1993)

High-Resolution Centimeter Radio Continuum and Ammonia Maser Observations of the W51 Region of Star Formation. *R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 417, 645, 227-D1 (1993)

VLA Radio Recombination Line Observations of Ionized Gas in the -30 Kilometers per Second Molecular Cloud (G0.04+0.03) near the Galactic Center. I. The Discrete Radio Sources. *Jun-Hui Zhao, K. Desai, W. M. Goss, & F. Yusef-Zadeh.* 418, 235, 234-A1 (1993)

VLA Observations of Strong *IRAS* Point Sources Associated with Compact H II Regions. *Guido Garay, Luis F. Rodríguez, James M. Moran, & Ed Churchwell.* 418, 368, 235-E11 (1993)

The Discovery of a Supernova Remnant Embedded in a Giant H II Region of M33. *Shawn M. Gordon, Robert P. Kirshner, Nebojsa Duric, & Knox S. Long.* 418, 743, 241-F10 (1993)

Interstellar Magnetic Bubbles. *J. P. Vallée.* 419, 670, 256-A12 (1993)

The 150 AU Structure of the Radio Continuum and the Ammonia Bipolar Outflow in CRL 618. *Jesús Martín-Pintado, Ralph Gaume, Rafael Bachiller, & Ken Johnson.* 419, 725, 256-F4 (1993)

RADIO CONTINUUM: ISM

The Structure and Nature of NGC 2071 IRS 1: High-Resolution Radio Continuum Maps. *Howard A. Smith & Sara C. Beck.* 420, 643, 10-F7 (1994)

A Radio Candidate for the Exciting Source of the L1287 Bipolar Outflow. *Guillem Anglada, Luis F. Rodríguez, José M. Girart, Robert Estalella, & José M. Torrelles.* 420, L91, 15-F7 (1994)

Radio Emission from SNR 1987A. *J. G. Kirk, P. Duffy, & Lewis Ball.* 90, 807, 13-F13 (1994)

The W3 IRS 5 Cluster: Radio Continuum and Water Maser Observations. *M. J. Claussen, R. A. Gaume, K. J. Johnston, & T. L. Wilson.* 424, L41, 69-E13 (1994)

Multifrequency Studies of Bright Radio Supernova Remnants. I. 3C 391. *David A. Moffett & Stephen P. Reynolds.* 425, 668, 90-A1 (1994)

The Radio Counterpart to the Luminous X-Ray Supernova Remnant in NGC 6946. *Schuyler D. Van Dyk, Richard A. Sramek, Kurt W. Weiler, Scott D. Hyman, & Rachel E. Virden.* 425, L77, 94-D1 (1994)

Ultracompact H II Regions. II. New High-Resolution Radio Images. *S. Kurtz, E. Churchwell, & D. O. S. Wood.* 91, 659, 28-D1 (1994)

Radio Continuum and Radio Recombination Line Observations of W51. *David M. Mehringer.* 91, 713, 29-A2 (1994)

Radio Continuum, Ammonia, and Water Maser Observations of Bright, Unassociated *IRAS* Point Sources. *Mari Paz Miralles, Luis F. Rodríguez, & Eugenio Scalise.* 92, 173, 33-F3 (1994)

An Analysis of *IRAS*-identified H II Regions and Their Radio Properties. *V. A. Hughes & G. C. MacLeod.* 427, 857, 123-C11 (1994)

Subarcsecond VLA Maps of the Disk and the Jet in HL Tauri. *L. F. Rodríguez, J. Cantó, J. M. Torrelles, J. F. Gómez, G. Anglada, & P. T. P. Ho.* 427, L103, 127-C3 (1994)

Multiwavelength Approach to Gamma-Ray Sources in the Galactic Center Region. *I. F. Mirabel.* 92, 369, 36-F12 (1994)

High-Resolution Images of the Dust and Ionized Gas Distribution in the Carina Nebula. *Jonathan B. Z. Whiteoak.* 429, 225, 146-G7 (1994)

Survey of Local CO Emission toward Compact Extragalactic Millimeter-Wave Continuum Sources and Implications for Local Galactic Structure. *Harvey S. Liszt.* 429, 638, 153-F3 (1994)

Ammonia Downstream from HH 80 North. *José M. Girart, Luis F. Rodriíguez, Guillem Anglada, Robert Estalella, José M. Torrelles, Josep Martí, Miriam Peña, Sandra Ayala, Salvador Curiel, & Alberto Noriega-Crespo.* 435, L145, 260-D4 (1994)

Multifrequency Studies of Bright Radio Supernova Remnants. II. W49B. *David A. Moffett & Stephen P. Reynolds.* 437, 705, 295-D9 (1994)

The Radio Lifetime of Supernova Remnants and the Distribution of Pulsar Velocities at Birth. *D. A. Frail, W. M. Goss, & J. B. Z. Whiteoak.* 437, 781, 296-D2 (1994)

Radio and *IRAS* Observations of Two Nebulae around WO Stars: G2.4+1.4 in the Galaxy and Sandage H II Region 3 in IC 1613. *W. M. Goss & Tatiana A. Lozinskaya.* 439, 637, 33-B8 (1995)

The Polarization and Depolarization of Radio Emission from Supernova Remnant Cassiopeia A. *M. C. Anderson, J. W. Keohane, & L. Rudnick.* 441, 300, 63-D7 (1995)

Influence of Galactic Dust on the Accuracy of Cosmic Microwave Anisotropy Measurements. *Gianfranco Guarini, Bianca Melchiorri, & Francesco Melchiorri.* 442, 23, 77-E1 (1995)

Electron Density Power Spectrum in the Local Interstellar Medium. *J. W. Armstrong, B. J. Rickett, & S. R. Spangler.* 443, 209, 98-A6 (1995)

Time Variations of H_2O Maser Emission at W31A and W75S. *E. E. Lekht, E. Mendoza-Torres, & R. L. Sorochenko.* 443, 222, 98-B8 (1995)

Synchrotron Emission from the H_2O Maser Source in W3(OH). *M. J. Reid, A. L. Argon, C. R. Masson, K. M. Menten, & J. M. Moran.* 443, 238, 98-D3 (1995)

Measurements of the Millimeter-Wave Spectrum of Interstellar Dust Emission. *M. L. Fischer, A. Clapp, M. Devlin, J. O. Gundersen, A. E. Lange, P. M. Lubin, P. R. Meinhold, P. L. Richards, & G. F. Smoot.* 444, 226, 116-E7 (1995)

The Relativistic ISM in M33: Role of the Supernova Remnants. *N. Duric, S. M. Gordon, W. M. Goss, F. Viallefond, & C. Lacey.* 445, 173, 134-G8 (1995)

The Disruption of the Dense Disk in CRL 618. *Jesús Martín-Pintado, Ralph A. Gaume, Kenneth J. Johnston, & Rafael Bachiller.* 446, 687, 165-E4 (1995)

ROSAT Observations of the Supernova Remnant W51C. *Bon-Chul Koo, Kee-Tae Kim, & Frederick D. Seward.* 447, 211, 175-B8 (1995)

Multifrequency Radio Studies of G359.1−00.2. *Andrew D. Gray, Jenniger Nicholls, Ron D. Ekers, & Lawrence E. Cram.* 448, 164, 194-D4 (1995)

Large Proper Motions and Ejection of New Condensations in the HH 80–81 Thermal Radio Jet. *J. Martí, L. F. Rodríguez, & Bo Reipurth.* 449, 184, 212-F6 (1995)

The Sagittarius B2 Star-forming Region. I. Sensitive 1.3 Centimeter Continuum Observations. *R. A. Gaume, M. J. Claussen, C. G. De Pree, W. M. Goss, & D. M. Mehringer.* 449, 663, 221-G5 (1995)

Far-Infrared Spectral Observations of the Galaxy by *COBE*. *W. T. Reach, E. Dwek, D. J. Fixsen, T. Hewagama, J. C. Mather, R. A. Shafer, A. J. Banday, C. L. Bennett, E. S. Cheng, R. E. Eplee, Jr., D. Leisawitz, P. M. Lubin, S. M. Read, L. P. Rosen, F. G. D. Shuman, G. F. Smoot, T. J. Sodroski, & E. L. Wright.* 451, 188, 248-E10 (1995)

ARGO 1993 Observations of Interstellar Dust Emission. *S. Masi, E. Aquilini, A. Boscaleri, P. de Bernardis, M. De Petris, M. Gervasi, L. Martinis, V. Natale, P. Palumbo, & F. Scaramuzzi.* 452, 253, 265-E9 (1995)

Constraints on Circumstellar Disk Masses in the Trapezium Cluster. *Lee G. Mundy, Leslie W. Looney, & Elizabeth A. Lada.* 452, L137, 280-D12 (1995)

The Continuum Structure of 11 Galactic H II Regions. *Dana S. Balser, T. M. Bania, Robert T. Rood, & T. L. Wilson.* 100, 371, 51-C6 (1995)

Near-Infrared and Very High Sensitivity VLA 2 Centimeter Continuum Observations of the H II Region G29.96−0.02. *Alan L. Fey, Ralph A. Gaume, Mark J. Claussen, & Frederick J. Vrba.* 453, 308, 285-C14 (1995)

Radio Continuum Detection of the Exciting Sources of the DG Tauri B and L1551NE Outflows. *Luis F. Rodríguez, Guillem Anglada, & Alejandro Raga.* 454, L149, 316-F5 (1995)

Evidence for Thermal Absorption inside Cassiopeia A. *N. E. Kassim, R. A. Perley, K. S. Dwarakanath, & W. C. Erickson.* 455, L59, 325-C8 (1995)

RADIO CONTINUUM: SOLAR SYSTEM

Subsurface Emissions from Mercury: VLA Radio Observations at 2 and 6 Centimeters. *Michael J. Ledlow, Jack O. Burns, Galen R. Gisler, Jun-Hui Zhao, Michael Zeilik, & Daniel N. Baker.* 384, 640, 10-B1 (1992)

Detection of Fundamental and Harmonic Type III Radio Emission and the Associated Langmuir Waves at the Source Region. *M. J. Reiner, R. G. Stone, & J. Fainberg.* 394, 340, 132-B12 (1992)

Jupiter Radio Bursts and Particle Acceleration. *Michael D. Desch.* 90, 541, 10-D10 (1994)

RADIO CONTINUUM: STARS

A VLA 3.6 Centimeter Survey of N-Type Carbon Stars. *Donald G. Luttermoser & Alexander Brown.* 384, 634, 10-A7 (1992)

Simultaneous X-Ray and Radio Observations of GX 5−1. *J. Tan, W. H. G. Lewin, R. M. Hjellming, W. Penninx, J. van Paradijs, M. van der Klis, & K. Mitsuda.* 385, 314, 15-G1 (1992)

Gamma-Ray Bursts and Radio Pulsar Glitches. *D. Hartmann, K. Hurley, & M. Niel.* 387, 622, 46-D1 (1992)

Observations of Symbiotic Stars at Millimeter and Submillimeter Wavelengths. *E. R. Seaquist & A. R. Taylor.* 387, 624, 46-D5 (1992)

First Conclusive Evidence for Rotational Modulation of Stellar Radio Emission. *Jeremy Lim, Graham J. Nelson, Catarina Castro, David Kilkenny, & François van Wyk.* 388, L27, 52-C7 (1992)

Probing the Circumstellar Environments of Very Young Low-Mass Stars Using Water Masers. *S. Terebey, S. N. Vogel, & P. C. Myers.* 390, 181, 76-C1 (1992)

Coordinated *Ginga*, *IUE*, and VLA Observations of Stellar Activity in σ^2 Coronae Borealis. *R. A. Stern, Y. Uchida, F. Walter, O. Vilhu, D. Hannikainen, A. Brown, A. Veale, & B. M. Haisch.* 391, 760, 97-D7 (1992)

The Wolf-Rayet System WR 147: A Binary Radio Source with Thermal and Nonthermal Components. *E. Churchwell, J. H. Bieging, K. A. van der Hucht, P. M. Williams, T. A. Th. Spoelstra, & D. C. Abbott.* 393, 329, 118-C1 (1992)

Radio Emission from Chemically Peculiar Stars. *Jeffrey L. Linsky, Stephen A. Drake, & T. S. Bastian.* 393, 341, 118-D1 (1992)

The 20 and 6 Centimeter Radio Light Curves for SN 1981K: A Type II Radio Supernova. *Schuyler D. Van Dyk, Kurt W. Weiler, Richard A. Sramek, & Nino Panagia.* 396, 195, 157-E4 (1992)

Limits on Detectability of Mass Loss from Cool Dwarfs. *D. J. Mullan, J. G. Doyle, R. O. Redman, & M. Mathioudakis.* 397, 225, 170-F12 (1992)

Radio Continuum and X-Ray Properties of the Coronae of RS Canum Venaticorum and Related Active Binary Systems. *Stephen A. Drake, Theodore Simon, & Jeffrey L. Linsky.* 82, 311, 53-F5 (1992)

Full Evolution of the 6 and 20 Centimeter Radio Emission from SN 1980K. *Kurt W. Weiler, Schuyler D. Van Dyk, Nino Panagia, & Richard A. Sramek.* 398, 248, 184-G9 (1992)

Radio Observations of the 1989 Transient Event in V404 Cygni (= GS 2023+338). *Xiaohong Han & R. M. Hjellming.* 400, 304, 212-F6 (1992)

VLBI Survey of ρ Ophiuchi: A Population of Magnetized, Diskless Young Stellar Objects. *Philippe André, Bryan D. Deeney, Robert B. Phillips, & Jean-François Lestrade.* 401, 667, 230-G1 (1992)

Particle Acceleration and Nonthermal Radio Emission in Binaries of Early-Type Stars. *D. Eichler & V. Usov.* 402, 271, 4-D11 (1993)

Magnetic Nonthermal Activity in the T Tauri System. *Robert B. Phillips, Colin J. Lonsdale, & Eric D. Feigelson.* 403, L43, 20-E5 (1993)

Discovery of Remarkably Intense Radio Emission from a Young and Rapidly Rotating dMe Star. *Jeremy Lim.* 405, L33, 47-F1 (1993)

X-Ray/Microwave Relation of Different Types of Active Stars. *Manuel Güdel & Arnold O. Benz.* 405, L63, 54-C13 (1993)

Submillimeter Continuum Observations of ρ Ophiuchi A: The Candidate Protostar VLA 1623 and Prestellar Clumps. *Philippe André, Derek Ward-Thompson, & Mary Barsony.* 406, 122, 56-F3 (1993)

Detection of Radio Continuum Emission from Procyon. *Stephen A. Drake, Theodore Simon, & Alexander Brown.* 406, 247, 58-B5 (1993)

The Spectrum and Variability of Radio Emission from AE Aquarii. *Meil Abada-Simon, Alain Lecacheux, Tim S. Bastian, Jay A. Bookbinder, & George A. Dulk.* 406, 692, 66-D12 (1993)

Circularly Polarized Radio Emission from the T Tauri Star Hubble 4. *Stephen L. Skinner.* 408, 660, 93-D6 (1993)

The Radio Emission from the Type Ic Supernova SN 1990B. *Schuyler D. Van Dyk, Richard A. Sramek, Kurt W. Weiler, & Nino Panagia.* 409, 162, 99-A3 (1993)

A Highly Sensitive Radio Survey of Symbiotic Stars at 3.6 Centimeters. *E. R. Seaquist, M. Krogulec, & A. R. Taylor.* 410, 260, 115-C12 (1993)

Flaring and Quiescent Radio Emission of UX Arietis: A Time-dependent Model. *F. Chiuderi Drago & E. Franciosini.* 410, 301, 115-G3 (1993)

VLBI Astrometric Identification of the Radio-emitting Region in Algol and Determination of the Orientation of the Close Binary. *Jean-François Lestrade, Robert B. Phillips, Mark W. Hodges, & Robert A. Preston.* 410, 808, 123-G1 (1993)

Synthesis Images of 6.7 GHz Methanol Masers. *R. P. Norris, J. B. Whiteoak, J. L. Caswell, M. H. Wieringa, & R. G. Gough.* 412, 222, 144-G8 (1993)

A High-Sensitivity Survey of Radio Continuum Emission from Herbig Ae/Be Stars. *Stephen L. Skinner, Alexander Brown, & Ron T. Stewart.* 87, 217, 29-G13 (1993)

What are the Mass-Loss Rates of O Stars? *Henny J. G. L. M. Lamers & Claus Leitherer.* 412, 771, 153-D5 (1993)

The Contribution of Disks and Envelopes to the Millimeter Continuum Emission from Very Young Low-Mass Stars. *S. Terebey, C. J. Chandler, & P. André.* 414, 759, 180-F6 (1993)

A Tight Correlation between Radio and X-Ray Luminosities of M Dwarfs. *Manuel Güdel, Jürgen H. M. M. Schmitt, Jay A. Bookbinder, & Thomas A. Fleming.* 415, 236, 188-A1 (1993)

The Dust Content of Evolved Circumstellar Envelopes and the Optical Properties of Dust at Submillimeter to Radio Wavelengths. *G. R. Knapp, G. Sandell, & E. I. Robson.* 88, 173, 42-E7 (1993)

Gamma-Ray and Radio Observations of PSR B1509−58. *M. P. Ulmer, S. M. Matz, R. B. Wilson, M. J. Finger, K. S. Hagedon, D. A. Grabelsky, J. E. Grove, W. N. Johnson, R. L. Kinzer, J. D. Kurfess, W. R. Purcell, M. S. Strickman, V. M. Kaspi, S. Johnston, R. N. Manchester, A. G. Lyne, & N. D'Amico.* 417, 738, 228-E8 (1993)

Proto–Brown Dwarfs. I. Methods and Results for High-Latitude Clouds. *Marc W. Pound & Leo Blitz.* 418, 328, 235-B9 (1993)

SN 1988Z: The Most Distant Radio Supernova. *Schuyler D. Van Dyk, Kurt W. Weiler, Richard A. Sramek, & Nino Panagia.* 419, L69, 259-D6 (1993)

From T Tauri Stars to Protostars: Circumstellar Material and Young Stellar Objects in the ρ Ophiuchi Cloud. *Philippe André & Thierry Montmerle.* 420, 837, 13-C12 (1994)

Mapping the Radio Emission from Massive Young Stellar Objects. *Melvin G. Hoare, Janet E. Drew, Tom B. Muxlow, & Richard J. Davis.* 421, L51, 22-B7 (1994)

Radio Constraints on Coronal Models for dMe Stars. *S. M. White, J. Lim, & M. R. Kundu.* 422, 293, 33-F11 (1994)

Physical Processes in Eclipsing Pulsars: Eclipse Mechanisms and Diagnostics. *C. Thompson, R. D. Blandford, Charles R. Evans, & E. S. Phinney.* 422, 304, 33-G10 (1994)

Quiescent Microwave Emission from Late-Type Stars. *Manuel Güdel.* 90, 743, 13-A8 (1994)

Radio Evidence for Nonthermal Particle Acceleration on Stars of Late Spectral Type. *Kenneth R. Lang.* 90, 753, 13-B5 (1994)

Gamma-Ray Observations of Pulsars. *M. P. Ulmer.* 90, 789, 13-E6 (1994)

Radio-Size Estimates of SN 1993J. *J. M. Marcaide, A. Alberdi, P. Elósegui, J. C. Guirado, F. Mantovani, E. Pérez, M. I. Ratner, A. Rius, A. E. E. Rogers, B. P. Schmidt, I. I. Shapiro, & A. R. Whitney.* 424, L25, 69-D6 (1994)

The Radio Source around η Carinae. *S. M. White, R. A. Duncan, J. Lim, G. J. Nelson, S. A. Drake, & M. R. Kundu.* 429, 380, 148-G1 (1994)

Directivity of the Radio Emission from the K1 Dwarf Star AB Doradus. *Jeremy Lim, Stephen M. White, Graham J. Nelson, & Arnold O. Benz.* 430, 332, 163-C9 (1994)

Cepheus A HW2: A Powerful Thermal Radio Jet. *Luis F. Rodríguez, Guido Garay, Salvador Curiel, Solange Ramírez, José M. Torrelles, Yolanda Gómez, & Arturo Velázquez.* 430, L65, 166-B2 (1994)

Observations of 1E 1740.7−2942 with *ROSAT* and the VLA. *William A. Heindl, Thomas A. Prince, & John M. Grunsfeld.* 430, 829, 172-B12 (1994)

Multiwavelength Study of the Magnetically Active T Tauri Star HD 283447. *Eric D. Feigelson, Alan D. Welty, Catherine L. Imhoff, Jeffrey C. Hall, Paul B. Etzel, Robert B. Phillips, & Colin J. Lonsdale.* 432, 373, 197-G1 (1994)

SN 1993J: The Early Radio Emission and Evidence for a Changing Presupernova Mass-Loss Rate. *Schuyler D. Van Dyk, Kurt W. Weiler,*

Richard A. Sramek, Michael P. Rupen, & Nino Panagia. 432, L115, 207-A9 (1994)

Correlation between X-Ray Intensity and Radio Outbursts of Cygnus X-3. *Hiroaki Watanabe, Shunji Kitamoto, Sigenori Miyamoto, R. L. Fiedler, E. B. Waltman, K. J. Johnston, & F. D. Ghigo.* 433, 350, 212-F1 (1994)

The Early Ultraviolet, Optical, and Radio Evolution of the Soft X-Ray Transient GRO J0422+32. *C. R. Shrader, R. Mark Wagner, R. M. Hjellming, X. H. Han, & S. G. Starrfield.* 434, 698, 237-D4 (1994)

RE 0044+09: A New K Dwarf Rapid Rotator with a White Dwarf Companion? *Barry J. Kellett, Gordon E. Bromage, Alexander Brown, Robin D. Jeffries, David J. James, David Kilkenny, Russell M. Robb, David Wonnacott, Christopher Lloyd, & C. Clayton.* 438, 364, 6-D13 (1995)

Interstellar Scattering toward Cygnus X-3: Measurements of Anisotrophy and of the Inner Scale. *L. A. Molnar, R. L. Mutel, M. J. Reid, & K. J. Johnston.* 438, 708, 14-A2 (1995)

Millimeter-Wave Continuum Measurements of Young Stars. *M. Osterloh & V. W. Beckwith.* 439, 288, 25-B8 (1995)

RY Scuti: Infrared and Radio Observations of the Mass-Loss Wind of a Massive Binary Star System. *R. D. Gehrz, T. L. Hayward, J. R. Houck, J. W. Miles, R. M. Hjellming, T. J. Jones, Charles E. Woodward, Ricarda Prentice, W. J. Forrest, S. Libonate, & S. Solomon.* 439, 417, 26-G11 (1995)

Correlations between the Flaring Radio Emission and Starspot Distribution of UX Arietis. *Nicholas M. Elias II, Andreas Quirrenbach, Arno Witzel, Christian E. Naundorf, Ralf Wegner, Edward F. Guinan, & George P. McCook.* 439, 983, 38-B13 (1995)

The Velocity of the Emitting Plasma of the Superluminal Galactic Source GRS 1915+105. *Gianluigi Bodo & Gabriele Ghisellini.* 441, L69, 75-G13 (1995)

The Active Phase of the Hot Component of Z Andromedae. *T. Fernández-Castro, R. González-Riestra, A. Cassatella, A. R. Taylor, & E. R. Seaquist.* 442, 366, 82-B4 (1995)

Temporal Variation of Pulsar Dispersion Measure. *Xinji Wu & Abraham C.-L. Chian.* 443, 261, 98-G1 (1995)

Much Ado about Nothing: Several Large-Area Surveys for Radio Pulsars from Arecibo. *Paul S. Ray, W. T. S. Deich, S. R. Kulkarni, Thomas A. Prince, S. E. Thorsett, Gautam Vasisht, A. Wolszczan, Donald C. Backer, John H. Holliman II, & John Middleditch.* 443, 265, 98-G8 (1995)

The Radio Detection of SN 1968D in NGC 6946. *Scott D. Hyman, Schuyler D. Van Dyk, Kurt W. Weiler, & Richard A. Sramek.* 443, L77, 112-A2 (1995)

Circular Polarization in the Radio Emission of RS Canum Venaticorum Binaries. *Stephen M. White & Elena Franciosini.* 444, 342, 118-C1 (1995)

A Model for the Radio Emission from SNR 1987A. *P. Duffy, Lewis Ball, & J. G. Kirk.* 447, 364, 177-D7 (1995)

A Search for Fast Pulsars along the Galactic Plane. *D. J. Nice, A. S. Fruchter, & J. H. Taylor.* 449, 156, 212-C11 (1995)

Further Mapping of the Radio Emission from Massive Young Stellar Objects. *Melvin G. Hoare & Simon T. Garrington.* 449, 874, 224-F11 (1995)

Dust Emission from Protostars: The Disk and Envelope of HH 24 MMS. *Claire J. Chandler, David W. Koerner, Anneila I. Sargent, & Douglas O. S. Wood.* 449, L139, 227-D1 (1995)

Radio Continuum Measurements of Southern Early-Type Stars. *Claus Leitherer, Jessica M. Chapman, & Bärbel Koribalski.* 450, 289, 232-A7 (1995)

An Eight-Year Study of the Radio Emission from the Wolf-Rayet Binary HD 193793 = WR 140. *Richard L. White & Robert H. Becker.* 451, 352, 250-F8 (1995)

Pulsar Eclipses due to Induced Scattering in Magnetized Plasmas. *Qinghuan Luo & D. B. Melrose.* 452, 346, 266-G11 (1995)

Radio Detection of Late-Type (G–K) Dwarf Stars in the Pleiades. *Jeremy Lim & Stephen M. White.* 453, 207, 284-A5 (1995)

Radio Observations of SN 1987A at 843 MHz. *Lewis Ball, D. Campbell-Wilson, D. F. Crawford, & A. J. Turtle.* 453, 864, 295-G8 (1995)

Radio-Frequency Continuum Emission from Evolved Stars. *G. R. Knapp, P. F. Bowers, K. Young, & T. G. Phillips.* 455, 293, 322-B12 (1995)

Subarcsecond-Resolution 86 GHz Continuum Maps of Orion KL. *R. L. Plambeck, M. C. H. Wright, L. G. Mundy, & L. W. Looney.* 455, L189, 334-G10 (1995)

RADIO LINES: ATOMIC

An Improved Method to Derive H I Absorption Spectra through the Disks of Galaxies: Application to the Sculptor Group. *John M. Dickey, Elias Brinks, & Daniel Puche.* 385, 501, 19-D6 (1992)

Physical Properties of Neutral Gas in M31 and the Galaxy. *Robert Braun & René A. M. Walterbos.* 386, 120, 25-E10 (1992)

Positions of the Radio Recombination Line Masers in MWC 349. *P. Planesas, J. Martín-Pintado, & E. Serabyn.* 386, L23, 29-D1 (1992)

A Study of a 21 Centimeter–selected Sample of Galaxies. I. The Survey. *P. A. Henning.* 78, 365, 7-D3 (1992)

Luminosity–Line Width Relations and the Extragalactic Distance Scale. I. Absolute Calibration. *Michael J. Pierce & R. Brent Tully.* 387, 47, 37-E8 (1992)

Atomic and Molecular Outflow in DR 21. *A. P. G. Russell, J. Bally, R. Padman, & R. E. Hills.* 387, 219, 39-E13 (1992)

Interstellar Matter in Early-Type Galaxies. II. The Relationship between Gaseous Components and Galaxy Types. *Joel N. Bregman, David E. Hogg, & Morton S. Roberts.* 387, 484, 44-F9 (1992)

The Sharpless 187 Gas Complex: A Multifrequency Study. *G. Joncas, D. Durand, & R. S. Roger.* 387, 591, 46-A9 (1992)

Time Variations in Millimeter-Wave Radio Recombination Lines from the Be Star MWC 349A. *M. A. Gordon.* 387, 701, 47-D5 (1992)

Detection of the H92α Radio Recombination Line from the Symbiotic Star H1–36 Arae. *T. S. Bastian.* 387, L77, 48-D1 (1992)

The Bell Laboratories H I Survey. *Antony A. Stark, Charles F. Gammie, Robert W. Wilson, John Bally, Richard A. Linke, Carl Heiles, & Mark Hurwitz.* 79, 77, 13-D1 (1992)

H I Observations of Galaxies in the Hercules Supercluster. II. Additional UGC Galaxies and Galaxies in Selected CGCG Fields. *Wolfram Freudling, Martha P. Haynes, & Riccardo Giovanelli.* 79, 157, 16-B1 (1992)

Properties of the Redshift. IV. Reference Data. *W. G. Tifft.* 79, 183, 16-D13 (1992)

Galactic Worms. I. Catalog of Worm Candidates. *Bon-Chul Koo, Carl Heiles, & William T. Reach.* 390, 108, 75-D6 (1992)

The Separation between Gas and Dust Filaments at the Edge of the Expanding Shell in Eridanus. *G. L. Verschuur, L. J Rickard, F. Verter, M. W. Pound, & D. Leisawitz.* 390, 514, 81-F7 (1992)

The Evolutionary History of the Interacting Galaxy System NGC 7714/7715 (Arp 284). *Beverly J. Smith & John F. Wallin.* 393, 544, 122-E7 (1992)

Anomalously High Apparent Abundances of Singly Ionized Helium in the Galactic H II Region W3A. *P. R. Roelfsema, W. M. Goss, & D. C. V. Mallik.* 394, 188, 130-C13 (1992)

Northern Dwarf and Low Surface Brightness Galaxies. II. The Green Bank Neutral Hydrogen Survey. *Stephen E. Schneider, Trinh X. Thuan, Jeffrey G. Mangum, & John Miller.* 81, 5, 35-B13 (1992)

Ultraviolet and Radio Observations of Milky Way Halo Gas. *Laura Danly, Felix J. Lockman, Marilyn R. Meade, & Blair D. Savage.* 81, 125, 36-F9 (1992)

Determination of the He^+/H^+ Ratio from α, β, and γ Radio Recombination Lines. *M. Peimbert, L. F. Rodríguez, T. M. Bania, R. T. Rood, & T. L. Wilson.* 395, 484, 148-E9 (1992)

Peculiar Velocities of Clusters in the Perseus-Pisces Supercluster. *M. Han & J. R. Mould.* 396, 453, 163-B1 (1992)

A High-Resolution 21 Centimeter Line Study of Infrared Cirrus. *G. Joncas, F. Boulanger, & P. E. Dewdney.* 397, 165, 170-A10 (1992)

Neutral Winds from Protostars. *Carlo Giovanardi, Susana Lizano, Antonella Natta, Neal J. Evans II, & Carl Heiles.* 397, 214, 170-E13 (1992)

[C I] Emission at $z = 2.286$ in the Protogalaxy IRAS F10214+4724. *Robert L. Brown & Paul A. Vanden Bout.* 397, L11, 173-B10 (1992)

Submillimeter Detection of Extragalactic C I Emission: IC 342. *Thomas H. Büttgenbach, Jocelyn Keene, T. G. Phillips, & Christopher K. Walker.* 397, L15, 173-C1 (1992)

H I Imaging of Four Quasar-Galaxy Pairs: The Parent Galaxies of Low-Redshift Quasar Absorption Systems. *C. L. Carilli & J. H. van Gorkom.* 399, 373, 202-E7 (1992)

NGC 4027: An Interacting One-armed Spiral Galaxy with a Warped Ring. *Bikram Phookun, Lee G. Mundy, Peter J. Teuben, & Richard J. Wainscoat.* 400, 516, 216-F10 (1992)

Radio Continuum and Radio Recombination Line Observations of Sagittarius B1 and G0.6–0.0. *David M. Mehringer, F. Yusef-Zadeh, Patrick Palmer, & W. M. Goss.* 401, 168, 223-B1 (1992)

Heating of H II Regions with Application to the Galactic Center. *Philip R. Maloney, David J. Hollenbach, & Charles H. Townes.* 401, 559, 229-E5 (1992)

RADIO LINES: GALAXIES

21 Centimeter Study of Spiral Galaxies in Clusters. III. Neutral Gas Content, Star Formation, and Radio Continuum Properties. *Marco Scodeggio & Giuseppe Gavazzi.* 409, 110, 98-C8 (1993)

Detection of CO Emission from Massive Molecular Clouds in the Inner Disk of M31. *Ronald J. Allen & J. Lequeux.* 410, L15, 117-G7 (1993)

Neutral Hydrogen 21 Centimeter Absorption at $z = 0.6847$ toward the "Smallest Einstein Ring." *C. L. Carilli, M. P. Rupen, & Brian Yanny.* 412, L59, 155-C10 (1993)

Velocity Functions of Galaxies and Clusters of Galaxies. *Kazuhiro Shimasaku.* 413, 59, 156-G3 (1993)

Aperture Synthesis Mapping of CO (2–1) in IC 342. *Jean L. Turner, Robert L. Hurt, & David Y. Hudson.* 413, L19, 162-D1 (1993)

Molecular Gas Mass and Far-Infrared Emission from Distant Luminous Galaxies. *D. Downes, P. M. Solomon, & S. J. E. Radford.* 414, L13, 175-D6 (1993)

Neutral Hydrogen Absorption and Emission in the Quasar/Galaxy Pair 3C 275.1/NGC 4651. *Stephen E. Schneider & Edvige Corbelli.* 414, 500, 177-D7 (1993)

Arecibo Observation of B2 0902+343 in the 21 Centimeter Line at Redshift 3.4. *F. H. Briggs, E. Sorar, & A. Taramopoulos.* 415, L99, 200-A2 (1993)

Kinematical Modeling of Warps in the H I Disks of Galaxies. *Dimitris M. Christodoulou, Joel E. Tohline, & Thomas Y. Steiman-Cameron.* 416, 74, 202-A7 (1993)

Star Formation in the Spiral Arms of NGC 4321. II. H I Distribution and Kinematics. *Johan H. Knapen, Jordi Cepa, John E. Beckman, M. Soledad del Rio, & Alan Pedlar.* 416, 563, 210-D1 (1993)

H I 21 Centimeter Observations and *I*-Band CCD Surface Photometry of Spiral Galaxies behind the Virgo Cluster and toward Its Antipode. *N. Y Lu, G. L. Hoffman, T. Groff, T. Roos, & C. Lamphier.* 88, 383, 45-D1 (1993)

The Shape of the H I Mass Function for Late-Type Galaxies over the Range $M_{H\,I} \approx 10^7$–$10^{10}\ M_\odot$. *F. H. Briggs & S. Rao.* 417, 494, 225-D12 (1993)

Atomic Carbon in M82. *Peter Schilke, John E. Carlstrom, Jocelyn Keene, & T. G. Phillips.* 417, L67, 230-C3 (1993)

NGC 4254: A Spiral Galaxy with an $m = 1$ Mode and Infalling Gas. *Bikram Phookun, Stuart N. Vogel, & Lee G. Mundy.* 418, 113, 232-D12 (1993)

H I Spin Temperatures and Heating Requirements in Outer Regions of Disk Galaxies. *Edvige Corbelli & Edwin E. Salpeter.* 419, 94, 247-C9 (1993)

Sharp H I Edges in the Outskirts of Disk Galaxies. *Edvige Corbelli & Edwin E. Salpeter.* 419, 104, 247-D7 (1993)

Neutral Hydrogen in Galaxies at the Present Epoch. *Sandhya Rao & Frank Briggs.* 419, 515, 254-B12 (1993)

Detection of H92α Recombination Line from the Galaxies NGC 3628, IC 694, and NGC 1365. *K. R. Anantharamaiah, Jun-Hui Zhao, W. M. Goss, & F. Viallefond.* 419, 585, 255-A9 (1993)

Stimulated Raman Scattering as an Explanation for the Extreme High-Velocity Features of Water Maser Emission. *Shuji Deguchi.* 420, 551, 9-D11 (1994)

Counterrotating Gaseous Disks in NGC 4826. *Robert Braun, René A. M. Walterbos, Robert C. Kennicutt, Jr., & Linda J. Tacconi.* 420, 558, 9-E6 (1994)

Neutral Hydrogen Absorption in NGC 1068 and NGC 3079. *J. F. Gallimore, S. A. Baum, C. P. O'Dea, E. Brinks, & A. Pedlar.* 422, L13, 36-C9 (1994)

An H I Survey of High-Velocity Clouds in Nearby Disk Galaxies. *Eric Schulman, Joel N. Bregman, & Morton S. Roberts.* 423, 180, 48-C9 (1994)

Photoionization of Disk Galaxies: An Explanation of the Sharp Edges in the H I Distribution. *James B. Dove & J. Michael Shull.* 423, 196, 48-E3 (1994)

Neutral Hydrogen and Optical Properties of Three Amorphous Galaxies. *Deidre A. Hunter, Hugo van Woerden, & John S. Gallagher III.* 91, 79, 18-A2 (1994)

Measuring the Hubble Constant and Our Virgo-Infall Velocity Independently. *Nanyao Y. Lu, E. E. Salpeter, & G. Lyle Hoffman.* 426, 473, 104-C4 (1994)

Modified Dynamics Predictions Agree with Observations of the H I Kinematics in Faint Dwarf Galaxies Contrary to the Conclusions of Lo, Sargent, and Young. *Mordehai Milgrom.* 429, 540, 152-D5 (1994)

Millimeter Recombination Lines and the State of Ionized Gas in M82. *E. R. Seaquist, C. R. Kerton, & M. B. Bell.* 429, 612, 153-C13 (1994)

Arcs and Bridges in the Interacting Galaxies NGC 5775/NGC 5774. *Judith A. Irwin.* 429, 618, 153-D7 (1994)

Testing for Interaction between the Galaxies NGC 450 and UGC 807. *Mariano Moles, Isabel Márquez, Josefa Masegosa, Ascensión del Olmo, Jaime Perea, & Halton Arp.* 432, 135, 194-G12 (1994)

Evidence for Axisymmetric Halos: The Case of IC 2006. *Marijn Franx, J. H. van Gorkom, & Tim de Zeeuw.* 436, 642, 274-D3 (1994)

Detection of Extended H I Absorption toward PKS 2322−123 in Abell 2597. *Christopher P. O'Dea, Stefi A. Baum, & Jack Gallimore.* 436, 669, 274-F9 (1994)

Water Maser Emission from X-Ray–heated Circumnuclear Gas in Active Galaxies. *David A. Neufeld, Philip R. Maloney, & Sarah Conger.* 436, L127, 281-A13 (1994)

The Discovery of Five New H_2O Megamasers in Active Galaxies. *J. A. Braatz, A. S. Wilson, & C. Henkel.* 437, L99, 299-A8 (1994)

The Mass-to-Light Ratios of Low Surface Brightness Spiral Galaxies: Clues from the Tully-Fisher Relation. *D. Sprayberry, G. M. Bernstein, C. D. Impey, & G. D. Bothun.* 438, 72, 2-C10 (1995)

Neutral Hydrogen Profiles of Cluster Galaxies. *Jeremy Mould, Sarah Martin, Greg Bothun, John Huchra, & Bob Schommer.* 96, 1, 1-B1 (1995)

The Large-Scale Distribution of Late-Type Galaxies between Virgo and the Great Wall. *G. Lyle Hoffman, B. M. Lewis, & E. E. Salpeter.* 441, 28, 59-F2 (1995)

Disk Galaxies near the Line of Sight to 3C 273 and Conjectures on Lyman-Alpha Absorption. *E. E. Salpeter & G. Lyle Hoffman.* 441, 51, 60-A7 (1995)

Detection of an H I Disk in Hydra A? *K. S. Dwarakanath, F. N. Owen, & J. H. van Gorkom.* 442, L1, 84-D1 (1995)

The Tully-Fisher Relation of the *IRAS* Minisurvey Galaxies. *W. van Driel, A. C. van den Broek, & W. A. Baan.* 444, 80, 114-D4 (1995)

The Barred Spiral Galaxy NGC 1398 and Its Pattern Speed. *E. M. Moore & S. T. Gottesman.* 447, 159, 174-C8 (1995)

Anomalously Excited OH and Competition between Maser Transitions toward Centaurus A. *Huib Jan van Langevelde, Ewine F. van Dishoeck, Maartje N. Sevenster, & Frank P. Israel.* 448, L123, 209-F2 (1995)

Large-Scale Structures in the Zone of Avoidance: The Galactic Anticenter Region. *Nanyao Y. Lu & Wolfram Freudling.* 449, 527, 220-B2 (1995)

Dust and Molecular Gas in the Barred Spiral Galaxy NGC 1530. *Michael W. Regan, Stuart N. Vogel, & Peter J. Teuben.* 449, 576, 220-F10 (1995)

H I Absorption Toward the Nucleus of the Powerful Radio Galaxy Cygnus A: Evidence for an Atomic Obscuring Torus? *J. E. Conway & P. R. Blanco.* 449, L131, 227-C1 (1995)

An H I/Optical Atlas of H II Galaxies and Their Companions. *Christopher L. Taylor, Elias Brinks, Randy M. Grashuis, & Evan D. Skillman.* 99, 427, 41-A2 (1995)

A Study of a 21 Centimeter–selected Sample of Galaxies. II. Analysis of the Sample. *P. A. Henning.* 450, 578, 238-F6 (1995)

Zeeman Effect Observations of H I Emission Profiles. II. Results of an Attempt to Confirm Previous Claims of Field Detections. *Gerrit L. Verschuur.* 451, 645, 256-B6 (1995)

New Observations and a New Interpretation of CO(3–2) in IRAS F10214+4724. *D. Downes, P. M. Solomon, & S. J. E. Radford.* 453, L65, 298-B6 (1995)

RADIO LINES: GENERAL

The IRAS 16293−2422 Cloud Core: A Study of a Young Binary System. *Christopher K. Walker, John E. Carlstrom, & John H. Bieging.* 402, 655, 10-F11 (1993)

The Velocity Field of Clusters of Galaxies within 100 Megaparsecs. II. Northern Clusters. *J. R. Mould, R. L. Akeson, G. D. Bothun, M. Han, J. P. Huchra, J. Roth, & R. A. Schommer.* 409, 14, 97-C1 (1993)

Multiconfiguration VLA H92α Observations of Sagittarius A West at 1 Arcsecond Resolution. *D. A. Roberts & W. M. Goss.* 86, 133, 15-E1 (1993)

A Spectral-Line Survey of W51 from 17.6 to 22.0 GHz. *M. B. Bell, L. W. Avery, & J. K. G. Watson.* 86, 211, 16-F7 (1993)

Five Years of Project META: An All-Sky Narrow-Band Radio Search for Extraterrestrial Signals. *Paul Horowitz & Carl Sagan.* 415, 218, 187-F8 (1993)

The Laboratory Spectrum of Acetaldehyde at 1 Millimeter (230–325 GHz). *W. L. Barclay, Jr., M. A. Anderson, L. M. Ziurys, I. Kleiner, & J. T. Hougen.* 89, 221, 51-G3 (1993)

A VLA Search for Neutral Hydrogen in Cooling Flow Clusters. *K. S. Dwarakanath, J. H. van Gorkom, & F. N. Owen.* 432, 469, 201-G1 (1994)

RADIO LINES: ISM

Ammonia in the W3(OH) Region. *T. L. Wilson, R. A. Gaume, & K. J. Johnston.* 402, 230, 4-A1 (1993)

OH and H_2O Masers in Sagittarius B1: Evidence for Ongoing Star Formation. *David M. Mehringer, Patrick Palmer, & W. M. Goss.* 402, L69, 13-A1 (1993)

The Morphology of a Bright Rim in NGC 2264: Early Stages of High-Mass Star Formation. *Jan A. Tauber, Dariusz C. Lis, & Paul F. Goldsmith.* 403, 202, 16-D10 (1993)

Survey of Galactic CO Emission toward Compact Extragalactic Millimeter-Wave Continuum Sources. *Harvey S. Liszt & Robert W. Wilson.* 403, 663, 23-G11 (1993)

Dark Matter and Dynamics in the Hercules Cluster (A2151). *Christina M. Bird, John M. Dickey, & E. E. Salpeter.* 404, 81, 29-A11 (1993)

PIG (Partially Ionized Globule) Anatomy: Density and Temperature Structure of the Bright-rimmed Globule IC 1396E. *E. Serabyn, R. Güsten, & L. Mundy.* 404, 247, 31-A1 (1993)

A Molecular Spiral Arm Segment of M51 at 3.5 Arcsecond Resolution. *Richard J. Rand.* 404, 593, 36-C14 (1993)

Molecular Cloud Cores in the Orion A Cloud. I. Nobeyama CS (1–0) Survey. *Ken'ichi Tatematsu, Tomofumi Umemoto, Osamu Kameya, Naomi Hirano, Tetsuo Hasegawa, Masahiko Hayashi, Takahiro Iwata, Norio Kaifu, Hitomi Mikami, Yasuhiro Murata, Makoto Nakano, Takenori Nakano, Nagayoshi Ohashi, Kazuyoshi Sunada, Hiroshi Takaba, & Satoshi Yamamoto.* 404, 643, 37-A5 (1993)

The Scale Height and Radial Distribution of Molecular Gas in NGC 891. *N. Z. Scoville, D. Thakkar, J. E. Carlstrom, & A. I. Sargent.* 404, L59, 40-D7 (1993)

An H I Absorption Survey of M31 and M33: The Mixture of Warm and Cool Phases in the Interstellar Media of Spiral Galaxies. *John M. Dickey & Elias Brinks.* 405, 153, 43-A1 (1993)

On the Nature of the Molecular Cores in High-Latitude Cirrus Clouds. III. ^{13}CO Observations and Tests of CO Chemistry Models. *B. E. Turner.* 405, 229, 44-A3 (1993)

CO Lines toward NGC 2024 and Other Star-forming Regions: A Closer Look at the Warm Gas Component. *U. U. Graf, A. Eckart, R. Genzel, A. I. Harris, A. Poglitsch, A. P. G. Russell, & J. Stutzki.* 405, 249, 44-B13 (1993)

Structure and Chemistry of Orion S. *Joseph P. McMullin, Lee G. Mundy, & Geoffrey A. Blake.* 405, 599, 50-E5 (1993)

A Flattened Cloud Core in NGC 2024. *Paul T. P. Ho, Yun-Lou Peng, José M. Torrelles, José F. Gómez, Luis F. Rodríguez, & Jorge Cantó.* 408, 565, 92-C1 (1993)

Laboratory Detection of a New Free Radical C_4S ($^3\Sigma^-$). *Yasuhiro Hirahara, Yasuhiro Ohshima, & Yasuki Endo.* 408, L113, 95-F13 (1993)

Detection of Magnetohydrodynamic Shocks in the L1551 Outflow. *M. Barsony, N. Z. Scoville, & C. J. Chandler.* 409, 275, 100-E4 (1993)

Detection of Circumstellar Gas Associated with GG Tauri. *M. F. Skrutskie, R. L. Snell, K. M. Strom, S. E. Strom, S. Edwards, Y. Fukui, A. Mizuno, M. Hayashi, & N. Ohashi.* 409, 422, 102-C1 (1993)

A Spectral-Line Survey of W51 from 17.6 to 22.0 GHz. *M. B. Bell, L. W. Avery, & J. K. G. Watson.* 86, 211, 16-F7 (1993)

Modeling the Structure of H I in the Galactic Disk. *Joel N. Bregman, Daniel D. Kelson, & Gregory A. Ashe.* 409, 682, 107-D9 (1993)

Density Wave Kinematics and Giant Molecular Association Formation in M51. *Richard J. Rand.* 410, 68, 113-A3 (1993)

High-Resolution H I Observations of H II Regions. III. Photodissociation Regions and the Magnetic Field near Orion B. *Paul P. van der Werf, W. M. Goss, Carl Heiles, R. M. Crutcher, & T. H. Troland.* 411, 247, 130-C8 (1993)

HCO^+, $H^{13}CN$, and $H^{12}CN$ Aperture Synthesis Observations of the Circumnuclear Molecular Ring in the Galactic Center. *J. M. Marr, M. C. H. Wright, & D. C. Backer.* 411, 667, 138-A8 (1993)

VLA Zeeman Observations of W3. *D. A. Roberts, R. M. Crutcher, T. H. Troland, & W. M. Goss.* 412, 675, 152-B12 (1993)

Radio Continuum and Radio Recombination Line Observations of Sagittarius B2. *David M. Mehringer, Patrick Palmer, W. M. Goss, & F. Yusef-Zadeh.* 412, 684, 152-C11 (1993)

Fragmentation and Kinematics of the W49N Cloud Core. *E. Serabyn, R. Güsten, & A. Schulz.* 413, 571, 163-E9 (1993)

The Detection of a New Methanol Maser Transition at 9.9 GHz. *V. I. Slysh, S. V. Kalenskii, & I. E. Val'tts.* 413, L133, 169-C6 (1993)

A High-Resolution H I Survey of the Rosette Nebula. *Thomas A. Kuchar & T. M. Bania.* 414, 664, 179-D12 (1993)

A High-Resolution Optical and Radio Study of Milky Way Halo Gas. *C. E. Albert, J. C. Blades, D. C. Morton, Felix J. Lockman, M. Proulx, & L. Ferrarese.* 88, 81, 41-C7 (1993)

High Spatial Resolution Observations of CO in CRL 618. *Katsunori M. Shibata, Shuji Deguchi, Naomi Hirano, Osamu Kameya, & Shin'ichi Tamura.* 415, 708, 196-F1 (1993)

A Determination of the Distance to the High-Velocity Cloud Complex M. *Laura Danly, C. E. Albert, & K. D. Kuntz.* 416, L29, 207-D13 (1993)

Refrigeration of the 18.3 GHz C_3H_2 Transition in Dark Cloud G1.6−0.25. *T. B. H. Kuiper, J. B. Whiteoak, R.-S. Peng, W. L Peters III, & J. E. Reynolds.* 416, L33, 207-E7 (1993)

Detection of the Interstellar NH_2 Radical. *Ewine F. van Dishoeck, David J. Jansen, Peter Schilke, & T. G. Phillips.* 416, L83, 216-E10 (1993)

Interaction between the Supernova Remnant CTB 80 and the Ambient Interstellar Medium: H I and CO Observations. *Bon-Chul Koo, Min-Su Yun, Paul T. P. Ho, & Youngung Lee.* 417, 196, 219-G10 (1993)

New VLA Observations of NH_3 in S140. *Shudong Zhou, Neal J. Evans II, Lee G. Mundy, & Marc L. Kutner.* 417, 613, 227-A7 (1993)

The Spectrum of Orion-KL at 2 Millimeters (150–160 GHz). *L. M. Ziurys & Douglas McGonagle.* 89, 155, 50-G13 (1993)

Structure of Dense Cores in M17 SW. I. A Multitransition CS and $C^{34}S$ Study. *Yangsheng Wang, Daniel T. Jaffe, Neal J. Evans II, Masahiko Hayashi, Ken'ichi Tatematsu, & Shudong Zhou.* 419, 707, 256-D12 (1993)

Radio Observations of D I and Fractionation. *Carl Heiles, Peter R. McCullough, & Alfred E. Glassgold.* 89, 271, 53-C11 (1993)

The Physics and Chemistry of Small Molecular Clouds in the Galactic Plane. I. Physical Conditions from $C^{18}O$ and ^{13}CO Observations. *B. E. Turner.* 420, 661, 11-A1 (1994)

Detection of a New Molecular Ion HC_3NH^+ in TMC-1. *Kentarou Kawaguchi, Yasuko Kasai, Shin-ichi Ishikawa, Masatoshi Ohishi, Norio Kaifu, & Takayoshi Amano.* 420, L95, 15-F12 (1994)

Anatomy of a Photodissociation Region: High Angular Resolution Images of Molecular Emission in the Orion Bar. *Jan A. Tauber, A. G. G. M. Tielens, Margaret Meixner, & Paul F. Goldsmith.* 422, 136, 31-F13 (1994)

The HH 83 Molecular Cloud: Gone with the Wind. *John Bally, Alain Castets, & Gilles Duvert.* 423, 310, 50-A3 (1994)

On the Distance Determination and Ionization of the High-Velocity Clouds. *A. Ferrara & G. B. Field.* 423, 665, 56-G5 (1994)

A Measurement of the $J = 2 \leftarrow 1$ Fine-Structure Interval for ^{28}Si and ^{29}Si in the Ground ^3P State. *John M. Brown, Lyndon R. Zink, & K. M. Evenson.* 423, L151, 61-D13 (1994)

The Magnetic Field in the Ophiuchus Dark Cloud Complex. *Alyssa A. Goodman & Carl Heiles.* 424, 208, 64-E1 (1994)

High-Resolution Measurements of NH_3 Absorption toward Cassiopeia A. *R. A. Gaume, T. L. Wilson, & K. J. Johnston.* 425, 127, 81-G1 (1994)

Observations of Large-Scale [C I] Emission from S140. *René Plume, D. T. Jaffe, & Jocelyn Keene.* 425, L49, 85-G3 (1994)

Radio Continuum and Radio Recombination Line Observations of W51. *David M. Mehringer.* 91, 713, 29-A2 (1994)

A $C^{18}O$ (J = 1–0) Survey of Protostellar Candidates Embedded in the Taurus Molecular Cloud. *Masahiko Hayashi, Tetsuo Hasegawa, Nagayoshi Ohashi, & Kazuyoshi Sunada.* 426, 234, 99-A8 (1994)

Aperture Synthesis Imaging of Partially Ionized Gas in W48. *Joseph S. Onello, J. A. Phillips, P. Benaglia, W. M. Goss, & Yervant Terzian.* 426, 249, 99-B13 (1994)

Optical and H I Observations of High-Velocity Gas toward HD 203664. *J. E. Little, P. L. Dufton, F. P. Keenan, E. S. Conlon, & R. D. Davies.* 427, 267, 113-C8 (1994)

Detection of a New Interstellar Molecule, H_2CN. *Masatoshi Ohishi, Douglas McGonagle, William M. Irvine, Satoshi Yamamoto, & Shuji Saito.* 427, L51, 117-G5 (1994)

Outflows from Young Stellar Objects in Bok Globules: Maps. *João Lin Yun & Dan P. Clemens.* 92, 145, 33-C5 (1994)

Carbon Recombination Lines as a Diagnostic of Photodissociation Regions. *A. Natta, C. M. Walmsley, & A. G. G. M. Tielens.* 428, 209, 130-F12 (1994)

Discovery of $^{14}NH_3(3, 3)$ Maser Emission in the Interstellar Medium. *Jeffrey G. Mangum & Alwyn Wootten.* 428, L33, 134-E8 (1994)

The Fine-Structure Intervals of $^{14}N^{+}$ by Far-Infrared Laser Magnetic Resonance. *John M. Brown, Thomas D. Varberg, Kenneth M. Evenson, & Andrew L. Cooksy.* 428, L37, 134-E13 (1994)

A Bipolar Outflow of Ionized Gas in K3-50A: H76α Radio Recombination Line and Continuum Observations of K3-50. *C. G. De Pree, W. M. Goss, Patrick Palmer, & Robert H. Rubin.* 428, 670, 138-F1 (1994)

A Multiwavelength Study of IRAS 19550+3248: A Protostar Possibly Formed by a Cloud-Cloud Collision. *Bon-Chul Koo, Youngung Lee, G. A. Fuller, Myung Gyoon Lee, Suk-Minn Kwon, & Jae-Hoon Jung.* 429, 233, 147-A7 (1994)

The Velocity Structure of the Cometary H II Regions G13.87+0.28, G32.80+0.19B, and G61.48+0.09B1. *Guido Garay, Susana Lizano, & Yolanda Gómez.* 429, 268, 147-D6 (1994)

Atomic and Molecular Gas in Interstellar Cirrus Clouds. *William T. Reach, Bon-Chul Koo, & Carl Heiles.* 429, 672, 154-B1 (1994)

The Molecular Gas Associated with the Orion Bright Bar. *Toshihiro Omodaka, Masahiko Hayashi, Tetsuo Hasegawa, & Saeko S. Hayashi.* 430, 256, 162-C7 (1994)

Soft X-Ray and H I Surveys of the Low N_H Region in Ursa Major. *S. L. Snowden, G. Hasinger, K. Jahoda, Felix J. Lockman, D. McCammon, & W. T. Sanders.* 430, 601, 169-C9 (1994)

The Cosmic Abundance of ^{3}He. III. Improved Line Parameters for Selected Sources. *Dana S. Balser, T. M. Bania, Charles J. Brockway, Robert T. Rood, & T. L. Wilson.* 430, 667, 170-B8 (1994)

High Rydberg State Carbon Recombination Lines toward Cassiopeia A: 332 MHz VLA Observations and Comparison with H I and Molecular Lines. *K. R. Anantharamaiah, W. C. Erickson, H. E. Payne, & Nimisha G. Kantharia.* 430, 682, 170-C11 (1994)

High Rydberg State Carbon Recombination Lines toward Cassiopeia A: Physical Conditions and a New Class of Models. *H. E. Payne, K. R. Anantharamaiah, & W. C. Erickson.* 430, 690, 170-D7 (1994)

New Detections of Interstellar HNO at 2 and 1.2 Millimeters: More N–O Bonds. *L. M. Ziurys, J. M. Hollis, & L. E. Snyder.* 430, 706, 170-E11 (1994)

Detection of Formaldehyde Maser Emission near the Ultracompact H II Region G29.96−0.02. *Preethi Pratap, Karl M. Menten, & Lewis E. Snyder.* 430, L129, 175-A13 (1994)

A Comparison of CO ($J = 1 \rightarrow 0$) and CO ($J = 2 \rightarrow 1$) Emission in the Milky Way Molecular Ring. *Jean E. Chiar, Marc L. Kutner, Frances Verter, & James Leous.* 431, 658, 186-F13 (1994)

A Millimeter-Wave Study and Astronomical Search for the HCCCS Radical. *M. C. McCarthy, J. M. Vrtilek, E. W. Gottlieb, F.-M. Tao, C. A. Gottlieb, & P. Thaddeus.* 431, L127, 192-B13 (1994)

Atomic Sulfur: Frequency Measurement of the $J = 0 \leftarrow 1$ Fine-Structure Transition at 56.3 Microns by Laser Magnetic Resonance. *John M. Brown, Kenneth M. Evenson, & Lyndon R. Zink.* 431, L147, 192-E2 (1994)

Excitation of Interstellar Hydrogen Chloride. *David A. Neufeld & Sheldon Green.* 432, 158, 195-B11 (1994)

The Cold, Massive Molecular Cloud G216−2.5. II. Structure and Kinematics. *Youngung Lee, Ronald L. Snell, & Robert L. Dickman.* 432, 167, 195-C8 (1994)

VLA Recombination Line Observations of the Cometary H II Region G34.3+0.2: Dynamics and Physical Properties. *Ralph A. Gaume, Alan L. Fey, & Mark J. Claussen.* 432, 648, 204-B1 (1994)

Dense Cores in Dark Clouds. X. Ammonia Emission in the Perseus Molecular Cloud Complex. *E. F. Ladd, P. C. Myers, & A. A. Goodman.* 433, 117, 209-F10 (1994)

A Search for Dense Gas in Quiescent Bok Globules. *Brian D. Kane, Dan P. Clemens, & Philip C. Myers.* 433, L49, 215-C9 (1994)

The Molecular Emission-Line Spectrum of IRC +10216 between 330 and 358 GHz. *T. D. Groesbeck, T. G. Phillips, & Geoffrey A. Blake.* 94, 147, 53-F12 (1994)

Filaments of Neutral Hydrogen toward the Galactic Anticenter. *Christopher M. Tamanaha.* 433, 648, 219-B3 (1994)

On the Analysis of Para-Ammonia Observations. *T. B. H. Kuiper.* 433, 712, 219-G11 (1994)

The Association of High-Latitude Molecular Clouds with H I Gas. *Be-Young Gir, Leo Blitz, & Loris Magnani.* 434, 162, 227-C13 (1994)

New Formaldehyde Masers in Sagittarius B2. *David M. Mehringer, W. M. Goss, & Patrick Palmer.* 434, 237, 228-F6 (1994)

Three Millimeter Molecular Line Observations in Sagittarius B2. I. Full Synthesis Mapping Study of HNO, CCS, and $HC^{13}CCN$. *Yi-Jehng Kuan & Lewis E. Snyder.* 94, 651, 61-A8 (1994)

VLA Spectral Line Observations of the H II Complex G34.3+0.2. *Alan L. Fey, Ralph A. Gaume, Gerald E. Nedoluha, & Mark J. Claussen.* 435, 738, 256-C3 (1994)

A Massive Young Embedded Object Associated with the UC H II Region G31.41+0.31. *R. Cesaroni, L. Olmi, C. M. Walmsley, E. Churchwell, & P. Hofner.* 435, L137, 260-C3 (1995)

Kinematic Distances of Galactic H II Regions from H I Absorption Studies. *Thomas A. Kuchar & T. M. Bania.* 436, 117, 262-G9 (1994)

Probing the Interstellar Medium with Pulsars on AU Scales. *Dale A. Frail, Joel M. Weisberg, James M. Cordes, & Corey Mathers.* 436, 144, 263-C1 (1994)

The Physics and Chemistry of Small Molecular Clouds in the Galactic Plane. II. H_2CO. *B. E. Turner.* 437, 658, 294-G12 (1994)

A Multiline, Multiresolution VLA Study of the Ultracompact H II Region G29.96−0.02. *A. Afflerbach, E. Churchwell, P. Hofner, & S. Kurtz.* 437, 697, 295-C12 (1994)

An Accurate Galactic N_H Map of the North Ecliptic Pole. *Martin Elvis, Felix J. Lockman, & C. Fassnacht.* 95, 413, 70-A6 (1994)

Single-Sideband Calibration for CO, ^{13}CO, HCN, and CS Lines near 345 GHz. *Yangsheng Wang, Daniel T. Jaffe, Urs U. Graf, & Neal J. Evans II.* 95, 503, 71-C7 (1994)

Detection of C_3N in the Spiral Arm Gas Clouds in the Direction of Cassiopeia A. *M. B. Bell & H. E. Matthews.* 438, 223, 4-D10 (1995)

The NGC 7538 IRS 1 Region of Star Formation: Observations of the H66α Recombination Line with a Spatial Resolution of 300 AU. *R. A. Gaume, W. M. Goss, H. R. Dickel, T. L. Wilson, & K. J. Johnston.* 438, 776, 15-A1 (1995)

A Multitransition CO Study of GL 490. *George F. Mitchell, Siow Wang Lee, Jean-Pierre Maillard, Henry Matthews, Tatsuhiko I. Hasegawa, & Andrew I. Harris.* 438, 794, 15-B12 (1995)

EGRET Observations of Gamma-Ray Emission from the Interstellar Gas in Orion. *S. W. Digel, S. D. Hunter, & R. Mukherjee.* 441, 270, 63-A11 (1995)

Atomic Iron in Its ^{5}D Ground State: A Direct Measurement of the $J = 0 \leftarrow 1$ and $J = 1 \leftarrow 2$ Fine-Structure Intervals. *John M. Brown & Kenneth M. Evenson.* 441, L97, 76-D11 (1995)

Widespread Molecular Emission in the Galactic Plane from Species Other Than ^{12}CO. *Harvey S. Liszt.* 442, 163, 79-D8 (1995)

Observations of Magnetic Fields in Diffuse Clouds. *P. C. Myers, A. A. Goodman, R. Güsten, & C. Heiles.* 442, 177, 79-E11 (1995)

The Relationship of Dense Gas to Star Formation in the Monoceros OB1 Dark Cloud. *Grace A. Wolf-Chase, Christopher K. Walker, & Charles J. Lada.* 442, 197, 79-G9 (1995)

The Distribution of Molecular and Neutral Gas and Magnetic Fields near the Bipolar H II Region S106. *D. A. Roberts, R. M. Crutcher, & T. H. Troland.* 442, 208, 80-A9 (1995)

Very Hot Ionized Material in Sagittarius B2 F. *David M. Mehringer, C. G. De Pree, Ralph A. Gaume, W. M. Goss, & Mark J. Claussen.* 442, L29, 85-A5 (1995)

The *Hubble Space Telescope* Quasar Absorption Line Key Project. X. Galactic H I 21 Centimeter Emission toward 143 Quasars and Active Galactic Nuclei. *Felix J. Lockman & Blair D. Savage.* 97, 1, 11-B1 (1995)

H110α Observations of Sagittarius A West: Ionized Gas at Peculiar Velocities at the Galactic Center. *Farhad Yusef-Zadeh, Jun-Hui Zhao, & W. M. Goss.* 442, 646, 88-G9 (1995)

A Fast Expanding H I Shell in W44: A Preexisting Wind-blown Shell Overtaken by a Supernova Remnant. *Bon-Chul Koo & Carl Heiles.* 442, 679, 89-E1 (1995)

A New Method for Determining the CO to H_2 Conversion Factor for Translucent Clouds. *Loris Magnani & Joseph S. Onello.* 443, 169, 97-D9 (1995)

The Molecular Environment of the HH 34 System. *G. Anglada, R. Estalella, R. Mauersberger, J. M. Torrelles, L. F. Rodríguez, J. Cantó, P. T. P. Ho, & P. D'Alessio.* 443, 682, 107-C9 (1995)

The Distribution of Molecules in the Core of OMC-1. *E. C. Sutton, R. Peng, W. C. Danchi, P. A. Jaminet, G. Sandell, & A. P. G. Russell.* 97, 455, 18-E12 (1995)

6 Centimeter Formaldehyde Absorption toward the Sagittarius B Star-forming Complex. *David M. Mehringer, Patrick Palmer, & W. M. Goss.* 97, 497, 19-B1 (1995)

Line Broadening in the W3(OH) Champagne Flow. *E. R. Keto, W. J. Welch, M. J. Reid, & P. T. P. Ho.* 444, 765, 127-A8 (1995)

Composition of Interstellar Clouds in the Disk and Halo. III. HD 149881. *Lyman Spitzer, Jr., & Edward L. Fitzpatrick.* 445, 196, 135-C3 (1995)

A Cold Massive Interstellar Cloud within 120 Parsecs of the Sun: K I Optical and H I Radio Observations. *Joaquín Trapero, John E. Beckman, Miquel Serra-Ricart, Rodney D. Davies, Robert A. Watson, & Ramón J. García López.* 445, 231, 135-F9 (1995)

An Extremely High Velocity Multipolar Outflow around IRAS 20050+2720. *R. Bachiller, A. Fuente, & M. Tafalla.* 445, L51, 141-A13 (1995)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. II. The $4° < |b| < 5°$ Strips. *H. Izumiura, R. Catchpole, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, K. Sekiguchi, N. Ukita, & I. Yamamura.* 98, 271, 25-E14 (1995)

The Magnetic Fields in the Galactic Center: Detection of H I Zeeman Splitting. *R. L. Plante, K. Y. Lo, & R. M. Crutcher.* 445, L113, 151-B4 (1995)

CS(2–1) Emission from Dense Gas in the Bipolar Outflow of CRL 618. *Arsen R. Hajian, J. A. Phillips, & Yervant Terzian.* 446, 244, 156-E7 (1995)

Ammonia Observations of NGC 6334 I(N). *T. B. H. Kuiper, W. L. Peters III, J. R. Forster, F. F. Gardner, & J. B. Whiteoak.* 446, 692, 165-E13 (1995)

Patterns of High-Velocity Molecular Gas near Sagittarius A*. *H. S. Liszt & W. B. Burton.* 98, 679, 32-F4 (1995)

Neutral Hydrogen Absorption Measurements of Four Distant Pulsars and the Electron Density in the Inner Galaxy. *J. M. Weisberg, M. H. Siegel, D. A. Frail, & S. Johnston.* 447, 204, 175-A10 (1995)

The Dense Gas Component of Outflows in the Monoceros OB1 Dark Cloud. *Grace A. Wolf-Chase & Christopher K. Walker.* 447, 244, 175-F4 (1995)

A Sensitive Search for Galactic High-Velocity H I Clouds. *Edward M. Murphy, Felix J. Lockman, & Blair D. Savage.* 447, 642, 185-A4 (1995)

The Large-Scale Structure, Kinematics, and Evolution of IC 1396. *Nimesh A. Patel, Paul F. Goldsmith, Ronald L. Snell, Thomas Hezel, & Taoling Xie.* 447, 721, 186-A4 (1995)

Thermal Structure of Mixing Layers in Bipolar Outflows. *Susana Lizano & Carlo Giovanardi.* 447, 742, 186-C1 (1995)

Radiative Hyperfine Transitions. *R. H. Garstang.* 447, 962, 189-B6 (1995)

The Vertical Distribution and Kinematics of H I and Mass Models of the Galactic Disk. *Sangeeta Malhotra.* 448, 138, 194-A11 (1995)

Physical Properties of Dense Cores: DCO^+ Observations. *Harold M. Butner, Elizabeth A. Lada, & Robert B. Loren.* 448, 207, 195-A11 (1995)

A Comparison of Diffuse Ionized and Neutral Hydrogen Away from the Galactic Plane: Hα-emitting H I Clouds. *R. J. Reynolds, S. L. Tufte, D. T. Kung, P. R. McCullough, & C. Heiles.* 448, 715, 204-E12 (1995)

Radio Recombination Line Observations of Partially Ionized Gas in Galactic H II Regions. *Joseph S. Onello & J. A. Phillips.* 448, 727, 204-G1 (1995)

Detection of a Circumstellar Gas around DM Tauri: A Protoplanetary Disk around a Single Star? *Toshihiro Handa, Shoken M. Miyama, Takuya Yamashita, Toshihiro Omodaka, Yoshimi Kitamura, Masahiko Hayashi, Toshikazu Onishi, Ronald L. Snell, Stephen E. Strom, Karen M. Strom, Michael F. Skrutskie, Suzan Edwards, Nagayoshi Ohashi, Kazuyoshi Sunada, Masao Saito, Yasuo Fukui, Akira Mizuno, Jun-ichi Watanabe, & Hirokazu Kataza.* 449, 894, 225-B1 (1995)

VLA Spectral Line Observations of a Shocked Cold H II Region in G70.7+1.2. *Joseph S. Onello, C. G. DePree, J. A. Phillips, & W. M. Goss.* 449, L127, 227-B8 (1995)

H I Absorption Toward the Nucleus of the Powerful Radio Galaxy Cygnus A: Evidence for an Atomic Obscuring Torus? *J. E. Conway & P. R. Blanco.* 449, L131, 227-C1 (1995)

VLA OH Observations of High Negative Velocity Gas toward Sagittarius A West: A High-Velocity Cloud Interacting with the Galactic Center. *Jun-Hui Zhao, W. M. Goss, & Paul T. P. Ho.* 450, 122, 229-F9 (1995)

The Collision Origin of Cohen's Stream. *Christopher M. Tamanaha.* 450, 638, 239-E12 (1995)

Observation of Infrared and Radio Lines of Molecules toward GL 2591 and Comparison to Physical and Chemical Models. *John S. Carr, Neal J. Evans II, J. H. Lacy, & Shudong Zhou.* 450, 667, 240-A7 (1995)

Fourier Transform Spectroscopy of the Orion Molecular Cloud Core. *E. Serabyn & E. W. Weisstein.* 451, 238, 249-C3 (1995)

The Sagittarius B2 Star-forming Region. II. High-Resolution H66α Observations of Sagittarius B2 North. *C. G. De Pree, R. A. Gaume, W. M. Goss, & M. J. Claussen.* 451, 284, 249-G6 (1995)

Thermal Balance in Dense Molecular Clouds: Radiative Cooling Rates and Emission-Line Luminosities. *David A. Neufeld, Stephen Lepp, & Gary J. Melnick.* 100, 132, 47-F2 (1995)

Discovery of Highly Ionized High-Velocity Clouds toward Markarian 509. *Kenneth R. Sembach, Blair D. Savage, Limin Lu, & Edward M. Murphy.* 451, 616, 255-F12 (1995)

Zeeman Effect Observations of H I Emission Profiles. I. Magnetic Field Limits for Three Regions Based on Observations Corrected for Polarized Beam Structure. *Gerrit L. Verschuur.* 451, 624, 255-G10 (1995)

Search for 6 Centimeter Formaldehyde Masers in 22 Galactic Star-forming Regions. *David M. Mehringer, W. M. Goss, & Patrick Palmer.* 452, 304, 266-C8 (1995)

Dense Gas in the DR 21 Region: High-Resolution Imaging of the NH_3 Inversion Lines. *T. L. Wilson, R. A. Gaume, K. J. Johnston, & A. R. Tieftrunk.* 452, 693, 274-C4 (1995)

Study of Structure and Small-Scale Fragmentation in TMC-1. *W. D. Langer, T. Velusamy, T. B. H. Kuiper, S. Levin, E. Olsen, & V. Migenes.* 453, 293, 285-B9 (1995)

A Long-lived Disk around the Red Rectangle? *M. Jura, S. P. Balm, & C. Kahane.* 453, 721, 293-F13 (1995)

Warm Molecular Gas Associated with Cometary H II Regions. *Yolanda Gómez, Guido Garay, & Susana Lizano.* 453, 727, 293-G8 (1995)

The Infrared Nebula and Outflow in Lynds 483. *G. A. Fuller, E. A. Lada, C. R. Masson, & P. C. Myers.* 453, 754, 294-C3 (1995)

Independent Confirmation of the 8.665 GHz Hyperfine Line of $^3He^+$ in W51. *M. B. Bell.* 453, 773, 294-E7 (1995)

Low-Frequency Carbon Recombination Lines in the Central Regions of the Galaxy. *W. C. Erickson, D. McConnell, & K. R. Anantharamaiah.* 454, 125, 301-A4 (1995)

Radio Monitoring of GRS 1915+105. *L. F. Rodríguez, E. Gerard, I. F. Mirabel, Y. Gómez, & A. Velázquez.* 101, 173, 55-A5 (1995)

BIMA Array CS $J = 2 \rightarrow 1$ Observations of Sagittarius B2. *David M. Mehringer.* 454, 782, 312-E8 (1995)

Silicon Monoxide in Sagittarius B2. *Y. Peng, Stuart N. Vogel, & J. E. Carlstrom.* 455, 223, 321-B14 (1995)

RADIO LINES: MOLECULAR: CIRCUMSTELLAR

Radial Velocities of Carbon Stars: CO versus Optical Measurements. *Cecilia Barnbaum.* 385, 694, 21-F10 (1992)

Detection of SiN in IRC +10216. *B. E. Turner.* 388, L35, 52-D1 (1992)

The Magnetic Collimation of Bipolar Outflows. I. Adiabatic Simulations. *James M. Stone & Michael L. Norman.* 389, 297, 63-F1 (1992)

Near-Infrared Polarized Images of a Nebula around T Tauri. *David A. Weintraub, Joel H. Kastner, B. Zuckerman, & Ian Gatley.* 391, 784, 97-F7 (1992)

Discovery of Hot Ammonia in the Proto–Planetary Nebulae CRL 618 and CRL 2688. *Jesús Martín-Pintado & Rafael Bachiller.* 391, L93, 99-G12 (1992)

Upper Limits for CO in the Old Galactic Novae NQ Vulpeculae, QU Vulpeculae, and Nova Vulpeculae 1987 from IRAM Observations. *Steven N. Shore & Jonathan Braine.* 392, L59, 113-C1 (1992)

SO and SO_2 in Mass-Loss Envelopes of Red Giants: Probes of Nonequilibrium Circumstellar Chemistry and Mass-Loss Rates. *Raghvendra Sahai & Peter G. Wannier.* 394, 320, 132-A3 (1992)

Evidence for a Wind-swept Cavity in HH 34? *Alexander Rudolph & William J. Welch.* 395, 488, 148-F3 (1992)

A Sensitive Search for Rotational Lines of Vibrationally Excited HC_5N in IRC +10°216. *M. B. Bell, P. A. Feldman, & L. W. Avery.* 396, 643, 165-D1 (1992)

High-Velocity HCO^+ Emission from L1551 IRS 5: Evidence for Wind-Cloud Interactions. *Alexander Rudolph.* 397, L111, 181-D13 (1992)

Laboratory Measurement of the Millimeter and Submillimeter Wave Spectrum of $C_2H_3^+$. *M. Bogey, M. Cordonnier, C. Demuynck, & J. L. Destombes.* 399, L103, 201-E3 (1992)

The Excitation Temperature of HC_9N in the Circumstellar Envelope of IRC +10216. *M. B. Bell, L. W. Avery, J. M. MacLeod, & H. E. Matthews.* 400, 551, 217-B12 (1992)

Mass-Loss Rates for *IRAS*-bright Red Giants: A Revised Model of Circumstellar CO Emission. *Joel H. Kastner.* 401, 337, 225-B11 (1992)

CO in the Cometary Globules of the Helix Nebula. *P. J. Huggins, R. Bachiller, P. Cox, & T. Forveille.* 401, L43, 227-F7 (1992)

A Spectral Line Survey of IRC +10216 at Millimeter and Submillimeter Wavelengths. *L. W. Avery, T. Amano, M. B. Bell, P. A. Feldman, J. W. C.*

Johns, J. M. MacLeod, H. E. Matthews, D. C. Morton, J. K. G. Watson, B. E. Turner, S. S. Hayashi, G. D. Watt, & A. S. Webster. 83, 363, 62-G3 (1992)

RADIO LINES: MOLECULAR: INTERSTELLAR

Dense Cores in Dark Clouds. VII. Line Width–Size Relations. *G. A. Fuller & P. C. Myers.* 384, 523, 8-F1 (1992)

The Molecular Core in G34.3+0.2: Millimeter Interferometric Observations of HCO^+, $H^{13}CN$, $HC^{15}N$, and SO. *Patricia Carral & William J. Welch.* 385, 244, 15-A4 (1992)

Strongly Shocked Interstellar Gas in IC 443. I. High-Resolution Molecular Observations. *Z. Wang & N. Z. Scoville.* 386, 158, 26-B3 (1992)

A CO $J = 2 \rightarrow 1$ Study of the Outflow Sources GL 490, GS 2591, M8E-IR, and W3 IRS 5. *George F. Mitchell, Tatsuhiko I. Hasegawa, & Jason Schella.* 386, 604, 32-G6 (1992)

A CO Study of Sharpless 171: Evidence for Interaction between the H II Region and Its Neighboring Molecular Cloud. *Ji Yang & Yasuo Fukui.* 386, 618, 33-A8 (1992)

Interstellar Matter in Early-Type Galaxies. II. The Relationship between Gaseous Components and Galaxy Types. *Joel N. Bregman, David E. Hogg, & Morton S. Roberts.* 387, 484, 44-F9 (1992)

Kinematics and Morphology of Material Occulting ζ Ophiuchi. *H. S. Liszt.* 390, 226, 76-G1 (1992)

Global Star Formation in the L1630 Molecular Cloud. *Elizabeth A. Lada.* 393, L25, 120-D7 (1992)

Problems with the Standard Theory of Three-dimensional Masers. *David A. Neufeld.* 393, L37, 120-F1 (1992)

IRAS 14070+0525: An OH Gigamaser at $z = 0.265$. *Willem A. Baan, James Rhoads, Karl Fisher, Daniel R. Altschuler, & Aubrey Haschick.* 396, L99, 167-E1 (1992)

First-Order Fermi Acceleration in Spherically Symmetric Flows: Solutions Including Quadratic Losses. *Peter A. Becker.* 397, 88, 169-B6 (1992)

Submillimeter Detection of Extragalactic C I Emission: IC 342. *Thomas H. Büttgenbach, Jocelyn Keene, T. G. Phillips, & Christopher K. Walker.* 397, L15, 173-C1 (1992)

IRAS F10214+4724: An Extended CO Emission Source at $z = 2.2867$. *Robert L. Brown & Paul A. Vanden Bout.* 397, L19, 173-C6 (1992)

Aperture Synthesis CO ($J = 3$–2) Observations of a Protogalaxy Candidate IRAS F10214+4724. *R. Kawabe, K. Sakamoto, S. Ishizuki, & M. Ishiguro.* 397, L23, 173-C12 (1992)

The Detection of a New, Nonmasing Transition of Methanol at 28.3 GHz. *V. I. Slysh, S. V. Kalenskii, & I. E. Val'tts.* 397, L43, 173-F3 (1992)

Detection of the Quadrupole Hyperfine Structure in $HCNH^+$. *L. M. Ziurys, A. J. Apponi, & J. T. Yoder.* 397, L123, 181-F6 (1992)

Laboratory Measurement of the Rotational Spectrum of HCCS. *J. M. Vrtilek, C. A. Gottlieb, E. W. Gottlieb, W. Wang, & P. Thaddeus.* 398, L73, 188-C7 (1992)

Laboratory Measurement of the Millimeter and Submillimeter Wave Spectrum of $C_2H_3^+$. *M. Bogey, M. Cordonnier, C. Demuynck, & J. L. Destombes.* 399, L103, 201-E3 (1992)

Interstellar H_3O^+ and Its Relation to the O_2 and H_2O Abundances. *T. G. Phillips, Ewine F. van Dishoeck, & Jocelyn Keene.* 399, 533, 204-E1 (1992)

Discovery of Neutral Hydrogen 21 Centimeter Absorption at Redshift 0.25 toward PKS 1413+135. *C. L. Carilli, Eric S. Perlman, & John T. Stocke.* 400, L13, 214-C1 (1992)

VLBI Observations of the 6.7 GHz Methanol Masers toward W3(OH). *K. M. Menten, M. J. Reid, P. Pratap, J. M. Moran, & T. L. Wilson.* 401, L39, 227-F1 (1992)

The Environments of Young Stars: Mid-Infrared and Molecular Line Imaging. *Eric Keto, Deanne Proctor, Roger Ball, John Arens, & Garrett Jernigan.* 401, L113, 233-E11 (1992)

RADIO LINES: STARS

An *IRAS* Survey of Star-forming Regions toward Cygnus. *Sten F. Odenwald & Phil R. Schwartz.* 405, 706, 51-G7 (1993)

Laboratory Spectroscopy of MgNC: The First Radioastronomical Identification of Mg-bearing Molecule. *Kentarou Kawaguchi, Eriko Kagi, Tsuneo Hirano, Shuro Takano, & Shuji Saito.* 406, L39, 61-B1 (1993)

High-Excitation SiO Maser Emission in VY Canis Majoris: Detection of the $v = 4$ $J = 5$–4 Transition. *J. Cernicharo, V. Bujarrabal, & J. L. Santarén.* 407, L33, 75-D6 (1993)

Atomic Carbon in the Envelope of IRC +10216. *Jocelyn Keene, K. Young, T. G. Phillips, Thomas H. Büttgenbach, & John E. Carlstrom.* 415, L131, 200-E1 (1993)

The Location of Warm HC_3N and Warm HC_5N Gas in the Circumstellar Envelope of IRC +10216. *M. B. Bell.* 417, 305, 221-C9 (1993)

C_3S and C_5S in IRC +10216. *M. B. Bell, L. W. Avery, & P. A. Feldman.* 417, L37, 223-C1 (1993)

New OH/IR Stars from Color-selected *IRAS* Sources. III. A Complete Survey. *Jayaram N. Chengalur, B. M. Lewis, J. Eder, & Yervant Terzian.* 89, 189, 51-D3 (1993)

The Nature of the Radio Recombination Line Emission from MWC 349A. *M. A. Gordon.* 421, 314, 19-G7 (1994)

The Discrimination between O- and C-rich Circumstellar Envelopes from Molecular Observations. *V. Bujarrabal, A. Fuente, & A. Omont.* 421, L47, 22-B1 (1994)

A Millimeter-Wavelength Survey of S Stars for Mass Loss and Chemistry. *John H. Bieging & William B. Latter.* 422, 765, 41-D1 (1994)

The Spatial Size of the SiO Masers in R Leonis Derived from Lunar Occultations. *J. Cernicharo, W. Brunswig, G. Paubert, & S. Liechti.* 423, L143, 61-C13 (1994)

Modeling of the Hydrogen Maser Disk in MWC 349. *Victor O. Ponomarev, Howard A. Smith, & Vladimir S. Strelnitski.* 424, 976, 77-A1 (1994)

Three-dimensional Structure of the Circumstellar Envelope of CRL 618 based on the ^{13}CO $J = 1$–0 Mapping Observations. *Issei Yamamura, Katsunori M. Shibata, Takashi Kasuga, & Shuji Deguchi.* 427, 406, 114-G13 (1994)

Rotation in the Ionized Envelope of MWC 349A. *Luis F. Rodríguez & Timothy S. Bastian.* 428, 324, 132-B12 (1994)

Supplement to the Arecibo 1612 MHz Survey of Color-selected *IRAS* Sources. *B. M. Lewis.* 93, 549, 50-D9 (1994)

Exotic Fluoride Molecules in IRC +10216: Confirmation of AlF and Searches for MgF and CaF. *L. M. Ziurys, A. J. Apponi, & T. G. Phillips.* 433, 729, 220-B7 (1994)

The Circumstellar Environment of IRAS 05338−0624. *Joseph P. McMullin, Lee G. Mundy, & Geoff A. Blake.* 437, 305, 287-D6 (1994)

Observations of Molecular Envelopes of Late-Type Stars: CRL 618, CRL 2688, CRL 3068, and CIT 6. *Sadafumi Fukasaku, Yasuhiro Hirahara, Akimasa Masuda, Kentarou Kawaguchi, Shin-ichi Ishikawa, Norio Kaifu, & William M. Irvine.* 437, 410, 288-F13 (1994)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. I. The $7° < |B| < 8°$ Strips. *H. Izumiura, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, N. Ukita, & I. Yamamura.* 437, 419, 288-G11 (1994)

Full Synthesis Maps of Circumstellar SiC_2 in IRC +10216. *P. D. Gensheimer, Lauren Likkel, & L. E. Snyder.* 439, 445, 27-C3 (1995)

^{13}CO Interferometric Observations of the Central Core of CRL 2688. *Issei Yamamura, Takashi Onaka, Fumio Kamijo, Shuji Deguchi, & Nobuharu Ukita.* 439, L13, 29-G4 (1995)

H I Line Measurements of Eight Southern Pulsars. *Bärbel Koribalski, Simon Johnston, J. M. Weisberg, & W. Wilson.* 441, 756, 72-C13 (1995)

Intense Radio Outburst from the Supermassive Star η Carinae. *R. A. Duncan, S. M. White, J. Lim, G. J. Nelson, S. A. Drake, & M. R. Kundu.* 441, L73, 76-A6 (1995)

Detection of MgCN in IRC +10216: A New Metal-bearing Free Radical. *L. M. Ziurys, A. J. Apponi, M. Guélin, & J. Cernicharo.* 445, L47, 141-A5 (1995)

A CO(3–2) Survey of Nearby Mira Variables. *K. Young.* 445, 872, 147-C1 (1995)

High-Velocity Gas Associated with the Massive, Evolved Star G25.5+0.2. *D. S. Shepherd, E. Churchwell, & W. M. Goss.* 448, 426, 198-A9 (1995)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. III. Kinematics of the Bulge Stars. *H. Izumiura, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, N. Ukita, & I. Yamamura.* 453, 837, 295-D7 (1995)

RADIO SOURCES: EXTENDED

Correlated Radio and Optical Asymmetries in Powerful Radio Sources. *Patrick J. McCarthy, Wil van Breugel, & Vijay K. Kapahi.* 371, 478, 67-D11 (1991)

Diffuse Galactic Emission at Millimetric Wavelengths. *P. Andreani, G. Dall'Oglio, L. Martinis, L. Piccirillo, L. Pizzo, L. Rossi, & C. Venturino.* 375, 148, 112-G5 (1991)

The Brightness Temperature of the South Celestial Pole and the Temperature of the Cosmic Background Radiation Measured at 36.6 and 12 Centimeter Wavelength. *G. Sironi, G. Bonelli, & M. Limon.* 378, 550, 159-C1 (1991)

Cosmic Microwave Background and Galactic Quadrupoles in the Millimeter Region. *Paolo de Bernardis, Silvia Masi, & Nicola Vittorio.* 382, 515, 208-A1 (1991)

RADIO SOURCES: GALAXIES

H II Regions in M82: High-Resolution Millimeter Continuum Observations. *J. E. Carlstrom & Philipp P. Kronberg.* 366, 422, 8-B1 (1991)

Detection of Polarized Ultraviolet Emission from the High-Redshift Radio Galaxy 3C 265. *Buell T. Jannuzi & Richard Elston.* 366, L69, 11-C5 (1991)

A Change in the Cluster Environments of Radio Galaxies with Cosmic Epoch. *G. J. Hill & S. J. Lilly.* 367, 1, 12-A13 (1991)

A Technique for Using Radio Jets as Extended Gravitational Lensing Probes. *Philipp P. Kronberg, Charles C. Dyer, E. Margaret Burbidge, & Vesa T. Junkkarinen.* 367, L1, 17-B1 (1991)

Lyman-α Companions to High-z Quasars. *Esther M. Hu, Antoinette Songaila, Lennox L. Cowie, & Alan Stockton.* 368, 28, 23-D9 (1991)

Fanaroff-Riley I Galaxies as the Parent Population of BL Lacertae Objects. II. Optical Constraints. *P. Padovani & C. M. Urry.* 368, 373, 29-F6 (1991)

A Nonthermal Radio Halo Surrounding M82. *E. R. Seaquist & Nils Odegard.* 369, 320, 41-F13 (1991)

First Results from the Faint Object Camera: Observations of PKS 0521−36. *F. Macchetto, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, & W. B. Sparks.* 369, L55, 46-A1 (1991)

The Escape of Lyman-Alpha Radiation from a Multiphase Interstellar Medium. *David A. Neufeld.* 370, L85, 59-D13 (1991)

Multifrequency VLA, VLBI, and Single-Dish Observations of the Quasar 4C 39.25. *Alan P. Marscher, Yun Fei Zhang, David B. Shaffer, Hugh D. Aller, & Margo F. Aller.* 371, 491, 67-E12 (1991)

Statistical Analysis of Power-Size-Redshift Distributions of Extragalactic Jets. *Alexander Rosen & Paul J. Wiita.* 371, 501, 67-F10 (1991)

OX 169: Evidence for a Recent Merger. *Alan Stockton & Tony Farnham.* 371, 525, 68-A13 (1991)

The Influence of High-Density Environment on the Radio–Far-Infrared Correlation of Spiral Galaxies. *T. K. Menon.* 372, 419, 81-A7 (1991)

Gaseous Halos of Elliptical Galaxies, the Cosmic Evolution of Their Radio Sizes, and the Phenomenon of Compact Steep-Spectrum Sources. *Gopal-Krishna & Paul J. Wiita.* 373, 325, 92-B1 (1991)

HST Observations of 3C 66B: A Double-stranded Optical Jet. *F. Macchetto, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, W. B. Sparks, & G. K. Miley.* 373, L55, 97-C10 (1991)

Deep Spectroscopy under High Spatial Resolution of the High-Redshift Radio Source 3CR 368: The Monster Elucidated. *F. Hammer, O. Le Fèvre, & D. Proust.* 374, 91, 99-B7 (1991)

The Complete Sample of 1 Jansky BL Lacertae Objects. I. Summary Properties. *M. Stickel, P. Padovani, C. M. Urry, J. W. Fried, & H. Kühr.* 374, 431, 104-E1 (1991)

Optical Polarization of a Complete Sample of Radio Sources. *C. D. Impey, C. R. Lawrence, & S. Tapia.* 375, 46, 111-E10 (1991)

The Interstellar Medium of the Hot-Spot Galaxy NGC 2903. *James M. Jackson, Andreas Eckart, Murray Cameron, Wolfgang Wild, Paul T. P. Ho, Richard W. Pogge, & Andrew I. Harris.* 375, 105, 112-C9 (1991)

Correlations between Far-Infrared, Radio, and Blue Luminosities of Spiral Galaxies. *J. J. Condon, M. L. Anderson, & G. Helou.* 376, 95, 126-B7 (1991)

Radio Source Orientation and the Angular Diameter–Redshift Relation. *L. I. Onuora.* 377, 36, 138-E1 (1991)

Compact Starbursts in Ultraluminous Infrared Galaxies. *J. J. Condon, Z.-P. Huang, Q. F. Yin, & T. X. Thuan.* 378, 65, 151-G5 (1991)

Superclustering at High Redshifts. *Michael J. West.* 379, 19, 163-C7 (1991)

What Are the Gigahertz Peaked-Spectrum Radio Sources? *C. P. O'Dea, S. A. Baum, & C. Stanghellini.* 380, 66, 176-G5 (1991)

The Discovery of a Young Radio Galaxy at $z = 2.390$: Probing Initial Star Formation at $z \leq 3.0$. *Rogier A. Windhorst, David Burstein, Doug F. Mathis, Lyman W. Neuschaefer, F. Bertola, L. M. Buson, David C. Koo, Keith Matthews, Peter D. Barthel, & K. C. Chambers.* 380, 362, 182-G1 (1991)

Bounds on Intergalactic Compact Objects from Observations of Compact Radio Sources. *Aggeliki Kassiola, Israel Kovner, & Roger D. Blandford.* 381, 6, 189-B4 (1991)

The Starburst Ring around the Seyfert Nucleus in NGC 7469. *A. S. Wilson, T. T. Helfer, C. A. Haniff, & M. J. Ward.* 381, 79, 190-A6 (1991)

3C 390.3: Modeling Variable Profile Humps. *Wei Zheng, Sylvain Veilleux, & Steven A. Grandi.* 381, 418, 196-A1 (1991)

Polarized Radio Emission from the Edge-on Spiral Galaxies NGC 891 and NGC 4565. *S. Sukumar & R. J. Allen.* 382, 100, 201-D1 (1991)

The Extraordinary Radio Source 3C 442. *Neil F. Comins & Frazer N. Owen.* 382, 108, 201-E1 (1991)

The Relationship between the Carbon Monoxide Intensity and the Radio Continuum Emission in Spiral Galaxies. *David S. Adler, Ronald J. Allen, & K. Y. Lo.* 382, 475, 207-D12 (1991)

Fanaroff-Riley I Galaxies as the Parent Population of BL Lacertae Objects. III. Radio Constraints. *C. M. Urry, P. Padovani, & M. Stickel.* 382, 501, 207-F13 (1991)

The Confinement and Cosmological Evolution of Extragalactic Radio Source Components. *A. A. Ubachukwu, S. E. Okoye, & L. I. Onuora.* 383, 56, 212-F7 (1991)

The Ultraviolet Spectra of Nearby Radio Galaxies. *William C. Keel & Rogier A. Windhorst.* 383, 135, 213-F3 (1991)

Multifrequency Radio Observations of Cygnus A: Spectral Aging in Powerful Radio Galaxies. *C. L. Carilli, R. A. Perley, J. W. Dreher, & J. P. Leahy.* 383, 554, 221-B9 (1991)

RADIO SOURCES: GENERAL

Comparison of VLBI Radio-Core and X-Ray Flux Densities of Extragalactic Radio Sources. *Steven D. Bloom & Alan P. Marscher.* 366, 16, 1-C5 (1991)

A New Catalog of 53,522 4.85 GHz Sources. *Robert H. Becker, Richard L. White, & Alan L. Edwards.* 75, 1, 1-B1 (1991)

BL Lacertae Objects and Radio-loud Quasars within an Evolutionary Unified Scheme. *F. Vagnetti, E. Giallongo, & A. Cavaliere.* 368, 366, 29-E11 (1991)

The Fourth MIT–Green Bank 5 GHz Survey. *Mark Griffith, Glen Langston, Mike Heflin, Sam Conner, & Bernard Burke.* 75, 801, 12-C5 (1991)

The 87GB Catalog of Radio Sources Covering $0° < \delta < +75°$ at 4.85 GHz. *P. C. Gregory & J. J. Condon.* 75, 1011, 17-A1 (1991)

VLA and VLBI Angular Broadening Measurements: The Distribution of Interstellar Scattering at Low Galactic Latitudes. *A. L. Fey, S. R. Spangler, & J. M. Cordes.* 372, 132, 75-F1 (1991)

Discovery of an Infrared Nucleus in Cygnus A: An Obscured Quasar Revealed? *S. Djorgovski, N. Weir, K. Matthews, & J. R. Graham.* 372, L67, 85-C5 (1991)

The Expansion of the Crab Nebula. *M. F. Bietenholz, P. P. Kronberg, D. E. Hogg, & A. S. Wilson.* 373, L59, 97-D5 (1991)

The Emission-Line Properties of Steep Radio Spectrum Quasars. *Michael R. Corbin.* 375, 503, 119-A11 (1991)

A Double Radio Source at the Center of the Outflow in L723. *Guillem Anglada, Robert Estalella, Luis F. Rodríguez, José M. Torrelles, Rosario López, & Jorge Cantó.* 376, 615, 134-A7 (1991)

Does the Vela Pulsar Have "Wisps"? *M. F. Bietenholz, D. A. Frail, & T. H. Hankins.* 376, L41, 137-C1 (1991)

An X-Ray and Radio Study of Steep-Spectrum Radio Sources. II. Four Fields from a 22 MHz Polar Cap Survey. *P. E. Dewdney, C. H. Costain, I. McHardy, A. G. Willis, D. E. Harris, & C. P. Stern.* 76, 1055, 40-D1 (1991)

Location of the Thermal Continuum Source Sagittarius D. *Dariusz C. Lis.* 379, L53, 175-B10 (1991)

The Galactic Center Radio Source Shines below the Compton Limit. *C. R. Gwinn, R. M. Danen, J. Middleditch, L. M. Ozernoy, & T. Kh. Tran.* 381, L43, 199-B7 (1991)

Emission-Line and Continuum Properties of 92 Bright QSOs: Luminosity Dependence and Differences between Radio-selected and Optically Selected Samples. *Charles C. Steidel & Wallace L. W. Sargent.* 382, 433, 207-A1 (1991)

Hubble Space Telescope Sample of Radio-loud Quasars: Ultraviolet Spectra of the First 31 Quasars. *Beverley J. Wills, Keith L. Thompson, Mingsheng Han, H. Netzer, D. Wills, J. A. Baldwin, G. J. Ferland, I. W. A. Browne, & M. S. Brotherton.* 447, 139, 174-A11 (1995)

RADIO SOURCES: IDENTIFICATIONS

Optical and Radio Observations of the Binary Pulsar 1855+09: Evolution of Pulsar Magnetic Fields and Low-Mass White Dwarf Cooling. *S. R. Kulkarni, S. Djorgovski, & A. R. Klemola.* 367, 221, 14-G4 (1991)

The Fourth MIT–Green Bank 5 GHz Survey. *Mark Griffith, Glen Langston, Mike Heflin, Sam Conner, & Bernard Burke.* 75, 801, 12-C5 (1991)

Deep Spectroscopy under High Spatial Resolution of the High-Redshift Radio Source 3CR 368: The Monster Elucidated. *F. Hammer, O. Le Fèvre, & D. Proust.* 374, 91, 99-B7 (1991)

Diffuse Galactic Emission at Millimetric Wavelengths. *P. Andreani, G. Dall'Oglio, L. Martinis, L. Piccirillo, L. Pizzo, L. Rossi, & C. Venturino.* 375, 148, 112-G5 (1991)

An X-Ray and Radio Study of Steep-Spectrum Radio Sources. II. Four Fields from a 22 MHz Polar Cap Survey. *P. E. Dewdney, C. H. Costain, I. McHardy, A. G. Willis, D. E. Harris, & C. P. Stern.* 76, 1055, 40-D1 (1991)

Detection of a New Carbon-Chain Molecule, CCO. *Masatoshi Ohishi, Hiroko Suzuki, Shin-ichi Ishikawa, Chikashi Yamada, Hideto Kanamori, William M. Irvine, Ronald D. Brown, Peter D. Godfrey, & Norio Kaifu.* 380, L39, 181-E11 (1991)

RADIO SOURCES: LINES

VLA Radio Recombination Line Observations of Sagittarius A West. *D. A. Roberts, W. W. Goss, J. H. van Gorkom, & J. P. Leahy.* 366, L15, 6-B13 (1991)

A Search for Vibrationally Excited H_2O at 68 GHz. *S. J. Petuchowski & C. L. Bennett.* 367, 168, 14-B4 (1991)

Detection of ^{13}C Isotopomers of HC_5N ($J = 9–8$) in the Circumstellar Envelope of IRC +10216. *M. B. Bell & P. A. Feldman.* 367, L33, 17-E8 (1991)

The Millimeter-Wave Spectrum of Highly Vibrationally Excited SiO. *R. Mollaaghababa, C. A. Gottlieb, J. M. Vrtilek, & P. Thaddeus.* 368, L19, 28-D1 (1991)

Astronomical Detection of H_2CCC. *J. Cernicharo, C. A. Gottlieb, M. Guélin, T. C. Killian, G. Paubert, P. Thaddeus, & J. M. Vrtilek.* 368, L39, 35-C7 (1991)

Astronomical Detection of H_2CCCC. *J. Cernicharo, C. A. Gottlieb, M. Guélin, T. C. Killian, P. Thaddeus, & J. M. Vrtilek.* 368, L43, 35-C11 (1991)

Radio Recombination Lines from Diffuse Interstellar Gas in the Galaxy. *J. C. Cersosimo & J. S. Onello.* 370, 225, 50-A5 (1991)

Laboratory Detection of HC_9N Using a Fourier Transform Microwave Spectrometer. *Minoru Iida, Yasuhiro Ohshima, & Yasuki Endo.* 371, L45, 66-F7 (1991)

The Dynamics and Physical Properties of the Cometary Nebula G29.96−0.02. *Douglas O. S. Wood & Ed Churchwell.* 372, 199, 76-D8 (1991)

VLBI Observations of Interstellar Ammonia Masers. *Preethi Pratap, Karl M. Menten, Mark J. Reid, James M. Moran, & C. Malcolm Walmsley.* 373, L13, 91-B12 (1991)

Interstellar Scattering Effects on the Detection of Narrow-Band Signals. *James M. Cordes & T. Joseph Lazio.* 376, 123, 126-D10 (1991)

Molecular Outflows Associated with Young Stellar Objects in the L1641 Region of Orion. *James A. Morgan, F. Peter Schloerb, Ronald L. Snell, & John Bally.* 376, 618, 134-A12 (1991)

The Dense Molecular Envelope around the Compact H II Region G5.89−0.39 (W28 A2). *Yolanda Gómez, Luis F. Rodríguez, Guido Garay, & James M. Moran.* 377, 519, 146-B9 (1991)

The Discovery of a New, Very Strong, and Widespread Interstellar Methanol Maser Line. *Karl M. Menten.* 380, L75, 188-E1 (1991)

High-Resolution Spectroscopy of Partially Ionized Gas around H II Regions. *Joseph S. Onello, J. A. Phillips, & Yervant Terzian.* 383, 693, 222-G6 (1991)

High-Velocity OH in Absorption: A New Tracer of Shocked Gas in Outflows? *A. Ruiz, L. F. Rodríguez, J. Cantó, & I. F. Mirabel.* 398, 139, 183-F3 (1992)

Rotation and Outflow in Compact H II Regions: VLA Observations of the Molecular and Ionized Gas in NGC 6334A and NGC 6334F. *C. G. De Pree, L. F. Rodríguez, H. R. Dickel, & W. M. Goss.* 447, 220, 175-C8 (1995)

RADIO SOURCES: SPECTRA

Theoretical Determination of the Spectroscopic Constants of the MgC Molecule. *Marcos A. Castro, Sylvio Canuto, & Florian Müller-Plathe.* 367, L69, 22-D3 (1991)

Lyman-α Companions to High-z Quasars. *Esther M. Hu, Antoinette Songaila, Lennox L. Cowie, & Alan Stockton.* 368, 28, 23-D9 (1991)

Circular Polarization in 1612 MHz OH Maser Emission from OH/IR Stars. *Philip J. Zell & John D. Fix.* 369, 506, 44-A9 (1991)

Multifrequency VLA Observations of Radio Continuum from IRAS 16293−2422. *R. Estalella, G. Anglada, L. F. Rodríguez, & G. Garay.* 371, 626, 69-C12 (1991)

Relativistic Electron Populations in Cassiopeia A. *M. Anderson, L. Rudnick, P. Leppik, R. Perley, & R. Braun.* 373, 146, 87-G4 (1991)

An X-Ray and Radio Study of Steep-Spectrum Radio Sources. II. Four Fields from a 22 MHz Polar Cap Survey. *P. E. Dewdney, C. H. Costain, I. McHardy, A. G. Willis, D. E. Harris, & C. P. Stern.* 76, 1055, 40-D1 (1991)

A Spectral Study of Four Millisecond Pulsars. *R. S. Foster, L. Fairhead, & D. C. Backer.* 378, 687, 161-A1 (1991)

What Are the Gigahertz Peaked-Spectrum Radio Sources? *C. P. O'Dea, S. A. Baum, & C. Stanghellini.* 380, 66, 176-G5 (1991)

First Absolute Wind Measurements in the Middle Atmosphere of Mars. *Emmanuel Lellouch, Jeffrey J. Goldstein, Stephen W. Bougher, Gabriel Paubert, & Jan Rosenqvist.* 383, 401, 217-C5 (1991)

RADIO SOURCES: 21 CM RADIATION

Warm Neutral Halos around Molecular Clouds. III. Interpretation of H I and CO $J = 1–0$ Data. *B-G Andersson, Peter G. Wannier, & Mark Morris.* 366, 464, 8-F1 (1991)

Properties of the Redshift. II. Radial Variation. *W. G. Tifft.* 368, 105, 24-D1 (1991)

The Shape of the Galaxy. *Leo Blitz & David N. Spergel.* 370, 205, 49-F11 (1991)

IRAS 23545+6508, a Dissociating Star: Prototype for a New Observational Class? *P. E. Dewdney, R. S. Roger, C. R. Purton, & W. H. McCutcheon.* 370, 243, 50-C1 (1991)

Interstellar Matter in Early-Type Galaxies. I. The Catalog. *Morton S. Roberts, David E. Hogg, Joel N. Bregman, William R. Forman, & Christine Jones.* 75, 751, 11-F5 (1991)

The Neutral Hydrogen Distribution of NGC 3079. *Judith A. Irwin & E. R. Seaquist.* 371, 111, 61-D9 (1991)

Warm Neutral Halos around Molecular Clouds. II. H I and CO ($J = 1–0$) Observations. *Peter G. Wannier, B-G Andersson, Mark Morris, & Steven M. Lichten.* 75, 987, 16-B1 (1991)

VLA Observations of 21 Centimeter H I Absorption toward Cassiopeia A. *John H. Bieging, W. Miller Goss, & Eric M. Wilcots.* 75, 999, 16-F5 (1991)

The Distribution and Kinematics of Neutral Gas in M31. *Robert Braun.* 372, 54, 74-F6 (1991)

On the Population of H I Dwarf Galaxies. *David H. Weinberg, Arpad Szomoru, P. Guhathakurta, & J. H. van Gorkom.* 372, L13, 79-B11 (1991)

H I Mapping of Galaxies in the Cluster A1367. *John M. Dickey & Giuseppe Gavazzi.* 373, 347, 92-C12 (1991)

H I Deficiency in Cluster Spiral Galaxies: Dependence on Galaxy Size. *Monica Valluri & Chanda J. Jog.* 374, 103, 99-C7 (1991)

Observation of Neutral Hydrogen in the Globular Cluster NGC 2808. *D. J. Faulkner, Tania R. Scott, P. R. Wood, & Alan E. Wright.* 374, L45, 110-C6 (1991)

The Distance to the Coma Cluster Using the *B*-Band Tully-Fisher Relation. *M. Fukugita, S. Okamura, K. Tarusawa, H. J. Rood, & B. A. Williams.* 376, 8, 125-B9 (1991)

Neutral Hydrogen in the Outer Galaxy. *Athanassios Diplas & Blair D. Savage.* 377, 126, 139-E5 (1991)

A Search for Redshifted Neutral Hydrogen from Protoclusters of Galaxies. *Juan M. Uson, Durgadas S. Bagri, & Timothy J. Cornwell.* 377, L65, 150-B1 (1991)

H I Studies of the Sculptor Group Galaxies. VII. Implications on the Distribution and Nature of Dark Matter in Groups. *Daniel Puche & Claude Carignan.* 378, 487, 158-E1 (1991)

The H I Content of the Local Group Dwarf (Spheroidal or Irregular?) Galaxy Phoenix. *Claude Carignan, Serge Demers, & Stéphanie Côté.* 381, L13, 194-C1 (1991)

H I Absorption Measurements toward 15 Pulsars and the Radial Distribution of Diffuse Ionized Gas in the Galaxy. *D. A. Frail, J. M. Cordes, T. H. Hankins, & J. M. Weisberg.* 382, 168, 202-C10 (1991)

Vertical Distribution and Support of Galactic H I. *Felix J. Lockman & Curtis S. Gehman.* 382, 182, 202-D12 (1991)

A Survey of H I 21 Centimeter Emission Lines toward Supernova Remnants. *Bon-Chul Koo & Carl Heiles.* 382, 204, 202-F11 (1991)

Neutral Hydrogen Observations of Galaxies in Superclusters. *M. P. Haynes & R. Giovanelli.* 77, 331, 49-B1 (1991)

Properties of the Redshift. III. Temporal Variation. *W. G. Tifft.* 382, 396, 206-E1 (1991)

The Velocity Field of Clusters of Galaxies within 100 Megaparsecs. I. Southern Clusters. *J. R. Mould, L. Staveley-Smith, R. A. Schommer, G. D. Bothun, P. J. Hall, Ming Sheng Han, J. P. Huchra, J. Roth, W. Walsh, & A. E. Wright.* 383, 467, 220-B7 (1991)

The Relation of Dust and Atomic Gas Properties of Galaxies. *John G. Spitzak & Stephen E. Schneider.* 393, 126, 115-F1 (1992)

RADIO SOURCES: VARIABLE

Correlated Radio and Optical Variability in the BL Lacertae Object 0716+714. *A. Quirrenbach, A. Witzel, S. Wagner, F. Sanchez-Pons, T. P. Krichbaum, R. Wegner, K. Anton, U. Erkens, M. Haehnelt, J. A. Zensus, & K. J. Johnston.* 372, L71, 85-C9 (1991)

Variability of Interstellar Hydroxyl Masers. *Andrew W. Clegg & James M. Cordes.* 374, 150, 99-G11 (1991)

A Model for the Spectral Variability of BL Lacertae Objects at High Frequencies. *A. Celotti, L. Maraschi, & A. Treves.* 377, 403, 144-G1 (1991)

Coherent Radiation from Energetic Electron Streams via Collisionless Bremsstrahlung in Strong Plasma Turbulence. *James C. Weatherall & Gregory Benford.* 378, 543, 159-B8 (1991)

Daily Observations of Compact Radio Sources at 2.7 and 8.1 GHz: 1979–1987. *E. B. Waltman, R. L. Fiedler, K. J. Johnston, J. H. Spencer, D. R. Florkowski, F. J. Josties, D. D. McCarthy, & D. N. Matsakis.* 77, 379, 49-G5 (1991)

Multifrequency Observations of BL Lacertae in 1988. *N. Kawai, M. Matsuoka, J. N. Bregman, H. D. Aller, M. F. Aller, P. A. Hughes, S. A. Balbus, T. J. Balonek, K. C. Chambers, R. E. S. Clegg, S. D. Clements, R. J. Leacock, A. G. Smith, R. Goodrich, J. S. Miller, M. Hereld, M. G. Hoare, V. A. Hughes, G. K. Miley, G. H. Moriarty-Schieven, K. Matthews, G. Neugebauer, T. Ohashi, P. F. Roche, H. A. Thronson, E. Valtaoja, H. Terasranta, J. R. Webb, B. J. Wills, & D. Wills.* 382, 508, 207-G8 (1991)

Time-dependent Radio Sources in the Star-forming Region Cepheus A (East). *V. A. Hughes.* 383, 280, 215-F1 (1991)

X-Ray and Radio Pulse Phase Comparison for PSR 1509−58. *N. Kawai, R. Okayasu, W. Brinkmann, R. Manchester, A. G. Lyne, & N. D'Amico.* 383, L65, 226-D12 (1991)

REFERENCE SYSTEMS

The Analysis of Star Catalogs. I. An Intercomparison among the FK3, the FK4, and the FK5. *B. Bucciarelli, M. G. Lattanzi, & L. G. Taff.* 433, 831, 221-D13 (1994)

The Analysis of Star Catalogs. II. An Intercomparison among the GC, the N30, and the FK5 (B1950.0/FK4). *L. G. Taff & B. Bucciarelli.* 433, 845, 221-F1 (1994)

The Intercomparison of Star Catalogs. III. Comparing the AGK3, the AGK3U, the ACRS (Part 1), and the PPM to the General Catalog. *D. Daou, J. E. Morrison, & L. G. Taff.* 451, 768, 257-F12 (1995)

RELATIVITY

On the Orbital Period Change of the Binary Pulsar PSR 1913+16. *Thibault Damour & J. H. Taylor.* 366, 501, 9-C1 (1991)

Application of a General Relativistic Accretion Disk Model to LMC X-1, LMC X-3, X1608−522, and X1636−536. *Ken Ebisawa, Kazuhisa Mitsuda, & Tomoyuki Hanawa.* 367, 213, 14-F8 (1991)

Olbers's Paradox and the Spectral Intensity of the Extragalactic Background Light. *Paul S. Wesson.* 367, 399, 18-D5 (1991)

Numerical Study of a Perturbed Einstein–de Sitter Cosmological Model. *H. V. Fagundes & S. F. Kwok.* 368, 337, 29-C4 (1991)

Hubble Spheres and Particle Horizons. *Edward Harrison.* 383, 60, 212-G1 (1991)

Spherical Accretion onto Black Holes: A Complete Analysis of Stationary Solutions. *Luciano Nobili, Roberto Turolla, & Luca Zampieri.* 383, 250, 215-C9 (1991)

The Effects of Radiation Drag on Radial, Relativistic Hydromagnetic Winds. *Zhi-yun Li, Mitchell C. Begelman, & Tzihong Chiueh.* 384, 567, 9-C1 (1992)

The Magnitude-Redshift Relation. *Allen I. Janis.* 385, 391, 18-B1 (1992)

Astrophysical Jets and Theories of Gravitation. *Mario Livio & Nathan Rosen.* 387, 458, 44-D5 (1992)

On Modeling a Relativistic Hierarchical (Fractal) Cosmology by Tolman's Spacetime. I. Theory. *Marcelo B. Ribeiro.* 388, 1, 49-B1 (1992)

Light Curves of Rotating, Oscillating Neutron Stars. *T. E. Strohmayer.* 388, 138, 50-F9 (1992)

Equilibrium Stellar Systems with Spindle Singularities. *Stuart L. Shapiro & Saul A. Teukolsky.* 388, 287, 53-G10 (1992)

Rotational Properties of Strange Stars. *M. Colpi & J. C. Miller.* 388, 513, 56-F1 (1992)

On the Pulsations of Relativistic Accretion Disks and Rotating Stars: The Cowling Approximation. *James R. Ipser & Lee Lindblom.* 389, 392, 64-G1 (1992)

A Description of Semidegenerate Self-gravitating Spheres of Fermions. *M. Membrado, A. F. Pacheco, & J. Sañudo.* 390, 88, 75-B7 (1992)

PSR 0655+64: An Astrophysical Laboratory for Testing Relativistic Gravity Theories. *Itzhak Goldman.* 390, 494, 81-D11 (1992)

Application of the Improved Hartle Method for the Construction of General Relativistic Rotating Neutron Star Models. *F. Weber & N. K. Glendenning.* 390, 541, 82-B1 (1992)

On the Thermal Conductivity due to Collisions between Relativistic Degenerate Electrons. *F. X. Timmes.* 390, L107, 85-D9 (1992)

Cosmic Curvature and Condensation. *Martin Harwit.* 392, 394, 107-C1 (1992)

Neutron Stars and Gravitational Scalars. *Helmut W. Zaglauer.* 393, 685, 124-D1 (1992)

Diskoseismology: Probing Accretion Disks. II. *G*-Modes, Gravitational Radiation Reaction, and Viscosity. *Michael A. Nowak & Robert V. Wagoner.* 393, 697, 124-E1 (1992)

A Physical Interpretation of Kaluza-Klein Cosmology. *Paul S. Wesson.* 394, 19, 128-C9 (1992)

Cosmological Perturbations and the Physical Meaning of Gauge-invariant Variables. *Marco Bruni, Peter K. S. Dunsby, & George F. R. Ellis.* 395, 34, 140-E7 (1992)

Covariant Perturbations in a Multifluid Cosmological Medium. *Peter K. S. Dunsby, Marco Bruni, & George F. R. Ellis.* 395, 54, 140-G1 (1992)

First-Order Fermi Acceleration in Spherically Symmetric Flows: Solutions Including Quadratic Losses. *Peter A. Becker.* 397, 88, 169-B6 (1992)

Three-dimensional Magnetic Field Configurations in Relativistic Magnetohydrodynamic Outflows. *Yu-Qing Lou.* 397, L67, 174-A10 (1992)

Angle-dependent Green's Functions for Relativistic Compton Reflection. *Xin-Min Hua & Richard E. Lingenfelter.* 397, 591, 178-D1 (1992)

The Perihelion Problem in Kaluza-Klein Gravity. *Paul H. Lim & Paul S. Wesson.* 397, L91, 181-B8 (1992)

Relativistic Two-Moment Neutrino Transport. *J. Cernohorsky & Ch. G. van Weert.* 398, 190, 184-C1 (1992)

Spin-up of a Rapidly Rotating Star by Angular Momentum Loss: Effects of General Relativity. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 398, 203, 184-D1 (1992)

Radiative Equilibrium in Rapidly Expanding Shells. *P. H. Hauschildt.* 398, 224, 184-E9 (1992)

Nonstationary Gravitational Lenses and the Fermat Principle. *Valerio Faraoni.* 398, 425, 189-D1 (1992)

Determining the Nuclear Equation of State from Neutron-Star Masses and Radii. *Lee Lindblom.* 398, 569, 191-C1 (1992)

Newton's Laws in a Cosmological Model. *Mark Israelit & Nathan Rosen.* 400, 21, 209-C7 (1992)

Radiation from a Relativistic Magnetized Star. *V. Belinsky & R. Ruffini.* 401, L27, 227-D7 (1992)

Cylindrical Universes with Heat and Null Radiation Flow. *L. K. Patel & Naresh Dadhich.* 401, 433, 228-B1 (1992)

General Relativistic Structure of Star-Toroid Systems. *Shogo Nishida, Yoshiharu Eriguchi, & Antonio Lanza.* 401, 618, 230-C1 (1992)

Relativistic Matter Distribution around a Black Hole: Astrophysical Consequences. *Ran Zamir.* 403, 278, 17-C12 (1993)

Smoothed Particle Hydrodynamics near a Black Hole. *Pablo Laguna, Warner A. Miller, & Wojciech H. Zurek.* 404, 678, 37-D3 (1993)

Relativistic Frequency-dependent Transfer in Spherical Flows. I. Method and Numerical Tests. *Luciano Nobili, Roberto Turolla, & Luca Zampieri.* 404, 686, 37-D12 (1993)

Trajectories of Nonzero–Rest-Mass Particles in Curved Spacetime. *P. S. Negi, A. K. Pande, & M. C. Durgapal.* 406, 1, 55-B1 (1993)

Fitting Pulse Profiles of X-Ray Pulsars: The Effects of Relativistic Light Deflection. *H. Riffert, H.-P. Nollert, U. Kraus, & H. Ruder.* 406, 185, 57-D1 (1993)

Cosmological Time Evolution in the Newtonian Dynamics of Compact Celestial Bodies. *K. Nordtvedt.* 407, 5, 69-B6 (1993)

Relativistic Bulk Motion in Active Galactic Nuclei. *G. Ghisellini, P. Padovani, A. Celotti, & L. Maraschi.* 407, 65, 70-A1 (1993)

The Boltzmann Equation in General Relativistic Rotating Systems: Cooling of Rotating Neutron Stars. *Juan A. Miralles, Kenneth A. Van Riper, & James M. Lattimer.* 407, 687, 79-B1 (1993)

Second Post-Newtonian Order Renormalization of First Post-Newtonian Order Gravity in the Solar System. *Ken Nordtvedt.* 407, 758, 80-A1 (1993)

A Two-dimensional Relativistic ($\Gamma = 3.25$) Jet Simulation. *Maurice H. P. M. van Putten.* 408, L21, 88-G8 (1993)

A Static Stable Universe. *David F. Crawford.* 410, 488, 119-F9 (1993)

Tidal Disruptions by Supermassive Black Holes: Hydrodynamic Evolution of Stars on a Schwarzschild Background. *Pablo Laguna, Warner A. Miller, Wojciech H. Zurek, & Melvyn B. Davies.* 410, L83, 125-G9 (1993)

A General Relativistic Hydrostatic Model for a Galaxy. *Roberto Hojman, Leda Peña, & Nelson Zamorano.* 411, 541, 136-D3 (1993)

Effect of Radiation Forces on Disk Accretion by Weakly Magnetic Neutron Stars. *M. Coleman Miller & Frederick K. Lamb.* 413, L43, 162-F9 (1993)

Stability of Dense Stellar Clusters against Relativistic Collapse. *G. S. Bisnovatyi-Kogan, M. Merafina, R. Ruffini, & E. Vesperini.* 414, 187, 172-C13 (1993)

Normal Modes of Relativistic Stars in Slow Rotation Limit. *Yasufumi Kojima.* 414, 247, 173-B3 (1993)

Deflection of Light by the Earth. *Andrew Gould.* 414, L37, 175-F11 (1993)

Constraints on Axions from the Extragalactic Background Light. *J. M. Overduin & P. S. Wesson.* 414, 449, 176-F10 (1993)

Alfvénic Fluctuations in a Relativistic Wind with a Spiral Magnetic Field and Random Magnetic Field Structures in the Crab Nebula. *Yu-Qing Lou.* 414, 656, 179-D2 (1993)

The Einsteinian Gravitational Field of the Rigidly Rotating Disk of Dust. *G. Neugebauer & R. Meinel.* 414, L97, 185-G5 (1993)

The Relativistic Sobolev Method Applied to Homologously Expanding Atmospheres. *David J. Jeffery.* 415, 734, 197-A5 (1993)

Formation of P Cygni Line Profiles in Relativistically Expanding Atmospheres. II. The Effect of the Continuum Frequency Shape and Limb Darkening of the Core. *Damien Hutsemékers.* 417, 97, 218-D12 (1993)

Gravitational Wave Detection: A Nonmechanical Effect. *Redouane Fakir.* 418, 202, 233-E4 (1993)

γ-γ Attenuation and Relativisitic Beaming in Gamma-Ray Bursts. *Matthew G. Baring.* 418, 391, 235-G8 (1993)

Radio Transients from Gamma-Ray Bursters. *Bohdan Paczyński & James E. Rhoads.* 418, L5, 238-B1 (1993)

Thin Shells in Flat McVittie Spacetimes. *Paul Haines & Joseph D. Harris.* 418, 579, 239-F3 (1993)

Three-dimensional Propagation of Transverse Magnetohydrodynamic Perturbations in Relativistic Winds. *Yu-Qing Lou.* 418, 709, 241-C12 (1993)

Formation of a Jet in the Galactic Center Black Hole Candidate 1E 1740.7−2942. *Ranjeev Misra & Fulvio Melia.* 419, L25, 252-D9 (1993)

Relativistic Stellar Systems with Spindle Singularities. *Stuart L. Shapiro & Saul A. Teukolsky.* 419, 622, 255-D10 (1993)

Relativistic Stellar Systems with Rotation. *Stuart L. Shapiro & Saul A. Teukolsky.* 419, 636, 255-E12 (1993)

Optical Caustics in a Kerr Spacetime and the Origin of Rapid X-Ray Variability in Active Galactic Nuclei. *Kevin P. Rauch & Roger D. Blandford.* 421, 46, 16-F1 (1994)

Radiating, Slowly Rotating Bodies in General Relativity. *L. Herrera, A. Melfo, L. A. Núñez, & A. Patiño.* 421, 677, 26-F3 (1994)

Relativistic Precession of the Orbit of a Star near a Supermassive Black Hole. *V. Karas & D. Vokrouhlický.* 422, 208, 32-F6 (1994)

Rapidly Rotating Polytropes in General Relativity. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 422, 227, 33-A1 (1994)

Stellar and Scattered Light in a Radio Galaxy at $z = 2.63$. *Andrea Cimatti, Sperello di Serego Alighieri, George B. Field, & Robert A. E. Fosbury.* 422, 562, 38-G1 (1994)

Gravitational Collapse of an Inhomogeneous Dust Sphere in Higher Dimensional Spacetime. *A. Banerjee, A. Sil, & S. Chatterjee.* 422, 681, 40-C12 (1994)

Relativistic Equation of State of Nuclear Matter for the Supernova Explosion and the Birth of Neutron Stars. *K. Sumiyoshi & H. Toki.* 422, 700, 40-E7 (1994)

Relativistic Particle Acceleration in Plerions. *Jonathan Arons & Marco Tavani.* 90, 797, 13-F1 (1994)
Applying the Zel'dovich Approximation to General Relativity. *K. M. Croudace, J. Parry, D. S. Salopek, & J. M. Stewart.* 423, 22, 46-D1 (1994)
Recycling Pulsars to Millisecond Periods in General Relativity. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 423, L117, 60-G3 (1994)
Rapidly Rotating Neutron Stars in General Relativity: Realistic Equations of State. *Gregory B. Cook, Stuart L. Shapiro, & Saul A. Teukolsky.* 424, 823, 75-A11 (1994)
Relativistic Beaming and Gamma-Ray Bursts. *Shude Mao & Insu Yi.* 424, L131, 79-E11 (1994)
Multiple Images and Light Curves of an Emitting Source on a Relativistic Eccentric Orbit around a Black Hole. *G. Bao, P. Hadrava, & E. Østgaard.* 425, 63, 81-A5 (1994)
General Relativistic Corrections in the Gamma-Ray Emission from Pulsars. *P. L. Gonthier & A. K. Harding.* 425, 767, 91-C10 (1994)
Gravity Wave Watching. *Redouane Fakir.* 426, 74, 97-A5 (1994)
Asymptotic Domination of Cold Relativistic MHD Winds by Kinetic Energy Flux. *Mitchell C. Begelman & Zhi-Yun Li.* 426, 269, 99-D9 (1994)
A General Relativistic Toroid around a Black Hole. *Shogo Nishida & Yoshiharu Eriguchi.* 427, 429, 115-B13 (1994)
Study of the Matching of Solutions of the Einstein Equations according to Darmois. *Armando Bernui & Edwin Portocarrero.* 427, 947, 124-D5 (1994)
The Post-Keplerian Orbital Representations of the Relativistic Two-Body Problem. *S. A. Klioner & S. M. Kopeikin.* 427, 951, 124-D10 (1994)
High-Precision Timing of Millisecond Pulsars. III. Long-Term Monitoring of PSRs B1855+09 and B1937+21. *V. M. Kaspi, J. H. Taylor, & M. F. Ryba.* 428, 713, 139-B9 (1994)
Gravitional Lenses and Unconventional Gravity Theories. *Jacob D. Bekenstein & Robert H. Sanders.* 429, 480, 151-F6 (1994)
Superluminal Motion Statistics and Cosmology. *R. C. Vermeulen & M. H. Cohen.* 430, 467, 167-E3 (1994)
Gauge-invariant Cosmological Perturbations in Generalized Einstein Theories. *T. Hirai & K. Maeda.* 431, 6, 176-C8 (1994)
Gravitational Radiation from Pairs of Realistic, Nonaccreting Compact Stars. *N. K. Spyrou & K. D. Kokkotas.* 431, 254, 179-C8 (1994)
The Relativistic Rotation Transformation and Pulsar Electrodynamics. *S. Kichenassamy & R. A. Krikorian.* 431, 715, 187-D8 (1994)
Multipole Moments of Stellar Oscillation Modes. *Andreas Reisenegger.* 432, 296, 196-G6 (1994)
Relativistic Tidal Interaction of a White Dwarf with a Massive Black Hole. *V. P. Frolov, A. M. Khokhlov, I. D. Novikov, & C. J. Pethick.* 432, 680, 204-D13 (1994)
Hard X-Rays from NGC 4151: A Thermal Origin? *Lev Titarchuk & Apostolos Mastichiadis.* 433, L33, 215-A7 (1994)
Stability of Fireballs and Gamma-Ray Bursts. *Eli Waxman & Tsvi Piran.* 433, L85, 224-A9 (1994)
Supplementary Parameters in the Parameterized Post-Keplerian Formalism. *S. M. Kopeikin.* 434, L67, 241-F9 (1994)
Emission-Line Profiles from a Relativistic Accretion Disk and the Role of Its Multiple Images. *G. Bao, P. Hadrava, & E. Østgaard.* 435, 55, 244-A8 (1994)
The Gravitomagnetic Dynamo Effect in Accretion Disks of Rotating Black Holes. *Ramon Khanna & Max Camenzind.* 435, L129, 260-B3 (1994)
Large-Scale Structure Effects on the Gravitational Lens Image Positions and Time Delay. *Uroš Seljak.* 436, 509, 272-D13 (1994)
An Embedding for the Big Bang. *Paul S. Wesson.* 436, 547, 273-A9 (1994)
Simulations of Relativistic Extragalactic Jets. *G. Comer Duncan & Philip A. Hughes.* 436, L119, 280-G1 (1994)
Relativistic Fireworks: Not a Viable Model for Cosmology. *Lennart Widlund.* 437, 27, 283-E6 (1994)
Radiating Scalar Soliton-like Stars in a Pressurized Environment. *M. Esculpi & L. Herrera.* 437, 317, 287-E7 (1994)
High-Precision Timing of PSR J1713+0747: Shapiro Delay. *F. Camilo, R. S. Foster, & A. Wolszczan.* 437, L39, 291-F13 (1994)
The Classical Tests in Kaluza-Klein Gravity. *D. Kalligas, P. S. Wesson, & C. W. F. Everitt.* 439, 548, 31-G9 (1995)
Relativistic, Hot Stellar Winds with Anisotropic Pressure. *Elgouja G. Tsikarishvili, Andria D. Rogava, & David G. Tsiklauri.* 439, 822, 36-A1 (1995)
Critical Radiation Fluxes and Luminosities of Black Holes and Relativistic Stars. *Frederick K. Lamb & M. Coleman Miller.* 439, 828, 36-A11 (1995)
Fully Covariant Cosmology and Its Astrophysical Implications. *Paul S. Wesson & Hongya Liu.* 440, 1, 41-C1 (1995)
The Sobolev Optical Depth for Time-dependent Relativistic Systems. *David J. Jeffery.* 440, 810, 54-C1 (1995)
Optically Thin Accretion Disks in the Kerr Metric. *Gunnlaugur Björnsson.* 441, 765, 72-D12 (1995)
The Velocity of the Emitting Plasma of the Superluminal Galactic Source GRS 1915+105. *Gianluigi Bodo & Gabriele Ghisellini.* 441, L69, 75-G13 (1995)
Dynamics of Gravitational Instability Is Nonlocal. *Lev Kofman & Dmitry Pogosyan.* 442, 30, 77-E12 (1995)
The Effects of Redshifts and Focusing on the Spectrum of an Accretion Disk in the Galactic Center Black Hole Candidate Sagittarius A*. *J. M. Hollywood & Fulvio Melia.* 443, L17, 102-D6 (1995)
Geometry and Pulse Profiles of X-Ray Pulsars: Asymmetric Relativistic Fits to 4U 1538−52 and Vela X-1. *T. Bulik, H. Riffert, P. Mészáros, K. Makishima, T. Mihara, & B. Thomas.* 444, 405, 119-B3 (1995)
Does Gravitational Radiation Limit the Angular Velocities of Superfluid Neutron Stars? *Lee Lindblom & Gregory Mendell.* 444, 804, 127-E6 (1995)
Dynamics of Silent Universes. *Marco Bruni, Sabino Matarrese, & Ornella Pantano.* 445, 958, 148-D13 (1995)
Mining Energy in an Expanding Universe. *Edward R. Harrison.* 446, 63, 154-B2 (1995)
Force-free Self-similar Magnetically Driven Relativistic Jets. *J. Contopoulos.* 446, 67, 154-B9 (1995)
Thermal Comptonization in Mildly Relativistic Pair Plasmas. *J. G. Skibo, C. D. Dermer, R. Ramaty, & J. M. McKinley.* 446, 86, 154-D6 (1995)
A Redshift-Magnitude Relation for Nonuniform Pressure Universes. *Mariusz P. Dąbrowski.* 447, 43, 172-G2 (1995)
Time and Its Evolution in an Inhomogeneous Universe. *Martin Harwit.* 447, 482, 182-D10 (1995)
Relativistic Electron Energy Spectra of Active Galactic Nuclei in the Thin Synchrotron Limit. I. The Method. *Luis Salas, Irene Cruz-González, & Luis Carrasco.* 447, 505, 182-G1 (1995)
Neutrino Pair Synchrotron Radiation from Relativistic Electrons in Strong Magnetic Fields. *A. Vidaurre, A. Pérez, H. Sivak, J. Bernabéu, & J. Mª Ibáñez.* 448, 264, 195-G6 (1995)
Variation of Gravitational Delay in Pulsar Timing Observations due to Proper Motion of Foreground Stars and Measurement of Stellar Mass. *Kouji Ohnishi, Mizuhiko Hosokawa, Toshio Fukushima, & Mine Takeuti.* 448, 271, 196-A1 (1995)
General Relativistic Flux Modulations in the Galactic Center Black Hole Candidate Sagittarius A*. *J. M. Hollywood, Fulvio Melia, Laird M. Close, Donald W. McCarthy, Jr., & Tatia A. DeKeyser.* 448, L21, 199-E1 (1995)
Morphology and Dynamics of Highly Supersonic Relativistic Jets. *J. M^a. Martí, E. Müller, J. A. Font, & J. M^a. Ibá nez.* 448, L105, 209-D1 (1995)
Matching Exterior to Interior Solutions in Weyl Gravity: Comment on "Exact Vacuum Solution to Conformal Weyl Gravity and Galactic Rotation Curves." *Volker Perlick & Chongming Xu.* 449, 47, 210-G7 (1995)
General Relativistic Effects on the Induced Electric Field Exterior to Pulsars. *S. Sengupta.* 449, 224, 213-C6 (1995)
Parsec-Scale Synchrotron Emission from Hydrodynamic Relativistic Jets in Active Galactic Nuclei. *J. L. Gómez, J. M^a. Martí, A. P. Marscher, J. M^a. Ibáñez, & J. M. Marcaide.* 449, L19, 216-C3 (1995)
Relativistic Accretion Disk Structure Revisited. *H. Riffert & H. Herold.* 450, 508, 237-F11 (1995)
Averaging Einstein's Equations over a Hierarchy of Bound and Unbound Fragments. *Natalia V. Zotov & William R. Stoeger, S.J.* 453, 574, 291-G3 (1995)
Relativistic Collisionless Clusters with Arbitrarily Large Central Redshift. *M. Merafina & R. Ruffini.* 454, L89, 315-E4 (1995)
Calculation of the Kinetic Sunyaev-Zeldovich Effect from the Boltzmann Equation. *Peter R. Phillips.* 455, 419, 327-E13 (1995)
Einstein's Radiation Formula and Modifications to the Einstein Equation. *C. Y. Lo.* 455, 421, 327-F4 (1995)
MOND and the Seven Dwarfs. *Mordehai Milgrom.* 455, 439, 328-A1 (1995)
Hydrodynamic Timescales and Temporal Structure of Gamma-Ray Bursts. *Re'em Sari & Tsvi Piran.* 455, L143, 334-A11 (1995)

ROTATION

Nonaxisymmetric Instabilities in Rotating Shear Flows: Internal Gravity Modes in Stratified Media and Analogies with Plane Flows. *P. Ghosh & M. A. Abramowicz.* 366, 221, 3-F13 (1991)

SCATTERING

Imaging with Ultra-Resolution in the Presence of Strong Scattering. *T. J. Cornwell & Ramesh Narayan.* 408, L68, 89-G1 (1993)

Compton Scattering and the Gamma-Ray Power-Law Spectrum in Markarian 421. *Andrzej A. Zdziarski & Julian H. Krolik.* 409, L33, 111-B1 (1993)

Stellar Core Collapse: A Boltzmann Treatment of Neutrino-Electron Scattering. *Anthony Mezzacappa & Stephen W. Bruenn.* 410, 740, 123-A7 (1993)

Disks around Pre–Main-Sequence Binary Systems: The Case of Haro 6-10. *François Ménard, Jean-Louis Monin, Françoise Angelucci, & Daniel Rouan.* 414, L117, 186-B5 (1993)

Partially Coherent Scattering in Stellar Chromospheres. IV. Analytic Wing Approximations. *K. G. Gayley.* 415, 811, 198-A1 (1993)

Compton Backscattered Annihilation Radiation and the Mass of Nova Muscae. *Xin-Min Hua & Richard E. Lingenfelter.* 416, L17, 207-C11 (1993)

Anisotropic Scattering of OH/IR Stars toward the Galactic Center. *Dale A. Frail, Philip J. Diamond, James M. Cordes, & Huib Jan Van Langevelde.* 427, L43, 117-F6 (1994)

Scattered Halos around H_2O Masers. *C. R. Gwinn.* 431, L123, 192-B7 (1994)

Small-Scale Structure and Position of Sagittarius A* from VLBI at 3 Millimeter Wavelength. *Alan E. E. Rogers, Sheperd Doeleman, Melvyn C. H. Wright, Geoffrey C. Bower, Donald C. Backer, Stephen Padin, J. A. Philips, Darrel T. Emerson, Lincoln Greenhill, James M. Moran, & Kenneth I. Kellermann.* 434, L59, 241-E8 (1994)

The Effects of Gravity Darkening on the Ultraviolet Continuum Polarization Produced by Circumstellar Disks. *J. E. Bjorkman & K. S. Bjorkman.* 436, 818, 277-A1 (1994)

Polarization from Scattering in Blobs. *Arthur D. Code & Barbara A. Whitney.* 441, 400, 64-G4 (1995)

Fokker-Planck Equations of Stochastic Acceleration: Green's Functions and Boundary Conditions. *Brian T. Park & Vahé Petrosian.* 446, 699, 165-F10 (1995)

Line-driven Instability Growth Rates in Wolf-Rayet Winds. *Kenneth G. Gayley & Stanely P. Owocki.* 446, 801, 167-B4 (1995)

A Model of the Diffuse Ultraviolet Radiation Field. *Jayant Murthy & R. C. Henry.* 448, 848, 206-E7 (1995)

Power-Law Spectra as a Result of Comptonization of the Soft Radiation in a Plasma Cloud. *Lev Titarchuk & Yurij Lyubarskij.* 450, 876, 243-A10 (1995)

Scattering of *p*-Modes by Sunspots. I. Observations. *D. C. Braun.* 451, 859, 259-A12 (1995)

Scattering of *p*-Modes by Sunspots. II. Calculations of Phase Shifts from a Phenomenological Model. *Y. Fan, D. C. Braun, & D.-Y. Chou.* 451, 877, 259-C6 (1995)

Pulsar Eclipses due to Induced Scattering in Magnetized Plasmas. *Qinghuan Luo & D. B. Melrose.* 452, 346, 266-G11 (1995)

Models of the Optical/Ultraviolet Continuum Polarization in Active Galactic Nuclei: Implications for Unification Schemes. *John F. Kartje.* 452, 565, 272-D8 (1995)

The Effect of Degeneracy on the Scattering Contribution to the Radiative Opacity. *S. J. Rose.* 453, L45, 290-A4 (1995)

Polarization Profiles of Scattered Emission Lines. III. Effects of Multiple Scattering and Non-Rayleigh Phase Functions. *W. J. Henney & D. J. Axon.* 454, 233, 302-E4 (1995)

SHOCK WAVES

Nonthermal X-Ray Emission from Winds of OB Supergiants. *Wan Chen & Richard L. White.* 366, 512, 9-D1 (1991)

Oblique Mixed Shocks in Extragalactic Jets. *D. Fraix-Burnet & G. Pelletier.* 367, 86, 13-B1 (1991)

Instabilities and Clumping in SN 1987A. I. Early Evolution in Two Dimensions. *Bruce Fryxell, Ewald Müller, & David Arnett.* 367, 619, 21-A5 (1991)

The Dynamic Instability of Adiabatic Blast Waves. *Dongsu Ryu & Ethan T. Vishniac.* 368, 411, 30-B12 (1991)

The Effect of Viscosity on Steady Transonic Flow with a Nodal Solution Topology. *S. P. Owocki & G. P. Zank.* 368, 491, 31-C1 (1991)

Bow Shock Models of Ultracompact H II Regions. *Mordecai-Mark Mac Low, Dave Van Buren, Douglas O. S. Wood, & Ed Churchwell.* 369, 395, 42-F1 (1991)

Narrow-Band Imaging of the Inner R Aquarii Nebula: Further Evidence for Shock Excitation. *Denis Burgarella & Francesco Paresce.* 370, 590, 55-G1 (1991)

Shock Waves and Nucleosynthesis in Type II Supernovae. *M. B. Aufderheide, E. Baron, & F.-K. Thielemann.* 370, 630, 56-C8 (1991)

Near-Infrared Emission-Line Images of Three Herbig-Haro Objects. *Karl R. Stapelfeldt, Charles A. Beichman, J. Jeff Hester, Nicholas Z. Scoville, & Thomas N. Gautier III.* 371, 226, 63-A1 (1991)

The Shock Process and Light-Element Production in Supernova Envelopes. *Lawrence E. Brown, David S. Dearborn, David N. Schramm, Jon T. Larsen, & Shin Kurokawa.* 371, 648, 69-F1 (1991)

Supernova Remnant 1987A. *Ding Luo & Richard McCray.* 372, 194, 76-D1 (1991)

The H_2 Line Profiles in the Cygnus Loop: Evidence for J-Shocks with Magnetic Precursors. *James R. Graham, Gillian S. Wright, & T. R. Geballe.* 372, L21, 79-C7 (1991)

Atmospheric Gradients and the Stability of Expanding Jets. *Philip E. Hardee, Michael L. Norman, Theodoros Koupelis, & David A. Clarke.* 373, 8, 86-B10 (1991)

W28 and 3C 400.2: Two Shell-like Radio Supernova Remnants with Centrally Peaked X-Ray Morphologies. *Knox S. Long, William P. Blair, Richard L. White, & Yutaka Matsui.* 373, 567, 95-A10 (1991)

Solar Particle Abundances at Energies Greater than 1 MeV per Nucleon and the Role of Interplanetary Shocks. *H. V. Cane, D. V. Reames, & T. T. von Rosenvinge.* 373, 675, 96-D1 (1991)

The Hydrodynamics of Relict Cosmological H II Regions and the Formation of Objects at High Redshift. *Piero Madau & Avery Meiksin.* 374, 6, 98-B7 (1991)

Synchrotron Emission from Shocked Relativistic Jets. III. Models for the Centimeter Wave Band Quiescent and Burst Emission from 3C 279 and OT 081. *P. A. Hughes, H. D. Aller, & M. F. Aller.* 374, 57, 98-F5 (1991)

Far-Ultraviolet Mapping of the Cygnus Loop with the *Voyager 2* Ultraviolet Spectrometer. *William P. Blair, Knox S. Long, Olaf Vancura, & J. B. Holberg.* 374, 202, 100-E5 (1991)

Observations of [Si II] (35 Micron) and [S I] (25 Micron) in Orion: Evidence for a Wind Shock near IRc2. *Michael R. Haas, David Hollenbach, & Edwin F. Erickson.* 374, 555, 106-B1 (1991)

Expansion of a Superbubble in a Uniform Magnetic Field. *Katia M. Ferrière, Mordecai-Mark Mac Low, & Ellen G. Zweibel.* 375, 239, 114-A4 (1991)

Siphon Flows in Isolated Magnetic Flux Tubes. IV. Critical Flows with Standing Tube Shocks. *John H. Thomas & Benjamin Montesinos.* 375, 404, 115-G11 (1991)

Noise-driven Radiative Shocks: A New Model for the Optical Quasi-periodic Oscillations of the AM Herculis Objects. *Michael T. Wolff, Kent S. Wood, & James N. Imamura.* 375, L31, 117-D6 (1991)

Probing Shock Models of CH^+ Formation. *Isabel Hawkins & Nahide Craig.* 375, 642, 120-F1 (1991)

Six Balmer-dominated Supernova Remnants. *R. Chris Smith, Robert P. Kirshner, William P. Blair, & P. Frank Winkler.* 375, 652, 120-G1 (1991)

The Evolution of Discontinuities in Radiating Spheres in the Diffusion Approximation. *W. Barreto, L. Herrera, & L. Núñez.* 375, 663, 121-A1 (1991)

Proto–Planetary Nebulae. II. The Shock-heated Bipolar Nebulae GL 618 and M2-56. *Robert W. Goodrich.* 376, 654, 134-D12 (1991)

Neutrino-Nucleus Interactions in Core-Collapse Supernovae. *Stephen W. Bruenn & W. C. Haxton.* 376, 678, 134-G1 (1991)

The Interaction of Collisionless Shocks in Astrophysical Plasmas. *P. J. Cargill.* 376, 771, 136-A1 (1991)

Parametric Study of the Formation of Magnetohydrodynamic Shocks. I. Model. *Y. C. Whang.* 377, 250, 141-B1 (1991)

Parametric Study of the Formation of Magnetohydrodynamic Shocks. II. Slow Shocks. *Y. C. Whang.* 377, 255, 141-B7 (1991)

Partially Dissociative Jump Shocks in Molecular Hydrogen. *C. A. Chang & P. G. Martin.* 378, 202, 153-E1 (1991)

A Determination of Relativistic Shock Jump Conditions Using Monte Carlo Techniques. *Donald C. Ellison & Stephen P. Reynolds.* 378, 214, 153-F1 (1991)

The Optical Emission from Oscillating White Dwarf Radiative Shock Waves. *James N. Imamura, Hussain Rashed, & Michael T. Wolff.* 378, 665, 160-F5 (1991)

Solar Gamma-Ray-Line Flares, Type II Radio Bursts, and Coronal Mass Ejections. *E. W. Cliver, H. V. Cane, D. J. Forrest, M. J. Koomen, R. A. Howard, & C. S. Wright.* 379, 741, 174-A2 (1991)

On the Distribution of the Diffuse Galactic Gamma-Ray Line Emissions at 1809 keV and 511 keV. *P. von Ballmoos.* 380, 98, 177-C1 (1991)

Predicted Extreme-Ultraviolet Line Emission for Nearby Main-Sequence B Stars. *J. J. MacFarlane, J. P. Cassinelli, B. Y. Welsh, P. W. Vedder, J. V. Vallerga, & W. L. Waldron.* 380, 564, 185-C1 (1991)

Outflow Hydrodynamics in the Eclipsing Millisecond Pulsar Binaries PSR 1957+20 and PSR 1744−24A. *Marco Tavani & Leigh Brookshaw.* 381, L21, 194-C13 (1991)

Parametric Study of the Formation of Magnetohydrodynamic Shocks. III. Fast and Slow Shocks. *Y. C. Whang.* 381, 559, 197-E10 (1991)

Electron Acceleration in a Nonlinear Shock Model with Applications to Supernova Remnants. *Donald C. Ellison & Stephen P. Reynolds.* 382, 242, 203-C1 (1991)

Molecular Line Emission Models of Herbig-Haro Objects. I. H_2 Emission. *Mark G. Wolfire & Arieh Königl.* 383, 205, 214-E9 (1991)

Evidence for a Thermally Unstable Shock Wave in the Vela Supernova Remnant. *John C. Raymond, George Wallerstein, & Bruce Balick.* 383, 226, 214-G5 (1991)

Magnetized Supernova Remnants with Cosmic Rays. *Katia M. Ferrière & Ellen G. Zweibel.* 383, 602, 221-F11 (1991)

Supernova Remnants in Dense Clouds. I. Blast-Wave Dynamics and X-Ray Irradiation. *B. T. Draine & D. T. Woods.* 383, 621, 222-A6 (1991)

Spherically Symmetric, Polytropic Flow. *T. Theuns & M. David.* 384, 587, 9-D9 (1992)

Acoustic Instability in Cosmic-Ray Mediated Shocks. *Hyesung Kang, T. W. Jones, & Dongsu Ryu.* 385, 193, 14-D1 (1992)

Strongly Shocked Interstellar Gas in IC 443. I. High-Resolution Molecular Observations. *Z. Wang & N. Z. Scoville.* 386, 158, 26-B3 (1992)

Knots in Stellar Jets from Time-dependent Sources. *A. C. Raga & Lev Kofman.* 386, 222, 27-A1 (1992)

Radiative Shocks and Hydrogen Molecules in Pregalactic Gas: The Effects of Postshock Radiation. *Hyesung Kang & Paul R. Shapiro.* 386, 432, 30-F13 (1992)

Instabilities in Astrophysical Jets. I. Linear Analysis of Body and Surface Waves. *Jun-Hui Zhao, Jack O. Burns, Philip E. Hardee, & Michael L. Norman.* 387, 69, 37-G7 (1992)

Instabilities in Astrophysical Jets. II. Numerical Simulations of Slab Jets. *Jun-Hui Zhao, Jack O. Burns, Michael L. Norman, & Martin E. Sulkanen.* 387, 83, 38-B1 (1992)

Standing Shocks in Accretion Disks and the Spectra of Active Galactic Nuclei. *Sandip K. Chakrabarti & Paul J. Wiita.* 387, L21, 43-C4 (1992)

The Molecular Hydrogen Emission around L1551 IRS 5: Shock- Heated Molecular Gas at the Base of the Molecular Outflow. *Takuya Yamashita & Motohide Tamura.* 387, L93, 48-E5 (1992)

Dynamics of Wind Bubbles and Superbubbles. I. Slow Winds and Fast Winds. *Bon-Chul Koo & Christopher F. McKee.* 388, 93, 50-C1 (1992)

Dynamics of Wind Bubbles and Superbubbles. II. Analytic Theory. *Bon-Chul Koo & Christopher F. McKee.* 388, 103, 50-C12 (1992)

Magnetic Fields and Radiative Shocks in Protogalaxies and the Origin of Globular Clusters. *Paul R. Shapiro, Alejandro Clocchiatti, & Hyesung Kang.* 389, 269, 63-C11 (1992)

Can a Closure Mass Neutrino Help Solve the Supernova Shock Reheating Problem? *George M. Fuller, R. Mayle, Bradley S. Meyer, & James R. Wilson.* 389, 517, 67-G10 (1992)

Stellar Wind Collision and X-Ray Generation in Massive Binaries. *V. V. Usov.* 389, 635, 69-C10 (1992)

Alfvénically Driven Slow Shocks in the Solar Chromosphere and Corona. *Joseph V. Hollweg.* 389, 731, 70-D10 (1992)

Switch Shocks in Molecular Clouds. I. Plane-parallel Magnetohydrodynamic Analysis. *Michael D. Smith.* 390, 447, 81-A1 (1992)

Relativistic Magnetosonic Shock Waves in Synchrotron Sources: Shock Structure and Nonthermal Acceleration of Positrons. *Masahiro Hoshino, Jonathan Arons, Yves A. Gallant, & A. Bruce Langdon.* 390, 454, 81-A9 (1992)

Spiral Shocks and Subday Variability in SS 433. *Sandip K. Chakrabarti & T. Matsuda.* 390, 639, 83-C1 (1992)

Relativistic, Perpendicular Shocks in Electron-Positron Plasmas. *Yves A. Gallant, Masahiro Hoshino, A. Bruce Langdon, Jonathan Arons, & Claire E. Max.* 391, 73, 87-A1 (1992)

Velocity Structure in Optical CH^+ Lines toward HD 190603 and Implications for the Formation of CH^+. *M. M. Allen & Theodore P. Snow.* 391, 152, 87-G13 (1992)

The Influence of the Large-Scale Interplanetary Shock Structure on a Low-Energy Particle Event. *A. M. Heras, B. Sanahuja, Z. K. Smith, T. Detman, & M. Dryer.* 391, 359, 90-C13 (1992)

Infrared Morphology of Mass Outflow from GL 2591. *Motohide Tamura & Takuya Yamashita.* 391, 710, 96-G4 (1992)

Ram-Pressure Confinement of a Hypersonic Jet. *Chris Loken, Jack O. Burns, David A. Clarke, & Michael L. Norman.* 392, 54, 101-F1 (1992)

Hydrodynamic Instabilities in Supernova Remnants: Self-similar Driven Waves. *Roger A. Chevalier, John M. Blondin, & Robert T. Emmering.* 392, 118, 102-D9 (1992)

Two-dimensional Slow Shock Reconnection. *Y. C. Whang.* 392, 637, 110-B9 (1992)

The Outflow in the L1157 Dark Cloud: Evidence for Shock Heating of the Interacting Gas. *T. Umemoto, T. Iwata, Y. Fukui, H. Mikami, S. Yamamoto, O. Kameya, & N. Hirano.* 392, L83, 113-E6 (1992)

Detection of SiO Emission in the L1157 Dark Cloud. *Hitomi Mikami, Tomofumi Umemoto, Satoshi Yamamoto, & Shuji Saito.* 392, L87, 113-E11 (1992)

The 0623+71 Bow Shock Nebula. *J. M. Hollis, R. J. Oliversen, R. M. Wagner, & W. A. Feibelman.* 393, 217, 116-G3 (1992)

Constraints on the Acceleration of Anomalous Cosmic Rays. *J. R. Jokipii.* 393, L41, 120-F8 (1992)

Shock Breakout in SN 1987A. *Lisa Ensman & Adam Burrows.* 393, 742, 125-A10 (1992)

A Multiwavelength Study of the Supernova Remnant N49 in the Large Magellanic Cloud. *Olaf Vancura, William P. Blair, Knox S. Long, & John C. Raymond.* 394, 158, 130-A1 (1992)

Viscous and Inertial Effects at Cosmic-Ray Shocks. *J. R. Jokipii & L. L. Williams.* 394, 184, 130-C8 (1992)

Bow Shock Models for the Velocity Structure of Ultracompact H II Regions. *Dave Van Buren & Mordecai-Mark Mac Low.* 394, 534, 136-A7 (1992)

Global Aspects of Dynamics and Star Formation in Taurus. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 395, 501, 148-G13 (1992)

Pulsar Nebulae in Supernovae. *Roger A. Chevalier & Claes Fransson.* 395, 540, 149-E3 (1992)

Ion Injection and Fermi Acceleration at Earth's Bow Shock: The 1984 September 12 Event Revisited. *M. Scholer, K. J. Trattner, & H. Kucharek.* 395, 675, 151-F1 (1992)

Extremely High Velocity CO Emission from NGC 2071. *Lawrence M. Chernin & Colin R. Masson.* 396, L35, 160-F8 (1992)

Diffusive Acceleration of Electrons in SN 1987A. *Lewis Ball & J. G. Kirk.* 396, L39, 160-G1 (1992)

Wave Diffraction in Weak Cosmic-Ray–modified Shocks. *G. M. Webb & G. P. Zank.* 396, 549, 164-C9 (1992)

Cosmic-Ray–modified Supernova Remnant Shocks. *T. W. Jones & Hyesung Kang.* 396, 575, 164-E9 (1992)

Interplanetary Lyman-α Spectra as a Diagnostic of the Local Interstellar Plasma Density: The Baranov Two-Shocks Heliosphere Case. *R. Lallement, Y. G. Malama, E. Quemerais, J. L. Bertaux, & N. A. Zaitzev.* 396, 696, 166-A7 (1992)

A Three-dimensional Axisymmetric Photochemical Flow Model of the Cometary "Inner" Shock Layer. *M. C. Damas & D. A. Mendis.* 396, 704, 166-B1 (1992)

Global O VI Line Emission from the Cygnus Loop Supernova Remnant and Direct Kinematic Measurement of the Associated Shock. *Andrew Rasmussen & Christopher Martin.* 396, L103, 167-E7 (1992)

Detection of Interstellar SO^+: A Diagnostic of Dissociative Shock Chemistry. *B. E. Turner.* 396, L107, 167-F1 (1992)

Steady and Nonsteady Siphon Flow in Hot Coronal Loops. *T. D. Robb & P. S. Cally.* 397, 329, 172-A1 (1992)

Non-LTE Radiating Acoustic Shocks and Ca II K2V Bright Points. *Mats Carlsson & Robert F. Stein.* 397, L59, 173-G11 (1992)

Inhomogeneous Cosmologies with Shock Waves. *Anna Curir, Mauro Francaviglia, & Enric Verdaguer.* 397, 390, 175-E3 (1992)

An Off-Center Point Explosion in a Radially Stratified Medium: Kompaneets Approximation. *D. G. Korycansky.* 398, 184, 184-B9 (1992)

Relativistic Two-Moment Neutrino Transport. *J. Cernohorsky & Ch. G. van Weert.* 398, 190, 184-C1 (1992)

Noise-driven Radiative Shocks. II. Further Implications for the Quasi-periodic Oscillations of the AM Herculis Objects. *Kent S. Wood, James N. Imamura, & Michael T. Wolff.* 398, 593, 191-E1 (1992)

Tests of Shock Chemistry in IC 443G. *B. E. Turner, Kin-Wing Chan, S. Green, & D. A. Lubowich.* 399, 114, 196-E12 (1992)

A Comparison of Models for Supernova Remnants Including Cosmic Rays. *Hyesung Kang & L. O'C. Drury.* 399, 182, 197-D11 (1992)

The Bow Shock and Mach Disk of HH 34. *Jon A. Morse, Patrick Hartigan, Gerald Cecil, John C. Raymond, & Steve Heathcote.* 399, 231, 198-B3 (1992)

Electron Acceleration in Tycho's and Kepler's Supernova Remnants: Spectral Evidence of Fermi Shock Acceleration. *Stephen P. Reynolds & Donald C. Ellison.* 399, L75, 201-B1 (1992)

Evidence for Transonic Flows in the Solar Granulation. *A. Nesis, T. J. Bogdan, F. Cattaneo, A. Hanslmeier, M. Knölker, & A. Malagoli.* 399, L99, 201-D10 (1992)

Mid-Infrared Rotational Line Emission from Interstellar Molecular Hydrogen. *Michael G. Burton, D. J. Hollenbach, & A. G. G. M. Tielens.* 399, 563, 204-G7 (1992)

Band Splitting in Solar Type II Radio Bursts. *R. A. Treumann & J. LaBelle.* 399, L167, 208-E7 (1992)

Shock Wave Emergence at the Stellar Surface and the Subsequent Gas Expansion into a Vacuum: The Sphericity Involvement. *Ya. M. Kazhdan & Marina Murzina.* 400, 192, 211-C9 (1992)

Spectroscopy of a Balmer-dominated Filament in the Cygnus Loop with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Olaf Vancura, Charles W. Bowers, Arthur F. Davidsen, & John C. Raymond.* 400, 214, 211-E8 (1992)

Spectacular Herbig-Haro Objects in the Carina Region. *K. Ogura & J. R. Walsh.* 400, 248, 212-A7 (1992)

Magnetohydrodynamic Wave Damping by Cosmic-Ray Viscosity. *Ahmed Boulares & Gregor Morfill.* 400, 622, 218-B6 (1992)

Spectroscopy of the Companion and Bow-Shock Nebula of PSR 1957+20. *Thomas L. Aldcroft, Roger W. Romani, & James M. Cordes.* 400, 638, 218-C13 (1992)

Electron Injection in Collisionless Shocks. *Amir Levinson.* 401, 73, 222-A1 (1992)

Far-Ultraviolet Observations of the Supernova Remnant N49 Using the Hopkins Ultraviolet Telescope. *Olaf Vancura, William P. Blair, Knox S. Long, Arthur F. Davidsen, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Henry C. Ferguson, Richard C. Henry, Randy A. Kimble, Gerard A. Kriss, Jeffrey W. Kruk, & H. Warren Moos.* 401, 220, 223-G1 (1992)

The Parsec-Scale Radio Jet of 4C 39.25. *A. Alberdi, J. M. Marcaide, A. P. Marscher, Y. F. Zhang, P. Elósegui, J. L. Gómez, & D. B. Shaffer.* 402, 160, 3-A13 (1993)

Ion Injection and Acceleration at Parallel Shocks: Comparisons of Self-consistent Plasma Simulations with Existing Theories. *J. Giacalone, D. Burgess, S. J. Schwartz, & Donald C. Ellison.* 402, 550, 9-D1 (1993)

Cosmic-Ray Acceleration during the Impact of Shocks on Dense Clouds. *T. W. Jones & Hyesung Kang.* 402, 560, 9-E1 (1993)

High-Energy Emission from the Eclipsing Millisecond Pulsar PSR 1957+20. *Jonathan Arons & Marco Tavani.* 403, 249, 17-A8 (1993)

Observations of SO and SiO in the Outflow from NGC 2071. *Lawrence Chernin & Colin Masson.* 403, L21, 20-C6 (1993)

The Stability of Cosmic-Ray–dominated Shocks: A Secondary Instability. *Dongsu Ryu, Hyesung Kang, & T. W. Jones.* 405, 199, 43-E7 (1993)

Relativistic Fireballs and Their Impact on External Matter: Models for Cosmological Gamma-Ray Bursts. *P. Mészáros & M. J. Rees.* 405, 278, 44-E9 (1993)

The Gradient of Galactic Cosmic Rays at the Solar-Wind Termination Shock. *J. R. Jokipii, J. Kóta, & E. Merényi.* 405, 782, 52-G1 (1993)

Particle Injection and the Structure of Energetic-Particle–modified Shocks. *G. P. Zank, G. M. Webb, & D. J. Donohue.* 406, 67, 56-A1 (1993)

Shock Propagation in a Turbulent Cloud. *Toshiya Kimura & Makoto Tosa.* 406, 512, 64-B10 (1993)

Switch Shocks in Molecular Clouds. II. Implications. *Michael D. Smith.* 406, 520, 64-C7 (1993)

The Impact of Supernova Fragments on the Evolution of Multisupernova Remnants. *J. Franco, A. Ferrara, M. Różyczka, G. Tenorio-Tagle, & D. P. Cox.* 407, 100, 70-C11 (1993)

G-Star Astropauses: A Test for Interstellar Pressure. *P. C. Frisch.* 407, 198, 71-E1 (1993)

Nonlinear Growth of Dynamical Overstabilities in Blast Waves. *Mordecai-Mark Mac Low & Michael L. Norman.* 407, 207, 71-E11 (1993)

On the Separation of the Flaring Component's Emission in Variable Compact Extragalactic Radio Sources: Results from a Simple Shocked Relativistic Jet Model. *D. J. van der Walt.* 409, 126, 98-E3 (1993)

Interstellar Matter near the Pleiades. IV. The Wake of the Pleiades through the Interstellar Medium in Taurus. *Richard E. White & John Bally.* 409, 234, 99-G13 (1993)

Detection of Magnetohydrodynamic Shocks in the L1551 Outflow. *M. Barsony, N. Z. Scoville, & C. J. Chandler.* 409, 275, 100-E4 (1993)

The Injection and Acceleration of Particles in Oblique Shocks: A Unified Monte Carlo Description. *Matthew G. Baring, Donald C. Ellison, & Frank C. Jones.* 409, 327, 101-B8 (1993)

Ram Pressure Stripping from Elliptical Galaxies. I. The Mass Contained in the Galaxy. *D. Portnoy, S. Pistinner, & G. Shaviv.* 86, 95, 15-B3 (1993)

The Formation and Evolution of Shocks in Stellar Jets from a Variable Wind. *Patrick Hartigan & John Raymond.* 409, 705, 107-G5 (1993)

The Origin of Forbidden Line Emission from Young Stellar Objects. *Ana I. Gomez de Castro & Ralph E. Pudritz.* 409, 748, 108-D3 (1993)

Chromospheric Heating by Acoustic Shocks: A Confrontation of GHRS Observations of α Tauri (K5 III) with Ab Initio Calculations. *P. G. Judge & M. Cuntz.* 409, 776, 108-F13 (1993)

Three-dimensional Simulations of Protostellar Jets. *Elisabete M. de Gouveia Dal Pino & Willy Benz.* 410, 686, 122-B13 (1993)

The Bow Shock and Mach Disk of HH 111V. *Jon A. Morse, Steve Heathcote, Gerald Cecil, Patrick Hartigan, & John C. Raymond.* 410, 764, 123-C5 (1993)

Nuclear Winds in Active Elliptical Galaxies. I. Interaction. *Steven J. Smith, C. F. Kennel, & F. V. Coroniti.* 411, 581, 136-G9 (1993)

Spiral Shocks in Accretion Disks As a Contributor to Variability in Active Galactic Nuclei. *Sandip K. Chakrabarti & Paul J. Wiita.* 411, 602, 137-B6 (1993)

Oscillatory Instability of Radiative Shocks with Transverse Magnetic Field: Linear Analysis and Nonlinear Simulations. *G. Tóth & B. T. Draine.* 413, 176, 158-C8 (1993)

Numerical Simulations of Protostellar Jets with Nonequilibrium Cooling. II. Models of Pulsed Jets. *James M. Stone & Michael L. Norman.* 413, 210, 158-F13 (1993)

Alfvén Wave Transport Effects in the Time Evolution of Parallel Cosmic-Ray–modified Shocks. *T. W. Jones.* 413, 619, 164-C1 (1993)

A Cosmological Hydrodynamic Code Based on the Total Variation Diminishing Scheme. *Dongsu Ryu, Jeremiah P. Ostriker, Hyesung Kang, & Renyue Cen.* 414, 1, 170-B1 (1993)

Chromospheric Heating by Acoustic Shock Waves. *Stuart D. Jordan.* 414, 337, 174-B12 (1993)

Shock Excitation of the Emission-Line Filaments in Centaurus A. *Ralph S. Sutherland, Geoffrey V. Bicknell, & Michael A. Dopita.* 414, 510, 177-E7 (1993)

Strong [Fe II] Emission from NGC 1275. *Richard J. Rudy, Ross D. Cohen, George S. Rossano, Peter Erwin, R. C. Puetter, Matthew A. Greenhouse, & Charles E. Woodward.* 414, 527, 177-F13 (1993)

Observations of Entrainment and Time Variability in the HH 47 Jet. *Patrick Hartigan, Jon A. Morse, Steve Heathcote, & Gerald Cecil.* 414, L121, 186-B11 (1993)

Convection above the Neutrinosphere in Type II Supernovae. *D. S. Miller, J. R. Wilson, & R. W. Mayle.* 415, 278, 188-D12 (1993)

Radio and Near-Infrared [Fe II] Emission from Active Galaxies. *Duncan A. Forbes & Martin J. Ward.* 416, 150, 202-G12 (1993)

Discovery of Interstellar Water Lines at 437, 439, and 471 GHz: Strong Case for Water Maser Formation behind C-Type Shocks. *Gary J. Melnick, Karl M. Menten, Thomas G. Phillips, & Todd Hunter.* 416, L37, 207-E13 (1993)

A Theory of Supernova Explosions. *Adam Burrows & John Goshy.* 416, L75, 216-E1 (1993)

Propagation and Stability Properties of Radio Jets in Cluster Cooling Flow Atmospheres. *Chris Loken, Jack O. Burns, Michael L. Norman, & David A. Clarke.* 417, 515, 225-F9 (1993)

A Far-Ultraviolet Study of the Cygnus Loop Using the *Voyager* Ultraviolet Spectrometers. *Olaf Vancura, William P. Blair, Knox S. Long, John C. Raymond, & J. B. Holberg.* 417, 663, 227-E11 (1993)

Smoothed Particle Hydrodynamics Confronts Theory: Formation of Standing Shocks in Accretion Disks and Winds around Black Holes. *Sandip K. Chakrabarti & Diego Molteni.* 417, 671, 227-F7 (1993)

Numerical Simulations of Shock-driven Accretion. *M. Różyczka & H. C. Spruit.* 417, 677, 227-G1 (1993)

A Convective Trigger for Supernova Explosions. *Adam Burrows & Burce A. Fryxell.* 418, L33, 238-D11 (1993)

Preservation of the Supernova Shock. *Hans A. Bethe.* 419, 197, 248-E14 (1993)

Forbidden Line Formation in Hydromagnetic Disk Winds. I. Oblique Shocks. *Rachid Ouyed & Ralph E. Pudritz.* 419, 255, 249-C13 (1993)

Star Formation at Compressed Interfaces in Turbulent Self-gravitating Clouds. *B. G. Elmegreen.* 419, L29, 252-E1 (1993)

Effects of Coronal and Shock-produced X-Rays on the Ionization Distribution in Hot Star Winds. *J. J. MacFarlane, W. L. Waldron, M. F. Corcoran, M. J. Wolff, P. Wang, & J. P. Cassinelli.* 419, 813, 257-F11 (1993)

Hydrodynamical Models for X-Ray Emissions from SN 1993J in M81. *Tomoharu Suzuki, Shiomi Kumagai, Toshikazu Shigeyama, Ken'ichi Nomoto, Hitoshi Yamaoka, & Hideyuki Saio.* 419, L73, 259-D11 (1993)

Mass Stripping of Lyman-Alpha Clouds by Ram Pressure under the Minihalo Model. *Izumi Murakami & Satoru Ikeuchi.* 420, 68, 1-G8 (1994)

Higher Order Godunov Schemes for Isothermal Hydrodynamics. *Dinshaw S. Balsara.* 420, 197, 3-D1 (1994)

On the Hydrodynamic Interaction of Shock Waves with Interstellar Clouds. I. Nonradiative Shocks in Small Clouds. *Richard I. Klein, Christopher F. McKee, & Philip Colella.* 420, 213, 3-E5 (1994)

High-Resolution Spectroscopy of Balmer-dominated Shocks in the Large Magellanic Cloud. *R. Chris Smith, John C. Raymond, & J. Martin Laming.* 420, 286, 4-D7 (1994)

Emission Lines in the Long-Period Cepheid *l* Carinae. *Erika Böhm-Vitense & Stanley G. Love.* 420, 401, 5-G5 (1994)

Fabry-Perot Imaging of Molecular Hydrogen Emission in Orion-KL Region. *Hajime Sugai, Tomonori Usuda, Hirokazu Kataza, Masuo Tanaka, Motoko Y. Inoue, Hironobu Kawabata, Hideki Takami, Tetsuo Aoki, & Norihisa Hiromoto.* 420, 746, 12-B12 (1994)

Enhanced Cosmic-Ray Acceleration Rates in Highly Inclined Astrophysical Shocks. *R. Lieu, J. J. Quenby, B. Drolias, & K. Naidu.* 421, 211, 18-E11 (1994)

The Dynamical and Radiative Evolution of Clumpy Supernova Ejecta. *M. C. Anderson, T. W. Jones, L. Rudnick, I. L. Tregillis, & Hyesung Kang.* 421, L31, 21-G1 (1994)

AFGL 5376: A Strong, Large-Scale Shock near the Galactic Center. *Keven I. Uchida, Mark R. Morris, E. Serabyn, & John Bally.* 421, 505, 24-D9 (1994)

Spectroscopy of Chromospheric Lines of Giants in the Globular Cluster NGC 6752. *A. K. Dupree, Lee Hartmann, Graeme H. Smith, A. W. Rodgers, W. H. Roberts, & D. B. Zucker.* 421, 542, 24-G9 (1994)

High-Resolution Images of Shocked Molecular Clumps in the Supernova Remnant IC 443. *Jan A. Tauber, Ronald L. Snell, Robert L. Dickman, & L. M. Ziurys.* 421, 570, 25-C4 (1994)

X-Ray Emission from Near–Main-Sequence B Stars. *J. P. Cassinelli, D. H. Cohen, J. J. MacFarlane, W. T. Sanders, & B. Y. Welsh.* 421, 705, 27-A8 (1994)

Monte Carlo Simulations of Particle Acceleration at Oblique Shocks. *Matthew G. Baring, Donald C. Ellison, & Frank C. Jones.* 90, 547, 10-E6 (1994)

A Theoretical Review of Diffusive Shock Acceleration. *Frank C. Jones.* 90, 561, 10-F10 (1994)

Electron Acceleration at Quasi-parallel Shocks in the Solar Corona and Its Signature in Solar Type II Radio Bursts. *G. Mann & H. Lühr.* 90, 577, 11-A1 (1994)

Acceleration of Electrons at a Curved Shock. *M. Vandas.* 90, 583, 11-A8 (1994)

On the Asymmetry of the Distribution of the Anomalous Cosmic-Ray Component in the Heliosphere. *Horst Fichtner, S. Ranga Sreenivasan, Hans-Jörg Fahr, Daniel Rucinski, & Stanislaw Grzedzielski.* 90, 595, 11-B9 (1994)

Relativistic Particle Acceleration in Plerions. *Jonathan Arons & Marco Tavani.* 90, 797, 13-F1 (1994)

Radio Emission from SNR 1987A. *J. G. Kirk, P. Duffy, & Lewis Ball.* 90, 807, 13-F13 (1994)

Evolution of Supernova Remnants with Cosmic Rays and Radiative Cooling. *E. A. Dorfi.* 90, 841, 14-B14 (1994)

Model Images of Radio Halos around Supernova Remnants. *Stephen P. Reynolds.* 90, 845, 14-C6 (1994)

Particle Acceleration in High-Energy Gamma-Ray Sources. *David Eichler.* 90, 877, 14-F3 (1994)

Cosmic-Ray Transport and Acceleration. *Reinhard Schlickeiser.* 90, 929, 15-D1 (1994)

The Origins of High-Energy Cosmic Rays. *W. I. Axford.* 90, 937, 15-D11 (1994)

Time-dependent Simulation of Cosmic-Ray Shocks, Including Alfvén Transport. *T. W. Jones.* 90, 969, 15-G10 (1994)

Oblique Magnetohydrodynamic Cosmic-Ray–modified Shocks: Two-Fluid Numerical Simulations. *Adam Frank, T. W. Jones, & Dongsu Ryu.* 90, 975, 16-A4 (1994)

Bohm Diffusion and Cosmic-Ray–Modified Shocks. *Peter Duffy.* 90, 981, 16-A12 (1994)

On the Distance Determination and Ionization of the High-Velocity Clouds. *A. Ferrara & G. B. Field.* 423, 665, 56-G5 (1994)

Forbidden-Line Formation in Hydromagnetic Disk Winds. II. Line Profiles. *Rachid Ouyed & Ralph E. Pudritz.* 423, 753, 58-A3 (1994)

Time-dependent Evolution of Cosmic-Ray–modified Shock Structure: Transition to Steady State. *D. J. Donohue, G. P. Zank, & G. M. Webb.* 424, 263, 65-B9 (1994)

CH^+ in the Interstellar Medium. *M. Marsha Allen.* 424, 754, 74-B11 (1994)

Simulation of Thick Accretion Disks with Standing Shocks by Smoothed Particle Hydrodynamics. *Diego Molteni, Giuseppe Lanzafame, & Sandip K. Chakrabarti.* 425, 161, 82-B13 (1994)

Numerical Study of Two-Fluid C-Type Shock Waves. *Gábor Tóth.* 425, 171, 82-C11 (1994)

The Role of the Equation of State in the "Prompt" Phase of Type II Supernovae. *F. Douglas Swesty, James M. Lattimer, & Eric S. Myra.* 425, 195, 82-F3 (1994)

Fabry-Perot Observations and New Models of the HH 47A and HH 47D Bow Shocks. *Jon A. Morse, Patrick Hartigan, Steve Heathcote, John C. Raymond, & Gerald Cecil.* 425, 738, 91-A1 (1994)

Momentum Transfer by Astrophysical Jets. *Lawrence Chernin, Colin Masson, Elisabete M. de Gouveia Dal Pino, & Willy Benz.* 426, 204, 98-F2 (1994)

Electron Injection and Acceleration at Nonlinear Shocks: Results of Numerical Simulations. *Amir Levinson.* 426, 327, 100-C1 (1994)

Structure of Steady State Accretion Shocks with Several Cooling Functions: Closed Integral-Form Solution. *Kinwah Wu, G. Chanmugan, & G. Shaviv.* 426, 664, 106-F5 (1994)

Three-dimensional Hydrodynamic Bondi-Hoyle Accretion. II. Homogeneous Medium at Mach 3 with $\gamma = 5/3$. *Maximilian Ruffert & David Arnett.* 427, 351, 114-C3 (1994)

Dense Molecular Shocks and Accretion onto Protostellar Disks. *David A. Neufeld & David J. Hollenbach.* 428, 170, 130-C11 (1994)

Nonlinear Instabilities in Shock-bounded Slabs. *Ethan T. Vishniac.* 428, 186, 130-E1 (1994)

Particle Acceleration in an Evolving Active Region by an Ensemble of Shock Waves. *Anastasios Anastasiadis & Loukas Vlahos.* 428, 819, 140-D11 (1994)

Diffusive Shock Acceleration in the Presence of Current Sheets. *J. Kóta & J. R. Jokipii.* 429, 385, 148-G8 (1994)

The Evolution of Cosmic-Ray–mediated Magnetohydrodynamic Shocks: A Two-Fluid Approach. *Byung-Il Jun, David A. Clarke, & Michael L. Norman.* 429, 748, 155-A3 (1994)

A General Class of Self-similar Self-gravitating Fluids. *Ue-Li Pen.* 429, 759, 155-B2 (1994)

Explosions of Infalling Comets in Jupiter's Atmosphere. *Roger A. Chevalier & Craig L. Sarazin.* 429, 863, 156-D6 (1994)

The Molecular Gas Associated with the Orion Bright Bar. *Toshihiro Omodaka, Masahiko Hayashi, Tetsuo Hasegawa, & Saeko S. Hayashi.* 430, 256, 162-C7 (1994)

The Impact of SN 1987A with Its Circumstellar Ring. *Ding Luo, Richard McCray, & Jonathan Slavin.* 430, 264, 162-D3 (1994)

High-Resolution Simulations of Compressible Convection Using the Piecewise-parabolic Method. *David H. Porter & Paul R. Woodward.* 93, 309, 45-G1 (1994)

Interstellar SO^+. *B. E. Turner.* 430, 727, 170-G9 (1994)

An X-Ray and Optical Study of the Supernova Remnant W44. *Jeonghee Rho, R. Petre, Eric M. Schlegel, & J. Jeff Hester.* 430, 757, 171-C8 (1994)

Shocked Pure-rotational Emission from H_2 in Orion. *Parvinder S. Parmar, John H. Lacy, & Jeffrey M. Achtermann.* 430, 786, 171-F3 (1994)

A Study of X-Ray and Infrared Emissions from Dusty Nonradiative Shock Waves. *Olaf Vancura, John C. Raymond, Eli Dwek, William P. Blair, Knox S. Long, & Scott Foster.* 431, 188, 178-D13 (1994)

The Physics of Grain-Grain Collisions and Gas-Grain Sputtering in Interstellar Shocks. *A. G. G. M. Tielens, C. F. McKee, C. G. Seab, & D. J. Hollenbach.* 431, 321, 180-B3 (1994)

Giant Explosion at the Galactic Center and Huge Shocked Shells in the Halo. *Yoshiaki Sofue.* 431, L91, 191-E8 (1994)

Spectral Properties of Blast-Wave Models of Gamma-Ray Burst Sources. *P. Mészáros, M. J. Rees, & H. Papathanassiou.* 432, 181, 195-D10 (1994)

Cosmic Bullets as Particle Accelerators and Radio Sources. *T. W. Jones, Hyesung Kang, & I. L. Tregillis.* 432, 194, 195-E11 (1994)

Shock Propagation and the Generation of Magnetohydrodynamic Wave Fields in Inhomogeneous Molecular Clouds. *Mark S. Miesch & Ellen G. Zweibel.* 432, 622, 203-F9 (1994)

Chromospheric Heating and Metal Deficiency in Cool Giants: Theoretical Results versus Observations. *M. Cuntz, W. Rammacher, & P. Ulmschneider.* 432, 690, 204-E12 (1994)

An Ultraviolet and Visible Spectroscopic Study of a Pulsational Cycle of RY Sagittarii. *Geoffrey C. Clayton, W. A. Lawson, P. L. Cottrell, Barbara A. Whitney, S. Adam Stanford, & Frank de Ruyter.* 432, 785, 205-F13 (1994)

Low-Frequency Spectra of Gamma-Ray Bursts. *J. I. Katz.* 432, L107, 206-G11 (1994)

Shock Interactions with Magnetized Interstellar Clouds. I. Steady Shocks Hitting Nonradiative Clouds. *Mordecai-Mark Mac Low, Christopher F. McKee, Richard I. Klein, James M. Stone, & Michael L. Norman.* 433, 757, 220-E2 (1994)

Grain Destruction in Shocks in the Interstellar Medium. *A. P. Jones, A. G. G. M. Tielens, D. J. Hollenbach, & C. F. McKee.* 433, 797, 221-A12 (1994)

Radiative Shock Overstability of Finite-sized Objects. *Ruth Dgani & Noam Soker.* 434, 262, 229-A11 (1994)

Variable Emission Lines as Evidence of Spiral Shocks in Accretion Disks around Active Galactic Nuclei. *Sandip K. Chakrabarti & Paul J. Wiita.* 434, 518, 234-G9 (1994)

Structure of Relativistic Shocks in Pulsar Winds: A Model of the Wisps in the Crab Nebula. *Yves A. Gallant & Jonathan Arons.* 435, 230, 246-E4 (1994)

Thin Shell Formation in Radiative Shocks. I. Supernova Remnants in Low-Density Media. *José Franco, Walter Warren Miller III, S. J. Arthur, Guillermo Tenorio-Tagle, & Roberto Terlevich.* 435, 805, 257-B10 (1994)

Nonlinear Instability of Accelerating Shock Waves with Application to Supernovae. *Ding Luo & Roger A. Chevalier.* 435, 815, 257-C9 (1994)

Mass-Loss Rates, Ionization Fractions, Shock Velocities, and Magnetic Fields of Stellar Jets. *Patrick Hartigan, Jon A. Morse, & John Raymond.* 436, 125, 263-A6 (1994)

High-Velocity Sulfur Monoxide Emission from Protostellar Outflows. *Lawrence M. Chernin, Colin R. Masson, & Gary A. Fuller.* 436, 741, 275-F3 (1994)

Interactions between Magnetohydrodynamical Shocks and Denser Clouds. *Wenlong Dai & Paul R. Woodward.* 436, 776, 276-B13 (1994)

Shocked Molecular Gas around the Extremely Young Source IRAS 03282+3035. *R. Bachiller, S. Terebey, T. Jarrett, J. Martín-Pintado, C. A. Beichman, & D. Van Buren.* 437, 296, 287-C2 (1994)

Radiating Scalar Soliton-like Stars in a Pressurized Environment. *M. Esculpi & L. Herrera.* 437, 317, 287-E7 (1994)

A Multiline, Multiresolution VLA Study of the Ultracompact H II Region G29.96−0.02. *A. Afflerbach, E. Churchwell, P. Hofner, & S. Kurtz.* 437, 697, 295-C12 (1994)

Nonequilibria in Thermal Emission from Supernova Remnants. *Kuniaki Masai.* 437, 770, 296-C2 (1994)

Tidal-Shock Relaxation: A Reexamination of Tidal Shocks in Stellar Systems. *Tomislav Kundić & Jeremiah P. Ostriker.* 438, 702, 13-G7 (1995)

On the Wind-powered Nebula NGC 2359 and the WN Star HD 56925. *Yang Chen, Zhen-ru Wang, & Qin-yue Qu.* 438, 950, 17-C1 (1995)

Collapse and Fragmentation of Molecular Cloud Cores. II. Collapse Induced by Stellar Shock Waves. *Alan P. Boss.* 439, 224, 24-C7 (1995)

Interstellar Clouds in High-Speed, Supersonic Flows: Two-dimensional Simulations. *A. V. R. Schiano, Wayne A. Christiansen, & Jeffrey M. Knerr.* 439, 237, 24-D9 (1995)

Young Oxygen-rich Supernova Remnants. II. An Oxygen-rich Emission Mechanism. *Ralph S. Sutherland & Michael A. Dopita.* 439, 381, 26-D4 (1995)

Shock-excited NH_3 (3,3) Masers in the NGC 6334 Star-forming Region. *Kathleen E. Kraemer & James M. Jackson.* 439, L9, 29-F7 (1995)

Hot Shocked Gas along the Jets of NGC 4258 (M106). *G. Cecil, A. S. Wilson, & C. De Pree.* 440, 181, 43-F3 (1995)

High-Velocity, High-Excitation Neutral Carbon in a Cloud in the Vela Supernova Remnant. *Edward B. Jenkins & George Wallerstein.* 440, 227, 44-C13 (1995)

Does a Nonmagnetic Solar Chromosphere Exist? *Mats Carlsson & Robert F. Stein.* 440, L29, 48-E8 (1995)

Convergence Properties of Finite-Difference Hydrodynamics Schemes in the Presence of Shocks. *Paul A. Kimoto & David F. Chernoff.* 96, 627, 10-D9 (1995)

Velocity Profile of the Ionized Disk and the Mass of the Black Hole in M87. *Sandip K. Chakrabarti.* 441, 576, 70-A6 (1995)

Simulation of the Instability of Mach 2 and Mach 4 Gaseous Jets in Two and Three Dimensions. *Gene M. Bassett & Paul R. Woodward.* 441, 582, 70-B1 (1995)

Time-dependent Simulation of Oblique MHD Cosmic-Ray Shocks Using the Two-Fluid Model. *Adam Frank, T. W. Jones, & Dongsu Ryu.* 441, 629, 70-F11 (1995)

The Stability and Collimation of Three-dimensional Jets. *Philip E. Hardee, David A. Clarke, & D. Andrew Howell.* 441, 644, 71-A1 (1995)

Evidence for Elemental Variation in the Ejecta of the Tycho Supernova Remnant. *O. Vancura, P. Gorenstein, & John P. Hughes.* 441, 680, 71-D1 (1995)

The Homunculus of η Carinae: An Interacting Stellar Winds Paradigm. *Adam Frank, Bruce Balick, & Kris Davidson.* 441, L77, 76-B2 (1995)

Numerical Magnetohydrodynamics in Astrophysics: Algorithm and Tests for One-dimensional Flow. *Dongsu Ryu & T. W. Jones.* 442, 228, 80-C5 (1995)

Velocity Field of the Orion-KL Region in Molecular Hydrogen Emission. *Hajime Sugai, Hironobu Kawabata, Tomonori Usuda, Motoko Y. Inoue, Hirokazu Kataza, & Masuo Tanaka.* 442, 674, 89-D3 (1995)

Incorporation of Ambipolar Diffusion into the ZEUS Magnetohydrodynamics Code. *Mordecai-Mark Mac Low, Michael L. Norman, Arieh Königl, & Mark Wardle.* 442, 726, 90-B10 (1995)

Ammonia Emission from Bow Shocks in the L1157 Outflow. *M. Tafalla & R. Bachiller.* 443, L37, 102-G4 (1995)

Hydrodynamic Instabilities in Supernova Remnants: Early Radiative Cooling. *Roger A. Chevalier & John M. Blondin.* 444, 312, 117-F11 (1995)

Optical Continuum Signature of the Jet in the Spiral Galaxy NGC 4258. *Yvan Dutil, Dominique Beauchamp, & Jean-René Roy.* 444, L85, 130-E8 (1995)

Radio Jet Propagation and Wide-Angle Tailed Radio Sources in Merging Galaxy Cluster Environments. *Chris Loken, Kurt Roettiger, Jack O. Burns, & Michael Norman.* 445, 80, 133-D11 (1995)

Three Low-Energy Particle Events: Modeling the Influence of the Parent Interplanetary Shock. *A. M. Heras, B. Sanahuja, D. Lario, Z. K. Smith, T. Detman, & M. Dryer.* 445, 497, 139-D4 (1995)

Implicit General Relativistic Hydrodynamic Methods for Modeling the Late-Time Explosion Mechanism in Core Collapse Supernovae. *F. Douglas Swesty.* 445, 811, 146-D4 (1995)

Observations of the Clumpy Shell of the L1551 Bipolar Outflow. *R. L. Plambeck & R. L. Snell.* 446, 234, 156-D6 (1995)

Infrared Spectroscopy of Herbig-Haro Objects. *Richard D. Schwartz, A. S. B. Schultz, Martin Cohen, & Peredur M. Williams.* 446, 318, 157-E8 (1995)

Dynamo-generated Turbulence and Large-Scale Magnetic Fields in a Keplerian Shear Flow. *Axel Brandenburg, Åke Nordlund, Robert F. Stein, & Ulf Torkelsson.* 446, 741, 166-C7 (1995)

Similarity Solution for a Supernova Remnant Evolving in an Inhomogeneous Stellar Wind. *Yang Chen, Ning Liu, & Zhen-ru Wang.* 446, 755, 166-D11 (1995)

The Weakening of the Termination Shocks of Isothermal Winds by Mass Loading. *R. J. R. Williams, T. W. Hartquist, & J. E. Dyson.* 446, 759, 166-E4 (1995)

A Model for the Radio Emission from SNR 1987A. *P. Duffy, Lewis Ball, & J. G. Kirk.* 447, 364, 177-D7 (1995)

Diffusive Shock Acceleration Simulations: Comparison with Particle Methods and Bow Shock Measurements. *Hyesung Kang & T. W. Jones.* 447, 944, 188-G13 (1995)

Evidence for Shock Acceleration in the Binary Pulsar System PSR B1259−63. *J. E. Grove, M. Tavani, W. R. Purcell, W. N. Johnson, J. D. Kurfess, M. S. Strickman, & J. Arons.* 447, L113, 191-B1 (1995)

Protostellar Collapse with a Shock. *John C. Tsai & Juliana J. L. Hsu.* 448, 774, 205-D8 (1995)

The First Second of a Type II Supernova: Convection, Accretion, and Shock Propagation. *H.-Thomas Janka & Ewald Müller.* 448, L109, 209-D9 (1995)

Detection of Pure Rotational H_2 Emission from the Supernova Remnant IC 443: Further Evidence for a Partially Dissociating J-Shock. *Matthew J. Richter, James. R. Graham, Gillian S. Wright, Douglas M. Kelly, & John H. Lacy.* 449, L83, 217-D2 (1995)

The Supernova Shock. *Hans A. Bethe.* 449, 714, 222-F2 (1995)

Numerical Analysis of the Dynamic Stability of Radiative Shocks. *Russell Strickland & John M. Blondin.* 449, 727, 222-G5 (1995)

Giant Bow Shock Pairs Associated with Herbig-Haro Jets. *Katsuo Ogura.* 450, L23, 235-F6 (1995)

Discovery of Diffuse X-Ray Emission in 47 Tucanae. *Martin Krockenberger & Jonathan E. Grindlay.* 451, 200, 248-F11 (1995)

The Disruption of Molecular Cloud Cores by Photoionization. *J. A. Rodríguez-Gaspar, G. Tenorio-Tagle, & J. Franco.* 451, 210, 248-G10 (1995)

Sequential Star Formation in OB Associations: The Role of Molecular Cloud Turbulence. *Bruce G. Elmegreen, Toshiya Kimura, & Makoto Tosa.* 451, 675, 256-E1 (1995)

Stable and Unstable Accretion Flows with Angular Momentum near a Point Mass. *Dongsu Ryu, Garry L. Brown, Jeremiah P. Ostriker, & Abraham Loeb.* 452, 364, 267-B7 (1995)

Galactic Cosmic-Ray Mediation of a Spherical Solar Wind Flow. II. The Steady State Hydromagnetic Approximation. *J. A. le Roux & V. S. Ptuskin.* 452, 423, 267-G11 (1995)

Spectral Evidence for Shock-ionized Gas along the Jets of NGC 4258. *Gerald Cecil, Jon A. Morse, & Sylvain Veilleux.* 452, 613, 273-B4 (1995)

Hubble Space Telescope Observations of the SN 1987A Triple Ring Nebula. *Christopher J. Burrows, John Krist, J. Jeff Hester, Raghvendra Sahai, John T. Trauger, Karl R. Stapelfeldt, John S. Gallagher III, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, Richard E. Griffiths, John G. Hoessel, Jon A. Holtzman, Jeremy R. Mould, Paul A. Scowen, Alan M. Watson, & James A. Westphal.* 452, 680, 274-A11 (1995)

Numerical Magnetohydrodynamics in Astrophysics: Algorithm and Tests for Multidimensional Flow. *Dongsu Ryu, T. W. Jones, & Adam Frank.* 452, 785, 275-D7 (1995)

Multidimensional Green's Functions and the Statistics of Diffusive Shock Acceleration. *G. M. Webb, G. P. Zank, C. M. Ko, & D. J. Donohue.* 453, 178, 283-F1 (1995)

Molecular H_2 Emission in HH 47A: *Hubble Space Telescope* GHRS and FOC Observations. *Salvador Curiel, John C. Raymond, Mark Wolfire, Patrick Hartigan, Jon Morse, Richard D. Schwartz, & Peter Nisenson.* 453, 322, 285-E10 (1995)

Acceleration Rates and Injection Efficiencies in Oblique Shocks. *Donald C. Ellison, Matthew G. Baring, & Frank C. Jones.* 453, 873, 296-A7 (1995)

The Origin of Cosmic Rays above $10^{18.5}$ eV. *Colin A. Norman, Donald B. Melrose, & Abraham Achterberg.* 454, 60, 300-A12 (1995)

The Hydrodynamics of Shock-Cloud Interactions in Three Dimensions. *Jianjun Xu & James M. Stone.* 454, 172, 301-E12 (1995)

The Corrugation Instability in Slow Magnetosonic Shock Waves. *James M. Stone & Mark Edelman.* 454, 182, 301-G7 (1995)

Infrared Imaging and Spectroscopy of the Molecular Shock in IC 443. *Matthew J. Richter, James R. Graham, & Gillian S. Wright.* 454, 277, 303-B1 (1995)

Detection of Ultraviolet Emission Lines in SN 1006 with the Hopkins Ultraviolet Telescope. *John C. Raymond, William P. Blair, & Knox S. Long.* 454, L31, 307-G2 (1995)

A Far-Ultraviolet Spectrum of the Puppis A Supernova Remnant Using the Hopkins Ultraviolet Telescope. *William P. Blair, John C. Raymond, Knox S. Long, & Gerard A. Kriss.* 454, L35, 307-G12 (1995)

Spectral Signatures of Fast Shocks. II. Optical Diagnostic Diagrams. *Michael A. Dopita & Ralph S. Sutherland.* 455, 468, 328-D5 (1995)

Spectral Properties of Accretion Disks around Galactic and Extragalactic Black Holes. *Sandip Chakrabarti & Lev G. Titarchuk.* 455, 623, 330-E1 (1995)

X-Rays from SN 1993J and Structures of Ejecta and Circumstellar Medium. *Tomoharu Suzuki & Ken'ichi Nomoto.* 455, 658, 331-A8 (1995)

SKY PHOTOGRAPHS

The Imaging Performance of the *Hubble Space Telescope*. *Christopher J. Burrows, Jon A. Holtzman, S. M. Faber, Pierre Y. Bely, Hashima Hasan, C. R. Lynds, & Daniel Schroeder.* 369, L21, 45-C1 (1991)

SOLAR SYSTEM: FORMATION

Large Electric Fields in Acoustic Waves and the Stimulation of Lightning Discharges. *W. Pilipp, T. W. Hartquist, & G. E. Morfill.* 387, 364, 41-D13 (1992)

On the Detectability of the Gas of Other Solar Nebulae. *Toshihiro Omodaka, Yoshimi Kitamura, & Eiko Kawazoe.* 396, L87, 167-C7 (1992)

^{26}Al and Time Scales of the Solar Nebula. *Kurt Liffman.* 398, L111, 194-F1 (1992)

Observational Constraints on Solar Nebula Nitrogen Chemistry: N_2/NH_3. *Maria Womack, Susan Wyckoff, & L. M. Ziurys.* 401, 728, 231-E6 (1992)

Evolution of Planetesimals. I. Dynamics: Relaxation in a Thin Disk. *P. L. Palmer, D. N. C. Lin, & S. J. Aarseth.* 403, 336, 18-A12 (1993)

Evolution of Planetesimals. II. Numerical Simulations. *S. J. Aarseth, D. N. C. Lin, & P. L. Palmer.* 403, 351, 18-C1 (1993)

The Formation of Protostellar Disks. I. 1 $M_\odot$. *Harold W. Yorke, Peter Bodenheimer, & Gregory Laughlin.* 411, 274, 130-E13 (1993)

Evolution of the Solar Nebula. II. Thermal Structure during Nebula Formation. *Alan P. Boss.* 417, 351, 222-A1 (1993)

On the Wave Excitation and a Generalized Torque Formula for Lindblad Resonances Excited by External Potential. *Paweł Artymowicz.* 419, 155, 248-B1 (1993)

An Observational Estimate of the Probability of Encounters between Mass-losing Evolved Stars and Molecular Clouds. *Joel H. Kastner & P. C. Myers.* 421, 605, 25-G3 (1994)

Further Studies of Gravitationally Unstable Protostellar Disks. *Leslie Tomley, Thomas Y. Steiman-Cameron, & Patrick Cassen.* 422, 850, 42-D8 (1994)

Asymptotic Giant Branch Stars as a Source of Short-lived Radioactive Nuclei in the Solar Nebula. *G. J. Wasserburg, M. Busso, R. Gallino, & C. M. Raiteri.* 424, 412, 67-A6 (1994)

Extreme ^{26}Mg and ^{17}O Enrichments in an Orgueil Corundum: Identification of a Presolar Oxide Grain. *I. D. Hutcheon, G. R. Huss, A. J. Fahey, & G. J. Wasserburg.* 425, L97, 94-F7 (1994)

Oxygen Isotopes in Circumstellar Al_2O_3 Grains from Meteorites and Stellar Nucleosynthesis. *Gary R. Huss, Albert J. Fahey, Roberto Gallino, & G. J. Wasserburg.* 430, L81, 166-C13 (1994)

The Possibility of Forming an Inhomogeneous Sun and the Solar Neutrino Deficit. *E. H. Levy & T. V. Ruzmaikina.* 431, 881, 189-F1 (1994)

Nonaxisymmetric Evolution in Protostellar Disks. *Gregory Laughlin & Peter Bodenheimer.* 436, 335, 265-G13 (1994)

Isotopically Distinct Reservoirs in the Solar Nebula: Isotope Anomalies in Vigarano Meteorite Inclusions. *R. D. Loss, G. W. Lugmair, A. M. Davis, & G. J. MacPherson.* 436, L193, 282-D13 (1994)

Disk Tides and Accretion Runaway. *William R. Ward & Joseph M. Hahn.* 440, L25, 48-E1 (1995)

Injection of Freshly Synthesized ^{41}Ca in the Early Solar Nebula by an Asymptotic Giant Branch Star. *G. J. Wasserburg, R. Gallino, M. Busso, J. N. Goswami, & C. M. Raiteri.* 440, L101, 58-D1 (1995)

Dust Particle Settling in Passive Disks around T Tauri Stars: Models and *IRAS* Observations. *Kotaro Miyake & Yoshitsugu Nakagawa.* 441, 361, 64-C13 (1995)

Cosmic Dust Synthesis by Accretion and Coagulation. *G. Praburam & J. Goree.* 441, 830, 73-D4 (1995)

Numerical Simulations of Stratified Compressible Convection with Internal Heating and Disklike Variable Gravity. *W. Cabot, K. W. Thompson, & J. B. Pollack.* 98, 315, 26-C4 (1995)

Massive Supernovae, Orion Gamma Rays, and the Formation of the Solar System. *A. G. W. Cameron, P. Höflich, P. C. Myers, & D. D. Clayton.* 447, L53, 181-D7 (1995)

Detection of $H_2{}^{18}O$ in Jupiter. *Keith S. Noll, T. R. Geballe, & Roger F. Knacke.* 453, L49, 290-A11 (1995)

SOLAR SYSTEM: GENERAL

Gravitational Diffusion of Solar System WIMPs. *Andrew Gould.* 368, 610, 32-F7 (1991)

^{26}Al and ^{16}O in the Early Solar System: Clues from Meteoritic Al_2O_3. *Edward Anders, Alois Virag, Ernst Zinner, & Roy S. Lewis.* 373, L77, 97-F6 (1991)

The Dynamical Evolution of the Protosolar Nebula. *Steven P. Ruden & James B. Pollack.* 375, 740, 121-G11 (1991)

Testing Einstein's Theory of Gravity by Analyzing Lunar Laser Ranging Data. *J. Müller, M. Schneider, M. Soffel, & H. Ruder.* 382, L101, 211-E12 (1991)

The Perihelion Problem in Kaluza-Klein Gravity. *Paul H. Lim & Paul S. Wesson.* 397, L91, 181-B8 (1992)

The Gravitational Sculpting of the Kuiper Belt. *Harold F. Levison & Martin J. Duncan.* 406, L35, 61-A8 (1993)

Second Post-Newtonian Order Renormalization of First Post-Newtonian Order Gravity in the Solar System. *Ken Nordtvedt.* 407, 758, 80-A1 (1993)

Encounters with Protostellar Disks. I. Disk Tilt and the Nonzero Solar Obliquity. *Clayton H. Heller.* 408, 337, 87-C11 (1993)

Our Sun. III. Present and Future. *I.-Juliana Sackmann, Arnold I. Boothroyd, & Kathleen E. Kraemer.* 418, 457, 236-F6 (1993)

Disk-Satellite Interaction via Density Waves and the Eccentricity Evolution of Bodies Embedded in Disks. *Paweł Artymowicz.* 419, 166, 248-C1 (1993)

On the Apparent Velocity of Integrated Sunlight. II. 1983–1992 and Comparisons with Magnetograms. *Drake Deming & Claude Plymate.* 426, 382, 101-A2 (1994)

COBE DIRBE Near-Infrared Polarimetry of the Zodiacal Light: Initial Results. *G. B. Berriman, N. W. Boggess, M. G. Hauser, T. Kelsall, C. M. Lisse, S. H. Moseley, W. T. Reach, & R. F. Silverberg.* 431, L63, 183-C1 (1994)

^{41}Ca in the Early Solar System. *G. Srinivasan, A. A. Ulyanov, & J. N. Goswami.* 431, L67, 183-C9 (1994)

A Potential New Test for Unseen Matter in the Outer Solar System. *Timothy P. Krisher.* 433, 666, 219-C13 (1994)

The Classical Tests in Kaluza-Klein Gravity. *D. Kalligas, P. S. Wesson, & C. W. F. Everitt.* 439, 548, 31-G9 (1995)

The Carbon Isotope Abundance Ratio in Comet Halley. *Marvin Kleine, Susan Wyckoff, Peter A. Wehinger, & Bruce A. Peterson.* 439, 1021, 38-F13 (1995)

Improved Bounds on Nonluminous Matter in Solar Orbit. *John D. Anderson, Eunice L. Lau, Timothy P. Krisher, Duane A. Dicus, Doris C. Rosenbaum, & Vigdor L. Teplitz.* 448, 885, 207-B7 (1995)

Model of a Kuiper Belt Small Grain Population and Resulting Far-Infrared Emission. *D. E. Backman, A. Dasgupta, & R. E. Stencel.* 450, L35, 236-A11 (1995)

Gamma Rays, Cosmic Rays, and Extinct Radioactivity in Molecular Clouds. *Donald D. Clayton & Liping Jin.* 451, 681, 256-E10 (1995)

The Discovery of Halley-sized Kuiper Belt Objects Using the *Hubble Space Telescope*. *Anita L. Cochran, Harold F. Levison, S. Alan Stern, & Martin J. Duncan.* 455, 342, 322-G3 (1995)

SPACE VEHICLES

A Survey of Bidirectional $\geq$ 1 MeV Ion Flows during the *Helios 1* and *Helios 2* Missions: Observations from the Goddard Space Flight Center Instruments. *I. G. Richardson.* 420, 926, 14-D5 (1994)

The Infrared Telescope in Space (IRTS). *H. Murakami, J. Bock, M. M. Freund, H. Guo, T. Hirao, A. E. Lange, H. Matsuhara, T. Matsumoto, S. Matsuura, T. J. McMahon, M. Murakami, T. Nakagawa, M. Noda, K. Noguchi, H. Okuda, K. Okumura, T. Onaka, T. L. Roellig, S. Sato, H. Shibai, T. Tanabé, T. Watabe, T. Yagi, N. Yajima, & M. Yui.* 428, 354, 132-E8 (1994)

Near-Infrared Spectrometer on the Infrared Telescope in Space. *Manabu Noda, Toshio Matsumoto, Shuji Matsuura, Kunio Noguchi, Masahiro Tanaka, Mark A. Lim, & Hiroshi Murakami.* 428, 363, 132-F5 (1994)

The Mid-Infrared Spectrometer on the Infrared Telescope in Space (IRTS) Mission. *Thomas L. Roellig, Takashi Onaka, Thomas J. McMahon, & T. Tanabé.* 428, 370, 132-G1 (1994)

Far-Infrared Line Mapper (FILM) on the Infrared Telescope in Space. *Hiroshi Shibai, Masao Yui, Hideo Matsuhara, Norihisa Hiromoto, Takao Nakagawa, & Haruyuki Okuda.* 428, 377, 132-G11 (1994)

The Far-Infrared Photometer on the Infrared Telescope in Space. *A. E. Lange, M. M. Freund, S. Sato, T. Hirao, T. Matsumoto, & T. Watabe.* 428, 384, 133-A6 (1994)

INTEGRAL: Overview and Mission Concept. *Christoph Winkler.* 92, 327, 36-B9 (1994)

INTEGRAL: Mission and Satellite. *Oscar Pace, Dominique Pawlak, & Chris Winkler.* 92, 339, 36-C13 (1994)

The *Compton Gamma Ray Observatory*. *N. Gehrels, E. Chipman, & D. Kniffen.* 92, 351, 36-E1 (1994)

The Cosmic-Ray Oxygen and Helium Spectra Measured at *Pioneer 10* over the Time of the 1987 Modulation Minimum, and Implications for the He/O Source Ratio. *W. R. Webber & F. B. McDonald.* 435, 464, 249-G2 (1994)

The On-Orbit Performance of WFPC2. *John T. Trauger, Gilda E. Ballester, Christopher J. Burrows, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, John S. Gallagher III, Richard E. Griffiths, J. Jeff Hester, John G. Hoessel, Jon A. Holtzman, John E. Krist, Jeremy R. Mould, Paul A. Scowen, Karl R. Stapelfeldt, Alan M. Watson, & James A. Westphal.* 435, L3, 251-B5 (1994)

In-Orbit Performance of the COSTAR-corrected Faint Object Camera. *R. I. Jedrzejewski, G. Hartig, P. Jakobsen, J. H. Crocker, & H. C. Ford.* 435, L7, 251-B12 (1994)

The Faint Limit of the *Hubble Space Telescope* Faint Object Spectrograph and Rejection of the Cosmic-Ray Background. *David Tytler & Christopher Davis.* 438, 420, 7-C5 (1995)

Calibrating the Broad Band X-Ray Telescope. *K. A. Weaver, K. A. Arnaud, E. A. Boldt, D. Christian, M. Corcoran, S. S. Holt, K. Jahoda, R. Kelley, F. E. Marshall, R. F. Mushotzky, R. Petre, G. Rawley, P. J. Serlemitsos, E. M. Schlegel, A. P. Smale, J. H. Swank, A. E. Szymkowiak, & S. Yamauchi.* 96, 303, 5-D13 (1995)

Performance and Preliminary Calibration of the Hopkins Ultraviolet Telescope on the Astro-2 Mission. *Jeffrey W. Kruk, Samuel T. Durrance, Gerard A. Kriss, Arthur F. Davidsen, William P. Blair, Brian R. Espey, & David S. Finley.* 454, L1, 307-C1 (1995)

Statistical Studies of *ISEE 3/ICE* Observations of Impulsive Hard X-Ray Solar Flares. *Kenneth R. Bromund, James M. McTiernan, & Sharad R. Kane.* 455, 733, 332-A8 (1995)

SPECTROPHOTOMETRY

Southern *IRAS* Quasar with Extreme Fe II Emission. *S. Lípari, F. D. Macchetto, & D. Golombek.* 366, L65, 11-C1 (1991)

ESO 207-61: A Brown Dwarf Candidate in the Hyades Moving Group. *María Teresa Ruiz, Marianne Y. Takamiya, & Miguel Roth.* 367, L59, 22-C7 (1991)

Steps toward Determination of the Size and Structure of the Broad-Line Region in Active Galactic Nuclei. II. An Intensive Study of NGC 5548 at Optical Wavelengths. *B. M. Peterson, T. J. Balonek, E. S. Barker, J. Bechtold, R. Bertram, N. G. Bochkarev, M. J. Bolte, D. Bond, T. A. Boroson, M. T. Carini, T. E. Carone, J. A. Christensen, S. D. Clements, A. L. Cochran, R. D. Cohen, D. Crampton, M. Dietrich, M. Elvis, A. Ferguson, A. V. Filippenko, K. J. Fricke, C. M. Gaskell, J. P. Halpern, J. P. Huchra, J. B. Hutchings, W. Kollatschny, A. P. Koratkar, K. T. Korista, J. H. Krolik, N. J. Lame, A. Laor, R. J. Leacock, G. M. MacAlpine, M. A. Malkan, D. Maoz, H. R. Miller, S. L. Morris, H. Netzer, C. L. M. Oliveira, J. Penfold, M. V. Penston, E. Pérez, R. W. Pogge, M. W. Richmond, W. Romanishin, E. I. Rosenblatt, L. Saddlemyer, A. Sadun, S. R. Sawyer, J. C. Shields, A. I. Shapovalova, A. G. Smith, H. A. Smith, P. S. Smith, W.-H. Sun, U. Thiele, T. J. Turner, S. Veilleux, R. M. Wagner, R. J. Weymann, B. J. Wilkes, B. J. Wills, D. Wills, & P. F. Younger.* 368, 119, 24-E3 (1991)

A Spectrophotometric Atlas of White Dwarfs Compiled from the *IUE* Archives. *Gary Wegner & Steven R. Swanson.* 75, 507, 7-E13 (1991)

Young Stellar Objects Detected by *IRAS*. *Frank O. Clark.* 75, 611, 9-B5 (1991)

The Shape of the Ultraviolet Continuum of Quasars and Intergalactic Dust. *F. H. Cheng, C. Martin Gaskell, & Anuradha P. Koratkar.* 370, 487, 54-D9 (1991)

The Origin of the Far-Infrared Continuum in Active Galactic Nuclei. *L. K. Hunt.* 370, 511, 54-F9 (1991)

The Ultraviolet Continuum and the Fluorescent H_2 Lines in Low-Excitation Herbig-Haro Objects. *K.-H. Böhm, D. M. Scott, & J. Solf.* 371, 248, 63-C1 (1991)

Ultramassive ($\sim 10^{11}$ $M_\odot$) Dark Core in the Luminous Infrared Galaxy NGC 6240? *Jonathan Bland-Hawthorn, Andrew S. Wilson, & R. Brent Tully.* 371, L19, 66-C7 (1991)

The Ultraviolet Spectrum and Continuum Energy Distribution of the Bright Quasar H1821+643. *Michiel Kolman, Jules P. Halpern, Chris R. Shrader, & Alexei V. Filippenko.* 373, 57, 86-F8 (1991)

The Bumps in the Spectral Energy Distribution of Active Galactic Nuclei. *Marcella Contini & Sueli M. Viegas.* 373, 405, 93-A9 (1991)

Imaging Spectrophotometry of Ionized Gas in NGC 1068. II. Global Ionization of the Inner Disk. *Jonathan Bland-Hawthorn, James Sokolowski, & Gerald Cecil.* 375, 78, 112-A1 (1991)

IUE Observations of Early-Type Stars at High Galactic Latitudes. *D. A. Quin, P. J. F. Brown, E. S. Conlon, P. L. Dufton, & F. P. Keenan.* 375, 342, 115-B7 (1991)

Imaging Spectrophotometry of Ionized Gas in NGC 1068. III. Anisotropic Excitation of the Large-Scale Disk by Scattering of Nuclear Continuum.

James Sokolowski, Jonathan Bland-Hawthorn, & Gerald Cecil. 375, 583, 120-A1 (1991)

Absolute Far-Ultraviolet Spectrophotometry of Hot Subluminous Stars from *Voyager*. *J. B. Holberg, B. Ali, T. E. Carone, & R. S. Polidan.* 375, 716, 121-E11 (1991)

The Featureless Continua and Hydrogen Lines of Seyfert 2 Galaxies. *A. L. Kinney, R. R. J. Antonucci, M. J. Ward, A. S. Wilson, & M. Whittle.* 377, 100, 139-C5 (1991)

Narrow-Band Photometry and the Evolution of Galaxies. III. The Intermediate-Redshift Sample. *Karl D. Rakos, James M. Schombert, & Tobias J. Kreidl.* 377, 382, 144-E7 (1991)

Multidirectional Views of the Active Nucleus of NGC 1068. *J. S. Miller, R. W. Goodrich, & William G. Mathews.* 378, 47, 151-E13 (1991)

Galactic Bulge M Giants. IV. 0.5–2.5 Micron Spectrophotometry and Abundances for Stars in Baade's Window. *D. M. Terndrup, Jay A. Frogel, & A. E. Whitford.* 378, 742, 161-E5 (1991)

Search for Starbursts among X-Ray–selected Galaxies: Optical Spectroscopy. *Antonella Fruscione & Richard E. Griffiths.* 380, L13, 181-C1 (1991)

The Discovery of a Young Radio Galaxy at $z = 2.390$: Probing Initial Star Formation at $z \leq 3.0$. *Rogier A. Windhorst, David Burstein, Doug F. Mathis, Lyman W. Neuschaefer, F. Bertola, L. M. Buson, David C. Koo, Keith Matthews, Peter D. Barthel, & K. C. Chambers.* 380, 362, 182-G1 (1991)

Catalog of SN 1987A Polarimetry Corrected for Interstellar Polarization. *David J. Jeffery.* 77, 405, 50-B5 (1991)

Emission-Line and Continuum Properties of 92 Bright QSOs: Luminosity Dependence and Differences between Radio-selected and Optically Selected Samples. *Charles C. Steidel & Wallace L. W. Sargent.* 382, 433, 207-A1 (1991)

Asymptotic Theory for the Spatial Distribution of Protostellar Emission. *Fred C. Adams.* 382, 544, 208-C8 (1991)

Far-Infrared and Submillimeter Wavelength Observations of Star-forming Dense Cores. II. Images. *E. F. Ladd, Fred C. Adams, S. Casey, J. A. Davidson, G. A. Fuller, D. A. Harper, P. C. Myers, & R. Padman.* 382, 555, 208-D7 (1991)

Optical Excess Emission in T Tauri Stars. *Patrick Hartigan, Scott J. Kenyon, Lee Hartmann, Stephen E. Strom, Suzan Edwards, Alan D. Welty, & John Stauffer.* 382, 617, 209-C1 (1991)

Near-Infrared [Fe II] Emission of M82 Supernova Remnants: Implications for Tracing the Supernova Content of Galaxies. *Matthew A. Greenhouse, Charles E. Woodward, Harley A. Thronson, Jr., Richard J. Rudy, George S. Rossano, Peter Erwin, & R. C. Puetter.* 383, 164, 214-B1 (1991)

On the Near-Infrared Spectrum of FU Orionis. *Nuria Calvet, Lee Hartmann, & Scott J. Kenyon.* 383, 752, 223-E6 (1991)

An Interactive Companion to the S Star HD 35155. *Thomas B. Ake III, Hollis R. Johnson, & Mudhaffer M. Ameen.* 383, 842, 224-F7 (1991)

STARS: ABUNDANCES

Application of Oxygen-enhanced Evolutionary Sequences to the Horizontal Branch of M15. *Ben Dorman, Young-Wook Lee, & Don A. VandenBerg.* 366, 115, 2-D11 (1991)

On the [O/Fe] versus [Fe/H] Relationship and the Progenitors of Type I Supernovae. *C. Abia, R. Canal, & J. Isern.* 366, 198, 3-E1 (1991)

Evidence for CNO Processed Material in the Accretion Disk of GP Comae. *T. R. Marsh, Keith Horne, & Simon Rosen.* 366, 535, 9-F1 (1991)

A Crucial Test of the Diffusion Model: 53 Camelopardalis. *J. Babel & G. Michaud.* 366, 560, 10-A5 (1991)

s-Process Nucleosynthesis in Massive Stars and the Weak Component. I. Evolution and Neutron Captures in a 25 $M_\odot$ Star. *C. M. Raiteri, M. Busso, R. Gallino, G. Picchio, & L. Pulone.* 367, 228, 14-G13 (1991)

PW Vulpeculae: A Nova with Nearly Solar Abundances. *Pedro Saizar, Sumner Starrfield, Gary J. Ferland, R. Mark Wagner, James W. Truran, Scott J. Kenyon, Warren M. Sparks, Robert E. Williams, & L. L. Stryker.* 367, 310, 15-G11 (1991)

Abundances in the Red Giants of M13 and M22. *M. D. Lehnert, R. A. Bell, & J. G. Cohen.* 367, 514, 19-F9 (1991)

Metal Abundances of RR Lyrae Variables in Selected Galactic Star Fields. V. The Lick Astrographic Fields at Intermediate Galactic Latitudes. *Nicholas B. Suntzeff, T. D. Kinman, & Robert P. Kraft.* 367, 528, 19-G13 (1991)

Chemical Abundances for Cyanogen-weak Giants. *R. Earle Luck.* 75, 579, 8-F11 (1991)

The Response of Main-Sequence Stars within a Common Envelope. *Michael S. Hjellming & Ronald E. Taam.* 370, 709, 57-C1 (1991)

Lithium in the Most Extreme Halo Stars; Trends with Metallicity. *Constantine P. Deliyannis & Pierre Demarque.* 370, L89, 59-E5 (1991)

Lithium, Age, and Metallicity in Open Clusters. *Ann Merchant Boesgaard.* 370, L95, 59-E12 (1991)

Echelle Spectroscopy of CD −41° 13967: The Young Central Star of a New Planetary Nebula. *James K. McCarthy, R. Michael Rich, S. R. Becker, K. Butler, D. Husfeld, & H. G. Groth.* 371, 380, 64-G1 (1991)

Carbon Isotope Ratios along the Giant Branch of M67. *Kalpana Krishnaswamy Gilroy & Jeffery A. Brown.* 371, 578, 68-F7 (1991)

Diffusion and Mixing of Lithium and Helium in Population II Dwarfs. *Charles R. Proffitt & Georges Michaud.* 371, 584, 68-G1 (1991)

s-Process Nucleosynthesis in Massive Stars and the Weak Component. II. Carbon Burning and Galactic Enrichment. *C. M. Raiteri, M. Busso, R. Gallino, & G. Picchio.* 371, 665, 69-G6 (1991)

How Much Hydrogen Is There in a White Dwarf? *James MacDonald & Stéphane Vennes.* 371, 719, 70-E1 (1991)

Multicolor CCD Photometry of Globular Clusters in Two Virgo Elliptical Galaxies. *Jean Couture, William E. Harris, & J. W. B. Allwright.* 372, 97, 75-C1 (1991)

A Simple Accretion/Diffusion Model for λ Bootis Stars. *Paul Charbonneau.* 372, L33, 79-D13 (1991)

Non–LTE Analysis of the Ofpe/WN9 Star HDE 269227 (R84). *Werner Schmutz, Claus Leitherer, Ivan Hubeny, Manfred Vogel, Wolf-Rainer Hamann, & Ulf Wessolowski.* 372, 664, 84-A1 (1991)

Photoerosion and the Abundances of ^{7}Li, ^{9}Be, ^{10}B, and ^{11}B near Active Galactic Nuclei. *R. N. Boyd & H. S. Fencl.* 373, 84, 87-A13 (1991)

Si IV and C IV Resonance Lines as Indicators of Massive Stars in Starburst Galaxies. *Claus Leitherer & Henny J. G. L. M. Lamers.* 373, 89, 87-B6 (1991)

The Lithium Abundance of M67 Blue Stragglers: A Constraint on the Blue Straggler Phenomenon. *C. J. Pritchet & J. W. Glaspey.* 373, 105, 87-C12 (1991)

The Lithium Abundance of the T Tauri Star BP Tauri. *Douglas K. Duncan.* 373, 250, 89-B1 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

C and N Abundances among 47 Tucanae Main-Sequence Stars. *Michael M. Briley, James E. Hesser, & R. A. Bell.* 373, 482, 94-A1 (1991)

An Extreme Population II Dwarf without Lithium. *L. M. Hobbs, D. E. Welty, & J. A. Thorburn.* 373, L47, 97-B13 (1991)

Isochrones for H-burning Globular Cluster Stars. II. The Metallicity Range $-2.3 <$ [Fe/H] < -0.5. *Oscar Straniero & Alessandro Chieffi.* 76, 525, 32-D1 (1991)

A Critical Appraisal of Published Values of [Fe/H] for K II–IV Stars. *Benjamin J. Taylor.* 76, 715, 34-E12 (1991)

The Lithium Abundance in Extreme Halo Stars. *L. M. Hobbs & J. A. Thorburn.* 375, 116, 112-D8 (1991)

Diffusion and Mixing in Classical Nova Precursors. *Icko Iben, Jr., Masayuki Y. Fujimoto, & Jim MacDonald.* 375, L27, 117-D1 (1991)

Diameters of Galactic Globular Clusters. *Sidney van den Bergh, Christopher Morbey, & John Pazder.* 375, 594, 120-B1 (1991)

On the Formation of Globular Clusters. I. Dynamical Limits on Globular Cluster Metallicities. *J. H. Brown, A. Burkert, & James W. Truran.* 376, 115, 126-D1 (1991)

The White Dwarf Mass Distribution in Classical Nova Systems. *Hans Ritter, Michael Politano, Mario Livio, & Ronald F. Webbink.* 376, 177, 127-B10 (1991)

Inhomogeneous Halo Collapse and Early Galactic Chemical Evolution: Globular Cluster Metallicities. *G. Malinie, D. H. Hartmann, & G. J. Mathews.* 376, 520, 132-G9 (1991)

Li Depletion in F Stars by Internal Gravity Waves. *Ramón J. García López & Hendrik C. Spruit.* 377, 268, 141-C7 (1991)

First Results from the Goddard High-Resolution Spectrograph: High-Resolution Observations of the 1942 Å Resonance Line of Hg II in the Chemically Peculiar B Star, χ Lupi. *David S. Leckrone, Glenn M. Wahlgren, & Sveneric G. Johansson.* 377, L37, 143-E1 (1991)

Metallicity and Velocity Distribution of Giants toward the Galactic Poles. *Kavan U. Ratnatunga & Kenneth M. Yoss.* 377, 442, 145-C3 (1991)

Lithium Abundances in Carbon Stars. *Grant R. Denn, R. Earle Luck, & David L. Lambert.* 377, 657, 147-G5 (1991)

First Detection of Beryllium in a Very Metal Poor Star: A Test of the Standard Big Bang Model. *Gerard Gilmore, Bengt Edvardsson, & P. E. Nissen.* 378, 17, 151-C1 (1991)

The Metallicity of RR Lyrae Stars in Baade's Window. *Alistair R. Walker & Donald M. Terndrup.* 378, 119, 152-D13 (1991)

Galactic Bulge M Giants. IV. 0.5–2.5 Micron Spectrophotometry and Abundances for Stars in Baade's Window. *D. M. Terndrup, Jay A. Frogel, & A. E. Whitford.* 378, 742, 161-E5 (1991)

Extragalactic Globular Clusters. III. Metallicity Comparisons and Anomalies. *Jean P. Brodie & John P. Huchra.* 379, 157, 165-A1 (1991)

Lithium in Halo Stars: Constraining the Effects of Helium Diffusion on Globular Cluster Ages and Cosmology. *Constantine P. Deliyannis & Pierre Demarque.* 379, 216, 165-F7 (1991)

On the Sodium Excess in the Atmospheres of Yellow Supergiants. *N. Prantzos, A. Coc, & J. P. Thibaud.* 379, 729, 173-G1 (1991)

The Stellar Content and Structure of the Globular Cluster NGC 5053. *Gregory G. Fahlman, Harvey B. Richer, & James Nemec.* 380, 124, 177-E11 (1991)

Three Newly Recognized Dwarf Carbon Stars. *Paul J. Green, Bruce Margon, & D. Jack MacConnell.* 380, L31, 181-E1 (1991)

The Galactic Globular Cluster System: Theoretical Constraints for α-enhanced Compositions. *D. Bencivenni, F. Caputo, M. Manteiga, & M. L. Quarta.* 380, 484, 184-C1 (1991)

Abundances in Red Giant Stars: Nitrogen Isotopes in Carbon-rich Molecular Envelopes. *P. G. Wannier, B-G Andersson, H. Olofsson, N. Ukita, & K. Young.* 380, 593, 185-E8 (1991)

A Non–Local Thermodynamic Equilibrium, Line-blanketed Synthetic Spectrum of Iota Herculis: C, Al, and Si Lines. *James A. Grigsby.* 380, 606, 185-F9 (1991)

Carbon Isotopic Abundances in Giant Stars in the CN-bimodal Globular Clusters NGC 6752 and M4. *Nicholas B. Suntzeff & Verne V. Smith.* 381, 160, 191-A8 (1991)

Abundances of Tc and Related Elements in Stars of Type M, MS, and S. *Andrew D. Vanture, George Wallerstein, Jeffery A. Brown, & Grant Bazan.* 381, 278, 192-D7 (1991)

Advanced Evolutionary Phases of Large-Metallicity Low-Mass Stars and the Problem of the Ultraviolet Excess of Elliptical Galaxies. *Marco Castellani & Amedeo Tornambè.* 381, 393, 195-E9 (1991)

Metal Opacities and Convective Core Overshooting in Population I Stars. *Richard B. Stothers & Chao-wen Chin.* 381, L67, 199-E7 (1991)

Wide Binaries in the Woolley Catalog. *Ira Wasserman & Martin D. Weinberg.* 382, 149, 202-A12 (1991)

CN and HCN in the Infrared Spectrum of IRC +10216. *G. R. Wiedemann, Kenneth H. Hinkle, John J. Keady, D. Deming, & D. E. Jennings.* 382, 321, 204-B10 (1991)

Metal-rich Giant Branches of Bulge Clusters: Application to Color-Magnitude Diagrams of M31 and M32. *E. Bica, B. Barbuy, & S. Ortolani.* 382, L15, 205-B12 (1991)

Massive Star Evolution and SN 1987A. *David Arnett.* 383, 295, 215-G8 (1991)

Effects of Negatively Charged Massive Particles on Primordial Stars. *R. N. Boyd & G. M. Fuller.* 383, 615, 221-G12 (1991)

About the Stage of Evolution of Wolf-Rayet Stars. *Anne B. Underhill.* 383, 729, 223-C6 (1991)

Observational Tests of Convective Core Overshooting in Stars of Intermediate to High Mass in the Galaxy. *Richard B. Stothers.* 383, 820, 224-D8 (1991)

Implications of Helium Diffusion for Globular Cluster Isochrones and Luminosity Functions. *Charles R. Proffitt & Don A. VandenBerg.* 77, 473, 51-C10 (1991)

Subgiant CH Stars. II. Chemical Compositions and the Evolutionary Connection with Barium Stars. *R. Earle Luck & Howard E. Bond.* 77, 515, 51-G1 (1991)

Evolutionary Models of Halo Stars with Rotation. II. Effects of Metallicity on Lithium Depletion, and Possible Implications for the Primordial Lithium Abundance. *M. H. Pinsonneault, Constantine P. Deliyannis, & P. Demarque.* 78, 179, 4-B3 (1992)

Non–LTE, Line-blanketed Model Atmospheres for Late O- and Early B-Type Stars. *James A. Grigsby, Nancy D. Morrison, & Lawrence S. Anderson.* 78, 205, 4-D9 (1992)

Classical Nova Models with Accretion Heating at Accretion Rates of 10^{-9} and 10^{-10} $M\odot$ per Year. *Dina Prialnik & Attay Kovetz.* 385, 665, 21-D1 (1992)

The Chemical Composition of Blue Horizontal Branch Stars in M4 and NGC 6397. *David L. Lambert, Andrew McWilliam, & Verne V. Smith.* 386, 685, 33-G1 (1992)

The Evolution through H and He Burning of Galactic Cluster Stars. *Vittorio Castellani, Alessandro Chieffi, & Oscar Straniero.* 78, 517, 9-G11 (1992)

Chemical Composition of Open Clusters. III. Iron and Carbon in F Dwarfs in Coma, Praesepe, and M67. *Eileen D. Friel & Ann Merchant Boesgaard.* 387, 170, 39-A13 (1992)

HEAO 3 Limits on the ^{44}Ti Yield in Galactic Supernovae. *W. A. Mahoney, J. C. Ling, W. A. Wheaton, & J. C. Higdon.* 387, 314, 40-G5 (1992)

CN and CH Variations on the M5 Subgiant Branch. *Michael M. Briley, Graeme H. Smith, R. A. Bell, J. B. Oke, & James H. Hesser.* 387, 612, 46-C5 (1992)

Carbon, Nitrogen, and Oxygen Abundances in Early B-Type Stars. *Douglas R. Gies & David L. Lambert.* 387, 673, 47-B1 (1992)

The Evolution of High-Metallicity Horizontal-Branch Stars and the Origin of the Ultraviolet Light in Elliptical Galaxies. *E. Horch, P. Demarque, & M. Pinsonneault.* 388, L53, 59-B7 (1992)

The Chemical Composition of Magellanic Cloud Cepheids and Nonvariable Supergiants. *R. Earle Luck & David L. Lambert.* 79, 303, 18-E3 (1992)

Carbon and Nitrogen Abundances Determined from Transition Layer Lines. *Erika Böhm-Vitense & José Mena-Werth.* 390, 253, 77-B4 (1992)

The Identification of Highly Ionized Metal Species in the Hot DA1 White Dwarf G191-B2B with the *Hubble Space Telescope* Faint Object Spectrograph. *Edward M. Sion, Ralph C. Bohlin, Richard W. Tweedy, & Gerard P. Vauclair.* 391, L29, 92-B11 (1992)

Evolution of Heavy-Element Abundances as a Constraint on Sites for Neutron-Capture Nucleosynthesis. *G. J. Mathews, G. Bazan, & J. J. Cowan.* 391, 719, 97-A1 (1992)

Discovery of Hot Ammonia in the Proto–Planetary Nebulae CRL 618 and CRL 2688. *Jesús Martín-Pintado & Rafael Bachiller.* 391, L93, 99-G12 (1992)

Lithium Abundances in Classical and Weak T Tauri Stars. *Antonio Magazzù, Rafael Rebolo, & Yakov V. Pavlenko.* 392, 159, 103-A1 (1992)

A Measurement of the Primordial Helium Abundance Using μ Cassiopeiae. *James W. Haywood, Dennis J. Hegyi, & Donald H. Gudehus.* 392, 172, 103-B1 (1992)

Iron Abundance in the Hot DA White Dwarfs Feige 24 and G191 B2B. *Stéphane Vennes, Pierre Chayer, John R. Thorstensen, Stuart Bowyer, & Harry L. Shipman.* 392, L27, 106-D5 (1992)

The Creation of Superrich Lithium Giants. *I.-Juliana Sackmann & Arnold I. Boothroyd.* 392, L71, 113-D3 (1992)

The Structure of Horizontal-Branch Models. I. The Zero-Age Horizontal Branch. *Ben Dorman.* 80, 701, 33-B5 (1992)

A 2.18 to 2.28 Micron Study of the Stellar Population in the Nucleus of M82. *Niall I. Gaffney & Dan F. Lester.* 394, 139, 129-F9 (1992)

The Coolest DA White Dwarfs Detected at Soft X-Ray Wavelengths. *K. M. Kidder, J. B. Holberg, M. A. Barstow, R. W. Tweedy, & F. Wesemael.* 394, 288, 131-E7 (1992)

Hot Post–Asymptotic Giant Branch Stars at High Galactic Latitudes. *R. J. H. McCausland, E. S. Conlon, P. L. Dufton, & F. P. Keenan.* 394, 298, 131-F5 (1992)

SO and SO_2 in Mass-Loss Envelopes of Red Giants: Probes of Nonequilibrium Circumstellar Chemistry and Mass-Loss Rates. *Raghvendra Sahai & Peter G. Wannier.* 394, 320, 132-A3 (1992)

Oxygen-enhanced Models for Globular Cluster Stars. II. Isochrones and Luminosity Functions. *Peter A. Bergbusch & Don A. VandenBerg.* 81, 163, 37-C11 (1992)

Light-Curve Analysis of Classical Novae. *Mariko Kato & Icko Iben, Jr.* 394, L47, 139-C7 (1992)

Mass Loss and a Possible Population II Lithium Dip. *David S. P. Dearborn, David N. Schramm, & L. M. Hobbs.* 394, L61, 139-E1 (1992)

Abundances for Giant Stars in the Draco Dwarf Galaxy. *Matthew D. Lehnert, R. A. Bell, James E. Hesser, & J. B. Oke.* 395, 466, 148-C9 (1992)

Lithium Dilution through Main-Sequence Mass Loss. *Fritz J. Swenson & John Faulkner.* 395, 654, 151-D3 (1992)

Sodium, Aluminum, and Oxygen Abundance Variations in Giants in the Globular Cluster M4. *Jeremy J. Drake, Verne V. Smith, & Nicholas B. Suntzeff.* 395, L95, 154-A10 (1992)

Hubble Space Telescope FOS Observations of KPD 0005+5106: A Subluminous WN-WC Descendant with Ongoing Mass Outflow? *Edward M. Sion & Ronald A. Downes.* 396, L79, 167-B7 (1992)

Analysis of the Photospheric Epoch Spectra of Type Ia Supernovae SN 1990N and SN 1991T. *David J. Jeffery, Bruno Leibundgut, Robert P. Kirshner, Stefano Benetti, David Branch, & George Sonneborn.* 397, 304, 171-F4 (1992)

Helium Gravitational Settling in the Envelopes of Evolving Main-Sequence A and F Stars. *Jacques Richer, Georges Michaud, & Charles R. Proffitt.* 82, 329, 54-A1 (1992)

Infrared Colors of Low-Mass Stars. *S. K. Leggett.* 82, 351, 54-C1 (1992)

Sodium Abundance Variations in Metal-poor Dwarfs. *William J. Spiesman.* 397, L103, 181-D1 (1992)

The Neutrino Process and ^{9}Be in the Early Universe. *R. A. Malaney.* 398, L45, 187-G1 (1992)

A Multiwavelength Study of Nova QU Vulpeculae 1984. *Pedro Saizar, Sumner Starrfield, Gary J. Ferland, R. Mark Wagner, James W. Truran, Scott J. Kenyon, Warren M. Sparks, Robert E. Williams, & L. L. Stryker.* 398, 651, 192-B13 (1992)

A Study of Metal Abundance Patterns in Cool White Dwarfs. I. Time-dependent Calculations of Gravitational Settling. *J. Dupuis, G. Fontaine, C. Pelletier, & F. Wesemael.* 82, 505, 56-A7 (1992)

Two New Lithium-deficient Population II Dwarfs. *J. A. Thorburn.* 399, L83, 201-B13 (1992)

Chemical Evolution of the Orion Association. I. The Oxygen Abundance of Main-Sequence B Stars. *Katia Cunha & David L. Lambert.* 399, 586, 205-B7 (1992)

The Origin of Distant B-Type Stars in the Galactic Halo. *E. S. Conlon, P. L. Dufton, F. P. Keenan, R. J. H. McCausland, & D. Holmgren.* 400, 273, 212-C13 (1992)

Core Velocity Dispersions and Metallicities of Three Globular Clusters Belonging to the Fornax Dwarf Spheroidal Galaxy. *P. Dubath, G. Meylan, & M. Mayor.* 400, 510, 216-F1 (1992)

A Distance-independent Calibration of the Luminosity of Type Ia Supernovae and the Hubble Constant. *Bruno Leibundgut & Philip A. Pinto.* 401, 49, 221-F1 (1992)

The Galactic Globular Cluster System: Empirical Relationship between Light-to-Mass Ratio and Metallicity. *Filippina Caputo & Renato De Santis.* 401, 260, 224-C1 (1992)

An Interpretation of the Spectral Properties of Hot Hydrogen-rich White Dwarfs with Stratified H/He Model Atmospheres. *Stéphane Vennes & Gilles Fontaine.* 401, 288, 224-E7 (1992)

The Abundance of Boron in Three Halo Stars. *Douglas K. Duncan, David L. Lambert, & Michael Lemke.* 401, 584, 229-G6 (1992)

Oxygen-rich Semiregular and Irregular Variables. *M. Jura & S. G. Kleinmann.* 83, 329, 62-D5 (1992)

Companions to Bright S and MS Stars: Technetium Deficiency and Binarity. *Hollis R. Johnson, Thomas B. Ake, & Mudhaffer M. Ameen.* 402, 667, 10-G11 (1993)

A Deep Envelope Composition for TX Piscium? *J. H. Goebel, D. Goorvitch, H. P. Larson, & D. R. Alexander.* 402, 680, 11-B1 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. I. Stellar Evolution, Lithium Abundance, and Photospheric Structure. *D. Dravins, L. Lindegren, Å. Nordlund, & D. A. VandenBerg.* 403, 385, 18-E10 (1993)

A Study of Metal Abundance Patterns in Cool White Dwarfs. II. Simulations of Accretion Episodes. *J. Dupuis, G. Fontaine, C. Pelletier, & F. Wesemael.* 84, 73, 2-B5 (1993)

Lithium and Rapid Rotation in Chromospherically Active Single Giants. *Francis C. Fekel & Suchitra Balachandran.* 403, 708, 24-E4 (1993)

The Nonsolar Abundance Ratios of Arcturus Deduced from Spectrum Synthesis. *Ruth C. Peterson, Cristina M. Dalle Ore, & Robert L. Kurucz.* 404, 333, 32-A8 (1993)

New Lithium Observations of Two [Fe/H] $\leq$ -3.5 Dwarfs. *J. A. Thorburn & Timothy C. Beers.* 404, L13, 33-E1 (1993)

A Spectroscopic Test for Substellar Objects. *Antonio Magazzù, Eduardo L. Martín, & Rafael Rebolo.* 404, L17, 33-E7 (1993)

Evidence for Processed Material in the Atmospheres of Large Magellanic Cloud B Supergiants. *Edward L. Fitzpatrick & Bruce Bohannan.* 404, 734, 38-B1 (1993)

Particle Transport and the λ Bootis Phenomenon. I. The Diffusion/Mass-Loss Model Revisited. *P. Charbonneau.* 405, 720, 52-A9 (1993)

The Abundance of Lithium in Metal-poor Subgiant Stars. *C. A. Pilachowski, C. Sneden, & J. Booth.* 407, 699, 79-C1 (1993)

Evolution of Cosmic Rays in the Early Galaxy. *R. A. Malaney & M. N. Butler.* 407, L73, 82-D11 (1993)

Light-induced Drift and Abundance Anomalies. *F. LeBlanc & G. Michaud.* 408, 251, 86-C1 (1993)

The ^{6}Li/^{7}Li Ratio in the Metal-poor Halo Dwarfs HD 19445 and HD 84937. *Verne V. Smith, David L. Lambert, & Poul E. Nissen.* 408, 262, 86-D1 (1993)

High-Resolution Mid-Infrared Spectra of Co II, Ni I, and Fe II in SN 1987A. *D. E. Jennings, R. J. Boyle, G. R. Wiedemann, & S. H. Moseley.* 408, 277, 86-E5 (1993)

LSIV $-12^{\circ}111$: A Candidate Halo Proto–Planetary Nebula. *E. S. Conlon, P. L. Dufton, R. J. H. McCausland, & F. P. Keenan.* 408, 593, 92-E11 (1993)

Imaging of Fields in the Inner Halo and Outer Disk of M31. *T. J. Davidge.* 409, 190, 99-C8 (1993)

Old Stellar Populations. IV. Empirical Fitting Functions for Features in the Spectra of G and K Stars. *Javier Gorgas, S. M. Faber, David Burstein, J. Jesús Gonzalez, Stéphane Courteau, & Charles Prosser.* 86, 153, 15-F13 (1993)

Reddening Errors and the Post–Main-Sequence Distribution of Stars in the H-R Diagram of the Large Magellanic Cloud. *N. Rathnasree.* 410, L99, 126-B5 (1993)

The Physical Properties of a Slow Nova in the Bulge of M31. *Austin B. Tomaney & Allen W. Shafter.* 411, 640, 137-F3 (1993)

Radiative Accelerations on Iron Using Opacity Project Data. *G. Alecian, G. Michaud, & J. Tully.* 411, 882, 140-G1 (1993)

Oxygen Abundances in F-Type Stars of the Hyades and the Ursa Major Group. *Ramón J. García López, Rafael Rebolo, Artemio Herrero, & John E. Beckman.* 412, 173, 144-C1 (1993)

Iron and Molecular Opacities and the Evolution of Population I Stars. *Richard B. Stothers & Chao-wen Chin.* 412, 294, 145-F13 (1993)

A Study of Circumstellar Envelopes around Bright Carbon Stars. II. Molecular Abundances. *H. Olofsson, K. Eriksson, B. Gustafsson, & U. Carlström.* 87, 305, 31-A5 (1993)

A Study of Metal Abundance Patterns in Cool White Dwarfs. III. Comparison of the Predictions of the Two-Phase Accretion Model with the Observations. *J. Dupuis, G. Fontaine, & F. Wesemael.* 87, 345, 31-E3 (1993)

Abundance Inhomogeneities and Atmospheric Structure in CN-Bimodal Globular Cluster Giants. *Jeremy J. Drake, Bertrand Plez, & Verne V. Smith.* 412, 612, 151-D1 (1993)

On the Li and Be Tests for Brown Dwarfs. *L. A. Nelson, S. Rappaport, & E. Chiang.* 413, 364, 160-G1 (1993)

Lithium in the Binary Halo Star HD 89499. *Suchitra Balachandran, Bruce W. Carney, Anne M. Fry, Laura K. Fullton, & Ruth C. Peterson.* 413, 368, 160-G7 (1993)

Particle Transport and the λ Bootis Phenomenon. II. An Accretion/Diffusion Model. *S. Turcotte & P. Charbonneau.* 413, 376, 161-A3 (1993)

High-Dispersion Spectroscopy of Giants in Metal-poor Globular Clusters. I. Iron Abundances. *Dante Minniti, Doug Geisler, Ruth C. Peterson, & Juan J. Claria.* 413, 548, 163-C8 (1993)

The Boron-to-Beryllium Ratio in Halo Stars: A Signature of Cosmic-Ray Nucleosynthesis in the Early Galaxy. *T. P. Walker, G. Steigman, D. N. Schramm, K. A. Olive, & B. Fields.* 413, 562, 163-D12 (1993)

Inhomogeneous Chemical Evolution of the Galactic Disk. *Guy Malinie, Dieter H. Hartmann, Donald D. Clayton, & Grant J. Mathews.* 413, 633, 164-D1 (1993)

CNO Abundances and the Evolutionary Status of Three A-Type Supergiants. *Kim A. Venn.* 414, 316, 174-A1 (1993)

The α-enhanced !sochrones and Their Impact on the Fits to the Galactic Globular Cluster System. *Maurizio Salaris, Alessandro Chieffi, & Oscar Straniero.* 414, 580, 178-D10 (1993)

Reaction Rates of the *s*-Process Neutron Sources ^{22}Ne(α, *n*)^{25}Mg and ^{13}C(α, *n*)^{16}O. *H. W. Drotleff, A. Denker, H. Knee, M. Soiné, G. Wolf, J. W. Hammer, U. Greife, C. Rolfs, & H. P. Trautvetter.* 414, 735, 180-D3 (1993)

Evidence for a Dispersion in the Lithium Abundances of Extreme Halo Stars. *Constantine P. Deliyannis, M. H. Pinsonneault, & Douglas K. Duncan.* 414, 740, 180-D10 (1993)

Lithium in the Hyades. I. New Observations. *J. A. Thorburn, L. M. Hobbs, Constantine P. Deliyannis, & M. H. Pinsonneault.* 415, 150, 186-G12 (1993)

Population II ^{6}Li as a Probe of Nucleosynthesis and Stellar Structure and Evolution. *Gary Steigman, Brian D. Fields, Keith A. Olive, David N. Schramm, & Terry P. Walker.* 415, L35, 192-B1 (1993)

Abundances of Four Ultra–Metal-Deficient Stars. *John E. Norris, Ruth C. Peterson, & Timothy C. Beers.* 415, 797, 197-F13 (1993)

Diffusion of Lithium and Beryllium in Evolving, Nonrotating Main-Sequence A and F Stars. *Jacques Richer & Georges Michaud.* 416, 312, 205-A5 (1993)

The Mount Wilson Observatory Metallicity Index, C_{RV}: Comparison with Other Photometric Systems. *W. H. Soon, Q. Zhang, S. L. Baliunas, & R. L. Kurucz.* 416, 787, 213-C1 (1993)

Two New Extremely Iron-rich Hot DA White Dwarfs and the Nature of the EUV Opacity. *J. B. Holberg, M. A. Barstow, D. A. H. Buckley, A. Chen, S. Dreizler, M. C. Marsh, D. O'Donoghue, E. M. Sion, R. W. Tweedy, G. Vauclair, & K. Werner.* 416, 806, 213-D13 (1993)

Abundances in CH Subgiants: Evidence of Mass Transfer onto Main-Sequence Companions. *Verne V. Smith, Howard Coleman, & David L. Lambert.* 417, 287, 221-A13 (1993)

C_3S and C_5S in IRC +10216. *M. B. Bell, L. W. Avery, & P. A. Feldman.* 417, L37, 223-C1 (1993)

Model Atmosphere and Kinematical Analyses of Early-Type, High Galactic Latitude Stellar Candidates from the UKST *UBVRI* Survey. *N. C. Hambly, E. S. Conlon, P. L. Dufton, F. P. Keenan, J. E. Little, & L. Miller.* 417, 706, 228-B10 (1993)

The Abundances of the Elements in Sharp-lined Early-Type Stars from *IUE* High-Dispersion Spectrograms. I. Cr, Mn, Fe, Ni, and Co. *Saul J. Adelman, Charles R. Cowley, David S. Leckrone, Scott W. Roby, & Glenn M. Wahlgren.* 419, 276, 249-E11 (1993)

Observations of 13.5 Micron Rotation-Vibration Lines of SiS in IRC +10216. *R. J. Boyle, J. J. Keady, D. E. Jennings, K. L. Hirsch, & G. R. Wiedemann.* 420, 863, 13-E12 (1994)

The Primordial Lithium Abundance from Extreme Subdwarfs: New Observations. *J. A. Thorburn.* 421, 318, 19-G12 (1994)

New Pre–Main-Sequence Tracks for $M \leq 2.5 M\odot$ as Tests of Opacities and Convection Model. *Francesca D'Antona & Italo Mazzitelli.* 90, 467, 8-D14 (1994)

The Temporal Evolution of the 4–14 Micron Spectrum of V1974 Cygni (Nova Cygni 1992). *R. D. Gehrz, Charles E. Woodward, M. A. Greenhouse, S. Starrfield, D. H. Wooden, F. C. Witteborn, S. A. Sandford, L. J. Allamandola, J. D. Bregman, & M. Klapisch.* 421, 762, 27-F6 (1994)

Comparison of New Experimental and Astrophysical *f*-Values for Some Ru II Lines, Observed in *HST* Spectra of χ Lupi. *Sveneric G. Johansson, Ali Joueizadeh, Ulf Litzén, Jörgen Larsson, Anders Persson, Claes-Göran Wahlström, Sune Svanberg, David S. Leckrone, & Glenn M. Wahlgren.* 421, 809, 28-C8 (1994)

Element Diffusion in the Solar Interior. *Anne A. Thoul, John N. Bahcall, & Abraham Loeb.* 421, 828, 28-E3 (1994)

Non–LTE Model Atmosphere Analysis of Nova Cygni 1992. *P. H. Hauschildt, S. Starrfield, S. Austin, R. M. Wagner, S. N. Shore, & G. Sonneborn.* 422, 831, 42-C1 (1994)

The Classical Hyades Lithium Problem Resolved? *Fritz J. Swenson, John Faulkner, Carlos A. Iglesias, Forrest J. Rogers, & David R. Alexander.* 422, L79, 45-B6 (1994)

Lithium Abundances in the Most Metal-deficient Stars. *John E. Norris, Sean G. Ryan, & Guy S. Stringfellow.* 423, 386, 51-A1 (1994)

Constraints on the Origin of Dwarf Carbon Stars. *Paul J. Green & Bruce Margon.* 423, 723, 57-E7 (1994)

Cool Zero-Metallicity Stellar Atmospheres. *D. Saumon, P. Bergeron, J. I. Lunine, W. B. Hubbard, & A. Burrows.* 424, 333, 66-A8 (1994)

Open Cluster Chemical Composition. I. Later Type Stars in Eight Clusters. *R. Earle Luck.* 91, 309, 22-F4 (1994)

Isotopic Carbon Ratios among M71 Bright Red Giants. *Michael M. Briley, Verne V. Smith, & David L. Lambert.* 424, L119, 79-D7 (1994)

The Hyades Lithium Problem Revisited. *Fritz J. Swenson, John Faulkner, Forrest J. Rogers, & Carlos A. Iglesias.* 425, 286, 83-G3 (1994)

Detection of Lithium in the Cool Halo Dwarfs Groombridge 1830 and HD 134439: Implications for Internal Stellar Mixing and Cosmology. *Constantine P. Deliyannis, Sean G. Ryan, Timothy C. Beers, & Julie A. Thorburn.* 425, L21, 85-D3 (1994)

On the Interpretation and Implications of Nova Abundances: An Abundance of Riches or an Overabundance of Enrichments. *Mario Livio & James W. Truran.* 425, 797, 91-F6 (1994)

The Discovery of Ni V in the Photospheres of the Hot DA White Dwarfs RE 2214−492 and G191-B2B. *J. B. Holberg, I. Hubeny, M. A. Barstow, T. Lanz, E. M. Sion, & R. W. Tweedy.* 425, L105, 94-G5 (1994)

The First Detailed Abundance Analysis of Galactic Bulge K Giants in Baade's Window. *Andrew McWilliam & R. Michael Rich.* 91, 749, 29-D1 (1994)

Chemical Evolution of the Orion Association. II. The Carbon, Nitrogen, Oxygen, Silicon, and Iron Abundances of Main-Sequence B Stars. *Katia Cunha & David L. Lambert.* 426, 170, 98-C5 (1994)

The Metallicity Dependence of Inferred Cepheid Distances. *Andrew Gould.* 426, 542, 105-B7 (1994)

The Effectiveness of Oscillation Frequencies in Constraining Stellar Model Parameters. *Timothy M. Brown, J. Christensen-Dalsgaard, Barbara Weibel-Mihalas, & Ronald L. Gilliland.* 427, 1013, 125-C3 (1994)

Lithium Isotope Ratios in Six Halo Stars. *L. M. Hobbs & J. A. Thorburn.* 428, L25, 134-D8 (1994)

A Search for Lithium in Pleiades Brown Dwarf Candidates Using the Keck Hires Echelle. *Geoffrey W. Marcy, Gibor Basri, & James R. Graham.* 428, L57, 142-E7 (1994)

Surface Brightness Fluctuations in Globular Clusters and Stellar Populations in Galaxies. *Edward A. Ajhar & John L. Tonry.* 429, 557, 152-F2 (1994)

Opacity, Metallicity, and Cepheid Period Ratios in the Galaxy and Magellanic Clouds. *Norman R. Simon & Shashi M. Kanbur.* 429, 772, 155-C8 (1994)

A Calibration of Mg_2 versus [Fe/H] and [Mg/Fe]. *B. Barbuy.* 430, 218, 161-G1 (1994)

Predictions of Oxygen Isotope Ratios in Stars and of Oxygen-rich Interstellar Grains in Meteorites. *Arnold I. Boothroyd, I.-Juliana Sackmann, & G. J. Wasserburg.* 430, L77, 166-C7 (1994)

CCD Photometry for Six Metal-rich Galactic Globular Clusters. *Ata Sarajedini & John E. Norris.* 93, 161, 44-A2 (1994)

Summary of ΔS Metallicity Measurements for Bright RR Lyrae Variables Observed at Lick Observatory and KPNO between 1972 and 1987. *Nicholas B. Suntzeff, Robert P. Kraft, & T. D. Kinman.* 93, 271, 45-D2 (1994)

The Metallicity of M4: Accurate Spectroscopic Fundamental Parameters for Four Giants. *J. J. Drake, V. V. Smith, & N. B. Suntzeff.* 430, 610, 169-D8 (1994)

A Pulsational Approach to the Luminosity of RR Lyrae Variables. *V. Castellani & R. De Santis.* 430, 624, 169-E11 (1994)

Ultra–Metal-poor Halo Stars: The Remarkable Spectrum of CS 22892−052. *Christopher Sneden, George W. Preston, Andrew McWilliam, & Leonard Searle.* 431, L27, 182-E13 (1994)

A Spectroscopic Analysis of DAO and Hot DA White Dwarfs: The Implications of the Presence of Helium and the Nature of DAO Stars. *P. Bergeron, F. Wesemael, A. Beauchamp, M. A. Wood, R. Lamontagne, G. Fontaine, & James Liebert.* 432, 305, 197-A6 (1994)

The Primordial Abundance of ^{6}Li and ^{9}Be. *Brian Chaboyer.* 432, L47, 199-G1 (1994)

Widespread Water Vapor Emission in Orion. *J. Cernicharo, E. González-Alfonso, J. Alcolea, R. Bachiller, & D. John.* 432, L59, 200-A5 (1994)

Chromospheric Heating and Metal Deficiency in Cool Giants: Theoretical Results versus Observations. *M. Cuntz, W. Rammacher, & P. Ulmschneider.* 432, 690, 204-E12 (1994)

Convection, Nucleosynthesis, and Core Collapse. *Grant Bazan & David Arnett.* 433, L41, 215-B9 (1994)

^{7}Li Abundances in Halo Stars: Testing Stellar Evolution Models and the Primordial ^{7}Li Abundance. *Brian Chaboyer & P. Demarque.* 433, 510, 217-C11 (1994)

Analysis of Helium-rich Subdwarf O Stars. I. NLTE Models, Methods, and Fits for 21 Palomar Green Survey sdO's. *P. Thejll, F. Bauer, R. Saffer, J. Liebert, D. Kunze, & H. L. Shipman.* 433, 819, 221-C12 (1994)

An Optical Region Elemental Abundance Analysis of the Chemically Peculiar HgMn Star χ Lupi. *Glenn M. Wahlgren, Saul J. Adelman, & Richard D. Robinson.* 434, 349, 230-C3 (1994)

Lithium in a Short-Period Tidally Locked Binary of M67: Implications for Stellar Evolution, Galactic Lithium Evolution, and Cosmology. *Constantine P. Deliyannis, Jeremy R. King, Ann M. Boesgaard, & Sean G. Ryan.* 434, L71, 241-G1 (1994)

Old Stellar Populations. V. Absorption Feature Indices for the Complete Lick/IDS Sample of Stars. *Guy Worthey, S. M. Faber, J. Jesús González, & D. Burstein.* 94, 687, 61-E4 (1994)

The Pursuit of Heavy Elements in the HgMn-Type Star χ Lupi: Observations with the GHRS in the COSTAR Era. *Glenn M. Wahlgren, Tomas Brage, Ronald L. Gilliland, Sveneric G. Johansson, David S. Leckrone, Don J. Lindler, & Ulf Litzén.* 435, L67, 252-F3 (1994)

Li Abundances in Late-Type Companions to Neutron Stars and Black Hole Candidates. *Eduardo L. Martín, Rafael Rebolo, Jorge Casares, & Philip A. Charles.* 435, 791, 257-A4 (1994)

Sodium in Weak G-Band Giants. *Jeremy J. Drake & David L. Lambert.* 435, 797, 257-A13 (1994)

Constraints to the Masses of Brown Dwarf Candidates from the Lithium Test. *Eduardo L. Martín, Rafael Rebolo, & Antonio Magazzù.* 436, 262, 264-G9 (1994)

Stellar Oxygen Abundances. III. The Oxygen Abundance of the Very Metal Poor Halo Star BD −13°3442. *Jeremy R. King.* 436, 331, 265-G6 (1994)

ASCA Observations of the Coronal X-Ray Emission of Algol. *A. Antunes, F. Nagase, & N. E. White.* 436, L83, 269-G3 (1994)

ASCA X-Ray Spectra of the Active Single Stars β Ceti and π^1 Ursae Majoris. *S. A. Drake, K. P. Singh, N. E. White, & Theodore Simon.* 436, L87, 269-G11 (1994)

An *ASCA* Observation of the Castor System. *Eric V. Gotthelf, Lalit Jalota, Koji Mukai, & Nicholas E. White.* 436, L91, 270-A5 (1994)

On the Predicted Abundances of Iron and Nickel Supported by Radiative Levitation in the Atmospheres of Hot DA White Dwarfs. *P. Chayer, F. LeBlanc, G. Fontaine, F. Wesemael, G. Michaud, & S. Vennes.* 436, L161, 281-F7 (1994)

The Chemical Composition of the RV Tauri Variable IW Carinae. *Sunetra Giridhar, N. Kameswara Rao, & David L. Lambert.* 437, 476, 289-F1 (1994)

Optical Spectroscopy of Carbon-rich Proto–Planetary Nebulae. *Bruce J. Hrivnak.* 438, 341, 6-B10 (1995)

The Temporal Evolution of the 1–5 Micron Spectrum of V1974 Cygni (Nova Cygni 1992). *Charles E. Woodward, Matthew A. Greenhouse, R. D. Gehrz, Y. J. Pendleton, R. R. Joyce, D. Van Buren, J. Fischer, N. J. Jennerjohn, & C. D. Kaminski.* 438, 921, 16-G7 (1995)

Lithium in Halo Dwarfs: The Undoing of Diffusion by Mass Loss. *Fritz J. Swenson.* 438, L87, 19-G8 (1995)

Non-LTE Line-blanketed Model Atmospheres of Hot Stars. II. Hot, Metal-rich White Dwarfs. *T. Lanz & I. Hubeny.* 439, 905, 37-B1 (1995)

Lithium Abundances in Strong Lithium K Giant Stars: LTE and Non-LTE Analyses. *Ramiro de la Reza & Licio da Silva.* 439, 917, 37-C3 (1995)

Evidence of Heavy Element Nucleosynthesis Early in the History of the Galaxy: The Ultra–metal-poor Star CS 22892−052. *John J. Cowan, Debra L. Burris, Christopher Sneden, Andrew McWilliam, & George W. Preston.* 439, L51, 40-E3 (1995)

Time-dependent Behavior and Physical Conditions of the LMC Planetary Nebula N66. *M. Peña, M. Peimbert, S. Torres-Peimbert, M. T. Ruiz, & J. Maza.* 441, 343, 64-B1 (1995)

A Survey of Lithium in the Red Giants of the Magellanic Clouds. *Verne V. Smith, Bertrand Plez, David L. Lambert, & D. A. Lubowich.* 441, 735, 72-A13 (1995)

Stellar Models with Microscopic Diffusion and Rotational Mixing. II. Application to Open Clusters. *Brian Chaboyer, P. Demarque, & M. H. Pinsonneault.* 441, 876, 74-A13 (1995)

The Sodium/Aluminum–Oxygen Anticorrelation in ω Centauri and Other Clusters. *John E. Norris & G. S. Da Costa.* 441, L81, 76-B11 (1995)

The RR Lyrae Fundamental Red Edge. *G. Bono, F. Caputo, V. Castellani, M. Marconi, L. Staiano, & R. F. Stellingwerf.* 442, 159, 79-D1 (1995)

Hot Bottom Burning in Asymptotic Giant Branch Stars and Its Effect on Oxygen Isotopic Abundances. *Arnold I. Boothroyd, I.-Juliana Sackmann, & G. J. Wasserburg.* 442, L21, 84-G4 (1995)

On the Nature of the Spectral Features in Peculiar "DQ" White Dwarfs. *Gary D. Schmidt, P. Bergeron, & Bruce Fegley, Jr.* 443, 274, 99-A10 (1995)

New Model Atmospheres for Very Cool White Dwarfs with Mixed H/He and Pure He Compositions. *P. Bergeron, D. Saumon, & F. Wesemael.* 443, 764, 108-D1 (1995)

The Abundances of Pt, Au, and Hg in the Chemically Peculiar HgMn-Type Stars κ Cancri and χ Lupi. *Glenn M. Wahlgren, David S. Leckrone, Sveneric G. Johansson, Maria Rosberg, & Tomas Brage.* 444, 438, 119-E11 (1995)

EUVE Observations of Algol: Detection of a Continuum and Implications for the Coronal [Fe/H] Abundance. *Robert A. Stern, James R. Lemen, Jürgen H. M. M. Schmitt, & John P. Pye.* 444, L45, 121-G7 (1995)

On the Discrepancy between the Cepheid and RR Lyrae Distance Scales. *Sidney van den Bergh.* 446, 39, 153-F3 (1995)

The Lithium Dip in M67: Comparison with the Hyades, Praesepe, and NGC 752 Clusters. *Suchitra Balachandran.* 446, 203, 156-A6 (1995)

The Uncertainties in the Age of Globular Clusters from Their Helium Abundance and Mass Loss. *Xiangdong Shi.* 446, 637, 165-A1 (1995)

Beryllium and Boron Abundances of Metal-deficient Halo Stars and Accretion of Interstellar Matter. *Y. Yoshii, G. J. Mathews, & T. Kajino.* 447, 184, 174-F8 (1995)

Deep Circulation in Red Giant Stars: A Solution to the Carbon and Oxygen Isotope Puzzles? *G. J. Wasserburg, Arnold I. Boothroyd, & I.-Juliana Sackmann.* 447, L37, 181-A11 (1995)

The Giant Branch of ω Centauri. IV. Abundance Patterns Based on Echelle Spectra of 40 Red Giants. *John E. Norris & G. S. Da Costa.* 447, 680, 185-D9 (1995)

A 325 Square Degree Survey of B-Type Stars at High Galactic Latitudes. *J. E. Little, P. L. Dufton, F. P. Keenan, N. C. Hambly, E. S. Conlon, P. J. F. Brown, & L. Miller.* 447, 783, 186-F11 (1995)

Binary Models for the Solar Neighborhood and Magellanic Cloud W-R Populations. *William W. Dalton & Craig L. Sarazin.* 448, 369, 197-C6 (1995)

Carbon Isotope Ratios in Very Lithium-rich K Giants. *L. da Silva, R. de la Reza, & B. Barbuy.* 448, L41, 200-A1 (1995)

Radiative Levitation in Hot White Dwarfs: Equilibrium Theory. *P. Chayer, G. Fontaine, & F. Wesemael.* 99, 189, 36-G5 (1995)

CNO Abundances and the Evolutionary Status of Galactic, A-Type Supergiants. *Kim A. Venn.* 449, 839, 224-C11 (1995)

Equivalent Widths for 54 Red Giants in 47 Tucanae, ω Centauri, NGC 6397, M22, and NGC 6752. *John E. Norris, G. S. Da Costa, & S. J. Tingay.* 99, 637, 43-F9 (1995)

Atmospheric Parameters and LTE Abundances for 22 Galactic, A-Type Supergiants. *Kim A. Venn.* 99, 659, 44-A6 (1995)

The Chemical Composition of Red Giants. IV. The Neutron Density at the *s*-Process Site. *David L. Lambert, Verne V. Smith, Maurizio Busso, Roberto Gallino, & Oscar Straniero.* 450, 302, 232-B9 (1995)

Accurate Multiconfiguration Hartree-Fock Calculations of Oscillator Strengths in Light Atoms: The Boron (B II) Line at 1362 Å. *Michel Godefroid, Jeppe Olsen, Per Jönsson, & Charlotte Froese Fischer.* 450, 473, 234-E3 (1995)

Lithium Abundances in δ Scuti Stars and Their Relationship with the Lithium Dip. *Stephen C. Russell.* 451, 747, 257-D13 (1995)

The First Generation of Stars: First Steps toward Chemical Evolution of Galaxies. *Jean Audouze & Joseph Silk.* 451, L49, 260-E2 (1995)

Explosions of Sub–Chandrasekhar Mass White Dwarfs in Two Dimensions. *Eli Livne & David Arnett.* 452, 62, 263-A6 (1995)

The Primordial Lithium Abundance. *Robert L. Kurucz.* 452, 102, 263-E2 (1995)

Empirical Approach to Cepheid Period-Luminosity-Color and Period-Luminosity Relations by Surface Brightness. *G. P. Di Benedetto.* 452, 195, 264-F7 (1995)

Evidence of Higher Primordial Lithium from Keck Observations of M92. *Constantine P. Deliyannis, Ann Merchant Boesgaard, & Jeremy R. King.* 452, L13, 269-D10 (1995)

Chemical Evolution of the Orion Association. III. The Lithium Abundance of F and G Stars. *Katia Cunha, Verne V. Smith, & David L. Lambert.* 452, 634, 273-D11 (1995)

Rotation and Oxygen Line Strengths in Blue Horizontal-Branch Stars. *Ruth C. Peterson, Robert T. Rood, & Deborah A. Crocker.* 453, 214, 284-B1 (1995)

A Consistent Explanation for $^{12}C/^{13}C$, ^7Li, and ^3He Anomalies in Red Giant Stars. *C. Charbonnel.* 453, L41, 289-G10 (1995)

The *r*-Process Element Europium in Galactic Disk F and G Dwarf Stars. *Vincent M. Woolf, Jocelyn Tomkin, & David L. Lambert.* 453, 660, 293-A1 (1995)

Flare Production of ^6Li in Population II Stars. *Constantine P. Deliyannis & Robert A. Malaney.* 453, 810, 295-A14 (1995)

Lithium in Short-Period Tidally Locked Binaries: A Test of Rotationally Induced Mixing. *Sean G. Ryan & Constantine P. Deliyannis.* 453, 819, 295-B12 (1995)

Improved Calculations of the Equilibrium Abundances of Heavy Elements Supported by Radiative Levitation in the Atmospheres of Hot DA White Dwarfs. *P. Chayer, S. Vennes, A. K. Pradhan, P. Thejll, A. Beauchamp, G. Fontaine, & F. Wesemael.* 454, 429, 305-D4 (1995)

A Reconnaissance of the 900–1200 Å Spectra of Early O Stars in the Magellanic Clouds. *Nolan R. Walborn, Knox S. Long, Daniel J. Lennon, & Rolf-Peter Kudritzki.* 454, L27, 307-F9 (1995)

Stellar Abundances and Winds of A-Type Supergiant Stars in M33: First Results from the Keck HIRES Spectrograph. *James K. McCarthy, Daniel J. Lennon, Kim A. Venn, Rolf-Peter Kudritzki, Joachim Puls, & Francisco Najarro.* 455, L135, 333-G11 (1995)

STARS: ACCRETION

Spectroscopy of FO Aquarii: Evidence for Reprocessing in a Hot Wind. *Phillip J. Martell & Ronald H. Kaitchuck.* 366, 286, 4-E5 (1991)

Monte Carlo Simulation of Comptonization in Plasma Accreting onto Neutron Stars. *Tomoyuki Hanawa.* 366, 495, 9-B9 (1991)

Application of a General Relativistic Accretion Disk Model to LMC X-1, LMC X-3, X1608−522, and X1636−536. *Ken Ebisawa, Kazuhisa Mitsuda, & Tomoyuki Hanawa.* 367, 213, 14-F8 (1991)

Ginga Observation of an AM Herculis Type Source H0538+608. *M. Ishida, A. Silber, H. V. Bradt, R. A. Remillard, K. Makishima, & T. Ohashi.* 367, 270, 15-D6 (1991)

Interpreting Epsilon Aurigae. *Sean M. Carroll, Edward F. Guinan, George P. McCook, & Robert A. Donahue.* 367, 278, 15-E1 (1991)

Conditions for Accretion-induced Collapse of White Dwarfs. *Ken'ichi Nomoto & Yoji Kondo.* 367, L19, 17-D1 (1991)

Accretion Powered Pulsars: Continuum Spectra and Light Curves of Settling Accretion Mounds. *David J. Burnard, Jonathan Arons, & Richard I. Klein.* 367, 575, 20-D10 (1991)

Dynamic Effects on Cyclotron Scattering in Pulsar Accretion Columns. *J. J. Brainerd & P. Mészáros.* 369, 179, 38-B11 (1991)

A Search for Periodicities in the X-Ray Emission from Cataclysmic Variables. *Michael Eracleous, Joseph Patterson, & Jules Halpern.* 370, 330, 51-D1 (1991)

Problems of Ultra–High-Energy Particle Acceleration in Cygnus X-3: A Critical Reappraisal. *Abhas Mitra.* 370, 345, 51-E7 (1991)

The High State of the FU Orionis Variable Z Canis Majoris. *F. V. Hessman, J. Eislöffel, R. Mundt, L. W. Hartmann, W. Herbst, & J. Krautter.* 370, 384, 52-A10 (1991)

Disk Accretion onto Magnetic T Tauri Stars. *Arieh Königl.* 370, L39, 53-E13 (1991)

A Polytropic Model of an Accretion Disk, a Boundary Layer, and a Star. *Bohdan Paczyński.* 370, 597, 55-G11 (1991)

Does Accretion Cease When a Star Approaches Breakup? *Robert Popham & Ramesh Narayan.* 370, 604, 56-A6 (1991)

The Response of Main-Sequence Stars within a Common Envelope. *Michael S. Hjellming & Ronald E. Taam.* 370, 709, 57-C1 (1991)

The Ultraviolet Spectrum of Scorpius X-1 as Observed by *IUE*: 1978–1988. *T. R. Kallman, J. C. Raymond, & S. D. Vrtilek.* 370, 717, 57-C11 (1991)

The Discovery of an X-Ray Burst and a Study of Aperiodic Variability from SMC X-1. *L. Angelini, L. Stella, & N. E. White.* 371, 332, 64-C1 (1991)

Accretion in Wind-driven X-Ray Sources. *Ronald E. Taam, Albert Fu, & B. A. Fryxell.* 371, 696, 70-C1 (1991)

Near-critical Spherical Accretion by Neutron Stars: General Relativistic Treatment. *Myeong-Gu Park & Guy S. Miller.* 371, 708, 70-D1 (1991)

A Simple Accretion/Diffusion Model for λ Bootis Stars. *Paul Charbonneau.* 372, L33, 79-D13 (1991)

Magnetic Two-Photon Scattering and Two-Photon Emission: Cross Sections and Redistribution Functions. *S. G. Alexander & P. Mészáros.* 372, 554, 82-E11 (1991)

Cyclotron Harmonics in Accreting Pulsars and Gamma-Ray Bursters: Effect of Two-Photon Processes. *S. G. Alexander & P. Mészáros.* 372, 565, 82-F9 (1991)

Nonlinear Evolution of Accretion Disks Induced by Radiative Feedback Processes. *K. R. Bell, D. N. C. Lin, & Steven P. Ruden.* 372, 633, 83-E7 (1991)

Stationary Accelerators around Keplerian Disks of Aligned Magnetized Collapsed Objects: Pair Production and Gamma-Ray Emission. *K. S. Cheng & M. Ruderman.* 373, 187, 88-C9 (1991)

High-Energy X-Ray Production in a Boundary Layer of an Accreting Neutron Star. *Tomoyuki Hanawa.* 373, 222, 88-F9 (1991)

The Near-Infrared Spectra of Low-Mass X-Ray Binaries and Related Objects. *A. P. Cowley, P. C. Schmidtke, D. Crampton, J. B. Hutchings, & M. Bolte.* 373, 228, 88-G1 (1991)

Inefficient Accretion by the DA2 White Dwarf in V471 Tauri. *D. J. Mullan, H. L. Shipman, E. M. Sion, & J. MacDonald.* 374, 707, 107-G8 (1991)

The Effects of X-Ray Illumination on Accretion Disk Interiors. *Yuan-Kuen Ko & Timothy R. Kallman.* 374, 721, 108-A10 (1991)

Flux-limited Diffusion in a Scattering Medium. *Fulvio Melia & Gregory J. Zylstra.* 374, 732, 108-B9 (1991)

Rotation and Emission Lines in Stars and Accretion Disks. *Keith Horne & Steven H. Saar.* 374, L55, 110-D6 (1991)

V1500 Cygni: A Prediction. *J. I. Katz.* 374, L59, 110-D11 (1991)

Noise-driven Radiative Shocks: A New Model for the Optical Quasi-periodic Oscillations of the AM Herculis Objects. *Michael T. Wolff, Kent S. Wood, & James N. Imamura.* 375, L31, 117-D6 (1991)

A Powerful Local Shear Instability in Weakly Magnetized Disks. II. Nonlinear Evolution. *John F. Hawley & Steven A. Balbus.* 376, 223, 127-F8 (1991)

Steady Spherical Hypercritical Accretion onto Neutron Stars. *John C. Houck & Roger A. Chevalier.* 376, 234, 127-G6 (1991)

The X-Ray Properties of GX 301−2 (4U 1223−62). *F. Haberl.* 376, 245, 128-A5 (1991)

NGC 1333 IRAS 4: A Very Young, Low-Luminosity Binary System. *Göran Sandell, Colin Aspin, William D. Duncan, Adrian P. G. Russell, & E. Ian Robson.* 376, L17, 130-C1 (1991)

Isothermal, Compton-heated Coronae above Accretion Disks. *Eve C. Ostriker, Christopher F. McKee, & Richard I. Klein.* 377, 593, 147-B3 (1991)

Radiative-hydrodynamical Simulations of Accretion Disk Coronae. *Fulvio Melia, Gregory J. Zylstra, & Bruce Fryxell.* 377, L101, 150-E11 (1991)

Diskoseismology: Probing Accretion Disks. I. Trapped Adiabatic Oscillations. *Michael A. Nowak & Robert V. Wagoner.* 378, 656, 160-E9 (1991)

The Optical Emission from Oscillating White Dwarf Radiative Shock Waves. *James N. Imamura, Hussain Rashed, & Michael T. Wolff.* 378, 665, 160-F5 (1991)

Spin Evolution and Magnetic Fields in Cataclysmic Variables. *Andrew R. King & Jean-Pierre Lasota.* 378, 674, 160-G1 (1991)

A Model for the 35 Day Variations in the Pulse Profile of Hercules X-1. *J. A. Petterson, R. E. Rothschild, & D. E. Gruber.* 378, 696, 161-A11 (1991)

SN 1988A in M58: Departure from ^{56}Co Decay 700 Days after Explosion. *P. Ruiz-Lapuente, M. Kidger, G. Gómez, R. Canal, & R. López.* 378, L41, 162-E1 (1991)

On the Adiabatic Pulsations of Accretion Disks and Rotating Stars. *James R. Ipser & Lee Lindblom.* 379, 285, 166-E7 (1991)

Very High Energy Gamma-Ray Emission from Accreting X-Ray Pulsars. *K. S. Cheng, K. N. Yu, T. Cheung, & M. M. Lau.* 379, 290, 166-F1 (1991)

Dynamo Magnetic Field Modes in Thin Astrophysical Disks: An Adiabatic Computational Approximation. *T. F. Stepinski & E. H. Levy.* 379, 343, 167-C9 (1991)

Magnetically Driven Jets and Winds. *R. V. E. Lovelace, H. L. Berk, & J. Contopoulos.* 379, 696, 173-D1 (1991)

Does SV Centauri Harbor an Accretion Disk? *Albert P. Linnell & Xania Scheick.* 379, 721, 173-F7 (1991)

Irradiation of Accretion Disks around Young Objects. I. Near-Infrared CO Bands. *Nuria Calvet, Alberto Patiño, Gladis Magris C., & Paola D'Alessio.* 380, 617, 185-G8 (1991)

The Statistics of Slow Interstellar Accretion onto Neutron Stars. *O. Blaes & M. Rajagopal.* 381, 210, 191-E10 (1991)

Spectroscopy of Z Camelopardalis in Outburst with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Arthur F. Davidsen, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Richard C. Henry, Gerard A. Kriss, Jeffrey W. Kruk, H. Warren Moos, Olaf Vancura, Henry C. Ferguson, & Randy A. Kimble.* 381, L25, 194-D5 (1991)

Three-dimensional Simulations of Black Hole Tori. *John F. Hawley.* 381, 496, 196-G9 (1991)

X-Ray Spectra of Cataclysmic Variables from the *Einstein Observatory*. *Michael Eracleous, Jules Halpern, & Joseph Patterson.* 382, 290, 203-G1 (1991)

Optical Excess Emission in T Tauri Stars. *Patrick Hartigan, Scott J. Kenyon, Lee Hartmann, Stephen E. Strom, Suzan Edwards, Alan D. Welty, & John Stauffer.* 382, 617, 209-C1 (1991)

Spectral Signatures of the MeV–PeV Radiation from Accreting Neutron Stars. *B. Rudak & P. Mészáros.* 383, 269, 215-E3 (1991)

On the Near-Infrared Spectrum of FU Orionis. *Nuria Calvet, Lee Hartmann, & Scott J. Kenyon.* 383, 752, 223-E6 (1991)

The Vertical Structure of T Tauri Accretion Disks. I. Heating by the Central Star. *Fabien Malbet & Claude Bertout.* 383, 814, 224-D1 (1991)

STARS: ACTIVITY

First Conclusive Evidence for Rotational Modulation of Stellar Radio Emission. *Jeremy Lim, Graham J. Nelson, Catarina Castro, David Kilkenny, & François van Wyk.* 388, L27, 52-C7 (1992)

Evidence of Differential Surface Rotation in the Solar-Type Star HD 114710. *Robert A. Donahue & Sallie L. Baliunas.* 393, L63, 127-D1 (1992)

Detection of a Proton Beam during the Impulsive Phase of a Stellar Flare. *Bruce E. Woodgate, Richard D. Robinson, Kenneth G. Carpenter, Stephen P. Maran, & Steven N. Shore.* 397, L95, 181-C1 (1992)

The Activity Cycle of σ Draconis. *David F. Gray, Sallie L. Baliunas, G. W. Lockwood, & Brian A. Skiff.* 400, 681, 219-A1 (1992)

Rotation and Activity among Solar-Type Stars of the Ursa Major Group. *David R. Soderblom & Michel Mayor.* 402, L5, 6-B9 (1993)

The Far-Infrared and X-Ray Radiation of Active Late-Type Stars: Suggestions for Strong Spottedness. *M. M. Katsova & V. Tsikoudi.* 402, L9, 6-C1 (1993)

Discovery of Remarkably Intense Radio Emission from a Young and Rapidly Rotating dMe Star. *Jeremy Lim.* 405, L33, 47-F1 (1993)

An Interpretation of Cycle Periods of Stellar Chromospheric Activity. *W. H. Soon, S. L. Baliunas, & Q. Zhang.* 414, L33, 175-F6 (1993)

A Search for Proton Beams during Flares on AU Microscopii. *R. D. Robinson, K. G. Carpenter, B. E. Woodgate, & S. P. Maran.* 414, 872, 182-B5 (1993)

HR 1362: The Evolved 53 Camelopardalis. *K. Stępień.* 416, 368, 205-E11 (1993)

ROSAT X-Ray Study of the Chamaeleon I Dark Cloud. I. The Stellar Population. *Eric D. Feigelson, Sophie Casanova, Thierry Montmerle, & Jean Guibert.* 416, 623, 211-B8 (1993)

Optical Spectroscopy of the Dusty K5 V Star HD 98800. *Francis C. Fekel & Bernard W. Bopp.* 419, L89, 259-F3 (1993)

Long-Term Starspot Activity of Short-Period RS Canum Venaticorum Stars. V. CG Cygni. *M. Zeilik, S. Gordon, E. Jaderlund, M. Ledlow, D. L. Summers, P. A. Heckert, E. Budding, & T. S. Banks.* 421, 303, 19-F8 (1994)

Detection of Rotational Modulation in the Coronal Extreme-Ultraviolet Emission from V711 Tauri? *Jeremy J. Drake, Alex Brown, Robert J. Patterer, Peter W. Vedder, Stuart Bowyer, & Edward F. Guinan.* 421, L43, 22-A10 (1994)

Observing Stellar Coronae with the Goddard High Resolution Spectrograph. I. The dMe Star AU Microscopii. *S. P. Maran, R. D. Robinson, S. N. Shore, J. W. Brosius, K. G. Carpenter, B. E. Woodgate, J. L. Linsky, A. Brown, P. B. Byrne, M. R. Kundu, S. White, J. C. Brandt, R. A. Shine, & F. M. Walter.* 421, 800, 28-B10 (1994)

Quiescent Microwave Emission from Late-Type Stars. *Manuel Güdel.* 90, 743, 13-A8 (1994)

Optical Variability in the Unusual K5 V Infrared-Excess Star HD 98800. *Gregory W. Henry & Douglas S. Hall.* 425, L25, 85-D9 (1994)

The Activity Cycle of τ Ceti. *David F. Gray & Sallie L. Baliunas.* 427, 1042, 125-E8 (1994)

A Method of Determining Possible Brightness Variations of the Sun in Past Centuries from Observations of Solar-Type Stars. *Q. Zhang, W. H. Soon, S. L. Baliunas, G. W. Lockwood, B. A. Skiff, & R. R. Radick.* 427, L111, 127-D3 (1994)

A Search for Chromospheric Emission in A-Type Stars Using the Goddard High-Resolution Spectrograph. *Theodore Simon, Wayne B. Landsman, & Ronald L. Gilliland.* 428, 319, 132-B5 (1994)

The Temperature and Granulation Stability of η Cephei. *David F. Gray.* 428, 765, 139-F13 (1994)

HD 129333: The Sun in Its Infancy. *J. David Dorren & Edward F. Guinan.* 428, 805, 140-C9 (1994)

Directivity of the Radio Emission from the K1 Dwarf Star AB Doradus. *Jeremy Lim, Stephen M. White, Graham J. Nelson, & Arnold O. Benz.* 430, 332, 163-C9 (1994)

Zeeman Enhancement of Lines in Extremely Active K Dwarfs. *Gibor Basri & Geoffrey W. Marcy.* 431, 844, 189-B11 (1994)

Chromospheric Variations in Main-Sequence Stars. II. *S. L. Baliunas, R. A. Donahue, W. H. Soon, J. H. Horne, J. Frazer, L. Woodard-Eklund, M. Bradford, L. M. Rao, O. C. Wilson, Q. Zhang, W. Bennett, J. Briggs, S. M. Carroll, D. K. Duncan, D. Figueroa, H. H. Lanning, T. Misch, J. Mueller, R. W. Noyes, D. Poppe, A. C. Porter, C. R. Robinson, J. Russell, J. C. Shelton, T. Soyumer, A. H. Vaughan, & J. H. Whitney.* 438, 269, 5-B12 (1995)

RE 0044+09: A New K Dwarf Rapid Rotator with a White Dwarf Companion? *Barry J. Kellett, Gordon E. Bromage, Alexander Brown, Robin D. Jeffries, David J. James, David Kilkenny, Russell M. Robb, David Wonnacott, Christopher Lloyd, & C. Clayton.* 438, 364, 6-D13 (1995)

The Solar-Stellar Spectrograph: Project Description, Data Calibration, and Initial Results. *Jeffrey C. Hall & G. W. Lockwood.* 438, 404, 7-A12 (1995)

A Method for Estimating the Fractional Area Coverage of Active Regions on Dwarf F and G Stars. *Vincenzo Andretta & Mark S. Giampapa.* 439, 405, 26-F10 (1995)

Infrared Zeeman Analysis of ϵ Eridani. *Jeff A. Valenti, Geoffrey W. Marcy, & Gibor Basri.* 439, 939, 37-E9 (1995)

Can the Variability of Solar-like Spotted Stars be Detected Polarimetrically? *Geoffrey K. Fox.* 441, 408, 65-A1 (1995)

Magnetic Activity Variations of ϵ Eridani. *David F. Gray & Sallie L. Baliunas.* 441, 436, 65-D4 (1995)

Intense Radio Outburst from the Supermassive Star η Carinae. *R. A. Duncan, S. M. White, J. Lim, G. J. Nelson, S. A. Drake, & M. R. Kundu.* 441, L73, 76-A6 (1995)

Activity Cycles in Cool Stars. I. Observation and Analysis Methods and Case Studies of Four Well-observed Examples. *Jeffrey C. Hall, G. W. Lockwood, & Erika L. Gibb.* 442, 778, 91-A1 (1995)

Starspot Evolution, Differential Rotation, and Magnetic Cycles in the Chromospherically Active Binaries λ Andromedae, σ Geminorum, II Pegasi, and V711 Tauri. *Gregory W. Henry, Joel A. Eaton, Jamesia Hamer, & Douglas S. Hall.* 97, 513, 19-C6 (1995)

Multiple Starspots and the Solar Analogy: A New Approach and Applications to HD 12545. *Zeki Eker.* 445, 526, 142-C10 (1995)

First Detection of X-Ray Variability of η Carinae. *M. F. Corcoran, G. L. Rawley, J. H. Swank, & R. Petre.* 445, L121, 151-C9 (1995)

Einstein Observations of T Tauri Stars in Taurus-Auriga. I. Properties of X-Ray Emission. *F. Damiani, G. Micela, S. Sciortino, & F. R. Harnden, Jr.* 446, 331, 157-F10 (1995)

Einstein Observations of T Tauri Stars in Taurus-Auriga. II. Relationships between X-Ray Emission and Pre–Main-Sequence Activity. *F. Damiani & G. Micela.* 446, 341, 157-G11 (1995)

The Statistical Physics of Solar Active Regions and the Fundamental Nature of Solar Flares. *Edward T. Lu.* 446, L109, 171-E3 (1995)

X-Ray Emission from the Sun in Its Youth and Old Age. *J. D. Dorren, M. Güdel, & E. F. Guinan.* 448, 431, 198-B3 (1995)

Spectroscopic *EUVE* Observations of the Active Star AB Doradus. *Slavek M. Rucinski, Rolf Mewe, Jelle S. Kaastra, Osmi Vilhu, & Stephen M. White.* 449, 900, 225-B11 (1995)

Correlations of Coronal X-Ray Emission with Activity, Mass, and Age of the Nearby K and M Dwarfs. *Thomas A. Fleming, Jürgen H. M. M. Schmitt, & Mark S. Giampapa.* 450, 401, 233-D12 (1995)

Are Variations in the Length of the Activity Cycle Related to Changes in Brightness in Solar-Type Stars? *Sallie Baliunas & Willie Soon.* 450, 896, 243-C8 (1995)

Doppler Imaging of the Cool Spot Distribution on the Weak T Tauri Star V410 Tauri. *Artie P. Hatzes.* 451, 784, 258-A6 (1995)

A Search for Microflaring Activity on dMe Flare Stars. I. Observations of the dM8e Star CN Leonis. *R. D. Robinson, K. G. Carpenter, J. W. Percival, & J. A. Bookbinder.* 451, 795, 258-B6 (1995)

A 12 Year Photometric Study of Lower Main-Sequence Hyades Stars. *Richard R. Radick, G. W. Lockwood, B. A. Skiff, & D. T. Thompson.* 452, 332, 266-F6 (1995)

The *IUE* MEGA Campaign: Wind Variability and Rotation in Early-Type Stars. *D. Massa, A. W. Fullerton, J. S. Nichols, S. P. Owocki, R. K. Prinja, N. St-Louis, A. J. Willis, B. Altner, C. T. Bolton, J. P. Cassinelli, D. Cohen, R. G. Cooper, A. Feldmeier, K. G. Gayley, T. Harries, S. R. Heap, R. N. Henriksen, I. D. Howarth, I. Hubeny, E. Kambe, L. Kaper, G. Koenigsberger, S. Marchenko, S. R. McCandliss, A. F. J. Moffat, T. Nugis, J. Puls, C. Robert, R. E. Schulte-Ladbeck, L. J. Smith, M. A. Smith, W. L. Waldron, & R. L. White.* 452, L53, 270-C8 (1995)

The *IUE* MEGA Campaign: Wind Structure and Variability of HD 50896 (WN5). *Nicole St-Louis, M. J. Dalton, S. V. Marchenko, A. F. J. Moffat, & A. J. Willis.* 452, L57, 270-D3 (1995)

The *IUE* MEGA Campaign: Modulated Structure in the Wind of HD 64760 (B0.5 Ib). *Raman K. Prinja, Derck Massa, & Alexander W. Fullerton.* 452, L61, 270-D13 (1995)

Wind Variability of B Supergiants. I. The Rapid Rotator HD 64760 (B0.5 Ib). *Derck Massa, Raman K. Prinja, & Alexander W. Fullerton.* 452, 842, 276-C7 (1995)

Absolute Measurements of Starspot Area and Temperature: II Pegasi in 1989 October. *James E. Neff, Douglas O'Neal, & Steven H. Saar.* 452, 879, 276-G6 (1995)

Stellar Activity at the End of the Main Sequence: GHRS Observations of the M8 Ve Star VB 10. *Jeffrey L. Linsky, Brian E. Wood, Alexander Brown, Mark S. Giampapa, & Carol Ambruster.* 455, 670, 331-B10 (1995)

STARS: AGB AND POST-AGB

Spectropolarimetry of the Post–Main-Sequence Bipolar Nebulae GL 618, M2-56, and M1-92. *Susan R. Trammell, Harriet L. Dinerstein, & Robert W. Goodrich.* 402, 249, 4-B12 (1993)

CO Observations of Candidates for Carbon-rich Asymptotic Giant Branch and Post–Asymptotic Giant Branch Stars. *Kevin Volk, Sun Kwok, & Andrew W. Woodsworth.* 402, 292, 4-F10 (1993)

Radio and X-Ray Observations of OH 231.8+4.2. *Gregory B. Taylor & Mark Morris.* 409, 720, 108-A9 (1993)

The Spectrum of the Central Star of the Planetary Nebula in M22. *J. Patrick Harrington & George Paltoglou.* 411, L103, 142-G3 (1993)

Evolution of Low- and Intermediate-Mass Stars to the End of the Asymptotic Giant Branch with Mass Loss. *E. Vassiliadis & P. R. Wood.* 413, 641, 164-D11 (1993)

LS II +34°26 is a Low-Mass Post–Asymptotic Giant Branch B Supergiant and Not a Massive Population I B Star Located near the Outer Edge of the Galaxy. *M. Parthasarathy.* 414, L109, 186-A7 (1993)

Infrared Spectra of Transition Objects and the Composition and Evolution of Carbon Dust. *R. H. Buss, Jr., A. G. G. M. Tielens, M. Cohen, M. W. Werner, J. D. Bregman, & F. C. Witteborn.* 415, 250, 188-B3 (1993)

The Age of the Large Magellanic Cloud Cluster NGC 1953. *J. R. Mould, D. A. Xystus, G. S. Da Costa, & R. A. Schommer.* 416, 582, 210-E12 (1993)

Prevention of High-Luminosity Carbon Stars by Hot Bottom Burning. *Arnold I. Boothroyd, I.-Juliana Sackmann, & Sean C. Ahern.* 416, 762, 212-G6 (1993)

Circumstellar Properties of S Stars. I. Dust Features. *P. S. Chen & Sun Kwok.* 416, 769, 213-A1 (1993)

Effects of Convection on Pressure Wave Excitation in Common Envelopes. *Noam Soker.* 417, 347, 221-G8 (1993)

New OH/IR Stars from Color-selected *IRAS* Sources. III. A Complete Survey. *Jayaram N. Chengalur, B. M. Lewis, J. Eder, & Yervant Terzian.* 89, 189, 51-D3 (1993)

Lithium Abundances and Other Clues to Envelope Burning in Small Magellanic Cloud Asymptotic Giant Branch Stars. *Bertrand Plez, Verne V. Smith, & David L. Lambert.* 418, 812, 242-F3 (1993)

Ultraviolet Radiation from Evolved Stellar Populations. I. Models. *Ben Dorman, Robert T. Rood, & Robert W. O'Connell.* 419, 596, 255-B8 (1993)

A High-Resolution Spectral Atlas of Carbon Stars. *Cecilia Barnbaum.* 90, 317, 5-G10 (1994)

An Ultraviolet-Visible Investigation of the Globular Cluster NGC 1851. *Ronald A. Parise, Stephen P. Maran, Wayne B. Landsman, Ralph C. Bohlin, Kwang-Ping Cheng, Michael R. Greason, Paul M. N. Hintzen, Robert W. O'Connell, Morton S. Roberts, Andrew M. Smith, & Theodore P. Stecher.* 423, 305, 49-G7 (1994)

A Laboratory Approach to the Interstellar Sulfide Dust Problem. *B. Begemann, J. Dorschner, T. Henning, H. Mutschke, & E. Thamm.* 423, L71, 54-C1 (1994)

Asymptotic Giant Branch Stars as a Source of Short-lived Radioactive Nuclei in the Solar Nebula. *G. J. Wasserburg, M. Busso, R. Gallino, & C. M. Raiteri.* 424, 412, 67-A6 (1994)

High-Resolution Spectroscopy of V1853 Cygni (LS II +34°26): Birth of a Planetary Nebula? *Verne V. Smith & David L. Lambert.* 424, L123, 79-D13 (1994)

Extreme ^{26}Mg and ^{17}O Enrichments in an Orgueil Corundum: Identification of a Presolar Oxide Grain. *I. D. Hutcheon, G. R. Huss, A. J. Fahey, & G. J. Wasserburg.* 425, L97, 94-F7 (1994)

Anisotropic Scattering of OH/IR Stars toward the Galactic Center. *Dale A. Frail, Philip J. Diamond, James M. Cordes, & Huib Jan Van Langevelde.* 427, L43, 117-F6 (1994)

Detection of Radio Continuum Emission from Circumstellar Dust around CRL 2688 and IRC +10216. *G. R. Knapp, P. F. Bowers, K. Young, & T. G. Phillips.* 429, L33, 150-E1 (1994)

Predictions of Oxygen Isotope Ratios in Stars and of Oxygen-rich Interstellar Grains in Meteorites. *Arnold I. Boothroyd, I.-Juliana Sackmann, & G. J. Wasserburg.* 430, L77, 166-C7 (1994)

Oxygen Isotopes in Circumstellar Al_2O_3 Grains from Meteorites and Stellar Nucleosynthesis. *Gary R. Huss, Albert J. Fahey, Roberto Gallino, & G. J. Wasserburg.* 430, L81, 166-C13 (1994)

Supplement to the Arecibo 1612 MHz Survey of Color-selected *IRAS* Sources. *B. M. Lewis.* 93, 549, 50-D9 (1994)

Two Planetary Nebula Candidates around Hot DA White Dwarfs. *Richard W. Tweedy & Karen B. Kwitter.* 433, L93, 224-B11 (1994)

On the Formation and Evolution of Super–Asymptotic Giant Branch Stars with Cores Processed by Carbon Burning. I. Spica to Antares. *Enrique García-Berro & Icko Iben, Jr.* 434, 306, 229-F4 (1994)

A Direct Image of Wind Interaction in the Post-AGB Evolution: CO Observations of M1-92. *V. Bujarrabal, J. Alcolea, R. Neri, & M. Grewing.* 436, L169, 281-G9 (1994)

Optical Spectroscopy of Carbon-rich Proto–Planetary Nebulae. *Bruce J. Hrivnak.* 438, 341, 6-B10 (1995)

Radiative ^{13}C Burning in Asymptotic Giant Branch Stars and *s*-Processing. *O. Straniero, R. Gallino, M. Busso, A. Chieffi, C. M. Raiteri, M. Limongi, & M. Salaris.* 440, L85, 58-B3 (1995)

Injection of Freshly Synthesized ^{41}Ca in the Early Solar Nebula by an Asymptotic Giant Branch Star. *G. J. Wasserburg, R. Gallino, M. Busso, J. N. Goswami, & C. M. Raiteri.* 440, L101, 58-D1 (1995)

A Survey of Lithium in the Red Giants of the Magellanic Clouds. *Verne V. Smith, Bertrand Plez, David L. Lambert, & D. A. Lubowich.* 441, 735, 72-A13 (1995)

Infrared Properties of Circumstellar Dust Envelopes of Oxygen-rich Asymptotic Giant Branch Stars. *O. Hashimoto.* 442, 286, 81-B3 (1995)

Hot Bottom Burning in Asymptotic Giant Branch Stars and Its Effect on Oxygen Isotopic Abundances. *Arnold I. Boothroyd, I.-Juliana Sackmann, & G. J. Wasserburg.* 442, L21, 84-G4 (1995)

Grain Formation around Carbon Stars. I. Stationary Outflow Models. *Michael P. Egan & Chun Ming Leung.* 444, 251, 117-A1 (1995)

The Hot End of Evolutionary Horizontal Branches. *V. Castellani, S. Degl'Innocenti, & L. Pulone.* 446, 228, 156-C8 (1995)

Nucleosynthesis and Mixing on the Asymptotic Giant Branch. II. Carbon and Barium Stars in the Galactic Disk. *M. Busso, D. L. Lambert, L. Beglio, R. Gallino, C. M. Raiteri, & V. V. Smith.* 446, 775, 166-F13 (1995)

A Circumstellar H_2O Maser Associated with the Circumnuclear Molecular Disk at the Galactic Center? *Deborah A. Levine, Donald F. Figer, Mark Morris, & Ian S. McLean.* 447, L101, 190-G7 (1995)

Diffuse X-Ray Emission from the Hydrogen-deficient Planetary Nebula Abell 30. *You-Hua Chu & Ching-Hwa Ho.* 448, L127, 209-F9 (1995)

The First 8–13 Micron Spectra of Asymptotic Giant Branch Stars in the Magellanic Clouds. *M. A. T. Groenewegen et al., C. H. Smith, P. R. Wood, A. Omont, & T. Fujiyoshi.* 449, L119, 227-A8 (1995)

More on the Properties of Star Models Evolving off the Hayashi Track: The Metallicity and Evolutionary Phase Dependence. *Marco Castellani, Marco Limongi, & Amedeo Tornambè.* 450, 275, 231-G1 (1995)

Evidence for Rapid Rotation of the Carbon Star V Hydrae. *Cecilia Barnbaum, Mark Morris, & Claudine Kahane.* 450, 862, 242-G7 (1995)

Discovery of Strong Vibrationally Excited Water Masers at 658 GHz toward Evolved Stars. *Karl M. Menten & Ken Young.* 450, L67, 244-G8 (1995)

Investigating the Near-Infrared Properties of Planetary Nebulae. I. Narrowband Images. *William B. Latter, Douglas M. Kelly, Joseph L. Hora, & Lynne K. Deutsch.* 100, 159, 48-A8 (1995)

Maps of the Molecular Emission around 18 Evolved Stars. *K. Z. Stanek, G. R. Knapp, K. Young, & T. G. Phillips.* 100, 169, 48-C8 (1995)

Silicate Emission at 10 Microns in Variables on the Asymptotic Giant Branch. *G. C. Sloan & S. D. Price.* 451, 758, 257-E13 (1995)

Evolutionary Paths in Multiple-Shell Planetary Nebulae. *Letizia Stanghellini & Anna Pasquali.* 452, 286, 266-B1 (1995)

The 30 Micron Emission Band in Carbon-rich Pre–Planetary Nebulae. *A. Omont, S. H. Moseley, P. Cox, W. Glaccum, S. Casey, T. Forveille, Kin-Wing Chan, R. Szczerba, R. F. Loewenstein, P. M. Harvey, & S. Kwok.* 454, 819, 313-B2 (1995)

Asymmetrical Mass Loss from Rotating Red Giant Variables. *S. M. Asida & Y. Tuchman.* 455, 286, 322-B2 (1995)

Radio-Frequency Continuum Emission from Evolved Stars. *G. R. Knapp, P. F. Bowers, K. Young, & T. G. Phillips.* 455, 293, 322-B12 (1995)

STARS: ATMOSPHERES

CO Fundamental Bands in Late-Type Stars. II. Spectrum Simulations for F–K Stars. *Gunter Wiedemann & Thomas R. Ayres.* 366, 277, 4-D9 (1991)

Synthetic Spectra and Atmospheric Properties of Cool DA White Dwarfs. *P. Bergeron, F. Wesemael, & G. Fontaine.* 367, 253, 15-C1 (1991)

The Use of Iteration Factors for Temperature Correction in a Stellar Atmosphere When Convective Transport Is Present. *L. Crivellari & E. Simonneau.* 367, 612, 20-G10 (1991)

Chemical Abundances for Cyanogen-weak Giants. *R. Earle Luck.* 75, 579, 8-F11 (1991)

A Critical Analysis of the Ultraviolet Temperature Scale of the Helium-dominated DB and DBV White Dwarfs. *Peter Thejll, Stéphane Vennes, & Harry L. Shipman.* 370, 355, 51-F5 (1991)

Non–LTE Analysis of the Ofpe/WN9 Star HDE 269227 (R84). *Werner Schmutz, Claus Leitherer, Ivan Hubeny, Manfred Vogel, Wolf-Rainer Hamann, & Ulf Wessolowski.* 372, 664, 84-A1 (1991)

Thermal X-Ray Emission from Classical Novae in Optical Decline. *James MacDonald & Stéphane Vennes.* 373, L51, 97-C4 (1991)

Model Atmospheres and X-Ray Spectra of Bursting Neutron Stars. *Jerzy Madej.* 376, 161, 127-A4 (1991)

Theoretical H II Region Models: The Effects of Stellar Atmosphere Models. *I. N. Evans.* 76, 985, 38-E13 (1991)

On Spectra of X-Ray Bursters in the Expansion Phase. *I. I. Lapidus.* 377, L93, 150-E1 (1991)

A Non–Local Thermodynamic Equilibrium, Line-blanketed Synthetic Spectrum of Iota Herculis: C, Al, and Si Lines. *James A. Grigsby.* 380, 606, 185-F9 (1991)

First Ultraviolet Spectropolarimetry of Hot Supergiants. *M. Taylor, A. D. Code, K. H. Nordsieck, C. M. Anderson, B. L. Babler, K. S. Bjorkman, G. C. Clayton, A. M. Magalhães, M. R. Meade, R. E. Schulte-Ladbeck, & B. A. Whitney.* 382, L85, 211-D5 (1991)

Oxygen Abundances in Halo Stars. *Michael S. Bessell, Ralph S. Sutherland, & Kui Ruan.* 383, L71, 226-E6 (1991)

Model Atmospheres for Rotating B Stars. *George W. Collins II, Ryland J. Truax, & Steven R. Cranmer.* 77, 541, 52-B5 (1991)

Non–LTE, Line-blanketed Model Atmospheres for Late O- and Early B-Type Stars. *James A. Grigsby, Nancy D. Morrison, & Lawrence S. Anderson.* 78, 205, 4-D9 (1992)

X-Ray–heated Models of Stellar Flare Atmospheres: Theory and Comparison with Observations. *Suzanne L. Hawley & George H. Fisher.* 78, 565, 10-F1 (1992)

On the Influence of the Convective Efficiency on the Determination of the Atmospheric Parameters of DA White Dwarfs. *P. Bergeron, F. Wesemael, & G. Fontaine.* 387, 288, 40-E1 (1992)

The Eclipsing Binary AI Phoenicis: New Results Based on an Improved Light Curve Analysis Program. *E. F. Milone, C. R. Stagg, & R. L. Kurucz.* 79, 123, 14-E11 (1992)

Photon Bubbles: Overstability in a Magnetized Atmosphere. *Jonathan Arons.* 388, 561, 57-C1 (1992)

Ionization and Excitation in Cool Giant Stars. I. Hydrogen and Helium. *Donald G. Luttermoser & Hollis R. Johnson.* 388, 579, 57-D7 (1992)

The Constitution of the Atmospheric Layers and the Extreme Ultraviolet Spectrum of Hot Hydrogen-rich White Dwarfs. *Stéphane Vennes.* 390, 590, 82-F1 (1992)

Iron Abundance in the Hot DA White Dwarfs Feige 24 and G191 B2B. *Stéphane Vennes, Pierre Chayer, John R. Thorstensen, Stuart Bowyer, & Harry L. Shipman.* 392, L27, 106-D5 (1992)

Spherically Symmetric, Expanding, Non–LTE Model Atmospheres for Novae during Their Early Stages. *P. H. Hauschildt, R. Wehrse, S. Starrfield, & G. Shaviv.* 393, 307, 118-A4 (1992)

Two-Stream, Second-Order, Probabilistic Radiative Transfer. *I. S. Krinsky & R. C. Puetter.* 393, 716, 124-F10 (1992)

Hot Post–Asymptotic Giant Branch Stars at High Galactic Latitudes. *R. J. H. McCausland, E. S. Conlon, P. L. Dufton, & F. P. Keenan.* 394, 298, 131-F5 (1992)

Helium Gravitational Settling in the Envelopes of Evolving Main-Sequence A and F Stars. *Jacques Richer, Georges Michaud, & Charles R. Proffitt.* 82, 329, 54-A1 (1992)

On the Interaction between Dust and Gas in Late-Type Stellar Atmospheres and Winds. *K. B. MacGregor & R. E. Stencel.* 397, 644, 179-A13 (1992)

Why All Stars Should Possess Circumstellar Temperature Inversions. *Jack D. Scudder.* 398, 319, 185-F11 (1992)

The Origin of Distant B-Type Stars in the Galactic Halo. *E. S. Conlon, P. L. Dufton, F. P. Keenan, R. J. H. McCausland, & D. Holmgren.* 400, 273, 212-C13 (1992)

An Interpretation of the Spectral Properties of Hot Hydrogen-rich White Dwarfs with Stratified H/He Model Atmospheres. *Stéphane Vennes & Gilles Fontaine.* 401, 288, 224-E7 (1992)

A Deep Envelope Composition for TX Piscium? *J. H. Goebel, D. Goorvitch, H. P. Larson, & D. R. Alexander.* 402, 680, 11-B1 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. I. Stellar Evolution, Lithium Abundance, and Photospheric Structure. *D. Dravins, L. Lindegren, Å. Nordlund, & D. A. VandenBerg.* 403, 385, 18-E10 (1993)

Model Atmospheres: Tool for Identifying Interstellar Features. *P. C. Frisch, S. E. Slojkowski, T. Rodriguez-Bell, & D. York.* 84, 55, 1-G3 (1993)

Angular Diameter Measurements of Cool Giant Stars in Strong TiO Bands and in the Continuum. *A. Quirrenbach, D. Mozurkewich, J. T. Armstrong, D. F. Buscher, & C. A. Hummel.* 406, 215, 57-F9 (1993)

Metal-Line Blanketing and the Peculiar Hβ Line Profile in the DAO Star Feige 55. *P. Bergeron, F. Wesemael, R. Lamontagne, & P. Chayer.* 407, L85, 82-F1 (1993)

A Determination of the Basic Atmospheric Parameters of ϕ Cassiopeiae. *Patricia Rosenzweig & Lawrence Anderson.* 411, 207, 129-F13 (1993)

Mg II and Lyα Fluxes in M Dwarfs: Evaluation of an Acoustic Model. *D. J. Mullan & Q. Q. Cheng.* 412, 312, 146-A9 (1993)

Spectrophotometry of Wolf-Rayet Stars. I. Continuum Energy Distributions. *Patrick W. Morris, Kenneth R. Brownsberger, Peter S. Conti, Philip Massey, & William D. Vacca.* 412, 324, 146-B10 (1993)

Abundance Inhomogeneities and Atmospheric Structure in CN-Bimodal Globular Cluster Giants. *Jeremy J. Drake, Bertrand Plez, & Verne V. Smith.* 412, 612, 151-D1 (1993)

The Effects of Zonal Atmospheric Currents on the Spectra of Rotating Early-Type Stars. *Steven R. Cranmer & George W. Collins II.* 412, 720, 152-F12 (1993)

The Fundamental Parameters of the Chromospherically Active K2 Dwarf ϵ Eridani. *Jeremy J. Drake & Geoffrey Smith.* 412, 797, 153-F9 (1993)

Synthesis of Stellar Mg and Fe Absorption Indices for Stellar Population Studies. *R. K. Gulati, M. L. Malagnini, & C. Morossi.* 413, 166, 158-B10 (1993)

The "Baldwin Effect" in Wolf-Rayet Stars. *Patrick Morris, Peter S. Conti, Henny J. G. L. M. Lamers, & Gloria Koenigsberger.* 414, L25, 175-E7 (1993)

The Relativistic Sobolev Method Applied to Homologously Expanding Atmospheres. *David J. Jeffery.* 415, 734, 197-A5 (1993)

Model Atmosphere and Kinematical Analyses of Early-Type, High Galactic Latitude Stellar Candidates from the UKST *UBVRI* Survey. *N. C. Hambly, E. S. Conlon, P. L. Dufton, F. P. Keenan, J. E. Little, & L. Miller.* 417, 706, 228-B10 (1993)

The Faraday Rotation and Linear Polarization of Light in Stellar Atmospheres. *N. A. Silant'ev.* 419, 294, 249-G6 (1993)

A *Hubble Space Telescope* Ultraviolet Spectrum of SN 1993J. *David J. Jeffery, Robert P. Kirshner, Peter M. Challis, Chun S. J. Pun, Alexei V. Filippenko, Thomas Matheson, David Branch, Roger A. Chevalier, Claes Fransson, Nino Panagia, Robert V. Wagoner, J. Craig Wheeler, & Alejandro Clocchiatti.* 421, L27, 21-F9 (1994)

GD 323: New Observations and Analysis of the Prototype DAB White Dwarf. *D. Koester, James Liebert, & Rex A. Saffer.* 422, 783, 41-E10 (1994)

Non–LTE Model Atmosphere Analysis of Nova Cygni 1992. *P. H. Hauschildt, S. Starrfield, S. Austin, R. M. Wagner, S. N. Shore, & G. Sonneborn.* 422, 831, 42-C1 (1994)

Radiation-driven Acceleration in Photospheres of Nonaccreting Magnetic White Dwarfs. *Vladimir V. Zheleznyakov & A. V. Serber.* 90, 783, 13-D13 (1994)

The Peculiar Cool White Dwarf LHS 1126 Revisited. *P. Bergeron, María-Teresa Ruiz, S. K. Leggett, D. Saumon, & F. Wesemael.* 423, 456, 51-G5 (1994)

On Sound Generation by Turbulent Convection: A New Look at Old Results. *Z. E. Musielak, R. Rosner, R. F. Stein, & P. Ulmschneider.* 423, 474, 52-A13 (1994)

Cool Zero-Metallicity Stellar Atmospheres. *D. Saumon, P. Bergeron, J. I. Lunine, W. B. Hubbard, & A. Burrows.* 424, 333, 66-A8 (1994)

Reflection of Alfvén Waves in Stellar Atmospheres: The Case of Open Magnetic Fields. *Yu-Qing Lou & Robert Rosner.* 424, 429, 67-B11 (1994)

On Dirac Equations for Linear Magnetoacoustic Waves Propagating in an Isothermal Atmosphere. *R. Alicki, Z. E. Musielak, J. Sikorski, & D. Makowiec.* 427, 919, 124-A13 (1994)

An Implicit Integral Method to Solve Selected Radiative Transfer Problems. III. Factorization versus Linearization. *E. Simonneau & L. Crivellari.* 428, 753, 139-E11 (1994)

An Implicit Integral Method to Solve Selected Radiative Transfer Problems. II. LTE Stellar Atmosphere Models. *L. Crivellari & E. Simonneau.* 429, 331, 148-B9 (1994)

Vega: A Rapidly Rotating Pole-on Star. *Austin F. Gulliver, Graham Hill, & Saul J. Adelman.* 429, L81, 158-C9 (1994)

The Metallicity of M4: Accurate Spectroscopic Fundamental Parameters for Four Giants. *J. J. Drake, V. V. Smith, & N. B. Suntzeff.* 430, 610, 169-D8 (1994)

Gravitational Damping of Alfvén Waves in Stellar Atmospheres and Winds. *I. K. Khabibrakhmanov & D. J. Mullan.* 430, 814, 172-A7 (1994)

The Effect of Constant Horizontal Magnetic Fields on Model Atmospheres of Ap Stars. *F. LeBlanc, G. Michaud, & J. Babel.* 431, 388, 180-G9 (1994)

New Radiometric Values of the Solar Ultraviolet Continuum Radiation from 1500 to 1700 Å. *P. Brekke & O. Kjeldseth-Moe.* 431, L55, 183-B1 (1994)

Zeeman Enhancement of Lines in Extremely Active K Dwarfs. *Gibor Basri & Geoffrey W. Marcy.* 431, 844, 189-B11 (1994)

Resonance Line Polarization in Spherical Atmospheres: Partial Redistribution Effects Studied with the Domke-Hubeny Redistribution Matrix. *K. N. Nagendra.* 432, 274, 196-E10 (1994)

The Role of Advection in the Quasi-static Approximation. *Shlomi Pistinner & Giora Shaviv.* 432, 302, 197-A1 (1994)

A Spectroscopic Analysis of DAO and Hot DA White Dwarfs: The Implications of the Presence of Helium and the Nature of DAO Stars. *P. Bergeron, F. Wesemael, A. Beauchamp, M. A. Wood, R. Lamontagne, G. Fontaine, & James Liebert.* 432, 305, 197-A6 (1994)

Atmospheric Parameters of Field Subdwarf B Stars. *Rex A. Saffer, P. Bergeron, D. Koester, & James Liebert.* 432, 351, 197-E1 (1994)

On Cepheid Diameter and Distance Measurement. *Dimitar D. Sasselov & Margarita Karovska.* 432, 367, 197-F6 (1994)

Soft X-Ray Spectral Fits of Geminga with Model Neutron Star Atmospheres. *R. D. Meyer, G. G. Pavlov, & P. Mészáros.* 433, 265, 211-E12 (1994)

The CO/SiO Radiative Instability in Cool Star Atmospheres Revisited. *M. Cuntz & D. O. Muchmore.* 433, 303, 212-B3 (1994)

Thermally Unstable Perturbations in Stratified Conducting Atmospheres. *Fabio Reale, Salvatore Serio, & Giovanni Peres.* 433, 811, 221-C1 (1994)

Analysis of Helium-rich Subdwarf O Stars. I. NLTE Models, Methods, and Fits for 21 Palomar Green Survey sdO's. *P. Thejll, F. Bauer, R. Saffer, J. Liebert, D. Kunze, & H. L. Shipman.* 433, 819, 221-C12 (1994)

Old Stellar Populations. V. Absorption Feature Indices for the Complete Lick/IDS Sample of Stars. *Guy Worthey, S. M. Faber, J. Jesús González, & D. Burstein.* 94, 687, 61-E4 (1994)

Theoretical Modeling of GHRS Observations of the Of/WN-Type Star R136a5. *Alex de Koter, Ivan Hubeny, Sara R. Heap, & Thierry Lanz.* 435, L71, 252-F9 (1994)

Nonlinear Instability of Accelerating Shock Waves with Application to Supernovae. *Ding Luo & Roger A. Chevalier.* 435, 815, 257-C9 (1994)

An Analytic Solution of the Radiative Transfer Equation for a Gray Scattering Atmosphere in Motion. *Shlomi Pistinner & Giora Shaviv.* 436, 837, 277-B13 (1994)

Missing Opacity in the Atmospheric Models of Red Giants. *C. Ian Short & John B. Lester.* 436, L165, 281-G1 (1994)

Properties and Variability of the Stellar Wind from P Cygni. *S. Scuderi, G. Bonanno, D. Spadaro, N. Panagia, H. J. G. L. M. Lamers, & A. de Koter.* 437, 465, 289-E1 (1994)

EUVE Spectroscopy of ϵ Canis Majoris (B2 II) from 70 to 730 Å. *J. P. Cassinelli, D. H. Cohen, J. J. MacFarlane, J. E. Drew, A. E. Lynas-Gray, M. G. Hoare, J. V. Vallerga, B. Y. Welsh, P. W. Vedder, I. Hubeny, & T. Lanz.* 438, 932, 17-A8 (1995)

Classical Rotational Broadening of Spectral Lines. *George W. Collins II & Ryland J. Truax.* 439, 860, 36-E3 (1995)

Non-LTE Line-blanketed Model Atmospheres of Hot Stars. I. Hybrid Complete Linearization/Accelerated Lambda Iteration Method. *I. Hubeny & T. Lanz.* 439, 875, 36-F8 (1995)

Non-LTE Line-blanketed Model Atmospheres of Hot Stars. II. Hot, Metal-rich White Dwarfs. *T. Lanz & I. Hubeny.* 439, 905, 37-B1 (1995)

New Synthetic Mg_2 Indices. *M. Chavez, M. L. Malagnini, & C. Morossi.* 440, 210, 44-B3 (1995)

The Modeling of Energy Distributions and Light Curves of ZZ Ceti Stars. I. Basic Theory and Semianalytic Expressions for the Emergent Flux. *P. Brassard, G. Fontaine, & F. Wesemael.* 96, 545, 9-C12 (1995)

Rototranslational Collision-induced Absorption by H_2–H_2 Pairs at Temperatures from 600 to 7000 K. *Chunguang Zheng & Aleksandra Borysow.* 441, 960, 75-B6 (1995)

Spectroscopic Studies of DB White Dwarfs: Confirmation and Modeling of New Forbidden Components of He I. *A. Beauchamp, F. Wesemael, P. Bergeron, & James Liebert.* 441, L85, 76-C4 (1995)

On the Nature of the Spectral Features in Peculiar "DQ" White Dwarfs. *Gary D. Schmidt, P. Bergeron, & Bruce Fegley, Jr.* 443, 274, 99-A10 (1995)

New Model Atmospheres for Very Cool White Dwarfs with Mixed H/He and Pure He Compositions. *P. Bergeron, D. Saumon, & F. Wesemael.* 443, 764, 108-D1 (1995)

Model Atmospheres for M (Sub)Dwarf Stars. I. The Base Model Grid. *France Allard & Peter H. Hauschildt.* 445, 433, 138-E2 (1995)

Semianalytic Continuum Spectra of Type II Supernovae. *Marcos J. Montes & Robert V. Wagoner.* 445, 828, 146-E11 (1995)

ORFEUS Observations of G191-B2B: Neutral and Ionized Gas in the Local Interstellar Medium. *M. Hurwitz & S. Bowyer.* 446, 812, 167-C4 (1995)

A 325 Square Degree Survey of B-Type Stars at High Galactic Latitudes. *J. E. Little, P. L. Dufton, F. P. Keenan, N. C. Hambly, E. S. Conlon, P. J. F. Brown, & L. Miller.* 447, 783, 186-F11 (1995)

The Physics of Early Nova Spectra. *Peter H. Hauschildt, Sumner Starrfield, Steven N. Shore, France Allard, & E. Baron.* 447, 829, 187-D2 (1995)

Radiative Levitation in Hot White Dwarfs: Equilibrium Theory. *P. Chayer, G. Fontaine, & F. Wesemael.* 99, 189, 36-G5 (1995)

Synthetic Mean Colors for RR Lyrae Variables. *Giuseppe Bono, Filippina Caputo, & Robert F. Stellingwerf.* 99, 263, 37-F8 (1995)

Optical and Ultraviolet Analyses of ZZ Ceti Stars and Study of the Atmospheric Convective Efficiency in DA White Dwarfs. *P. Bergeron, F. Wesemael, R. Lamontagne, G. Fontaine, R. A. Saffer, & N. F. Allard.* 449, 258, 213-F10 (1995)

Far-Ultraviolet (912–1900 Å) Energy Distribution in Early-Type Main-Sequence Stars. *M. Chavez, R. Stalio, & J. B. Holberg.* 449, 280, 214-A7 (1995)

CNO Abundances and the Evolutionary Status of Galactic, A-Type Supergiants. *Kim A. Venn.* 449, 839, 224-C11 (1995)

Atmospheric Parameters and LTE Abundances for 22 Galactic, A-Type Supergiants. *Kim A. Venn.* 99, 659, 44-A6 (1995)

Iteration Profiles in Radiative Transfer Problems. I. From Vectorial to Scalar Coupling. *L. Crivellari & E. Simonneau.* 451, 328, 250-D6 (1995)

The Primordial Lithium Abundance. *Robert L. Kurucz.* 452, 102, 263-E2 (1995)

Klein-Gordon Equation and the Local Critical Frequency for Alfvén Waves Propagating in an Isothermal Atmosphere. *Z. E. Musielak & R. L. Moore.* 452, 434, 268-A11 (1995)

A Study of the Spectra of Seven Of Stars. II. Line Profiles and Equivalent Widths. *Anne B. Underhill.* 100, 461, 52-C13 (1995)

Are Wolf-Rayet Stellar Winds Driven by Radiation Forces? *Shlomi Pistinner & David Eichler.* 454, 404, 304-F8 (1995)

Radiative $He^+(1s) + He(1s^2)$ Processes as the Source of the DB White Dwarf Atmosphere Electromagnetic Continuous Spectra. *A. A. Mihajlov, M. S. Dimitrijević, Lj. M Ignjatović, & Z. Djurić.* 454, 420, 305-B3 (1995)

New Far-Ultraviolet Intrinsic Spectral Fluxes of Hot Stars and Their Photospheric Temperatures. *Richard H. Buss, Jr., J. W. Kruk, & H. C. Ferguson.* 454, L55, 308-C12 (1995)

A High-Temperature Partition Function for H_3^+. *Liesl Neale & Jonathan Tennyson.* 454, L169, 317-B3 (1995)

A Novel Iterative Scheme for the Very Fast and Accurate Solution of Non-LTE Radiative Transfer Problems. *J. Trujillo Bueno & P. Fabiani Bendicho.* 455, 646, 330-G6 (1995)

STARS: BINARIES

Spectroscopy of FO Aquarii: Evidence for Reprocessing in a Hot Wind. *Phillip J. Martell & Ronald H. Kaitchuck.* 366, 286, 4-E5 (1991)

Circumstellar Material around the Massive Close Binary DH Cephei. *M. F. Corcoran.* 366, 308, 4-G8 (1991)

Sigma Observation of the Pulsar OAO 1657−415: Precise Localization at Hard X-Ray Energy and Discovery of Spin-down. *S. Mereghetti, J. Ballet, A. Lambert, P. Mandrou, L. Natalucci, J. Paul, J. P. Roques, L. Salotti, M. Gilfanov, R. Sunyaev, G. Babalyan, E. Churazov, N. Khavenson, A. Kuznetsov, D. Stepanov, & S. Yunin.* 366, L23, 6-C11 (1991)

On the Orbital Period Change of the Binary Pulsar PSR 1913+16. *Thibault Damour & J. H. Taylor.* 366, 501, 9-C1 (1991)

Spectroscopic Binaries in the Orion Nebula Cluster. *Helmut A. Abt, Ruyou Wang, & Octavio Cardona.* 367, 155, 14-A1 (1991)

Optical and Radio Observations of the Binary Pulsar 1855+09: Evolution of Pulsar Magnetic Fields and Low-Mass White Dwarf Cooling. *S. R. Kulkarni, S. Djorgovski, & A. R. Klemola.* 367, 221, 14-G4 (1991)

Conditions for Accretion-induced Collapse of White Dwarfs. *Ken'ichi Nomoto & Yoji Kondo.* 367, L19, 17-D1 (1991)

Resonant Interaction in Common Envelopes. *Noam Soker.* 367, 593, 20-F1 (1991)

On Winds and X-Rays of O-Type Stars. *Tomasz Chlebowski & Catharine D. Garmany.* 368, 241, 26-B1 (1991)

On the Detectability of Pulsars in Close Binary Systems. *Helen M. Johnston & Shrinivas R. Kulkarni.* 368, 504, 31-D1 (1991)

Theoretical Light Curve for the Recurrent Nova RS Ophiuchi—Determination of the White Dwarf Mass, Composition, and Distance. *Mariko Kato.* 369, 471, 43-E6 (1991)

Possible Detection of TeV Gamma Rays from AM Herculis. *C. L. Bhat, R. K. Kaul, H. S. Rawat, V. K. Senecha, R. C. Rannot, M. L. Sapru, A. K. Tickoo, & H. Razdan.* 369, 475, 43-E12 (1991)

On the Explosion in a Common Envelope Scenario for Type Ia Supernovae. *James H. Applegate.* 370, 324, 51-C9 (1991)

A Search for Periodicities in the X-Ray Emission from Cataclysmic Variables. *Michael Eracleous, Joseph Patterson, & Jules Halpern.* 370, 330, 51-D1 (1991)

Near-Infrared Time-resolved Spectroscopy of the Cataclysmic Variable YY Draconis. *Mario Mateo, Paula Szkody, & Peter Garnavich.* 370, 370, 51-G8 (1991)

Mechanisms for Pulsar Eclipse. *David Eichler.* 370, L27, 53-D11 (1991)

The Effect of an External Disk on the Orbital Elements of a Central Binary. *P. Artymowicz, C. J. Clarke, S. H. Lubow, & J. E. Pringle.* 370, L35, 53-E7 (1991)

Spectroscopic Binaries in the Open Cluster Trumpler 16. *Hugo Levato, Stella Malaroda, Nidia Morrell, Beatriz García, & Carlos Hernández.* 75, 869, 13-C13 (1991)

Fokker-Planck Calculations of Star Clusters with Primordial Binaries. *Bin Gao, Jeremy Goodman, Haldan Cohn, & Brian Murphy.* 370, 567, 55-E1 (1991)

A Polytropic Model of an Accretion Disk, a Boundary Layer, and a Star. *Bohdan Paczyński.* 370, 597, 55-G11 (1991)

Does Accretion Cease When a Star Approaches Breakup? *Robert Popham & Ramesh Narayan.* 370, 604, 56-A6 (1991)

Helium Star Cataclysmics. *Icko Iben, Jr., & Alexander V. Tutukov.* 370, 615, 56-B5 (1991)

The Response of Main-Sequence Stars within a Common Envelope. *Michael S. Hjellming & Ronald E. Taam.* 370, 709, 57-C1 (1991)

He Stars and He-accreting CO White Dwarfs. *Marco Limongi & Amedeo Tornambè.* 371, 317, 64-A9 (1991)

High-Precision Timing of Millisecond Pulsars. I. Astrometry and Masses of the PSR 1855+09 System. *M. F. Ryba & J. H. Taylor.* 371, 739, 70-F9 (1991)

Synchronization of the Magnetic Nova V1500 Cygni. *Gary D. Schmidt & H. S. Stockman.* 371, 749, 70-G7 (1991)

Spectroscopic Binaries in the Orion OB1 Association. *Nidia Morrell & Hugo Levato.* 75, 965, 15-F5 (1991)

Star Cluster Evolution with Primordial Binaries. II. Detailed Analysis. *Steve McMillan, Piet Hut, & Junichiro Makino.* 372, 111, 75-D5 (1991)

The Binary Feige 24: The Mass, Radius, and Gravitational Redshift of the DA White Dwarf. *Stéphane Vennes, John R. Thorstensen, Peter Thejll, & Harry L. Shipman.* 372, L37, 79-E5 (1991)

Modification of Stellar Populations in Post–Core-Collapse Globular Clusters. *S. Djorgovski, G. Piotto, E. S. Phinney, & D. F. Chernoff.* 372, L41, 79-E11 (1991)

Type Ia Supernovae: Constraints on Baryonic Dark Matter. *Tammy A. Smecker & Rosemary F. G. Wyse.* 372, 448, 81-D1 (1991)

Limits on Cluster Binaries. *Roger W. Romani & Martin D. Weinberg.* 372, 487, 81-G5 (1991)

Coincidence Probabilities for Spacecraft Gravitational Wave Experiments: Massive Coalescing Binaries. *Massimo Tinto & J. W. Armstrong.* 372, 545, 82-E1 (1991)

Double Core Evolution. IV. The Late Stages of Evolution of a 2 $M_\odot$ Red Giant with a 1 $M_\odot$ Companion. *Ronald E. Taam & Peter Bodenheimer.* 373, 246, 89-A10 (1991)

The Extraordinary 1989 December 14/15 Optical Flare Events on V711 Tauri. *Gregory W. Henry & Douglas S. Hall.* 373, L9, 91-B7 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

Is Drag Luminosity Effective in Recurrent Novae? *Mariko Kato & Izumi Hachisu.* 373, 620, 95-F1 (1991)

High-Resolution *IUE* Spectra of the Nova-like Variable IX Velorum. *Christopher W. Mauche.* 373, 624, 95-F7 (1991)

Bowen Fluorescence in AM Herculis Stars. *Jonathan Schachter, Alexei V. Filippenko, Steven M. Kahn, & Frits B. S. Paerels.* 373, 633, 95-G4 (1991)

Limits on the Space Density of Double Degenerates as Type Ia Supernova Progenitors. *Diana Foss, Richard A. Wade, & Richard F. Green.* 374, 281, 101-E9 (1991)

The Pulse-timing and Emission-Line Orbits of the White Dwarf in the Cataclysmic Variable AE Aquarii. *Edward L. Robinson, Allen W. Shafter, & S. Balachandran.* 374, 298, 101-G1 (1991)

The Infrared and Optical Pulsations of G29-38. *Joseph Patterson, B. Zuckerman, E. E. Becklin, D. J. Tholen, & T. Hawarden.* 374, 330, 102-C1 (1991)

The Common Envelope Phase in Classical Novae: One-dimensional Models. *Anurag Shankar, Mario Livio, & James W. Truran.* 374, 623, 106-G6 (1991)

X-Ray to Infrared Observations of the AM Herculis System E1405−451 (V834 Centauri). *R. M. Sambruna, L. Chiappetti, A. Treves, J. M. Bonnet-Bidaud, P. Bouchet, L. Maraschi, C. Motch, & M. Mouchet.* 374, 744, 108-C10 (1991)

Timing Observations of the 8 Hour Binary Pulsar 2127+11C in the Globular Cluster M15. *T. A. Prince, S. B. Anderson, S. R. Kulkarni, & A. Wolszczan.* 374, L41, 110-C1 (1991)

V1500 Cygni: A Prediction. *J. I. Katz.* 374, L59, 110-D11 (1991)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. I. AO Cassiopeiae. *Douglas R. Gies & Michael S. Wiggs.* 375, 321, 114-G10 (1991)

Noise-driven Radiative Shocks: A New Model for the Optical Quasi-periodic Oscillations of the AM Herculis Objects. *Michael T. Wolff, Kent S. Wood, & James N. Imamura.* 375, L31, 117-D6 (1991)

On the Orbital Circularization of Close Binaries. *Itzhak Goldman & Tsevi Mazeh.* 376, 260, 128-B8 (1991)

Tomographic Separation of Composite Spectra: The Components of the O-Star Spectroscopic Binary AO Cassiopeiae. *William G. Bagnuolo, Jr., & Douglas R. Gies.* 376, 266, 128-C1 (1991)

Ultraviolet Variability of the Massive W-R Binary System HDE 311884 = WR 47. *Gloria Koenigsberger, Anthony F. J. Moffat, & Lawrence H. Auer.* 376, 272, 128-C9 (1991)

Photometric Binary Stars in Praesepe and the Search for Globular Cluster Binaries. *Michael Bolte.* 376, 514, 132-G1 (1991)

Binary Star Observations with the *Hubble Space Telescope* Fine Guidance Sensors. I. ADS 11300. *O. G. Franz, T. J. N. Kreidl, L. W. Wasserman, A. J. Bradley, G. F. Benedict, P. D. Hemenway, W. H. Jefferys, B. McArthur, J. E. McCartney, E. Nelan, P. J. Shelus, D. Story, A. L. Whipple, R. L. Duncombe, L. W. Fredrick, & Wm. F. van Altena.* 377, L17, 143-C6 (1991)

Fragmentation of Elongated Cylindrical Clouds. III. Formation of Binary and Multiple Systems. *Ian Bonnell, Hugo Martel, Pierre Bastien, Jean-Pierre Arcoragi, & Willy Benz.* 377, 553, 146-E5 (1991)

Collisions of Giant Stars with Compact Objects: Hydrodynamical Calculations. *Frederic A. Rasio & Stuart L. Shapiro.* 377, 559, 146-F1 (1991)

Radiative-hydrodynamical Simulations of Accretion Disk Coronae. *Fulvio Melia, Gregory J. Zylstra, & Bruce Fryxell.* 377, L101, 150-E11 (1991)

Reinvestigation of the Binary Frequency in the Open Cluster IC 4665. *Nidia Morrell & Helmut A. Abt.* 378, 157, 153-A1 (1991)

The Unusual X-Ray Pulse Timing of AE Aquarii. *O. C. de Jager.* 378, 286, 154-E1 (1991)

A Cool Supergiant with Anomalous Behavior of the 2800 Mg II Doublet. *G. A. Gurzadyan, Y. Kondo, S. S. Rustambekyan, Yervant Terzian, & Mario R. Perez.* 378, 298, 154-F1 (1991)

First Results from the Faint Object Camera: High-Resolution Observations of the Central Object R136 in the 30 Doradus Nebula. *G. Weigelt, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, P. Jakobsen, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, & W. B. Sparks.* 378, L21, 157-C7 (1991)

Hydrodynamics of Collisions between Binary Stars. *Jeremy Goodman & Lars Hernquist.* 378, 637, 160-C11 (1991)

The Optical Emission from Oscillating White Dwarf Radiative Shock Waves. *James N. Imamura, Hussain Rashed, & Michael T. Wolff.* 378, 665, 160-F5 (1991)

Spin Evolution and Magnetic Fields in Cataclysmic Variables. *Andrew R. King & Jean-Pierre Lasota.* 378, 674, 160-G1 (1991)

Binaries in a Medium of Fast Low-Mass Objects. *Andrew Gould.* 379, 280, 166-E1 (1991)

Neutron Star and Black Hole Binaries in the Galaxy. *Ramesh Narayan, Tsvi Piran, & Amotz Shemi.* 379, L17, 169-B11 (1991)

Spin-up of the White Dwarf in the Intermediate Polar 3A 0729+103. *Jyoti Singh, P. C. Agrawal, K. M. V. Apparao, P. Vivekananda Rao, & M. B. K. Sarma.* 380, 208, 178-E11 (1991)

The Rate of Neutron Star Binary Mergers in the Universe: Minimal Predictions for Gravity Wave Detectors. *E. S. Phinney.* 380, L17, 181-C6 (1991)

Constraints on the Companion Object to HD 114762. *William D. Cochran, Artie P. Hatzes, & Terry J. Hancock.* 380, L35, 181-E6 (1991)

Simulations of Tidally Driven Eccentric Instabilities with Application to Superhumps. *Stephen H. Lubow.* 381, 268, 192-C9 (1991)

Spectroscopy of Z Camelopardalis in Outburst with the Hopkins Ultraviolet Telescope. *Knox S. Long, William P. Blair, Arthur F. Davidsen, Charles W. Bowers, W. Van Dyke Dixon, Samuel T. Durrance, Paul D. Feldman, Richard C. Henry, Gerard A. Kriss, Jeffrey W. Kruk, H. Warren Moos, Olaf Vancura, Henry C. Ferguson, & Randy A. Kimble.* 381, L25, 194-D5 (1991)

Gravitational Radiation from Dual Neutron Star Elliptical Binaries. *Dieter Hils.* 381, 484, 196-F5 (1991)

Wide Binaries in the Woolley Catalog. *Ira Wasserman & Martin D. Weinberg.* 382, 149, 202-A12 (1991)

X-Ray Spectra of Cataclysmic Variables from the *Einstein Observatory*. *Michael Eracleous, Jules Halpern, & Joseph Patterson.* 382, 290, 203-G1 (1991)

High-Speed Multicolor Photometry of V834 Centaurus. *John Middleditch, James N. Imamura, Michael T. Wolff, & Thomas Y. Steiman-Cameron.* 382, 315, 204-B1 (1991)

Deep VLA Images of Globular Clusters. *Helen M. Johnston, Shrinivas R. Kulkarni, & W. M. Goss.* 382, L89, 211-D11 (1991)

The Formation of Primordial Binaries in Globular Clusters by Star-Disk Interactions. *Stephen D. Murray, C. J. Clarke, & J. E. Pringle.* 383, 192, 214-D7 (1991)

Effects of Drag Luminosity in the Common Envelope Phase of Slow Novae. *Mariko Kato & Izumi Hachisu.* 383, 761, 223-F3 (1991)

An Interactive Companion to the S Star HD 35155. *Thomas B. Ake III, Hollis R. Johnson, & Mudhaffer M. Ameen.* 383, 842, 224-F7 (1991)

Subgiant CH Stars. II. Chemical Compositions and the Evolutionary Connection with Barium Stars. *R. Earle Luck & Howard E. Bond.* 77, 515, 51-G1 (1991)

STARS: BINARIES: CLOSE

Low-Mass X-Ray Binary Evolution and the Origin of Millisecond Pulsars. *Juhan Frank, Andrew R. King, & Jean-Pierre Lasota.* 385, L45, 23-C8 (1992)

On the Power Spectra of the Wind-fed X-Ray Binary Pulsar GX 301−2. *Mauro Orlandini & G. E. Morfill.* 386, 703, 34-A9 (1992)

Rare Thermonuclear Explosions in Short-Period Cataclysmic Variables, with Possible Application to the Nova-like Red Variable in the Galaxy M31. *Icko Iben, Jr., & Alexander V. Tutukov.* 389, 369, 64-E1 (1992)

On the Interior Structure of Contact Binaries and the Light-Curve Paradox. *Jean-Louis Tassoul.* 389, 375, 64-E9 (1992)

The X-Ray Outburst from X0115+634 in 1990 February. *Keisuke Tamura, Hiroshi Tsunemi, Shunji Kitamoto, Kiyoshi Hayashida, & Fumiaki Nagase.* 389, 676, 69-G1 (1992)

SIGMA/*GRANAT* Soft Gamma-Ray Observations of the X-Ray Nova in Musca: Discovery of Positron Annihilation Emission Line. *A. Goldwurm, J. Ballet, B. Cordier, J. Paul, L. Bouchet, J. P. Roques, D. Barret, P. Mandrou, R. Sunyaev, E. Churazov, M. Gilfanov, A. Dyachkov, N. Khavenson, V. Kovtunenko, R. Kremnev, & K. Sukhanov.* 389, L79, 73-E6 (1992)

Presupernova Evolution in Massive Interacting Binaries. *Ph. Podsiadlowski, P. C. Joss, & J. J. L. Hsu.* 391, 246, 89-A10 (1992)

Coordinated *Ginga*, *IUE*, and VLA Observations of Stellar Activity in σ^2 Coronae Borealis. *R. A. Stern, Y. Uchida, F. Walter, O. Vilhu, D. Hannikainen, A. Brown, A. Veale, & B. M. Haisch.* 391, 760, 97-D7 (1992)

Superhump Timing in SU Ursae Majoris Systems: Implications of the Data for the Precessing Disk Model. *Lawrence A. Molnar & Henry A. Kobulnicky.* 392, 678, 110-F3 (1992)

The Role of the Dwarf Nova Period Distribution in Understanding the Evolution of Cataclysmic Variables. *Allen W. Schafter.* 394, 268, 131-C12 (1992)

Column Accretion with Radiation Drag and the Two-Branch Spectrum of the Low-Mass X-Ray Binary GX 5−1. *J. H. You, T. Lu, C. Y. Wei, & T. G. Wang.* 394, 283, 131-E1 (1992)

Detectability of the Gravitational Wave Signal from a Close Neutron Star Binary with Mass Transfer. *Piotr Jaranowski & Andrzej Krolak.* 394, 586, 136-F1 (1992)

A Comparative Study of Synchronization and Circularization in Close Binaries. *Jean-Louis Tassoul & Monique Tassoul.* 395, 259, 143-D1 (1992)

Long-Term Variability in Low-Mass X-Ray Binaries: A Study Using Data from *Vela 5B*. *Alan P. Smale & James C. Lochner.* 395, 582, 150-B13 (1992)

Linear Stability Analysis of Spherical Accretion Flows onto Compact Objects. *John C. Houck & Roger A. Chevalier.* 395, 592, 150-D1 (1992)

On the Efficiency of Ekman Pumping for Synchronization in Close Binaries. *Monique Tassoul & Jean-Louis Tassoul.* 395, 604, 150-E5 (1992)

X-Ray Variability of Scorpius X-1 during a Multiwavelength Campaign. *P. Hertz, B. Vaughan, K. S. Wood, J. P. Norris, K. Mitsuda, P. F. Michelson, & T. Dotani.* 396, 201, 157-E12 (1992)

The Radial Velocity of the White Dwarf Giclas 29-38. *C. Barnbaum & B. Zuckerman.* 396, L31, 160-F1 (1992)

Radio Continuum and X-Ray Properties of the Coronae of RS Canum Venaticorum and Related Active Binary Systems. *Stephen A. Drake, Theodore Simon, & Jeffrey L. Linsky.* 82, 311, 53-F5 (1992)

Tidal Heating and Mass Loss in Neutron Star Binaries: Implications for Gamma-Ray Burst Models. *P. Mészáros & M. J. Rees.* 397, 570, 178-A12 (1992)

Coalescing Binary Neutron Stars. *Christopher S. Kochanek.* 398, 234, 184-F7 (1992)

Excitation of Gravity Waves in Common Envelopes. *Noam Soker.* 399, 185, 197-E3 (1992)

Photometric Imaging of VW Cephei. *Paul D. Hendry, Stefan W. Mochnacki, & Andrew Collier Cameron.* 399, 246, 198-C8 (1992)

Populations of Low-Mass Black Hole Binaries. *Roger W. Romani.* 399, 621, 205-F1 (1992)

Explosion of a Supernova with a Red Giant Companion. *E. Livne, Y. Tuchman, & J. C. Wheeler.* 399, 665, 206-B11 (1992)

Evidence for Periodic Modulation of Presupernova Mass Loss from the Progenitor of SN 1979C. *Kurt W. Weiler, Schuyler D. Van Dyk, James E. Pringle, & Nino Panagia.* 399, 672, 206-C5 (1992)

Two Unusual Cataclysmic Variables at High Galactic Latitude: CP Eridani and AL Comae. *Timothy M. C. Abbott, Edward L. Robinson, Gary J. Hill, & Carole A. Haswell.* 399, 680, 206-D1 (1992)

Tidal Interactions of Inspiraling Compact Binaries. *Lars Bildsten & Curt Cutler.* 400, 175, 211-B1 (1992)

Spectroscopy of the Companion and Bow-Shock Nebula of PSR 1957+20. *Thomas L. Aldcroft, Roger W. Romani, & James M. Cordes.* 400, 638, 218-C13 (1992)

Hydrodynamical Evolution of Coalescing Binary Neutron Stars. *Frederic A. Rasio & Stuart L. Shapiro.* 401, 226, 223-G9 (1992)

Dynamics of Eccentric Disks with Application to Superhump Binaries. *Stephen H. Lubow.* 401, 317, 225-A1 (1992)

A Binary Origin for FU Orionis Stars. *Ian Bonnell & Pierre Bastien.* 401, L31, 227-E1 (1992)

EXOSAT Observations of the Be/X-Ray Binary 4U 2206+54. *Priyamvada Saraswat & Krishna M. V. Apparao.* 401, 678, 231-A1 (1992)

EXOSAT Observations of the X-Ray Binary Pulsar 4U 1538−52. *N. R. Robba, G. Cusumano, M. Orlandini, D. Dal Fiume, & F. Frontera.* 401, 685, 231-A10 (1992)

Companions to Bright S and MS Stars: Technetium Deficiency and Binarity. *Hollis R. Johnson, Thomas B. Ake, & Mudhaffer M. Ameen.* 402, 667, 10-G11 (1993)

Survey of Ultra–High-Energy Gamma-Ray Emission in the Magellanic Clouds. *W. H. Allen, I. A. Bond, E. Budding, M. J. Conway, A. Daniel, K. B. Fenton, H. Fujii, Z. Fujii, N. Hayashida, K. Hibino, M. Honda, J. E. Humble, S. Kabe, K. Kasahara, T. Kifune, G. D. Lythe, A. Masaike, Y. Matsubara, K. Mitsui, Y. Miura, M. Mori, Y. Muraki, M. Nagano, T. Nakamura, M. Nishizawa, P. M. Norris, S. Ogio, To. Saito, M. Sakata, H. Sato, H. M. Shimizu, M. Spencer, J. R. Storey, T. Tanimori, M. Teshima, S. Torii, A. Wadsworth, Y. Watase, M. D. Woodhams, Y. Yamamoto, P. C. M. Yock, & T. Yuda (The JANZOS Collaboration).* 403, 239, 16-G10 (1993)

An X-Ray Excited Wind in Centaurus X-3. *C. S. R. Day & Ian R. Stevens.* 403, 322, 17-G9 (1993)

Discovery of the Orbit of the X-Ray Pulsar OAO 1657−415. *Deepto Chakrabarty, John M. Grunsfeld, Thomas A. Prince, Lars Bildsten, Mark H. Finger, Robert B. Wilson, Gerald J. Fishman, Charles A. Meegan, & William S. Paciesas.* 403, L33, 20-D6 (1993)

An Interpretation of the Narrow Positron Annihilation Feature from X-Ray Nova Muscae 1991. *Wan Chen, Neil Gehrels, & F. H. Cheng.* 403, L71, 27-D7 (1993)

Colliding Wind Binary Systems: Monte Carlo Simulations of Line-Profile Variability. *Ian R. Stevens.* 404, 281, 31-D3 (1993)

Binary Structure and Accretion Flow of the New Intermediate Polar H0253+193. *Yuichi Kamata & Katsuji Koyama.* 405, 307, 45-A3 (1993)

The Evolutionary Status of the Pulsar–Be Star Binary PSR 1259−63. *A. R. King.* 405, 727, 52-B5 (1993)

Multiple Hydrogen Flashes on Accreting Low-Mass White Dwarfs: Novae and DAO Stars. *Michael M. Shara, Dina Prialnik, & Attay Kovetz.* 406, 220, 57-G1 (1993)

Hydrodynamic Instability and Coalescence of Close Binary Systems. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 406, L63, 68-D3 (1993)

Nova V2214 Ophiuchi 1988: A Magnetic Nova inside the Period Gap. *R. Baptista, F. J. Jablonski, D. Cieslinski, & J. E. Steiner.* 406, L67, 68-D9 (1993)

Analysis of Contact Binary Systems: AA Ursae Majoris, V752 Centauri, AO Camelopardalis, and V677 Centauri. *F. Barone, L. Di Fiore, L. Milano, & G. Russo.* 407, 237, 72-A9 (1993)

G62-46: An Unresolved Double Degenerate Binary Containing a Magnetic DA Component. *P. Bergeron, María-Teresa Ruiz, & S. K. Leggett.* 407, 733, 79-E13 (1993)

Sigma Hard X-Ray Observations of GX 339−4 during the Hard State and a Transition to the Soft State. *L. Bouchet, E. Jourdain, P. Mandrou, J. P. Roques, Ph. Laurent, F. Lebrun, J. Paul, L. Salotti, R. Sunyaev, E. Churazov, M. Gilfanov, N. Khavenson, A. Diachkov, I. Chulkov, B. Novikov, & A. Kuznetsov.* 407, 739, 79-F7 (1993)

Upper Limits for Gravitational Radiation from Supermassive Coalescing Binaries. *J. D. Anderson, J. W. Armstrong, & E. L. Lau.* 408, 287, 86-F4 (1993)

The Secondary Maxima in Black Hole X-Ray Nova Light Curves: Clues toward a Complete Picture. *Wan Chen, Mario Livio, & Neil Gehrels.* 408, L5, 88-E8 (1993)

Optical and X-Ray Observations of the Low-Mass X-Ray Binary EXO 0748−676. *Brian Thomas, Robin Corbet, Thomas Augusteijn, Paul Callanan, & Alan P. Smale.* 408, 651, 93-C7 (1993)

Hydrodynamics of Winds from Irradiated Companion Stars in Low-Mass X-Ray Binaries. *Marco Tavani & Richard London.* 410, 281, 115-E8 (1993)

The Nature of the Doppler Shift Residuals and Some Peculiar Phenomena of SS 433. *T. Iijima.* 410, 295, 115-F10 (1993)

Flaring and Quiescent Radio Emission of UX Arietis: A Time-dependent Model. *F. Chiuderi Drago & E. Franciosini.* 410, 301, 115-G3 (1993)

A Model of Nonthermal Radiation from Accreting X-Ray Pulsars. *P. P. Leung, K. S. Cheng, & P. C. W. Fung.* 410, 309, 115-G12 (1993)

Discovery of Orbital Decay in SMC X-1. *A. Levine, S. Rappaport, J. E. Deeter, P. E. Boynton, & F. Nagase.* 410, 328, 116-B8 (1993)

Wind-driven Angular Momentum Loss in Binary Systems. I. Ballistic Case. *Leigh Brookshaw & Marco Tavani.* 410, 719, 122-F6 (1993)

Elliptical Polarimetry of the Interacting Binary Star V367 Cygni. *Nicholas M. Elias II.* 410, 785, 123-E1 (1993)

Resolving the Iron K Line in Cygnus X-2: An Observation with BBXRT. *A. P. Smale, C. Done, R. F. Mushotzky, K. A. Weaver, P. J. Serlemitsos, F. E. Marshall, R. Petre, K. M. Jahoda, E. A. Boldt, J. H. Swank, A. E. Szymkowiak, R. L. Kelley, & K. Arnaud.* 410, 796, 123-F1 (1993)

Discovery of Multiple Low-Luminosity X-Ray Sources in NGC 6397. *Adrienne M. Cool, Jonathan E. Grindlay, Martin Krockenberger, & Charles D. Bailyn.* 410, L103, 126-B11 (1993)

The Discovery of Variable Polarization over the 13.9 Minute Spin Period of the Intermediate Polar RE 0751+14. *V. Piirola, P. Hakala, & G. V. Coyne, S.J.* 410, L107, 126-C3 (1993)

Hard Apex Transition in Quasi-periodic Oscillators: Closing of the Accretion Gap. *Garrett T. Biehle & Roger D. Blandford.* 411, 302, 131-A8 (1993)

Gravitational Radiation, Inspiraling Binaries, and Cosmology. *David F. Chernoff & Lee Samuel Finn.* 411, L5, 133-D8 (1993)

Neutron Star Accretion in a Stellar Envelope. *Roger A. Chevalier.* 411, L33, 134-A7 (1993)

Binary Black Holes in Stationary Orbits and a Test of the Active Galactic Nucleus Paradigm. *Sandip K. Chakrabarti.* 411, 610, 137-C2 (1993)

On the Mass of the Compact Object in the Black Hole Binary A0620−00. *Carole A. Haswell, Edward L. Robinson, Keith Horne, Rae F. Stiening, & Timothy M. C. Abbott.* 411, 802, 139-G1 (1993)

The Optical Counterpart of the Bright Nearby Millisecond Pulsar PSR J0437−4715. *Charles D. Bailyn.* 411, L83, 142-E1 (1993)

A Model of an X-Ray–illuminated Accretion Disk and Corona. *John C. Raymond.* 412, 267, 145-D6 (1993)

CP Puppis: No Ordinary Old Nova. *James C. White II, R. Kent Honeycutt, & Keith Horne.* 412, 278, 145-E6 (1993)

The Effect of Helium Breakup on Two-Temperature Accretion Disks including Cooling Processes. *Cesar Meirelles Filho.* 412, 288, 145-F5 (1993)

Lithium in the Binary Halo Star HD 89499. *Suchitra Balachandran, Bruce W. Carney, Anne M. Fry, Laura K. Fullton, & Ruth C. Peterson.* 413, 368, 160-G7 (1993)

Polarization Variability among Wolf-Rayet Stars. VIII. Emission Lines versus Continuum in WR+O Binaries. *Anthony F. J. Moffat & Vilppu Piirola.* 413, 724, 165-D8 (1993)

A Reprocessing Model for the Ultraviolet and Optical Light from 4U 1820−30. *Jonathan Arons & Ivan R. King.* 413, L121, 169-B4 (1993)

Ellipsoidal Figures of Equilibrium: Compressible Models. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 88, 205, 43-A1 (1993)

The "Type IIb" Supernova 1993J in M81: A Close Relative of Type Ib Supernovae. *Alexei V. Filippenko, Thomas Matheson, & Luis C. Ho.* 415, L103, 200-A8 (1993)

On the Origin of the Eclipsing Pulsar PSR B1718−19 and Its Wind. *R. A. M. J. Wijers & B. Paczyński.* 415, L115, 200-C1 (1993)

On the Interpretation of the Ultraviolet Spectra of Symbiotic Stars and Recurrent Novae. I. *Steven N. Shore & Jason P. Aufdenberg.* 416, 355, 205-D10 (1993)

Abundances in CH Subgiants: Evidence of Mass Transfer onto Main-Sequence Companions. *Verne V. Smith, Howard Coleman, & David L. Lambert.* 417, 287, 221-A13 (1993)

Numerical Simulations of Shock-driven Accretion. *M. Różyczka & H. C. Spruit.* 417, 677, 227-G1 (1993)

Spectrum of the "Invisible" Companion of Z Canis Majoris Revealed in Polarized Light. *Barbara A. Whitney, Geoffrey C. Clayton, Regina E. Schulte-Ladbeck, Nuria Calvet, Lee Hartmann, & Scott J. Kenyon.* 417, 687, 228-A1 (1993)

Angular Momentum Transfer by Tidally Forced Oscillations in Massive Main-Sequence Stars. *Umin Lee.* 417, 697, 228-A13 (1993)

Formation and Evolution of Binary Planetary Nebula Nuclei and Related Objects. *Icko Iben, Jr., & Alexander V. Tutukov.* 418, 343, 235-C12 (1993)

Discovery of a Magnetic/Nonmagnetic Double-degenerate Binary System. *James Liebert, P. Bergeron, Gary D. Schmidt, & Rex A. Saffer.* 418, 426, 236-C10 (1993)

Nova Herculis 1991: Thermonuclear Runaway on a Massive ONeMg White Dwarf. *Thomas Matheson, Alexei V. Filippenko, & Luis C. Ho.* 418, L29, 238-D6 (1993)

Cygnus X-3 in an "Ultrahigh" X-Ray State with No Detected Kα Line Emission. *A. P. Smale, R. F. Mushotzky, E. M. Schlegel, K. A. Weaver, P. J. Serlemitsos, F. E. Marshall, R. Petre, & K. Jahoda.* 418, 894, 243-F7 (1993)

Detection, Identification, and Observed Properties of Large Magellanic Cloud Supersoft X-Ray Sources. *A. P. Cowley, P. C. Schmidtke, J. B. Hutchings, D. Crampton, & T. K. McGrath.* 418, L63, 245-B13 (1993)

On the Formation of O-Ne White Dwarfs in Metal-rich Close Binary Systems. *Inma Dominguez, Amedeo Tornambè, & Jordi Isern.* 419, 268, 249-E1 (1993)

Dynamically Comptonized Spectra from Near-critical Accretion onto Neutron Stars. *Luca Zampieri, Roberto Turolla, & Aldo Treves.* 419, 311, 250-B1 (1993)

The Quasi-periodic Oscillations of VV Puppis. *James N. Imamura, John Middleditch, Jeffrey D. Scargle, Thomas Y. Steiman-Cameron, Laura A. Whitlock, Michael T. Wolff, & Kent S. Wood.* 419, 793, 257-E1 (1993)

Helium Line Emission from Be Stars. *Krishna M. V. Apparao & S. P. Tarafdar.* 420, 803, 12-G12 (1994)

Study of Spectroscopic Binaries with TODCOR. I. A New Two-dimensional Correlation Algorithm to Derive the Radial Velocities of the Two Components. *S. Zucker & T. Mazeh.* 420, 806, 13-A3 (1994)

Hydrodynamic Instability and Coalescence of Binary Neutron Stars. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 420, 811, 13-A10 (1994)

Detection of Rotational Modulation in the Coronal Extreme-Ultraviolet Emission from V711 Tauri? *Jeremy J. Drake, Alex Brown, Robert J. Patterer, Peter W. Vedder, Stuart Bowyer, & Edward F. Guinan.* 421, L43, 22-A10 (1994)

Ca II H and K and Hα Emissions in Chromospherically Active Binary Systems (RS Canum Venaticorum and BY Draconis). *M. J. Fernández-Figueroa, D. Montes, E. De Castro, & M. Cornide.* 90, 433, 8-B6 (1994)

Dynamics of Binary-Disk Interaction. I. Resonances and Disk Gap Sizes. *Paweł Artymowicz & Stephen H. Lubow.* 421, 651, 26-D1 (1994)

X-Ray Spectral Study of Two X-Ray Binaries: 4U 1957+11 and 2S 1543−624. *Kulinder P. Singh, Krishna M. V. Apparao, & Ralph P. Kraft.* 421, 753, 27-E9 (1994)

Double-Core Evolution. V. Three-dimensional Effects in the Merger of a Red Giant with a Dwarf Companion. *James L. Terman, Ronald E. Taam, & Lars Hernquist.* 422, 729, 40-G13 (1994)

Accretion Disk Corona Line Emission from X0614+091. *D. J. Christian, N. E. White, & J. H. Swank.* 422, 791, 41-F6 (1994)

Radio Evidence for Nonthermal Particle Acceleration on Stars of Late Spectral Type. *Kenneth R. Lang.* 90, 753, 13-B5 (1994)

Evidence for Particle Acceleration in a Magnetized White Dwarf from Radio and Gamma-Ray Observations. *O. C. De Jager.* 90, 775, 13-D3 (1994)

Effect of Advected Fields on Accretion Disk Dynamos. *Arun V. Mangalam & K. Subramanian.* 90, 963, 15-G3 (1994)

Predictions of a Population of Cataclysmic Variables in Globular Clusters. *R. Di Stefano & S. Rappaport.* 423, 274, 49-D13 (1994)

Equilibrium, Stability, and Orbital Evolution of Close Binary Systems. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 423, 344, 50-D9 (1994)

SIGMA Hard X-Ray Observations of the Burst Source MXB 1728−34. *A. Claret, A. Goldwurm, B. Cordier, J. Paul, J.-P. Roques, L. Bouchet, M.-C. Schmitz-Fraysse, P. Mandrou, E. Churazov, M. Gilfanov, R. Sunyaev, N. Khavenson, A. Diachkov, B. Novikov, R. Kremnev, & V. Kovtunenko.* 423, 436, 51-E5 (1994)

Generalized Spectral Model for 1–100 keV X-Ray Emission from Cygnus X-3 Based on *EXOSAT* Data. *M. R. Rajeev, V. R. Chitnis, A. R. Rao, & K. P. Singh.* 424, 376, 66-E7 (1994)

Disk-Overflow Accretion in GK Persei? *Coel Hellier & Mario Livio.* 424, L57, 69-G12 (1994)

Close Encounters of the Third-Body Kind. *M. B. Davies, W. Benz, & J. G. Hills.* 424, 870, 75-E8 (1994)

On the Nature of the X-Ray Emission from 1E 1024.0−5732/Wack 2134: The First X-Ray–selected Wolf-Rayet Star. *Sandro Mereghetti, Tomaso Belloni, Michael Shara, & Laurent Drissen.* 424, 943, 76-E1 (1994)

Transition in the X-Ray Light Curve of the AM Herculis System V834 Centauri (E1405−451): 1985–1986 *EXOSAT* Observations. *Rita M. Sambruna, Arvind N. Parmar, Lucio Chiappetti, Laura Maraschi, & Aldo Treves.* 424, 947, 76-E7 (1994)

Time-dependent Disk Accretion in X-Ray Nova Muscae 1991. *Shin Mineshige, Akira Hirano, Shunji Kitamoto, Tatsuya T. Yamada, & Jun Fukue.* 426, 308, 100-A3 (1994)

Simultaneous Soft and Hard X-Ray Spectroscopy of AM Herculis with *EXOSAT*: Discovery of Photospheric Absorption Features. *Frits Paerels, John Heise, & André van Teeseling.* 426, 313, 100-A10 (1994)

Excitation of Neutron Star Normal Modes during Binary Inspiral. *Andreas Reisenegger & Peter Goldreich.* 426, 688, 107-A6 (1994)

Formation and Evolution of Luminous Supersoft X-Ray Sources. *S. Rappaport, R. Di Stefano, & J. D. Smith.* 426, 692, 107-A13 (1994)

Observations of the Bright Novalike Variable IX Velorum with the Hopkins Ultraviolet Telescope. *Knox S. Long, Richard A. Wade, William P. Blair, Arthur F. Davidsen, & Ivan Hubeny.* 426, 704, 107-B13 (1994)

Orbital Variability in the Eclipsing Pulsar Binary PSR B1957+20. *Z. Arzoumanian, A. S. Fruchter, & J. H. Taylor.* 426, L85, 109-E6 (1994)

Three-dimensional Hydrodynamic Bondi-Hoyle Accretion. I. Code Validation and Stationary Accretors. *Maximilian Ruffert.* 427, 342, 114-B7 (1994)

Three-dimensional Hydrodynamic Bondi-Hoyle Accretion. II. Homogeneous Medium at Mach 3 with $\gamma = 5/3$. *Maximilian Ruffert & David Arnett.* 427, 351, 114-C3 (1994)

The Post-Keplerian Orbital Representations of the Relativistic Two-Body Problem. *S. A. Klioner & S. M. Kopeikin.* 427, 951, 124-D10 (1994)

Star Spots and the Period Gap in Cataclysmic Variables. *M. Livio & J. E. Pringle.* 427, 956, 124-E2 (1994)

Detection of X-Ray Emission from the PSR 1259−63/SS 2883 Binary System. *Lynn Cominsky, Mallory Roberts, & Simon Johnston.* 427, 978, 124-G2 (1994)

Is There a Planet in the PSR 1620−26 Triple System? *Frederic A. Rasio.* 427, L107, 127-C11 (1994)

High-Precision Timing of Millisecond Pulsars. III. Long-Term Monitoring of PSRs B1855+09 and B1937+21. *V. M. Kaspi, J. H. Taylor, & M. F. Ryba.* 428, 713, 139-B9 (1994)

Variable Soft X-Ray Absorption and Excess of Vela X-1. *H. C. Pan, P. Kretschmar, G. K. Skinner, E. Kendziorra, R. A. Sunyaev, & K. N. Borozdin.* 92, 448, 37-F11 (1994)

Compton Reflection in Scorpius X-1 and Cygnus X-3? *Michael Maisack, Eckhard Kendziorra, Hongchao Pan, Gerry Skinner, Jakob Englhauser, Claus Reppin, Valeri Efremov, & Rashid Sunyaev.* 92, 473, 38-B7 (1994)

Ionization Structure of Cygnus X-3: A Massive Iron-depleted Companion? *Nobuo Terasawa & Hiroshi Nakamura.* 92, 477, 38-B13 (1994)

The Orbital Evolution of Highly Eccentric Binaries. *Itzhak Goldman & Tsevi Mazeh.* 429, 362, 148-E7 (1994)

10 Micron Detection of the Hard X-Ray Transient GRO J0422+32: Free-Free Emission from an X-Ray–driven Accretion Disk Wind? *J. van Paradijs, C. M. Telesco, C. Kouveliotou, & G. J. Fishman.* 429, L19, 150-C10 (1994)

ROSAT Observations of the Black Hole Candidate V404 Cygni in Quiescence. *R. Mark Wagner, S. G. Starrfield, R. M. Hjellming, S. B. Howell, & T. J. Kreidl.* 429, L25, 150-D3 (1994)

Cataclysmic Binaries in Star Clusters. I. A Search for Erupting Dwarf Novae in the Globular Cluster M92. *Michael M. Shara, Louis E. Bergeron, & Anthony F. J. Moffat.* 429, 767, 155-C1 (1994)

The Mass of the Companion of PSR 1718−19. *L. Burderi & A. R. King.* 430, L57, 166-A4 (1994)

Ionization Nebulae Surrounding Supersoft X-Ray Sources. *S. Rappaport, E. Chiang, T. Kallman, & R. Malina.* 431, 237, 179-B1 (1994)

Double Core Evolution. VI. Effects of Gravitational Torques. *Ronald E. Taam, Peter Bodenheimer, & Michał Różyczka.* 431, 247, 179-B13 (1994)

Gravitational Radiation from Pairs of Realistic, Nonaccreting Compact Stars. *N. K. Spyrou & K. D. Kokkotas.* 431, 254, 179-C8 (1994)

Helium-accreting Degenerate Dwarfs as Presupernovae and Scenarios for the Ultrasoft X-Ray Sources. *Icko Iben, Jr., & A. V. Tutukov.* 431, 264, 179-D6 (1994)

Emission Lines from X-Ray–heated Accretion Disks in Low-Mass X-Ray Binaries. *Yuan-Kuen Ko & Timothy R. Kallman.* 431, 273, 179-E4 (1994)

Oscillations of Red Dwarfs in Evolved Low-Mass Binaries with Neutron Stars. *Marek J. Sarna, Umin Lee, & Alexander G. Muslimov.* 431, 302, 179-G8 (1994)

The Photometric Period of V1974 Cygni (Nova Cygni 1992). *James A. DeYoung & Richard E. Schmidt.* 431, L47, 183-A3 (1994)

Merging Neutron Stars. I. Initial Results for Coalescence of Noncorotating Systems. *M. B. Davies, W. Benz, T. Piran, & F. K. Thielemann.* 431, 742, 187-G1 (1994)

Spectral Variations in the Low-Mass X-Ray Binary 4U 0614+09. *K. P. Singh & K. M. V. Apparao.* 431, 826, 189-A1 (1994)

An Atlas of Doppler Emission-Line Tomography of Cataclysmic Variable Stars. *Ronald H. Kaitchuck, Eric M. Schlegel, R. Kent Honeycutt, Keith Horne, T. R. Marsh, J. C. White II, & Cathy S. Mansperger.* 93, 519, 49-G3 (1994)

Impact-driven Eccentricity in Accretion Disks. *Stephen H. Lubow.* 432, 224, 196-A6 (1994)

Orbital Elements of PSR B1620−26. *F. Curtis Michel.* 432, 239, 196-B11 (1994)

Hydrodynamics of Binary Coalescence. I. Polytropes with Stiff Equations of State. *Frederic A. Rasio & Stuart L. Shapiro.* 432, 242, 196-C2 (1994)

Stellar Occultation of Polarized Light from Circumstellar Electrons. IV. Detached Binary Systems. *G. K. Fox.* 432, 262, 196-D10 (1994)

Accretion Rates in X-Ray Bursting Sources. *Iosif Lapidus, Luciano Nobili, & Roberto Turolla.* 433, 287, 211-G11 (1994)

Discovery of a New White Dwarf in a Binary System (EUVE 0720−317) in the *Extreme Ultraviolet Explorer* Survey and Implications for the Late Stages of Stellar Evolution. *Stéphane Vennes & John R. Thorstensen.* 433, L29, 214-G13 (1994)

Orbital Evolution of a Massive Black Hole Pair by Dynamical Friction. *Alberto Vecchio, Monica Colpi, & Alexander G. Polnarev.* 433, 733, 220-B13 (1994)

The Thermal Relaxation Oscillation States of Contact Binaries. *Jian-Min Wang.* 434, 277, 229-C4 (1994)

Episodic Mass Transfer in Binaries with X-Ray Heating. *A. Harpaz & S. Rappaport.* 434, 283, 229-C13 (1994)

Searches for Millisecond Pulsations in Low-Mass X-Ray Binaries. II. *B. A. Vaughan, M. van der Klis, K. S. Wood, J. P. Norris, P. Hertz, P. F. Michelson, J. van Paradijs, W. H. G. Lewin, K. Mitsuda, & W. Penninx.* 435, 362, 248-D1 (1994)

Normalized Power Spectral Densities of Two X-Ray Components from GS 1124−683. *Sigenori Miyamoto, Shunji Kitamoto, Sayuri Iga, Kiyoshi Hayashida, & Kentaro Terada.* 435, 398, 248-G10 (1994)

X-Ray Emission of the Pulsar–Be Star Binary PSR 1259−63. *Andrew King & Lynn Cominsky.* 435, 411, 249-B3 (1994)

Dripping Handrails and the Quasi-periodic Oscillations of the AM Herculis Objects. *Thomas Y. Steiman-Cameron, Karl Young, Jeffrey D. Scargle, James P. Crutchfield, James N. Imamura, Michael T. Wolff, & Kent S. Wood.* 435, 775, 256-F10 (1994)

The Shape of FK Comae Berenices: Evidence for a Recently Coalesced Binary. *Alan D. Welty & Lawrence W. Ramsey.* 435, 848, 257-F13 (1994)

Simulation of Interactions of an Orbiting Compact Star with an Accretion Disk by Smoothed Particle Hydrodynamics. *Diego Molteni, G. Gerardi, & Sandip K. Chakrabarti.* 436, 249, 264-F1 (1994)

On the Effects of Tidal Interaction on Thin Accretion Disks: An Analytic Study. *R. Dgani, M. Livio, & O. Regev.* 436, 270, 265-A6 (1994)

Resonantly Driven Nonlinear Density Waves in Protostellar Disks. *Chi Yuan & Pat Cassen.* 437, 338, 287-G6 (1994)

Hydrodynamics of Rotating Stars and Close Binary Interactions: Compressible Ellipsoid Models. *Dong Lai, Frederic A. Rasio, & Stuart L. Shapiro.* 437, 742, 295-G13 (1994)

Observations of the Small Magellanic Cloud by the *Vela 5B* X-Ray Monitor. *L. Whitlock & James C. Lochner.* 437, 841, 297-B7 (1994)

Theoretical Light Curves for the Type Ic Supernova SN 1994I. *Kohichi Iwamoto, Ken'ichi Nomoto, Peter Höflich, Hitoshi Yamaoka, Shiomi Kumagai, & Toshikazu Shigeyama.* 437, L115, 299-C8 (1994)

Hydrodynamics of Binary Coalescence. II. Polytropes with $\Gamma = 5/3$. *Frederic A. Rasio & Stuart L. Shapiro.* 438, 887, 16-D1 (1995)

The Soft X-Ray Turnoff of Nova Muscae 1983. *L. Shanley, H. Ögelman, J. S. Gallagher, M. Orio, & J. Krautter.* 438, L95, 20-A8 (1995)

Doppler Tomography of the Gas Stream in Short-Period Algol Binaries. *Mercedes T. Richards, Geary E. Albright, & Larissa M. Bowles.* 438, L103, 20-B8 (1995)

Tremendous Outburst Amplitude Dwarf Novae. *Steve B. Howell, Paula Szkody, & John K. Cannizzo.* 439, 337, 25-G3 (1995)

RY Scuti: Infrared and Radio Observations of the Mass-Loss Wind of a Massive Binary Star System. *R. D. Gehrz, T. L. Hayward, J. R. Houck, J. W. Miles, R. M. Hjellming, T. J. Jones, Charles E. Woodward, Ricarda Prentice, W. J. Forrest, S. Libonate, & S. Solomon.* 439, 417, 26-G11 (1995)

The Orbital Light Curve of PSR 1957+20. *Paul J. Callanan, Jan van Paradijs, & Roeland Rengelink.* 439, 928, 37-D4 (1995)

Four New Millisecond Pulsars in the Galactic Disk. *D. R. Lorimer, L. Nicastro, A. G. Lyne, M. Bailes, R. N. Manchester, S. Johnston, J. F. Bell, N. D'Amico, & P. A. Harrison.* 439, 933, 37-D13 (1995)

Neutron Star Accretion and Binary Pulsar Formation. *G. E. Brown.* 440, 270, 44-G12 (1995)

High-Mass X-Ray Binary Populations. I. Galactic Modeling. *William W. Dalton & Craig L. Sarazin.* 440, 280, 45-A11 (1995)

ORFEUS Observations of AM Herculis. *John C. Raymond, Christopher W. Mauche, Stuart Bowyer, & Mark Hurwitz.* 440, 331, 45-F7 (1995)

Composite Spectra in Young Stars: Accretion or Close Companions? *Chris D. Koresko.* 440, 764, 53-F1 (1995)

Hα Profiles of 25 Chromospherically Active Binaries. *Zeki Eker, Douglas S. Hall, & Christopher M. Anderson.* 96, 581, 9-F9 (1995)

PSR J2019+2425 and PSR J2322+2057 and the Proper Motions of Millisecond Pulsars. *D. J. Nice & J. H. Taylor.* 441, 429, 65-C7 (1995)

X-Ray Emission from the PSR B1259−63 System near Apastron. *J. Greiner, M. Tavani, & T. Belloni.* 441, L43, 67-B9 (1995)

Cataclysmic and Close Binaries in Star Clusters. II. Probing the Core of NGC 6752 with *Hubble Space Telescope*. *Michael M. Shara, Laurent Drissen, Louis E. Bergeron, & Francesco Paresce.* 441, 617, 70-E10 (1995)

On the Nature of the Binary Radio Pulsar PSR B0042−73 in the Small Magellanic Cloud. *V. M. Lipunov, K. A. Postnov, & M. E. Prokhorov.* 441, 776, 72-F1 (1995)

Accretion Disk Boundary Layers in Cataclysmic Variables. I. Optically Thick Boundary Layers. *Robert Popham & Ramesh Narayan.* 442, 337, 81-F10 (1995)

The Dim Inner Accretion Disk of the Quiescent Black Hole A0620−00. *Jeffrey E. McClintock, Keith Horne, & Ronald A. Remillard.* 442, 358, 82-A6 (1995)

The Transition Regions of Capella. *Jeffrey L. Linsky, Brian E. Wood, Philip Judge, Alexander Brown, Catherine Andrulis, & Thomas R. Ayres.* 442, 381, 82-C9 (1995)

Large Hysteretic Behavior of Stellar Black Hole Candidate X-Ray Binaries. *Sigenori Miyamoto, Shunji Kitamoto, Kiyoshi Hayashida, & Wataru Egoshi.* 442, L13, 84-F1 (1995)

Discovery of a Transient MeV Range Gamma-Ray Source. *M. S. Briggs, D. E. Gruber, J. L. Matteson, & L. E. Peterson.* 442, 638, 88-F9 (1995)

A Reanalysis of the SWP-HI *IUE* Observations of Capella. *Brian E. Wood & Thomas R. Ayres.* 443, 329, 99-F7 (1995)

Hydrodynamics of Coalescing Binary Neutron Stars: Ellipsoidal Treatment. *Dong Lai & Stuart L. Shapiro.* 443, 705, 107-E12 (1995)

The Spectrum and Pulses of 1E 2259+586 from *ASCA* and BBXRT Observations. *R. H. D. Corbet, A. P. Smale, M. Ozaki, K. Koyama, & K. Iwasawa.* 443, 786, 108-F3 (1995)

Starspot Evolution, Differential Rotation, and Magnetic Cycles in the Chromospherically Active Binaries λ Andromedae, σ Geminorum, II Pegasi, and V711 Tauri. *Gregory W. Henry, Joel A. Eaton, Jamesia Hamer, & Douglas S. Hall.* 97, 513, 19-C6 (1995)

On Orbital Circularization in Late-Type Close Binaries. *Jean-Louis Tassoul.* 444, 338, 118-B8 (1995)

Mass Transfer Cycles in Cataclysmic Variables. *A. R. King, J. Frank, U. Kolb, & H. Ritter.* 444, L37, 121-F7 (1995)

The Minimum Mass Ratio of W Ursae Majoris Binaries. *Frederic A. Rasio.* 444, L41, 121-G1 (1995)

Detection of Shocked Molecular Hydrogen in Infrared Companions to T Tauri Stars: Evidence for Ongoing Accretion. *T. M. Herbst, C. D. Koresko, & Christoph Leinert.* 444, L93, 130-F13 (1995)

Detection of a Very Low Mass Companion to the Astrometric Binary Gliese 105A. *D. A. Golimowski, T. Nakajima, S. R. Kulkarni, & B. R. Oppenheimer.* 444, L101, 131-A1 (1995)

Double Core Evolution. VII. The Infall of a Neutron Star through the Envelope of Its Massive Star Companion. *James L. Terman, Ronald E. Taam, & Lars Hernquist.* 445, 367, 137-E9 (1995)

Gradual Approach to Coalescence for Compact Stars Orbiting Massive Black Holes. *Dieter Hils & Peter L. Bender.* 445, L7, 140-B10 (1995)

An Extended Grid of Multicycle Nova Evolution Models. *Dina Prialnik & Attay Kovetz.* 445, 789, 146-B3 (1995)

Extreme Ultraviolet Light Curves of UZ Fornacis: Evidence for Accretion Stream Absorption and Vertical Extent of the Accretion Spot. *John K. Warren, Martin M. Sirk, & John V. Vallerga.* 445, 909, 147-F13 (1995)

Extreme Ultraviolet Spectroscopy and Photometry of VV Puppis during a High Accretion State. *Stéphane Vennes, Paula Szkody, Edward M. Sion, & Knox S. Long.* 445, 921, 148-A1 (1995)

The Unusual Helium Variable AM Canum Venaticorum. *J. L. Provencal, D. E. Winget, R. E. Nather, E. L. Robinson, J.-E. Solheim, J. C. Clemens, P. A. Bradley, S. J. Kleinman, A. Kanaan, C. F. Claver, C. J. Hansen, T. M. K. Marar, S. Seetha, B. N. Ashoka, E. M. Leibowitz, E. G. Meištas, A. Bruvold, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, A. E. Sansom, R. W. Tweedy, G. Fontaine, P. Bergeron, S. O. Kepler, M. A. Wood, & A. D. Grauer.* 445, 927, 148-A11 (1995)

The Orbital Eccentricities of Binary Millisecond Pulsars in Globular Clusters. *Frederic A. Rasio & Douglas C. Heggie.* 445, L133, 151-E9 (1995)

W Ursae Majoris–Type Systems Discovered in the Central Baade's Window in the OGLE Experiment. *Slavek M. Rucinski.* 446, L19, 160-D6 (1995)

Sudden Luminous Blue Variable–Like Behavior of the Wolf-Rayet Binary System HD 5980 in the Small Magellanic Cloud. *Rodolfo H. Barbá, Virpi S. Niemela, Gustavo Baume, & R. A. Vazquez.* 446, L23, 160-D13 (1995)

The Galactic Distribution of Low-Mass X-Ray Binaries. *J. van Paradijs & N. White.* 447, L33, 181-A3 (1995)

VLBI Observations of Cygnus X-3 during the 1985 October Radio Outburst. *C. J. Schalinski, K. J. Johnston, A. Witzel, R. E. Spencer, R. Fiedler, E. Waltman, G. G. Pooley, R. Hjellming, & L. A. Molnar.* 447, 752, 186-D1 (1995)

Type Ia Supernova Scenarios and the Hubble Sequence. *P. Ruiz-Lapuente, A. Burkert, & R. Canal.* 447, L69, 190-C1 (1995)

Discrete Mass Loss in a Low-Mass Binary with a Rapidly Spinning Neutron Star. *Alexander Muslimov & Marek J. Sarna.* 448, 289, 196-B12 (1995)

Binary Models for the Solar Neighborhood and Magellanic Cloud W-R Populations. *William W. Dalton & Craig L. Sarazin.* 448, 369, 197-C6 (1995)

Taking the Pulse of DQ Herculis. *Phillip J. Martell, Keith Horne, Christopher M. Price, & Richard H. Gomer.* 448, 380, 197-D6 (1995)

ROSAT All-Sky Survey Observations of the Hyades Cluster. *Robert A. Stern, Jürgen H. M. M. Schmitt, & Peter T. Kahabka.* 448, 683, 204-B12 (1995)

Numerical Techniques for Three-dimensional Smoothed Particle Hydrodynamics Simulations: Applications to Accretion Disks. *James C. Simpson.* 448, 822, 206-C1 (1995)

Tidal Excitation of Modes in Binary Systems with Applications to Binary Pulsars. *Pawan Kumar, Chi On Ao, & Eliot J. Quataert.* 449, 294, 214-B10 (1995)

Phase-resolved *IUE* and Optical Observations of the Polar BY Camelopardalis. *D. B. Zucker, J. C. Raymond, A. Silber, P. Mason, S. Curiel, S. Vrtilek, & E. Schlegel.* 449, 310, 214-D1 (1995)

Neon Line Emission in the X-Ray Spectrum of the Pulsar 4U 1626−67. *L. Angelini, N. E. White, F. Nagase, T. R. Kallman, A. Yoshida, T. Takeshima, C. Becker, & F. Paerels.* 449, L41, 216-F3 (1995)

ROSAT Observation of the Old Classical Nova CP Puppis. *Şölen Balman, Marina Orio, & Hakki Ögelman.* 449, L47, 216-F11 (1995)

The Type Ic Supernova 1994I in M51: Detection of Helium and Spectral Evolution. *Alexei V. Filippenko, Aaron J. Barth, Thomas Matheson, Lee Armus, Michael Brown, Brian R. Espey, Xiao-Ming Fan, Robert W. Goodrich, Luis C. Ho, Vesa T. Junkkarinen, David C. Koo, Matthew D. Lehnert, André R. Martel, Joseph M. Mazzarella, Joseph S. Miller, Graeme H. Smith, David Tytler, & Gregory D. Wirth.* 450, L11, 235-E3 (1995)

Luminous Supersoft X-Ray Sources and the Planetary Nebula Luminosity Function. *R. Di Stefano, F. Paerels, & S. Rappaport.* 450, 705, 240-D10 (1995)

The Role of Chaos in the Circularization of Tidal Capture Binaries. I. The Chaos Boundary. *Rosemary A. Mardling.* 450, 722, 240-F7 (1995)

The Role of Chaos in the Circularization of Tidal Capture Binaries. II. Long-Time Evolution. *Rosemary A. Mardling.* 450, 732, 240-G6 (1995)

Burstlike Events in the Z Source Cygnus X-2. *E. Kuulkers, M. van der Klis, & J. van Paradijs.* 450, 748, 241-A11 (1995)

Double Core Evolution. VIII. The Spiral-in of a Main-Sequence Star through the Envelope of an Asymptotic Giant Branch Companion. *Harold W. Yorke, Peter Bodenheimer, & Ronald E. Taam.* 451, 308, 250-B8 (1995)

A Model of the Galactic X-Ray Binary Population. I. High-Mass X-Ray Binaries. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 100, 217, 49-B1 (1995)

The Evolution of Accretion Disks with Coronae: A Model for the Low-Frequency Quasi-periodic Oscillations in X-Ray Binaries. *Marek A. Abramowicz, Xingming Chen, & Ronald E. Taam.* 452, 379, 267-C11 (1995)

Spin-Orbit Interactions in Neutron Star/Main-Sequence Binaries and Implications for Pulsar Timing. *Dong Lai, Lars Bildsten, & Victoria M. Kaspi.* 452, 819, 276-A1 (1995)

Hubble Space Telescope Observations of the Very Low Mass Companion to Gliese 105A. *David A. Golimowski, William G. Fastie, Daniel J. Schroeder, & Alan Uomoto.* 452, L125, 280-C1 (1995)

Periodic Outbursts from the Ultrasoft X-Ray Transient 4U 1630−47. *A. N. Parmar, L. Angelini, & N. E. White.* 452, L129, 280-C10 (1995)

Spin-down of Neutron Stars in Massive Radio Pulsar Binaries: The Periastron Passage of PSR B1259−63. *Pranab Ghosh.* 453, 411, 286-F13 (1995)

A Millisecond Pulsar in a 6 Hour Orbit: PSR J0751+1807. *S. C. Lundgren, A. F. Zepka, & J. M. Cordes.* 453, 419, 286-G10 (1995)

Properties of the Exceptionally Long-Period AM Herculis System RX J0515.41+0104.6. *J. Frank, J.-P. Lasota, & G. Chanmugam.* 453, 446, 287-C1 (1995)

Two X-Ray Sources in 30 Doradus: Wolf-Rayet + Black Hole Binaries? *Q. Daniel Wang.* 453, 783, 294-F9 (1995)

Lithium in Short-Period Tidally Locked Binaries: A Test of Rotationally Induced Mixing. *Sean G. Ryan & Constantine P. Deliyannis.* 453, 819, 295-B12 (1995)

New Features of the X-Ray Dip Source 1755−338. *Kwang-Il Seon, Kyoung-Wook Min, Kenji Yoshida, Fumiyoshi Makino, Michiel van der Klis, Jan van Paradijs, & Walter H. G. Lewin.* 454, 463, 305-F3 (1995)

Hopkins Ultraviolet Telescope Observations of U Geminorum Far from Outburst. *Knox S. Long, William P. Blair, & John C. Raymond.* 454, L39, 308-A8 (1995)

Evolution of the Double Neutron Star Merging Rate and the Cosmological Origin of Gamma-Ray Burst Sources. *V. M. Lipunov, K. A. Postnov, M. E. Prokhorov, I. E. Panchenko, & H. E. Jørgensen.* 454, 593, 309-F3 (1995)

Radiation Hydrodynamic Models of Eclipsing Low-Mass X-Ray Binaries. *Stephen D. Murray, D. Tod Woods, John I. Castor, Richard I. Klein, & Christopher F. McKee.* 454, L133, 316-D2 (1995)

A Spin-down Variation in the 6 Second X-Ray Pulsar 1E 1048.1−5937. *Sandro Mereghetti.* 455, 598, 330-B6 (1995)

The Iron L/K Emission-Line Ratio in Photoionized Gases. *T. R. Kallman.* 455, 603, 330-C1 (1995)

The Mass of the Probable Black Hole in the X-Ray Nova GRO J0422+32. *Alexei V. Filippenko, Thomas Matheson, & Luis C. Ho.* 455, 614, 330-D1 (1995)

A Black Hole in the X-Ray Nova GS 2000+25. *Alexei V. Filippenko, Thomas Matheson, & Aaron J. Barth.* 455, L139, 334-A4 (1995)

STARS: BINARIES: ECLIPSING

The Continuum Eclipse of PSR 1957+20. *A. S. Fruchter & W. M. Goss.* 384, L47, 11-C9 (1992)

Eclipse Studies of the Dwarf Nova HT Cassiopeiae. II. White Dwarf and Accretion Disk. *Janet H. Wood, Keith Horne, & Stephane Vennes.* 385, 294, 15-E6 (1992)

A Mechanism for Orbital Period Modulation in Close Binaries. *James H. Applegate.* 385, 621, 20-G4 (1992)

The Presence of an Accretion Disk in the Eclipsing Binary System Nova Herculis 1991 Three Weeks after Outburst. *Elia M. Leibowitz, Haim Mendelson, Ezra Mashal, Dina Prialnik, & Waltraut C. Seitter.* 385, L49, 23-D1 (1992)

Consequences of the Star-Stream Interaction in Algol. *Mercedes T. Richards.* 387, 329, 41-A12 (1992)

Properties of the Massive X-Ray Binary 4U 1700−37 = HD 153919. *S. R. Heap & M. F. Corcoran.* 387, 340, 41-B11 (1992)

PSR 1259−63: A Binary Radio Pulsar with a Be Star Companion. *Simon Johnston, R. N. Manchester, A. G. Lyne, M. Bailes, V. M. Kaspi, Qiao Guojun, & N. D'Amico.* 387, L37, 43-E1 (1992)

Secondaries of Eclipsing Binaries. VII. The Spectroscopic Triple and Visual Double V505 Sagittarii. *Jocelyn Tomkin.* 387, 631, 46-E1 (1992)

Orbital Angular Momentum Loss in PSR 1957+20. *Menashe Banit & Jacob Shaham.* 388, L19, 52-B11 (1992)

The Eclipsing Binary Al Phoenicis: New Results Based on an Improved Light Curve Analysis Program. *E. F. Milone, C. R. Stagg, & R. L. Kurucz.* 79, 123, 14-E11 (1992)

The GDDSYN Light Curve Synthesis Method. *Paul D. Hendry & Stefan W. Mochnacki.* 388, 603, 57-F7 (1992)

Modeling of the Eclipsing Binaries in the Globular Cluster NGC 5466. *J. Kallrath, E. F. Milone, & C. R. Stagg.* 389, 590, 68-G1 (1992)

X-Ray Scattering and Fluorescence in the Wind of a Massive X-Ray Binary. *W. Lewis, S. Rappaport, A. Levine, & F. Nagase.* 389, 665, 69-F3 (1992)

Eclipse Maps of the Accretion Disk in the Classical Nova V Persei. *Janet H. Wood, Timothy M. C. Abbott, & Allen W. Shafter.* 393, 729, 124-G10 (1992)

Ginga Observations of Centaurus X-3. *F. Nagase, R. H. D. Corbet, C. S. R. Day, H. Inoue, T. Takeshima, K. Yoshida, & T. Mihara.* 396, 147, 157-A3 (1992)

Pulsar PSR 1744−24A: Timing, Eclipses, and the Evolution of Neutron Star Binaries. *D. J. Nice & S. E. Thorsett.* 397, 249, 171-A12 (1992)

Ginga Observations of X-Ray Flares on Algol. *R. A. Stern, Y. Uchida, S. Tsuneta, & F. Nagase.* 400, 321, 212-G13 (1992)

Ginga Observations of the Dipping Low-Mass X-Ray Binaries XB 1916−053 and EXO 0748−676. *Alan P. Smale, Koji Mukai, O. Rees Williams, Mark H. Jones, & Robin H. D. Corbet.* 400, 330, 213-A10 (1992)

Spectroscopy of the Companion and Bow-Shock Nebula of PSR 1957+20. *Thomas L. Aldcroft, Roger W. Romani, & James M. Cordes.* 400, 638, 218-C13 (1992)

The Infrared Counterpart of the Eclipsing X-Ray Binary H0253+193. *B. Zuckerman, E. E. Becklin, I. S. McLean, & Joseph Patterson.* 400, 665, 218-F7 (1992)

AE Aquarii: An Emitter of Pulsed TeV Gamma Rays Resembling Optical Emission during Flares. *P. J. Meintjes, B. C. Raubenheimer, O. C. de Jager, C. Brink, H. I. Nel, A. R. North, G. van Urk, & B. Visser.* 401, 325, 225-A11 (1992)

High-Energy Emission from the Eclipsing Millisecond Pulsar PSR 1957+20. *Jonathan Arons & Marco Tavani.* 403, 249, 17-A8 (1993)

Discovery of the Orbit of the X-Ray Pulsar OAO 1657−415. *Deepto Chakrabarty, John M. Grunsfeld, Thomas A. Prince, Lars Bildsten, Mark H. Finger, Robert B. Wilson, Gerald J. Fishman, Charles A. Meegan, & William S. Paciesas.* 403, L33, 20-D6 (1993)

A Spectroscopic Study of DV Ursae Majoris (US 943), AY Piscium (PG 0134+070), and V503 Cygni. *Paula Szkody & Steve B. Howell.* 403, 743, 25-A6 (1993)

On the Chromospheric Structure of ζ Aurigae. *Joel A. Eaton.* 404, 305, 31-F1 (1993)

Main-Sequence G and K Stellar Masses. *Daniel M. Popper.* 404, L67, 40-E6 (1993)

A Spectroscopic Study of the Short-Period Eclipsing Wolf-Rayet Binary CX Cephei (WN5+O5 V). *David Lewis, Anthony F. J. Moffat, Jaymie M. Matthews, Carmelle Robert, & Sergey V. Marchenko.* 405, 312, 45-A11 (1993)

Spectroscopic Observations of the Detached Binary PG 1413+015. *Michael S. Fulbright, James Liebert, P. Bergeron, & Richard Green.* 406, 240, 58-A11 (1993)

Nonlinear Plasma Mechanisms of Pulsar Eclipse in Binary Systems. *M. Gedalin & D. Eichler.* 406, 629, 65-F4 (1993)

Some Implications of PSR 1259−63. *Christopher S. Kochanek.* 406, 638, 65-G1 (1993)

Analysis of Contact Binary Systems: AA Ursae Majoris, V752 Centauri, AO Camelopardalis, and V677 Centauri. *F. Barone, L. Di Fiore, L. Milano, & G. Russo.* 407, 237, 72-A9 (1993)

The Discovery of Pulsed Iron Line Emission from Centaurus X-3. *C. S. R. Day, F. Nagase, K. Asai, & T. Takeshima.* 408, 656, 93-D1 (1993)

Circumstellar Material in Algol: A Study of the Balmer Line Profiles. *Mercedes T. Richards.* 86, 255, 17-D3 (1993)

Polarization Eclipse Model of the Wolf-Rayet Binary V444 Cygni with Constraints on the Stellar Radii and an Estimate of the Wolf-Rayet Mass-Loss Rate. *N. St-Louis, A. F. J. Moffat, L. Lapointe, Yu. S. Efimov, N. M. Shakhovskoy, G. K. Fox, & V. Piirola.* 410, 342, 116-C10 (1993)

Hubble Space Telescope Spectra of the Phase-modulated Wind in the SMC O+WR Binary R31. *J. B. Hutchings, L. Bianchi, & S. C. Morris.* 410, 803, 123-F10 (1993)

VLBI Astrometric Identification of the Radio-emitting Region in Algol and Determination of the Orientation of the Close Binary. *Jean-François Lestrade, Robert B. Phillips, Mark W. Hodges, & Robert A. Preston.* 410, 808, 123-G1 (1993)

The Optical Light Curve of Nova Herculis 1991 and of Other Classical Novae. *Elia M. Leibowitz.* 411, L29, 134-A1 (1993)

Hidden Slow Pulsars in Binaries. *Marco Tavani & Leigh Brookshaw.* 413, L39, 162-F3 (1993)

Quantitative Modeling and Impersonal Fitting of Algol Polarization Curves. *R. E. Wilson & Jer-Chyi Liou.* 413, 670, 164-G1 (1993)

A Study of the Spatial and Spectral Characteristics of the Corona of AR Lacertae. *R. Ottmann, J. H. M. M. Schmitt, & M. Kürster.* 413, 710, 165-C6 (1993)

Circumstellar Material in TX Ursae Majoris. *Geary E. Albright & Mercedes T. Richards.* 414, 830, 181-E6 (1993)

Ultraviolet Observations of Selective Wind Eclipses in γ Velorum and Evidence for Colliding Winds. *N. St-Louis, A. J. Willis, & I. R. Stevens.* 415, 298, 188-F8 (1993)

Evidence of Magnetic Activity in Short-Period Algol Binaries. *Mercedes T. Richards & Geary E. Albright.* 88, 199, 42-G7 (1993)

Accurate Period Determination of an Eclipsing Binary X-Ray Source in M33. *Eric Schulman, Joel N. Bregman, Alfonso Collura, Fabio Reale, & Giovanni Peres.* 418, L67, 245-C6 (1993)

The Masses of V838 Herculis (Nova Herculis 1991) and QZ Aurigae. *Paula Szkody & Doug Ingram.* 420, 830, 13-C3 (1994)

Two Very Luminous Variable X-Ray Sources in M82. *A. Collura, Fabio Reale, Eric Schulman, & Joel N. Bregman.* 420, L63, 15-C6 (1994)

Long-Term Starspot Activity of Short-Period RS Canum Venaticorum Stars. V. CG Cygni. *M. Zeilik, S. Gordon, E. Jaderlund, M. Ledlow, D. L. Summers, P. A. Heckert, E. Budding, & T. S. Banks.* 421, 303, 19-F8 (1994)

Analysis of the *IUE* Satellite and the Ground-based Observations of SW Lacertae. *Jang Hae Jeong, Yong Woon Kang, Woo Baik Lee, & Eon Chang Sung.* 421, 779, 27-G13 (1994)

Ultraviolet Light Curves of β Lyrae: Comparison of *OAO* A-2, *IUE*, and *Voyager* Observations. *Yoji Kondo, George E. McCluskey, Jeffrey M. S. Silvis, Ronald S. Polidan, Carolina P. S. McCluskey, & Joel A. Eaton.* 421, 787, 28-A9 (1994)

Physical Processes in Eclipsing Pulsars: Eclipse Mechanisms and Diagnostics. *C. Thompson, R. D. Blandford, Charles R. Evans, & E. S. Phinney.* 422, 304, 33-G10 (1994)

Properties of a B0 I Stellar Wind and Interstellar Grains Derived from *Ginga* Observations of the Binary X-Ray Pulsar 4U 1538−52. *George W. Clark, Jonathan W. Woo, & Fumiaki Nagase.* 422, 336, 34-C3 (1994)

An X-Ray Spectroscopic Study of the Pre-Eclipse Dips of Hercules X-1. *C. S. Choi, F. Nagase, F. Makino, T. Dotani, & K. W. Min.* 422, 799, 41-G5 (1994)

The Wolf-Rayet Binary V444 Cygni under the Spectroscopic Microscope. I. Improved Characteristics of the Components and Their Interaction Seen in He I. *Sergey V. Marchenko, Anthony F. J. Moffat, & Gloria Koenigsberger.* 422, 810, 42-A5 (1994)

Optical, *IUE*, and *ROSAT* Observations of the Eclipsing Nova-like Variable V347 Puppis (LB 1800). *Christopher W. Mauche, John C. Raymond, David A. H. Buckley, Martine Mouchet, Jerry Bonnell, Denis J. Sullivan, Jean-Marc Bonnet-Bidaud, & Wolfram H. Bunk.* 424, 347, 66-B12 (1994)

1H 1752+081: An Eclipsing Cataclysmic Variable with a Small Accretion Disk. *Andrew D. Silber, Ronald A. Remillard, Keith Horne, & Hale V. Bradt.* 424, 955, 76-F3 (1994)

A Broad Observational Study of the Eclipsing Magnetic Cataclysmic Variable RE 2107−05. *Jason Glenn, Steve B. Howell, Gary D. Schmidt, James Liebert, Albert D. Grauer, & R. Mark Wagner.* 424, 967, 76-G3 (1994)

HST Eclipse Mapping of Dwarf Nova OY Carinae in Quiescence: An "Fe II Curtain" with Mach $\simeq$ 6 Velocity Dispersion Veils the White Dwarf. *Keith Horne, T. R. Marsh, F. H. Cheng, Ivan Hubeny, & Thierry Lanz.* 426, 294, 99-G1 (1994)

Orbital Variability in the Eclipsing Pulsar Binary PSR B1957+20. *Z. Arzoumanian, A. S. Fruchter, & J. H. Taylor.* 426, L85, 109-E6 (1994)

Evidence of Circumstellar Matter Surrounding the Hercules X-1 System. *C. S. Choi, T. Dotani, F. Nagase, F. Makino, J. E. Deeter, & K. W. Min.* 427, 400, 114-G5 (1994)

TeV Gamma-Ray Properties of Vela X-1. *B. C. Raubenheimer, A. R. North, O. C. de Jager, P. J. Meintjes, & H. I. Nel.* 428, 777, 140-A1 (1994)

Light Curves of Close Binaries in TeV Energy Region. *I. V. Moskalenko & S. Karakula.* 92, 567, 39-D3 (1994)

Eclipse Mapping of the Accreting Magnetic White Dwarf in DP Leonis with *HST*. *H. S. Stockman, Gary D. Schmidt, James Liebert, & J. B. Holberg.* 430, 323, 163-B11 (1994)

The Mass of the Companion of PSR 1718−19. *L. Burderi & A. R. King.* 430, L57, 166-A4 (1994)

Multicolor Eclipse Studies of UU Aquarii. I. Observations and System Parameters. *R. Baptista, J. E. Steiner, & D. Cieslinski.* 433, 332, 212-D8 (1994)

A Spectrum Synthesis Program for Binary Stars. *Albert P. Linnell & Ivan Hubeny.* 434, 738, 238-A4 (1994)

The Spectacular Emission-Line Reflection Effect of BE Ursae Majoris. *Donald H. Ferguson & Thomas A. James.* 94, 723, 62-A1 (1994)

X-Ray Emission from 4U 2129+47 (=V1727 Cygni) in Quiescence. *Michael R. Garcia.* 435, 407, 249-A9 (1994)

RJ 051542+0104.7: A New Magnetic, Eclipsing, Cataclysmic Variable. *Peter M. Garnavich, Paula Szkody, Russell M. Robb, David R. Zurek, & D. W. Hoard.* 435, L141, 260-C11 (1994)

Orbital Period Variability in the Eclipsing Pulsar Binary PSR B1957+20: Evidence for a Tidally Powered Star. *James H. Applegate & Jacob Shaham.* 436, 312, 265-E8 (1994)

Ultraviolet Spectra of HZ Herculis/Hercules X-1 from *HST*: Hot Gas during Total Eclipse of the Neutron Star. *Scott F. Anderson, Stefanie Wachter, Bruce Margon, Ronald A. Downes, William P. Blair, & Jules P. Halpern.* 436, 319, 265-F5 (1994)

Line-dominated Eclipse Spectrum of Vela X-1. *Fumiaki Nagase, Gregory Zylstra, Takashi Sonobe, Taro Kotani, Hajime Inoue, & Jonathan Woo.* 436, L1, 268-C1 (1994)

ASCA Measurements of the Grain-scattered X-Ray Halos of Eclipsing Massive X-Ray Binaries: Vela X-1 and Centaurus X-3. *Jonathan W. Woo, George W. Clark, Charles S. R. Day, Fumiaki Nagase, & Toshiaki Takeshima.* 436, L5, 268-C9 (1994)

Is the Changing Orbital Period of EXO 0748−676 Evidence for a Triple System? *R. H. D. Corbet, K. Asai, T. Dotani, & F. Nagase.* 436, L15, 268-D13 (1994)

An *ASCA* Observation of the Castor System. *Eric V. Gotthelf, Lalit Jalota, Koji Mukai, & Nicholas E. White.* 436, L91, 270-A5 (1994)

Line Profile Variations from Atmospheric Eclipses: Constraints on the Wind Structure in Wolf-Rayet Stars. *L. H. Auer & G. Koenigsberger.* 436, 859, 277-E5 (1994)

Studies of Binary Stars in the Magellanic Clouds. II. Spectroscopic Orbits of Four Massive Eclipsing Binaries. *Virpi S. Niemela & Lilia P. Bassino.* 437, 332, 287-F11 (1994)

Iron Line Intensity Variations of Hercules X-1 over the Pulse Phase and the 35 Day Cycle. *C. S. Choi, F. Nagase, F. Makino, T. Dotani, S. Kitamoto, & S. Takahama.* 437, 449, 289-C6 (1994)

Eclipse Timings of the Low-Mass X-Ray Binary EXO 0748−676: Statistical Arguments against Orbital Period Changes. *Paul Hertz, Kent S. Wood, & Lynn Cominsky.* 438, 385, 6-F13 (1995)

A Multicolor Eclipse Study of the Classical Nova QZ Aurigae (Nova Aurigae 1964). *R. D. Campbell & A. W. Shafter.* 440, 336, 45-G1 (1995)

The Transient Accretion Disk in the Algol-Type Binary U Sagittae. *Geary E. Albright & Mercedes T. Richards.* 441, 806, 73-B2 (1995)

Hubble Space Telescope Observations of the Dwarf Nova Z Chamaeleontis through Two Eruption Cycles. *E. L. Robinson, Janet H. Wood, R. C. Bless, J. C. Clemens, J. F. Dolan, J. L. Elliot, M. J. Nelson, J. W. Percival, M. J. Taylor, G. W. van Citters, & E. Zhang.* 443, 295, 99-C9 (1995)

RX J0515.6+0105: An Unusual, Eclipsing, Magnetic Cataclysmic Variable. *A. W. Shafter, K. Reinsch, K. Beuermann, K. A. Misselt, D. A. H. Buckley, V. Burwitz, & A. D. Schwope.* 443, 319, 99-E8 (1995)

HST Images of the Eclipsing Pulsar B1957+20. *Andrew S. Fruchter, Jay Bookbinder, & Charles D. Bailyn.* 443, L21, 102-D13 (1995)

EUVE Observations of Algol: Detection of a Continuum and Implications for the Coronal [Fe/H] Abundance. *Robert A. Stern, James R. Lemen, Jürgen H. M. M. Schmitt, & John P. Pye.* 444, L45, 121-G7 (1995)

A Study of Coronal X-Ray Emission from Short-Period Algol Binaries. *K. P. Singh, S. A. Drake, & N. E. White.* 445, 840, 146-F13 (1995)

Extreme Ultraviolet Light Curves of UZ Fornacis: Evidence for Accretion Stream Absorption and Vertical Extent of the Accretion Spot. *John K. Warren, Martin M. Sirk, & John V. Vallerga.* 445, 909, 147-F13 (1995)

Hydrodynamic Simulations of the Mass Transfer in Algol. *John M. Blondin, Mercedes T. Richards, & Michael L. Malinowski.* 445, 939, 148-B13 (1995)

Period Evolution of PSR B1259−63: Evidence for Propeller-Torque Spin-down. *R. N. Manchester, S. Johnston, A. G. Lyne, N. D'Amico, M. Bailes, & L. Nicastro.* 445, L137, 151-F1 (1995)

W Ursae Majoris–Type Systems Discovered in the Central Baade's Window in the OGLE Experiment. *Slavek M. Rucinski.* 446, L19, 160-D6 (1995)

Stellar Variability in the Central Populations of 47 Tucanae from WF/PC Observations with the *Hubble Space Telescope*. I. Project Overview, Reduction Techniques, and First Results. *Ronald L. Gilliland, Peter D. Edmonds, Larry Petro, Abhijit Saha, & Michael M. Shara.* 447, 191, 174-G5 (1995)

Goddard High-Resolution Spectrograph Observations of the Interacting Binary System W Serpentis. *J. L. Weiland, S. N. Shore, E. A. Beaver, R. W. Lyons, & E. I. Rosenblatt.* 447, 401, 177-G13 (1995)

Taking the Pulse of DQ Herculis. *Phillip J. Martell, Keith Horne, Christopher M. Price, & Richard H. Gomer.* 448, 380, 197-D6 (1995)

Hubble Space Telescope and *R*-Band Eclipse Maps of the UX Ursae Majoris Accretion Disk. *R. Baptista, Keith Horne, R. W. Hilditch, K. O. Mason, & J. E. Drew.* 448, 395, 197-E13 (1995)

QU Vulpeculae: An Eclipsing Neon Nova in the Period Gap. *A. W. Shafter, K. A. Misselt, P. Szkody, & M. Politano.* 448, L33, 199-F13 (1995)

ROSAT Observations of Scattered X-Rays from LMC X-4 in Its Low State. *Jonathan W. Woo, George W. Clark, & Alan M. Levine.* 449, 880, 224-G7 (1995)

Five Eclipses of Hercules X-1 Observed by *Ginga*. *D. A. Leahy.* 450, 339, 232-F1 (1995)

Wind-Wind Interaction in the Close Wolf-Rayet Binary CQ Cephei (WN6+O9 II–Ib). *S. V. Marchenko, A. F. J. Moffat, P. R. J. Eenens, G. M. Hill, & A. Grandchamps.* 450, 811, 241-G10 (1995)

CM Draconis and YY Geminorum: Agreement between Theory and Observation. *Gilles Chabrier & Isabelle Baraffe.* 451, L29, 252-E6 (1995)

Pulsar Eclipses due to Induced Scattering in Magnetized Plasmas. *Qinghuan Luo & D. B. Melrose.* 452, 346, 266-G11 (1995)

An Archival Study of *Hubble Space Telescope* Observations of Hercules X-1/HZ Herculis. *F. H. Cheng, S. D. Vrtilek, & John C. Raymond.* 452, 825, 276-A10 (1995)

Ultraviolet Observations of the Eruption in the Small Magellanic Cloud Wolf-Rayet System HD 5980. *Gloria Koenigsberger, Ed Guinan, Lawrence Auer, & Leonid Georgiev.* 452, L107, 279-G11 (1995)

X-Ray Detection of PSR B1259−63 at Periastron. *V. M. Kaspi, M. Tavani, F. Nagase, M. Hirayama, M. Hoshino, T. Aoki, N. Kawai, & J. Arons.* 453, 424, 287-A1 (1995)

The 71 Second Oscillation in the Light Curve of the Old Nova DQ Herculis. *E. Zhang, E. L. Robinson, R. F. Stiening, & Keith Horne.* 454, 447, 305-D12 (1995)

Radiation Hydrodynamic Models of Eclipsing Low-Mass X-Ray Binaries. *Stephen D. Murray, D. Tod Woods, John I. Castor, Richard I. Klein, & Christopher F. McKee.* 454, L133, 316-D2 (1995)

The Importance of Radiative Braking for the Wind Interaction in the Close WR+O Binary V444 Cygni. *S. P. Owocki & K. G. Gayley.* 454, L145, 316-E11 (1995)

A Study of the Chromospherically Active, Short-Period Binary VZ Piscium. *Bruce J. Hrivnak, Edward F. Guinan, & Wenxian Lu.* 455, 300, 322-C8 (1995)

STARS: BINARIES: GENERAL

A Magnitude-limited Survey of Cepheid Companions in the Ultraviolet. *Nancy Remage Evans.* 384, 220, 3-F4 (1992)

The Dynamical Evolution of Tidal Capture Binaries. *Christopher S. Kochanek.* 385, 604, 20-E13 (1992)

Excitation of Pressure Modes in Common Envelopes. *Noam Soker.* 386, 190, 26-E1 (1992)

The Frequencies of Supernovae in Binaries. *Alexander V. Tutukov, Lev R. Yungelson, & Icko Iben, Jr.* 386, 197, 26-E9 (1992)

Colliding Winds from Early-Type Stars in Binary Systems. *Ian R. Stevens, John M. Blondin, & A. M. T. Pollock.* 386, 265, 27-E1 (1992)

Hard X-Ray Imaging of the Galactic Black Hole Candidate GX 339−4. *C. E. Covault, J. E. Grindlay, & R. P. Manandhar.* 388, L65, 59-C12 (1992)

The Evolution of a Primordial Binary Population in a Globular Cluster. *Piet Hut, Steve McMillan, & Roger W. Romani.* 389, 527, 68-A8 (1992)

Jet Formation in the Transition from the Asymptotic Giant Branch to Planetary Nebulae. *Noam Soker.* 389, 628, 69-C1 (1992)

Stellar Wind Collision and X-Ray Generation in Massive Binaries. *V. V. Usov.* 389, 635, 69-C10 (1992)

On Martell and Kaitchuck's Model for the Intermediate Polar FO Aquarii. *Koji Mukai & Coel Hellier.* 391, 295, 89-E10 (1992)

Multiplicity-corrected Mass Function of Main-Sequence Stars in the Solar Neighborhood. *Sarbani Basu & N. C. Rana.* 393, 373, 118-F10 (1992)

Deep VLA Images of Globular Clusters: NGC 6624. *Helen M. Johnston & Shrinivas R. Kulkarni.* 393, L17, 120-C8 (1992)

Is Momentum Conserved? A Test in the Binary System PSR 1913+16. *Clifford M. Will.* 393, L59, 127-C7 (1992)

The Binary System L151−81A/B: A Potential Test of Accretion Theory. *M. A. Wood & T. D. Oswalt.* 394, L53, 139-D1 (1992)

Multiplicity among M Dwarfs. *Debra A. Fischer & Geoffrey W. Marcy.* 396, 178, 157-C13 (1992)

Radiative-hydrodynamical Simulations of X-Ray Burst–induced Accretion Disk Coronae. *Fulvio Melia, Gregory J. Zylstra, & Bruce Fryxell.* 396, L27, 160-E8 (1992)

Production of Recycled Pulsars in Globular Clusters via Two-Body Tidal Capture. *R. Di Stefano & S. Rappaport.* 396, 587, 164-F9 (1992)

Dusty Disks in the Multiple Systems UZ Tauri and GG Tauri. *M. Simon & S. Guilloteau.* 397, L47, 173-F9 (1992)

CCD Photometry in the Globular Cluster NGC 288. I. Blue Stragglers and Main-Sequence Binary Stars. *Michael Bolte.* 82, 145, 51-B7 (1992)

Are Symbiotic Stars the Precursors of Type Ia Supernovae? *Ulisse Munari & Alvio Renzini.* 397, L87, 181-B1 (1992)

The Perihelion Problem in Kaluza-Klein Gravity. *Paul H. Lim & Paul S. Wesson.* 397, L91, 181-B8 (1992)

An Interpretation of the Multipeaked Structure in X-Ray Bursts. *Fulvio Melia & Gregory J. Zylstra.* 398, L53, 188-A1 (1992)

Near-resonant Excitation and Propagation of Eccentric Density Waves by External Forcing. *Eve C. Ostriker, Frank H. Shu, & Fred C. Adams.* 399, 192, 197-E13 (1992)

Fragmentation of Elongated Cylindrical Clouds. IV. Clouds with Solid-Body Rotation about an Arbitrary Axis. *Ian Bonnell, Jean-Pierre Arcoragi, Hugo Martel, & Pierre Bastien.* 400, 579, 217-E8 (1992)

Possible First Detection of Ultraviolet Pulses from an Intermediate Polar: V603 Aquila. *A. Schwarzenberg-Czerny, A. Udalski, & R. Monier.* 401, L19, 227-C7 (1992)

Fragmentation of Elongated Cylindrical Clouds. V. Dependence of Mass Ratios on Initial Conditions. *Ian Bonnell & Pierre Bastien.* 401, 654, 230-F1 (1992)

The IRAS 16293−2422 Cloud Core: A Study of a Young Binary System. *Christopher K. Walker, John E. Carlstrom, & John H. Bieging.* 402, 655, 10-F11 (1993)

Binary–Single-Star Scattering. III. Numerical Experiments for Equal-Mass Hard Binaries. *Piet Hut.* 403, 256, 17-B1 (1993)

Binary–Single-Star Scattering. V. Steady State Binary Distribution in a Homogeneous Static Background of Single Stars. *Jeremy Goodman & Piet Hut.* 403, 271, 17-C4 (1993)

Extended Variability of the Symbiotic Star AG Draconis. *M. Kafatos, S. R. Meier, & I. Martin.* 84, 201, 4-B7 (1993)

The Masses of Two Binary Neutron Star Systems. *S. E. Thorsett, Z. Arzoumanian, M. M. McKinnon, & J. H. Taylor.* 405, L29, 47-E8 (1993)

The Spectrum and Variability of Radio Emission from AE Aquarii. *Meil Abada-Simon, Alain Lecacheux, Tim S. Bastian, Jay A. Bookbinder, & George A. Dulk.* 406, 692, 66-D12 (1993)

On Symbiotic Stars and Type Ia Supernovae. *Scott J. Kenyon, Mario Livio, Joanna Mikołajewska, & Christopher A. Tout.* 407, L81, 82-E9 (1993)

Binary–Single-Star Scattering. IV. Analytic Approximations and Fitting Formulae for Cross Sections and Reaction Rates. *Douglas C. Heggie & Piet Hut.* 85, 347, 11-G7 (1993)

Low-Mass X-Ray Binaries and Millisecond Pulsars in Globular Clusters. *Kaiyou Chen, John Middleditch, & Malvin Ruderman.* 408, L17, 88-G1 (1993)

Multiplicity and the Ages of the Stars in the Taurus Star-forming Region. *M. Simon, A. M. Ghez, & Ch. Leinert.* 408, L33, 89-B1 (1993)

A New Herbig-Haro Flow in the HH 1–2 Complex. *Bo Reipurth, Steve Heathcote, M. Roth, A. Noriega-Crespo, & A. C. Raga.* 408, L49, 89-D1 (1993)

Canada-France-Hawaii Telescope Observations of Globular Cluster Cores: Blue Straggler Stars in M3 (NGC 5272, GC 1339+286). *Michael Bolte, James E. Hesser, & Peter B. Stetson.* 408, L89, 95-C11 (1993)

Gas and Dust in the Pre–Main-Sequence Multiple System GG Tauri. *D. W. Koerner, A. I. Sargent, & S. V. W. Beckwith.* 408, L93, 95-D7 (1993)

Postcollapse Evolution of Globular Clusters Dominated by Tidal Binary Heating. *Hyung Mok Lee & Jeremiah P. Ostriker.* 409, 617, 106-F3 (1993)

Collapse and Fragmentation of Molecular Cloud Cores. I. Moderately Centrally Condensed Cores. *Alan P. Boss.* 410, 157, 114-B1 (1993)

A Highly Sensitive Radio Survey of Symbiotic Stars at 3.6 Centimeters. *E. R. Seaquist, M. Krogulec, & A. R. Taylor.* 410, 260, 115-C12 (1993)

JHK Photometry of WD 0950+139. *Michael S. Fulbright & James Liebert.* 410, 275, 115-E1 (1993)

The Binary Pulsar PSR 1908+00 in NGC 6760. *W. T. S. Deich, J. Middleditch, S. B. Anderson, S. R. Kulkarni, T. A. Prince, & A. Wolszczan.* 410, L95, 126-A13 (1993)

Reddening Errors and the Post–Main-Sequence Distribution of Stars in the H-R Diagram of the Large Magellanic Cloud. *N. Rathnasree.* 410, L99, 126-B5 (1993)

The *ROSAT* All-Sky Survey of Active Binary Coronae. I. Quiescent Fluxes for the RS Canum Venaticorum Systems. *Robert C. Dempsey, Jeffrey L. Linsky, Thomas A. Fleming, & J. H. M. M. Schmitt.* 86, 599, 22-C3 (1993)

Encounters between Binaries and Neutron Stars. *M. B. Davies, W. Benz, & J. G. Hills.* 411, 285, 130-F13 (1993)

Interacting Massive Binaries, H-R Diagram of the Large Magellanic Cloud and SN 1987A. *N. Rathnasree.* 411, 848, 140-D1 (1993)

A Turbulent Model of Time Variability in X-Ray Binary Pulsars. *Masahiro Hoshino & Toshiaki Takeshima.* 411, L79, 142-D9 (1993)

PSR B1620−26: A Binary Radio Pulsar with a Planetary Companion? *S. E. Thorsett, Z. Arzoumanian, & J. H. Taylor.* 412, L33, 148-D6 (1993)

An Improved Ultraviolet Spectral Line List for the Symbiotic Star RR Telescopii. *G. A. Doschek & W. A. Feibelman.* 87, 331, 31-C7 (1993)

IUE Short-Wavelength High-Dispersion Line List for the Symbiotic Nova RR Telescopii. *Jason P. Aufdenberg.* 87, 337, 31-D3 (1993)

The *ROSAT* All-Sky Survey of Active Binary Coronae. II. Coronal Temperatures of the RS Canum Venaticorum Systems. *Robert C. Dempsey, Jeffrey L. Linsky, J. H. M. M. Schmitt, & T. A. Fleming.* 413, 333, 160-D5 (1993)

Disks around Pre–Main-Sequence Binary Systems: The Case of Haro 6-10. *François Ménard, Jean-Louis Monin, Françoise Angelucci, & Daniel Rouan.* 414, L117, 186-B5 (1993)

A Deeply Embedded Companion to LkHα 198. *P. O. Lagage, G. Olofsson, S. Cabrit, C. J. Cesarsky, L. Nordh, & J. M. Rodriguez Espinosa.* 417, L79, 230-D6 (1993)

N-Body Evolution of Dense Clusters of Compact Stars. *Man Hoi Lee.* 418, 147, 232-G12 (1993)

The Formation of Binary and Single Nuclei of Planetary Nebulae. *L. R. Yungelson, A. V. Tutukov, & M. Livio.* 418, 794, 242-D8 (1993)

Quasi-periodic Oscillations in the Cataclysmic Variable KR Aurigae. *Jyoti Singh, P. Vivekananda Rao, P. C. Agrawal, K. M. V. Apparao, R. K. Manchanda, B. B. Sanwal, & M. B. K. Sarma.* 419, 337, 250-D3 (1993)

Are the Observed Frequencies of Double Degenerates and SN Ia Contradictory? *L. R. Yungelson, M. Livio, A. V. Tutukov, & R. A. Saffer.* 420, 336, 5-A13 (1994)

Theoretical Light Curves of Type IIb Supernova 1993J. *Toshikazu Shigeyama, Tomoharu Suzuki, Shiomi Kumagai, Ken'ichi Nomoto, Hideyuki Saio, & Hitoshi Yamaoka.* 420, 341, 5-B5 (1994)

The Onset of Gravothermal Oscillations in Globular Cluster Evolution. *Joseph L. Breeden, Haldan N. Cohn, & Piet Hut.* 421, 195, 18-D6 (1994)

A Search for Binaries in the Globular Cluster NGC 3201. *Patrick Côté, Douglas L. Welch, Philippe Fischer, G. S. Da Costa, Peter Tamblyn, Patrick Seitzer, & M. J. Irwin.* 90, 83, 2-B5 (1994)

A New Way to Make Thorne-Żytkow Objects. *Peter J. T. Leonard, Jack G. Hills, & Rachel J. Dewey.* 423, L19, 53-C13 (1994)

A Massive Radio Pulsar Binary in the Small Magellanic Cloud. *V. M. Kaspi, S. Johnston, J. F. Bell, R. N. Manchester, M. Bailes, M. Bessell, A. G. Lyne, & N. D'Amico.* 423, L43, 53-F7 (1994)

ROSAT Observations of Nine Globular Clusters. *S. Rappaport, D. Dewey, A. Levine, & L. Macri.* 423, 633, 56-D2 (1994)

Binary Radiopulsars with Black Holes. *V. M. Lipunov, K. A. Postnov, M. E. Prokhorov, & E. Yu. Osminkin.* 423, L121, 60-G9 (1994)

Capture and Induced Disk Accretion in Young Star Encounters. *Eve C. Ostriker.* 424, 292, 65-D14 (1994)

Observation of GX 339−4 Hard State Outbursts in 1991 and 1992. *B. A. Harmon, C. A. Wilson, W. S. Paciesas, G. N. Pendleton, M. S. Briggs, B. C. Rubin, M. H. Finger, G. J. Fishman, M. N. Brock, R. B. Wilson, & C. A. Meegan.* 425, L17, 85-C11 (1994)

A New Transient Pulsar in the Small Magellanic Cloud with an Unusual X-Ray Spectrum. *John P. Hughes.* 427, L25, 117-D8 (1994)

Star Cluster Evolution with Primordial Binaries. III. Effect of the Galactic Tidal Field. *Steve McMillan & Piet Hut.* 427, 793, 122-E3 (1994)

Hot Degenerates in the Montreal-Cambridge-Tololo Survey. II. Two New Hybrid White Dwarfs, MCT 0128−3846 and MCT 0453−2933, and the Nature of the DAB Stars. *F. Wesemael, P. Bergeron, R. Lamontagne, G. Fontaine, A. Beauchamp, S. Demers, M. J. Irwin, J. B. Holberg, S. O. Kepler, & S. Vennes.* 429, 369, 148-F2 (1994)

A Connection between Submillimeter Continuum Flux and Separation in Young Binaries. *Eric L. N. Jensen, Robert D. Mathieu, & Gary A. Fuller.* 429, L29, 150-D9 (1994)

The Range of Core Size of Postcollapse Clusters Supported by Primordial Binaries. *E. Vesperini & D. F. Chernoff.* 431, 231, 179-A7 (1994)

Spectroscopic Signatures of Infall in Young Protostellar Systems. *Christopher K. Walker, Gopal Narayanan, & Alan P. Boss.* 431, 767, 188-B5 (1994)

Modeling the Radial Distribution of Blue Stragglers in M3. *Steinn Sigurdsson, Melvyn B. Davies, & Michael Bolte.* 431, L115, 192-A9 (1994)

The Hard X-Ray Emission Spectra from Accretion Columns in Intermediate Polars. *Insu Yi & Ethan T. Vishniac.* 435, 829, 257-E1 (1994)

Classical Cepheids with Terminal Age Main-Sequence Companions: Constraints on Evolution. *Nancy Remage Evans.* 436, 273, 265-A12 (1994)

Observational Limits on Companions to G29-38. *S. J. Kleinman, R. E. Nather, D. E. Winget, J. C. Clemens, P. A. Bradley, A. Kanaan, J. L. Provencal, C. F. Claver, T. K. Watson, K. Yanagida, J. S. Dixson, M. A. Wood, D. J. Sullivan, E. Meištas, E. M. Leibowitz, P. Moskalik, S. Zola, G. Pajdosz, J. Krzesinski, J.-E. Solheim, A. Bruvold, D. O'Donoghue, M. Katz, G. Vauclair, N. Dolez, M. Chevreton, M. A. Barstow, S. O. Kepler, O. Giovannini, C. J. Hansen, & S. D. Kawaler.* 436, 875, 277-G1 (1994)

The Derived Population of Luminous Supersoft X-Ray Sources. *R. Di Stefano & S. Rappaport.* 437, 733, 295-G1 (1994)

Vibrationally Excited CS: A New Probe of Conditions in Young Protostellar Systems. *Christopher K. Walker, Philip R. Maloney, & E. Serabyn.* 437, L127, 299-E3 (1994)

On Possible Implications of Orbital Parallaxes of Wide Orbit Binary Pulsars and Their Measurability. *S. M. Kopeikin.* 439, L5, 29-E11 (1995)

Low-Mass X-Ray Binaries in Globular Clusters: A New Metallicity Effect. *M. Bellazzini, A. Pasquali, L. Federici, F. R. Ferraro, & F. Fusi Pecci.* 439, 687, 34-A12 (1995)

Interpretation of Gravitational Microlensing by Binary Systems. *S. Mao & R. Di Stefano.* 440, 22, 41-D14 (1995)

Evidence for Dust around Post T Tauri Stars. *Thomas P. Ray, Anneila I. Sargent, Steve V. W. Beckwith, Chris Koresko, & Patrick Kelly.* 440, L89, 58-B9 (1995)

The Very Low Mass X-Ray Binary Pulsars: A New Class of Sources? *S. Mereghetti & L. Stella.* 442, L17, 84-F9 (1995)

The Nuclear X-Ray Source in NGC 3628: A Strange Active Galactic Nucleus or the Most Luminous High-Mass X-Ray Binary Known? *Michael Dahlem, Timothy M. Heckman, & Giuseppina Fabbiano.* 442, L49, 94-C9 (1995)

Circular Polarization in the Radio Emission of RS Canum Venaticorum Binaries. *Stephen M. White & Elena Franciosini.* 444, 342, 118-C1 (1995)

The Mass Ratios of Cepheid Binaries. *Nancy Remage Evans.* 445, 393, 138-A1 (1995)

Phase-Transition Theory of Instabilities. I. Second-Harmonic Instability and Bifurcation Points. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 472, 162-E12 (1995)

Phase-Transition Theory of Instabilities. III. The Third-Harmonic Bifurcation on the Jacobi Sequence and the Fission Problem. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 500, 163-A8 (1995)

Phase-Transition Theory of Instabilities. IV. Critical Points on the Maclaurin Sequence and Nonlinear Fission Processes. *Dimitris M. Christodoulou, Demosthenes Kazanas, Isaac Shlosman, & Joel E. Tohline.* 446, 510, 163-B7 (1995)

Self-lensing by Binaries. *Andrew Gould.* 446, 541, 163-E6 (1995)

On the Minimum Magnification between Caustic Crossings for Microlensing by Binary and Multiple Stars. *Hans J. Witt & Shude Mao.* 447, L105, 191-A1 (1995)

A Search for Magnetic Fields among DA White Dwarfs. *Gary D. Schmidt & Paul S. Smith.* 448, 305, 196-D7 (1995)

A Model for the Space Density of Dwarf Carbon Stars. *Martijn de Kool & Paul J. Green.* 449, 236, 213-D10 (1995)

Dynamics and Interactions of Binaries and Neutron Stars in Globular Clusters. *Steinn Sigurdsson & E. S. Phinney.* 99, 609, 43-D7 (1995)

Disk Dissipation in Single and Binary Young Star Systems in Taurus. *M. Simon & L. Prato.* 450, 824, 242-A12 (1995)

Collapse and Fragmentation of Molecular Cloud Cores. III. Initial Differential Rotation. *Alan P. Boss & Elizabeth A. Myhill.* 451, 218, 249-A6 (1995)

A Model of the Galactic X-Ray Binary Population. II. Low-Mass X-Ray Binaries in the Galactic Disk. *Icko Iben, Jr., Alexander V. Tutukov, & Lev R. Yungelson.* 100, 233, 49-C5 (1995)

NGC 1333 IRAS 4: Further Multiplicity Revealed with the CSO-JCMT Interferometer. *O. P. Lay, J. E. Carlstrom, & R. E. Hills.* 452, L73, 270-F7 (1995)

The Binary Double-degenerate Nature of the Bright DAO White Dwarf Feige 55. *J. B. Holberg, Rex A. Saffer, R. W. Tweedy, & M. A. Barstow.* 452, L133, 280-D4 (1995)

Encounters with Protostellar Disks. II. Disruption and Binary Formation. *Clayton H. Heller.* 455, 252, 321-E10 (1995)

Spectroscopic Identification of Probable Cataclysmic Variables in the Globular Cluster NGC 6397. *J. E. Grindlay, A. M. Cool, P. J. Callanan, C. D. Bailyn, H. N. Cohn, & P. M. Lugger.* 455, L47, 325-B1 (1995)

STARS: BINARIES: SPECTROSCOPIC

Time Variations in the X-Rays from Cygnus X-3 Observed with *Ginga*. *Shunji Kitamoto, Seiko Mizobuchi, Koujun Yamashita, & Hiroshi Nakamura.* 384, 263, 4-B13 (1992)

Simultaneous X-Ray and Radio Observations of GX 5−1. *J. Tan, W. H. G. Lewin, R. M. Hjellming, W. Penninx, J. van Paradijs, M. van der Klis, & K. Mitsuda.* 385, 314, 15-G1 (1992)

Tomographic Separation of Composite Spectra. I. The Components of Plaskett's Star. *William G. Bagnuolo, Jr., Douglas R. Gies, & Michael S. Wiggs.* 385, 708, 21-G12 (1992)

TT Crateris: A Long-Period, Double-lined Dwarf Nova. *Paula Szkody, Robert E. Williams, Bruce Margon, Steve B. Howell, & Mario Mateo.* 387, 357, 41-D4 (1992)

Spectroscopic Observations of the Cataclysmic Variable PG 0917+342: An Ultra–Short-Period Nova-like System. *Danuta Dobrzycka & Steve B. Howell.* 388, 614, 57-G6 (1992)

New Calibrators for the Cepheid Period-Luminosity Relation. *Nancy Remage Evans.* 389, 657, 69-E8 (1992)

Kinematics and Age of RS Canum Venaticorum and BY Draconis Stars. *Zeki Eker.* 79, 481, 20-E9 (1992)

Possible Observational Consequences of Primordial Binaries in Globular Clusters. *Ronald E. Taam & D. N. C. Lin.* 390, 440, 80-G6 (1992)

PSR 0655+64: An Astrophysical Laboratory for Testing Relativistic Gravity Theories. *Itzhak Goldman.* 390, 494, 81-D11 (1992)

Spectroscopic Binaries in the α Persei Cluster. *Nidia Morrell & Helmut A. Abt.* 393, 666, 124-B1 (1992)

The Orbital Parameters and the *IUE* Spectrum of the Single-lined Spectroscopic Binary HD 698. *Jorge Sahade, Rodolfo Barbá, & Yoji Kondo.* 81, 303, 39-B1 (1992)

On the Study of the Mass Ratio of Spectroscopic Binaries. *Tsevi Mazeh & Dorit Goldberg.* 394, 592, 136-F10 (1992)

Multiplicity among M Dwarfs. *Debra A. Fischer & Geoffrey W. Marcy.* 396, 178, 157-C13 (1992)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. II. Plaskett's Star (HD 47129). *Michael S. Wiggs & Douglas R. Gies.* 396, 238, 158-A12 (1992)

γ Cephei: Rotation or Planetary Companion? *Gordon A. H. Walker, David A. Bohlender, Andrew R. Walker, Alan W. Irwin, Stephenson L. S. Yang, & Ana Larson.* 396, L91, 167-D1 (1992)

Photometry, Polarimetry, Spectroscopy, and Spectropolarimetry of the Enigmatic Wolf-Rayet Star EZ Canis Majoris. *Carmelle Robert, Anthony F. J. Moffat, Laurent Drissen, Robert Lamontagne, Wilhelm Seggewiss, Virpi S. Niemela, Miguel A. Cerruti, Paul Barrett, Jeremy Bailey, Jorge Garcia, & Santiago Tapia.* 397, 277, 171-D1 (1992)

Evidence for a Black Hole in the X-Ray Binary Nova Muscae 1991. *Ronald A. Remillard, Jeffrey E. McClintock, & Charles D. Bailyn.* 399, L145, 208-C7 (1992)

On the Mass-Ratio Distribution of Spectroscopic Binaries with Solar-Type Primaries. *Tsevi Mazeh, Dorit Goldberg, Antoine Duquennoy, & Michel Mayor.* 401, 265, 224-C9 (1992)

Periodic Photometric Variability of the Black Hole Binary V404 Cygni. *R. Mark Wagner, T. J. Kreidl, S. B. Howell, & S. G. Starrfield.* 401, L97, 233-C13 (1992)

A Spectroscopic Search for Colliding Stellar Winds in O-Type Close Binary Systems. IV. ι Orionis. *Douglas R. Gies, Michael S. Wiggs, & William G. Bagnuolo, Jr.* 403, 752, 25-B4 (1993)

On the Mass of Nova DQ Herculis (1934). *Keith Horne, William F. Welsh, & Richard A. Wade.* 410, 357, 116-E1 (1993)

Plaskett's Star (HD 47129): More and More Curious. *Anne B. Underhill.* 410, 365, 116-E11 (1993)

Ultraviolet and Optical Studies of Binaries with Luminous Cool Primaries and Hot Companions. IV. Further *IUE* Detections. *Sidney B. Parsons & Thomas B. Ake.* 412, 814, 154-A3 (1993)

Long-Period Radial Velocity Variations in Three K Giants. *Artie P. Hatzes & William D. Cochran.* 413, 339, 160-D13 (1993)

A Search for Substellar Companions to Southern Solar-Type Stars. *Kaylene A. Murdoch, J. B. Hearnshaw, & M. Clark.* 413, 349, 160-E11 (1993)

The Equations of Ellipsoidal Star Variability Applied to HR 8427. *Steven L. Morris & Stephen A. Naftilan.* 419, 344, 250-D13 (1993)

HD 53975: An O-Type Spectroscopic Binary with a Large Mass Ratio. *D. R. Gies, A. W. Fullerton, C. T. Bolton, W. G. Bagnuolo, Jr., M. E. Hahula, & R. Wiemker.* 422, 823, 42-B6 (1994)

Tomographic Separation of Composite Spectra. II. The Components of 29 UW Canis Majoris. *William G. Bagnuolo, Jr., Douglas R. Gies, Michael E. Hahula, Rafael Wiemker, & Michael S. Wiggs.* 423, 446, 51-F7 (1994)

Constraints on the Origin of Dwarf Carbon Stars. *Paul J. Green & Bruce Margon.* 423, 723, 57-E7 (1994)

Cygnus X-3 as a Benchmark for Fundamental Properties of Wolf-Rayet Stars. *Anatol M. Cherepashchuk & Anthony F. J. Moffat.* 424, L53, 69-G6 (1994)

1ES 1113+432: Luminous, Soft X-Ray Outburst from a Nearby Cataclysmic Variable (AR Ursae Majoris). *R. A. Remillard, J. F. Schachter, A. D. Silber, & P. Slane.* 426, 288, 99-F5 (1994)

The X-Ray Selected Cataclysmic Variables H0459+246 and H0857−242. *R. A. Remillard, H. V. Bradt, R. J. V. Brissenden, D. A. H. Buckley, D. A. Schwartz, A. Silber, B. A. Stroozas, & I. R. Tuohy.* 428, 785, 140-A11 (1994)

An Analysis of the Radial Velocity Residuals for Various Models of SS 433. *George W. Collins II & Christopher J. Garasi.* 431, 836, 189-B1 (1994)

A Study of the Moderately Wide Wolf-Rayet Spectroscopic Binary HD 190918. *Anne B. Underhill & Grant M. Hill.* 432, 770, 205-E10 (1994)

A Far-Ultraviolet Atlas of Symbiotic Stars Observed with *IUE*. I. The SWP Range. *S. R. Meier, M. Kafatos, R. P. Fahey, & A. G. Michalitsianos.* 94, 183, 54-C2 (1994)

Lithium in a Short-Period Tidally Locked Binary of M67: Implications for Stellar Evolution, Galactic Lithium Evolution, and Cosmology. *Constantine P. Deliyannis, Jeremy R. King, Ann M. Boesgaard, & Sean G. Ryan.* 434, L71, 241-G1 (1994)

First Radial Velocities for 146 Bright F- and G-Type Stars. *Helmut A. Abt & Daryl W. Willmarth.* 94, 677, 61-D1 (1994)

Quiescent Accretion Disks in Black Hole X-Ray Novae. *Jerome A. Orosz, Charles D. Bailyn, Ronald A. Remillard, Jeffrey E. McClintock, & Craig B. Foltz.* 436, 848, 277-D3 (1994)

Studies of Binary Stars in the Magellanic Clouds. II. Spectroscopic Orbits of Four Massive Eclipsing Binaries. *Virpi S. Niemela & Lilia P. Bassino.* 437, 332, 287-F11 (1994)

A Radial Velocity Study of the Dwarf Nova AR Andromedae: Comparison of the Quiescent and Outburst States. *A. W. Shafter, J. M. Veal, & E. L. Robinson.* 440, 853, 54-G10 (1995)

Star Counts from the *HST* Snapshot Survey. II. Wide Binaries. *Andrew Gould, John N. Bahcall, Dan Maoz, & Brian Yanny.* 441, 200, 62-B4 (1995)

BE Ursae Majoris: Precataclysmic Binary System and Planetary Nucleus. *James Liebert, R. W. Tweedy, R. Napiwotzki, & M. S. Fulbright.* 441, 424, 65-B11 (1995)

Orbital Parameters of the Candidate Black Hole Binary GRO J0422+32. *Jerome A. Orosz & Charles D. Bailyn.* 446, L59, 170-D12 (1995)

PSR J0045−7319: A Dual-Line Binary Radio Pulsar. *J. F. Bell, M. S. Bessell, B. W. Stappers, M. Bailes, & V. M. Kaspi.* 447, L117, 191-B6 (1995)

Tomographic Separation of Composite Spectra. III. Ultraviolet Detection of the Hot Companion of ϕ Persei. *Michelle L. Thaller, William G. Bagnuolo, Jr., Douglas R. Gies, & Laura R. Penny.* 448, 878, 207-A10 (1995)

Study of Spectroscopic Binaries with TODCOR. II. The Highly Eccentric Binary HD 2909. *Tsevi Mazeh, Shay Zucker, Dorit Goldberg, David W. Latham, Robert P. Stefanik, & Bruce W. Carney.* 449, 909, 225-C10 (1995)

An Eight-Year Study of the Radio Emission from the Wolf-Rayet Binary HD 193793 = WR 140. *Richard L. White & Robert H. Becker.* 451, 352, 250-F8 (1995)

Study of Spectroscopic Binaries with TODCOR. III. Application to Triple-lined Systems. *Shay Zucker, Guillermo Torres, & Tsevi Mazeh.* 452, 863, 276-E10 (1995)

Study of Spectroscopic Binaries with TODCOR. IV. The Multiplicity of the Young Nearby Star HD 98800. *Guillermo Torres, Robert P. Stefanik, David W. Latham, & T. Mazeh.* 452, 870, 276-F7 (1995)

A Study of the Spectra of Seven Of Stars. I. Radial Velocities. *Anne B. Underhill.* 100, 433, 52-A10 (1995)

A Search for Interstellar C_3 in the Translucent Cloud toward HD 147889. *L. Matthew Haffner & David M. Meyer.* 453, 450, 287-C8 (1995)

Identification of the Soft X-Ray Source WGA J1802.1+1804 with a New Magnetic Cataclysmic Variable. *Paula Szkody, Andrew Silber, D. W. Hoard, E. Fierce, K. P. Singh, P. Barrett, E. Schlegel, & V. Piirola.* 455, L43, 325-A6 (1995)

STARS: BINARIES: SYMBIOTIC

The Secondary Outburst Maximum of T Coronae Borealis: Implications for the Physics of Accretion Disks. *John K. Cannizzo & Scott J. Kenyon.* 386, L17, 29-C7 (1992)

Observations of Symbiotic Stars at Millimeter and Submillimeter Wavelengths. *E. R. Seaquist & A. R. Taylor.* 387, 624, 46-D5 (1992)

Improved Calculations for the C III $\lambda\lambda$1907,1909 and Si III $\lambda\lambda$1883,1892 Electron Density Sensitive Emission-Line Ratios, and a Comparison with *IUE* Observations. *F. P. Keenan, W. A. Feibelman, & K. A. Berrington.* 389, 443, 65-D5 (1992)

The Structure of the Inner Arcsecond of R Aquarii Observed with the *Hubble Space Telescope*. *Denis Burgarella & Francesco Paresce.* 389, L29, 66-D10 (1992)

Fe II Fluorescence and Anomalous C IV Doublet Intensities in Symbiotic Novae. *A. G. Michalitsianos, M. Kafatos, & S. R. Meier.* 389, 649, 69-D12 (1992)

Ultraviolet Observations of the Symbiotic Star AS 296. *A. Gutiérrez-Moreno, H. Moreno, & W. A. Feibelman.* 395, 295, 143-G1 (1992)

Are Symbiotic Stars the Precursors of Type Ia Supernovae? *Ulisse Munari & Alvio Renzini.* 397, L87, 181-B1 (1992)

Evidence Signaling the Start of Enhanced Counterjet Flow in the Symbiotic System R Aquarii. *A. G. Michalitsianos, M. Perez, & M. Kafatos.* 423, 441, 51-E13 (1994)

ROSAT PSPC Observations of the Symbiotic CH Cygni. *D. A. Leahy & K. Volk.* 440, 847, 54-G1 (1995)

The Active Phase of the Hot Component of Z Andromedae. *T. Fernández-Castro, R. González-Riestra, A. Cassatella, A. R. Taylor, & E. R. Seaquist.* 442, 366, 82-B4 (1995)

A Model for the Galactic Population of Symbiotic Stars with White Dwarf Accretors. *L. Yungelson, M. Livio, A. Tutukov, & S. J. Kenyon.* 447, 656, 185-B10 (1995)

Ultraviolet Temporal Variability of the Peculiar Star R Aquarii. *S. R. Meier & M. Kafatos.* 451, 359, 250-G5 (1995)

Simultaneous Observation of Direct and Raman-scattered O VI Lines in the Symbiotic Nova RR Telescopii. *Brian R. Espey, Regina E. Schulte-Ladbeck, Gerard A. Kriss, Fred Hamann, Hans M. Schmid, & Joni J. Johnson.* 454, L61, 308-D8 (1995)

STARS: BINARIES: VISUAL

Determination of the Visual Orbit of the Spectroscopic Binary α Andromedae with Submilliarcsecond Precison. *Xiaopei Pan, Michael Shao, M. Mark Colavita, J. Thomas Armstrong, David Mozurkewich, Maddali Vivekanand, Craig S. Denison, Richard S. Simon, & Kenneth J. Johnston.* 384, 624, 9-G9 (1992)

Companions to White Dwarfs: Very Low Mass Stars and the Brown Dwarf Candidate GD 165B. *B. Zuckerman & E. E. Becklin.* 386, 260, 27-D7 (1992)

Secondaries of Eclipsing Binaries. VII. The Spectroscopic Triple and Visual Double V505 Sagittarii. *Jocelyn Tomkin.* 387, 631, 46-E1 (1992)

The Wolf-Rayet System WR 147: A Binary Radio Source with Thermal and Nonthermal Components. *E. Churchwell, J. H. Bieging, K. A. van der Hucht, P. M. Williams, T. A. Th. Spoelstra, & D. C. Abbott.* 393, 329, 118-C1 (1992)

First Orbits for the Visual Double Stars WDS 00516N2238, WDS 17366N0722, WDS 17563N0259, and WDS 23020N4800. *J. A. Docobo & J. M. Costa.* 82, 323, 53-G7 (1992)

Observations of Double Stars and New Pairs. XV. *W. D. Heintz.* 83, 351, 62-F1 (1992)

Speckle Observations of Mira's Companion. *M. Karovska, P. Nisenson, & J. Beletic.* 402, 311, 5-A7 (1993)

Fragmentation of Elongated Cylindrical Clouds. VI. Comparison with Observations. *Ian Bonnell & Pierre Bastien.* 406, 614, 65-E1 (1993)

Gas and Dust in the Pre–Main-Sequence Multiple System GG Tauri. *D. W. Koerner, A. I. Sargent, & S. V. W. Beckwith.* 408, L93, 95-D7 (1993)

High Angular Resolution Measurements of Algol. *Xiaopei Pan, Michael Shao, & M. Mark Colavita.* 413, L129, 169-C1 (1993)

Restoration of Astronomical Images by Iterative Blind Deconvolution. *Stuart M. Jefferies & Julian C. Christou.* 415, 862, 198-F9 (1993)

HST Photometry of the Trapezium Cluster. *Charles F. Prosser, John R. Stauffer, Lee Hartmann, David R. Soderblom, Burton F. Jones, Michael W. Werner, & Mark J. McCaughrean.* 421, 517, 24-E9 (1994)

Orbits of Six Visual Double Stars. *J. A. Docobo, J. F. Ling, & C. Prieto.* 91, 793, 29-G5 (1994)

Are Wide Pre–Main-Sequence Binaries Coeval? *Patrick Hartigan, Karen M. Strom, & Stephen E. Strom.* 427, 961, 124-E10 (1994)

A Coronagraphic Search for Brown Dwarfs around Nearby Stars. *T. Nakajima, S. T. Durrance, D. A. Golimowski, & S. R. Kulkarni.* 428, 797, 140-B11 (1994)

Imaging Spectroscopy with High Spatial Resolution. *Naoshi Baba, Susumu Kuwamura, Noriaki Miura, & Yuji Norimoto.* 431, L111, 192-A1 (1994)

10 Micron Imaging of UZ Tauri: Evidence for Circumstellar Disk Clearing due to a Close Companion Star. *A. M. Ghez, J. P. Emerson, J. R. Graham, M. Meixner, & C. J. Skinner.* 434, 707, 237-E3 (1994)

Stellar Photometry Including Saturated Images: Results on M67 with WFPC2. *Ronald L. Gilliland.* 435, L63, 252-E9 (1994)

Star Counts from the *HST* Snapshot Survey. II. Wide Binaries. *Andrew Gould, John N. Bahcall, Dan Maoz, & Brian Yanny.* 441, 200, 62-B4 (1995)

A Lunar Occultation and Direct Imaging Survey of Multiplicity in the Ophiuchus and Taurus Star-forming Regions. *M. Simon, A. M. Ghez, Ch. Leinert, L. Cassar, W. P. Chen, R. R. Howell, R. F. Jameson, K. Matthews, G. Neugebauer, & A. Richichi.* 443, 625, 106-E1 (1995)

A New Method for Determining the Angular Separation of Double Stars. *Daniel F. V. James, H. C. Kandpal, & Emil Wolf.* 445, 406, 138-B4 (1995)

The Fate of the Solid Matter Orbiting HR 4796A. *M. Jura, A. M. Ghez, Russel J. White, D. W. McCarthy, R. C. Smith, & P. G. Martin.* 445, 451, 138-F11 (1995)

Observations of Double Stars and New Pairs. XVI. Results in 1992–1994. *W. D. Heintz.* 99, 693, 44-D1 (1995)

Rayleigh Beacon Adaptive Optics Imaging of ADS 9731: Measurements of the Isoplanatic Field of View. *Julian C. Christou, Brent Ellerbroek, Robert Q. Fugate, Domenico Bonaccini, & Ruggero Stanga.* 450, 369, 233-A12 (1995)

Full Adaptive Optics Images of ADS 9731 and μ Cassiopeiae: Orbits and Masses. *Jack D. Drummond, Julian C. Christou, & Robert Q. Fugate.* 450, 380, 233-B12 (1995)

Study of Spectroscopic Binaries with TODCOR. IV. The Multiplicity of the Young Nearby Star HD 98800. *Guillermo Torres, Robert P. Stefanik, David W. Latham, & T. Mazeh.* 452, 870, 276-F7 (1995)

An Age Estimate for the β Pictoris Analog HR 4796A. *John R. Stauffer, Lee W. Hartmann, & David Barrado y Navascues.* 454, 910, 314-D1 (1995)

Interstellar Lines in HD 72127A and B: A Binary Star behind the Vela Supernova Remnant. *George Wallerstein, Andrew Vanture, & Edward B. Jenkins.* 455, 590, 330-A9 (1995)

An Empirical Condition for Stability of Hierarchical Triple Systems. *Peter Eggleton & Ludmila Kiseleva.* 455, 640, 330-F8 (1995)

Stellar Activity at the End of the Main Sequence: GHRS Observations of the M8 Ve Star VB 10. *Jeffrey L. Linsky, Brian E. Wood, Alexander Brown, Mark S. Giampapa, & Carol Ambruster.* 455, 670, 331-B10 (1995)

STARS: BLUE STRAGGLERS

WFPC2 Observations of the Globular Cluster M30. *Brian Yanny, Puragra Guhathakurta, Donald P. Schneider, & John N. Bahcall.* 435, L59, 252-D13 (1994)

On the Luminosity Function, Lifetimes, and Origin of Blue Stragglers in Globular Clusters. *Charles D. Bailyn & Marc H. Pinsonneault.* 439, 705, 34-C13 (1995)

The Minimum Mass Ratio of W Ursae Majoris Binaries. *Frederic A. Rasio.* 444, L41, 121-G1 (1995)

On Blue Straggler Formation by Direct Collisions of Main-Sequence Stars. *James C. Lombardi, Jr., Frederic A. Rasio, & Stuart L. Shapiro.* 445, L117, 151-C1 (1995)

Stellar Variability in the Central Populations of 47 Tucanae from WF/PC Observations with the *Hubble Space Telescope*. I. Project Overview, Reduction Techniques, and First Results. *Ronald L. Gilliland, Peter D. Edmonds, Larry Petro, Abhijit Saha, & Michael M. Shara.* 447, 191, 174-G5 (1995)

The Rotational Rates of Blue Stragglers Produced by Physical Stellar Collisions. *Peter J. T. Leonard & Mario Livio.* 447, L121, 191-B11 (1995)

Are Blue Stragglers Mixed during Collisions? *Alison Procter Sills, Charles D. Bailyn, & Pierre Demarque.* 455, L163, 334-D6 (1995)

STARS: BROWN DWARFS

Cold Nuclear Fusion in Dense Metallic Hydrogen. *Charles J. Horowitz.* 367, 288, 15-E13 (1991)

ESO 207-61: A Brown Dwarf Candidate in the Hyades Moving Group. *María Teresa Ruiz, Marianne Y. Takamiya, & Miguel Roth.* 367, L59, 22-C7 (1991)

Gravitational Microlensing of the Galactic Bulge Stars. *B. Paczyński.* 371, L63, 73-C4 (1991)

Gravitational Microlensing by Double Stars and Planetary Systems. *Shude Mao & Bohdan Paczyński.* 374, L37, 110-B11 (1991)

Brown Dwarfs in Young Stellar Clusters. *Guy S. Stringfellow.* 375, L21, 117-C7 (1991)

The LkHα 101 Infrared Cluster. *M. Barsony, J. M. Schombert, & K. Kis-Halas.* 379, 221, 165-G1 (1991)

Constraints on the Companion Object to HD 114762. *William D. Cochran, Artie P. Hatzes, & Terry J. Hancock.* 380, L35, 181-E6 (1991)

STARS: CARBON

Detection of ^{13}C Isotopomers of HC_5N ($J = 9–8$) in the Circumstellar Envelope of IRC +10216. *M. B. Bell & P. A. Feldman.* 367, L33, 17-E8 (1991)

Radial Velocity Distribution and Line Strengths of 33 Carbon Stars in the Galactic Bulge. *Neil D. Tyson & R. Michael Rich.* 367, 547, 20-B6 (1991)

Nitrogen Abundances in Carbon-rich Stars That Are Progenitors to Planetary Nebulae. *M. Jura.* 372, 208, 76-E7 (1991)

The Mid-Infrared Spectrum of the Carbon Star HD 38218 and Its Possible Relation to Polycyclic Aromatic Hydrocarbons. *Richard H. Buss, Jr., A. G. G. M. Tielens, & Theodore P. Snow.* 372, 281, 77-D8 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

Large Molecule Production by Mass-losing Carbon Stars: The Primary Source of Interstellar Polycyclic Aromatic Hydrocarbons? *William B. Latter.* 377, 187, 140-C5 (1991)

Dust Temperatures in the Circumstellar Shell of TX Piscium. *J. Wirsich.* 377, 285, 141-E1 (1991)

Lithium Abundances in Carbon Stars. *Grant R. Denn, R. Earle Luck, & David L. Lambert.* 377, 657, 147-G5 (1991)

Three Newly Recognized Dwarf Carbon Stars. *Paul J. Green, Bruce Margon, & D. Jack MacConnell.* 380, L31, 181-E1 (1991)

Abundances in Red Giant Stars: Nitrogen Isotopes in Carbon-rich Molecular Envelopes. *P. G. Wannier, B-G Andersson, H. Olofsson, N. Ukita, & K. Young.* 380, 593, 185-E8 (1991)

On the Nature of the Excess 100 Micron Flux Associated with Carbon Stars. *Michael P. Egan & Chun Ming Leung.* 383, 314, 216-B1 (1991)

New Candidates for Carbon Stars with Silicate Features. *S. Josephine Chan & Sun Kwok.* 383, 837, 224-F1 (1991)

Subgiant CH Stars. II. Chemical Compositions and the Evolutionary Connection with Barium Stars. *R. Earle Luck & Howard E. Bond.* 77, 515, 51-G1 (1991)

A VLA 3.6 Centimeter Survey of N-Type Carbon Stars. *Donald G. Luttermoser & Alexander Brown.* 384, 634, 10-A7 (1992)

Radial Velocities of Carbon Stars: CO versus Optical Measurements. *Cecilia Barnbaum.* 385, 694, 21-F10 (1992)

High Spatial Resolution Maps of Circumstellar SiC_2 in IRC +10216. *P. D. Gensheimer, Lauren Likkel, & L. E. Snyder.* 388, L31, 52-C11 (1992)

Candidates for Extreme Carbon Stars. *Kevin Volk, Sun Kwok, & Philip P. Langill.* 391, 285, 89-D12 (1992)

8–14 Micron Spectroscopy of Carbon Stars Associated with Silicate Dust. *Paul D. LeVan, G. C. Sloan, Irene R. Little-Marenin, & G. L. Grasdalen.* 392, 702, 111-A1 (1992)

Interstellar SiC with Unusual Isotopic Compositions: Grains from a Supernova? *Sachiko Amari, Peter Hoppe, Ernst Zinner, & Roy S. Lewis.* 394, L43, 139-C1 (1992)

Carbon Star Luminosity Indicators. *Paul J. Green, Bruce Margon, Scott F. Anderson, & D. Jack MacConnell.* 400, 659, 218-E12 (1992)

Polycyclic Aromatic Hydrocarbon Formation in Carbon-rich Stellar Envelopes. *Isabelle Cherchneff, John R. Barker, & Alexander G. G. M. Tielens.* 401, 269, 224-D1 (1992)

CO Observations of Candidates for Carbon-rich Asymptotic Giant Branch and Post–Asymptotic Giant Branch Stars. *Kevin Volk, Sun Kwok, & Andrew W. Woodsworth.* 402, 292, 4-F10 (1993)

Companions to Bright S and MS Stars: Technetium Deficiency and Binarity. *Hollis R. Johnson, Thomas B. Ake, & Mudhaffer M. Ameen.* 402, 667, 10-G11 (1993)

A Deep Envelope Composition for TX Piscium? *J. H. Goebel, D. Goorvitch, H. P. Larson, & D. R. Alexander.* 402, 680, 11-B1 (1993)

New 3 Millimeter Observations of Interstellar HNO: Reinstating a Discredited Identification. *Lewis E. Snyder, Yi-Jehng Kuan, L. M. Ziurys, & J. M. Hollis.* 403, L17, 20-C1 (1993)

The Abundance Distribution of C_4H in IRC +10216. *Aditya Dayal & John H. Bieging.* 407, L37, 75-E1 (1993)

The Formation of Cyanopolyyne Molecules in IRC +10216. *Isabelle Cherchneff, Alfred E. Glassgold, & Gary A. Mamon.* 410, 188, 114-D12 (1993)

Carbon Stars and Isotopic Ba Anomalies in Meteoritic SiC Grains. *R. Gallino, C. M. Raiteri, & M. Busso.* 410, 400, 117-A10 (1993)

A Study of Circumstellar Envelopes around Bright Carbon Stars. I. Structure, Kinematics, and Mass-Loss Rate. *H. Olofsson, K. Eriksson, B. Gustafsson, & U. Carlström.* 87, 267, 30-E1 (1993)

A Study of Circumstellar Envelopes around Bright Carbon Stars. II. Molecular Abundances. *H. Olofsson, K. Eriksson, B. Gustafsson, & U. Carlström.* 87, 305, 31-A5 (1993)

Infrared Spectra of Transition Objects and the Composition and Evolution of Carbon Dust. *R. H. Buss, Jr., A. G. G. M. Tielens, M. Cohen, M. W. Werner, J. D. Bregman, & F. C. Witteborn.* 415, 250, 188-B3 (1993)

Atomic Carbon in the Envelope of IRC +10216. *Jocelyn Keene, K. Young, T. G. Phillips, Thomas H. Büttgenbach, & John E. Carlstrom.* 415, L131, 200-E1 (1993)

Prevention of High-Luminosity Carbon Stars by Hot Bottom Burning. *Arnold I. Boothroyd, I.-Juliana Sackmann, & Sean C. Ahern.* 416, 762, 212-G6 (1993)

C_3S and C_5S in IRC +10216. *M. B. Bell, L. W. Avery, & P. A. Feldman.* 417, L37, 223-C1 (1993)

Extreme-Ultraviolet Extinction Measurements on Hydrogenated and Dehydrogenated Amorphous Carbon Grains. *L. Colangeli, V. Mennella, A. Blanco, S. Fonti, E. Bussoletti, H. E. Gumlich, H. C. Mertins, & Ch. Jung.* 418, 435, 236-D7 (1993)

Whither the LSR: Anticenter Carbon Star Velocities. *Mark R. Metzger & Paul L. Schechter.* 420, 177, 3-B8 (1994)

Observations of 13.5 Micron Rotation-Vibration Lines of SiS in IRC +10216. *R. J. Boyle, J. J. Keady, D. E. Jennings, K. L. Hirsch, & G. R. Wiedemann.* 420, 863, 13-E12 (1994)

A High-Resolution Spectral Atlas of Carbon Stars. *Cecilia Barnbaum.* 90, 317, 5-G10 (1994)

Discovery of a Dwarf Carbon Star with a White Dwarf Companion and of a Highly Magnetic Degenerate Star. *James Liebert, Gary D. Schmidt, M. Lesser, J. A. Stepanian, V. A. Lipovetsky, Frederic H. Chaffee, Craig B. Foltz, & P. Bergeron.* 421, 733, 27-C12 (1994)

Constraints on the Origin of Dwarf Carbon Stars. *Paul J. Green & Bruce Margon.* 423, 723, 57-E7 (1994)

The Photodissociation of Circumstellar HCN and SiS. *J. Wirsich.* 424, 370, 66-D14 (1994)

Three-dimensional Structure of the Circumstellar Envelope of CRL 618 based on the ^{13}CO $J = 1–0$ Mapping Observations. *Issei Yamamura, Katsunori M. Shibata, Takashi Kasuga, & Shuji Deguchi.* 427, 406, 114-G13 (1994)

Induced Nucleation of Carbon Dust in Red Giant Stars. *Brian J. Cadwell, Hai Wang, Eric D. Feigelson, & Michael Frenklach.* 429, 285, 147-E10 (1994)

Detection of Radio Continuum Emission from Circumstellar Dust around CRL 2688 and IRC +10216. *G. R. Knapp, P. F. Bowers, K. Young, & T. G. Phillips.* 429, L33, 150-E1 (1994)

The Puzzle of Silicon, Titanium, and Magnesium Anomalies in Meteoritic Silicon Carbide Grains. *Roberto Gallino, Claudia M. Raiteri, Maurizio Busso, & Francesca Matteucci.* 430, 858, 172-E13 (1994)

A CCD Survey for Faint High-Latitude Carbon Stars. *Paul J. Green, Bruce Margon, Scott F. Anderson, & Kem H. Cook.* 434, 319, 229-G6 (1994)

Broken Symmetry: The Structure of the Dust Envelope of IRC +10216. *Joel H. Kastner & David A. Weintraub.* 434, 719, 237-F7 (1994)

Ultraviolet Spectra of Amorphous Carbon Grains: Comparison with the Circumstellar Extinction around C-rich Objects. *A. M. Muci, A. Blanco, S. Fonti, & V. Orofino.* 436, 831, 277-B3 (1994)

Full Synthesis Maps of Circumstellar SiC_2 in IRC +10216. *P. D. Gensheimer, Lauren Likkel, & L. E. Snyder.* 439, 445, 27-C3 (1995)

^{13}CO Interferometric Observations of the Central Core of CRL 2688. *Issei Yamamura, Takashi Onaka, Fumio Kamijo, Shuji Deguchi, & Nobuharu Ukita.* 439, L13, 29-G4 (1995)

The Distribution of HCN, $H^{13}CN$, and CN in IRC +10216. *Aditya Dayal & John H. Bieging.* 439, 996, 38-D7 (1995)

HCN Emission from Bright Carbon Stars: The Ground State Masers and Peculiar Broad Features. *Hideyuki Izumiura, Nobuharu Ukita, & Takashi Tsuji.* 440, 728, 53-C1 (1995)

Outer Layers of a Carbon Star: The View from the *Hubble Space Telescope*. *Hollis R. Johnson, Lisa M. Ensman, David R. Alexander, Eugene H. Avrett, Alexander Brown, Kenneth G. Carpenter, Kjell Eriksson, Bengt Gustafsson, Uffe G. Jørgensen, Philip D. Judge, Jeffrey L. Linsky, Donald G. Luttermoser, Francois Querci, Monique Querci, Richard D. Robinson, & Robert F. Wing.* 443, 281, 99-B6 (1995)

Grain Formation around Carbon Stars. I. Stationary Outflow Models. *Michael P. Egan & Chun Ming Leung.* 444, 251, 117-A1 (1995)

A Dehydrogenation Study of Cosmic Carbon Analogue Grains. *V. Mennella, L. Colangeli, A. Blanco, E. Bussoletti, S. Fonti, P. Palumbo, & H. C. Mertins.* 444, 288, 117-D4 (1995)

Nucleosynthesis and Mixing on the Asymptotic Giant Branch. II. Carbon and Barium Stars in the Galactic Disk. *M. Busso, D. L. Lambert, L. Beglio, R. Gallino, C. M. Raiteri, & V. V. Smith.* 446, 775, 166-F13 (1995)

A Model for the Amorphous Carbon Grains around C-rich Objects. *A. Blanco, S. Fonti, & V. Orofino.* 448, 339, 196-G6 (1995)

A Model for the Space Density of Dwarf Carbon Stars. *Martijn de Kool & Paul J. Green.* 449, 236, 213-D10 (1995)

The 11 Micron Emissions of Carbon Stars. *J. H. Goebel, P. Cheeseman, & F. Gerbault.* 449, 246, 213-E9 (1995)

Evidence for Rapid Rotation of the Carbon Star V Hydrae. *Cecilia Barnbaum, Mark Morris, & Claudine Kahane.* 450, 862, 242-G7 (1995)

On the Electronic Structure of Small Carbon Grains of Astrophysical Interest. *V. Mennella, L. Colangeli, E. Bussoletti, G. Monaco, P. Palumbo, & A. Rotundi.* 100, 149, 47-G9 (1995)

Four Newly Identified Sources with 21 Micron Emission. *Sun Kwok, Bruce J. Hrivnak, & T. R. Geballe.* 454, 394, 304-F8 (1995)

The 30 Micron Emission Band in Carbon-rich Pre–Planetary Nebulae. *A. Omont, S. H. Moseley, P. Cox, W. Glaccum, S. Casey, T. Forveille, Kin-Wing Chan, R. Szczerba, R. F. Loewenstein, P. M. Harvey, & S. Kwok.* 454, 819, 313-B2 (1995)

STARS: CATALOGS

A Spectrophotometric Atlas of White Dwarfs Compiled from the *IUE* Archives. *Gary Wegner & Steven R. Swanson.* 75, 507, 7-E13 (1991)

A Critical Appraisal of Published Values of [Fe/H] for K II–IV Stars. *Benjamin J. Taylor.* 76, 715, 34-E12 (1991)

STARS: CEPHEIDS

Classical Cepheids with RV Tauri Characteristics? *Pawel Moskalik & J. Robert Buchler.* 366, 300, 4-F12 (1991)

New Cepheid Distances to Nearby Galaxies Based on *BVRI* CCD Photometry. II. The Local Group Galaxy M33. *Wendy L. Freedman, Christine D. Wilson, & Barry F. Madore.* 372, 455, 81-D9 (1991)

Classical Cepheid Luminosities from Binary Companions. *Nancy Remage Evans.* 372, 597, 83-B1 (1991)

Single and Binary Star Evolution. *Icko Iben, Jr.* 76, 55, 24-G3 (1991)

Radial Velocities of 26 Northern Milky Way Cepheids. *Mark R. Metzger, John A. R. Caldwell, James K. McCarthy, & Paul L. Schechter.* 76, 803, 35-G3 (1991)

Absolute Magnitudes and Kinematic Properties of Cepheids. *Teresa D. Wilson, Thomas G. Barnes III, Suzanne L. Hawley, & William H. Jefferys.* 378, 708, 161-B11 (1991)

Periodic Stellar Pulsations: Stability Analysis and Amplitude Equations. *J. Robert Buchler, Pawel Moskalik, & Géza Kovács.* 380, 185, 178-D1 (1991)

Variable Stars in Magellanic Cloud Clusters. II. NGC 1850. *K. M. Sebo & P. R. Wood.* 449, 164, 212-D8 (1995)

STARS: CHEMICALLY PECULIAR

Radio Emission from Chemically Peculiar Stars. *Jeffrey L. Linsky, Stephen A. Drake, & T. S. Bastian.* 393, 341, 118-D1 (1992)

Self-consistent Models of Wolf-Rayet Stars as Helium Stars with Optically Thick Winds. *Mariko Kato & Icko Iben, Jr.* 394, 305, 131-F13 (1992)

Nonequilibrium Iron Oxide Formation in Some Low-Mass Post–Asymptotic Giant Branch Stars. *Frans J. M. Rietmeijer.* 400, L39, 214-E6 (1992)

The Spectrum of the Central Star of the Planetary Nebula in M22. *J. Patrick Harrington & George Paltoglou.* 411, L103, 142-G3 (1993)

Reaction Rates of the *s*-Process Neutron Sources ^{22}Ne(α, n)^{25}Mg and ^{13}C(α, n)^{16}O. *H. W. Drotleff, A. Denker, H. Knee, M. Soiné, G. Wolf, J. W. Hammer, U. Greife, C. Rolfs, & H. P. Trautvetter.* 414, 735, 180-D3 (1993)

The Discrimination between O- and C-rich Circumstellar Envelopes from Molecular Observations. *V. Bujarrabal, A. Fuente, & A. Omont.* 421, L47, 22-B1 (1994)

The Abundances of Pt, Au, and Hg in the Chemically Peculiar HgMn-Type Stars κ Cancri and χ Lupi. *Glenn M. Wahlgren, David S. Leckrone, Sveneric G. Johansson, Maria Rosberg, & Tomas Brage.* 444, 438, 119-E11 (1995)

Carbon Isotope Ratios in Very Lithium-rich K Giants. *L. da Silva, R. de la Reza, & B. Barbuy.* 448, L41, 200-A1 (1995)

The Relation between Rotational Velocities and Spectral Peculiarities among A-Type Stars. *Helmut A. Abt & Nidia I. Morrell.* 99, 135, 36-A1 (1995)

STARS: CHROMOSPHERES

Stellar Lyman-Alpha Emission and the Local Interstellar Medium. *Wayne Landsman & Theodore Simon.* 366, L79, 11-D9 (1991)

Be Stars: Chromospheres and Cool Envelopes and Their Relation to Magnetic Fields. *A. E. Ringuelet & M. E. Iglesias.* 369, 463, 43-D10 (1991)

Evolution of the Chromospheres and Winds of Low- and Intermediate-Mass Giant Stars. *P. G. Judge & R. E. Stencel.* 371, 357, 64-E3 (1991)

Rotational Modulation in *IUE* Spectra of Cool Dwarf Chromospheres. I. Data Analysis and Period Search Techniques. *K. L. Hallam, B. Altner, & A. S. Endal.* 372, 610, 83-C1 (1991)

Ca II H and K Measurements Made at Mount Wilson Observatory, 1966–1983. *Douglas K. Duncan, Arthur H. Vaughan, Olin C. Wilson, George W. Preston, James Frazer, Howard Lanning, Anthony Misch, Jean Mueller, David Soyumer, L. Woodard, Sallie L. Baliunas, Robert W. Noyes, Lee W. Hartmann, Alain Porter, Cornelis Zwaan, Frans Middelkoop, René G. M. Rutten, & Dimitri Mihalas.* 76, 383, 29-G9 (1991)

X-Ray Emission from Hybrid-Chromosphere Stars. *Alexander Brown, Stephen A. Drake, Michael E. Van Steenberg, & Jeffrey L. Linsky.* 373, 614, 95-E9 (1991)

The Chromospheric Activity of Low-Mass Stars in the Hyades. *John R. Stauffer, Mark S. Giampapa, William Herbst, James M. Vincent, Lee W. Hartmann, & Robert A. Stern.* 374, 142, 99-G1 (1991)

Rotation and Emission Lines in Stars and Accretion Disks. *Keith Horne & Steven H. Saar.* 374, L55, 110-D6 (1991)

The Many Faces of F Stars: A Rotational Modulation Study of Capella, Procyon, and Caph with the *International Ultraviolet Explorer*. *Thomas R. Ayres.* 375, 704, 121-D11 (1991)

The Chromospheric Emission–Age Relation for Stars of the Lower Main Sequence and Its Implications for the Star Formation Rate. *David R. Soderblom, Douglas K. Duncan, & Dean R. H. Johnson.* 375, 722, 121-F5 (1991)

Dust Temperatures in the Circumstellar Shell of TX Piscium. *J. Wirsich.* 377, 285, 141-E1 (1991)

First Results from the Goddard High-Resolution Spectrograph: The Chromosphere of α Tauri. *Kenneth G. Carpenter, Richard D. Robinson, Glenn M. Wahlgren, Thomas B. Ake, Dennis C. Ebbets, Jeffrey L. Linsky, Alexander Brown, & Frederick M. Walter.* 377, L45, 143-E11 (1991)

Heating Mechanism(s) for Transition Layers in Giants. *Erika Böhm-Vitense & José Mena-Werth.* 378, 718, 161-C8 (1991)

Fe II Emission Lines. I. Chromospheric Spectra of Red Giants. *P. G. Judge & C. Jordan.* 77, 75, 44-E1 (1991)

The Onset of Chromospheric Activity among the A and F Stars. *Theodore Simon & Wayne Landsman.* 380, 200, 178-E3 (1991)

A Connection between Long-Term Luminosity Variations and Orbital Period Changes in Chromospherically Active Binaries. *Douglas S. Hall.* 380, L85, 188-F1 (1991)

Magnetoacoustic Heating of the Solar Chromosphere. *Joseph M. Davila & S. M. Chitre.* 381, L31, 194-D12 (1991)

IUE Observations of Solar-Type Stars in the Pleiades and the Hyades. *Jean-Pierre Caillault, Osmi Vilhu, & Jeffrey L. Linsky.* 383, 594, 221-F1 (1991)

The Unusual Ultraviolet Chromospheric Spectrum of the R Coronae Borealis Star, V854 Centauri (NSV 6708), at Minimum Light. *Geoffrey C. Clayton, Barbara A. Whitney, S. Adam Stanford, John S. Drilling, & P. G. Judge.* 384, L19, 6-C8 (1992)

Partially Coherent Scattering in Stellar Chromospheres. I. Effects on Resonance Line Thermalization. *Kenneth G. Gayley.* 78, 549, 10-D7 (1992)

Discovery of a Fast Wind from a Field Population II Giant Star. *A. K. Dupree, Dimitar D. Sasselov, & John B. Lester.* 387, L85, 48-D11 (1992)

Kinematics and Age of RS Canum Venaticorum and BY Draconis Stars. *Zeki Eker.* 79, 481, 20-E9 (1992)

Partially Coherent Scattering in Stellar Chromospheres. II. The First-Order Escape Probability Method. *K. G. Gayley.* 390, 573, 82-D8 (1992)

Partially Coherent Scattering in Stellar Chromospheres. III. A Second-Order Escape Probability Method. *K. G. Gayley.* 390, 583, 82-E5 (1992)

Line Profile Asymmetries in Chromospherically Active Stars. *Robert C. Dempsey, Bernard W. Bopp, Klaus G. Strassmeier, Arno F. Granados, Gregory W. Henry, & Douglas S. Hall.* 392, 187, 103-C5 (1992)

Evidence of Differential Surface Rotation in the Solar-Type Star HD 114710. *Robert A. Donahue & Sallie L. Baliunas.* 393, L63, 127-D1 (1992)

γ Cephei: Rotation or Planetary Companion? *Gordon A. H. Walker, David A. Bohlender, Andrew R. Walker, Alan W. Irwin, Stephenson L. S. Yang, & Ana Larson.* 396, L91, 167-D1 (1992)

Emission-Line Studies of Young Stars. I. The T Tauri Stars. *Fred Hamann & S. E. Persson.* 82, 247, 52-F9 (1992)

Emission-Line Studies of Young Stars. II. The Herbig Ae/Be Stars. *Fred Hamann & S. E. Persson.* 82, 285, 53-C11 (1992)

CCD Observations of the Hα Line in Late G and K Supergiants and Their Interpretation. *Sushma V. Mallik.* 402, 303, 4-G10 (1993)

The Hydrogen Lyman-Alpha Emission of Capella. *Thomas R. Ayres, A. Brown, K. G. Gayley, & Jeffrey L. Linsky.* 402, 710, 11-D5 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. II. Chromospheric Activity and Variability. *D. Dravins, P. Linde, K. Fredga, & G. F. Gahm.* 403, 396, 18-F9 (1993)

Lithium and Rapid Rotation in Chromospherically Active Single Giants. *Francis C. Fekel & Suchitra Balachandran.* 403, 708, 24-E4 (1993)

On the Chromospheric Structure of ζ Aurigae. *Joel A. Eaton.* 404, 305, 31-F1 (1993)

Rotation and Chromospheric Emission among F, G, and K Dwarfs of the Pleiades. *David R. Soderblom, John R. Stauffer, J. Dan Hudon, & Burton F. Jones.* 85, 315, 11-D13 (1993)

A Catalog of Stellar Lyman-Alpha Fluxes. *Wayne Landsman & Theodore Simon.* 408, 305, 87-A1 (1993)

Observations of the Ca II Infrared Triplet in Chromospherically Active Single and Binary Stars. *Robert C. Dempsey, Bernard W. Bopp, Gregory W. Henry, & Douglas S. Hall.* 86, 293, 17-G7 (1993)

Chromospheric Heating by Acoustic Shocks: A Confrontation of GHRS Observations of α Tauri (K5 III) with Ab Initio Calculations. *P. G. Judge & M. Cuntz.* 409, 776, 108-F13 (1993)

Mg II and Lyα Fluxes in M Dwarfs: Evaluation of an Acoustic Model. *D. J. Mullan & Q. Q. Cheng.* 412, 312, 146-A9 (1993)

The Atmospheres of T Tauri Stars. II. Chromospheric Line Fluxes and Veiling. *C. C. Batalha & Gibor Basri.* 412, 363, 146-E13 (1993)

The Fundamental Parameters of the Chromospherically Active K2 Dwarf ε Eridani. *Jeremy J. Drake & Geoffrey Smith.* 412, 797, 153-F9 (1993)

An Interpretation of Cycle Periods of Stellar Chromospheric Activity. *W. H. Soon, S. L. Baliunas, & Q. Zhang.* 414, L33, 175-F6 (1993)

Partially Coherent Scattering in Stellar Chromospheres. IV. Analytic Wing Approximations. *K. G. Gayley.* 415, 811, 198-A1 (1993)

Chromospheric Activity in Galactic Open Clusters. *A. J. Beasley & L. E. Cram.* 417, 157, 219-D1 (1993)

The Extreme Ultraviolet Spectrum of Alpha Aurigae (Capella). *A. K. Dupree, N. S. Brickhouse, G. A. Doschek, J. C. Green, & J. C. Raymond.* 418, L41, 238-E10 (1993)

Expanding Atmospheric Model Including a Chromosphere. I. Study of the Infrared Excess in Be Stars. *Andrea C. Vázquez, Lydia S. Cidale, & Adela E. Ringuelet.* 419, 286, 249-F10 (1993)

Ca II H and K and Hα Emissions in Chromospherically Active Binary Systems (RS Canum Venaticorum and BY Draconis). *M. J. Fernández-Figueroa, D. Montes, E. De Castro, & M. Cornide.* 90, 433, 8-B6 (1994)

Spectroscopy of Chromospheric Lines of Giants in the Globular Cluster NGC 6752. *A. K. Dupree, Lee Hartmann, Graeme H. Smith, A. W. Rodgers, W. H. Roberts, & D. B. Zucker.* 421, 542, 24-G9 (1994)

The Chromospheric Structure of the Cool Giant Star g Herculis. *Donald G. Luttermoser, Hollis R. Johnson, & Joel A. Eaton.* 422, 351, 34-D7 (1994)

The He I λ10830 Line in Classical Cepheids. I. Observations. *Dimitar D. Sasselov & John B. Lester.* 423, 777, 58-C11 (1994)

The He I λ10830 Line in Classical Cepheids. II. Mechanism of Formation. *Dimitar D. Sasselov & John B. Lester.* 423, 785, 58-D7 (1994)

The Chromospheric Structure of Classical Cepheids: Constraints from the He I λ10830 Line. *Dimitar D. Sasselov & John B. Lester.* 423, 795, 58-E6 (1994)

Carbon Monoxide Fundamental Bands in Late-Type Stars. III. Chromosphere or CO-mosphere? *G. Wiedemann, T. R. Ayres, D. E. Jennings, & S. H. Saar.* 423, 806, 58-F6 (1994)

The Photodissociation of Circumstellar HCN and SiS. *J. Wirsich.* 424, 370, 66-D14 (1994)

A Search for Chromospheric Emission in A-Type Stars Using the Goddard High-Resolution Spectrograph. *Theodore Simon, Wayne B. Landsman, & Ronald L. Gilliland.* 428, 319, 132-B5 (1994)

GHRS Observations of Cool, Low-Gravity Stars. I. The Far-Ultraviolet Spectrum of α Orionis (M2 Iab). *Kenneth G. Carpenter, Richard D. Robinson, Glenn M. Wahlgren, Jeffrey L. Linsky, & Alexander Brown.* 428, 329, 132-C6 (1994)

HD 129333: The Sun in Its Infancy. *J. David Dorren & Edward F. Guinan.* 428, 805, 140-C9 (1994)

High-Velocity Plasma in the Transition Region of AU Microscopii: Evidence for Magnetic Reconnection and Saturated Heating during Quiescent and Flaring Conditions. *Jeffrey L. Linsky & Brian E. Wood.* 430, 342, 163-D8 (1994)

The "Monochromatic Density Diagnostic" Technique: First Detection of Multiple Density Components in the Chromosphere of α Tauri. *P. G. Judge.* 430, 351, 163-E5 (1994)

Gravitational Damping of Alfvén Waves in Stellar Atmospheres and Winds. *I. K. Khabibrakhmanov & D. J. Mullan.* 430, 814, 172-A7 (1994)

Analytic Lyman-Alpha Wing Diagnostics and the Chromospheric Excitation Balance in Cool Dwarfs. *K. G. Gayley.* 431, 806, 188-F4 (1994)

Chromospheric Heating and Metal Deficiency in Cool Giants: Theoretical Results versus Observations. *M. Cuntz, W. Rammacher, & P. Ulmschneider.* 432, 690, 204-E12 (1994)

Acoustic Heating of the Chromosphere and Cool Corona in the F Star α Canis Minoris (Procyon). *D. J. Mullan & Q. Q. Cheng.* 435, 435, 249-D7 (1994)

Chromospheric Variations in Main-Sequence Stars. II. *S. L. Baliunas, R. A. Donahue, W. H. Soon, J. H. Horne, J. Frazer, L. Woodard-Eklund, M. Bradford, L. M. Rao, O. C. Wilson, Q. Zhang, W. Bennett, J. Briggs, S. M. Carroll, D. K. Duncan, D. Figueroa, H. H. Lanning, T. Misch, J. Mueller, R. W. Noyes, D. Poppe, A. C. Porter, C. R. Robinson, J. Russell, J. C. Shelton, T. Soyumer, A. H. Vaughan, & J. H. Whitney.* 438, 269, 5-B12 (1995)

The RIASS Coronathon: Joint X-Ray and Ultraviolet Observations of Normal F–K Stars. *Thomas R. Ayres, T. A. Fleming, T. Simon, B. M. Haisch, A. Brown, D. Lenz, W. Wamsteker, D. de Martino, C. Gonzalez, J. Bonnell, J. M. Mas-Hesse, C. Rosso, J. H. M. M. Schmitt, J. Trümper, W. Voges, J. Pye, R. C. Dempsey, J. L. Linsky, E. F. Guinan, G. M. Harper, C. Jordan, B. M. Montesinos, I. Pagano, & M. Rodonò.* 96, 223, 4-E7 (1995)

Chromospheric Models for Altair (A7 IV–V). *R. Freire Ferrero, P. Gouttebroze, S. Catalano, E. Marilli, F. Bruhweiler, Y. Kondo, K. van der Hucht, & A. Talavera.* 439, 1011, 38-E12 (1995)

Hα Profiles of 25 Chromospherically Active Binaries. *Zeki Eker, Douglas S. Hall, & Christopher M. Anderson.* 96, 581, 9-F9 (1995)

Heating and Ionization of Stellar Chromospheres by Nonthermal Proton Beams: Implications for Impulsive Phase, Redshifted Lyman-α Radiation in Stellar Flares. *Jeffrey W. Brosius, Richard D. Robinson, & Stephen P. Maran.* 441, 385, 64-E13 (1995)

Outer Layers of a Carbon Star: The View from the *Hubble Space Telescope*. *Hollis R. Johnson, Lisa M. Ensman, David R. Alexander, Eugene H. Avrett, Alexander Brown, Kenneth G. Carpenter, Kjell Eriksson, Bengt Gustafsson, Uffe G. Jørgensen, Philip D. Judge, Jeffrey L. Linsky, Donald G. Luttermoser, Francois Querci, Monique Querci, Richard D. Robinson, & Robert F. Wing.* 443, 281, 99-B6 (1995)

Starspot Evolution, Differential Rotation, and Magnetic Cycles in the Chromospherically Active Binaries λ Andromedae, σ Geminorum, II Pegasi, and V711 Tauri. *Gregory W. Henry, Joel A. Eaton, Jamesia Hamer, & Douglas S. Hall.* 97, 513, 19-C6 (1995)

GHRS Observations of Cool, Low-Gravity Stars. II. Flow and Turbulent Velocities in the Outer Atmosphere of γ Crucis (M3.4 III). *Kenneth G. Carpenter, Richard D. Robinson, & Philip G. Judge.* 444, 424, 119-D7 (1995)

New Insights into Nonradiative Heating in Late A Star Chromospheres. *Frederick M. Walter, Lynn D. Matthews, & Jeffrey L. Linsky.* 447, 353, 177-C6 (1995)

Are Variations in the Length of the Activity Cycle Related to Changes in Brightness in Solar-Type Stars? *Sallie Baliunas & Willie Soon.* 450, 896, 243-C8 (1995)

Doppler Imaging of the Cool Spot Distribution on the Weak T Tauri Star V410 Tauri. *Artie P. Hatzes.* 451, 784, 258-A6 (1995)

A Semiempirical Determination of the Wind Velocity Structure for the Hybrid-Chromosphere Star α Trianguli Australis. *Graham M. Harper, Brian E. Wood, Jeffrey L. Linsky, Philip D. Bennett, Thomas R. Ayres, & Alexander Brown.* 452, 407, 267-F6 (1995)

Expanding Atmospheric Model Including a Chromosphere. II. Be Stars: Center-to-Limb Variation of the Emergent Intensity. *Lydia S. Cidale & Andrea C. Vázquez.* 453, 393, 286-E4 (1995)

Simultaneous *Extreme-Ultraviolet Explorer* and Optical Observations of AD Leonis: Evidence for Large Coronal Loops and the Neupert Effect in Stellar Flares. *Suzanne L. Hawley, George H. Fisher, Theodore Simon, Scott L. Cully, Susana E. Deustua, Marek Jablonski, Christopher M. Johns-Krull, Bjørn R. Pettersen, Verne Smith, William J. Spiesman, & Jeffrey Valenti.* 453, 464, 287-D14 (1995)

STARS: CIRCUMSTELLAR MATTER

Dynamics of the Envelopes of Be Stars in the Equatorial Plane. *Haiqi Chen, J. M. Marlborough, & L. B. F. M. Waters.* 384, 605, 9-F1 (1992)

The Peculiar, Fast Nova Herculis 1991. *Charles E. Woodward, R. D. Gehrz, Terry J. Jones, & G. F. Lawrence.* 384, L41, 11-C1 (1992)

IRAS 16293−2422: A Very Young Binary System? *Lee G. Mundy, Alwyn Wootten, Bruce A. Wilking, Geoffrey A. Blake, & Anneila I. Sargent.* 385, 306, 15-F5 (1992)

Polarization Variability among Wolf-Rayet Stars. VII. The Single Stars WR 14, WR 25, and WR 69. *Laurent Drissen, Carmelle Robert, & Anthony F. J. Moffat.* 386, 288, 27-F11 (1992)

Comparing Restored *HST* and VLA Imagery of R Aquarii. *J. M. Hollis, J. E. Dorband, & F. Yusef-Zadeh.* 386, 293, 27-G3 (1992)

Consequences of the Star-Stream Interaction in Algol. *Mercedes T. Richards.* 387, 329, 41-A12 (1992)

10 AU Scale Halo Structure around DG Tauri. *Wen Ping Chen, R. R. Howell, M. Simon, & J. A. Benson.* 387, L43, 43-E8 (1992)

Line Fluorescence from the Ring around SN 1987A. *Eli Dwek & James E. Felten.* 387, 551, 45-E1 (1992)

Time Variations in Millimeter-Wave Radio Recombination Lines from the Be Star MWC 349A. *M. A. Gordon.* 387, 701, 47-D5 (1992)

Unusual 3 Micron Emission Features in Three Proto–Planetary Nebulae. *T. R. Geballe, A. G. G. M. Tielens, S. Kwok, & B. J. Hrivnak.* 387, L89, 48-E1 (1992)

Velocity Streaming of *IRAS* Main-Sequence Disk Stars and the Episodic Enhancement of Particulate Disks by Interstellar Clouds. *Daniel P. Whitmire, John J. Matese, & Patrick G. Whitman.* 388, 190, 51-D1 (1992)

High Spatial Resolution Maps of Circumstellar SiC_2 in IRC +10216. *P. D. Gensheimer, Lauren Likkel, & L. E. Snyder.* 388, L31, 52-C11 (1992)

The Structure of the Inner Arcsecond of R Aquarii Observed with the *Hubble Space Telescope*. *Denis Burgarella & Francesco Paresce.* 389, L29, 66-D10 (1992)

Probing the Circumstellar Environments of Very Young Low-Mass Stars Using Water Masers. *S. Terebey, S. N. Vogel, & P. C. Myers.* 390, 181, 76-C1 (1992)

1612 MHz OH Maser Emission from Axisymmetric Circumstellar Envelopes: Miras. *Alan J. Collison & John D. Fix.* 390, 191, 76-C13 (1992)

Discovery of Bipolar OH Maser Emission from the High-Latitude Supergiant Star HD 101584. *P. te Lintel Hekkert, J. M. Chapman, & A. A. Zijlstra.* 390, L23, 78-D9 (1992)

Location of the Dust Formation Region for Mira Variables. *P. F. Bowers.* 390, L27, 78-E1 (1992)

Candidates for Extreme Carbon Stars. *Kevin Volk, Sun Kwok, & Philip P. Langill.* 391, 285, 89-D12 (1992)

Near-Infrared Polarized Images of a Nebula around T Tauri. *David A. Weintraub, Joel H. Kastner, B. Zuckerman, & Ian Gatley.* 391, 784, 97-F7 (1992)

Infrared Studies of Pre–Main-Sequence Intermediate-Mass Stars: LkHα 198. *Antonella Natta, Francesco Palla, Harold M. Butner, Neal J. Evans II, & Paul M. Harvey.* 391, 805, 98-A1 (1992)

Discovery of Hot Ammonia in the Proto–Planetary Nebulae CRL 618 and CRL 2688. *Jesús Martín-Pintado & Rafael Bachiller.* 391, L93, 99-G12 (1992)

Chemistry in Circumstellar Disks: CS toward HL Tauri. *Geoffrey A. Blake, Ewine F. van Dishoeck, & Anneila I. Sargent.* 391, L99, 100-A5 (1992)

8–14 Micron Spectroscopy of Carbon Stars Associated with Silicate Dust. *Paul D. LeVan, G. C. Sloan, Irene R. Little-Marenin, & G. L. Grasdalen.* 392, 702, 111-A1 (1992)

The Nature of Dust around the Post–Asymptotic Giant Branch Objects HD 161796 and HD 179821. *K. Justtanont, M. J. Barlow, C. J. Skinner, & A. G. G. M. Tielens.* 392, L75, 113-D8 (1992)

Comment on Red Giant Envelopes as Broad Emission-Line Clouds in Active Galactic Nuclei. *John Kwan, F. Z. Cheng, & Zongwei Li.* 393, 87, 115-B9 (1992)

Interpreting Infrared Color-Color Diagrams: Circumstellar Disks around Low- and Intermediate-Mass Young Stellar Objects. *Charles J. Lada & Fred C. Adams.* 393, 278, 117-E12 (1992)

Water Masers in W49N—The Youngest Stellar Jet? *Mordecai-Mark Mac Low & Moshe Elitzur.* 393, L33, 120-E6 (1992)

Measurement of CO Overtone Line Profiles in SVS 13. *John S. Carr & Alan T. Tokunaga.* 393, L67, 127-D7 (1992)

Tidal Disruption of a Star by a Massive Disk (The Axisymmetric Roche Problem). *John W. Woodward, Srivaths Sankaran, & Joel E. Tohline.* 394, 248, 131-B1 (1992)

The Orbital Parameters and the *IUE* Spectrum of the Single-lined Spectroscopic Binary HD 698. *Jorge Sahade, Rodolfo Barbá, & Yoji Kondo.* 81, 303, 39-B1 (1992)

Physical Properties of Be Star Envelopes from Balmer and Fe II Emission Lines. *Arne Slettebak, George W. Collins II, & Ryland Truax.* 81, 335, 39-D13 (1992)

Model Scattering Envelopes of Young Stellar Objects. I. Method and Application to Circumstellar Disks. *Barbara A. Whitney & Lee Hartmann.* 395, 529, 149-D1 (1992)

The 8–13 Micron Spectrum of the Young Stellar Object WL 16. *M. S. Hanner, A. T. Tokunaga, & T. R. Geballe.* 395, L111, 154-C12 (1992)

Evidence for Unseen Companions around T Tauri Stars. *Kenneth A. Marsh & Michael J. Mahoney.* 395, L115, 154-D1 (1992)

Protonated Acetylene: An Important Circumstellar and Interstellar Ion. *A. E. Glassgold, A. Omont, & M. Guélin.* 396, 115, 156-E5 (1992)

OH/IR Star Color Mimics. *B. M. Lewis.* 396, 251, 158-B13 (1992)

A Sensitive Search for Rotational Lines of Vibrationally Excited HC_5N in IRC +10°216. *M. B. Bell, P. A. Feldman, & L. W. Avery.* 396, 643, 165-D1 (1992)

Interstellar Scattering toward the Galactic Center as Probed by OH/IR Stars. *Huib Jan van Langevelde, Dale A. Frail, James M. Cordes, & Philip J. Diamond.* 396, 686, 165-G9 (1992)

Newly Identified Main-Sequence A Stars with Circumstellar Dust. *K.-P. Cheng, F. C. Bruhweiler, Y. Kondo, & C. A. Grady.* 396, L83, 167-C1 (1992)

Dynamics of the Envelopes of Be Stars in the Equatorial Plane. II. The Influence of a Weak Magnetic Field on the Azimuthal Motion of a Slowly Expanding Wind. *Haiqi Chen & J. M. Marlborough.* 397, 242, 171-A3 (1992)

Herbig Ae/Be Stars: Intermediate-Mass Stars Surrounded by Massive Circumstellar Accretion Disks. *Lynne A. Hillenbrand, Stephen E. Strom, Frederick J. Vrba, & Jocelyn Keene.* 397, 613, 178-F1 (1992)

On the Interaction between Dust and Gas in Late-Type Stellar Atmospheres and Winds. *K. B. MacGregor & R. E. Stencel.* 397, 644, 179-A13 (1992)

Observations of R Coronae Borealis Stars in Decline: Empirical Arguments for Dust Formation near the Stellar Surface. *Geoffrey C. Clayton, Barbara A. Whitney, S. Adam Stanford, & John S. Drilling.* 397, 652, 179-B10 (1992)

BIMA Observations of HCO^+ Emission from the Planetary Nebula NGC 7027. *Lauren Likkel.* 397, L115, 181-E6 (1992)

Infrared Emission from Dust Structures Surrounding Herbig Ae/Be Stars. *F. Berrilli, G. Corciulo, G. Ingrosso, D. Lorenzetti, B. Nisini, & F. Strafella.* 398, 254, 185-A1 (1992)

Near-Infrared Spectrophotometry of FU Orionis Variables. *S. Sato, K. Okita, T. Yamashita, K. Mizutani, H. Shiba, Y. Kobayashi, & H. Takami.* 398, 273, 185-B7 (1992)

Polarization and the Envelopes of B[e] Supergiants in the Magellanic Clouds. *A. M. Magalhães.* 398, 286, 185-C11 (1992)

Variation in the Near-Infrared Surface Brightness Distribution of the Bipolar Nebula OH 231.8+4.2. *Joel H. Kastner, David A. Weintraub, B. Zuckerman, E. E. Becklin, I. McLean, & I. Gatley.* 398, 552, 191-A8 (1992)

Multiple Jets from the Young Star IRAS 21334+5039. *Howard A. Smith & Jacqueline Fischer.* 398, L99, 194-D1 (1992)

The Synchrotron Bays of the Crab Nebula: A Magnetic Structure Associated with a Presupernova Circumstellar Disk. *Robert A. Fesen, Crystal L. Martin, & J. Michael Shull.* 399, 599, 205-C7 (1992)

Dynamics of Kepler's Supernova Remnant. *Kazimierz J. Borkowski, John M. Blondin, & Craig L. Sarazin.* 400, 222, 211-F5 (1992)

The Excitation Temperature of HC_9N in the Circumstellar Envelope of IRC +10216. *M. B. Bell, L. W. Avery, J. M. MacLeod, & H. E. Matthews.* 400, 551, 217-B12 (1992)

The Peculiar Infrared Temporal Development of Nova Vulpeculae 1987 (QV Vulpeculae). *R. D. Gehrz, T. J. Jones, C. E. Woodward, M. A. Greenhouse, R. M. Wagner, T. E. Harrison, T. L. Hayward, & J. Benson.* 400, 671, 218-G1 (1992)

Polycyclic Aromatic Hydrocarbon Formation in Carbon-rich Stellar Envelopes. *Isabelle Cherchneff, John R. Barker, & Alexander G. G. M. Tielens.* 401, 269, 224-D1 (1992)

Mass-Loss Rates for *IRAS*-bright Red Giants: A Revised Model of Circumstellar CO Emission. *Joel H. Kastner.* 401, 337, 225-B11 (1992)

High-Excitation ^{29}SiO and ^{30}SiO Maser Emission. *J. Cernicharo & V. Bujarrabal.* 401, L109, 233-E5 (1992)

A Spectral Line Survey of IRC +10216 at Millimeter and Submillimeter Wavelengths. *L. W. Avery, T. Amano, M. B. Bell, P. A. Feldman, J. W. C. Johns, J. M. MacLeod, H. E. Matthews, D. C. Morton, J. K. G. Watson, B. E. Turner, S. S. Hayashi, G. D. Watt, & A. S. Webster.* 83, 363, 62-G3 (1992)

Molecular Line Emission from Circumstellar Disks. *Steven V. W. Beckwith & Anneila I. Sargent.* 402, 280, 4-E9 (1993)

CO Observations of Candidates for Carbon-rich Asymptotic Giant Branch and Post–Asymptotic Giant Branch Stars. *Kevin Volk, Sun Kwok, & Andrew W. Woodsworth.* 402, 292, 4-F10 (1993)

Model Scattering Envelopes of Young Stellar Objects. II. Infalling Envelopes. *Barbara A. Whitney & Lee Hartmann.* 402, 605, 10-B5 (1993)

The Circumstellar Gas Surrounding 51 Ophiuchi: A Candidate Proto–Planetary System Similar to β Pictoris. *C. A. Grady & J. M. S. Silvis.* 402, L61, 12-G1 (1993)

Upper Limits to the CO J = 1–0 Emission around Vega-like Stars: Gas Depletion of the Circumstellar Ring around ϵ Eridani. *Takuya Yamashita, Toshihiro Handa, Toshihiro Omodaka, Yoshimi Kitamura, Eiko Kawazoe, Saeko S. Hayashi, & Norio Kaifu.* 402, L65, 12-G7 (1993)

Model Atmospheres: Tool for Identifying Interstellar Features. *P. C. Frisch, S. E. Slojkowski, T. Rodriguez-Bell, & D. York.* 84, 55, 1-G3 (1993)

Faint Object Camera Observations of the Shape and Expansion of SN 1987A. *P. Jakobsen, F. Macchetto, & N. Panagia.* 403, 736, 24-G10 (1993)

Spatially Resolved Spectra of Silicate Dust around α Orionis. *G. C. Sloan, G. L. Grasdalen, & Paul D. LeVan.* 404, 328, 32-A3 (1993)

Evidence for the Cospatial Origin of SiO Masers in Different Rotational Transitions. *G. C. McIntosh & C. Read Predmore.* 404, L71, 40-E11 (1993)

Formation of the Circumstellar Shell around SN 1987A. *John M. Blondin & Peter Lundqvist.* 405, 337, 45-C13 (1993)

Do the Spectral Energy Distributions of GK Tauri and HK Tauri Indicate the Presence of Planetary Companions? *Kenneth A. Marsh & Michael J. Mahoney.* 405, L71, 54-D10 (1993)

The IRC +10216 Circumstellar Envelope. III. Infrared Molecular Line Profiles. *J. J. Keady & S. T. Ridgway.* 406, 199, 57-E5 (1993)

Infrared Observations of the Remarkable Main-Sequence Star HD 98800. *B. Zuckerman & E. E. Becklin.* 406, L25, 60-G10 (1993)

Infrared Studies of Circumstellar Matter around Herbig Ae/Be and Related Stars. *Antonella Natta, Francesco Palla, Harold M. Butner, Neal J. Evans II, & Paul M. Harvey.* 406, 674, 66-C4 (1993)

The Excess Infrared Emission of Herbig Ae/Be Stars: Disks or Envelopes? *Lee Hartmann, Scott J. Kenyon, & Nuria Calvet.* 407, 219, 71-F11 (1993)

High-Excitation SiO Maser Emission in VY Canis Majoris: Detection of the $v = 4$ $J = 5$–4 Transition. *J. Cernicharo, V. Bujarrabal, & J. L. Santarén.* 407, L33, 75-D6 (1993)

The Abundance Distribution of C_4H in IRC +10216. *Aditya Dayal & John H. Bieging.* 407, L37, 75-E1 (1993)

Embedded Star Clusters Associated with Luminous *IRAS* Point Sources. *John M. Carpenter, Ronald L. Snell, F. Peter Schloerb, & M. F. Skrutskie.* 407, 657, 78-F11 (1993)

η Carinae: A New Model. *J. M. Borgwald & M. W. Friedlander.* 408, 230, 86-A3 (1993)

Circumstellar Molecular Gas of the HH 34 and HH 111 Exciting Stars. *Karl R. Stapelfeldt & Nicholas Z. Scoville.* 408, 239, 86-B1 (1993)

The Infrared Temporal Evolution of FG Sagittae. *Charles E. Woodward, G. F. Lawrence, R. D. Gehrz, Terry J. Jones, H. A. Kobulnicky, James Cole, Tracy Hodge, & Harley A. Thronson, Jr.* 408, L37, 89-B8 (1993)

LSIV $-12°111$: A Candidate Halo Proto–Planetary Nebula. *E. S. Conlon, P. L. Dufton, R. J. H. McCausland, & F. P. Keenan.* 408, 593, 92-E11 (1993)

Dynamics of the Envelopes of Be Stars and Shell Stars in the Equatorial Plane: A Potential Similarity and Difference Based upon the Continuous Energy Distribution. *J. M. Marlborough, Haiqi Chen, & L. B. F. M. Waters.* 408, 646, 93-C1 (1993)

Gas and Dust in the Pre–Main-Sequence Multiple System GG Tauri. *D. W. Koerner, A. I. Sargent, & S. V. W. Beckwith.* 408, L93, 95-D7 (1993)

Detection of Circumstellar Gas Associated with GG Tauri. *M. F. Skrutskie, R. L. Snell, K. M. Strom, S. E. Strom, S. Edwards, Y. Fukui, A. Mizuno, M. Hayashi, & N. Ohashi.* 409, 422, 102-C1 (1993)

Equatorial Disk Formation around Rotating Stars Due to Ram Pressure Confinement by the Stellar Wind. *J. E. Bjorkman & J. P. Cassinelli.* 409, 429, 102-C10 (1993)

Circumstellar Material in Algol: A Study of the Balmer Line Profiles. *Mercedes T. Richards.* 86, 255, 17-D3 (1993)

Circumstellar Shells Resolved in *IRAS* Survey Data. II. Analysis. *K. Young, T. G. Phillips, & G. R. Knapp.* 409, 725, 108-B3 (1993)

The Formation of Cyanopolyyne Molecules in IRC +10216. *Isabelle Cherchneff, Alfred E. Glassgold, & Gary A. Mamon.* 410, 188, 114-D12 (1993)

Search for Ionized Cores in Proto–Planetary Nebulae, and the Asymptotic Giant Branch to Planetary Nebula Transition. *Hans Ulrich Käufl, Alvio Renzini, & Letizia Stanghellini.* 410, 251, 115-C1 (1993)

Coronographic Imaging of the Bipolar Nebula around the Luminous Blue Variable R127. *Mark Clampin, Antonella Nota, David A. Golimowski, Claus Leitherer, & Samuel T. Durrance.* 410, L35, 118-C5 (1993)

The Dynamics of Stellar Outflows Dominated by Interaction of Dust and Radiation. *Nathan Netzer & Moshe Elitzur.* 410, 701, 122-D11 (1993)

Elliptical Polarimetry of the Interacting Binary Star V367 Cygni. *Nicholas M. Elias II.* 410, 785, 123-E1 (1993)

Circumstellar Shells Resolved in the *IRAS* Survey Data. I. Data Processing Procedure, Results, and Confidence Tests. *K. Young, T. G. Phillips, & G. R. Knapp.* 86, 517, 21-B11 (1993)

The Inner-Disk and Stellar Properties of the Young Stellar Object WL 16. *John S. Carr, Alan T. Tokunaga, Joan Najita, Frank H. Shu, & Alfred E. Glassgold.* 411, L37, 134-A13 (1993)

Coronagraphic Imaging of the β Pictoris Circumstellar Disk: Evidence of Changing Disk Structure within 100 AU. *David A. Golimowski, Samuel T. Durrance, & Mark Clampin.* 411, L41, 134-B6 (1993)

A Study of Circumstellar Envelopes around Bright Carbon Stars. I. Structure, Kinematics, and Mass-Loss Rate. *H. Olofsson, K. Eriksson, B. Gustafsson, & U. Carlström.* 87, 267, 30-E1 (1993)

A Study of Circumstellar Envelopes around Bright Carbon Stars. II. Molecular Abundances. *H. Olofsson, K. Eriksson, B. Gustafsson, & U. Carlström.* 87, 305, 31-A5 (1993)

The Temperature Profile of T Tauri Disks. *Antonella Natta.* 412, 761, 153-C6 (1993)

Ultraviolet Spectropolarimetry of the Be Star PP Carinae with the Wisconsin Ultraviolet Photo-Polarimeter Experiment. *K. S. Bjorkman, M. R. Meade, K. H. Nordsieck, C. M. Anderson, B. L. Babler, G. C. Clayton, A. D. Code, A. M. Magalhães, R. E. Schulte-Ladbeck, M. Taylor, & B. A. Whitney.* 412, 810, 153-G11 (1993)

The Discovery of Two FU Orionis Objects in L1641. *Karen M. Strom & Stephen E. Strom.* 412, L63, 155-D1 (1993)

Submillimeter CO Observations of Warm Gas around T Tauri Stars. *K. F. Schuster, A. I. Harris, Neils Anderson, & A. P. G. Russell.* 412, L67, 155-D7 (1993)

Infrared CO Emission from Young Stars: High-Resolution Spectroscopy. *C. J. Chandler, J. E. Carlstrom, N. Z. Scoville, W. R. F. Dent, & T. R. Geballe.* 412, L71, 155-D13 (1993)

Bolometric Temperatures of Young Stellar Objects. *P. C. Myers & E. F. Ladd.* 413, L47, 162-G1 (1993)

Pumping of Main Line OH Masers in the Circumstellar Envelopes of Type I Mira Variables. *Alan J. Collison & Gerald E. Nedoluha.* 413, 735, 165-E10 (1993)

Upper Limits to the Detection of Ammonia from Protoplanetary Disks around HL Tauri and L1551-IRS 5. *José F. Gómez, José M. Torrelles, Paul T. P. Ho, Luis F. Rodríguez, & Jorge Cantó.* 414, 333, 174-B6 (1993)

The Small-Scale Structure and Kinematics of B335. *Claire J. Chandler & Anneila I. Sargent.* 414, L29, 175-E13 (1993)

The Contribution of Disks and Envelopes to the Millimeter Continuum Emission from Very Young Low-Mass Stars. *S. Terebey, C. J. Chandler, & P. André.* 414, 759, 180-F6 (1993)

Submillimeter Studies of Main-Sequence Stars. *B. Zuckerman & E. E. Becklin.* 414, 793, 181-B4 (1993)

Circumstellar Material in TX Ursae Majoris. *Geary E. Albright & Mercedes T. Richards.* 414, 830, 181-E6 (1993)

LS II $+34°26$ is a Low-Mass Post–Asymptotic Giant Branch B Supergiant and Not a Massive Population I B Star Located near the Outer Edge of the Galaxy. *M. Parthasarathy.* 414, L109, 186-A7 (1993)

Detection of Accreting Gas toward HD 45677: A Newly Recognized, Herbig Be Proto–Planetary System. *C. A. Grady, K. S. Bjorkman, D. Shepherd, R. E. Schulte-Ladbeck, M. R. Pérez, D. de Winter, & P. S. Thé.* 415, L39, 192-B6 (1993)

The Dust Content of Evolved Circumstellar Envelopes and the Optical Properties of Dust at Submillimeter to Radio Wavelengths. *G. R. Knapp, G. Sandell, & E. I. Robson.* 88, 173, 42-E7 (1993)

Evidence of Magnetic Activity in Short-Period Algol Binaries. *Mercedes T. Richards & Geary E. Albright.* 88, 199, 42-G7 (1993)

Evidence for Hydrated Silicates toward SN 1987A. *Ralf Timmermann & Harold P. Larson.* 415, 820, 198-A13 (1993)

Atomic Carbon in the Envelope of IRC +10216. *Jocelyn Keene, K. Young, T. G. Phillips, Thomas H. Büttgenbach, & John E. Carlstrom.* 415, L131, 200-E1 (1993)

Discovery of Interstellar Water Lines at 437, 439, and 471 GHz: Strong Case for Water Maser Formation behind C-Type Shocks. *Gary J. Melnick, Karl M. Menten, Thomas G. Phillips, & Todd Hunter.* 416, L37, 207-E13 (1993)

Circumstellar Properties of S Stars. I. Dust Features. *P. S. Chen & Sun Kwok.* 416, 769, 213-A1 (1993)

The Location of Warm HC_3N and Warm HC_5N Gas in the Circumstellar Envelope of IRC +10216. *M. B. Bell.* 417, 305, 221-C9 (1993)

Detection of Silicates in the 51 Ophiuchi System. *S. B. Fajardo-Acosta, C. M. Telesco, & R. F. Knacke.* 417, L33, 223-B9 (1993)

C_3S and C_5S in IRC +10216. *M. B. Bell, L. W. Avery, & P. A. Feldman.* 417, L37, 223-C1 (1993)

Origin of the Hydrocarbon Component of Carbonaceous Chondrites: The Star-Meteorite Connection. *Wei Lee & Thomas J. Wdowiak.* 417, L49, 223-D8 (1993)

Radiative Cooling of Warm Molecular Gas. *David A. Neufeld & Michael J. Kaufman.* 418, 263, 234-C11 (1993)

Extreme-Ultraviolet Extinction Measurements on Hydrogenated and Dehydrogenated Amorphous Carbon Grains. *L. Colangeli, V. Mennella, A. Blanco, S. Fonti, E. Bussoletti, H. E. Gumlich, H. C. Mertins, & Ch. Jung.* 418, 435, 236-D7 (1993)

The Silicates in the Disk of β Pictoris. *R. F. Knacke, S. B. Fajardo-Acosta, C. M. Telesco, J. A. Hackwell, D. K. Lynch, & R. W. Russell.* 418, 440, 236-D13 (1993)

Constraints on the Evolution of Remnant Protostellar Dust Debris around HR 4796. *M. Jura, B. Zuckerman, E. E. Becklin, & R. C. Smith.* 418, L37, 238-E5 (1993)

Simulated Ratio Recombination Line Emission at 1.3 Centimeters toward MWC 349. *J. Martín-Pintado, R. Gaume, R. Bachiller, K. Johnston, & P. Planesas.* 418, L79, 245-E2 (1993)

The Formation of Carbon Chain Molecules in IRC +10216. *Isabelle Cherchneff & Alfred E. Glassgold.* 419, L41, 252-F9 (1993)

Circumstellar CO Emission of Evolved Stars and Mass Loss. *John Kwan & Zoe Webster.* 419, 674, 256-B3 (1993)

Hydrodynamical Models for X-Ray Emissions from SN 1993J in M81. *Tomoharu Suzuki, Shiomi Kumagai, Toshikazu Shigeyama, Ken'ichi Nomoto, Hitoshi Yamaoka, & Hideyuki Saio.* 419, L73, 259-D11 (1993)

A Hot Neon Nova: Optical Spectrophotometry and the Physics of Nova Cygni 1992. *A. J. Barger, J. S. Gallagher, K. S. Bjorkman, K. A. Johansen, & K. H. Nordsieck.* 419, L85, 259-E12 (1993)

Optical Spectroscopy of the Dusty K5 V Star HD 98800. *Francis C. Fekel & Bernard W. Bopp.* 419, L89, 259-F3 (1993)

Detection of Water Vapor in T Tauri Stars. *H. Shiba, S. Sato, T. Yamashita, Y. Kobayashi, & H. Takami.* 89, 299, 53-F1 (1993)

The Stability of Thick, Self-gravitating Disks in Protostellar Systems. *John W. Woodward, Joel E. Tohline, & Izumi Hachisu.* 420, 247, 4-A7 (1994)

Emission from Circumstellar Interaction in Normal Type II Supernovae. *Roger A. Chevalier & Claes Fransson.* 420, 268, 4-C1 (1994)

Near-Infrared Spectroscopy of Proto–Planetary Nebulae. *Bruce J. Hrivnak, Sun Kwok, & T. R. Geballe.* 420, 783, 12-F1 (1994)

From T Tauri Stars to Protostars: Circumstellar Material and Young Stellar Objects in the ρ Ophiuchi Cloud. *Philippe André & Thierry Montmerle.* 420, 837, 13-C12 (1994)

Observations of 13.5 Micron Rotation-Vibration Lines of SiS in IRC +10216. *R. J. Boyle, J. J. Keady, D. E. Jennings, K. L. Hirsch, & G. R. Wiedemann.* 420, 863, 13-E12 (1994)

A Search for Circumstellar Material around Pulsars. *J. A. Phillips & C. J. Chandler.* 420, L83, 15-E9 (1994)

Discovery of a Deeply Embedded Companion to LkHα 234. *David A. Weintraub, Joel H. Kastner, & Ashwin Mahesh.* 420, L87, 15-F1 (1994)

The Nature of the Radio Recombination Line Emission from MWC 349A. *M. A. Gordon.* 421, 314, 19-G7 (1994)

A *Hubble Space Telescope* Ultraviolet Spectrum of SN 1993J. *David J. Jeffery, Robert P. Kirshner, Peter M. Challis, Chun S. J. Pun, Alexei V. Filippenko, Thomas Matheson, David Branch, Roger A. Chevalier, Claes Fransson, Nino Panagia, Robert V. Wagoner, J. Craig Wheeler, & Alejandro Clocchiatti.* 421, L27, 21-F9 (1994)

The Discrimination between O- and C-rich Circumstellar Envelopes from Molecular Observations. *V. Bujarrabal, A. Fuente, & A. Omont.* 421, L47, 22-B1 (1994)

Ultraviolet Light Curves of β Lyrae: Comparison of *OAO* A-2, *IUE*, and *Voyager* Observations. *Yoji Kondo, George E. McCluskey, Jeffrey M. S. Silvis, Ronald S. Polidan, Carolina P. S. McCluskey, & Joel A. Eaton.* 421, 787, 28-A9 (1994)

Pumping of Main Line OH Masers in the Circumstellar Envelopes of OH/Infrared Stars. *Alan J. Collison & Gerald E. Nedoluha.* 422, 193, 32-E1 (1994)

Imaging Polarimetry of HL Tauri and GG Tauri: A Geometrically Thin Disk around GG Tauri. *Takuya Yamashita, Klaus-W. Hodapp, & Toby J. T. Moore.* 422, L21, 36-D7 (1994)

A Millimeter-Wavelength Survey of S Stars for Mass Loss and Chemistry. *John H. Bieging & William B. Latter.* 422, 765, 41-D1 (1994)

Further Studies of Gravitationally Unstable Protostellar Disks. *Leslie Tomley, Thomas Y. Steiman-Cameron, & Patrick Cassen.* 422, 850, 42-D8 (1994)

Intensity-dependent Circular Polarization and Circumstellar Magnetic Fields from the Observation of SiO Masers. *Gerald E. Nedoluha & William D. Watson.* 423, 394, 51-A11 (1994)

Evidence Signaling the Start of Enhanced Counterjet Flow in the Symbiotic System R Aquarii. *A. G. Michalitsianos, M. Perez, & M. Kafatos.* 423, 441, 51-E13 (1994)

A Laboratory Approach to the Interstellar Sulfide Dust Problem. *B. Begemann, J. Dorschner, T. Henning, H. Mutschke, & E. Thamm.* 423, L71, 54-C1 (1994)

Infrared Spectroscopy and Imaging Polarimetry of the Disk around the T Tauri Star RNO 91. *David A. Weintraub, Stephen C. Tegler, Joel H. Kastner, & Terrence Rettig.* 423, 674, 57-A3 (1994)

Mid-Infrared Images of the Post–Asymptotic Giant Branch Star HD 161796. *C. J. Skinner, M. M. Meixner, G. W. Hawkins, E. Keto, J. G. Jernigan, & J. F. Arens.* 423, L135, 61-B11 (1994)

A Multiwavelength Study of Star Formation in the L1495E Cloud in Taurus. *Karen M. Strom & Stephen E. Strom.* 424, 237, 64-G4 (1994)

Capture and Induced Disk Accretion in Young Star Encounters. *Eve C. Ostriker.* 424, 292, 65-D14 (1994)

The Photodissociation of Circumstellar HCN and SiS. *J. Wirsich.* 424, 370, 66-D14 (1994)

Modeling of the Hydrogen Maser Disk in MWC 349. *Victor O. Ponomarev, Howard A. Smith, & Vladimir S. Strelnitski.* 424, 976, 77-A1 (1994)

Optical Variability in the Unusual K5 V Infrared-Excess Star HD 98800. *Gregory W. Henry & Douglas S. Hall.* 425, L25, 85-D9 (1994)

A Search for Ultraviolet Circumstellar Gas Absorption Features in α Piscis Austrinus (Fomalhaut), A Possible β Pictoris–like System. *K.-P. Cheng, Fred C. Bruhweiler, & Yoji Kondo.* 425, L33, 85-E7 (1994)

Hot Gas and the Origin of the Nebular Continuum in Novae. *Pedro Saizar & Gary J. Ferland.* 425, 755, 91-B10 (1994)

Extreme ^{26}Mg and ^{17}O Enrichments in an Orgueil Corundum: Identification of a Presolar Oxide Grain. *I. D. Hutcheon, G. R. Huss, A. J. Fahey, & G. J. Wasserburg.* 425, L97, 94-F7 (1994)

Fluorescent K I 7699 Å Emission from Circumstellar Shells of Red Giants: Evidence for Highly Asymmetric Winds. *Bertrand Plez & David L. Lambert.* 425, L101, 94-F13 (1994)

A $C^{18}O$ (J = 1–0) Survey of Protostellar Candidates Embedded in the Taurus Molecular Cloud. *Masahiko Hayashi, Tetsuo Hasegawa, Nagayoshi Ohashi, & Kazuyoshi Sunada.* 426, 234, 99-A8 (1994)

Extinction, Ejecta Masses, and Radial Velocities of Novae. *Robert E. Williams.* 426, 279, 99-E8 (1994)

Narrowband *HST* Imagery of the Young Planetary Nebula Henize 1357. *M. Bobrowsky.* 426, L47, 103-F5 (1994)

Submillimeter Molecular Line Observations of IRC +10216: Searches for MgH, SiH_2, and HCO^+, and Detection of Hot HCN. *L. W. Avery, M. B. Bell, C. T. Cunningham, P. A. Feldman, R. H. Hayward, J. M. McLeod, H. E. Matthews, & J. D. Wade.* 426, 737, 107-E12 (1994)

Evidence of Circumstellar Matter Surrounding the Hercules X-1 System. *C. S. Choi, T. Dotani, F. Nagase, F. Makino, J. E. Deeter, & K. W. Min.* 427, 400, 114-G5 (1994)

Three-dimensional Structure of the Circumstellar Envelope of CRL 618 based on the ^{13}CO J = 1–0 Mapping Observations. *Issei Yamamura, Katsunori M. Shibata, Takashi Kasuga, & Shuji Deguchi.* 427, 406, 114-G13 (1994)

Circumstellar Dust Emission Models. *Mark G. Wolfire & Ed Churchwell.* 427, 889, 123-F6 (1994)

The Envelopes of Be Stars Driven by Optically Thin Lines. *Haiqi Chen & J. M. Marlborough.* 427, 1005, 125-B7 (1994)

Rotation in the Ionized Envelope of MWC 349A. *Luis F. Rodríguez & Timothy S. Bastian.* 428, 324, 132-B12 (1994)

Circular and Linear Polarization of the SiO Masers in VY Canis Majoris. *G. C. McIntosh, C. Read Predmore, & Nimesh A. Patel.* 428, L29, 134-E1 (1994)

Molecular Abundances and Low-Mass Star Formation. I. Si- and S-bearing Species toward IRAS 16293−2422. *Geoffrey A. Blake, Ewine F. van Dishoeck, David J. Jansen, T. D. Groesbeck, & Lee G. Mundy.* 428, 680, 138-F13 (1994)

Induced Nucleation of Carbon Dust in Red Giant Stars. *Brian J. Cadwell, Hai Wang, Eric D. Feigelson, & Michael Frenklach.* 429, 285, 147-E10 (1994)

The Radio Source around η Carinae. *S. M. White, R. A. Duncan, J. Lim, G. J. Nelson, S. A. Drake, & M. R. Kundu.* 429, 380, 148-G1 (1994)

A Connection between Submillimeter Continuum Flux and Separation in Young Binaries. *Eric L. N. Jensen, Robert D. Mathieu, & Gary A. Fuller.* 429, L29, 150-D9 (1994)

A 7 Micron Dust Emission Feature in Oxygen-rich Circumstellar Shells. *J. H. Goebel, J. D. Bregman, & F. C. Witteborn.* 430, 317, 163-B3 (1994)

Observation of a Ring Structure in SiO Maser Emission from Late-Type Stars. *P. J. Diamond, A. J. Kemball, W. Junor, A. Zensus, J. Benson, & V. Dhawan.* 430, L61, 166-A10 (1994)

Oxygen Isotopes in Circumstellar Al_2O_3 Grains from Meteorites and Stellar Nucleosynthesis. *Gary R. Huss, Albert J. Fahey, Roberto Gallino, & G. J. Wasserburg.* 430, L81, 166-C13 (1994)

Observations of the Acceleration Regions of OH/IR Stars. *John D. Fix & Mark G. Mulhern.* 430, 824, 172-B5 (1994)

The Puzzle of Silicon, Titanium, and Magnesium Anomalies in Meteoritic Silicon Carbide Grains. *Roberto Gallino, Claudia M. Raiteri, Maurizio Busso, & Francesca Matteucci.* 430, 858, 172-E13 (1994)

Hard X-Rays from SN 1993J. *M. D. Leising, J. D. Kurfess, D. D. Clayton, D. A. Grabelsky, J. E. Grove, W. N. Johnson, G. V. Jung, R. L. Kinzer, R. A. Kroeger, W. R. Purcell, M. S. Strickman, L.-S. The, & M. P. Ulmer.* 431, L95, 191-F1 (1994)

Water Masers Associated with Low-Mass Stars: A 13 Month Monitoring Survey. *Bruce A. Wilking, Mark J. Claussen, Priscilla J. Benson, Philip C. Myers, Susan Terebey, & Alwyn Wootten.* 431, L119, 192-B1 (1994)

Stellar Occultation of Polarized Light from Circumstellar Electrons. IV. Detached Binary Systems. *G. K. Fox.* 432, 262, 196-D10 (1994)

Constraining Circumstellar Environments: Far-Infrared Observations of Herbig Ae/Be Stars. *James Di Francesco, Neal J. Evans II, Paul M. Harvey, Lee G. Mundy, & Harold M. Butner.* 432, 710, 204-G8 (1994)

Variable Extinction in HD 45677 and the Evolution of Dust Grains in Pre–Main-Sequence Disks. *Michael L. Sitko, Elaine M. Halbedel, Geoffrey F. Lawrence, J. Allyn Smith, & Ken Yanow.* 432, 753, 205-D3 (1994)

G5.89−0.39: A Compact H II Region with a Very Dense Circumstellar Dust Torus. *Paul M. Harvey, Daniel F. Lester, Cecilia Colomé, Beverly Smith, Jean-Louis Monin, & Isabelle Vauglin.* 433, 187, 210-F1 (1994)

Near-Infrared (J, H, K) Imaging of Herbig Ae/Be Stars. *Wenbin Li, Neal J. Evans II, Paul M. Harvey, & Cecilia Colomé.* 433, 199, 210-G3 (1994)

The CO/SiO Radiative Instability in Cool Star Atmospheres Revisited. *M. Cuntz & D. O. Muchmore.* 433, 303, 212-B3 (1994)

The Molecular Emission-Line Spectrum of IRC +10216 between 330 and 358 GHz. *T. D. Groesbeck, T. G. Phillips, & Geoffrey A. Blake.* 94, 147, 53-F12 (1994)

Ultraviolet Spectral Classification and Stellar Winds in a Sample of Be and Standard Stars. *Arne Slettebak.* 94, 163, 54-A5 (1994)

Exotic Fluoride Molecules in IRC +10216: Confirmation of AlF and Searches for MgF and CaF. *L. M. Ziurys, A. J. Apponi, & T. G. Phillips.* 433, 729, 220-B7 (1994)

Silicates and Aromatic Hydrocarbons in the 10 Micron Spectrum of the Taurus Dark Cloud Source Elias 1. *Martha S. Hanner, Timothy Y. Brooke, & Alan T. Tokunaga.* 433, L97, 224-C7 (1994)

10 Micron Imaging of UZ Tauri: Evidence for Circumstellar Disk Clearing due to a Close Companion Star. *A. M. Ghez, J. P. Emerson, J. R. Graham, M. Meixner, & C. J. Skinner.* 434, 707, 237-E3 (1994)

The Particle-Size Distribution in the Dust Ejected from IRC +10216. *M. Jura.* 434, 713, 237-E12 (1994)

Protostellar Accretion Disks Resolved with the JCMT-CSO Interferometer. *O. P. Lay, J. E. Carlstrom, R. E. Hills, & T. G. Phillips.* 434, L75, 241-G9 (1994)

The Theoretical Polarization of Pure Scattering Axisymmetric Circumstellar Envelopes. *G. K. Fox.* 435, 372, 248-E1 (1994)

Thin Shell Formation in Radiative Shocks. I. Supernova Remnants in Low-Density Media. *José Franco, Walter Warren Miller III, S. J. Arthur, Guillermo Tenorio-Tagle, & Roberto Terlevich.* 435, 805, 257-B10 (1994)

Molecular Rotational Line Profiles from Oxygen-rich Red Giant Winds. *K. Justtanont, C. J. Skinner, & A. G. G. M. Tielens.* 435, 852, 257-G6 (1994)

Postrefurbishment Mission *Hubble Space Telescope* Images of the Core of the Orion Nebula: Proplyds, Herbig-Haro Objects, and Measurements of a Circumstellar Disk. *C. R. O'Dell & Zheng Wen.* 436, 194, 263-G8 (1994)

The Effects of Gravity Darkening on the Ultraviolet Continuum Polarization Produced by Circumstellar Disks. *J. E. Bjorkman & K. S. Bjorkman.* 436, 818, 277-A1 (1994)

Ultraviolet Spectra of Amorphous Carbon Grains: Comparison with the Circumstellar Extinction around C-rich Objects. *A. M. Muci, A. Blanco, S. Fonti, & V. Orofino.* 436, 831, 277-B3 (1994)

A Direct Image of Wind Interaction in the Post-AGB Evolution: CO Observations of M1-92. *V. Bujarrabal, J. Alcolea, R. Neri, & M. Grewing.* 436, L169, 281-G9 (1994)

Discovery of a Molecular Hydrogen Jet near IC 348. *Mark J. McCaughrean, John T. Rayner, & Hans Zinnecker.* 436, L189, 282-C9 (1994)

Photon-dominated Regions around Cool Stars: The Effects of the Color Temperature of the Radiation Field. *Marco Spaans, A. G. G. M. Tielens, Ewine F. van Dishoeck, & E. L. O. Bakes.* 437, 270, 286-G7 (1994)

The Circumstellar Environment of IRAS 05338−0624. *Joseph P. McMullin, Lee G. Mundy, & Geoff A. Blake.* 437, 305, 287-D6 (1994)

Observations of Molecular Envelopes of Late-Type Stars: CRL 618, CRL 2688, CRL 3068, and CIT 6. *Sadafumi Fukasaku, Yasuhiro Hirahara, Akimasa Masuda, Kentarou Kawaguchi, Shin-ichi Ishikawa, Norio Kaifu, & William M. Irvine.* 437, 410, 288-F13 (1994)

SiO Maser Survey of the Galactic Bulge *IRAS* Sources. I. The $7° < |B| < 8°$ Strips. *H. Izumiura, S. Deguchi, O. Hashimoto, Y. Nakada, T. Onaka, T. Ono, N. Ukita, & I. Yamamura.* 437, 419, 288-G11 (1994)

10 Micron Spectroscopy of Young Stars in the ρ Ophiuchi Cloud. *M. S. Hanner, T. Y. Brooke, & A. T. Tokunaga.* 438, 250, 4-G9 (1995)

Optical Spectroscopy of Carbon-rich Proto–Planetary Nebulae. *Bruce J. Hrivnak.* 438, 341, 6-B10 (1995)

The Circumstellar Envelope of SN 1987A. I. The Shape of the Double-lobed Nebula and Its Rings and the Distance to the Large Magellanic Cloud. *Arlin P. S. Crotts, William E. Kunkel, & Stephen R. Heathcote.* 438, 724, 14-B11 (1995)

The Evolutionary Status of the Stellar Population in the ρ Ophiuchi Cloud Core. *Karen M. Strom, Jeremy Kepner, & Stephen E. Strom.* 438, 813, 15-D7 (1995)

^{26}Al and Circumstellar Envelopes. *A. E. Glassgold.* 438, L111, 20-C9 (1995)

Evidence for Chemical Processing of Precometary Icy Grains in Circumstellar Environments of Pre–Main-Sequence Stars. *Stephen C. Tegler, David A. Weintraub, Terrence W. Rettig, Yvonne J. Pendleton, Douglas C. B. Whittet, & Craig A. Kulesa.* 439, 279, 25-A9 (1995)

RY Scuti: Infrared and Radio Observations of the Mass-Loss Wind of a Massive Binary Star System. *R. D. Gehrz, T. L. Hayward, J. R. Houck, J. W. Miles, R. M. Hjellming, T. J. Jones, Charles E. Woodward, Ricarda Prentice, W. J. Forrest, S. Libonate, & S. Solomon.* 439, 417, 26-G11 (1995)

Full Synthesis Maps of Circumstellar SiC_2 in IRC +10216. *P. D. Gensheimer, Lauren Likkel, & L. E. Snyder.* 439, 445, 27-C3 (1995)

^{13}CO Interferometric Observations of the Central Core of CRL 2688. *Issei Yamamura, Takashi Onaka, Fumio Kamijo, Shuji Deguchi, & Nobuharu Ukita.* 439, L13, 29-G4 (1995)

HST Observations of the Ring around SN 1987A. *Philip C. Plait, Peter Lundqvist, Roger A. Chevalier, & Robert P. Kirshner.* 439, 730, 34-F8 (1995)

The Distribution of HCN, H^{13}CN, and CN in IRC +10216. *Aditya Dayal & John H. Bieging.* 439, 996, 38-D7 (1995)

Hα Emission and Absorption from a Localized Region above the Surface of a Be Star. *J. M. Marlborough.* 440, 303, 45-C12 (1995)

The Effect of Oblateness and Gravity Darkening on the Radiation Driving in Winds from Rapidly Rotating B Stars. *Steven R. Cranmer & Stanley P. Owocki.* 440, 308, 45-D6 (1995)

Modeling the Light-Travel-Time Effect on the Far-Infrared Size of IRC +10216. *Edward L. Wright & Frederick K. Baganoff.* 440, 322, 45-E9 (1995)

HCN Emission from Bright Carbon Stars: The Ground State Masers and Peculiar Broad Features. *Hideyuki Izumiura, Nobuharu Ukita, & Takashi Tsuji.* 440, 728, 53-C1 (1995)

The Growth of Solids, Destruction of Molecules, and Shielding of Radiation in the Young Stellar Disk of HD 45677. *Thomas M. Brown, Richard Buss, Jr., Carol Grady, & Karen Bjorkman.* 440, 865, 55-A11 (1995)

Evidence for Dust around Post T Tauri Stars. *Thomas P. Ray, Anneila I. Sargent, Steve V. W. Beckwith, Chris Koresko, & Patrick Kelly.* 440, L89, 58-B9 (1995)

Direct Measurement of the Inner Radius of the Dust Shell around the Cool Supergiant Star α Scorpii. *E. E. Bloemhof & R. M. Danen.* 440, L93, 58-C2 (1995)

Dust Particle Settling in Passive Disks around T Tauri Stars: Models and *IRAS* Observations. *Kotaro Miyake & Yoshitsugu Nakagawa.* 441, 361, 64-C13 (1995)

Polarization from Scattering in Blobs. *Arthur D. Code & Barbara A. Whitney.* 441, 400, 64-G4 (1995)

Intense Radio Outburst from the Supermassive Star η Carinae. *R. A. Duncan, S. M. White, J. Lim, G. J. Nelson, S. A. Drake, & M. R. Kundu.* 441, L73, 76-A6 (1995)

Infrared Properties of Circumstellar Dust Envelopes of Oxygen-rich Asymptotic Giant Branch Stars. *O. Hashimoto.* 442, 286, 81-B3 (1995)

A Nonlocal Calculation of Circumstellar OH Maser Emission. *Alan J. Collison & Gerald E. Nedoluha.* 442, 311, 81-D6 (1995)

The Formation of Protostellar Disks. II. Disks around Intermediate-Mass Stars. *Harold W. Yorke, Peter Bodenheimer, & Gregory Laughlin.* 443, 199, 97-G7 (1995)

Effects of Prescattering Attenuation on Spectropolarimetric Line Profiles. *Kenneth Wood & J. E. Bjorkman.* 443, 348, 100-A3 (1995)

The Circumstellar Nature of the Metallic Features in a Hot DA White Dwarf. *J. B. Holberg, F. C. Bruhweiler, & J. Andersen.* 443, 753, 108-C1 (1995)

Grain Formation around Carbon Stars. I. Stationary Outflow Models. *Michael P. Egan & Chun Ming Leung.* 444, 251, 117-A1 (1995)

A Dehydrogenation Study of Cosmic Carbon Analogue Grains. *V. Mennella, L. Colangeli, A. Blanco, E. Bussoletti, S. Fonti, P. Palumbo, & H. C. Mertins.* 444, 288, 117-D4 (1995)

The Structure of the Dust Shells around IRC +10216. *G. C. Sloan & M. P. Egan.* 444, 452, 119-G1 (1995)

The Dust Disk around the Vega-Excess Star SAO 26804. *C. J. Skinner, R. J. Sylvester, J. R. Graham, M. J. Barlow, M. Meixner, E. Keto, J. F. Arens, & J. G. Jernigan.* 444, 861, 128-C13 (1995)

Detection of Shocked Molecular Hydrogen in Infrared Companions to T Tauri Stars: Evidence for Ongoing Accretion. *T. M. Herbst, C. D. Koresko, & Christoph Leinert.* 444, L93, 130-F13 (1995)

Infrared Emission and Dynamics of Outflows in Late-Type Stars. *Željko Ivezić & Moshe Elitzur.* 445, 415, 138-C6 (1995)

The Fate of the Solid Matter Orbiting HR 4796A. *M. Jura, A. M. Ghez, Russel J. White, D. W. McCarthy, R. C. Smith, & P. G. Martin.* 445, 451, 138-F11 (1995)

A Study of Coronal X-Ray Emission from Short-Period Algol Binaries. *K. P. Singh, S. A. Drake, & N. E. White.* 445, 840, 146-F13 (1995)

A CO(3–2) Survey of Nearby Mira Variables. *K. Young.* 445, 872, 147-C1 (1995)

Wind Dynamics in SMC X-1. I. Hydrodynamic Simulation. *John M. Blondin & Jonathan W. Woo.* 445, 889, 147-D13 (1995)

Hydrodynamic Simulations of the Mass Transfer in Algol. *John M. Blondin, Mercedes T. Richards, & Michael L. Malinowski.* 445, 939, 148-B13 (1995)

First Detection of X-Ray Variability of η Carinae. *M. F. Corcoran, G. L. Rawley, J. H. Swank, & R. Petre.* 445, L121, 151-C9 (1995)

The Discovery of a Jetlike Feature from the Massive Star Herschel 36. *B. Stecklum, T. Henning, A. Eckart, R. R. Howell, & M. G. Hoare.* 445, L153, 152-A3 (1995)

The Ionized Masses of Planetary Nebulae. *David Buckley & Stephen E. Schneider.* 446, 279, 157-B2 (1995)

The Disruption of the Dense Disk in CRL 618. *Jesús Martín-Pintado, Ralph A. Gaume, Kenneth J. Johnston, & Rafael Bachiller.* 446, 687, 165-E4 (1995)

Infrared CO Emission from Young Stars: Accretion Disks and Neutral Winds. *C. J. Chandler, J. E. Carlstrom, & N. Z. Scoville.* 446, 793, 167-A7 (1995)

Luminosity Class III Stars with Excess Far-Infrared Emission. *B. Zuckerman, Sungsoo S. Kim, & T. Liu.* 446, L79, 171-A1 (1995)

He 3-1475 and Its Jets. *M. Bobrowsky, A. A. Zijlstra, E. K. Grebel, C. G. Tinney, P. te Lintel Hekkert, G. C. Van de Steene, L. Likkel, & T. R. Bedding.* 446, L89, 171-B3 (1995)

A Survey of Planetary Nebulae at Na D: Evidence for Neutral Envelopes. *Harriet L. Dinerstein, Christopher Sneden, & John Uglum.* 447, 262, 176-A7 (1995)

The Origin of the Rings around SN 1987A: An Evaluation of the Interacting-Winds Model. *Crystal L. Martin & David Arnett.* 447, 378, 177-E11 (1995)

The Subarcsecond 10 Micron Size of LkHα 101: Constraints on Circumstellar Dust. *R. M. Danen, C. R. Gwinn, & E. E. Bloemhof.* 447, 391, 177-F13 (1995)

Goddard High-Resolution Spectrograph Observations of the Interacting Binary System W Serpentis. *J. L. Weiland, S. N. Shore, E. A. Beaver, R. W. Lyons, & E. I. Rosenblatt.* 447, 401, 177-G13 (1995)

Thermal Structure of Mixing Layers in Bipolar Outflows. *Susana Lizano & Carlo Giovanardi.* 447, 742, 186-C1 (1995)

Molecular Abundances and Low-Mass Star Formation. II. Organic and Deuterated Species toward IRAS 16293−2422. *Ewine F. van Dishoeck, Geoffrey A. Blake, David J. Jansen, & T. D. Groesbeck.* 447, 760, 186-D12 (1995)

A Model for the Amorphous Carbon Grains around C-rich Objects. *A. Blanco, S. Fonti, & V. Orofino.* 448, 339, 196-G6 (1995)

1 Millimeter Polarimetry of Young Stellar Objects: Low-Mass Protostars and T Tauri Stars. *Motohide Tamura, J. H. Hough, & Saeko S. Hayashi.* 448, 346, 197-A2 (1995)

Detection of Ammonia Emission toward Oxygen-rich Evolved Stars. *Karl M. Menten & Javier Alcolea.* 448, 416, 197-G10 (1995)

High-Velocity Gas Associated with the Massive, Evolved Star G25.5+0.2. *D. S. Shepherd, E. Churchwell, & W. M. Goss.* 448, 426, 198-A9 (1995)

IRAS 08159−3543: Optical Detection of the Dusty, Neutral Bipolar Wind of a Luminous Young Stellar Object. *Th. Neckel & H. J. Staude.* 448, 832, 206-D1 (1995)

The Infrared Spectrum of the Optically Thin Dust Shell of V705 Cassiopeiae (Nova Cassiopeiae 1993). *R. D. Gehrz, M. A. Greenhouse, T. L. Hayward, J. R. Houck, C. G. Mason, & C. E. Woodward.* 448, L119, 209-E9 (1995)

The 11 Micron Emissions of Carbon Stars. *J. H. Goebel, P. Cheeseman, & F. Gerbault.* 449, 246, 213-E9 (1995)

Interferometric Observations of the SiO Masers and Dust Shell of VX Sagittarii. *L. J. Greenhill, F. Colomer, J. M. Moran, D. C. Backer, W. C. Danchi, & M. Bester.* 449, 365, 215-B7 (1995)

Vertical Disk Structure in HL Tauri. *Steven V. W. Beckwith & Christoph C. Birk.* 449, L59, 217-A4 (1995)

WFPC2 Imaging of the Circumstellar Nebulosity of HL Tauri. *Karl R. Stapelfeldt, Christopher J. Burrows, John E. Krist, John T. Trauger, J. Jeff Hester, Jon A. Holtzman, Gilda E. Ballester, Stefano Casertano, John T. Clarke, David Crisp, Robin W. Evans, John S. Gallagher III, Richard E. Griffiths, John G. Hoessel, Jeremy R. Mould, Paul A. Scowen, Alan M. Watson, & James A. Westphal.* 449, 888, 225-A4 (1995)

Detection of a Circumstellar Gas around DM Tauri: A Protoplanetary Disk around a Single Star? *Toshihiro Handa, Shoken M. Miyama, Takuya Yamashita, Toshihiro Omodaka, Yoshimi Kitamura, Masahiko Hayashi, Toshikazu Onishi, Ronald L. Snell, Stephen E. Strom, Karen M. Strom, Michael F. Skrutskie, Suzan Edwards, Nagayoshi Ohashi, Kazuyoshi Sunada, Masao Saito, Yasuo Fukui, Akira Mizuno, Jun-ichi Watanabe, & Hirokazu Kataza.* 449, 894, 225-B1 (1995)

The First 8–13 Micron Spectra of Asymptotic Giant Branch Stars in the Magellanic Clouds. *M. A. T. Groenewegen et al., C. H. Smith, P. R. Wood, A. Omont, & T. Fujiyoshi.* 449, L119, 227-A8 (1995)

Dust Emission from Protostars: The Disk and Envelope of HH 24 MMS. *Claire J. Chandler, David W. Koerner, Anneila I. Sargent, & Douglas O. S. Wood.* 449, L139, 227-D1 (1995)

Model of a Kuiper Belt Small Grain Population and Resulting Far-Infrared Emission. *D. E. Backman, A. Dasgupta, & R. E. Stencel.* 450, L35, 236-A11 (1995)

Disk Dissipation in Single and Binary Young Star Systems in Taurus. *M. Simon & L. Prato.* 450, 824, 242-A12 (1995)

Discovery of Strong Vibrationally Excited Water Masers at 658 GHz toward Evolved Stars. *Karl M. Menten & Ken Young.* 450, L67, 244-G8 (1995)

Dust Emission from L1641N: An Optically Thick Circumstellar Disk? *H. Chen, J.-H. Zhao, & N. Ohashi.* 450, L71, 245-A1 (1995)

Vortices in Circumstellar Disks. *Fred C. Adams & Richard Watkins.* 451, 314, 250-C3 (1995)

On the Electronic Structure of Small Carbon Grains of Astrophysical Interest. *V. Mennella, L. Colangeli, E. Bussoletti, G. Monaco, P. Palumbo, & A. Rotundi.* 100, 149, 47-G9 (1995)

Maps of the Molecular Emission around 18 Evolved Stars. *K. Z. Stanek, G. R. Knapp, K. Young, & T. G. Phillips.* 100, 169, 48-C8 (1995)

Stellar Contrails in Quasi-stellar Objects: The Origin of Broad Absorption Lines. *Nick Scoville & Colin Norman.* 451, 510, 254-C10 (1995)

Silicate Emission at 10 Microns in Variables on the Asymptotic Giant Branch. *G. C. Sloan & S. D. Price.* 451, 758, 257-E13 (1995)

Spatially Resolved Mid-Infrared Observations of Circumstellar Dust around AB Aurigae. *Kenneth A. Marsh, Jeffrey E. Van Cleve, M. J. Mahoney, T. L. Hayward, & J. R. Houck.* 451, 777, 257-G10 (1995)

Radio Observations of the Type Ia SN 1986G as a Test of a Symbiotic-Star Progenitor. *Christopher R. Eck, John J. Cowan, Douglas A. Roberts, Francesca R. Boffi, & David Branch.* 451, L53, 260-D6 (1995)

The Presupernova H II Region around SN 1987A. *Roger A. Chevalier & Vikram V. Dwarkadas.* 452, L45, 270-B8 (1995)

Aperture Synthesis Imaging of the Circumstellar Dust Disk around DO Tauri. *D. W. Koerner, C. J. Chandler, & A. I. Sargent.* 452, L69, 270-E14 (1995)

NGC 1333 IRAS 4: Further Multiplicity Revealed with the CSO-JCMT Interferometer. *O. P. Lay, J. E. Carlstrom, & R. E. Hills.* 452, L73, 270-F7 (1995)

Disk Accretion and Mass Loss from Young Stars. *Patrick Hartigan, Suzan Edwards, & Louma Ghandour.* 452, 736, 274-G4 (1995)

The Massive Post–Red Supergiants IRC +10420 and HD 179821. *Joel H. Kastner & David A. Weintraub.* 452, 833, 276-B7 (1995)

Study of Spectroscopic Binaries with TODCOR. IV. The Multiplicity of the Young Nearby Star HD 98800. *Guillermo Torres, Robert P. Stefanik, David W. Latham, & T. Mazeh.* 452, 870, 276-F7 (1995)

Dust Grains and the Luminosity of Circumnuclear Water Masers in Active Galaxies. *Alan J. Collison & William D. Watson.* 452, L103, 279-G3 (1995)

Constraints on Circumstellar Disk Masses in the Trapezium Cluster. *Lee G. Mundy, Leslie W. Looney, & Elizabeth A. Lada.* 452, L137, 280-D12 (1995)

An *IRAS*-based Search for New Dusty Late-Type WC Wolf-Rayet Stars. *Martin Cohen.* 100, 413, 51-G1 (1995)

The *EUVE* and *IUE* Spectra of the Hot DA White Dwarf GD 659. *J. B. Holberg, M. A. Barstow, F. C. Bruhweiler, & E. M. Sion.* 453, 313, 285-D12 (1995)

Aperture Synthesis ^{12}CO and ^{13}CO Observations of DM Tauri: 350 AU Radius Circumstellar Gas Disk. *M. Saito, R. Kawabe, M. Ishiguro, S. M. Miyama, M. Hayashi, T. Handa, Y. Kitamura, & T. Omodaka.* 453, 384, 286-D6 (1995)

Periodic Variations in Ultraviolet Spectral Lines of the B0.5 Ib Star HD 64760: Evidence for Corotating Wind Streams Rooted in Surface Variations. *Stanley P. Owocki, Steven R. Cranmer, & Alexander W. Fullerton.* 453, L37, 289-G1 (1995)

A Long-lived Disk around the Red Rectangle? *M. Jura, S. P. Balm, & C. Kahane.* 453, 721, 293-F13 (1995)

Spectropolarimetry of the Bipolar Planetary Nebula M2-9. *Susan R. Trammell, Robert W. Goodrich, & Harriet L. Dinerstein.* 453, 761, 294-D2 (1995)

Far-Infrared Water Line Emissions from Circumstellar Outflows. *Wesley Chen & David A. Neufeld.* 453, L99, 298-F11 (1995)

Disk Winds from T Tauri Stars. *John Kwan & Eugene Tademaru.* 454, 382, 304-E5 (1995)

Four Newly Identified Sources with 21 Micron Emission. *Sun Kwok, Bruce J. Hrivnak, & T. R. Geballe.* 454, 394, 304-F8 (1995)

The Oxygen Temperature of SN 1987A. *Weihong Liu & A. Dalgarno.* 454, 472, 305-G1 (1995)

The 30 Micron Emission Band in Carbon-rich Pre–Planetary Nebulae. *A. Omont, S. H. Moseley, P. Cox, W. Glaccum, S. Casey, T. Forveille, Kin-Wing Chan, R. Szczerba, R. F. Loewenstein, P. M. Harvey, & S. Kwok.* 454, 819, 313-B2 (1995)

The Circumstellar Molecular Core around L1551 IRS 5. *G. A. Fuller, E. F. Ladd, R. Padman, P. C. Myers, & Fred C. Adams.* 454, 862, 313-F7 (1995)

An Age Estimate for the β Pictoris Analog HR 4796A. *John R. Stauffer, Lee W. Hartmann, & David Barrado y Navascues.* 454, 910, 314-D1 (1995)

Circum-Protostellar Environments. III. Gas Densities and Kinetic Temperatures. *G. H. Moriarty-Schieven, P. G. Wannier, J. G. Mangum, M. Tamura, & V. K. Olmsted.* 455, 190, 320-F14 (1995)

Encounters with Protostellar Disks. II. Disruption and Binary Formation. *Clayton H. Heller.* 455, 252, 321-E10 (1995)

Vibrational Ground-State SiO $J = 1$–0 Emission in Orion IRc2 Imaged with the VLA. *Claire J. Chandler & Christopher G. De Pree.* 455, L67, 325-E13 (1995)

X-Rays from SN 1993J and Structures of Ejecta and Circumstellar Medium. *Tomoharu Suzuki & Ken'ichi Nomoto.* 455, 658, 331-A8 (1995)

Photon Heating of Envelopes around Young Stellar Objects: An Explanation for CO $J = 6$–5. *Marco Spaans, Michiel R. Hogerheijde, Lee G. Mundy, & Ewine F. van Dishoeck.* 455, L167, 334-D12 (1995)

SiO Emission from a 1000 AU Disk in Orion KL. *M. C. H. Wright, R. L. Plambeck, L. G. Mundy, & L. W. Looney.* 455, L185, 334-G3 (1995)

Subarcsecond-Resolution 86 GHz Continuum Maps of Orion KL. *R. L. Plambeck, M. C. H. Wright, L. G. Mundy, & L. W. Looney.* 455, L189, 334-G10 (1995)

STARS: CIRCUMSTELLAR SHELLS

Far-Infrared and Submillimeter-Wavelength Observations of Star-forming Dense Cores. I. Spectra. *E. F. Ladd, Fred C. Adams, S. Casey, J. A. Davidson, G. A. Fuller, D. A. Harper, P. C. Myers, & R. Padman.* 366, 203, 3-E7 (1991)

Circumstellar Material around the Massive Close Binary DH Cephei. *M. F. Corcoran.* 366, 308, 4-G8 (1991)

AG Pegasi: A Multishell Radio Source. *H. T. Kenny, A. R. Taylor, & E. R. Seaquist.* 366, 549, 9-G7 (1991)

Using SN 1987A Light Echoes to Determine Mass Loss from the Progenitor. *Arlin P. S. Crotts & William E. Kunkel.* 366, L73, 11-D1 (1991)

A Search for Circumstellar Dust around HR 10, a Proposed β Pictoris Star. *Kwang-Ping Cheng, C. A. Grady, & Frederick C. Bruhweiler.* 366, L87, 11-E7 (1991)

The Circumstellar Disks of β Pictoris Analogs. *C. A. Grady, Frederick C. Bruhweiler, K. P. Cheng, W. A. Chiu, & Y. Kondo.* 367, 296, 15-F9 (1991)

Circumstellar Material around λ Eridani (B2e). I. Geometry and Kinematics during 1987–1988. *Myron A. Smith, Geraldine J. Peters, & C. A. Grady.* 367, 302, 15-G1 (1991)

Distribution of Dust about o Ceti and α Orionis Based on 11 Micron Spatial Interferometry. *M. Bester, W. C. Danchi, C. G. Degiacomi, C. H. Townes, & T. R. Geballe.* 367, L27, 17-E1 (1991)

Detection of ^{13}C Isotopomers of HC_5N ($J = 9$–8) in the Circumstellar Envelope of IRC +10216. *M. B. Bell & P. A. Feldman.* 367, L33, 17-E8 (1991)

The Nature of the Dust around R Coronae Borealis Stars: Isolated Amorphous Carbon or Graphite Fractals? *J. H. Hecht.* 367, 635, 21-B9 (1991)

Excitation of Millimeter and Submillimeter Water Masers. *David A. Neufeld & Gary J. Melnick.* 368, 215, 25-F11 (1991)

Energy Distributions of Symbiotic Novae. *Greg L. Bryan & Sun Kwok.* 368, 252, 26-C1 (1991)

Search for Vega-like Nearby Stars with 12 Micron Excess. *Hartmut H. Aumann & Ronald G. Probst.* 368, 264, 26-D1 (1991)

The Millimeter-Wave Spectrum of Highly Vibrationally Excited SiO. *R. Mollaaghababa, C. A. Gottlieb, J. M. Vrtilek, & P. Thaddeus.* 368, L19, 28-D1 (1991)

Axisymmetric Models of Circumstellar Dust Shells. *Alan J. Collison & John D. Fix.* 368, 545, 31-G7 (1991)

Dust Properties around Evolved Stars from Far-Infrared Size Limits. *Paul M. Harvey, Daniel F. Lester, David Brock, & Marshall Joy.* 368, 558, 32-A8 (1991)

On the Possible Bipolar Nature of 21 Micron *IRAS* Sources. *Bruce J. Hrivnak & S. Kwok.* 368, 564, 32-B1 (1991)

IRAS Low-Resolution Spectral Observations of the 10 and 18 Micron Silicate Emission Features. *Janet P. Simpson.* 368, 570, 32-B13 (1991)

Astronomical Detection of H_2CCC. *J. Cernicharo, C. A. Gottlieb, M. Guélin, T. C. Killian, G. Paubert, P. Thaddeus, & J. M. Vrtilek.* 368, L39, 35-C7 (1991)

Astronomical Detection of H_2CCCC. *J. Cernicharo, C. A. Gottlieb, M. Guélin, T. C. Killian, P. Thaddeus, & J. M. Vrtilek.* 368, L43, 35-C11 (1991)

Circular Polarization in 1612 MHz OH Maser Emission from OH/IR Stars. *Philip J. Zell & John D. Fix.* 369, 506, 44-A9 (1991)

First Results from the Faint Object Camera: SN 1987A. *P. Jakobsen, R. Albrecht, C. Barbieri, J. C. Blades, A. Boksenberg, P. Crane, J. M. Deharveng, M. J. Disney, T. M. Kamperman, I. R. King, F. Macchetto, C. D. Mackay, F. Paresce, G. Weigelt, D. Baxter, P. Greenfield, R. Jedrzejewski, A. Nota, W. B. Sparks, R. P. Kirshner, & N. Panagia.* 369, L63, 46-B1 (1991)

A Survey for Infrared Excesses among High Galactic Latitude SAO Stars. *Robert E. Stencel & Dana E. Backman.* 75, 905, 14-A1 (1991)

Mass Outflow in the Nearby Proto–Planetary System β Pictoris. *Frederick C. Bruhweiler, Yoji Kondo, & C. A. Grady.* 371, L27, 66-D7 (1991)

The Carbon-rich Proto–Planetary Nebula IRAS 22272+5435. *Bruce J. Hrivnak & Sun Kwok.* 371, 631, 69-D6 (1991)

Aberration and Advection Effects in Expanding Spherically Symmetric Shells. *A. Peraiah.* 371, 673, 70-A1 (1991)

New OH Main-Line Detections of OH/IR Stars. *Dale F. Dickinson & B. E. Turner.* 75, 1323, 23-A9 (1991)

The Mid-Infrared Spectrum of the Carbon Star HD 38218 and Its Possible Relation to Polycyclic Aromatic Hydrocarbons. *Richard H. Buss, Jr., A. G. G. M. Tielens, & Theodore P. Snow.* 372, 281, 77-D8 (1991)

Detection of Silicates in the β Pictoris Disk. *C. M. Telesco & R. F. Knacke.* 372, L29, 79-D7 (1991)

Mixing Layers in Stellar Outflows. *J. Cantó & A. C. Raga.* 372, 646, 83-F7 (1991)

The SiH Vibrational Stretch as an Indicator of the Chemical State of Interstellar Grains. *Marla H. Moore, Toshihiko Tanabé, & Joseph A. Nuth.* 373, L31, 91-D7 (1991)

Two Micron Morphology of Candidate Protostars. *Motohide Tamura, Ian Gatley, William Waller, & Michael W. Werner.* 374, L25, 103-E7 (1991)

Stellar Occultation of Polarized Light from Circumstellar Electrons. II. Flat Envelopes Viewed at Arbitrary Inclination. *Geoffrey K. Fox & John C. Brown.* 375, 300, 114-F1 (1991)

Observations and Chemistry of Interstellar Refractory Elements. *B. E. Turner.* 376, 573, 133-E1 (1991)

Proto–Planetary Nebulae. II. The Shock-heated Bipolar Nebulae GL 618 and M2-56. *Robert W. Goodrich.* 376, 654, 134-D12 (1991)

Dust Temperatures in the Circumstellar Shell of TX Piscium. *J. Wirsich.* 377, 285, 141-E1 (1991)

First Results from the Goddard High-Resolution Spectrograph: Resolved Velocity and Density Structure in the β Pictoris Circumstellar Gas. *A. Boggess, Frederick C. Bruhweiler, C. A. Grady, Dennis C. Ebbets, Yoji Kondo, L. M. Trafton, John C. Brandt, & S. R. Heap.* 377, L49, 143-F1 (1991)

Polycyclic Aromatic Hydrocarbon Optical Properties and Contribution to the Acceleration of Stellar Outflows. *Isabelle Cherchneff, John R. Barker, & Alexander G. G. M. Tielens.* 377, 541, 146-D6 (1991)

321 GHz Submillimeter Water Masers around Evolved Stars. *Karl M. Menten & Gary J. Melnick.* 377, 647, 147-F8 (1991)

IRAS 17380−3031: A New Dusty Late WC-Type Wolf-Rayet Star. *Martin Cohen, K. A. van der Hucht, P. M. Williams, & P. S. Thé.* 378, 302, 154-F7 (1991)

A Gaseous Tail Ablated from the Supergiant IRS 7 near the Galactic Center. *E. Serabyn, J. H. Lacy, & J. M. Achtermann.* 378, 557, 159-C9 (1991)

The Molecular Envelope of NGC 7027. *John H. Bieging, David Wilner, & Harley A. Thronson, Jr.* 379, 271, 166-D9 (1991)

LMC-2 as the Blowout of a Hot Superbubble. *Qingde Wang & David J. Helfand.* 379, 327, 167-B5 (1991)

An Observational Connection between Circumstellar Disk Mass and Molecular Outflows. *Sylvie Cabrit & Philippe André.* 379, L25, 169-C6 (1991)

The Circumstellar Shell of SN 1987A. *Ding Luo & Richard McCray.* 379, 659, 172-G9 (1991)

Stellar Occultation of Polarized Light from Circumstellar Electrons. III. General Axisymmetric Envelopes. *Geoffrey K. Fox.* 379, 663, 173-A1 (1991)

Models for Light Scattering by Dust around Herbig-Haro Objects. *Alberto Noriega-Crespo, Nuria Calvet, & Karl-Heinz Böhm.* 379, 676, 173-B1 (1991)

Effects of Aberration and Advection on Line Formation. *A. Peraiah.* 380, 212, 178-F1 (1991)

Properties of the SN 1987A Circumstellar Ring and the Distance to the Large Magellanic Cloud. *N. Panagia, R. Gilmozzi, F. Macchetto, H.-M. Adorf, & R. P. Kirshner.* 380, L23, 181-D1 (1991)

Circumstellar Emission from SN 1987A. *Peter Lundqvist & Claes Fransson.* 380, 575, 185-D1 (1991)

Abundances in Red Giant Stars: Nitrogen Isotopes in Carbon-rich Molecular Envelopes. *P. G. Wannier, B-G Andersson, H. Olofsson, N. Ukita, & K. Young.* 380, 593, 185-E8 (1991)

Particle Emissivity in Circumstellar Disks. *Steven V. W. Beckwith & Anneila I. Sargent.* 381, 250, 192-B1 (1991)

A Model for Tidally Driven Eccentric Instabilities in Fluid Disks. *Stephen H. Lubow.* 381, 259, 192-B12 (1991)

Simulations of Tidally Driven Eccentric Instabilities with Application to Superhumps. *Stephen H. Lubow.* 381, 268, 192-C9 (1991)

R Aquarii: Hα Map of Subarcsecond Inner Structure. *E. K. Hege, C. K. Allen, & W. J. Cocke.* 381, 543, 197-D6 (1991)

Are FU Orionis Stars Younger than T Tauri Stars? Submillimeter Constraints on Circumstellar Disks. *David A. Weintraub, Göran Sandell, & William D. Duncan.* 382, 270, 203-E8 (1991)

CN and HCN in the Infrared Spectrum of IRC +10216. *G. R. Wiedemann, Kenneth H. Hinkle, John J. Keady, D. Deming, & D. E. Jennings.* 382, 321, 204-B10 (1991)

The Molecular Structure around HL Tauri. *A. I. Sargent & S. V. W. Beckwith.* 382, L31, 205-D6 (1991)

On the Evolution of Gravitationally Unstable Protostellar Disks. *Leslie Tomley, Patrick Cassen, & Thomas Steiman-Cameron.* 382, 530, 208-B6 (1991)

Far-Infrared and Submillimeter Wavelength Observations of Star-forming Dense Cores. II. Images. *E. F. Ladd, Fred C. Adams, S. Casey, J. A. Davidson, G. A. Fuller, D. A. Harper, P. C. Myers, & R. Padman.* 382, 555, 208-D7 (1991)

The Temperature of the Circumstellar Envelope of Alpha Orionis. *Bernadette Rodgers & Alfred E. Glassgold.* 382, 606, 209-B1 (1991)

On the Nature of the Excess 100 Micron Flux Associated with Carbon Stars. *Michael P. Egan & Chun Ming Leung.* 383, 314, 216-B1 (1991)

The Dusty Envelopes of FU Orionis Variables. *Scott J. Kenyon & Lee W. Hartmann.* 383, 664, 222-E1 (1991)

The Dust Debris around HR 4796. *M. Jura.* 383, L79, 226-F1 (1991)

STARS: COLLAPSED

Stability of a Collapsed Star in Bimetric General Relativity. II. *Amos Harpaz & Nathan Rosen.* 371, 254, 63-C9 (1991)

Numerical Solution of the General Relativistic Boltzmann Equation for Massive and Massless Particles. *Hugh Harleston & Katherine A. Holcomb.* 372, 225, 76-F13 (1991)

Stationary Accelerators around Keplerian Disks of Aligned Magnetized Collapsed Objects: Pair Production and Gamma-Ray Emission. *K. S. Cheng & M. Ruderman.* 373, 187, 88-C9 (1991)

High-Temperature Neutrino-Nucleus Processes in Stellar Collapse. *George M. Fuller & Bradley S. Meyer.* 376, 701, 135-A12 (1991)

Neutron Star and Black Hole Binaries in the Galaxy. *Ramesh Narayan, Tsvi Piran, & Amotz Shemi.* 379, L17, 169-B11 (1991)

Magnetohydrodynamic Cosmologies. *R. Portugal & I. Damião Soares.* 380, 330, 182-D5 (1991)

Diffusion Processes in the Collapse of a Radiating Spherical Body. *R. Chan, L. Herrera, J. A. F. Pacheco, & N. O. Santos.* 382, 255, 203-D1 (1991)

STARS: CORONAE

Magnetic Confinement, Alfvén Wave Reflection, and the Origins of X-Ray and Mass-Loss "Dividing Lines" for Late-Type Giants and Supergiants. *R. Rosner, C.-H. An, Z. E. Musielak, R. L. Moore, & S. T. Suess.* 372, L91, 85-E5 (1991)

Flux-limited Diffusion in a Scattering Medium. *Fulvio Melia & Gregory J. Zylstra.* 374, 732, 108-B9 (1991)

Digging in the Coronal Graveyard: A *ROSAT* Observation of the Red Giant Arcturus. *Thomas R. Ayres, Thomas A. Fleming, & Juergen H. M. M. Schmitt.* 376, L45, 137-C7 (1991)

Isothermal, Compton-heated Coronae above Accretion Disks. *Eve C. Ostriker, Christopher F. McKee, & Richard I. Klein.* 377, 593, 147-B3 (1991)

Radiative-hydrodynamical Simulations of Accretion Disk Coronae. *Fulvio Melia, Gregory J. Zylstra, & Bruce Fryxell.* 377, L101, 150-E11 (1991)

Numerical Simulations of Flares on M Dwarf Stars. I. Hydrodynamics and Coronal X-Ray Emission. *Chung-Chieh Cheng & Roberto Pallavicini.* 381, 234, 191-G12 (1991)

The Coronal Dividing Line in the *ROSAT* X-Ray All-Sky Survey. *Bernhard Haisch, J. H. M. M. Schmitt, & C. Rosso.* 383, L15, 219-C1 (1991)

A Study of the Stellar Population in the Chamaeleon Dark Clouds. *Lisa S. Gauvin & Karen M. Strom.* 385, 217, 14-F1 (1992)

X-Ray–heated Models of Stellar Flare Atmospheres: Theory and Comparison with Observations. *Suzanne L. Hawley & George H. Fisher.* 78, 565, 10-F1 (1992)

Inhibition of Electron Thermal Conduction by Electromagnetic Instabilities. *Amir Levinson & David Eichler.* 387, 212, 39-E5 (1992)

X-Ray Activity as Statistical Age Indicator: The Disk G–K Giants. *G. Micela, A. Maggio, & G. S. Vaiana.* 388, 171, 51-B5 (1992)

First Conclusive Evidence for Rotational Modulation of Stellar Radio Emission. *Jeremy Lim, Graham J. Nelson, Catarina Castro, David Kilkenny, & François van Wyk.* 388, L27, 52-C7 (1992)

Time Variability Studies with Photon-counting Imaging Detectors. I. A Maximum Likelihood Technique. *S. Sciortino & G. Micela.* 388, 595, 57-E11 (1992)

ROSAT X-Ray All-Sky Survey Observations of Hybrid Stars. *Bernhard Haisch, J. H. M. M. Schmitt, & C. Rosso.* 388, L61, 59-C7 (1992)

On the Density and Field Sensitivities of Dielectronic Recombination. *Daniel B. Reisenfeld, John C. Raymond, Albert R. Young, & John L. Kohl.* 389, L37, 66-E5 (1992)

Transient Periodicities in X-Ray–active Red Dwarfs: First Results from Mount Cuba and Interpretation with an Oscillating Loop Model. *D. J. Mullan, R. B. Herr, & S. Bhattacharyya.* 391, 265, 89-C1 (1992)

Coordinated *Ginga*, *IUE*, and VLA Observations of Stellar Activity in σ^2 Coronae Borealis. *R. A. Stern, Y. Uchida, F. Walter, O. Vilhu,*

D. Hannikainen, A. Brown, A. Veale, & B. M. Haisch. 391, 760, 97-D7 (1992)

ROSAT X-Ray Observations of Hybrid Stars. *D. Reimers & J. H. M. M. Schmitt.* 392, L55, 113-B11 (1992)

Radiative-hydrodynamical Simulations of X-Ray Burst–induced Accretion Disk Coronae. *Fulvio Melia, Gregory J. Zylstra, & Bruce Fryxell.* 396, L27, 160-E8 (1992)

Radio Continuum and X-Ray Properties of the Coronae of RS Canum Venaticorum and Related Active Binary Systems. *Stephen A. Drake, Theodore Simon, & Jeffrey L. Linsky.* 82, 311, 53-F5 (1992)

Why All Stars Should Possess Circumstellar Temperature Inversions. *Jack D. Scudder.* 398, 319, 185-F11 (1992)

An Interpretation of the Multipeaked Structure in X-Ray Bursts. *Fulvio Melia & Gregory J. Zylstra.* 398, L53, 188-A1 (1992)

First Results from *ROSAT* All-Sky Survey Observations of the Hyades Cluster. *Robert A. Stern, Jürgen H. M. M. Schmitt, Cristina Rosso, John P. Pye, Simon T. Hodgkin, & John R. Stauffer.* 399, L159, 208-D9 (1992)

Ginga Observations of X-Ray Flares on Algol. *R. A. Stern, Y. Uchida, S. Tsuneta, & F. Nagase.* 400, 321, 212-G13 (1992)

The Far-Infrared and X-Ray Radiation of Active Late-Type Stars: Suggestions for Strong Spottedness. *M. M. Katsova & V. Tsikoudi.* 402, L9, 6-C1 (1993)

ROSAT Detections of X-Ray Emission from Young B-Type Stars. *J. H. M. M. Schmitt, H. Zinnecker, R. Cruddace, & F. R. Harnden, Jr.* 402, L13, 6-C8 (1993)

The Distant Future of Solar Activity: A Case Study of β Hydri. III. Transition Region, Corona, and Stellar Wind. *D. Dravins, P. Linde, T. R. Ayres, J. L. Linsky, B. Monsignori-Fossi, T. Simon, & F. Wallinder.* 403, 412, 18-G13 (1993)

Discovery of Remarkably Intense Radio Emission from a Young and Rapidly Rotating dMe Star. *Jeremy Lim.* 405, L33, 47-F1 (1993)

X-Ray/Microwave Relation of Different Types of Active Stars. *Manuel Güdel & Arnold O. Benz.* 405, L63, 54-C13 (1993)

Resistive Dissipation and Magnetic Field Topology in the Stellar Corona. *E. N. Parker.* 407, 342, 73-C11 (1993)

Stellar Coronae at the End of the Main Sequence: A *ROSAT* Survey of the Late M Dwarfs. *Thomas A. Fleming, Mark S. Giampapa, J. H. M. M. Schmitt, & Jay A. Bookbinder.* 410, 387, 116-G8 (1993)

The *ROSAT* All-Sky Survey of Active Binary Coronae. I. Quiescent Fluxes for the RS Canum Venaticorum Systems. *Robert C. Dempsey, Jeffrey L. Linsky, Thomas A. Fleming, & J. H. M. M. Schmitt.* 86, 599, 22-C3 (1993)

Mg II and Lyα Fluxes in M Dwarfs: Evaluation of an Acoustic Model. *D. J. Mullan & Q. Q. Cheng.* 412, 312, 146-A9 (1993)

On the Structure of Solar and Stellar Coronae: Loops and Loop Heat Transport. *Christof Litwin & Robert Rosner.* 412, 375, 146-F13 (1993)

The *ROSAT* All-Sky Survey of Active Binary Coronae. II. Coronal Temperatures of the RS Canum Venaticorum Systems. *Robert C. Dempsey, Jeffrey L. Linsky, J. H. M. M. Schmitt, & T. A. Fleming.* 413, 333, 160-D5 (1993)

A Study of the Spatial and Spectral Characteristics of the Corona of AR Lacertae. *R. Ottmann, J. H. M. M. Schmitt, & M. Kürster.* 413, 710, 165-C6 (1993)

Extreme Ultraviolet Explorer Observations of the RS Canum Venaticorum Systems AR Lacertae and II Pegasi. *R. J. Patterer, P. W. Vedder, P. Jelinsky, A. Brown, & S. Bowyer.* 414, L57, 185-B13 (1993)

Extreme Ultraviolet Emission from Late-Type Stars: Initial Results from *Extreme Ultraviolet Explorer*. *Peter W. Vedder, Robert J. Patterer, Patrick Jelinsky, Alex Brown, & Stuart Bowyer.* 414, L61, 185-C5 (1993)

Discrete High-Frequency *p*-Modes as Probes of Structures in the Chromosphere, Transition Region, and Lower Corona of the Sun. *Yu-Qing Lou.* 414, L141, 186-E1 (1993)

The Evolution of Stellar Coronae: Initial Results from a *ROSAT* PSPC Observation of IC 2391. *Brian M. Patten & Theodore Simon.* 415, L123, 200-D1 (1993)

ROSAT X-Ray Detection of ϵ Taurus: Revisiting the Coronal and Transition Region Emission of the Hyades Giants. *A. Collura, A. Maggio, G. Micela, S. Sciortino, F. R. Harnden, Jr., & R. Rosner.* 416, 204, 203-E8 (1993)

Detection of the First Coronal X-Ray Source about a White Dwarf. *Thomas A. Fleming, Klaus Werner, & Martin A. Barstow.* 416, L79, 216-E6 (1993)

Effects of Coronal and Shock-produced X-Rays on the Ionization Distribution in Hot Star Winds. *J. J. MacFarlane, W. L. Waldron, M. F. Corcoran, M. J. Wolff, P. Wang, & J. P. Cassinelli.* 419, 813, 257-F11 (1993)

Simultaneous Optical and *ROSAT* Soft X-Ray Observations of Impulsive Bursts on the Flare Star UV Ceti. *J. H. M. M. Schmitt, Bernhard Haisch, & H. Barwig.* 419, L81, 259-E7 (1993)

Acoustic Waves in M Dwarfs: Maintaining a Corona. *D. J. Mullan & Q. Q. Cheng.* 420, 392, 5-F8 (1994)

A Far-Ultraviolet Flare on a Pleiades G Dwarf. *T. R. Ayres, J. R. Stauffer, Theodore Simon, R. A. Stern, S. K. Antiochos, G. S. Basri, J. A. Bookbinder, A. Brown, G. A. Doschek, J. L. Linsky, L. W. Ramsey, & F. M. Walter.* 420, L33, 7-E4 (1994)

The Extreme Ultraviolet Coronal Spectrum of the Solar-Type Star χ^1 Orionis. *Bernhard Haisch, Jeremy J. Drake, & J. H. M. M. Schmitt.* 421, L39, 22-A5 (1994)

Detection of Rotational Modulation in the Coronal Extreme-Ultraviolet Emission from V711 Tauri? *Jeremy J. Drake, Alex Brown, Robert J. Patterer, Peter W. Vedder, Stuart Bowyer, & Edward F. Guinan.* 421, L43, 22-A10 (1994)

Observing Stellar Coronae with the Goddard High Resolution Spectrograph. I. The dMe Star AU Microscopii. *S. P. Maran, R. D. Robinson, S. N. Shore, J. W. Brosius, K. G. Carpenter, B. E. Woodgate, J. L. Linsky, A. Brown, P. B. Byrne, M. R. Kundu, S. White, J. C. Brandt, R. A. Shine, & F. M. Walter.* 421, 800, 28-B10 (1994)

Radio Constraints on Coronal Models for dMe Stars. *S. M. White, J. Lim, & M. R. Kundu.* 422, 293, 33-F11 (1994)

Accretion Disk Corona Line Emission from X0614+091. *D. J. Christian, N. E. White, & J. H. Swank.* 422, 791, 41-F6 (1994)

ROSAT Observations of Stellar Flares. *J. H. M. M. Schmitt.* 90, 735, 12-G12 (1994)

Quiescent Microwave Emission from Late-Type Stars. *Manuel Güdel.* 90, 743, 13-A8 (1994)

ROSAT All-Sky Survey Observations of X-Ray Variability in Cool Giant Stars. *Bernhard Haisch & J. H. M. M. Schmitt.* 426, 716, 107-C13 (1994)

Coronal X-Ray Sources in the Hyades: A 40 Kilosecond *ROSAT* Pointing. *Robert A. Stern, Jürgen H. M. M. Schmitt, John P. Pye, Simon T. Hodgkin, John R. Stauffer, & Theodore Simon.* 427, 808, 122-F6 (1994)

Stellar Winds with Non-WKB Alfvén Waves. I. Wind Models for Solar Coronal Conditions. *K. B. MacGregor & P. Charbonneau.* 430, 387, 164-A9 (1994)

A Volume-limited *ROSAT* Survey of Extreme Ultraviolet Emission from All Nondegenerate Stars within 10 Parsecs. *Brian E. Wood, Alexander Brown, Jeffrey L. Linsky, Barry J. Kellett, Gordon E. Bromage, Simon T. Hodgkin, & John P. Pye.* 93, 287, 45-E5 (1994)

Gravitational Damping of Alfvén Waves in Stellar Atmospheres and Winds. *I. K. Khabibrakhmanov & D. J. Mullan.* 430, 814, 172-A7 (1994)

Emission Lines from X-Ray–heated Accretion Disks in Low-Mass X-Ray Binaries. *Yuan-Kuen Ko & Timothy R. Kallman.* 431, 273, 179-E4 (1994)

X-Ray Emission on Hybrid Stars: *ROSAT* Observations of α Trianguli Australis and ι Aurigae. *V. Kashyap, R. Rosner, F. R. Harnden, Jr., A. Maggio, G. Micela, & S. Sciortino.* 431, 402, 181-A13 (1994)

ROSAT X-Ray Observations of Late-Type Evolved Stars: On the Relationship between Coronal Temperatures and Luminosities. *A. Maggio, S. Sciortino, & F. R. Harnden, Jr.* 432, 701, 204-F11 (1994)

Acoustic Heating of the Chromosphere and Cool Corona in the F Star α Canis Minoris (Procyon). *D. J. Mullan & Q. Q. Cheng.* 435, 435, 249-D7 (1994)

Accretion Disk Coronae in High-Luminosity Systems. *Stephen D. Murray, John I. Castor, Richard I. Klein, & Christopher F. McKee.* 435, 631, 254-F13 (1994)

ASCA Observations of the Coronal X-Ray Emission of Algol. *A. Antunes, F. Nagase, & N. E. White.* 436, L83, 269-G3 (1994)

ASCA X-Ray Spectra of the Active Single Stars β Ceti and π^1 Ursae Majoris. *S. A. Drake, K. P. Singh, N. E. White, & Theodore Simon.* 436, L87, 269-G11 (1994)

The Heating of Nova Ejecta by Radioactive Decays of the β-unstable Nuclei. *Shlomi Pistinner, Giora Shaviv, & Sumner Starrfield.* 437, 794, 296-E4 (1994)

Determination of Plasma Temperatures and Luminosities Using Multiple Extreme-Ultraviolet and X-Ray Filters. *Brian E. Wood, Alexander Brown, & Jeffrey L. Linsky.* 438, 350, 6-C9 (1995)

The RIASS Coronathon: Joint X-Ray and Ultraviolet Observations of Normal F–K Stars. *Thomas R. Ayres, T. A. Fleming, T. Simon, B. M. Haisch, A. Brown, D. Lenz, W. Wamsteker, D. de Martino, C. Gonzalez, J. Bonnell, J. M. Mas-Hesse, C. Rosso, J. H. M. M. Schmitt, J. Trümper, W. Voges,*

J. Pye, R. C. Dempsey, J. L. Linsky, E. F. Guinan, G. M. Harper, C. Jordan, B. M. Montesinos, I. Pagano, & M. Rodonò. 96, 223, 4-E7 (1995)
Phase Lags in Cygnus X-1. *M. Coleman Miller.* 441, 770, 72-E6 (1995)
The Transition Regions of Capella. *Jeffrey L. Linsky, Brian E. Wood, Philip Judge, Alexander Brown, Catherine Andrulis, & Thomas R. Ayres.* 442, 381, 82-C9 (1995)
On the Origin of "Dividing Lines" for Late-Type Giants and Supergiants. *R. Rosner, Z. E. Musielak, F. Cattaneo, R. L. Moore, & S. T. Suess.* 442, L25, 84-G11 (1995)
Stellar Coronal Abundances. II. The First Ionization Potential Effect and Its Absence in the Corona of Procyon. *Jeremy J. Drake, J. Martin Laming, & Kenneth G. Widing.* 443, 393, 100-E2 (1995)
New Model of Iron Spectra in the Extreme Ultraviolet and Application to SERTS and *EUVE* Observations: A Solar Active Region and Capella. *N. S. Brickhouse, J. C. Raymond, & B. W. Smith.* 97, 551, 19-F4 (1995)
Circular Polarization in the Radio Emission of RS Canum Venaticorum Binaries. *Stephen M. White & Elena Franciosini.* 444, 342, 118-C1 (1995)
Coronal Heating in Flare Stars: Resonant MHD Absorption? *D. J. Mullan & M. Johnson.* 444, 350, 118-C12 (1995)
EUVE Observations of Algol: Detection of a Continuum and Implications for the Coronal [Fe/H] Abundance. *Robert A. Stern, James R. Lemen, Jürgen H. M. M. Schmitt, & John P. Pye.* 444, L45, 121-G7 (1995)
Optical Diagnostics of Coronal Loop Interactions. *Vladimir S. Airapetian & Raymond N. Smartt.* 445, 489, 139-C6 (1995)
A Study of Coronal X-Ray Emission from Short-Period Algol Binaries. *K. P. Singh, S. A. Drake, & N. E. White.* 445, 840, 146-F13 (1995)
X-Ray Emission from the Sun in Its Youth and Old Age. *J. D. Dorren, M. Güdel, & E. F. Guinan.* 448, 431, 198-B3 (1995)
Spectroscopic *EUVE* Observations of the Active Star AB Doradus. *Slavek M. Rucinski, Rolf Mewe, Jelle S. Kaastra, Osmi Vilhu, & Stephen M. White.* 449, 900, 225-B11 (1995)
The *Einstein* Extended Medium-Sensitivity Survey Second Epoch: Results for the Stars. *Thomas A. Fleming, Silvano Molendi, Tommaso Maccacaro, & Anna Wolter.* 99, 701, 44-D12 (1995)
Spectral and Temporal Characteristics of X-Ray–bright Stars in the Pleiades. *Marc Gagné, Jean-Pierre Caillault, & John R. Stauffer.* 450, 217, 231-A11 (1995)
The X-Ray View of the Low-Mass Stars in the Solar Neighborhood. *Jürgen H. M. M. Schmitt, Thomas A. Fleming, & Mark S. Giampapa.* 450, 392, 233-C13 (1995)
Correlations of Coronal X-Ray Emission with Activity, Mass, and Age of the Nearby K and M Dwarfs. *Thomas A. Fleming, Jürgen H. M. M. Schmitt, & Mark S. Giampapa.* 450, 401, 233-D12 (1995)
Radio Detection of Late-Type (G–K) Dwarf Stars in the Pleiades. *Jeremy Lim & Stephen M. White.* 453, 207, 284-A5 (1995)
ROSAT Pointed Observations of Cool Magnetic White Dwarfs. *Z. E. Musielak, J. G. Porter, & J. M. Davis.* 453, L33, 289-F8 (1995)
Stellar Winds with Non-WKB Alfvén Waves. II. Wind Models for Cool, Evolved Stars. *P. Charbonneau & K. B. MacGregor.* 454, 901, 314-C3 (1995)

STARS: R CORONAE BOREALIS

The Nature of the Dust around R Coronae Borealis Stars: Isolated Amorphous Carbon or Graphite Fractals? *J. H. Hecht.* 367, 635, 21-B9 (1991)

STARS: DIAMETERS

Distribution of Dust about o Ceti and α Orionis Based on 11 Micron Spatial Interferometry. *M. Bester, W. C. Danchi, C. G. Degiacomi, C. H. Townes, & T. R. Geballe.* 367, L27, 17-E1 (1991)
Multichannel Astrometric Photometer–based Parallaxes of Evolved Stars: χ Cygni, 51 Andromedae, and OP Andromedae. *John W. Stein.* 377, 669, 148-A5 (1991)

STARS: DISTANCES

The Absolute Magnitudes of LMC RR Lyrae Variables and the Ages of Galactic Globular Clusters. *Alistair R. Walker.* 390, L81, 85-A7 (1992)
A Provisional RR Lyrae Distance Scale. *Norman R. Simon & Christine M. Clement.* 410, 526, 120-C1 (1993)
Pulsar Distances and the Galactic Distribution of Free Electrons. *J. H. Taylor & J. M. Cordes.* 411, 674, 138-B3 (1993)
The Tip of the Red Giant Branch as a Distance Indicator for Resolved Galaxies. *Myung Gyoon Lee, Wendy L. Freedman, & Barry F. Madore.* 417, 553, 226-B13 (1993)
Proper Motions and Radial Velocities in the Globular Cluster M22 and the Cluster Distance. *Ruth C. Peterson & Kyle M. Cudworth.* 420, 612, 10-C7 (1994)
Modeling the Light-Travel-Time Effect on the Far-Infrared Size of IRC +10216. *Edward L. Wright & Frederick K. Baganoff.* 440, 322, 45-E9 (1995)
H I Line Measurements of Eight Southern Pulsars. *Bärbel Koribalski, Simon Johnston, J. M. Weisberg, & W. Wilson.* 441, 756, 72-C13 (1995)
MAP-based Trigonometric Parallaxes of Open Clusters: Coma. *George Gatewood.* 445, 712, 145-A7 (1995)
On Spectral Line Formation and Measurement in Cepheids: Implications to Distance Determination. *C. N. Sabbey, D. D. Sasselov, M. S. Fieldus, J. B. Lester, K. A. Venn, & R. P. Butler.* 446, 250, 156-F2 (1995)
Neutral Hydrogen Absorption Measurements of Four Distant Pulsars and the Electron Density in the Inner Galaxy. *J. M. Weisberg, M. H. Siegel, D. A. Frail, & S. Johnston.* 447, 204, 175-A10 (1995)
A 325 Square Degree Survey of B-Type Stars at High Galactic Latitudes. *J. E. Little, P. L. Dufton, F. P. Keenan, N. C. Hambly, E. S. Conlon, P. J. F. Brown, & L. Miller.* 447, 783, 186-F11 (1995)
MAP-based Trigonometric Parallaxes of Altair and Vega. *George Gatewood & Joost Kiewiet de Jonge.* 450, 364, 233-A4 (1995)
CM Draconis and YY Geminorum: Agreement between Theory and Observation. *Gilles Chabrier & Isabelle Baraffe.* 451, L29, 252-E6 (1995)
The Calibration of Novae as Distance Indicators. *Massimo Della Valle & Mario Livio.* 452, 704, 274-D4 (1995)
First Observation of Parallax in a Gravitational Microlensing Event. *C. Alcock, R. A. Allsman, D. Alves, T. S. Axelrod, D. P. Bennett, K. H. Cook, K. C. Freeman, K. Griest, J. Guern, M. J. Lehner, S. L. Marshall, B. A. Peterson, M. R. Pratt, P. J. Quinn, A. W. Rodgers, C. W. Stubbs, & W. Sutherland (The MACHO Collaboration).* 454, L125, 316-C1 (1995)
Interstellar Extinction from 0.35 to 2.2 Microns: A Study Based on Luminous Southern Stars. *Lida He, D. C. B. Whittet, D. Kilkenny, & J. H. Spencer Jones.* 101, 335, 58-D12 (1995)
